Objective

- The sustainability statement shall include information in relation to ESRS S3 Affected communities if
 this topic relates to material impacts, risks and opportunities and cover the reporting areas listed in
 paragraph 5 of ESRS 1. When only one particular sub-topic prescribed by this Standard is material,
 paragraph 30 of ESRS 1 applies.
- 2. The objective of this Standard is to set out DRs providing information in relation to the reporting areas referred above that implement and complement the cross-cutting provisions of ESRS 1 *General Requirements* and ESRS 2 *General Disclosures*. The objective of this standard is also to enable *users* to understand the extent to which the undertaking aligns or complies with international and European human rights instruments and conventions, including the International Bill of Human Rights, the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinational Enterprises, and the UN Declaration on the Rights of Indigenous People.
- 3. In this Standard, each DR is introduced by a disclosure objective, with the exception of policies, *actions* and *targets*, for which the provisions in ESRS 2 GDR-P, GDR-A and GDR-T provide the necessary framing for the relevant disclosures.
- 4. This Standard sets outs the DRs related to *affected communities*, in particular with respect to the following sub-topics:
 - (a) communities' economic, social and cultural rights (land-related *impacts*, security-related impacts, adequate housing and food, water and sanitation);
 - (b) communities' civil and political rights (freedom of expression, freedom of assembly, impacts on human rights defenders); and
 - (c) rights of *indigenous peoples* (*free, prior and informed consent (FPIC)*), self-determination, cultural rights).

Interaction with other topical ESRS

- 5. Social and environmental *topics* closely interact with each other. The main points of interaction between ESRS S3 and the other topical standards are the following:
 - (a) All the social standards, i.e. ESRS S1 Own Workforce, ESRS S2 Workers in the value chain, ESRS S3 Affected Communities, ESRS S4 Consumers and End-Users, are aligned in terms of content and structure and are closely related to each other. The disclosures in the Social Standards address material information needed for reporting on impacts on people, risks and opportunities related to each stakeholder group, including in relation to sustainability due diligence.
 - (b) This Standard is related to the environmental standards (ESRS E1 to E5) because impacts on *affected communities* may stem from environmental impacts, risks and opportunities that the undertaking discloses under those. For example, the undertaking's climate or biodiversity *transition plan* may affect the lands, territories and natural resources of *indigenous peoples*.
