Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	anticipated financial effects are hypothetical to anticpate before measures have been taken and do not contain any valuable information	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Same as above	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	An estimation of monetary amount and percentage of assets can make the process more complex	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	undertakings need to be able to communicate past achievements	E1	E1-6 - Targets related to climate change	25.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	If a company has not adopted a climate transition plan it should not be required to explicitely disclose this fact. Not making any disclosures in this regard is sufficient for the users of the sustainability report to understand that no climate transition plan exists. Otherwise, companies that do not have a climate transition plan would be "put on the spot" which would result in a de facto comply-or-explain-mechanism. Moreover, the mandatory obligation to adopt and put into effect a climate transition plan for companies in scope of the CSDDD is currently re-negotiated on EU level. Hence, the ESRS should not go beyond or preempt the result of these parallel political negotiations.	E1	E1-1 - Transition plan for climate change mitigation	15.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				Point 14 a (16 amended) requires disclosure about 'financial and investment planning.' Recommend that this aligns and potentially helps comply with a similar requirement in Empowering Consumers Directive (ECD) on future claims	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	14. (a)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				24. Recommend making this optional in some manner - "shall include the achieved GHG emission reduction and should include the expected GHG emission reduction"	E1	E1-5 - Actions and resources in relation to climate change	24.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				"origin" here may be misinterpreted as requiring physical delivery of the electricity, which is impossible to guarantee in a electrical grid. It also isn't correct to refer to "purchased energy" as the actual energy isn't the thing that conveys the right to claim the renewable nature - the environmental attribute certificate is the purchased item that achieves that. Recommend changing to: "…shall only consider these energy consumptions as deriving from renewable sources if the nature of the purchased environmental attribute is clearly defined in the contractual arrangements with its suppliers…"	E1	E1-7 - Energy consumption and mix	AR 17
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				E1-8 requires reporting of absolute GHG emissions, excluding any GHG removals from activities within the organizational boundary. E1-9 requires reporting of GHG removal and storage projects, which by definition are increases in removals compared to a baseline. This creates a gap, where removals that happen due to general activities within the organizational boundary (e.g. biogenic carbon in products) are not able to be reported anywhere. A building supply company making tables out of bamboo grown on-site would thus report their energy emissions of manufacturing as a positive emission, but cannot report the carbon removal of their bamboo harvest even though it is locked in product for 20-30 years. Recommend including in E1-8 either including an additional reporting column for GHG removals within the boundary of the organization or value chain (excluding projects or financed credits), or allowing such removals to be summed with GHG emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				AR 28 for para 35 (a) The EU CRCF will not universally apply to all carbon credits, e.g. those that are in projects outside of the jurisdiction of the CRCF. This should be an example, not a requirement. (Also, the CRCF isn't a "consensus method"…) Change to "…are available and where appropriate, such as the EU Carbon Removals and Carbon Farming Certification (CRCF) Regulation6, ICVCM Core Carbon Principles, GHG Protocol Land Sector and Removals Guidance, and/or other internationally recognized guidances and methodologies."	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 28
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				AR 29 for para 36 (b) This item excludes from consideration credits issued from projects within the undertaking's own operations, but this doesn't consider the possibility of the undertaking keeping ownership of those issued credits and retiring them. Just because a credit is issued doesn't mean the undertaking can't be the one to receive them - they might be registering their own project on a registry specifically to increase transparency and credibility of their removal initiative. AR 28 for para 35 (b) has language around removals from own-operations that makes it conditional on whether the credits have been sold to another party. That same language should be mirrored here. Change to: "not include … upstream and downstream value chain and have been sold to another party to avoid double counting…"	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 29
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				AR 29 for para 36 (b) This item excludes from consideration credits issued from projects within the undertaking's own operations, but this doesn't consider the possibility of the undertaking keeping ownership of those issued credits and retiring them. Just because a credit is issued doesn't mean the undertaking can't be the one to receive them - they might be registering their own project on a registry specifically to increase transparency and credibility of their removal initiative. AR 28 for para 35 (b) has language around removals from own-operations that makes it conditional on whether the credits have been sold to another party. That same language should be mirrored here. Change to: "not include … upstream and downstream value chain and have been sold to another party to avoid double counting…"	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 29
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				AR 18 for para. 32 Corporates should be able to choose between financial control and operational control baesd on which is more appropriate for the organization	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				CapEx and Opex should be optional	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				24.c Make inclusion of CapEx and OpEx optional. Active CapEx/OpEx beyond what's already included in financial disclosures might be business sensitive and challenging. Anticipated CapEx/OpEx would be hard to quantify and sensitive to disclose, especially at certain levels of granularity.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				AR 16. Requiring separate 1.5C aligned reference target values for Scope 1&2 and Scope 3 would be inefficient. Allow for consolidated cross emission pathway compatible targets.	E1	E1-6 - Targets related to climate change	AR 16
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				AR 25.g. Requiring separate disclosure of "purchased cloud computing and data center services" should be optional and not required. Table in AR27 suggests it would be optional, but language in AR25 suggests not. Recommend clarifying this should be optional and align requirements across ARs.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	25.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				The organizational boundary to be used in disclosing paragraph 32 shall consider aligning with either ISO 14064-1 or GHGP Corporate Standard (2004), allowing companies the option to choose between a financial-control or operational-control boundary. AR 18 19 and 21 be aligned when it comes to reporting boundary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				The organizational boundary to be used in disclosing paragraph 32 shall consider aligning with either ISO 14064-1 or GHGP Corporate Standard (2004), allowing companies the option to choose between a financial-control or operational-control boundary. Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Quantitative disclosure of CapEx/OpEx for the short and medium term, as well as disclosure of investment plans, is being required; however, investment plans pertain to information related to corporate/undertaking strategies and provide advantageous insights to competitors, so whether to disclose this information should be left to the company's discretion.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Since the company cannot verify the amount of energy supplied from nuclear power, we request to delete this requirement.	E1	E1-7 - Energy consumption and mix	28. (b)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Emissions related to liabilities are classified as part of the company's own operation. Since the GHG Protocol does not cover emissions related to liabilities, we request to delete this requirement.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 20
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is required that the data has been verified should be given priority.We request to clarify that the definition of "the data has been verified" will be determined at the discretion of the company.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is required to conduct calculation for all type of assets including right-of-use assets. Some right-of-use assets such as intellectual property rights and copyrights do not involve GHG emissions. We request to exclude right-of-use assets that do not emit any GHG from AR30(b).	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Information on the potential locked-in emsission provides limited material insights on a company's decarbonization pathway with information difficult to obtain. We suggest to remove this requirement.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The disclosure of "financial and investment planing (including the short- and medium-term financial and investment plan)" and "financial resources supporting the implementation and strategic ambition of its transition plan for climate change mitigation, including quantitative short- and medium-term CapEx, and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges" go beyond the initial requirements and the changes therefore go against the aim of simplifying the ESRS. Additionally, it is unclear how the short-/medium-term and long-term time horizons are defined considering also the respective GHG targets defined by the companies. Does long-term refer to 2050? Disclosing any investment figures until 2050 is not feasible and the information would not be reliable. Requirements related to Transition Plans should be closely aligned with existing international frameworks.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The current formulation of the AR indicate behavior obligations in how to conduct the scenario analysis going against ESRS 2 (ED) para. 5. Particularly the mandatory use of geospatial data and detailed methodological requirements related to supply chain lead to unnecessary complexity in the overall requirements. Reformulation needed (previously "This description shall include its process in relation to [...]").	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The current formulation of the AR indicate behavior obligations in how to conduct the scenario analysis going against ESRS 2 (ED) para. 5. Reformulation needed (previously "This description shall include its process in relation to [...]").	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The required information provides limited material insights with data difficult to obtain. Suggestion to delete requiremetns	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	While also a requirement of the IFRS Sustainability Disclosure Standards, the lack of clear and harmonized guidance on calculating anticiapted financial effects linked to individual climate-related risks and opportunities leads to inconsistent and unreliable information. The complexity and lack of integration between sustainability and financial systems make such quantification impractical. Additionally, by going beyond the requirements of the ISSB, the disclosure requirement can also reveal sensitive strategic information, leading to competitive disadvantages for European companies.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	Market-Based must be optional as like GHG Protocol	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (b)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The disaggregation must be optional as like GHG Protocol	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	This information has a completely different meaning depending on the type of industrial activity, and makes absolutely no sense for electricity and heat producers.	E1	E1-7 - Energy consumption and mix	28.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	This indicator shall be Low/Zero carbon sources and not renewable only to enable technological neutrality	E1	E1-7 - Energy consumption and mix	28. (c)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Does it relate to the industrial company's own consumption (in which case see the previous comment on 'own operations')? If the aim is to highlight part of a industrial's consumption mix, the raw renewable data must be put into perspective with the industrial's overall consumption mix. It makes no sense as such.	E1	E1-7 - Energy consumption and mix	30.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	In our sector, revenue is not a meaninful indicator as it is driven mostly by external effects such as commodity prices. Companies shall be able to report for example on production at risk which would be much meaninful to understand what is really at risk. We suggest to delete this indicator and to let company disclose on entity specific indicators.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	Reclaim Finance	NGO	France			I agree	This is an essential datapoint that provides critical information on whether entities are investing in coal, oil and gas. Yet, we an additional level of granularity could help interpet this information and its implications on climate impact and risk. Indeed, the impact of fossil fuel investment is overall negative and detrimental to climate and EU sustainability goals but varies depending on the specific investment. For example, science shows investment in new coal, oil and gas production - whether in existing or new fields/mines - in new coal power capacity and in liquified natural gas infrastructure are especially at odds with climate mitigation goals, as recently ackownledged in the SBTi FINZ standard. Requiring entities to identify more precisely what type of projects they are investing in (coal power, coal mine, oil and gas fields, LNG export, LNG import, pipeline, maintenance of existing infrastructure..) and how much provides useful information to better grasp the strategy of companies, its impact and exposure to risks.	E1	E1-1 - Transition plan for climate change mitigation	14. (b)
Excels	Reclaim Finance	NGO	France			I partially agree and partially disagree	Looking at locked-in emissions and how they can jeopardize the achievement of the transition plan and drive risk is essential. Providing the difficulties in assessing and estimating locked-in emissions, it is reasonable to focus on "key assets and products". Yet, the DR and AR do not clearly define what this would mean. It is important to ensure that assets/products that are responsible for significant volumes of emissions and assets/products that are responsible for a significant share of the emissions of the entity are both considered. For companies involved in fossil fuels, it is important to link this DR with the above DR 14.(b) to ensure locked-in emissions from fossil fuel investments are fully considered.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Reclaim Finance	NGO	France			I agree	For "1.5°C reference target value", the AR links "[Draft] Amended ESRS E1-6, AR 17". I believe this is a typo error as AR 17 do not deal with this issue, it should probably be AR16.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Reclaim Finance	NGO	France			I agree	The AR notes that "Information on dependencies relate to, e.g. deployment of certain technologies, market demand or policies". The final mention of "policies" is highly relevant but we note that the DR and AR do not require entities to provide elements on how their public advocacy activities and the activities of their representative bodies align with their plans and/or assumptions. This gap should be adressed in the transition planning section.	E1	E1-1 - Transition plan for climate change mitigation	AR 3
Excels	Reclaim Finance	NGO	France			I partially agree and partially disagree	The fact that the AR solely requires a qualitative assessment limits the relevance of this datapoint. We suggest the Efrag (i) considers a phased-in approach to a quantiative assessment in general and (ii) immediately introduce a quantitative assessment for assets and products tied to coal, oil and gas. Furthermore, as mentioned regarding DR E1 14. (c), the DR and AR do not clearly define the "key assets and products" subject to this assessment are. Yet, it is important to ensure that assets/products that are responsible for significant volumes of emissions and assets/products that are responsible for a significant share of the emissions of the entity are both considered. For companies involved in fossil fuels, it is important to link this DR with the above DR 14.(b) to ensure locked-in emissions from fossil fuel investments are fully considered.	E1	E1-1 - Transition plan for climate change mitigation	AR 3
Excels	Reclaim Finance	NGO	France			I agree	AR 5 rightfully requires entities to use at least one high emission scenario. Following the same logic, we suggest the Efrag also introduces the notion of tail risk tied to climate and environmental tipping points. Indeed, high emission scenarios do not always represent the highest level of risk and scenario where sudden changes appear are often sources of additional risks. The litterature on tipping points and climate risk has been rapidly developing in recent years and requiring entities to use such hypothesis in their assessment could significantly contribute to climate risk management.	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	Reclaim Finance	NGO	France			I partially agree and partially disagree	AR 6 requires an entity to "base its analysis on at least one climate scenario in line with limiting global warming to 1.5°C with no, or limited, overshooting". Here, an important criteria for selecting a relevant scenario is missing. Indeed, there is a wide range of 1.5°C no/low overshoot scenarios, and these scenarios do not rely on the same hypothesis. They especially vary on how much negative emission (i.e emission absorbed by natural or technological means) they rely on. High reliance on negative emissions preserve high carbon activities and - to some extent - prolong the use of fossil fuels. This has a significant impact on the assessment of transition risk and can artificially lower the risk exposure of high emitters. We therefore highlight the need for the Efrag to require 1.5°C no/low overshoot scenarios relying on a limited volume of negative emissions to be used. When identifying scenarios with limited volumes of negative emissions, one should start by excluding those which use of biomass energy with carbon capture and storage (BECCS) and/or fossil fuels with carbon capture and storage (CCS) is categorized by the IPCC as raising medium to high feasibility concerns. Such concerns appear when removal levels exceed respectively 3 Gt CO2/year for BECCS and 3.8 Gt CO2/ year for fossil CCS by 2050. Scenarios should also be screened to exclude those including forest carbon dioxide removal (CDR) above the IPCC's estimate of maximum sustainable potential of 3.6 Gt CO2/year by 2050. The IEA NZE scenario passes these checks, as well as 26 of the IPCC scenarios.	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Reclaim Finance	NGO	France			I partially agree and partially disagree	The selected base year should not only be recent, but also be representative (i.e not a year where emissions were anormaly different from other years, for example due to an external shock like the Covid pandemic).	E1	E1-6 - Targets related to climate change	AR 13
Excels	Reclaim Finance	NGO	France			I partially agree and partially disagree	Proposed presentation methods are highly relevant and will help stakeholder use the reported information. It should therefore be mandatory for companies to use at least one of them.	E1	E1-6 - Targets related to climate change	AR 14

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Reclaim Finance	NGO	France			I partially agree and partially disagree	Pathways compatible with limiting global warming to 1.5°C should be strictly defined as 1.5°C no/low overshoot pathways that rely on a limited volume of negative emissions. All climate scenarios rely on negative emissions to some extent as some of the Earth's natural processes trap emissions. However, there are massive differences in the extent to which scenarios rely on the deployment of negative emission technologies – such as carbon capture and storage – and the potential for natural capture – including through land-use change and reforestation. The more a scenario makes room for negative emissions, the slower it requires emissions to be reduced, so increasing the reliance on negative emissions is an easy way to retain heavy emitting industries for as long as possible. Yet, there are major difficulties with large-scale deployment of negative emission technologies and so-called "nature-based solutions". Unrealized captured volumes could easily push the planet past 1.5°C. Therefore, climate scenarios should only rely on a limited volume of negative emissions. When identifying scenarios with limited volumes of negative emissions, one should start by excluding those which use of biomass energy with carbon capture and storage (BECCS) and/or fossil fuels with carbon capture and storage (CCS) is categorized by the IPCC as raising medium to high feasibility concerns. Such concerns appear when removal levels exceed respectively 3 Gt CO2/year for BECCS and 3.8 Gt CO2/ year for fossil CCS by 2050. Scenarios should also be screened to exclude those including forest carbon dioxide removal (CDR) above the IPCC's estimate of maximum sustainable potential of 3.6 Gt CO2/year by 2050. The IEA NZE scenario passes these checks, as well as 26 of the IPCC scenarios.	E1	E1-6 - Targets related to climate change	AR 16
Excels	Reclaim Finance	NGO	France			I disagree	Reclaim Finance has conducted a detailed study of the decarbonisation targets of banks (see: https://reclaimfinance.org/site/en/the-need-to-redesign-bank-decarbonization-targets/) and is now studying investor targets. The NGO also contributed to work around target setting on insurers. This work notably showed that current methodologies - mostly based on PCAF - for financed emissions are largely inadequate, insofar as they are not related to real emission and not likely to induce change in the real economy. One of the key problem with the PCAF methodology for financed emissions is the use of an attribution factor that leads to change in financed emissions due to changes in the value of companies and not of their emissions. This problem is somewhat acknowledged by PCAF itself and by its users. Yet, solutions exist and other metrics used do not reproduce this mistake and are more directly linked to real-economy practices and emissions: 1) For all sectors except the fossil fuel sector, financial institutions can notably rely on physical intensity targets (or so-called "weighted average physical intensity" WAPI). This metric type is already used by many financial institutions. 2) For the fossil fuel sector, that must in time be phased-out, financial institutions can rely on targets to reduce the volume of financing. If emission targets are to be used, absolute targets should be used but they should not rely on attribution factors, and thus simply reflect the absolute emission of all companies financed in the sector. We therefore highlight that the current standard and consultation questions do not tackle the most pressing issue with financial institution target setting and emission reporting. We urge the Efrag to integrate in the ESRS requirement to: - Report on WAPI sectoral targets for all sector except fossil fuels; - Report on absolute emissions without attribution for fossil fuels.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	25.
Excels	Reclaim Finance	NGO	France			I agree	We strongly agree with the requirement to disclose in absolute terms for all scopes, with the possibility to also disclose intensity targets. We note this requirement should be adjusted for financial institutions as explained in our comment on E1-25.	E1	E1-6 - Targets related to climate change	26.
Excels	Reclaim Finance	NGO	France			I agree	We strongly agree with the need to keep carbon credits, avoided emissions and removals out of target calculations.	E1	E1-6 - Targets related to climate change	AR 11
Excels	Reclaim Finance	NGO	France			I agree	We note this highly relevant disclosure requirement is not adapted to financial institutions, whose support to fossil fuels does not come through capex and manifest through different types of financial services beyond investment (lending, bond underwriting, insurance coverage, financial advice..). An additional AR should be set that clarifies that financial institutions shall disaggregate their support to fossil fuels by types of financial services provided. Financial services provided to new coal, oil and gas projects and to the companies that develop them should especially be disclosed.	E1	E1-1 - Transition plan for climate change mitigation	14. (b)
Excels	Reclaim Finance	NGO	France			I agree	We note this highly relevant disclosure requirement is not adapted to financial institutions. An additional AR could be added to clarify that financial institutions shall disclose their financial services to renewable vs non renewable electrictity production. This could also take the form of an energy supply ratio (see the methodology developed by the Institut Louis Bachelier).	E1	E1-7 - Energy consumption and mix	30.
Excels	Reclaim Finance	NGO	France			I disagree	We warn about the reduced reporting of emissions under operational control under AR 19. This reporting should not be limited to cases were it is deemed necessary for fair presentation and should cover all emission scopes.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	ASD					I agree	In E2-4, the current paragraph 26 that requires undertaking to disclose the microplastics it generates or uses was deleted in the Exposure Draft. Moreover, the new paragraph 16 of the Exposure Draft requires to report information on secondary microplastics in a qualitative or quantitative manner, including through estimates. We welcome EFRAG proposed changes.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	ASD					I partially agree and partially disagree	The disclosure has been simplified. Instead of multiple datapoints by source, sector or location, undertakings only need to report material pollutant emissions to air, water and soil from their own operations and incidents. However, a threshold of relevance should be included, to prevent reporting burden	E2	E2-4 - Pollution of air, water and soil	4.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Disproportionate costs; Redundancy with existing regulation (IED, EPRTR); For non-EU scope and some sectors not concerned by EPRTR the data is not currently available/concerns about data reliability.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs; Data not currently available; Lack of a common methodology.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA (see e.g. ESRS E4-5, DR 20)	E2	E2-4 - Pollution of air, water and soil	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Information on SVHCs (Substances of Very High Concern) is unproblematic, as their definition is clear and based directly on applicable EU law, making them easily identifiable. The situation is different for SoCs (Substances of Concern): there is currently no uniform, legally binding definition for this group of substances, nor is there an official list of substances. The term is used in various EU initiatives such as the Ecodesign Regulation and the EU Taxonomy, but remains context-dependent and open to interpretation. Due to this lack of clarity, mandatory information on SoC should be removed from the ESRS, as it cannot be reliably implemented by companies.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	New explicit data point secondary microplastic without methodology Problem: Lack of harmonized measurement methods and reporting guidelines The amended provisions require companies to disclose information on secondary microplastics, while it is acknowledged that no harmonized measurement methods or reporting guidelines currently exist. Reliance on qualitative disclosures and company-specific estimates introduces uncertainty and risks undermining reporting integrity.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	No clear alignment of reporting methodology for primary microplastic between REACH-SPM and ESRS Problem: Need for clarification on methodological alignment with existing EU rules Disclosure of primary microplastics is already comprehensively regulated in the EU through the REACH SPM restriction (Reg. 2023/2055) and the forthcoming Pellet-Loss Regulation. While the ESRS draft does not conflict with this framework, it does not explicitly state that the same methodological basis applies, which would create complexity and uncertainty for companies.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	- Disproportionate costs. - Substances of concern: Data not currently available and continous changing classification/ uncertainties; status of labeling/ substance of concern can change during processing as reactive groups disappear leading to a non labelled article for users at the end. - Disclosure requirement E2-5 on substances of concern (SoCs) and substances of very high concern (SVHCs) also risks becoming excessively burdensome and does not adequately provide an understanding of the impact of the undertaking on health and on the environment. Disclosing total amounts of substances is not necessarily a proxy for actual and potential environmental impacts, as for each substance it is necessary to consider its use, its application, and how it is handled. - It is suggested to qualify this requirement as qualitative or to consider adopting a phase-in approach.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	- Disproportionate costs; Data not currently available; high effort needed to extract & compile data; Lack of commomn methodology. - It is suggested to qualify this requirement as qualitative or to consider adopting a phase-in approach. - Furthermore, it is recommended to harmonize the scope, approach and reporting of substances of concern defined within ESRS with existing EU chemical regulations such as REACH and RoHS to ensure a consistent approach to risk assessment and maintain appropriate focus on SVHC.	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	- Disproportionate costs; Data not currently available; high effort needed to extract & compile data; Lack of commomn methodology. - It is suggested to qualify this requirement as qualitative or to consider adopting a phase-in approach. - Furthermore, it is recommended to harmonize the scope, approach and reporting of substances of concern defined within ESRS with existing EU chemical regulations such as REACH and RoHS to ensure a consistent approach to risk assessment and maintain appropriate focus on SVHC.	E2	E2-5 - Substances of concern and substances of very high concern	18. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Reporting companies should not be obliged to report on releases of SoCs/SVHCs into the environment (air, water and soil) that go beyond what they already are reporting according to approval of production sites and according to requirements from regulations on emissions, e.g. IED, IEPR. "Including any unintentional releases from leaks or spills" should at least be changed to "including relevant unintentional releases from leaks or spills".	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Problem: Unclear and disproportionate obligations The revised drafting introduces extensive role-differentiation (manufacturer/importer and user). While under REACH companies may also hold multiple roles, these apply to specific substances and do not require duplicate reporting of the same material flow. By contrast, the ESRS wording could be read as requiring companies to report identical flows multiple times under different roles. This creates duplication and complexity that appear to go beyond the legislator's stated intention, which was to provide relief for non-chemical companies. In practice, the text risks tightening obligations for chemical companies, creating unnecessary complexity and diverging from the intended objective. Problem: Lack of consistent thresholds creates legal uncertainty The ESRS draft introduces disclosure obligations for SVHC and SoC without consistently applying clear, harmonized thresholds. While a 0.1% threshold is foreseen for SVHC in articles, no uniform rule exists for SVHC in mixtures or for SoC. This inconsistency creates uncertainty for companies in determining which concentration levels would trigger reporting duties.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	AR 7 allows for presenting the information on SVHCs as a percentage of the total amount of SoC whereas AR 8 requires that the substances shall (!) be reported in mass unit. This is contradictory.	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	We agree that users of substances shall only disclose the total weight of SVHC. But, in that sense, chemical manufactures, importers and formulators are also only users of their raw materials. Chemical manufacturers, formulators, distributors also have difficulties to obtain data on SoCs from suppliers. On Safety Data Sheets usually only concentration ranges for SoCs are supplied not concrete values. By calculating with either the average or the upper value of the concentration range values for the amount of SoCs that are procured are distorted and don't reflect the true contents of SoCs. For substances that are procured also chemical manufacturers are users of these substances and should fall under ESRS E2 - 19.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Wastewater discharge to municipalities for further treatment should not be considered as pollution.	E2	E2-1 - Policies related to pollution	AR 4

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Michelin	Preparer (non-financial preparing a sustainability report)	France			I disagree	Focus should be done exclusively on SVHC considering the disproportionate list of SoC, the mix of unharmornized and harmonized substances of concern making the comparability between corporates impossible.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	Michelin	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The notion of importers is quite unclear and should be removed. Focus shoud be put on manufacturers and procurers.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Michelin	Preparer (non-financial preparing a sustainability report)	France			I disagree	Remove the requirement on quantities sold due to a disproportionate associated burden. Priority should be given to incoming materials.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Michelin	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The 0,1% threshold should also apply to substances and not only to components or articles. This will allow considering raw materials that are not necessarily component or article.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	Michelin	Preparer (non-financial preparing a sustainability report)	France			I disagree	Remove the requirement on quantities sold due to a disproportionate associated burden. Priority should be given to incoming materials.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	Michelin	Preparer (non-financial preparing a sustainability report)	France			I disagree	Requiring split by hazard class is not the first information required by stakeholdhers. Priority should be disclosing global information on SVHC in quantity.	E2	E2-3 - Targets related to pollution	AR 7
Excels	Michelin	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Pollutants to be considered are first the ones from Annex II of EU 2024/1244 and only if relevant the ones identified by the undertaking. Additional disclosure should be only done if relevant.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Issue: We end up re-writing policy content that already sits in environmental permits or in our public policy. It duplicates ESRS 2. Proposed simplification: Let the permit-driven policy stand as the disclosure; cross-reference the permit/policy instead of repeating text. Proposed text (add AR/NMIG): “Where pollution prevention and control is implemented through environmental permits (including BAT conditions), the undertaking may present its policy by reference to those permits and add a short summary of how the mitigation hierarchy (avoid/reduce/control/restore) is applied.” Why it helps: One authoritative source, less duplication, easier to audit (policy = permit) and clearer for readers.	E2	E2-1 - Policies related to pollution	12.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Issue: Actions/resources are already set in permits (abatement, monitoring, emergency plans). Writing it all again is repetitive. Proposed simplification: allow references to environmental permit for the detailed actions Proposed text: “Where key actions (abatement, monitoring, incident prevention…) are defined in permits, the undertaking may refer to the environmental permits.” Why it helps: Keeps detailed lists where the regulator keeps them.	E2	E2-2 - Actions and resources related to pollution	13.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Issue: Targets often duplicate legal limits in permits; site-level targets everywhere can bloat the report. Proposed simplification: Permit-based targets (e.g., “meet or outperform permit limits”), with site-level targets only where material; put detailed site targets in an annex. Proposed text: “Where legal limits apply, targets may be stated as ‘meet or outperform permit limits’, optionally with internal margins by site. Detailed site targets are shown only where material and may be placed in an annex.” Why it helps: Aligns with real compliance management; keeps the main narrative concise.	E2	E2-3 - Targets related to pollution	14.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E2-4 — Pollution of air, water and soil (§16(a)) + AR 2–5; NMIG 6 Issue: Pollutant tables are already filed in IEPR (ex-E-PRTR) and permit reports. Re-building them in ESRS is heavy and error-prone. Proposed simplification: “Register-first, delta-only.” Link the IEPR/permit pages and show in ESRS just the changes vs last year and any incidents; use appendix C of taxonomy. Proposed text: “For pollutants subject to IEPR/permit reporting, the undertaking may reference the official records and present in ESRS only a delta log (changes vs prior year, breaches, corrections) and material context.” Why it helps: Removes re-keying, focuses on what changed, and uses a clear, defendable filter.	E2	E2-4 - Pollution of air, water and soil	16.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E2-4 — Microplastics (§16(b)) + AR 6 Issue: Methods are still maturing; forcing precise numbers can be unrealistic. Proposed simplification: Trigger-based approach; allow qualitative/estimated info where appropriate. Proposed text: "If operations/products are not linked to primary or material secondary microplastics, a short negative statement suffices; otherwise, qualitative or estimated information is acceptable under AR 6." Why it helps: Practical and proportionate.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E2-5 — Substances of concern (SoC) & SVHC (§§18–20) + AR 8 Issue: Chemicals tables are very heavy and repeat what is already screened under Taxonomy DNSH and REACH/CLP processes. Proposed simplification: Make EU Taxonomy Appendix C (DNSH for chemicals) the first-step screen and disclose it by reference. Then report SoC/SVHC quantities only for residual, material cases, grouped by hazard class with a clear totals rule (no double counting). Proposed text: "First disclose compliance with EU Taxonomy Appendix C by reference (scope, method, exceptions). Then provide quantities only for residual, material SoC/SVHC, grouped by hazard class, avoiding double counting as per AR 8–9." Why it helps: One DNSH screen for chemicals; tables only where it matters most; consistent with Taxonomy and REACH/CLP evidence.	E2	E2-5 - Substances of concern and substances of very high concern	AR 8
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Where official registers (IEPR/permits) and EU Taxonomy evidence (including Appendix C for chemicals) already exist, ESRS E2 should allow incorporation by reference, with the ESRS statement focused on material changes, compliance events and clear links to Article 8 KPIs.	E2	E2 - Interaction with other ESRS	11.
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I disagree	The generation of secondary microplastics though equipment wear is extremely difficult to calculate, even qualitatively. Microplastic generation should be defined in terms of equipment manufacturer's plastic content and manufacturer's end of life treatment. Making this a general requirement for all organization's risks significant double counting, and the lack of a defined qualitative assessment standards or methodologies will cast doubt on the ability to compare results across companies. This requirement should be removed	E2	E2-4 - Pollution of air, water and soil	AR 5
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of DR E2-1 refers to DR GDR-P, adopting a more standardised and cross-cutting approach to the disclosure of general policies. This change promotes greater consistency and comparability across companies and topics. However, it may reduce visibility on specific areas such as substances of concern and high concern, as well as the control of accidents and emergencies involving contamination. While standardisation facilitates reporting, it requires extra attention to ensure that critical topics are not underrepresented, especially in sectors with high pollution risk. It may be helpful to recommend optional disclosures or sector-specific guidance to preserve relevance and completeness.	E2	E2-1 - Policies related to pollution	12.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The current disclosure adopts a more simplified perspective, following the cross-cutting approach of the GDR-A. This change promotes greater standardisation and comparability across companies and topics. However, it may lead to a loss of detail in critical areas such as environmental preservation and restoration, as well as the mitigation hierarchy of actions. To ensure that essential topics are not overlooked, especially in sectors with high environmental impact, it may be helpful to recommend optional disclosures or sector-specific guidance. This would help maintain relevance and depth while benefiting from the simplified structure.	E2	E2-2 - Actions and resources related to pollution	13.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The current disclosure of targets follows a more simplified perspective, in line with the GDR-T approach. While this promotes greater standardisation and comparability across companies and topics, it may lead to a loss of detail in critical areas, such as the connection between targets and specific types of pollution, ecological boundaries, and whether the targets are mandatory or voluntary. To preserve the relevance and depth of disclosures, especially in high-impact sectors, it may be helpful to recommend optional reporting on the nature and scope of targets. This would ensure that key environmental dimensions remain visible within the simplified framework.	E2	E2-3 - Targets related to pollution	14.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The current disclosure adopts a more simplified format, aligned with the GDR-I approach. While this change facilitates reporting and promotes greater comparability, it may lead to a loss of technical detail, particularly regarding measurement methodologies, emissions consolidation, and transparency around uncertainties and estimates. That said, the inclusion of microplastics within the value chain is a positive development, as it helps capture downstream impacts of the plastics managed by the company. To balance simplicity with depth, it may be helpful to recommend optional disclosures on methodologies and uncertainty management, especially for companies with complex value chains.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new version of DR E2-5 maintains its focus on substances of concern, while introducing a more segmented and operational structure that clearly distinguishes between manufacturers, importers, and users. This approach improves the clarity and accuracy of reporting, particularly in relation to REACH regulation obligations. The level of granularity has increased, with specific requirements for different types of economic actors and forms of environmental release.	E2	E2-5 - Substances of concern and substances of very high concern	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Plastics Converters	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The Disclosure Requirement E2-4 Article 16(b)(i) aimed at disclosing the total volume of microplastics manufactured or used in products, based on the REACH definition and scope, will impose a significant additional burden on companies. Operators are already required by Commission Regulation (EU) 2023/2055 to provide detailed disclosures, including annual emission estimates of synthetic polymer microparticles to ECHA. In addition, the new Pellet Loss Regulation (based on the provisional agreement of 13 May 2025) will require operators to disclose on the quantities of pellets handled and released to the environment. This requirement effectively adds another layer to existing legal obligations, further increasing the gap in harmonization between regulations, which will ultimately create confusion and resource burden for operators, especially for SMEs, potentially undermining efforts to comply consistently and effectively. Better alignment and integration with existing legal frameworks such as REACH and the Pellet Loss Regulation would support clarity, reduce duplicative efforts, and improve data quality and comparability for all stakeholders.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	European Plastics Converters	Business association (other than association of financial institution)	Belgium			I disagree	Regarding the newly added Disclosure Requirement E2-4 in Article 16(b.ii) to report on secondary microplastics, we respectfully recommend to remove the proposal as it is (1) inconsistent with the EC's mandate to streamline and clarify ESRS reporting obligations, and (2) there is a lack of scientifically validated measurement methodology which means such estimates will vary widely, risking public distrust and a perception of "greenwashing" rather than genuine transparency.	E2	E2-4 - Pollution of air, water and soil	AR 6
Excels	European Plastics Converters	Business association (other than association of financial institution)	Belgium			I disagree	Additionally, under application requirements 6 for paragraph 16 (b), unintentional pellet losses are considered as secondary microplastics, however these should be categorized and reported as primary microplastics, consistent with their definitions and treatment under REACH and Pellet Loss regulations.	E2	E2-4 - Pollution of air, water and soil	AR 6
Excels	European Plastics Converters	Business association (other than association of financial institution)	Belgium			I disagree	While we support the objective of improving transparency on substances in products to improve product circularity and sustainability, the reporting of SoCs by manufacturers of plastic articles and users of mixtures proves to be quite challenging. The main difficulties include: •Regulatory complexity •Access to confidential information by downstream users, •Continuous monitoring needs, given that according to ESPR, 12,000 chemical substances out of 23,000 registered in the EU could potentially be labelled "substances of concern". •Ambiguity in terminology, definitions such as substances "negatively affecting the re-use and recycling", which are open to interpretation and risk inconsistent application •Identifying SoCs should be communicated to customers, through product regulation, standard or ESPR product group provisions. The current drafting, as well as the former DR 33, introduces duplication with existing legislation and disproportionate complexity. ESRS should build on existing frameworks (such as Product Regulation, REACH and ESPR) rather than extend or reinterpret them. This would improve coherence, administrative burden and reliability of reported data. Therefore, the current provisions addressing SVHC are deemed adequate, whereas introducing via CSRD an additional category of SoC would create complexity and ambiguity in the whole supply chain and among the relevant stakeholders.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	European Plastics Converters	Business association (other than association of financial institution)	Belgium			I disagree	In addition to these difficulties, Disclosure Requirement E2-5 goes beyond the scope of existing regulation, in particular Article 33 of the REACH Regulation, which requires, as a minimum, disclosure of the name of the relevant substance. By contrast, E2-5 obliges disclosure of the total weight or quantity of substances under several provisions: · Article 18, requires manufacturers and importers of mixtures to disclose the total weight of SoCs and SVHCs under multiple conditions; In line with the 0.1% w/w threshold for SVHC under REACH Article 33, a clear and reasonable cut-off limit, for example 10% w/w, should be set for mixtures containing Substances of Concern (SoC) to avoid ambiguity and ensure consistent interpretation in reporting.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	European Plastics Converters	Business association (other than association of financial institution)	Belgium			I disagree	In addition to these difficulties, Disclosure Requirement E2-5 goes beyond the scope of existing regulation, in particular Article 33 of the REACH Regulation, which requires, as a minimum, disclosure of the name of the relevant substance. By contrast, E2-5 obliges disclosure of the total weight or quantity of substances under several provisions: · Article 19, requires users of mixtures to disclose the total weight of SVHCs used in production and released into the environment;	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	European Plastics Converters	Business association (other than association of financial institution)	Belgium			I disagree	In addition to these difficulties, Disclosure Requirement E2-5 goes beyond the scope of existing regulation, in particular Article 33 of the REACH Regulation, which requires, as a minimum, disclosure of the name of the relevant substance. By contrast, E2-5 obliges disclosure of the total weight or quantity of substances under several provisions: · Article 20, requires manufacturers, importers, and users of articles containing SVHCs to disclose the quantities of such substances in procured components or articles above the 0.1% threshold set in REACH Article 33, as well as in sold components or articles above this threshold.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	In the Log of Amendments, it is stated that ESRS E2 now includes pollution from waste (one source of pollution used to estimate emissions to air), since ESRS E5 has no specific requirement on pollution generated by waste. However as the standard only requires air pollution from own operations, we suggest clarifying which waste-related emissions should be accounted for, as some may be downstream emissions (e.g., waste sent to landfills managed by third parties). In ESRS E3 on water, AR 4 clarifies that transfers of water pollutants to external treatment plants qualify as pollution in the downstream value chain.	E2	E2 - Interaction with other ESRS	11. (d)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We agree with facilitating the reporting of non-EU locations as this facilitates alignment with GRI. For example, GRI 101-6-c is not limited to the pollutants listed in Annex II of Regulation (EC) No 166/2006 of the European Parliament and of the Council(57)(European Pollutant Release and Transfer Register "E-PRTR Regulation"). However, it is unclear what 'regular operations' means and how it differs from 'own operations' - we suggest this be clarified.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	With the amendments it has become unclear whether undertakings shall report the amount of each pollutant separately or the total amount of all air pollutant emissions combined. We suggest this be clarified.	E2	E2-4 - Pollution of air, water and soil	16. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	We agree with the provision that the pollutants to be considered be complemented by pollutants the undertaking measures and monitors based on environmental permits and that it can include additional pollutants that it considers material. This is aligned with GRI 305-7-a-vii.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We suggest clarifying whether the amended requirement now focuses only on the substances that are within the scope of the REACH Regulation or whether it covers any substance.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This comment refers to ESRS E2 - 16. (d). This is an additional disclosure compared to the previous version. This change seems to go against the intended goal of simplification, as it adds complexity rather than streamlining the process. In addition: - quantitative estimation is currently not feasible, as there are no widely accepted methodologies in place. Such estimates are highly variable, as they are based on assumptions regarding a significant number of variables (e.g. manufacturing processes, usage phase, conditions of usage, etc.) - in this case, qualitative information may not meet the necessary comparability requirements to ensure a meaningful and effective disclosure.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We still believe that SOC (in particular) and SVHC are still very difficoult disclosure and, as such, verify the request. The DR should focus of which SOC/SVHC is manufactured rather than the quantity. The widespread inability of Wave 1 companies to report on Substances of Concern provides clear evidence that this disclosure requirement is practically unworkable in its current form. This challenge stems directly from the lack of a harmonized definition and the immense scope, which requires companies to assess thousands of substances whose 'concern' status is highly dependent on specific product use and context. Without clear and consistent criteria, any reported data would be based on individual company interpretations, making it inherently non-comparable across the market. Mandating this disclosure would therefore force the generation of low-quality, potentially misleading information, which undermines the CSRD's core objective of providing reliable data. Furthermore, these data would be collected only for the European market, as outside Europe there are different definitions of SOC/SVHC. A full consolidation of these data worldwide would not be possible. Additionally, The notion of importers is quite unclear and should be removed. Focus shoud be put on manufacturers and procurers.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	New para 16 (a) requires disclosure for any MATERIAL POLLUTANT in air, water and soil. For the way AR 2 is written, the auditor could ask to collect the data of each polluntant from the list of Annex II (Reg 2024/1244), as well as from the permitting to demonstrate the materiality of few of the? Our suggestion is to clarify in AR3 that A comprehensive materiality assessment based on specificity of business processes and operations can establish relevant pollutants for the business to be disclosed without the collection of all the data. Furthermore, it has been introduced the request to collect pollutants also from the permitting that is an addition and is not highlighted in question 24 of the Survey. As such, should be eliminated.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	AR3 allows for the use of thresholds that apply exclusively to the E-PRTR pollutant list. However, there is a potential risk that auditors may request reporting of pollutants from permitting without applying any thresholds as it is not mentioned. It should be clarified that thresholds may also be applicable to pollutants from permitting. Our suggestion is to clarify in AR3 that a comprehensive materiality assessment—based on the specificity of business processes and operations—can determine which pollutants are relevant for disclosure. We agree that only those pollutants emitted by technical installations from Annex II of 2024/1244 have to be reported. Comment: It is not clearly defined what is meant with "applicable to the undertaking". Suggestion: Focusing on environmental installation permits and the relevant installations/ Activities (in Accordance with Annex I of 2024/1244; Policy 2010/75/EU Annex I) would facilitate a globally consistent approach and would justify the selection of pollutants that need to be measured. Suggested text: "The pollutants to be considered for reporting under E2-4, paragraph 16 (a) are those from Annex II of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation) that are applicable to the undertaking in accordance with measurement requirements based on environmental permits or Annex I of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation). It can include additional pollutants that it considers material."	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Manufacturing and use of microplastic should not be included in this DR as the production of microplastics is not a pollutant per se and, as such, it should be treated (in case) as a key product in E5-5 Resource outflows. Primary microplastic production and use could be sensitive and confidential, in fact also in the proposal of Reg. on preventing plastic pellet losses it was added "ensuring that confidential business information is safeguarded". Please note that Regulation 2023/2055/ already include a mandatory reporting only on the quantity of synthetic polymer microparticles released to the environment and introduce a ban for intentionally added microplastic in final products, recognizing that is not relevant on manufacturing data.	E2	E2-4 - Pollution of air, water and soil	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	1. Microplastic definition included in the glossary should be reviewed to align with REACH Regulation: The definition of primary microplastic should be limited to cases involving the intentional use of microplastics in a substance, mixture, or borderline article—i.e. an article designed to intentionally release microplastics (e.g. leggings containing encapsulated hyaluronic acid). It should never apply to articles where microplastics are merely fixed to the surface and/or designed to not release microplastics. Under the REACH restriction, articles with fixed microplastics (e.g. a t-shirt with glitter or a candle with glitter) fall outside the scope of the regulation and are not subject to labelling or reporting requirements. Additionally, in the case of primary microplastic in mixtures (cosmetic) there is a duplicity in reporting with the current requirements of reporting to ECHA established REACH restriction on entry 78. 2. It is necessary to align the terminologies used in the datapoint to the ones used 3.The DR should be replaced by "microplastics release" as per the comment above. "release" Should be added also in the text of AR 1 Para. 16	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This comment refers to ESRS E2 - 16. (c). These data could be considered sensitive for some companies (e.g the ones operating in the chemical sector), as they may represent core production activities. Furthermore,it is unclear whether this refers to an intentional release or an accidental one. Additionally, it should be specified whether, in the case of an accidental release, the actual quantity released or only the quantity remaining after remediation activities should be considered.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure Requirement E2-4 on primary microplastic can include the quantity of plastic pellet and/or additional microplastic released that it considers material. The calculation methodology on plastic pellet release should be consistency with one used for REG. (EU) 2023/2055 reporting obligation. Data on primary microplastic release could be provide as percentage respect produced or used microplastics	E2	E2-4 - Pollution of air, water and soil	AR 1
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We still believe that SOC (in particular) and SVHC are still very difficoult disclosure and, as such, verify the request. The DR should focus of which SOC/SVHC is manufactured rather than the quantity.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Focus should be done exclusively on SVHC considering the disproportionate list of SoC, the mix of unhamornized and harmonized substances of concern making the comparability between corporates impossible.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Remove the requirement on quantities sold due to a disproportionate associated burden. Priority should be given to incoming materials.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The 0,1% threshold should also apply to substances and not only to components or articles. This will allow considering raw materials that are not necessarily component or article.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Remove the requirement on quantities sold due to a disproportionate associated burden. Priority should be given to incoming materials.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Requiring split by hazard class is not the first information required by stakeholdhers. Priority should be disclosing global information on SVHC in quantity.	E2	E2-3 - Targets related to pollution	AR 7
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-1 - Policies related to pollution	12.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-2 - Actions and resources related to pollution	13.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-3 - Targets related to pollution	14.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The location-based approach to environmental impacts proposed in the standards is disproportionate and should be entirely eliminated. It introduces unnecessary complexity, increases the reporting burden, and does not align with the principles of relevance and proportionality.	E2	E2 - Objective	10.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is not clearly defined what is meant with "applicable to the undertaking". Suggestion: Focusing on environmental installation permits and the relevant installations/ Activities (in Accordance with Annex I of 2024/1244; Policy 2010/75/EU Annex I) would facilitate a globally consistent approach and would justify the selection of pollutants that need to be measured. Suggested text: "The pollutants to be considered for reporting under E2-4, paragraph 16 (a) are those from Annex II of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation) that are applicable to the undertaking in accordance with measurement requirements based on environmental permits or Annex I of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation). It can include additional pollutants that it considers material."	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	16 a): AR2 and AR3 in the amended ESRS E2 still provide no clear guidance on how to apply Annex I and II of E-PRTR. AR2 mentions the pollutants of Annex II that are "applicable to the undertaking". Please specify what this means. AR3 recommends that the undertaking "can consider" the thresholds of Annex II to determine materiality. In case of our undertaking, only about three out of 85 pollutants are near the threshold. However in practice, the auditor demands proof that the other ~80 pollutants are not material. This bottom-up approach means unproportional effort. Most of the pollutants play no material role except for high emission industries. Please include some kind of sector specific top-down instruction, e.g. reference to E-PRTR Annex I.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	16 b): "the quantities of primary microplastics manufactured or used in products" - please specify if this applies to producing undertakings only or to retailers aswell. Retailers should not be obliged to report on products manufactured by other undertakings, since this imposes unproportionate burden and most likely doubles with manufacturers disclosures.	E2	E2-4 - Pollution of air, water and soil	16. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	Some regulatory references listed in the paragraph 9 are only mentioned as optional methodological guidance in the disclosure requirements of ESRS E2, such as the IEPR Regulation (AR 2 and AR 3 to the DR E2-4). Therefore, it could be misleading to state that the objective of this standard is to "enable users of the sustainability statement to understand the plans and capacity of the undertaking to adapt its strategy and business model in line with" the different regulations listed, while some of them are only mentioned for guidance purposes, and will not necessarily be used by reporting undertakings. We recommend clarifying the objective of ESRS E2 with regard to the different European regulations mentioned and ensure, overall, the consistency of the Standard.	E2	E2 - Objective	9.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	Points (c) and (d) that refer to reporting on primary and secondary microplastics shall be presented as sub-§ of points (b). Besides, we recommend clarifying what "directly released into the environment" refers to with respect to the requirement of a "separate" reporting on primary microplastics. The definition of the latter concept that is included in the ESRS glossary implies indeed that all primary microplastics result in a release into the environment.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend clarifying that the reference to the Regulation 2024/1244 to identify pollutants to be considered is an optional methodological guidance, as specified by EFRAG in the E2 log of amendments and the basis for conclusions, and not a mandatory methodological step. The AR currently states "The pollutants to be considered for reporting under E2-4, paragraph 16 (a) are those from Annex II of Regulation (EU)2024/1244 (Industrial Emissions Portal Regulation)" which could be misleading and imply that this reference is mandatory.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We invite EFRAG to clarify whether transfers of water pollutants to external treatment plants shall be included in pollutants reporting under § 16(a) even though they are part of the downstream value chain as indicated under AR 4. The comments provided in the log of amendments in relation to this AR seem to imply that it could be a case of extension to value chain information though the metric is formally to be calculated on own operations only. It is worth noted that such inclusion would be consistent with monitoring practices and legal requirements as these pollutants remain under the responsibility of the polluter.	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend clarifying the definition of secondary microplastics as AR 5 covers unintentional sources, beyond the breakdown of larger pieces of plastics, that are not included in §16(b)(ii) and the ESRS glossary.	E2	E2-4 - Pollution of air, water and soil	AR 5
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend providing a definition of the concerned company categories i.e. manufacturers and importers, such as by referring to the applicable NACE codes (if relevant), to avoid any ambiguity or subjective interpretation.	E2	E2-5 - Substances of concern and substances of very high concern	AR 6
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend clarifying that double counting of SVHC shall be avoided when an undertaking acts both as an importer and a user during the reporting period.	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	Triodos Bank N.V.	Bank	Netherlands			I agree	We agree with the addition of secondary microplastics.	E2	E2-4 - Pollution of air, water and soil	4.
Excels	Triodos Bank N.V.	Bank	Netherlands			I agree	We agree to direct the requirements on substances of concern at manufacturers and imports and to align the thresholds to REACH	E2	E2-5 - Substances of concern and substances of very high concern	5.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	I see no reference to targets anymore. All indicators seem to be deleted. I propose to keep the requirement to disclose a target in.	E2	E2-3 - Targets related to pollution	3.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Information about methodologies, assumptions and tools used for identifying pollution-related impacts including results of materiality assessments is key for investors to understand the data. This is also relevant for ESRS-E3, ESRS-E4 and ESRS-E5.	E2	E2 - Objective	1.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We recommend to keep a policy to manage material impacts, risks and opportunities related to pollution in.	E2	E2-1 - Policies related to pollution	1.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	The guidance of the TNFD LEAP approach has been removed for reduction purposes from E2/3/4/5, but could at least be included in NMIG. The current reference in ESRS 2 AR 22 currently refers to explanation of the LEAP approach in TNFD, which is an external document and is not part of the ESRS.	E2	E2 - Interaction with other ESRS	1.
Excels	UPM-Kymmene Corporation	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	We are not 100% sure that it is not anymore required to disclose the amounts of each pollutant above the threshold from Annex II of the Industrial Emissions Portal Regulation. This is due to possible different interpretation of "The pollutants TO BE CONSIDERED for reporting ..." in AR 2. Please clarify or re-formulate "to be considered" in the application requirement.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	UPM-Kymmene Corporation	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	AR 4 leaves room for interpretation in our opinion. Does it mean that the emissions to water are excluded from the reporting scope of E2-4 (which is defined as own operations in § 16 a) when the wastewater is not treated internally but send to an external treatment plant? Or should they nevertheless be reported even if they "qualify" as downstream pollution? Please clarify.	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	UPM-Kymmene Corporation	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	So far, there are no reliable methods to measure emissions of primary microplastics. There must be agreed methods to be able to comply with this disclosure requirement. Information from relevant suppliers about microplastics in there products is currently lacking and their mandatory reporting is starting only. Information on secondary microplastic in the downstream value chain is very challenging and will be very unprecise, especially for companies with a multi-tier downstream value chain. In general, the ESRS requirements for microplastics reporting should be in line, also timewise, with the REACH restriction for intentionally and unintentionally added microplastics and other microplastic-related reporting regulations. Please consider to add this DR to the NMIG list for now.	E2	E2-4 - Pollution of air, water and soil	16. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Anthesis Group	Consultant (including software vendor)	United Kingdom			I agree	This topical standard is targeting i.a. companies that are subject to regulations around chemicals, it is worth aligning the definitions with the EU REACH and CLP. The current wording "manufacturers of substances on their own and in mixtures" is not comparable with the REACH definitions of manufacturer and downstream users under REACH, and generates confusion. Under REACH, "manufacturer" of a substance is a company that through chemical synthesis manufacturers a substance (e.g. manufacturer of a pigment from petrochemical derivatives). Under REACH, the manufacturer of a mixture is typically a downstream user, which physically mixes chemicals, e,.g mixing a pigment with other chemicals to make a paint. The current wording "manufacturers of substances on their own and in mixtures" is ambiguous: while an upstream manufacturer is clearly in scope, a formulator (e.g, cosmetics, detergent, etc) may say that they are not manufacturer of substances, hence out of scope. I don't think this is the intention. Suggestion 1 change the wording in art 18 (e.g. Manufacturers and importers of substances on their own, and manufacturer, users and importer of substances in mixtures shall disclose), suggestion 2: in the glossary write how align between art 18 and the REACH definitions.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Anthesis Group	Consultant (including software vendor)	United Kingdom			I agree	improved wording. The elimination fo the obligation to split into main hazard classess reduces the preparatory work for companies	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Anthesis Group	Consultant (including software vendor)	United Kingdom			I agree	consistent with current REACH obligations	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Anthesis Group	Consultant (including software vendor)	United Kingdom			I agree	consistent with current REACH obligations	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	Anthesis Group	Consultant (including software vendor)	United Kingdom			I disagree	This refers to a type of microplastics for which definitions and measurement methods are still in development. It should be lest out, as it risk being addressed in generic qualitative terms by all.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Anthesis Group	Consultant (including software vendor)	United Kingdom			I agree	this is a significant simplification.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Jernkontoret	Business association (other than association of financial institution)	Sweden			I partially agree and partially disagree	It is very much welcomed to limit the reporting of Substance of Concern (SoC). However, the proposed text does not sufficiently clearly specify that only manufacturers and importers within the chemical industry are covered by this paragraph as explained in AR to be the aim. There are several other industries manufacturing or importing chemical substances as a minor part of their business for example to use in their production processes or produced as by-products. The SoC information is typically not readily available in those companies for all other chemicals throughout the company. Proposed wording: "The requirements in paragraph 18 apply to the undertaking that, as main activity, manufactures chemical substances, formulates chemical mixtures and/or operates in the retail of chemical substances. The requirements in paragraph 18 do not apply to the undertaking that, as main activity, manufactures non-chemical products."	E2	E2-5 - Substances of concern and substances of very high concern	AR 6
Excels	Jernkontoret	Business association (other than association of financial institution)	Sweden			I partially agree and partially disagree	For the sake of clarity, please change the word 'substances' to 'SoC and/or SVHCs', and add words 'those' to clarify what to report. Proposed wording: "18. Manufacturers and importers of SoCs and/or SVHCs on their own and in mixtures shall disclose the total weight of those SoCs, and separately, the total weight of those SVHCs, that are:"	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Jernkontoret	Business association (other than association of financial institution)	Sweden			I partially agree and partially disagree	A further suggestion is to exclude SoC reporting for all companies as the SoC definition in ESPR is very wide and the information is not readily available.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Jernkontoret	Business association (other than association of financial institution)	Sweden			I partially agree and partially disagree	The word 'procured' should be replaced with 'imported' to ensure alignment with REACH and clear interpretation by the company chemical experts on what is covered by this paragraph. Proposed text: "18. Manufacturers and importers of SoCs and/or SVHCs on their own and in mixtures shall disclose the total weight of those SoCs, and separately, the total weight of those SVHC, that are: (a) imported or manufactured as substances of their own or in mixtures;"	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)
Excels	Jernkontoret	Business association (other than association of financial institution)	Sweden			I partially agree and partially disagree	The word 'sold' should be replaced with 'placed on the market' to ensure alignment with REACH and clear interpretation by the company chemical experts on what is covered by this paragraph. Proposed text: "18. Manufacturers and importers of SoCs and/or SVHCs on their own and in mixtures shall disclose the total weight of those SoCs, and separately, the total weight of those SVHC, that are: (a) imported or manufactured as substances of their own or in mixtures; (b) placed on the market as substances on their own or in mixtures; and"	E2	E2-5 - Substances of concern and substances of very high concern	18. (b)
Excels	Jernkontoret	Business association (other than association of financial institution)	Sweden			I partially agree and partially disagree	Remove 'users' from the scope of SVHC reporting as the SVHC information is not readily available for users of articles. Proposed text: "20. Manufacturers and importers of articles with SVHC shall disclose the quantities of those substances that are..."	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Jernkontoret	Business association (other than association of financial institution)	Sweden			I partially agree and partially disagree	After aligning the terminology with REACH, the points (a) and (b) can be combined. Remove 'procured components' and 'sold components' as those terms are not used in REACH. 'Procured components' as well as 'sold components' are considered articles in REACH. Both situations are covered by specifying the obligations to 'producers and importers' and 'placing on the market' of articles. Proposed wording: "20. Producers and importers of articles with SVHC shall disclose quantities of those substances that are part of articles placed on the market for levels above the 0,1% threshold of Art 33 of the REACH Regulation."	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Highly welcome clarification for pollution – Materiality assessment and reporting can be focused on emissions originating from the undertakings operations / processes. It is also welcomed that the text leaves room for judging on the adequate level of aggregation for the reporting.	E2	E2 - Objective	7
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Also applies to ESRS E2.16b,c,. We welcome that the revised standard explicitly refers to the REACH restriction. In our view this allows to report one set of data for two purposes and avoids redundancies. It should also be noted that the REACH restriction addresses primary microplastic exclusively.	E2	E2 - Objective	9f
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	9f addresses primary microplastic exclusively. By requesting information on secondary microplastic, DR 16d is not in line with the definition of 9f and should be deleted, accordingly.	E2	E2-4 - Pollution of air, water and soil	16. (d)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	9f addresses primary microplastic exclusively. By requesting information on secondary microplastic, DR 16d is not in line with the definition of 9f and should be deleted, accordingly.	E2	E2-4 - Pollution of air, water and soil	AR 5
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Disclosure requirement E2-5 on substances of concern (SoCs) and substances of very high concern (SVHCs) is redundant - please remove. The disclosed information is not adequate for providing an understanding of the impact of the undertaking on health and on the environment. Disclosing total amounts of substances is a poor proxy for actual and potential environmental impacts, since use, application, safety measures and resulting exposure are not considered.	E2	E2-4 - Pollution of air, water and soil	17
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This requirement leads to excessive detail on differentiating SoC and SVHC according to hazard classes. This information needs deep expertise to interpret and hence is of little use for corporate reporting. We suggest less granularity for this disclosure requirement. This can be achieved by not reporting all hazard classes of a chemical but only the most severe hazard class for human health and for environment per substance. That will also eliminate the double counting issue.	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	As a clarification, companies need more certainty to ensure information required under this paragraph, combined with the paragraph 3.1 from ESRS 1, let the operator the possibility to report only relevant emissions of specific substances and not all emissions coming from all substances.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	It should be noted that the Regulation (UE) 2024/1244, which introduces three new pollutants in its Annex II, will enter into force at 1st january 2028. In addition, the sentence "It can include additional pollutants that it considers material" should be deleted in order to avoid unnecessary debates. This provision is not considered necessary, since undertakings can disclose entity-specific information if they want to do so.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The thresholds for releases defined in Annex II of Regulation (EU) 2024/1244 apply to EU activities listed in the Annex I. To ensure international data comparability, it could be relevant to specify that these thresholds also apply to activities listed in the Annex I, regardless of their location (i.e. inside or outside EU).	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We note that paragraphs 9(b) to 9(g) have been added. We request a guarantee that these additions do not introduce new disclosures requirements (e.g. thresholds, list of pollutants to be considered…).	E2	E2 - Objective	9.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	This datapoint supposes that undertaking shall justify the local materiality of pollutants. As a clarification, it should be specified that aggregation at the group level remains possible.	E2	E2 - Objective	10.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	It must be reminded that the definition of secondary microplastics is not officially established, and their impacts are not yet clearly addressed by science. Companies wish that are entitled to refer to the relief on uncertainty when they consider official information is incomplete on this issue.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Reporting on SoC must be suppressed as there is no official, stabilised definition. Moreover, to require undertakings to disclose SoC goes beyond what is required by REACH and creates a significant additional burden (over three thousand substances should be considered). Therefore, we call for the suppression of the reporting on SoC, as proposed by the French Accounting Standards Authority.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	This datapoint asks for a disclosure that goes beyond what is requiered by Article 33 of the REACH Regulation. Indeed, Art 33 does not compel operators to quantify SVHC, but only to specify the substances concerned by nam. Therefore, this paragraph should be amended accordingly.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	This datapoint asks for a disclosure that goes beyond what is requiered by Article 33 of the REACH Regulation. Indeed, Art 33 does not compel operators to quantify SVHC, but only to specify the substances concerned by nam. Therefore, this paragraph should be amended accordingly.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	The notion of "importer" should be cleraly defined.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E2. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E2	E2 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	There may be data availability issues for the amounts of SVHC in articles (para. 20), because REACH does not require suppliers to transfer the exact quantities of SVHC contained in articles. Therefore, EFRAG should consider to explicitly allow estimations or ranges to fulfil the requirement in para. 20.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	The statement in AR 4 is incorrect and incompatible with the provisions of the E-PRTR/IEP Regulation. Transfers of water pollutants to external treatment plants need to be considered in paragraph 16 (a). Change text to: "Transfers of water pollutants to external treatment plants qualify as emissions to be accounted for under para. 16 (a)."	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We note that the pollution-specific requirements for reporting on actual and anticipated financial effects (current ESRS E1-6, para. 40 and 41), for example regarding revenues from products that contain substances of very high concern, from OpEx and CapEx related to major incidents or costs from environmental protection and remediation of pollution, are proposed to be deleted. Since these pollution-related costs can be substantial, they should be considered in reporting on actual and anticipated financial effects under ESRS 2 SBM-3. If it proofs difficult to reinstate them as part of ESRS 2, they should at the least be included in the non-mandatory guidance.	E2	E2 - Objective	1.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The split between primary (intentional) and secondary (from breakdown) is now aligned with REACH. However, there is a scope inconsistency: paragraph 16(b)(ii) seems to restrict secondary microplastics to breakdown of larger plastics, while AR 6's definition is broader (including unintentional production during lifecycle, e.g. pellet loss). We recommend EFRAG to resolve definition inconsistency on secondary microplastics by aligning §16(b)(ii) wording with AR 6 to ensure the definition covers all unintentional sources, including pellet loss and lifecycle abrasion, not only breakdown of large plastics.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The current text "procured or manufactured" is ambiguous. It is unclear whether undertakings should report the sum of "procured or manufactured" quantities or according to their specific role. We recommend specifying calculation requirements in the AR.	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The concept of "released into the environment" lacks a harmonised wording and is different from microplastics requirement (para. 16(b)). We suggest adopting a harmonised definition of "release" across all pollutant-related DRs, covering intentional and unintentional releases.	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Many undertakings act in more than one capacity for the same substance within the same period (e.g., importing a substance and then using it in production). There is no clear guidance on whether such quantities should be reported twice in different datapoints. We recommend clarifying what quantities should be reported in the application requirements.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The requirement for users of SVHC refers to "use during production" without defining "production". The scope is undefined, creating uncertainty for service sectors such as water and waste treatment. We recommend defining "production" and clarifying its applicability to service-sector processes involving SVHC.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Practical differentiation between "mixture" and "article" is complex. We recommend providing definitions and/or AR examples distinguishing mixtures from articles.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	New para 16 (a) requires disclosure for any MATERIAL POLLUTANT in air, water and soil. For the way AR 2 is written, the auditor could ask to collect the data of each pollutant from the list of Annex II (Reg 2024/1244), as well as from the permitting to demonstrate the materiality of few of the? Our suggestion is to clarify in AR3 that A comprehensive materiality assessment based on specificity of business processes and operations can establish relevant pollutants for the business to be disclosed without the collection of all the data. Furthermore, it has been introduced the request to collect pollutants also from the permitting that is an addition and is not highlighted in question 24 of the Survey. As such, should be eliminated.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	AR3 allows for the use of thresholds that apply exclusively to the E-PRTR pollutant list. However, there is a potential risk that auditors may request reporting of pollutants from permitting without applying any thresholds as it is not mentioned. It should be clarified that thresholds may also be applicable to pollutants from permitting. Our suggestion is to clarify in AR3 that a comprehensive materiality assessment—based on the specificity of business processes and operations—can determine which pollutants are relevant for disclosure.	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Manufacturing and use of microplastic should not be included in this DR as the production of microplastics is not a pollutant per se and, as such, it should be treated (in case) as a key product in E5-5 Resource outflows. Primary microplastic production and use could be sensitive and confidential, in fact also in the proposal of Reg. on preventing plastic pellet losses it was added "ensuring that confidential business information is safeguarded". Please note that Regulation 2023/2055/ already include a mandatory reporting only on the quantity of synthetic polymer microparticles released to the environment and introduce a ban for intentionally added microplastic in final products, recognizing that is not relevant on manufacturing data.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	The DR should be replaced by "microplastics release" as per the comment above. "release" Should be added also in the text of AR 1 Para. 16	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	This comment refers to ESRS E2 - 16. (c). These data could be considered sensitive for some companies (e.g the ones operating in the chemical sector), as they may represent core production activities. Furthermore,it is unclear whether this refers to an intentional release or an accidental one. Additionally, it should be specified whether, in the case of an accidental release, the actual quantity released or only the quantity remaining after remediation activities should be considered.	E2	E2-4 - Pollution of air, water and soil	5. (b)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	this comment refers to point 16 (d). The disclosure of secondary microplastics is an additional disclosure compared to the previous version. This change seems to go against the intended goal of simplification, as it adds complexity rather than streamlining the process. In addition: - quantitative estimation is currently not feasible, as there are no widely accepted methodologies in place. Such estimates are highly variable, as they are based on assumptions regarding a significant number of variables (e.g. manufacturing processes, usage phase, conditions of usage, etc.) - in this case, qualitative information may not meet the necessary comparability requirements to ensure a meaningful and effective disclosure.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Disclosure Requirement E2-4 on primary microplastic can include the quantity of plastic pellet and/or additional microplastic released that it considers material. The calculation methodology on plastic pellet release should be consistency with one used for REG. (EU) 2023/2055 reporting obligation. Data on primary microplastic release could be provide as percentage respect produced or used microplastics	E2	E2-4 - Pollution of air, water and soil	AR 1
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	We still believe that SOC (in particular) and SVHC are still very difficoult disclosure and, as such, verify the request. The DR should focus of which SOC/SVHC is manufactured rather than the quantity. The widespread inability of Wave 1 companies to report on Substances of Concern provides clear evidence that this disclosure requirement is practically unworkable in its current form. This challenge stems directly from the lack of a harmonized definition and the immense scope, which requires companies to assess thousands of substances whose 'concern' status is highly dependent on specific product use and context. Without clear and consistent criteria, any reported data would be based on individual company interpretations, making it inherently non-comparable across the market. Mandating this disclosure would therefore force the generation of low-quality, potentially misleading information, which undermines the CSRD's core objective of providing reliable data. Furthermore, these data would be collected only for the European market, as outside Europe there are different definitions of SOC/SVHC. A full consolidation of these data worldwide would not be possible.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	#8 needs further improvement to ensure common understanding of how to assess.Equinor suggests limiting obligation for users to report on SVHC to instances when the use is related to deliberate handling or application of a substance, not incidental presence.	E2	E2 - Objective	8.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	E2-4 Secondary microplastics - Equinor strongly disagrees with the new requirement on secondary microplastics. The inclusions of secondary microplastics in §16 is not a simplification, but a large additional burden on companies. This was not included in the original ESRS and involves significant challenges related to methodologies for quantifying secondary microplastics, data availability and what we consider undo efforts needed for compliance. Hence, we suggest deleting the "secondary microplastics" requirement.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Paragraph 20 is a good clarification of thresholds. We assume and it could be clarified that it is still based on a materiality assessment.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Para. 18 and 19 - Equinor welcomes the proposed approach in paragraphs 18 and 19 to limit the reporting of Substances of Concern (SoC) to manufacturers (chemical producers), assigning the full reporting obligation to chemical producers (paragraph 18) while excluding users from this requirement (para 19). Considering the breadth of the SoC list and the significant, potentially disproportionate reporting burden for actors outside the chemical sector, we regard this as a reasonable and proportionate solution.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	The ESRS project eliminated the analysis of exceedances of E-PRTR threshold values. The simplified ESRS refers to "the amounts of any material pollutant emissions to air, water, and soil from its regular operations and incidents during the reporting period." From an auditor's perspective, this approach is very difficult to assess due to the lack of identification of what constitutes a significant quantity. The auditor will have no tools to verify the company's judgment.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	This section is unclear. We propose clarifying how this translates into DMA (in paragraph 16 letter a for own operations).	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	There is no definition of "Manufacturers and importers of substances on their own and in mixtures." It is unclear whether this is compliant with the REACH regulation.	E2	E2-4 - Pollution of air, water and soil	18.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	The proposal for a simplified ESRS E2 includes disclosure requirements for microplastics (new paragraph 16(b-d)). This wording is difficult to understand (items c and d refer to item b – the previous wording used in the ESRS, e.g., b i, b ii, seems clearer). AR 5 also includes a reference to 16(b)(ii), but in practice such a paragraph does not exist (it is currently marked as 16(d)).	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	what about "noise"? should it be considered a subtopic?	E2	E2 - Objective	4.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	to be clarified if this is limited to undertaking's emission or also value chain emissions should be included	E2	E2 - Objective	7.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	what about risks and opportunities? why this is not mentioned?	E2	E2 - Objective	8.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	we would suggest to align this disclosure requirement to GRI 305-7	E2	E2-4 - Pollution of air, water and soil	15.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	to be added "where applicable"	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We recommend including the standard units to be considered for each type of pollutant to ensure consistency and comparability of the data.	E2	E2-4 - Pollution of air, water and soil	AR 1
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E2 Pollution, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E2 Pollution, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	E2	ESRS E2 - Objective	1.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	E2	ESRS E2 - Objective	5.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	Removal is welcome as other regulation already drives the requirements regarding ESG risk management and there is no need to further address this within ESRS, especially for the financial services sector.	E2	Disclosure Requirement E2-6 - Anticipated financial effects from material pollution-related risks and opportunities	n/a

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We disagree with this new (l) data point. As a matter of principle, no new data points should be included in the revised ESRS. This data point also places a heavy additional burden on companies, as the reporting level would become highly disaggregated if reporting had to be done at the location or asset level. Furthermore, information on PAT is generally not specific to a location or asset level, but rather at a higher level. Reporting at such a low level of aggregation would therefore not be effective.	E2	E2 - Objective	10.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	According to IEPR, the first data must be published in 2028 for the reporting year 2027.The ESRS should not preempt this schedule and should not require earlier reporting according to IEPR.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	E2	E2-2 - Actions and resources related to pollution	13.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	E2	E2-3 - Targets related to pollution	14.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	With regard to pollutant emissions, only significant emissions need to be disclosed, rather than E-PRTR-related emissions as was previously the case. Reducing the scope of reporting may lead to the omission of key substances and emissions that are particularly important locally. The lack of clear guidelines on "significant pollutants" creates the risk that entities will omit key emissions if they do not consider them significant.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The division of microplastics into primary and secondary – a valid simplification that will allow for better visualization of information. A clear distinction between primary and secondary microplastics and a more precise definition will greatly facilitate the work of entities that are required to assess microplastic emissions from products or packaging. However, the ESRS still does not specify a methodology for estimating the level of plastic microbead emissions. This may result in the use of estimates that are difficult to compare.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The breakdown of disclosures by manufacturer/importer/user is entirely justified and appropriate, with point 20 – as a rule, correctly refers to the provisions of REACH and SCIP issues, indicating a threshold of 0.1% content as a possible indicator – although obtaining such information and aggregating it for the purpose of preparing disclosures is currently very difficult	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	The disclosure of dependencies has been further weakened (to 'when relevant') in the new paragraph 1. The TNFD suggests to remove the specification 'when relevant' in paragraph 1 and reinstate, either at the level of ESRS 2 or at the level of the individual topical standard, a similar text to the Set 1 paragraphs, such as the one asking for disclosure of 'the nature, type and extent of the undertaking's material (…) dependencies (…) related to [pollution], and how the undertaking manages them'.	E2	E2 - Objective	1.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Please note that this comment relates to objective 9 (can not be inserted / selected in this file): It shows several legislations but there is no data-point referencing to it afterwards. As this only should be discloses when relevant and material, this probably will be adressed if it is relevant. It might be misleading to include the frameworks in the objective as it could lead to reporting immaterial information. In the log of amendments file I read it that it is now included because it was used as a source for the standard, then it can better be included in the standard as a source then as an objective.	E2	E2-1 - Policies related to pollution	12.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Please note that this comment relates to objective objective 11 - c: first this paragraph was ended with 'this standard' (which was read by some as E4 is in this sentence), and how it is referring to E2. For undertakings in (Agri)food based on the old standard the emission of Nitrogen (at the farm, in the upstream part of the value chain) was then linked to E4. Based on the amended ESRS we would link the pollution of Nitrogen under E2. Based on ESRS 2 then the disclosure requirements as included in objective paragraph 5 apply. It is likely that the undertaking will respond from the perspective of nitrogen as being a driver of biodiversity loss. Additional, then the amended E2 will be applied. E2-4 (based on paragraph 16) only related to emissions related to its own operations, which gives the impression that E2-4 only focusses on the pollution caused by own operations. Is this correct? Then for this example, emission of nitrogen in the upstream part of the value chain will not lead to E2 disclosures. If E2 only means to focusses on pollution caused by own operations, then this should also be mentioned in the objective?	E2	E2-1 - Policies related to pollution	12.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	typo error, c and d should be part of b instead of seperate items.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	It would be relevant to request the undertaking to include whether when setting targets ecological thresholds and entitiy specific allocations were taken into consideration (as was included in the original ESRS E2-3 paragraph 24).	E2	E2-3 - Targets related to pollution	14.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	it is not clear if the standard only covers pollution caused by own operations, or the whole value chain. C9	E2	E2-3 - Targets related to pollution	12.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Objective 9.) with 7 references to other EU Regulations increase complexity and uncertaintiy for preparer of sustainability statement. Please delete these references.	E2	E2-1 - Policies related to pollution	12.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Direct reference to PRTR list gone but according to this paragraph, PRTR is still the minimum list of emissions to be tracked. I see no improvement here, the paragraph additional opens up the field for additional pollutants. This will result in discussions with auditors about scope and materiality.	E2	E2-2 - Actions and resources related to pollution	16. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- Disproportionate costs; Missing data for secondary microplastics/ missing access to data, standards are still under development.	E2	E2-4 - Pollution of air, water and soil	AR 5
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- The definition of microplastics included in the ESRS in the context of the disclosure requirement E2-4 is not fit for purpose (i.e. "small pieces of plastics, usually smaller than 5mm"). Such a description could also capture the polymers manufactured by chemical companies, a high-quality intermediate for the production of final polymers that are placed in the market through downstream value chains. The production of such polymers is usually carried out under strict loss schemes (e.g. OCS principles). - There are no standardized sampling procedures, officially recognized analysis methods, or clear limit values set by authorities or legislators for wastewater emission measurements. Furthermore, there are diffenrent analysis method of microplastics in terms of particle size.	E2	E2-4 - Pollution of air, water and soil	16. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- It should be clearly stated that pollutants which are reported according to the IED Regulation is sufficient to report it in the sustainability statement in regards to pullutants, aggregation level, etc. - This would lead to even more inconsistent reporting if all substances listed in a permit at any of the sites had to be reported. Also unclear: would this apply only to the sites for which the substance is listed in the permit?	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Current approach: The interface through which emissions caused by our production are released into the environment is relevant for "emissions from our own operations." Accordingly, this also includes emissions that are caused by us but released into the environment by a third-party wastewater treatment plant. From our perspective, this is the appropriate way to look at it. If we don't produce, the emissions don't exist. Additionally: the external treatment plant provides a service for us, for which we pay → the treatment plant is a supplier and therefore not "downstream" (even though, physically, the water of course flows in that direction...).	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	New explicit data point secondary microplastic without methodology Problem: Lack of harmonized measurement methods and reporting guidelines The amended provisions require companies to disclose information on secondary microplastics, while it is acknowledged that no harmonized measurement methods or reporting guidelines currently exist. Reliance on qualitative disclosures and company-specific estimates introduces uncertainty and risks undermining reporting integrity.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	No clear alignment of reporting methodology for primary microplastic between REACH-SPM and ESRS Problem: Need for clarification on methodological alignment with existing EU rules Disclosure of primary microplastics is already comprehensively regulated in the EU through the REACH SPM restriction (Reg. 2023/2055) and the forthcoming Pellet-Loss Regulation. While the ESRS draft does not conflict with this framework, it does not explicitly state that the same methodological basis applies, which would create complexity and uncertainty for companies.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- Disproportionate costs. - Substances of concern: Data not currently available and continous changing classification/ uncertainties; status of labeling/ substance of concern can change during processing as reactive groups disappear leading to a non labelled article for users at the end. - Disclosure requirement E2-5 on substances of concern (SoCs) and substances of very high concern (SVHCs) also risks becoming excessively burdensome and does not adequately provide an understanding of the impact of the undertaking on health and on the environment. Disclosing total amounts of substances is not necessarily a proxy for actual and potential environmental impacts, as for each substance it is necessary to consider its use, its application, and how it is handled. - It is suggested to qualify this requirement as qualitative or to consider adopting a phase-in approach. - Suppliers outside Europe typically follow local chemical regulations, meaning EU-specific regulations are not legally recognized or applied. For the sake of simplification and consistency, SoCs should not be included as a general requirement for all stakeholders.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- Disproportionate costs; Data not currently available; high effort needed to extract & compile data; Lack of commomn methodology. - It is suggested to qualify this requirement as qualitative or to consider adopting a phase-in approach. - Furthermore, it is recommended to harmonize the scope, approach and reporting of substances of concern defined within ESRS with existing EU chemical regulations such as REACH and RoHS to ensure a consistent approach to risk assessment and maintain appropriate focus on SVHC.	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- Disproportionate costs; Data not currently available; high effort needed to extract & compile data; Lack of commomn methodology. - It is suggested to qualify this requirement as qualitative or to consider adopting a phase-in approach. - Furthermore, it is recommended to harmonize the scope, approach and reporting of substances of concern defined within ESRS with existing EU chemical regulations such as REACH and RoHS to ensure a consistent approach to risk assessment and maintain appropriate focus on SVHC.	E2	E2-5 - Substances of concern and substances of very high concern	18. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Reporting companies should not be obliged to report on releases of SoCs/SVHCs into the environment (air, water and soil) that go beyond what they already are reporting according to approval of production sites and according to requirements from regulations on emissions, e.g. IED, IEPR. "Including any unintentional releases from leaks or spills" should at least be changed to "including relevant unintentional releases from leaks or spills".	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Problem: Unclear and disproportionate obligations The revised drafting introduces extensive role-differentiation (manufacturer/importer and user). While under REACH companies may also hold multiple roles, these apply to specific substances and do not require duplicate reporting of the same material flow. By contrast, the ESRS wording could be read as requiring companies to report identical flows multiple times under different roles. This creates duplication and complexity that appear to go beyond the legislator's stated intention, which was to provide relief for non-chemical companies. In practice, the text risks tightening obligations for chemical companies, creating unnecessary complexity and diverging from the intended objective. Problem: Lack of consistent thresholds creates legal uncertainty The ESRS draft introduces disclosure obligations for SVHC and SoC without consistently applying clear, harmonized thresholds. While a 0.1% threshold is foreseen for SVHC in articles (REACH obligation and ESPR framework regulation), we support this since it is also in line with , no uniform rule exists for SVHC in mixtures or for SoC. This inconsistency creates uncertainty for companies in determining which concentration levels would trigger reporting duties.	E2	E2-5 - Substances of concern and substances of very high concern	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	AR 7 allows for presenting the information on SVHCs as a percentage of the total amount of SoC whereas AR 8 requires that the substances shall (!) be reported in mass unit. This is contradictory.	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	We agree that users of substances shall only disclose the total weight of SVHC. But, in that sense, chemical manufactures, importers and formulators are also only users of their raw materials. Chemical manufacturers, formulators, distributors also have difficulties to obtain data on SoCs from suppliers. On Safety Data Sheets usually only concentration ranges for SoCs are supplied not concrete values. By calculating with either the average or the upper value of the concentration range values for the amount of SoCs that are procured are distorted and don't reflect the true contents of SoCs. For substances that are procured also chemical manufacturers are users of these substances and should fall under ESRS E2 - 19.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I agree		E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E2. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E2	E2 - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	There may be data availability issues for the amounts of SVHC in articles (para. 20), because REACH does not require suppliers to transfer the exact quantities of SVHC contained in articles. Therefore, EFRAG should consider to explicitly allow estimations or ranges to fulfil the requirement in para. 20.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	The statement in AR 4 is incorrect and incompatible with the provisions of the E-PRTR/IEP Regulation. Transfers of water pollutants to external treatment plants need to be considered in paragraph 16 (a). Change text to: "Transfers of water pollutants to external treatment plants qualify as emissions to be accounted for under para. 16 (a)."	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We note that the pollution-specific requirements for reporting on actual and anticipated financial effects (current ESRS E1-6, para. 40 and 41), for example regarding revenues from products that contain substances of very high concern, from OpEx and CapEx related to major incidents or costs from environmental protection and remediation of pollution, are proposed to be deleted. Since these pollution-related costs can be substantial, they should be considered in reporting on actual and anticipated financial effects under ESRS 2 SBM-3. If it proofs difficult to reinstate them as part of ESRS 2, they should at the least be included in the non-mandatory guidance.	E2	E2 - Objective	1.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	New paragraph 16(a) requires disclosure of material pollutants to air, water and soil. As drafted, AR2 could be interpreted during assurance as obliging companies to collect and report data for every pollutant in Annex II of Regulation (EU) 2024/1244 as well as all pollutants monitored under permits, simply to demonstrate materiality. This would represent a disproportionate new requirement and create a significant additional burden. We recommend clarifying in AR3 that Annex II and permit pollutants are reference points for consideration in a company's materiality assessment, but that a comprehensive materiality assessment, based on the specificity of business processes and operations, is sufficient to identify relevant pollutants without collecting data for all listed items.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR3 allows for the use of thresholds that apply exclusively to the E-PRTR pollutant list. However, there is a potential risk that auditors may request reporting of pollutants from permitting without applying any thresholds as it is not mentioned. It should be clarified that thresholds may also be applicable to pollutants from permitting. Our suggestion is to clarify in AR3 that a comprehensive materiality assessment—based on the specificity of business processes and operations—can determine which pollutants are relevant for disclosure.	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Manufacturing and use of microplastics should not be included in this DR in their current form, as this disclosure duplicates obligations already established in Set 1 of ESRS and under Regulation (EU) 2023/2055 (REACH), as well as industry frameworks such as Operation Clean Sweep (OCS). Production is not a pollutant per se and should instead be addressed, if relevant, as a key product in E5-5 Resource outflows. Primary microplastic production and use may also be sensitive and confidential. For example, in the proposal for the Regulation on preventing plastic pellet losses it was explicitly noted that "confidential business information is safeguarded." Regulation (EU) 2023/2055 already requires mandatory reporting on the quantity of synthetic polymer microparticles released into the environment and introduces a ban on intentionally added microplastics in final products, recognising that manufacturing data is not the relevant focus.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Manufacturing and use of microplastic should not be included in this DR as the production of microplastics is not a pollutant per se and, as such, it should be treated (in case) as a key product in E5-5 Resource outflows. Primary microplastic production and use could be sensitive and confidential. "release" Should be added also in the text of AR 1 Para. 16	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This comment refers to ESRS E2-16 (c). Disclosure of quantities of manufactured or used microplastics could be considered sensitive for some companies (e.g. those operating in the chemical sector), as such data may represent core production activities. Furthermore, it is unclear whether this refers to an intentional release or an accidental one. Additionally, it should be specified whether, in the case of an accidental release, the actual quantity released or only the quantity remaining after remediation activities should be considered. These concerns mirror those already raised in ESRS E2-15, and are compounded by the overlap with existing legislation (Regulation 2023/2055 under REACH and OCS), which risks duplication and inconsistent reporting obligations.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Removed.	E2	E2-4 - Pollution of air, water and soil	16.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I agree	Support the revision of pollutant emissions reporting to focus on material pollutants, and amend the reference to Annex II of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation) from a mandatory list to a reference for consideration in determining material pollutants (AR 2 and 3). This adjustment simplifies the reporting process, enhances flexibility, and improves applicability for entities operating outside the EU.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure Requirement E2-4 on primary microplastic can include the quantity of plastic pellet and/or additional microplastic released that it considers material. The calculation methodology on plastic pellet release should be consistent with the one used for regulation 2023/2055. Data on primary microplastic release could be provided as percentage respect produced or used microplastics	E2	E2-4 - Pollution of air, water and soil	AR 1
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Support the removal of point (iii) from the definition of "Substances of Concern" in Annex II. However, it introduces a new definition of Substances of Concern that is not aligned with existing frameworks, creates confusion and contradicts the ESRS review's objective of simplification. EFRAG's proposal does not consider sustainability-related aspects and focuses on hazard properties only, an area where REACH should remain the primary legislative framework The broad scope of point (ii) would make information gathering highly challenging, creating additional administrative burden – especially for non-European operated sites SVHCs ((i)) are well-defined hazard categories, with existing processes for substances that pose significant, scientifically recognized risks to human health or the environment. Referencing SVHCs ensures clarity, consistency, regulatory alignment, and practical usability for businesses operating within or exporting to the EU. This approach promotes risk awareness, encourages substitution, maintains regulatory control, and protects environmental health. The SVHC Candidate List is regularly updated by ECHA, ensuring the definition remains relevant and reflects the latest scientific and regulatory developments. It is therefore recommended to remove the definition of SoC from the list of definitions and to limit the disclosure obligations under E2-5 (items 17, 18, 19, and 20) to SVHCs as defined under REACH.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended that the disclosure requirement E2-5 (18, 19) is streamlined to focus on SVHCs only. The list of SoC is too fluid for reporting purposes. Next to that the concept of SoC is EU focused and complex to apply outside EU. The broad scope of SoC would make information gathering highly challenging, creating additional administrative burden – especially for non-European operated sites SVHCs are already well-defined hazard categories, with existing processes for substances that pose significant, scientifically recognized risks to human health or the environment. Referencing SVHCs ensures clarity, consistency, regulatory alignment, and practical usability for businesses operating within or exporting to the EU. This approach promotes risk awareness, encourages substitution, maintains regulatory control, and protects environmental health. The SVHC Candidate List is regularly updated by ECHA, ensuring the definition remains relevant and reflects the latest scientific and regulatory developments	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	We still believe that SOC (in particular) and SVHC are very difficult to disclose and, as such, to verify the request. The DR should focus on which SOC/SVHC is manufactured rather than the quantity. The widespread inability of Wave 1 companies to report on Substances of Concern provides clear evidence that this disclosure requirement is practically unworkable in its current form. This challenge stems directly from the lack of a harmonised definition and the immense scope, which requires companies to assess thousands of substances whose "concern" status is highly dependent on specific product use and context. Without clear and consistent criteria, any reported data would be based on individual company interpretations, making it inherently non-comparable across the market. Mandating this disclosure would therefore force the generation of low-quality, potentially misleading information, which undermines the CSRD's core objective of providing reliable data. Furthermore, these data would be collected only for the European market, as outside Europe there are different definitions of SOC/SVHC. A full consolidation of these data worldwide would not be possible. To reduce administrative burden and ensure comparability, the disclosure requirement should be streamlined to focus on SVHCs only, where established processes already exist.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	E2	E2-2 - Actions and resources related to pollution	2.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed, and also the deletion of current paragraph 29.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We support the deletion of point (iii) of the definition of "substances of concern" and the addition of thresholds aligned with REACH in [DRAFT] ESRS E2-5 paragraph 20. However, introducing a new definition of Substances of Concern (SOC) that is not aligned with existing frameworks creates confusion and contradicts the ESRS review's objective of simplification. EFRAG's proposal does not consider sustainability-related aspects and focuses on hazard properties only, an area where REACH should remain the primary legislative framework.The broad scope of point (ii) would make information gathering highly challenging, creating additional administrative burden – especially for non-European operated sites SVHCs (point (i)) are already well-defined hazard categories, with existing processes for substances that pose significant, scientifically recognized risks to human health or the environment. Referencing SVHCs ensures clarity, consistency, regulatory alignment, and practical usability for businesses operating within or exporting to the EU. This approach promotes risk awareness, encourages substitution, maintains regulatory control, and protects environmental health. The SVHC Candidate List is regularly updated by ECHA, ensuring the definition remains relevant and reflects the latest scientific and regulatory developments. The definition of SoCs and the related disclosure requirements should therefore be removed or reconsidered.	E2	E2-5 - Substances of concern and substances of very high concern	5.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	DR references to defined users (bold) – which is defined as the user of the sustainability statement/information; and not as the user of the substances	E2	E2-5 - Substances of concern and substances of very high concern	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	[1] We do not support an additional disclosure requirement on secondary microplastics. EFRAG presents this new datapoint as a clarification of the existing disclosure requirement, however, it significantly extends its scope to downstream value chain. This entails a significant increase in the reporting burden and goes against the goal of burden reduction and simplification. Estimating the downstream microplastic emissions required in [DRAFT] paragraph 16(b)(ii) would be considerably challenging and potentially impracticable given i) the absence of a robust calculation methodology for secondary microplastics (i.e. those generated unintentionally through degradation or wear under highly context-dependent circumstances) and should therefore be removed. Disclosure requirements should focus on what companies are able to control and measure. It would not be feasible be to predict what the secondary microplastic generation of plastic articles would be, as it would substantially depend on how it was managed down the value chain including end of life. this obligation creates a risk of double counting. From manufacturers to end providers, repeated calculations of an uncertain amount of microplastic leakage result in incoherence	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	[2] In addition, we understand that the amended definition for microplastics draws from the current restriction under Annex XVII REACH (entry 78). However, we note how the REACH restriction goes beyond microplastics (i.e. synthetic polymer microparticles), therefore the definition in this context is not fit-for-purpose, as its broader than microplastics. The ESRS should then refer to “synthetic polymer microparticles” in order to have alignment. The new datapoint also poses challenges as regards auditability since materiality assessments require traceability, measurability, and risk characterization. No existing risk-based framework allows undertakings to evaluate how their activities, or actors in a company’s value chain, may contribute to downstream potential harms from secondary microplastics. For primary microplastics (i.e. [DRAFT] ESRS E2-4 paragraph 16(b)(i)), reporting is already required in the EU under the REACH restriction addressing the use of intentional synthetic polymeric microparticles (Annex XVII, Entry 78), and also in the future regulation on preventing plastic pellet losses. This causes additional burden for EU companies, through multiple reporting.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	[3] The disclosure requirements in E2-4 should focus on microplastics leaving the undertaking's facilities as emissions rather than products. The DR should be replaced by "microplastics release" as per the comments above. "release" Should be added also in the text of AR 1 Para. 16. In sum, we recommend EFRAG to delete the proposed disclosure requirement on secondary microplastics in ESRS E2 paragraph 16(d) alongside the definition of secondary microplastics in Annex II.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Disclosure Requirement E2-4 on primary microplastic can include the quantity of plastic pellet and/or additional microplastic released that it considers material. The calculation methodology on plastic pellet release should be consistency with one used for REG. (EU) 2023/2055 reporting obligation. Data on primary microplastic release could be provide as percentage of produced or used microplastics. Additionally, calculation methodologies on plastic pellet release should be harmonized for all reporting on this topic, in order to avoid possible misalignment on data, risk of errors (same site, seme operators but different method to be compliance with) and administrative burdens. Reporting data as % respect microplastic production or use could be a more suitable metrics respect the stand alone data, since this KPI is not affected by production fluctuation and could allow different years comparison.	E2	E2-4 - Pollution of air, water and soil	AR 1
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Reporting companies should not be obliged to report on releases of SoCs/SVHCs into the environment (air, water and soil) that go beyond what they already are reporting according to approval of production sites and according to requirements from regulations on emissions, e.g. IED, IEPR. "Including any unintentional releases from leaks or spills" should at least be changed to "including relevant unintentional releases from leaks or spills".	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	SOCs (in particular) and SVHC are still very difficoult disclosure and, as such, verify the request. The DR should focus on which SOC/SVHC is manufactured rather than the quantity. The widespread inability of Wave 1 companies to report on Substances of Concern provides clear evidence that this disclosure requirement is practically unworkable in its current form. This challenge stems directly from the lack of a harmonized definition and the immense scope, which requires companies to assess thousands of substances whose 'concern' status is highly dependent on specific product use and context. Without clear and consistent criteria, any reported data would be based on individual company interpretations, making it inherently non-comparable across the market. Mandating this disclosure would therefore force the generation of low-quality, potentially misleading information, which undermines the CSRD's core objective of providing reliable data. Furthermore, these data would be collected only for the European market, as outside Europe there are different definitions of SOC/SVHC. A full consolidation of these data worldwide would not be possible.	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We agree that users of substances shall only disclose the total weight of SVHC. But, in that sense, chemical manufactures, importers and formulators are also only users of their raw materials. Chemical manufacturers, formulators, distributors also have difficulties to obtain data on SoCs from suppliers. On Safety Data Sheets usually only concentration ranges for SoCs are supplied not concrete values. By calculating with either the average or the upper value of the concentration range values for the amount of SoCs that are procured are distorted and don't reflect the true contents of SoCs. For substances that are procured also chemical manufacturers are users of these substances and should fall under ESRS E2 - 19.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	We note that ESRS E2 AR 2 expands the pollutant reporting under E2-4 §16(a) to include not only Annex II of Regulation (EU) 2024/1244 (Industrial Emissions Portal) but also pollutants from environmental permits. This would significantly increase the reporting burden, requiring companies to track and assess pollutants without clear thresholds, unlike the E-PRTR list, and would complicate materiality assessments.	E2	E2-4 - Pollution of air, water and soil	AR 2

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	The revised drafting introduces extensive role-differentiation (manufacturer/importer and user). While under REACH companies may also hold multiple roles, these apply to specific substances and do not require duplicate reporting of the same material flow. By contrast, the ESRS wording could be read as requiring companies to report identical flows multiple times under different roles. This creates duplication and complexity that appear to go beyond the legislator's stated intention, which was to provide relief for non-chemical companies. In practice, the text risks tightening obligations for chemical companies, creating unnecessary complexity and diverging from the intended objective. In other words, There is an inconsistency between the proposed definition of "manufacturers and importers" in ESRS ED and the definition outlined in REACH for formulating companies, which will put these companies in conflicting categories under the two regulations. This inconsistency will lead to significant additional reporting requirements. We therefore request EFRAG to align the definition, exceptions and reporting requirements under the ESRS ED fully with REACH.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	The reporting of SoC constitutes an unjustified burden, as only a portion of these substances are harmful to the environment. Furthermore, many SoC are often essential to ensuring the circularity, durability, safety, and sustainability of a mixture, product or article. Reporting on the large number (several thousand) of SoC throughout the entire life cycle of complex uses are not practically feasible. In addition, SoC are typically indicated in Safety Data Sheets (SDS) or product labels not as a quantitative figure, frequently only as an upper threshold or range of concentration within a mixture, and such mixtures may behave very differently compared to their individual hazardous ingredients.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA (see e.g. ESRS E4-5, DR 20)	E2	E2-4 - Pollution of air, water and soil	15.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	inclusion of the 0.1% threshold (as per REACH) for substances in articles simplifies information obligations for articles, since REACH regulation already requires this information to be exchanged between suppliers and their clients.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	inclusion of the 0.1% threshold (as per REACH) for substances in articles simplifies information obligations for articles, since REACH regulation already requires this information to be exchanged between suppliers and their clients.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Information on SVHCs (Substances of Very High Concern) is unproblematic, as their definition is clear and based directly on applicable EU law, making them easily identifiable. The situation is different for SoCs (Substances of Concern): there is currently no uniform, legally binding definition for this group of substances, nor is there an official list of substances. The term is used in various EU initiatives such as the Ecodesign Regulation and the EU Taxonomy, but remains context-dependent and open to interpretation. Due to this lack of clarity, mandatory information on SoC should be removed from the ESRS, as it cannot be reliably implemented by companies.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Including metrics on microplastics for renewables activities is likely to result in undue effort/costs/complexity, and not likley to result in a meaningful indicator.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Including metrics on microplastics for renewables activities is likely to result in undue effort/costs/complexity, and not likley to result in a meaningful indicator.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	ArcelorMittal	Preparer (non-financial preparing a sustainability report)	Luxembourg			I partially agree and partially disagree	Suggest modifying paragraph 18, point (a), to: "imported or manufactured as substances on their own or in mixtures;" ==> Justification ==> 'Procured' is not a term used under REACH. To have a better alignment with REACH terminology, it is recommended to replace 'procured' by 'imported'.	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)
Excels	ArcelorMittal	Preparer (non-financial preparing a sustainability report)	Luxembourg			I partially agree and partially disagree	Suggest modifying the first line of paragraph 18 to: "Manufacturers and importers of SoCs and/or SVHCs on their own and in mixtures shall disclose the total weight of those SoCs, and separately, the total weight of those SVHCs, that are:" ==> Justification ==> If the intention of paragraph 18 is indeed to focus on SoCs and SVHCs manufactured, imported, or released to the environment, the proposed change to this paragraph would make it clearer (together with the suggested change to replace 'procured' by 'imported').	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	ArcelorMittal	Preparer (non-financial preparing a sustainability report)	Luxembourg			I partially agree and partially disagree	Suggest modifying paragraph 18, point (b), to: "placed on the market as substances on their own or in mixtures." ==> Justification ==> The replacement of 'sold' by 'placed on the market' is suggested to align with REACH terminology.	E2	E2-5 - Substances of concern and substances of very high concern	18. (b)
Excels	ArcelorMittal	Preparer (non-financial preparing a sustainability report)	Luxembourg			I partially agree and partially disagree	Suggest modifying paragraph 20 to: "Producers and importers of articles with SVHC shall disclose the quantities of those substances that are part of articles placed on the market for levels above the 0.1% threshold of Art. 33 of the REACH Regulation. Importers of articles that are not further placed on the market to third parties shall not have to disclose." ==> Justification ==> 1) The replacement of 'Manufacturers' by 'Producers' is made to align with REACH terminology. In REACH, to avoid confusion with manufacturers of substances, 'producers of articles' is used to describe article manufacturers. 2) It is suggested to omit 'users' from this paragraph, as it is extremely difficult for downstream users of articles to gather information on SVHCs in all articles used. 3) Replacement of 'sold' by 'placed on the market' is to align with REACH terminology. 4) It is suggested to omit the term 'components' as this also concerns articles (articles to be used as parts in larger articles). It is also not a term specified under REACH. 5) The last sentence is a suggested clarification on the absence of reporting duties for importers of articles that use the imported articles themselves (within the group responsible for reporting).	E2	E2-5 - Substances of concern and substances of very high concern	20.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ArcelorMittal	Preparer (non-financial preparing a sustainability report)	Luxembourg			I partially agree and partially disagree	In case no modifications are made to paragraph 18, it is highly recommended to modify paragraph AR6 to: "The requirements in paragraph 18 apply to the undertaking that, as main activity, manufactures chemical substances, formulates chemical mixtures and/or operates in the retail of chemical substances. The requirements in paragraph 18 do not apply to the undertaking that, as main activity, manufactures non-chemical products." ==> Justification ==> Companies typically have multiple roles in the supply chain for different activities. For instance, companies that are article manufacturers for their main activity (i.e., considered as downstream users in REACH terminology), might also bring by-products of their article production process on the market as substances under REACH. They are therefore also manufacturer, although this is not their main activity. It is understood from the justifications for amendment that such companies are not expected to fulfill the requirements of paragraph 18 (full SoC + SVHC reporting). Indeed, companies that do not manufacture chemicals as their main business (even if they are considered manufacturer or importer for some substances under REACH) normally do not have access to SoC information. It is therefore recommended to more clearly limit the reporting requested in paragraph 18 to chemical companies.	E2	E2-5 - Substances of concern and substances of very high concern	AR 6
Excels	ArcelorMittal	Preparer (non-financial preparing a sustainability report)	Luxembourg			I partially agree and partially disagree	It is important to include definitions for terminology used, and where necessary, align with existing definitions such as under REACH. This specifically holds for the terminology for supply chain actors or related to activities of supply chain actors used in paragraph 18, 19, 20 and AR6 (manufacturer, importer, user, 'formulates', 'operates in the retail of chemical substances', ...). The terminology under REACH is manufacturer, importer, downstream user, producer of an article, formulator, distributor. Also, the terminology 'placed on the market' instead of 'sold' is encouraged.	E2	E2-5 - Substances of concern and substances of very high concern	5.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	As a clarification, companies need more certainty to ensure information required under this paragraph, combined with the paragraph 3.1 from ESRS 1, let the operator the possibility to report only relevant emissions of specific substances and not all emissions coming from all substances.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	It should be noted that the Regulation (UE) 2024/1244, which introduces three new pollutants in its Annex II, will enter into force at 1st january 2028. In addition, the sentence "It can include additional pollutants that it considers material" should be deleted in order to avoid unnecessary debates. This provision is not considered necessary, since undertakings can disclose entity-specific information if they want to do so.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The thresholds for releases defined in Annex II of Regulation (EU) 2024/1244 apply to EU activities listed in the Annex I. To ensure international data comparability, it could be relevant to specify that these thresholds also apply to activities listed in the Annex I, regardless of their location (i.e. inside or outside EU).	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We note that paragraphs 9(b) to 9(g) have been added. We request a guarantee that these additions do not introduce new disclosures requirements (e.g. thresholds, list of pollutants to be considered...).	E2	E2 - Objective	9.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	This datapoint supposes that undertaking shall justify the local materiality of pollutants. As a clarification, it should be specified that aggregation at the group level remains possible.	E2	E2 - Objective	10.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Neither the definition of secondary microplastics nor the associated risk assessment along the value chain are officially established. Their impacts are not yet clearly addressed by science. Given the lack of robust and consistent methodologies to date, this item must be suppressed.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Reporting on SoC must be suppressed as there is no official, stabilised definition. Moreover, to require undertakings to disclose SoC goes beyond what is required by REACH and creates a significant additional burden (over three thousand substances should be considered). Therefore, we call for the suppression of the reporting on SoC, as proposed by the French Accounting Standards Authority.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	This datapoint asks for a disclosure that goes beyond what is requiered by Article 33 of the REACH Regulation. Indeed, Art 33 does not compel operators to quantify SVHC, but only to specify the substances concerned by nam. Therefore, this paragraph should be amended accordingly.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	This datapoint asks for a disclosure that goes beyond what is requiered by Article 33 of the REACH Regulation. Indeed, Art 33 does not compel operators to quantify SVHC, but only to specify the substances concerned by nam. Therefore, this paragraph should be amended accordingly.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	The notion of "importer" should be clearly defined.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	BDO Poland	Auditor	Poland			I disagree	The Exposure Draft requires companies to explain how their transition plan is "compatible with limiting global warming to 1.5°C." However, the absence of a clear methodology for assessing compatibility may result in inconsistent interpretation across companies. While a qualitative assessment of locked-in emissions is valuable, it will be challenging for many companies to conduct without sector-specific guidance. To enhance comparability and auditability, the Standard should require reference to a recognised set of pathways (e.g., sectoral 1.5°C pathways or a defined methodology) or, at a minimum, mandate disclosure of the exact pathway(s), model(s), and key parameter choices used to support the compatibility claim.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	The revised drafting convention counts "shall disclose" datapoints in main body and places methodology in ARs (which are still mandatory methodological guidance but not counted as datapoints). This distinction is subtle and could cause inconsistent recording of required datapoints and confusion for assurance scope (what counts as a disclosure datapoint vs methodology).	E1	E1-1 - Transition plan for climate change mitigation	AR 1
Excels	BDO Poland	Auditor	Poland			I disagree	AR2 asks for consolidated narrative linking targets, actions, CapEx/OpEx and governance, but allows that internal management information need not all be disclosed. The threshold of what constitutes "key features" vs. confidential internal modelling is ambiguous. Companies will struggle to balance transparency with commercially sensitive detail; auditors will struggle to know whether withheld details are material.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	BDO Poland	Auditor	Poland			I disagree	The requirement to disclose geospatial coordinates for company assets and, where relevant, supply-chain nodes (AR5(b), presents a significant implementation challenge. Many suppliers are unlikely to have such data readily available, which may necessitate extensive procurement and IT projects to collect, validate, and maintain geospatial information. Without phased guidance or minimum data standards, this requirement risks imposing disproportionate costs and may limit comparability across undertakings.	E1	E1-2 - Climate-related risks and scenario analysis	AR 5

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BDO Poland	Auditor	Poland			I disagree	The primary boundary is the financial consolidation (reporting undertaking) but AR19 requires operational-control reporting if the financial boundary fails to fairly present operated assets. No clear tests or quantitative thresholds for when the "fails to convey a fair presentation" trigger applies. That creates inconsistent choices and reconciliation issues (Scope 1/2 reported on two boundaries) that auditors will need to assess.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	BDO Poland	Auditor	Poland			I disagree	AR25(e) requires updating Scope 3 categories every year for significant categories and full inventory at least every three years, but the screening rules for "significant" categories are wide (magnitude + other criteria). The lack of clearer thresholds (e.g., % of total emissions, spend thresholds) will create year-to-year comparability problems and put heavy supplier data collection burdens on companies. Auditors will have to rely heavily on estimates and sampling with limited guidance on acceptable estimation techniques.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose to re-integrate the reference to E-PRTR , which was described in the existing point 28.a, in the current AR 2 and AR 3 relative to ESRS E2-4,because otherwise there would be no reference regarding the reporting of pollutants, making it more difficult to understand and comply with the regulatory requirements	E2	E2-4 - Pollution of air, water and soil	16.
Excels	ASSIREVI	Auditor	Italy			I disagree	With reference to ESRS E2-5 points 18 (a, b, c) and 19, we recommend integrating the table from NMIG (NMIG 10 for paras. 18, 19 and 20 - Substances of concern and substances of very high concern) into the associated AR 7, in order to facilitate users during completion by providing them with a reference template.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	ASSIREVI	Auditor	Italy			I disagree	With reference to ESRS E2-5 points 18 (a, b, c) and 19, we recommend integrating the table from NMIG (NMIG 10 for paras. 18, 19 and 20 - Substances of concern and substances of very high concern) into the associated AR 7, in order to facilitate users during completion by providing them with a reference template [The same comment has been included in the following ESRS: E2-18 (a, b, c) and E2-19].	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)
Excels	ASSIREVI	Auditor	Italy			I disagree	With reference to ESRS E2-5 points 18 (a, b, c) and 19, we recommend integrating the table from NMIG (NMIG 10 for paras. 18, 19 and 20 - Substances of concern and substances of very high concern) into the associated AR 7, in order to facilitate users during completion by providing them with a reference template [The same comment has been included in the following ESRS: E2-18 (a, b, c) and E2-19].	E2	E2-5 - Substances of concern and substances of very high concern	18. (b)
Excels	ASSIREVI	Auditor	Italy			I disagree	With reference to ESRS E2-5 points 18 (a, b, c) and 19, we recommend integrating the table from NMIG (NMIG 10 for paras. 18, 19 and 20 - Substances of concern and substances of very high concern) into the associated AR 7, in order to facilitate users during completion by providing them with a reference template [The same comment has been included in the following ESRS: E2-18 (a, b, c) and E2-19].	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	ASSIREVI	Auditor	Italy			I disagree	With reference to ESRS E2-5 points 18 (a, b, c) and 19, we recommend integrating the table from NMIG (NMIG 10 for paras. 18, 19 and 20 - Substances of concern and substances of very high concern) into the associated AR 7, in order to facilitate users during completion by providing them with a reference template [The same comment has been included in the following ESRS: E2-18 (a, b, c) and E2-19]. Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-1 - Policies related to pollution	12.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-2 - Actions and resources related to pollution	13.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-3 - Targets related to pollution	14.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We agree that only those pollutants emitted by technical installations from Annex II of 2024/1244 have to be reported. Comment: It is not clearly defined what is meant with "applicable to the undertaking". Suggestion: Focusing on environmental installation permits and the relevant installations/ Activities (in Accordance with Annex I of 2024/1244; Policy 2010/75/EU Annex I) would facilitate a globally consistent approach and would justify the selection of pollutants that need to be measured. Suggested text: "The pollutants to be considered for reporting under E2-4, paragraph 16 (a) are those from Annex II of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation) that are applicable to the undertaking in accordance with measurement requirements based on environmental permits or Annex I of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation). It can include additional pollutants that it considers material."	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We agree that the material pollutants to be considered for reporting can be defined by the thresholds for releases in Annex II of 2024/1244.	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	PwC International Limited	Auditor	United Kingdom			I agree	ESRS E2 paragraph 16(d) requires an entity to provide information connected to the downstream value chain related to secondary microplastics resulting from a breakdown of its products. Neither ESRS E2 paragraph 16(c) nor 16(d), however, mention secondary microplastics produced by the entity itself (for example, through wear and tear of car tyres used by the entity). We recommend that EFRAG expand ESRS E2 paragraph 16(d) to require information about secondary microplastics both in an entity's own operations and in the downstream value chain.	E2	E2-1 - Policies related to pollution	16.
Excels	PwC International Limited	Auditor	United Kingdom			I agree	It is not clear from ESRS E2 AR 7 how an entity is meant to treat substances of concern and substances of high concern that have more than one hazard class in the CLP regulation. ESRS E2 AR 7 states, "This implies that a single substance needs to be counted under multiple hazard classes." This guidance, however, is insufficient because the word 'implies' neither provides a requirement nor permission to exclude the information. It is not clear how an entity is expected to both disclose substances under the 'implication' that a single substance is counted under multiple hazard classes but also avoid double counting in the total amounts. The optional example table in the Non-mandatory Illustrative Guidance ESRS E2 NMIG 10 provides some clarity by stating that "the total is the amount of substances and not the sum of all hazard classes". We recommend that EFRAG include this clarification in the standard.	E2	ESRS E2 Pollution AR 7	AR 7

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E2 Pollution, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	E2	E2 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary duplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	E2	E2 - Objective	5.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	ESRS E2 para 16 (d) constitutes a clear instance of scope expansion, as the reference to the downstream value chain was not present in the original ESRS text. Consequently, this addition cannot be regarded as a simplification. "connected to the undertaking's downstream value chain, information on secondary microplastics resulting from the breakdown of larger plastic items from the products of the undertaking"	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We request to clarify the basis and methodology for calculating the amount of microplastic emissions.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We request to clarify the basis and methodology for calculating the amount of microplastic emissions.	E2	E2-4 - Pollution of air, water and soil	AR 5
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Under the revised ESRS E2, users of substances are obliged to only report on SVHCs (total weight, quantities for substances > 0.1% threshold of REACH). In its February 2025 response to JRC Workstream 2 on SoCs in textiles, ETSA stressed its reliance on chemical industry disclosures, as testing finished textiles is highly complex and further complicated by recycled materials.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I agree	ETSA also warned that allowing companies to use their own methods for pollutant reporting risks poor comparability and suggested aligning measurement with recognized local and national legislation.	E2	E2-5 - Substances of concern and substances of very high concern	AR 6
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	When it comes to the calculation and reporting of pollutants emitted, ETSA members express concerns about allowing companies to use their own methodologies for measurement and reporting. While flexibility can be beneficial, it could lead to a lack of comparability. A suggested solution would be to mandate measurement practices according to local and national legislations, which are already officially recognized and account for the local context.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	TEPPFA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The Disclosure Requirement E2-4 Article 16(b)(i) aimed at disclosing the total volume of microplastics manufactured or used in products, based on the REACH definition and scope, will impose a significant additional burden on companies. Operators are already required by Commission Regulation (EU) 2023/2055 to provide detailed disclosures, including annual emission estimates of synthetic polymer microparticles to ECHA. In addition, the new Pellet Loss Regulation (based on the provisional agreement of 13 May 2025) will require operators to disclose on the quantities of pellets handled and released to the environment. This requirement effectively adds another layer to existing legal obligations, further increasing the gap in harmonization between regulations, which will ultimately create confusion and resource burden for operators, especially for SMEs, potentially undermining efforts to comply consistently and effectively. Better alignment and integration with existing legal frameworks such as REACH and the Pellet Loss Regulation would support clarity, reduce duplicative efforts, and improve data quality and comparability for all stakeholders.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	TEPPFA	Business association (other than association of financial institution)	Belgium			I disagree	Regarding the newly added Disclosure Requirement E2-4 in Article 16(b.ii) to report on secondary microplastics, we recommend to remove the proposal as it is (1) inconsistent with the EC's mandate to streamline and clarify ESRS reporting obligations, and (2) there is a lack of scientifically validated measurement methodology which means such estimates will vary widely, risking public distrust and a perception of "greenwashing" rather than genuine transparency.	E2	E2-4 - Pollution of air, water and soil	AR 6
Excels	TEPPFA	Business association (other than association of financial institution)	Belgium			I disagree	Additionally, under application requirements 6 for paragraph 16 (b), unintentional pellet losses are considered as secondary microplastics, however these should be categorized and reported as primary microplastics, consistent with their definitions and treatment under REACH and Pellet Loss regulations.	E2	E2-4 - Pollution of air, water and soil	AR 6
Excels	TEPPFA	Business association (other than association of financial institution)	Belgium			I disagree	While we support the objective of improving transparency on substances in products to improve product circularity and sustainability, the reporting of SoCs by manufacturers of plastic articles and users of mixtures proves to be quite challenging. The main difficulties include: •Regulatory complexity •Access to confidential information by downstream users, •Continuous monitoring needs, given that according to ESPR, 12,000 chemical substances out of 23,000 registered in the EU could potentially be labelled "substances of concern". •Ambiguity in terminology, definitions such as substances "negatively affecting the re-use and recycling", which are open to interpretation and risk inconsistent application •Identifying SoCs should be communicated to customers, through product regulation, standard or ESPR product group provisions. The current drafting, as well as the former DR 33, introduces duplication with existing legislation and disproportionate complexity. ESRS should build on existing frameworks (such as Product Regulation, REACH and ESPR) rather than extend or reinterpret them. This would improve coherence, administrative burden and reliability of reported data. Therefore, the current provisions addressing SVHC are deemed adequate, whereas introducing via CSRD an additional category of SoC would create complexity and ambiguity in the whole supply chain and among the relevant stakeholders.	E2	E2-5 - Substances of concern and substances of very high concern	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	TEPPFA	Business association (other than association of financial institution)	Belgium			I disagree	In addition to these difficulties, Disclosure Requirement E2-5 goes beyond the scope of existing regulation, in particular Article 33 of the REACH Regulation, which requires, as a minimum, disclosure of the name of the relevant substance. By contrast, E2-5 obliges disclosure of the total weight or quantity of substances under several provisions: · Article 18, requires manufacturers and importers of mixtures to disclose the total weight of SoCs and SVHCs under multiple conditions; In line with the 0.1% w/w threshold for SVHC under REACH Article 33, a clear and reasonable cut-off limit, for example 10% w/w, should be set for mixtures containing Substances of Concern (SoC) to avoid ambiguity and ensure consistent interpretation in reporting.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	TEPPFA	Business association (other than association of financial institution)	Belgium			I disagree	In addition to these difficulties, Disclosure Requirement E2-5 goes beyond the scope of existing regulation, in particular Article 33 of the REACH Regulation, which requires, as a minimum, disclosure of the name of the relevant substance. By contrast, E2-5 obliges disclosure of the total weight or quantity of substances under several provisions: · Article 19, requires users of mixtures to disclose the total weight of SVHCs used in production and released into the environment;	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	TEPPFA	Business association (other than association of financial institution)	Belgium			I disagree	In addition to these difficulties, Disclosure Requirement E2-5 goes beyond the scope of existing regulation, in particular Article 33 of the REACH Regulation, which requires, as a minimum, disclosure of the name of the relevant substance. By contrast, E2-5 obliges disclosure of the total weight or quantity of substances under several provisions: · Article 20, requires manufacturers, importers, and users of articles containing SVHCs to disclose the quantities of such substances in procured components or articles above the 0.1% threshold set in REACH Article 33, as well as in sold components or articles above this threshold.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The current design of the SoC/SVHC disclosure risks missing its stated objective of helping users understand material impacts on health and the environment. Reporting overall hazard-based volumes without exposure or risk context can mislead stakeholders, as it ignores whether risks are effectively controlled. For instance, many metals are intrinsically classified as hazardous but are used safely under strict exposure controls. This creates reputational risks, especially for Green Deal-critical materials such as cobalt, nickel, lead, and PGMs, which are essential for renewable energy and recycling but are still flagged as hazardous. It remains unclear whether the disclosure is intended to map potential regulatory risk (substances likely to face restrictions) or to quantify hazardous flows in society. In its current form, it achieves neither goal effectively and risks undermining both comparability and stakeholder understanding.	E2	E2 - Objective	8.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The current design of the SoC/SVHC disclosure risks missing its stated objective of helping users understand material impacts on health and the environment. Reporting overall hazard-based volumes without exposure or risk context can mislead stakeholders, as it ignores whether risks are effectively controlled. For instance, many metals are intrinsically classified as hazardous but are used safely under strict exposure controls. This creates reputational risks, especially for Green Deal-critical materials such as cobalt, nickel, lead, and PGMs, which are essential for renewable energy and recycling but are still flagged as hazardous. It remains unclear whether the disclosure is intended to map potential regulatory risk (substances likely to face restrictions) or to quantify hazardous flows in society. In its current form, it achieves neither goal effectively and risks undermining both comparability and stakeholder understanding.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing the total weight of SoC and SVHC, especially in mixtures, adds an excessive burden on companies and does not help understand if a company works sustainably. Perhaps reporting SoC and SVHC under a qualitative statement may help.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Same as above	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This amendment can help align this DR to the REACH regulation. However, the burden on companies to disclose SVHC does not change	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing SoC and SVHC by hazard class is heavily burdensome for companies because it will require companies to report in double counting	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The structure of disclosure requirements of pollution-related policies might be streamlined, but the burden has not been reduced	E2	E2-1 - Policies related to pollution	12.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The structure of disclosure requirements of pollution-related actions might be streamlined, but the burden has not been reduced	E2	E2-1 - Policies related to pollution	13.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The structure of disclosure requirements of pollution-related targets might be streamlined, but the burden has not been reduced	E2	E2-3 - Targets related to pollution	14.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	This DR on pollution related to site-specific locations increases the burden since pollutants differ from one site to another.	E2	E2 - Objective	10.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	- Companies in the scope of the Industrial Emission Directive shall reported under Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation). This would ensure legal consistency, avoid regulatory overlap and reduce the reporting burden. There is no need to include any additional pollutants. - While pollutant selection based on materiality is reasonable, expanding disclosures to include local-level environmental permits massively broadens the scope of emissions and prevents standardisation across companies.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Thresholds for pollutants are now less clear, as they are framed as optional ('they can be considered'), which weakens comparability.	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	- Reporting on transfers of water pollutants to external treatment plants creates double reporting. - Classifying transfers to water treatment plants as pollution is illogical, since these facilities exist precisely to remove contaminants.	E2	E2-4 - Pollution of air, water and soil	AR 4

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The addition of a new disclosure layer on microplastics in the downstream, introduces unnecessary reporting burden.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	All new datapoints are acceptable except for E2-4, which does not offer more clarity as claimed, and only increases the burden of reporting.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Suppliers do not have any legal obligation to provide SoC / SVHC volumes to downstream users. Therefore, volume information provided by Wave 1 companies cannot be verified and is potentially misleading as a reported figure. Existing requirements under the EU REACH Regulation 1907/2006 require EU importers to report any substances above 1 ton per annum. This will provide a more accurate picture of the volume of substances used in the EU. Therefore, CSRD should either: 1.Mandate the accurate provision of SVHC and SoC volume data in substances, mixtures and articles supplied to downstream users by suppliers, or 2.Require suppliers to declare the presence of SVHC >0.1% in products (aligned with EU REACH Article 33) and look to substance data collected under the EU REACH Registration requirements to gather volume data. EU REACH is shortly due for revision, the requirements to declare 'types of products' associated with volumes could be introduced here for more granularity. If the above 2 points are not followed, Wave 1 companies can only report data provided by suppliers, without any validation of accuracy and should therefore be given the allowance to do so within the legal text, e.g. under ESRS 1 general disclosures 'reliefs' section 7.4, paragraph 91.	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Suppliers do not have any legal obligation to provide SoC / SVHC volumes to downstream users. Therefore, volume information provided by Wave 1 companies cannot be verified and is potentially misleading as a reported figure. Existing requirements under the EU REACH Regulation 1907/2006 require EU importers to report any substances above 1 ton per annum. E2	E2-5 - Substances of concern and substances of very high concern	18. (b)
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Suggestions: - Same as described for paragraph 18. (a) -It may be worth considering specifying a threshold to support the definition of material unintentional releases. Without a clearly defined threshold, it is difficult to compare KPIs across companies, as each may apply its own criteria. One possible approach is to adopt the definition of "incidents resulting in fines or penalties exceeding $10,000 USD", which are classified as significant under the Rating+ criteria.	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Suggestions: - Same as described for paragraph 18. (a) -It may be worth considering removing the distinction between materials used and procured for companies already reporting procured amounts under 18(a). For companies where in practice, the amounts procured and used within the fiscal year are typically very similar, the effort required to differentiate between them is disproportionately high compared to the environmental benefit gained. Therefore, treating them as equivalent for reporting purposes would enhance efficiency without compromising the integrity of the data.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	As a clarification, companies need more certainty to ensure information required under this paragraph, combined with the paragraph 3.1 from ESRS 1, let the operator the possibility to report only relevant emissions of specific substances and not all emissions coming from all substances.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	It should be noted that the Regulation (UE) 2024/1244, which introduces three new pollutants in its Annex II, will enter into force at 1st january 2028. In addition, the sentence "It can include additional pollutants that it considers material" should be deleted in order to avoid unnecessary debates. This provision is not considered necessary, since undertakings can disclose entity-specific information if they want to do so.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The thresholds for releases defined in Annex II of Regulation (EU) 2024/1244 apply to EU activities listed in the Annex I. To ensure international data comparability, it could be relevant to specify that these thresholds also apply to activities listed in the Annex I, regardless of their location (i.e. inside or outside EU).	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We note that paragraphs 9(b) to 9(g) have been added. We request a guarantee that these additions do not introduce new disclosures requirements (e.g. thresholds, list of pollutants to be considered…).	E2	E2 - Objective	9.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	This datapoint supposes that undertaking shall justify the local materiality of pollutants. As a clarification, it should be specified that aggregation at the group level remains possible.	E2	E2 - Objective	10.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Neither the definition of secondary microplastics nor the associated risk assessment along the value chain are officially established. Their impacts are not yet clearly addressed by science. Given the lack of robust and consistent methodologies to date, this item must be suppressed.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Reporting on SoC must be suppressed as there is no official, stabilised definition. Moreover, to require undertakings to disclose SoC goes beyond what is required by REACH and creates a significant additional burden (over three thousand substances should be considered). Therefore, we call for the suppression of the reporting on SoC, as proposed by the French Accounting Standards Authority.	E2	E2-5 - Substances of concern and substances of very high concern	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	This datapoint asks for a disclosure that goes beyond what is requiered by Article 33 of the REACH Regulation. Indeed, Art 33 does not compel operators to quantify SVHC, but only to specify the substances concerned by nam. Therefore, this paragraph should be amended accordingly.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	This datapoint asks for a disclosure that goes beyond what is requiered by Article 33 of the REACH Regulation. Indeed, Art 33 does not compel operators to quantify SVHC, but only to specify the substances concerned by nam. Therefore, this paragraph should be amended accordingly.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	The notion of "importer" should be clearly defined.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The definition of 'article' is missing. It would help adding it, based on Reach.	E2	E2-5 - Substances of concern and substances of very high concern	5.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We propose to re-integrate the reference to E-PRTR , which was described in the existing point 28.a, in the current AR 2 and AR 3 relative to ESRS E2-4,because otherwise there would be no reference regarding the reporting of pollutants, making it more difficult to understand and comply with the regulatory requirements.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	DRSC	(National) standard setter	Germany			I disagree	Disaggregation will lead to too much detail level and will increase reporting workload. Although "appropriate disaggregation" is worded, a definition of "appropiate level" is needed.	E2	E2 - Objective	10.
Excels	DRSC	(National) standard setter	Germany			I disagree	The amendment to "any material pollutant" without a reference to the EU-PRTR (as in E2.28) and without reference to "facilities for which the applicable threshold value specified in Annex II of Regulation (EC) No 166/2006 is exceeded" (E2.29) imposes a signficant increase in practical burden: (1) Undertakings have used the definition of the EU-PRTR for "facility" because of the reference to the EU-PRTR in ESRS E2; this will become subject to discussions with auditors in case the reference is deleted. (2) The provisions in ESRS E2 allow undertakings to refer to facilities that are covered by the EU-PRTR. With the proposed amendment, undertakings will need to consider all of their facilities.(Background: For the operating license of a facility the EU law takes the facility's capacity and maximum pollution into account. In case the facility will - due to its capacity and other specifications - not exceed the thresholds of the EU-PRTR, this facility is not in the PRTR-scope. Based on the requirement in ESRS E2, the undertaking can therefore already exclude these facilities.)	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	"secondary microplastics" should be aligned with REACH SPM-Regulation and Pellet-loss Regulation.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	DRSC	(National) standard setter	Germany			I disagree	Transfers of water pollutants to external treatment plants should not qualify as pollution in downstream value chain.	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	DRSC	(National) standard setter	Germany				Disclosure requirement E2-5 on substances of concern (SoCs) and substances of very high concern (SVHCs) also risks becoming excessively burdensome and does not adequately provide an understanding of the impact of the undertaking on health and on the environment. Disclosing total amounts of substances is not necessarily a proxy for actual and potential environmental impacts, as for each substance it is necessary to consider its use, its application, and how it is handled.	E2	E2-5 - Substances of concern and substances of very high concern	
Excels	DRSC	(National) standard setter	Germany			I disagree	We doubt that transition risks can be covered by the metrics proposed.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	DRSC	(National) standard setter	Germany			I disagree	"Manufacturers and importers of substances" --> The concept of importers is new in ESRS, (1) it needs to be clear which party counts as an importer, (2) The BfC (para 306) states to explain why the concept of importers was introduced, however, the term remains unclear anyway.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: This para adresses both SOC and SVHC. For a better understanding both aspects should be seperated.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: Clarification is needed that only information on releases from relevant leaks or spills have to be disclosed.	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	DRSC	(National) standard setter	Germany			I disagree	Undertakings should not be obliged to report on releases of SoCs/SVHCs into the environment (air, water and soil) that go beyond what they already are reporting according to approval of production sites and according to requirements from regulations on emissions, e.g. IED, IEPR.	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: "present the information on quantities of SVHC as a percentage of the total amount of SoC by hazard class, instead of the total weight." --> contradiction	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: Clarification is needed how groups with subsidiaries in non-EU states should handle this requirement as those subsidiaries might lack information because their business partners and themselves are not subject to CLP/REACH.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: Prescribing the reporting in mass units contains a contradiction to AR 7b where it is allowed to present SVHC as a share of the amount of SoC	E2	E2-5 - Substances of concern and substances of very high concern	AR 8
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-1 - Policies related to pollution	12.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-2 - Actions and resources related to pollution	13.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E2	E2-3 - Targets related to pollution	14.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-4 - Pollution of air, water and soil	16. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to remove microplastics mandate and change to voluntary disclosure. Secondary microplastics disclosure, though only required qualitatively, still poses challenges due to lack of mature methodology.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-4 - Pollution of air, water and soil	AR 1
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We agree that only those pollutants emitted by technical installations from Annex II of 2024/1244 have to be reported. Comment: It is not clearly defined what is meant with "applicable to the undertaking". Suggestion: Focusing on environmental installation permits and the relevant installations/ Activities (in Accordance with Annex I of 2024/1244; Policy 2010/75/EU Annex I) would facilitate a globally consistent approach and would justify the selection of pollutants that need to be measured. Suggested text: "The pollutants to be considered for reporting under E2-4, paragraph 16 (a) are those from Annex II of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation) that are applicable to the undertaking in accordance with measurement requirements based on environmental permits or Annex I of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation). It can include additional pollutants that it considers material."	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We agree that the material pollutants to be considered for reporting can be defined by the thresholds for releases in Annex II of 2024/1244.	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please eliminate the need to report on downstream water pollution for external water treatment plants as this represents an additional reporting burden and does not fit the approach of only reporting on own operation metrics. Additionally, wastewater discharge to municipalities for further treatment should not be considered as pollution.	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-4 - Pollution of air, water and soil	AR 5
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	18. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	18. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	AR 6
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	New link to 'ESRS S3 affected communities' where statement of a 'human right to a clean, healthy and sustainable envonment'. The UN resolution states a 'human right to clean water and air', but not to a 'healthy or sustainable environment'. Human rights under the CSRD are understood to be internationally recognised human rights. The right to clean, healthy sustainable environment', has not been incorporated in any international human rights instrument, nor any EU framework.Remove the reference to the 'right to clean, healthy sustainable environment'.	E2	Interactions with other ESRS	11(e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Potential issues with added focus on, increased scope of and unclear (new) definition for microplastics as a pollutant increasing reporting burden.	E2	Pollution Metrics - Microplastics	16(b)-(d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	"Trading" is included in the objective only and should be out of scope, as the act of trading (a term which also lacks sufficient clarity and definition) does not carry with it significant and tangible actual or potential impacts, risks or opportunities. We recommend removing it from the standard. Also, it is not clear why SoCs are removed from the requirements for users only, while manufacturers and importers (a term which also lacks sufficient clarity and definition) are still in scope for reporting this metric. We recommend removing the reporting of SOCs from the standard altogether.	E2	Pollution Metrics - SoC/SVHC	17-18, AR7
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The proposed definition of 'manufacturers and importers' is different from that outlined in REACH for formulating companies (part of the so-called downstream users). This creates a mismatch that will place many companies in conflicting categories under REACH versus ESRS ED. This inconsistency will lead to additional reporting requirements for many companies whereas under REACH there are no such obligations. For example, the ED definitions on substances of concern will lead to unnecessary additional analysis, cost and effort for companies in the Chemicals industry. We therefore request EFRAG to align the definition and reporting requirements under the ESRS ED fully with REACH.	E2	E2-5 - Substances of concern and substances of very high concern	AR 6

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The current ESRS definition of microplastics diverges from REACH. The ED partially aligns the two but the ED does not include the derogations in place under REACH. For example, for paint and coatings, film-forming processes as part of application mean that certain microplastics are subsequently no longer classified as such under REACH. As there are no such derogations under the ED this will result in a significantly wider scope and materially increased reporting requirements. We therefore request EFRAG to align the definition and reporting requirements under the ESRS ED fully with REACH.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It is not technically feasible for chemical manufacturers to quantify secondary microplastic emissions arising from wear, tear and abrasion of articles once their substances have been transformed or incorporated into other products during downstream manufacturing. Research on microplastics formation over time on finished articles incorporating coatings is costly and unfortunately remains minimal. In addition, due to the absence of standardized methods even qualitative or estimated disclosures offer little insight. This creates a heavy reporting burden with limited to no added value.	E2	E2-4 - Pollution of air, water and soil	AR 5
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We would recommend to separate disclosure requirements for subtopics on substances of concern and substances of very high concern, given different groups of users. Hypothetically, undertakings now run the risk of identifying a material topic on substances of concern, without having prescribed metrics to report on as they are not one of the user groups specified by par. 18 to disclose on this.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	We welcome the proposed revision and applaud the effort to further align with the REACH Regulation. However, we believe the alignment should go further to ensure reliable reporting of the data for the group 'users of articles with SVHC'. Under REACH Article 33, suppliers are required to inform consumers when an article contains SVHCs above the 0.1% threshold, but they are not obligated to disclose the actual quantity (e.g., 0.2%, 10%, 20%). As a result, even with the revised requirement, users will still struggle to obtain reliable and consistent data needed to report on the proposed metric (quantitative kilos/tonnes of SVHC). We recommend revising the requirement to include qualitative disclosure of SVHC content, in line with information that suppliers are obligated to inform users on under REACH.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We do not see the added value of requiring a breakdown of SVHC data per hazard class. All substances of very high concern are, by definition, harmful, and reporting at a total level provides sufficient insight for users. Introducing this level of granularity increases complexity without delivering proportionate benefits in terms of decision-useful information.	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Mention the connection with AR 22 of ESRS 2 (e.g., local considerations such as air, water, and soil quality), and include 'pollutant incidents and deposits with material impacts' as an additional example (and potential item for disaggregation)	E2	E2 - Objective	10.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Reintroduce the three datapoints on current financial effects related to pollution in E2-4 Actions, as some users of sustainability statements find them particularly useful. The first two are easy to obtain from financial statements and are crucial to reflect financial materiality and ensure connectivity. The third is essential to reflect impact materiality and its link to financial materiality. Proposed wording: "The undertaking shall disclose (a) material operating and capital expenditures incurred during the reporting period in relation to major incidents and deposits; (b) material provisions for environmental protection and remediation costs; and (c) description of material incidents and deposits that occurred during the reporting year.	E2	E2 - Objective	1.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	ANC acknowledges EFRAG's simplification efforts on microplastics: quantitative information is limited to primary microplastics, which are manufactured, purchased, or sold by the company and therefore generally known. For secondary microplastics, only qualitative information is required, which reflects the greater difficulty for undertakings and a proportionate approach. Companies have raised concerns about the absence of an official definition of secondary microplastics and the limited scientific knowledge of their impacts, stressing the need for guidance and public support.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Propose presenting SVHC quantities as a percentage of the total amount of SoC on an optional basis, alongside the disclosure of absolute values (instead of as an alternative), as users specifically request absolute values to facilitate data processing and comparability	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	We had previously requested the removal of the data points on substances of concern, due to the lack of a clear definition and the challenges in implementation. Alternatively, ANC proposes to: - Introduce a phase-in period for substances of concern due to the challenges outlined. - Clarify the scope defined in AR 6, as it is currently ambiguous – specifically whether it applies only to companies with chemical expertise ("chemists") or to any undertaking handling chemicals. A clear definition of "chemical substances" and "chemical mixtures" should be provided to ensure consistent understanding and application across all undertakings. - Provide methodological guidance on how to report substances outside the EU, given regulatory divergences regarding substances of concern (definitions and associated requirements). Reporting may not yet be established in some jurisdictions, and certain countries may lack the infrastructure needed for pollutant data analysis. - Narrow the scope to substances that are significant and strategic for the company, by adding the following Application requirements: "Information to be disclosed under this paragraph applies for those substances the undertaking has prioritised (e.g., for management attention, resource allocation, and monitoring), due to their relevance for achieving sustainability-related objectives covered by its policies, actions and targets (if any)."	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Reporting of SoC and SVHC grouped by hazard class should be limited to SVHC.	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Gap with ANC proposal : new data point on substances of very high concern that are procured or sold above the 0.1% threshold of Art. 33 of the REACH Regulation. This requirement appears burdensome, as REACH only requires disclosure of the substance name, not the quantity, contrary to what EFRAG envisages. Delete it.	E2	E2-5 - Substances of concern and substances of very high concern	20.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Clarification is needed on the term "regular operations" which isn't defined.	E2	E2 - Objective	6.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	This comment is on E2.16(d). The distinction between the disclosures required for primary (where quantitative information will be necessary) and secondary (where only qualitative information will be requested) microplastics improves clarity on the definition of microplastics which therefore includes those intentionally manufactured/used, and those (unintentionally) generated from the products, thus enhancing comprehensibility and applicability. In addition, guidance on the identification, assessment and quantification of secondary microplastic would improve topic clarity and applicability.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	This comment is on E2.16(d). There appears to be an inconsistency in the scope between paragraph 16d and AR 5, as in paragraph 16d, secondary microplastics refer only to a breakdown of larger plastics while AR 6's definition include unintentionally produced microplastics, including through the loss of plastic pellets. We ask EFRAG to resolve these inconsistencies by aligning the definitions and ensuring all unintentional sources, such as pellet loss and abrasion are included on top of breakdown of large plastics.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We encourage EFRAG to clarify the treatment of the same substance for several capacities within a single reporting period. For example a substance that is procured, manufactured in production and then sold need to be reported in both 18 and in 18b. In our view, reporting the same quantity under multiple relevant datapoints can enhance transparency by providing a fuller view of the substance's lifecycle and operational context, as long as the overlaps are clearly explained to avoid misinterpretation. Likewise for release into the environment. Furthermore, the notions of "manufacturers" and "importers" are not defined in the ESRS. We encourage EFRAG to provide a definition of these new terms and there could be overlap.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The current text refers to 'procured or manufactured'. We encourage EFRAG to specify whether the figures reported should be the sum of procured and manufactured, or if the substances need to be reported separately based on whether they are procured or manufactured.	E2	E2-5 - Substances of concern and substances of very high concern	18. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	It is also unclear how the substances need to be reported when a company is a manufacturer/importer and a user. We encourage EFRAG to clarify that the substances should be reported once per flow (i.e. report for the role as manufacturer / importer, and for the role as user), disaggregated when relevant. User of substances or articles is highlighted in bold but the only definition in the Glossary makes references to users of sustainability statements. We suggest to align the wording of 19 to 18c with respect to release – by including the reference to "unintentional releases" in §19. In addition, the notion of user that is highlighted in bold refers to the definition of "user of sustainability statements" in the glossary. We encourage EFRAG to include a definition of "user of substances" in the glossary applicable to different sectors and substances.	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The wording of the revised ESRS states that undertakings shall disclose "the amounts of any material pollutant emissions to air, water and soil from its regular operations and incidents in the reporting period". The notion of material pollutant emissions raises interpretation issues, as to what qualifies as a material pollutant. Especially, it can raise application questions in relation to AR 2 which requires reporting on pollutants listed in Annex II of IEPR and those pollutants that it measures and monitors based on environmental permits. It is unclear if a company can consider a "non material" a pollutant that is tracked under IEPR if the company considers it non material.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	Dragerwerk AG &Co.KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Quantities of SVHC in articles are not communicated along the supply chain. Even with very complex queries, this value cannot be determined with audit certainty, as the query options are severely restricted due to the new regulations for avoiding 'trickle-down'.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	Dragerwerk AG &Co.KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Quantities of SVHC in articles are not communicated along the supply chain. Even with very complex queries, this value cannot be determined with audit certainty, as the query options are severely restricted due to the new regulations for avoiding 'trickle-down'.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	Dragerwerk AG &Co.KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	There is currently no uniform, legally binding definition for this group of substances, nor is there an official list of substances. Some hazard classes according to CLP regulation are not introduced in other parts of the world. The term is used in various EU initiatives such as the Ecodesign Regulation and the EU Taxonomy, but remains context-dependent and open to interpretation. Due to this lack of clarity, mandatory information on SoC should be removed from the ESRS, as it cannot be reliably implemented by companies.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E2	E2-1 - Policies related to pollution	12.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E2	E2-2 - Actions and resources related to pollution	13.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E2	E2-3 - Targets related to pollution	14.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E2	E2-4 - Pollution of air, water and soil	16. (a)

Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E2	E2-5 - Substances of concern and substances of very high concern	AR 6
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Wastewater discharge to municipalities for further treatment should not be considered as pollution.	E2	E2-1 - Policies related to pollution	AR 4
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Microplastics are to be reported for down stream value chain, however down stream impact of pollutants listed under regulation 2024/1244 is out of scope (e.g. fertilizer production)	E2	E2-4 - Pollution of air, water and soil	16.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				16. Item (a) is only those "material" pollutant emissions, but it is unclear if (b) has the same leeway for microplastics. As written, it seems companies would have to report the total # tonnes of plastic produced and just assume that it all becomes microplastics, which seems inaccurate and unhelpful for the intended audience. Recommend making (b)-(d) sub-items under (a)	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to remove microplastics mandate and change to voluntary disclosure. Secondary microplastics disclosure, though only required qualitatively, still poses challenges due to lack of mature methodology.	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ED §17(b)-18 vs 2023 §40(a)(iii)-(g), §40(b)-(d). Partial simplification. Retains fossil fuel/chemicals/controversial weapons/tobacco statement. Eliminated revenue table, headcount and reconciliation. Revenue breakdown by ESRS sector deleted; only "list of significant sectors" now required. Headcount by geography, banned products, explicit sustainability goals, and IFRS 8 reconciliation deleted.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The definition states "its facilities and facilities of key suppliers", this is inconsistent with the general description of the scope of DMA and disclosure. We would prefer if there was clarity if this is about stakeholders or business relations in the same catchment and it this appliers to any material pollution related IRO included.	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 4 for para 16(a) Treating the transfer of water pollutants to an external treatment plant as "pollution" is incredibly inappropriate, if not dangerous. It treats an uncontrolled discharge to surface water as the same as controlled transfer to a dedicated off-site facility for processing, when the latter is exactly the kind of behavior that this exercise should be trying to incentivize. The only way in which this clause is appropriate is if the receiving treatment plant is incapable of processing the pollutant in question and releases it back into the natural environment. Change to: "Transfers of water pollutants to external treatment plants that are incapable of properly treating said pollutant qualify as pollution in downstream value chain."	E2	E2-4 - Pollution of air, water and soil	AR 4

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				For 20 — in some cases articles may have many varying levels of an SVHC in a specific product. It would be extremely time consuming and also very challenging to report the amount fo SVHC in every single article imported into the EU. Recommend that the requirement is to report that a substance is present in a product above the 0.1% threshold rather than having to report on the specific quantity of the substance in each article. It is unclear whether the 'manufacturing' obligations in disclosure requirement 20 only apply to manufacturing operations located in the EU. Recommend clarifying that it only applies within the EU.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				It is unclear whether the 20(a) obligation to disclose the quantity of SVHCs above 0.1% w/w in procured components only apply to components that procured in the EU. Recommend clarifying that it only applies within the EU.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				It is unclear whether the 20(b) obligation to disclose the quantity of SVHCs above 0.1% w/w on sold articles only apply to the products that are imported into the EU. Recommend clarifying that it only applies within the EU.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 4 for para 16(a) Treating the transfer of water pollutants to an external treatment plant as "pollution" is incredibly inappropriate, if not dangerous. It treats an uncontrolled discharge to surface water as the same as controlled transfer to a dedicated off-site facility for processing, when the latter is exactly the kind of behavior that this exercise should be trying to incentivize. The only way in which this clause is appropriate is if the receiving treatment plant is incapable of processing the pollutant in question and releases it back into the natural environment. Change to: "Transfers of water pollutants to external treatment plants that are incapable of properly treating said pollutant qualify as pollution in downstream value chain."	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The current design of the SoC/SVHC disclosure risks missing its stated objective of helping users understand material impacts on health and the environment. Reporting overall hazard-based volumes without exposure or risk context can mislead stakeholders, as it ignores whether risks are effectively controlled. For instance, many metals are intrinsically classified as hazardous but are used safely under strict exposure controls. This creates reputational risks, especially for Green Deal-critical materials such as cobalt, nickel, lead, and PGMs, which are essential for renewable energy and recycling but are still flagged as hazardous. It remains unclear whether the disclosure is intended to map potential regulatory risk (substances likely to face restrictions) or to quantify hazardous flows in society. In its current form, it achieves neither goal effectively and risks undermining both comparability and stakeholder understanding.	E2	E2 - Objective	8.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The current design of the SoC/SVHC disclosure risks missing its stated objective of helping users understand material impacts on health and the environment. Reporting overall hazard-based volumes without exposure or risk context can mislead stakeholders, as it ignores whether risks are effectively controlled. For instance, many metals are intrinsically classified as hazardous but are used safely under strict exposure controls. This creates reputational risks, especially for Green Deal-critical materials such as cobalt, nickel, lead, and PGMs, which are essential for renewable energy and recycling but are still flagged as hazardous. It remains unclear whether the disclosure is intended to map potential regulatory risk (substances likely to face restrictions) or to quantify hazardous flows in society. In its current form, it achieves neither goal effectively and risks undermining both comparability and stakeholder understanding.	E2	E2-5 - Substances of concern and substances of very high concern	17.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing the total weight of SoC and SVHC, especially in mixtures, adds an excessive burden on companies and does not help understand if a company works sustainably. Perhaps reporting SoC and SVHC under a qualitative statement may help.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Same as above	E2	E2-5 - Substances of concern and substances of very high concern	19.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This amendment can help align this DR to the REACH regulation. However, the burden on companies to disclose SVHC does not change	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing SoC and SVHC by hazard class is heavily burdensome for companies because it will require companies to report in double counting	E2	E2-5 - Substances of concern and substances of very high concern	AR 7
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The structure of disclosure requirements of pollution-related policies might be streamlined, but the burden has not been reduced	E2	E2-1 - Policies related to pollution	12.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The structure of disclosure requirements of pollution-related actions might be streamlined, but the burden has not been reduced	E2	E2-1 - Policies related to pollution	13.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The structure of disclosure requirements of pollution-related targets might be streamlined, but the burden has not been reduced	E2	E2-3 - Targets related to pollution	14.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	This DR on pollution related to site-specific locations increases the burden since pollutants differ from one site to another.	E2	E2 - Objective	10.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	- Companies in the scope of the Industrial Emission Directive shall reported under Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation). This would ensure legal consistency, avoid regulatory overlap and reduce the reporting burden. There is no need to include any additional pollutants. - While pollutant selection based on materiality is reasonable, expanding disclosures to include local-level environmental permits massively broadens the scope of emissions and prevents standardisation across companies.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Thresholds for pollutants are now less clear, as they are framed as optional ('they can be considered'), which weakens comparability.	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	- Reporting on transfers of water pollutants to external treatment plants creates double reporting. - Classifying transfers to water treatment plants as pollution is illogical, since these facilities exist precisely to remove contaminants.	E2	E2-4 - Pollution of air, water and soil	AR 4

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The addition of a new disclosure layer on microplastics in the downstream, introduces unnecessary reporting burden.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				It is unclear whether the 'manufacturing' obligations in disclosure requirement 20 only apply to manufacturing operations located in the EU. Recommend clarifying that it only applies within the EU.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				It is unclear whether the 20(a) obligation to disclose the quantity of SVHCs above 0.1% w/w in procured components only apply to components that procured in the EU. Recommend clarifying that it only applies within the EU.	E2	E2-5 - Substances of concern and substances of very high concern	20. (a)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				It is unclear whether the 20(b) obligation to disclose the quantity of SVHCs above 0.1% w/w on sold articles only apply to the products that are imported into the EU. Recommend clarifying that it only applies within the EU.	E2	E2-5 - Substances of concern and substances of very high concern	20. (b)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				For 20 — in some cases articles may have many varying levels of an SVHC in a specific product. It would be extremely time consuming and also very challenging to report the amount fo SVHC in every single article imported into the EU. Recommend that the requirement is to report that a substance is present in a product above the 0.1% threshold rather than having to report on the specific quantity of the substance in each article.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				16. Item (a) is only those "material" pollutant emissions, but it is unclear if (b) has the same leeway for microplastics. As written, it seems companies would have to report the total # tonnes of plastic produced and just assume that it all becomes microplastics, which seems inaccurate and unhelpful for the intended audience. Recommend making (b)-(d) sub-items under (a)	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				AR 4 for para 16(a) Treating the transfer of water pollutants to an external treatment plant as "pollution" is incredibly inappropriate, if not dangerous. It treats an uncontrolled discharge to surface water as the same as controlled transfer to a dedicated off-site facility for processing, when the latter is exactly the kind of behavior that this exercise should be trying to incentivize. The only way in which this clause is appropriate is if the receiving treatment plant is incapable of processing the pollutant in question and releases it back into the natural environment. Change to: "Transfers of water pollutants to external treatment plants that are incapable of properly treating said pollutant qualify as pollution in downstream value chain."	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	Polish Chamber of Chemical Industry	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It is unclear whether the obligation to disclose information in points (a–c) applies only to producers and importers of potentially hazardous substances and substances of very high concern, while downstream users should only report emissions during production or services. Further clarification is also needed for cases where substances are only transported but not used or purchased by the company.	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	Polish Chamber of Chemical Industry	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The disclosure requirement and related AR 2 does not specify which PAHs should be reported. PAHs cover many organic compounds, while Annex II to the E-PRTR Regulation refers only to five substances (benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, indeno(1,2,3-cd)pyrene). Clarification is needed whether companies should report only the sum of these five substances or total PAH emissions.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	This datapoint supposes that undertaking shall justify the local materiality of pollutants. As a clarification, it should be specified that aggregation at the group level remains possible.	E2	E2 - Objective	10.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	As a clarification, we need more certainty to ensure information required under this paragraph, combined with the paragraph 3.1 from ESRS 1, let the operator the possibility to report only relevant emissions of specific substances and not all emissions coming from all substances.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	It should be noted that the Regulation (UE) 2024/1244, which introduces three new pollutants in its Annex II, will enter into force at 1st january 2028. In addition, the sentence "It can include additional pollutants that it considers material" should be deleted in order to avoid unnecessary debates. This provision is not considered necessary, since undertakings can disclose entity-specific information if they want to do so.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The thresholds for releases defined in Annex II of Regulation (EU) 2024/1244 apply to EU activities listed in the Annex I. To ensure international data comparability, it could be relevant to specify that these thresholds also apply to activities listed in the Annex I, regardless of their location (i.e. inside or outside EU).	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We note that paragraphs 9(b) to 9(g) have been added. We request a guarantee that these additions do not introduce new disclosures requirements (e.g. thresholds, list of pollutants to be considered…).	E2	E2 - Objective	9.
Excels	ASD					I partially agree and partially disagree	We call to delete E3-4_02 because it is redundant	E3	E3-4 - Water metrics	17. (b)
Excels	ASD					I partially agree and partially disagree	We call to delete E3-4_03 and E3-4_04 because they are redundant	E3	E3-4 - Water metrics	17. (e)
Excels	ASD					I agree	E3-4_05 and E3-4_06 were deleted. We welcome EFRAG proposed change.	E3	E3-4 - Water metrics	4.
Excels	ASD					I agree	E3-4_07 and E3-4_08 were deleted. We welcome EFRAG proposed change.	E3	E3-4 - Water metrics	4.
Excels	ASD					I partially agree and partially disagree	The definition provided for calculating water consumption has been updated, but it does not seem completely clear. In particular, we suggest to provide clarification on water storage	E3	E3-4 - Water metrics	17.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	A specific narrative content will complicate the structure of a generic GDR-A. Suggestion: Create an AR to specify content (without a specific DP): "The undertaking shall specify, which, if any key actions and resources, are related to areas at water risk, including areas of high-water stress."	E3	E3-2 - Actions and resources related to water	14.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA. The list of sub-topics and the metrics should therefore match each other - currently a metric for total water recycled or reused is required, but there is no sub-topic related to this. C) and d) seem to be an extension of the Delegated Act.	E3	E3-4 - Water metrics	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	ESRS E3 – Chapter: Metrics (§17, AR 1–3) Issue: The requirement to report multiple water metrics (consumption, withdrawal, discharge, recycling, storage) can be burdensome, especially when some are not material. Proposed simplification: Allow undertakings to omit metrics that are not material to their activities, with a simple justification. Proposed text: "Undertakings may omit water metrics that are not material, provided they disclose the rationale for omission." Why it helps: This reduces reporting burden and ensures disclosures are relevant to stakeholders.	E3	E3-4 - Water metrics	17.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	ESRS E3 – Metrics and Targets (Chapter: E3-3 Targets, E3-4 Metrics, AR 1–3) Issue: The current ESRS E3 V1.6 does not explicitly reference the EU Taxonomy criteria for water (Substantial Contribution or DNSH), nor does it allow companies to directly use these criteria as a basis for their water-related actions, policies, and targets. Proposed simplification: Add an explicit cross-reference to the EU Taxonomy for water-related activities. Allow undertakings that already apply Substantial Contribution (SC) or Do No Significant Harm (DNSH) criteria under the Taxonomy to use these as the reference for their ESRS E3 disclosures on actions, policies, and targets. Proposed text: "Where undertakings apply the EU Taxonomy criteria for water (Substantial Contribution or Do No Significant Harm) to their activities, they may use these criteria as the reference for their water-related actions, policies, and targets under ESRS E3. In such cases, undertakings should indicate the alignment and provide a cross-reference to the relevant Taxonomy criteria." Why it helps: This approach ensures regulatory coherence, reduces double reporting, and enables companies to leverage existing compliance work. It also increases comparability and clarity for stakeholders by aligning ESRS E3 disclosures with established EU sustainability frameworks.	E3	E3-3 - Targets related to water	15.
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	text should be amended to identify that disclosure of water related targets should only be required if they are established - this should not be a mandatory disclosure	E3	E3-3 - Targets related to water	15.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version adopts a more simplified and cross-cutting approach, aligned with GDR-P. While this change promotes greater standardisation and facilitates reporting, it reduces the depth and specificity of the required information, particularly in areas such as: • Prevention of water pollution; • Sustainable product and service design; • Specific commitments in water-stressed areas; • Policies on sustainable oceans and seas. This simplification may compromise the visibility of critical practices, especially in sectors with strong dependence on or impact over water and marine resources. Optional disclosures or sector-specific guidance could help preserve relevance.	E3	E3-1 - Policies related to water	11.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version adopts a more simplified and cross-cutting approach, aligned with GDR-A. While this change facilitates reporting and promotes comparability, it reduces technical depth, particularly by removing the reference to the water mitigation hierarchy (avoid, reduce, reuse, restore). To maintain clarity and ambition, it may be helpful to recommend voluntary disclosure of mitigation strategies, especially in water-intensive sectors.	E3	E3-2 - Actions and resources related to water	13.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version adopts a more simplified and cross-cutting approach, aligned with GDR-T. While this facilitates reporting and comparability, it reduces the depth and specificity of the information required, especially regarding: • The link between targets and water risk areas or marine resource management; • The consideration of ecological thresholds and specific allocations; • The distinction between mandatory and voluntary targets. This simplification may compromise the visibility of critical environmental commitments. Optional disclosures could help ensure that key water-related ambitions remain transparent and traceable.	E3	E3-3 - Targets related to water	15.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version retains the main indicators but adopts a more simplified and standardised structure, with less demand for technical context. The exclusion of elements such as water intensity and methodological details may reduce comparability and understanding of water efficiency. On the positive side, the explicit inclusion of water intake and discharge reinforces an integrated view of water management. This could be further supported by encouraging sector-specific metrics where relevant.	E3	E3-4 - Water metrics	17.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	It is stated that the term 'water' refers to surface water, and groundwater and marine waters. GRI 303-3 requires to report the following water withdrawal sources: surface water, groundwater, seawater, produced water and third-party water. We propose aligning the scope of water with the water withdrawal sources in GRI 303-3, which are also closely aligned with the water withdrawal sources used by CDP. This feedback also applies to NMIG 5 for para 17.	E3	E3 - Objective	7.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	We propose changing the unit of measurement from cubic meters to megaliters, for alignment with GRI 303: Water and Effluents. Using megaliters is also in alignment with CDP.	E3	E3-4 - Water metrics	AR 2

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please clarify the quality of water. Total water generally refers to the sum of all water volumes of all qualities (e.g. fresh, brackish, …); while this metric (the sum of all water volumes of whatever quality) seems less appicable to storage or recycling or consumption (in particular if related to a freshwater aspect such as water stress). A clear reference to freshwater in the metrics would be in line with NMIG 4 for para.15 relative to the targets.	E3	E3-4 - Water metrics	17.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The location-based approach to environmental impacts proposed in the standards is disproportionate and should be entirely eliminated. It introduces unnecessary complexity, increases the reporting burden, and does not align with the principles of relevance and proportionality.	E3	E3 - Objective	9.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E3	E3-4 - Water metrics	16.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We consider it a positive step that the disclosure "changes in water storage" has been removed. This simplifies the reporting process.	E3	E3-4 - Water metrics	17. (f)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-1 - Policies related to water	11.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-2 - Actions and resources related to water	13.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-3 - Targets related to water	15.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We suggest EFRAG specify that areas at water risk, including areas of high-water stress, referred to in ESRS E3 with respect to the disclosures of key actions and water consumption concerns only areas that are currently affected. Areas that could be affected by water risks in the future should however be considered in the climate resilience analysis that is reported upon under DR E1-3.	E3	E3 - Interaction with other ESRS	10. (a)
Excels	Triodos Bank N.V.	Bank	Netherlands			I agree	We agree to make total water withdrawal and total water discharges a mandatory requirement.	E3	E3-4 - Water metrics	4.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We recommend to keep policies related to water and marine sources in.	E3	E3-1 - Policies related to water	1.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Disclosure of reasons for not having adopted policies in areas of high-water stress shall be deleted	E3	E3-1 - Policies related to water	12.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We note that paragraphs 8(b) to 8(e) have been added. We request a guarantee that these additions do not introduce new disclosures requirements.	E3	E3 - Objective	8.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Companies consider the data for water withdrawal is not possible to provide as there are no corresponding water meters. Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, turning this "may" datapoint into "shall" datapoint does not align with the principle of simplification. On the contrary, it would introduce greater complexity, particularly in the context of audits. We request that this datapoint be included in the NMIG.	E3	E3-4 - Water metrics	17. (c)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Companies consider the data for water discharge is not possible to provide as there are no corresponding water meters. Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, turning this "may" datapoint into "shall" datapoint does not align with the principle of simplification. On the contrary, it would introduce greater complexity, particularly in the context of audits. We request that this datapoint be included in the NMIG.	E3	E3-4 - Water metrics	17. (d)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, this AR should be amended as follow "if relevant, water consumption can be calculated using a water balance approach […]".	E3	E3-4 - Water metrics	AR 1
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E3. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E3	E3 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The role of marine water in ESRS E3 needs to be clarified. The objective section of the standard suggests that marine water is part of the term "water" and consequently to be considered in all disclosure requirements. However, it is not common nor useful to conflate marine water and freshwater in metrics for water withdrawal, consumption and waste water (E3-4). Further, the concepts of "areas at water risk" or "area of high water stress" are not applicable to marine water. We recommend to introduce application requirements that clearly state how to calculate the metrics. If marine water is used by the undertaking, it should generally be reported separately from freshwater.	E3	E3-4 - Water metrics	17.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The [Draft] requirement on water policies should refer to areas of high-water stress. The concept of "areas at water risk" should instead be moved to the provisions for the materiality assessment (see comments for ESRS 2 IRO-1).	E3	E3-1 - Policies related to water	12.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The [Draft] disclosure requirements on water-related actions should refer to sites located in areas of high water stress instead of areas at water risk. The concept of "areas at water risk" should instead be moved to the provisions for the materiality assessment (see comments for ESRS 2 IRO-1).	E3	E3-2 - Actions and resources related to water	14.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The concept of "area of high water stress" should be further strengthened in the standard. We recommend to reinstate the disclosure of a list of sites located in areas of high water stress (ESRS E3, AR 15 (a)), as these are by definition prone to significant water-related risks and/or impacts. The [Draft] disclosure requirements for policies (para. 12) and actions (para. 14) should then link to the sites located in these areas.	E3	E3-4 - Water metrics	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The water metrics proposed in amended E3-4 need to be specified and clarified to avoid diverging interpretations: 1.The definition of water withdrawals should explicitly mention the sources to be included in the metric, i.e. surface water, groundwater, municipal water, marine water, collected rainwater, reclaimed water from external sources. 2.Water withdrawals should be disaggregated by source as the water source significantly determines the related environmental and social impact (e.g. water withdrawn from groundwater vs. reclaimed water from a business partner). Especially, marine water withdrawn, consumed or discharged should be reported separately from freshwater. 3. Water consumption should be separately reported for areas of high-water stress (instead of areas at water risk). 4.Delete the distinction between water reused and recycled as it is not necessary (both relate to the reuse of water within an undertaking's organizational boundaries). 5.Total water stored could be deleted as individual disclosure requirement;	E3	E3-4 - Water metrics	17.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Introduce a definition for "reclaimed water" (see comment above) in the Glossary. The definition should rely on that of Regulation (EU) 2020/741 on minimum requirements for water reuse.	E3	E3-4 - Water metrics	17. (a)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	EFRAG should consider to include guidance developed for the purpose of the Voluntary SME Standard (VSME) on water withdrawals, water consumption and areas of high water stress (p. 30 ff.) in the ESRS' non-mandatory implementation guidance (NMIG).	E3	E3-4 - Water metrics	17.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	This comment relates to the definition of areas of high water risk (the questionnaire does not allow to comment on terms and definitions). We recommend to sharpen the definition in accordance with the respective concepts in the WRI Aqueduct Water Risk Atlas and WWF Water Risk Filter. It should be changed as follows: "high water stress in an area is assessed using either of the following indicators and their thresholds: i.The ratio of total annual water withdrawal to total available annual renewable water supply is high (40-80%) or extremely high (>80%); ii.The ratio of water consumption-to-availability is: (a) moderate (dry-year depletion, annual average is 25-75% depleted, but at least 3 out of 30 years had at least one month with monthly depletion ratio >75%); (b) high (seasonal depletion, annual average is 25-75% depleted, but at least one month every year, the monthly depletion ratio is >75%;) or (c) very high (ongoing depletion, where the depletion ratio on average is >75%)."	E3	E3-4 - Water metrics	17. (b)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Please clarify the quality of water. Total water generally refers to the sum of all water volumes of all qualities (e.g. fresh, brackish, ...); are we sure that we want all these metrics as the sum of all water volumes of whatever quality? It doen't seem a useful information for storage or recycle or consumption. A clear reference to freshwater in the metrics would be more relevant and in line with NMIG 4 for para.15 relative to the targets.	E3	E3-4 - Water metrics	17.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree We find it important that clear guidance is offered as to whether this and other DRs are required to be disclosed, if it is not a material issue that a particular site is located in an area at water risk incl. areas of high-water stress. The clear guidance should help qualify for instance that facilities located in a water-stress area are not material if they are not using or dependent on withdrawal of water (for instance it is not required to report on a specific site if an entity has a store or a production facility in such an area if they are not dependent on water withdrawals.	E3	E3-1 - Policies related to water	12.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We find that the changes in the disclosure requirements to require a mandatory "water balance approach" is excessive. Water consumption in an area, where there is no risk of "water stress" should not require a full "water balance approach". We note that more "may"-datapoints than the ones highlighted in Q23 are effectively changed to shall and we believe that the requirement for a full mandatory "water balance approach" needs to be more specifically narrowed down to the "areas of high-water stress" or closer linked to the actual, identified IRO. We would also like to note, that for certain IRO's, it may not be the consumption, that is the key issue, but the specific water discharges (frequency or intensity in a river for instance) or the storage of water (for instance in a dam) that are relevant to the identified IRO. Hence, we do not agree with the change to a mandatory "water balance approach".	E3	E3-4 - Water metrics	17.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	It is unclear whether, if a company does not have a water policy (and discloses this fact under ESRS 2 new point 30), it should also disclose that it has sites located in areas at water risk, including areas of high-water stress (if it has such sites). Given the amended definition of "sites," it is unclear whether this also includes temporary locations related to water abstraction (e.g., construction sites).	E3	E3-1 - Policies related to water	13.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	When disclosing indicators regarding "total water consumption in areas at water risk," the imprecise definition of these areas and the lack of methods for identifying them may be problematic. The definition mentions "one or more water bodies," but it is unclear whether this refers only to status of surface water, groundwater, or both.	E3	E3-4 - Water metrics	17. (b)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Looking at the definition of "recycled and reused water," it seems unclear how this water and wastewater are included in a company's water balance. Should "recycled and reused water" be considered part of total water withdrawal or total water discharges?	E3	E3-4 - Water metrics	17. (e)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	while a reference to GDR is included in the standard to support undertakings on how to report about policies, actions, metrics and targets, no reference to financial effects related requirement is included. This could cause confusion.	E3	E3 - Objective	1.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	we would suggest to align these definitions and requirements to the ones defined by GRI 303. In this regard, GRI mentions seawater (instead marine waters). we would suggest also to include a definition of marine waters, following GRI clarifications: seawater water in a sea or in an ocean Source: International Organization for Standardization. ISO 14046:2014. Environmental management — Water footprint — Principles, requirements and guidelines. Geneva: ISO, 2014; modified	E3	E3 - Objective	7.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	to be aligned with E3-1, I would suggest to include a mention to areas of high-water stress	E3	E3 - Objective	9.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	we would suggest to add in AR some public and available tools that allow undertakings to identify areas at water risk	E3	E3-3 - Targets related to water	11.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	To be added " when applicable"	E3	E3-2 - Actions and resources related to water	14.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	should also be requested to disclose total water withdrawal in areas at water risk, including areas of high-water stress?	E3	E3-4 - Water metrics	17. (c)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	minor comment. in the annex II (glossary) a reference to Water (recycled and reused) is made. Could both sources be aligned?	E3	E3-4 - Water metrics	17. (e)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E3 Water, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E3 Water, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	E3	ESRS E3 - Objective	1.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	E3	ESRS E3 - Objective	5.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	Removal is welcome as other regulation already drives the requirements regarding ESG risk management and there is no need to further address this within ESRS, especially for the financial services sector.	E3	Disclosure Requirement E3-5 - Anticipated financial effects from material water and marine resources-related risks and opportuniPes	n/a
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	"If the undertaking has sites located in areas at water risk, including areas of highwater stress that are not covered by its water-related policies, it shall disclose this fact." The wording should be crystal clear that it refers to the sites in what the undertaking considers own operations according to ESRS 1 ("undertaking has sites") --> Example: E4.14 (E4-2 Policies…) refers to "sites in its own operations"	E3	E3-1 - Policies related to water	12.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We disagree with this new (!) data point. As a matter of principle, no new data points should be included in the revised ESRS. This data point also places a heavy additional burden on companies, as the reporting level would become highly disaggregated if reporting had to be done at the location or asset level. Furthermore, information on PAT is generally not specific to a location or asset level, but rather at a higher level. Reporting at such a low level of aggregation would therefore not be effective.	E3	E3 - Objective	9.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	E3	E3-2 - Actions and resources related to water	13.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	E3	E3-3 - Targets related to water	15.
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	The disclosure of dependencies has been further weakened (to 'when relevant') in the new paragraph 1. The TNFD suggests to remove the specification 'when relevant' in paragraph 1 and reinstate, either at the level of ESRS 2 or at the level of the individual topical standard, a similar text to the Set 1 paragraphs, such as the one asking for disclosure of 'the nature, type and extent of the undertaking's material (…) dependencies (…) related to [water], and how the undertaking manages them'.	E3	E3 - Objective	1.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Please note that this comment relates to objectivee 8 (can not be inserted / selected in this file): It shows several legislations but there is no data-point referencing to it afterwards. As this only should be discloses when relevant and material, this probably will be adressed if it is relevant. It might be misleading to include the frameworks in the objective as it could lead to reporting immaterial information. In the log of amendments file I read it that it is now included because it was used as a source for the standard, then it can better be included in the standard as a source then as an objective.	E3	E3-1 - Policies related to water	11.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	It would be relevant to request the undertaking to include whether when setting targets ecological thresholds and entiticy specific allocations were taken into consideration (as was included in the original ESRS E3-3 paragraph 24).	E3	E3-3 - Targets related to water	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Objective 8.) with 5 references to other EU Regulations increase complexity and uncertaintiy for preparer of sustainability statement. Please delete these references.	E3	E3-1 - Policies related to water	11.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	9) Disaggregation will lead to too much detail level and will increase reporting workload. Definition of "appropiate level" is needed	E3		
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Methodology needs to be less precise in order to provide invidual solutions for undertakings	E3		AR 1
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Comment to deleted AR1 (Set 1 as per DA 2023): Reference to ESRS 1 AR 7 is wrong, there should be a reference to ESRS 2 AR 22	E3		
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Statements/information referring to the entirety of sites located in water-stressed areas are acceptable. However, it should not be required that we report at site level or explicitly list the individual sites.	E3	E3-4 - Water metrics	11.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Statements/information referring to the entirety of sites located in water-stressed areas are acceptable. However, it should not be required that we report at site level or explicitly list the individual sites.	E3	E3-4 - Water metrics	AR 2
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E3. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E3	E3 - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The role of marine water in ESRS E3 needs to be clarified. The objective section of the standard suggests that marine water is part of the term "water" and consequently to be considered in all disclosure requirements. However, it is not common nor useful to conflate marine water and freshwater in metrics for water withdrawal, consumption and waste water (E3-4). Further, the concepts of "areas at water risk" or "area of high water stress" are not applicable to marine water. We recommend to introduce application requirements that clearly state how to calculate the metrics. If marine water is used by the undertaking, it should generally be reported separately from freshwater.	E3	E3-4 - Water metrics	17.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The [Draft] requirement on water policies should refer to areas of high-water stress. The concept of "areas at water risk" should instead be moved to the provisions for the materiality assessment (see comments for ESRS 2 IRO-1).	E3	E3-1 - Policies related to water	12.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The [Draft] disclosure requirements on water-related actions should refer to sites located in areas of high water sterss instead of areas at water risk. The concept of "areas at water risk" should instead be moved to the provisions for the materiality assessment (see comments for ESRS 2 IRO-1).	E3	E3-2 - Actions and resources related to water	14.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The concept of "area of high water stress" should be further strengthened in the standard. We recommend to reinstate the disclosure of a list of sites located in areas of high water stress (ESRS E3, AR 15 (a)), as these are by definition prone to significant water-related risks and/or impacts. The [Draft] disclosure requirements for policies (para. 12) and actions (para. 14) should then link to the sites located in these areas.	E3	E3-4 - Water metrics	17.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The water metrics proposed in amended E3-4 need to be specified and clarified to avoid diverging interpretations: 1.The definition of water withdrawals should explicitly mention the sources to be included in the metric, i.e. surface water, groundwater, municipal water, marine water, collected rainwater, reclaimed water from external sources. 2.Water withdrawals should be disaggregated by source as the water source significantly determines the related environmental and social impact (e.g. water withdrawn from groundwater vs. reclaimed water from a business partner). Especially, marine water withdrawn, consumed or discharged should be reported separately from freshwater. 3. Water consumption should be separately reported for areas of high-water stress (instead of areas at water risk). 4.Delete the distinction between water reused and recycled as it is not necessary (both relate to the reuse of water within an undertaking's organizational boundaries). 5.Total water stored could be deleted as individual disclosure requirement;	E3	E3-4 - Water metrics	17.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Introduce a definition for "reclaimed water" (see comment above) in the Glossary. The definition should rely on that of Regulation (EU) 2020/741 on minimum requirements for water reuse.	E3	E3-4 - Water metrics	17. (a)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	EFRAG should consider to include guidance developed for the purpose of the Voluntary SME Standard (VSME) on water withdrawals, water consumption and areas of high water stress (p. 30 ff.) in the ESRS' non-mandatory implementation guidance (NMIG).	E3	E3-4 - Water metrics	17.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	This comment relates to the definition of areas of high water risk (the questionnaire does not allow to comment on terms and definitions). We recommend to sharpen the definition in accordance with the respective concepts in the WRI Aqueduct Water Risk Atlas and WWF Water Risk Filter. It should be changed as follows: "high water stress in an area is assessed using either of the following indicators and their thresholds: i.The ratio of total annual water withdrawal to total available annual renewable water supply is high (40-80%) or extremely high (>80%); ii.The ratio of water consumption-to-availability is: (a) moderate (dry-year depletion, annual average is 25-75% depleted, but at least 3 out of 30 years had at least one month with monthly depletion ratio >75%); (b) high (seasonal depletion, annual average is 25-75% depleted, but at least one month every year, the monthly depletion ratio is >75%;) or (c) very high (ongoing depletion, where the depletion ratio on average is >75%)."	E3	E3-4 - Water metrics	17. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please clarify the quality of water. Total water generally refers to the sum of all water volumes of all qualities (e.g. fresh, brackish, ...); while this metric (the sum of all water volumes of whatever quality) seems less appicable to storage or recycling or consumption (in particular if related to a freshwater aspect such as water stress). A clear reference to freshwater in the metrics would be in line with NMIG 4 for para. 15 relative to the targets.	E3	E3-4 - Water metrics	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	E3	E3-2 - Actions and resources related to water	2.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	E3	E3-4 - Water metrics	17. (d)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While not updated; the definition of areas at water risk - relates to a definition in a EU regulation. This definition and concept is practically not replicable across non-EU countries due to varying data availability and definitions. While the concept of areas at water stress is clearly definied with thresholds, areas at water risk bear a high risk of different interpretation across organizations and countries. We would suggest to specify, how an organization can determine when an area is to be considered at water risk more concretely. "Issues" in this context are very broad, it is not clear if this is intended to relate to the financial impact side of things (i.e. regulatory/reputational issues).	E3	E3-4 - Water metrics	17. (b)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Meters in factories are not flow meters, which makes it difficult to estimate discharges to calculate consumption.	E3	E3-3 - Targets related to water	17. (d)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA. The list of sub-topics and the metrics should therefore match each other - currently a metric for total water recycled or reused is required, but there is no sub-topic related to this.	E3	E3-4 - Water metrics	17.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I agree	The removal of marine resources (except for marine waters) in the various contexts from the E3 standard makes a lot of sense as a simplification.	E3	E3 - Objective	3.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I agree	We agree that water intensity is not a highly useful datapoint and can be deleted.	E3	E3-4 - Water metrics	17. (f)
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We note that paragraphs 8(b) to 8(e) have been added. We request a guarantee that these additions do not introduce new disclosures requirements.	E3	E3 - Objective	8.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Companies consider the data for water withdrawal is not possible to provide as there are no corresponding water meters. Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, turning this "may" datapoint into "shall" datapoint does not align with the principle of simplification. On the contrary, it would introduce greater complexity, particularly in the context of audits. We request that this datapoint be included in the NMIG.	E3	E3-4 - Water metrics	17. (c)
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Companies consider the data for water discharge is not possible to provide as there are no corresponding water meters. Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, turning this "may" datapoint into "shall" datapoint does not align with the principle of simplification. On the contrary, it would introduce greater complexity, particularly in the context of audits. We request that this datapoint be included in the NMIG.	E3	E3-4 - Water metrics	17. (d)
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, this AR should be amended as follow "if relevant, water consumption can be calculated using a water balance approach [...]".	E3	E3-4 - Water metrics	AR 1
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the reference to areas at water risk and areas of high-water stress (ex. Par. 23(a) and 23(c)) when disclose the water-related targets. We suggest to re-integrate this provision since it is also requested for amended data point on water-related policies, actions and metrics, and to enable organizations to disclose and demonstrate which targets and efforts relate to areas at water risk and areas of high-water stress.	E3	E3-3 - Targets related to water	15.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the reference to contextual information (ex. Par. 28(e) when disclose the water-related metrics. Although some contextual information is adequately covered by ESRS 2 GDR-M, the amended water metrics remove the requirement to report qualitative contextual information on the status of water basins or the types of water withdrawal sources. Such information are relevant for organizations that directly manage water resources and helps the reader to better contextualise the reported metrics.	E3	E3-4 - Water metrics	17.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E3	E3-4 - Water metrics	16.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We consider it a positive step that the disclosure "changes in water storage" has been removed. This simplifies the reporting process.	E3	E3-4 - Water metrics	17. (f)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-1 - Policies related to water	11.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-2 - Actions and resources related to water	13.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-3 - Targets related to water	15.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E3 Water, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	E3	E3 - Objective	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary duplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	E3	E3 - Objective	5.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The justification provided for these datapoints does not sufficiently clarify why these additional datapoints are required for users. The EBA's guidelines on the management of ESG risks require the collection of energy and water demand and/or consumption, either in terms of economic factor inputs or revenue base, but it's not clear whether these new datapoints have been added to comply with EBA guidelines or for other purposes. As discussed above in Q20, EFRAG should take this opportunity to coordinate with the EBA, holistically consider which datapoints are required for effective risk management and streamline the reporting requirements horizontally across legislation.	E3	E3-4 - Water metrics	17.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	(2 amended) The term 'water' refers to surface water, groundwater and marine waters: Could you also provide a definition for 'marine water'?	E3	E3 - Objective	7.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is reasonable to keep the requirement for disclosure of policies targeting sites located in areas with high water risk/stress. However, we request to specify and clarify below two points; 1. Specify an asseeement tool (e.g., Baseline Water Stress in WRI Aqueduct: High = 40–80%, Extremely High = >80%, etc.) 2. Clarify to allow that companies can choose their own assessment tools, and the tools, thresholds, and assessment years are sufficient conditions for disclosure	E3	E3-1 - Policies related to water	12.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We agree with the simplification. However, regarding the disclosure of "resources," since the financial information such as CAPEX and OPEX is confidential, we request that flexible disclosure options be set in AR, etc., as follows; 1. Allow to disclose of amounts in ranges. 2. Allow to disclose by using non-financial information (e.g., number of facilities, capacity, operating hours, etc.). 3. From a competitive perspective, allow to present as totals for multiple sites or by regional aggregation.	E3	E3-2 - Actions and resources related to water	13.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We agree with keeping it. We also support to disclose actions and resources related to high water stress areas. However, we request to specify flexible options such an amount in ranges, non-financial information, aggregation level. (The intention is similar to ESRS E3–13)	E3	E3-2 - Actions and resources related to water	14.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We request to clarify the definition and assessment methods for "water risk/stress areas." . (The intention is similar to ESRS E3–12)	E3	E3-4 - Water metrics	17. (b)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We request below three points; 1. Clarify the scope of "total water storage" (e.g., process water temporarily retained in raw water tanks, emergency/firefighting water reservoirs, rainwater storage tanks, etc.). 2. Set an importance threshold (e.g., mandate only for in case of total water intake exceeds 5% or in regions with high water stress) to avoid excessive administrative burden. 3. Allow initial phased introduction and clarify safe harbor.	E3	E3-4 - Water metrics	17. (f)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We request to clarify the definition of "total water storage" to avoid excessive administrative burden for analysing "changes in water storage". The intention is similar to E3-17(f).	E3	E3-4 - Water metrics	AR 1
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	- Considering disaggregation in location-specific considerations can increase the level of detail required. - Reporting at the site level is unacceptable, as it would dramatically increase the reporting burden without providing commensurate value to stakeholders. Such granularity multiplies the volume of datapoints, creates inconsistencies across sites with differing local conditions, and undermines the comparability and usability of disclosures at company level.	E3	E3 - Objective	9.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The amendment streamlines the DRs E3-1, but did not really reduce the burden.	E3	E3-1 - Policies related to water	11.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The requirement to explain why there is no policy for water risk areas and to explain wheter there is ocean or sea has been removed	E3	E3-1 - Policies related to water	12.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The mention of "key" rather than "comprehensive" might be helpful, but more clarity is needed for "key"	E3	E3-2 - Actions and resources related to water	13.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The amendment streamlines the DRs E3-3, but did not really reduce the burden.	E3	E3-3 - Targets related to water	15.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The methodology calculations for water consumption need more flexibility	E3	E3-4 - Water metrics	AR 1
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	This obligation may require breaking down metrics by key sites	E3	E3-4 - Water metrics	AR 2
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree with water withdrawal and water discharge as mandatory KPIs, and with changes of stored water removed.	E3	E3-4 - Water metrics	4.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We note that paragraphs 8(b) to 8(e) have been added. We request a guarantee that these additions do not introduce new disclosures requirements.	E3	E3 - Objective	8.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Companies consider the data for water withdrawal is not possible to provide as there are no corresponding water meters. Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, turning this "may" datapoint into "shall" datapoint does not align with the principle of simplification. On the contrary, it would introduce greater complexity, particularly in the context of audits. We request that this datapoint be included in the NMIG.	E3	E3-4 - Water metrics	17. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Companies consider the data for water discharge is not possible to provide as there are no corresponding water meters. Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, turning this "may" datapoint into "shall" datapoint does not align with the principle of simplification. On the contrary, it would introduce greater complexity, particularly in the context of audits. We request that this datapoint be included in the NMIG.	E3	E3-4 - Water metrics	17. (d)
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Most industrial companies calculate their water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, this AR should be amended as follow "if relevant, water consumption can be calculated using a water balance approach […]".	E3	E3-4 - Water metrics	AR 1
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree We find it important that clear guidance is offered as to whether this and other DRs are required to be disclosed, if it is not a material issue that a particular site is located in an area at water risk incl. areas of high-water stress. The clear guidance should help qualify for instance that facilities located in a water-stress area are not material if they are not using or dependent on withdrawal of water (for instance it is not required to report on a specific site if an entity has a store or a production facility in such an area if they are not dependent on water withdrawals.	E3	E3-1 - Policies related to water	12.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We find that the changes in the disclosure requirements to require a mandatory "water balance approach" is excessive. Water consumption in an area, where there is no risk of "water stress" should not require a full "water balance approach". We note that more "may"-datapoints than the ones highlighted in Q23 are effectively changed to shall and we believe that the requirement for a full mandatory "water balance approach" needs to be more specifically narrowed down to the "areas of high-water stress" or closer linked to the actual, identified IRO. We would also like to note, that for certain IRO's, it may not be the consumption, that is the key issue, but the specific water discharges (frequency or intensity in a river for instance) or the storage of water (for instance in a dam) that are relevant to the identified IRO. Hence, we do not agree with the change to a mandatory "water balance approach".	E3	E3-4 - Water metrics	17.
Excels	DRSC	(National) standard setter	Germany			I disagree	Disaggregation will lead to too much detail level and will increase reporting workload. Although "appropriate disaggregation" is worded, a definition of "appropiate level" is needed.	E3	E3 - Objective	9.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: "If the undertaking has sites located in areas at water risk, including areas of highwater stress that are not covered by its water-related policies, it shall disclose this fact." The wording should be crystal clear that it refers to the sites in what the undertaking considers own operations according to ESRS 1 ("undertaking has sites") --> Example: E4.14 (E4-2 Policies…) refers to "sites in its own operations"	E3	E3-1 - Policies related to water	12.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	The requirement to specify any actions and resources related to areas at water risk, including areas of high-water stress can be interpreted to have a much broader scope that the requirement to disclose "key actions" and "significant resources". The formulation should be changed to clarify that key actions and resources related to areas at water risk are meant.	E3	E3-1 - Policies related to water	14.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: This is an extension of the Delegated Act: Points (c) and (d) require disclosure of water withdrawals and water discharges. This is a "may" disclosure in the delegated act (E3.AR32). We note that this is not intended to impose an additional burden (as mentioned in paragraph 127 of the BfC), but the change to "shall" does in fact impose an additional burden, regardless of EFRAG's intention to the contrary.	E3	E3-4 - Water metrics	17.
Excels	DRSC	(National) standard setter	Germany			I disagree	REF FLAG: Seems an extension of the Delegated Act: The calculation formula for water consumption contains an additional KPI on "changes in water storage".	E3	E3-4 - Water metrics	AR 1
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: "Water metrics under paragraph 17(a)(f) are expressed in cubic meters (m3)." The metric expressed in "million cubic meters" should be allowed, too. This should be clarified at a central location in ESRS (e.g. ESRS 1)	E3	E3-4 - Water metrics	AR 2
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E3	E3-4 - Water metrics	16.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We consider it a positive step that the disclosure "changes in water storage" has been removed. This simplifies the reporting process. However it is currently unclear how to report the metric related to recycled or reused water. According to the definition, recycled water refers to reuse within the same process, while reused water refers to use in a different process within the same facility or in another facility of the undertaking. This distinction suggests that the two cases should be reported separately, especially since an undertaking may have both types of water reuse. We recommend clarifying whether separate disclosure is required to ensure consistency and comparability across reporting entities.	E3	E3-4 - Water metrics	17. (f)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-1 - Policies related to water	11.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-2 - Actions and resources related to water	13.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirement, as this avoids duplication with some overarching requirements in ESRS 2.	E3	E3-3 - Targets related to water	15.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The metric disclosures in the draft are aligned with CDP, improving interoperability	E3	E3-4 - Water metrics	16.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	It is a positive amendment that the water consumption intensity ratio was removed as net revenue is not necessarily a driver of water consumption. For example, at HEINEKEN our production volumes are a more accurate driver.	E3	E3-4 - Water metrics	16.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	In the definition of "Area of high-water stress," it is not clear whether it is mandatory to use one of the 2 approaches for assessing water stress or if a separate approach could be included. E.g., one that also includes water quality and regulatory considerations. This definition should include "shall" if it is a requirement or "may" if it is not mandatory.	E3	E3-4 - Water metrics	17. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	It is positive that the disclosure requirement to address whether specific matters have been addressed in the policies has been removed. This allows companies to link their policies to their specific IROs.	E3	E3-1 - Policies related to water	11.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	It is currently unclear how to report the metric related to recycled or reused water. According to the definition, recycled water refers to reuse within the same process, while reused water refers to use in a different process within the same facility or in another facility of the undertaking. This distinction suggests that the two cases should be reported separately, especially since an undertaking may have both types of water reuse. We recommend clarifying whether separate disclosure is required to ensure consistency and comparability across reporting entities.	E3	E3-4 - Water metrics	17. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It is very difficult to report robust figure on water storage.	E3	E3-4 - Water metrics	17. (f)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Mention the connection with AR 22 of ESRS 2 (e.g., local considerations such as water availability in areas at water risk)	E3	E3 - Objective	9.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Replace "sites" with "locations" in line with the approach of ESRS E4	E3	E3-1 - Policies related to water	12.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I agree	ANC supports mandatory datapoints on water withdrawal and discharges, as they provide a more accurate reflection of the water cycle and support impact materiality. For some companies, these datapoints are already calculated to determine water consumption and therefore add little additional burden (i.e., withdrawals minus discharges, a mandatory disclosure). For others, water consumption is estimated through modelling rather than the water balance approach, which can make reporting these datapoints more challenging. New reliefs allow such companies to estimate water withdrawals and discharges over relevant scopes where direct measurement is not feasible. Users highlight that these metrics are among the most mature for French companies, reflecting long-standing practices and providing reliable information on water management. Water withdrawal is already required under the VSME standard, so extending this requirement to large companies ensures consistency.	E3	E3-4 - Water metrics	17. (c)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I agree	See above	E3	E3-4 - Water metrics	17. (d)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I agree	Add definition of 'water balance' in the glossary	E3	E3-4 - Water metrics	AR 1
Excels	Ernst & Young	Auditor	United Kingdom			I agree	This requirement will not create an additional burden, as reporting water consumption already relies on understanding the water balance, including both withdrawals and discharges; the change from optional to mandatory is in line with the importance of these metrics in completing the water balance equation and ensuring fair presentation of material IROs.	E3	E3-4 - Water metrics	17. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I agree	As indicated above, this requirement will not create an additional burden, as reporting water consumption already relies on understanding the water balance, including both withdrawals and discharges; the change from optional to mandatory is in line with the importance of these metrics in completing the water balance equation and ensuring fair presentation of material IROs.	E3	E3-4 - Water metrics	17. (d)
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We suggest EFRAG to provide methodological guidance in Application requirements on how to calculate water recycled or reused, including examples.	E3	E3-4 - Water metrics	17. (e)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	While the water balance AR1 provides a general framework, it remains too high-level and might not be reflective of the different categories of water use, especially during the production process (water withdrawal for production processes, for operational office activities, water storage from the previous period). Additionally, water reuse and water storage adjustments can be complex – especially when reused water originates from the previous period, or from / used for technological processes…). A simple equation may not be sufficient to verify the accuracy of calculations and completeness of the figures . We recommend further guidance on the matter, including explanations about how to account for the adjustment about the water storage.	E3	E3-4 - Water metrics	AR 1
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				There can be drawn a clear difference between recycled water at intake (ex: municipal recycled water from a common treatment plant), and water recycled at an onsite treatment plant at discharge, and water recirculated through multiple use phases. Different industries (FATP, enclosures, battery) and different business function types (commercial, residential, industrial) have varied ability to make use of these functions based on the nature of the business cycle and capital investment practicalities. It may be beneficial to add these measures so that it's clear where fit-for-purpose water consumption is occurring, and where onsite conservation / efficiency is occurring from onsite reuse/recirculation.	E3	E3-4 - Water metrics	14.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	- Considering disaggregation in location-specific considerations can increase the level of detail required. - Reporting at the site level is unacceptable, as it would dramatically increase the reporting burden without providing commensurate value to stakeholders. Such granularity multiplies the volume of datapoints, creates inconsistencies across sites with differing local conditions, and undermines the comparability and usability of disclosures at company level.	E3	E3 - Objective	9.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The amendment streamlines the DRs E3-1, but did not really reduce the burden.	E3	E3-1 - Policies related to water	11.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	The requirement to explain why there is no policy for water risk areas and to explain wheter there is ocean or sea has been removed	E3	E3-1 - Policies related to water	12.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The mention of "key" rather than "comprehensive" might be helpful, but more clarity is needed for "key"	E3	E3-2 - Actions and resources related to water	13.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The amendment streamlines the DRs E3-3, but did not really reduce the burden.	E3	E3-3 - Targets related to water	15.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The methodology calculations for water consumption need more flexibility	E3	E3-4 - Water metrics	AR 1
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	This obligation may require breaking down metrics by key sites	E3	E3-4 - Water metrics	AR 2

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				See water definitions in glossary feedback in Word, question #33, page 34	E3		
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				There can be drawn a clear difference between recycled water at intake (ex: municipal recycled water from a common treatment plant), and water recycled at an onsite treatment plant at discharge, and water recirculated through multiple use phases. Different industries (FATP, enclosures, battery) and different business function types (commercial, residential, industrial) have varied ability to make use of these functions based on the nature of the business cycle and capital investment practicalities. It may be beneficial to add these measures so that it's clear where fit-for-purpose water consumption is occurring, and where onsite conservation / efficiency is occurring from onsite reuse/recirculation.	E3	E3-4 - Water metrics	14.
Excels	Polish Chamber of Chemical Industry	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The definition of "water consumption" is unclear. According to the glossary at the end of the standard, water consumption is the amount of water withdrawn on the premises (or site) and not returned to the aquatic environment or third parties during the reporting period. It is therefore not clear how to treat stormwater and meltwater that enter the organisation and are used, in particular whether this water should be included in the calculation of total consumption. In addition, a recurring problem in calculating total water consumption under the application requirement (AR 1) to paragraph 17a is that the volume of water withdrawn is often smaller than the volume of wastewater discharged. In such cases, the consumption value would be negative. This also leads to problems in calculating water intensity, since the consumption value would again be negative.	E3	E3-4 - Water metrics	17. (a)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	As other industrial companies, we calculate our water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, this AR should be amended as follow "if relevant, water consumption can be calculated using a water balance approach [...]".	E3	E3-4 - Water metrics	AR 1
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	we consider the data for water withdrawal is not possible to provide as there are no corresponding water meters. As most industrial companies, we calculate our water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, turning this "may" datapoint into "shall" datapoint does not align with the principle of simplification. On the contrary, it would introduce greater complexity, particularly in the context of audits. We request that this datapoint should be included in the NMIG.	E3	E3-4 - Water metrics	17. (c)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	We consider the data for water discharge is not possible to provide as there are no corresponding water meters. As most industrial companies, we calculate our water consumption through estimations and modelling rather than by using the water balance approach (i.e., the difference between water withdrawals and discharges). Consequently, turning this "may" datapoint into "shall" datapoint does not align with the principle of simplification. On the contrary, it would introduce greater complexity, particularly in the context of audits. We request that this datapoint should be included in the NMIG.	E3	E3-4 - Water metrics	17. (d)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We suggest to put this indicator into "May" as recycled/reused volumes are a lever but not a measure of the pressure activities have on water	E3	E3-4 - Water metrics	17. (e)
Excels	ASD					I partially agree and partially disagree	We suggested to significantly reduce the required datapoints, and provide more detailed guidance to companies on how to perform the disclosure: the Exposure Draft seems to have considered this. However, the introduction of the concept of "near" related to the sites analysis is unclear, and we suggest to remove it.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	19.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Lack of a common methodology; Absence of science-based metrics; Data not currently available.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Lack of a common methodology; Absence of science-based metrics; Data not currently available. In any case, it should be maintained that reporting on the transition plan is only required once the transition plan has been implemented and published. The introduction of such a transition plan should remain voluntary. On the positive side, the disclosure requirement in ESRS E4 only applies if a company voluntarily draws up a transition plan for biodiversity and ecosystems. However, I take a critical view of the transition plan itself: as soon as biodiversity is identified as a material issue, there is indirect pressure to draw up a plan or to justify why no plan is in place. In contrast to the climate transition plan, there is a lack of reliable data, standardised methods and key performance indicators for biodiversity. The complexity of ecological relationships, the high cost of monitoring and the lack of standardisation make the transition plan difficult to implement and potentially ineffective.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Lack of a common methodology. Disproportionate costs. (1) For multinational corporations operating many sites globally, providing a list of material sites and the respective information defined would result in an extensive and complex disclosure; (2) Additionally, there is no standardized or globally accepted method to assess ecological status for industrial sites. Existing environmental compliance and monitoring already ensure that the company meets all legal requirements, making additional ecological breakdowns redundant.	E4	E4-1 - Transition plan for biodiversity and ecosystems	20. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Lack of a common methodology. Disproportionate costs.	E4	E4-1 - Transition plan for biodiversity and ecosystems	20. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Lack of a common methodology.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 6
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Extension of Delegated Act.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	FPIC reporting should be risk-based and focus on management systems.	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	It is recommended this disclosure be made voluntary as it adds compliance burden without providing more decision-useful information.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	The term "not feasible" is too subjective, creating significant audit risk. We recommend EFRAG provide further guidance to clarify this threshold.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Recommend EFRAG provide guidance that allows the use of practical alternatives like high-quality estimates.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	The Biodiversity Footprint Intelligence Company	Consultant (including software vendor)	France			I partially agree and partially disagree	The use "and/or" could allow undertakings could interpret para. 20 does not apply if a site does not meet all 3 criteria. Instead, any of the 3 criteria (and in particular (a) or (c)) should be enough to trigger the disclosure. Use "or" instead of "and/or".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	The Biodiversity Footprint Intelligence Company	Consultant (including software vendor)	France			I partially agree and partially disagree	The simplification and alignment of language with NPI, TNFD and GRI is very welcome. It should go further to provide more clarity and reduce the burden of reporting against divergent definitions and standards: - (b): "species extinction risk (the state of species)" - (c): "the extent and condition of terrestrial (for which condition should be broken down into site and landscape condition), freshwater and marine ecosystems" This precision could be considered additional but it actually reduces reporting burden by providing clarity and aligning with NPI/TNFD/GRI data points, limiting both the time required to understand what to report and to report against multiple standards. Freshwater ecosystems should be included in (c), as in our suggestion above. Note: the use of "metrics" may be confusing (e.g. MSA is a metric; 100 MSA.km2 is a value) => clarify "include measures (and associated metrics) [...]".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Reference: E4-4 (§17), E4-5 (§21), Application Requirement AR 22, NMIG 10, NMIG 11 Issue: ESRS E4 does not explicitly allow undertakings to use the EU Taxonomy's criteria for biodiversity as a reference for their actions, policies, and targets. This can lead to double reporting and regulatory misalignment for companies already applying these criteria. Proposed simplification: Add an explicit cross-reference to the EU Taxonomy for biodiversity. Move the reference to SC and DNSH criteria from NMIG to the main body of ESRS E4, making it a clear option for undertakings. Proposed text: "Where undertakings apply the EU Taxonomy criteria for biodiversity (Substantial Contribution or Do No Significant Harm) to their activities, they may use these criteria as the reference for their biodiversity-related actions, policies, and targets under ESRS E4. In such cases, undertakings should indicate the alignment and provide a cross-reference to the relevant Taxonomy criteria." Why it helps: This approach ensures regulatory coherence, reduces double reporting, and enables companies to leverage existing compliance work. It increases comparability and clarity for stakeholders by aligning ESRS E4 disclosures with established EU sustainability frameworks.	E4	E4-4 - Targets related to biodiversity and ecosystems	17.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E4-3 Actions and Resources (§15, NMIG 8) Issue: Actions and resources related to biodiversity and ecosystems (E4-3, NMIG 8) may overlap with Taxonomy-aligned CapEx and OpEx disclosures, but the standard does not explicitly allow cross-referencing. Proposed simplification: Allow undertakings to refer to their Taxonomy-aligned CapEx and OpEx KPIs and CapEx plans when reporting on actions and resources under ESRS E4. Proposed text: "When disclosing actions and resources related to biodiversity and ecosystems, undertakings may refer to their Taxonomy-aligned CapEx and OpEx key performance indicators and, if applicable, the CapEx plan required by Commission Delegated Regulation (EU) 2021/2178." Why it helps: This reduces reporting burden, avoids duplication, and ensures consistency between ESRS E4 and EU Taxonomy disclosures.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	BDEW	Other - please specify (required)	Germany			I agree	Is now proposed as a mandatory requirement (DA, E4.15 "The undertaking may disclose its transition plan...") BfC.127 Da geknüpft an die Bedingung, dass der TP öffentlich ist, bedeutet dies keinen zusätzlichen Aufwand.	E4	E4-1 - Transition plan for biodiversity and ecosystems	general
Excels	BDEW	Other - please specify (required)	Germany			I agree	"sites in its own operations that are in or near a biodiversity sensitive area" --> simplification questionable as this is still a huge, work-intensive disclosure	E4	E4-2 - Policies related to biodiversity and ecosystems	14 (b)
Excels	BDEW	Other - please specify (required)	Germany			I agree	The para contains the term "action plan" (the undertaking shall describe the biodiversity offsets used in its action plans); however, "action plan" is not adressed in ESRS 2 GDR-A which this para refers to.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16
Excels	BDEW	Other - please specify (required)	Germany			I agree	Add a clarification that this DR is related to actual impacts only.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20 (a) - (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BDEW	Other - please specify (required)	Germany			I agree	(1) Contains the term "direct operations" without saying what it is. (2) Wording: "impacts, risks and opportunities arising from its direct operations": impacts typically arise from the undertakings operations. In other words: The undertaking is the cause, and the effect results from this cause. The direction of the effect is: Undertaking -> Impact. For risks and opportunities this direction the opposite. Risks and opportunities - in most cases - have (financial) impacts on the undertaking but do not arise from the undertaking. Therefore, it should not be worded (all across the ESRS) that IROs arise from operations/undertaking etc. since the use of the term "arise" is correct for impacts only. Better word "impacts, risks and opportunities associated with or related to the undertaking/own operations etc."	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7 (a)
Excels	BDEW	Other - please specify (required)	Germany			I agree	AR suggests the worst case if the site is in a biodiversity sensitive area "is highly likely that ist activities will negatively affect the area" --> appropriate assumption?	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	BDEW	Other - please specify (required)	Germany			I agree	AR makes prejudging assumptions for the DMA which contradict the DMA principles.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	BDEW	Other - please specify (required)	Germany			I agree	The guidance to be complied with by undertakings when determining whether a site is near a sensitive are makes more complex than before.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8 (b)
Excels	BDEW	Other - please specify (required)	Germany			I agree	Additional metric requirement. Although "drivers of [...] ecosystem change" is mentioned in the delegated act (ESRS E4.AR20f), it is not a metric requirement in the delegated act.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9 (a)
Excels	BDEW	Other - please specify (required)	Germany			I agree	Additional metric requirement. Although "ecosystem services" is mentioned in the delegated act in several instances, it is not a metric requirement in the delegated act.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9 (d)
Excels	BDEW	Other - please specify (required)	Germany			I agree	The meaning of the first sentence is not clear.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	BDEW	Other - please specify (required)	Germany			I agree	The meaning of this para is not clear. Probably it is meant to say that if an undertaking monitors an issue frequently by using a measure/a metric, this might indicate this metric is a material information.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11a
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The paragraph contains the term "action plan"; however "action plan" is not adressed in ESRS 2 GDR-A which this paragraph refers to. This inconsistency should be addressed	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	It is not clear from the presentation of the standard whether paragraph 21 refers only to own operations or whether it also includes the value chain. Since paragraph 21 refers to paragraph 20, which refers to own operations/locations, we assume that this limitation also applies to paragraph 21, but we would prefer a clarification within the standard.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Prioritization of locations to be disclosed according to relevance (e.g., location size, volume) is welcome.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Requirement regarding determination of buffer zones is set up very complex and mandatory, and seems to be more complex than before the amendments rather than simplified. We would prefer an optional determination or rather the set up of more general determined buffer zones.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version significantly simplifies the requirement, focusing solely on the existence and disclosure of a transition plan aligned with the Kunming-Montreal Global Biodiversity Framework. This change removes the need for strategic resilience analysis, systemic risk assessment, and stakeholder engagement. While this promotes clarity and action-oriented reporting, it may compromise the understanding of how robust a company's strategy is in facing biodiversity challenges, especially in sectors with high ecological impact. Optional disclosures could help preserve strategic depth.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version significantly simplifies the requirement, concentrating on two operational aspects: traceability and the location of operations in sensitive areas. This change removes the need to report on comprehensive policies and sustainable practices, social impacts, systemic risks, and alignment with global strategies such as the EU Biodiversity Strategy for 2030. It promotes clarity and facilitates implementation and verification. This simplification may limit visibility into the strategic maturity of companies regarding biodiversity, reduce the integration of biodiversity across business policies, and weaken incentives for transformative practices, especially in sectors with complex value chains or high ecological impact. Sector-specific guidance could help address these gaps.	E4	E4-2 - Policies related to biodiversity and ecosystems	13.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version substantially simplifies the requirement, removing key elements such as: • The mitigation hierarchy, which guides environmental action prioritisation; • The integration of local and Indigenous knowledge, essential for contextual and inclusive approaches; • The promotion of nature-based solutions, internationally recognised as effective and sustainable. While the new wording promotes clarity and measurability, it may reduce ecological ambition, limit innovation and inclusion, and compromise strategic transparency by focusing only on compensations and financial resources. This simplification may suit companies with direct, measurable actions, but fails to capture the complexity needed to address biodiversity challenges in high-impact or sensitive socio-environmental contexts.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version significantly simplifies the requirement, removing key elements needed to understand strategic ambition and coherence: • It no longer requires explanation of ecological thresholds, alignment with global and EU policies, or links to identified impacts and risks; • It omits aspects such as the geographic scope of targets and their connection to the mitigation hierarchy. While this facilitates reporting and focuses on action (especially regarding offsets), it compromises transparency and comparability, making it harder to assess the robustness, relevance, and strategic alignment of defined targets. In the context of a global ecological crisis, this approach may be insufficient to ensure that corporate targets are scientifically grounded, territorially relevant, and aligned with global biodiversity goals.	E4	E4-4 - Targets related to biodiversity and ecosystems	17.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I disagree	The new version simplifies and reorganises the requirement, focusing on: • The location and characterisation of impacts in sensitive areas; • Reduced granularity of required metrics; • Removal of specific metrics on land use, invasive species, species status, and ecosystem condition. While this reduces technical complexity and promotes geographic focus, it compromises analytical depth. The absence of robust ecological indicators may hinder: • Comparability across companies and sectors; • Monitoring of corporate contributions to global biodiversity targets; • Identification of relevant ecological trends, such as connectivity loss or population decline. In sectors with a strong ecological footprint, this approach may be seen as insufficient to ensure transparency and environmental accountability.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	The amendments provide greater clarity on the list of sub-topics covered by the Standards and strengthen alignment with the GRI Biodiversity Standard. This alignment is beneficial as it enhances consistency across reporting frameworks, improves comparability of disclosures, and helps reduce the reporting burden for undertakings using both Standards.	E4	E4 - Objective	4.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We support the emphasis on providing location-specific information, given the nature of biodiversity impacts. However, the proposed language ("it is important to consider appropriate disaggregation") may suggest that site-level reporting is optional. In the context of biodiversity, it is essential, not optional, to disaggregate by site, as impacts cannot be meaningfully assessed without reference to the specific ecological setting. For example, the severity of impacts may be much higher in ecosystems close to tipping points or in areas where threatened species are present. Clearer requirements for site-level disclosure would strengthen alignment with other standards and frameworks, including the GRI Biodiversity Standard.	E4	E4 - Objective	9.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend aligning the Annex II definition of operational 'site' with the definition included in GRI 101: Biodiversity: "Sites include sites owned, leased, or managed by the organization and locations where it conducts its activities. Examples are a mine site owned by an organization or a fishing ground where an organization operates. Sites also include those for which future operations have been announced but not yet started, as well as those no longer active. Sites include subsurface infrastructures under the land or seabed surface, such as underground mining tunnels, cables, and pipelines." The GRI definition explicitly covers different organizational control contexts (owned, leased, or managed sites), includes current, future, and inactive sites to ensure continuity of reporting across the site lifecycle, and captures subsurface infrastructure, which is often material for biodiversity impacts but easily overlooked.	E4	E4 - Objective	9.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The phrase "transition implied by the Global Biodiversity Framework" is vague and could lead to inconsistent interpretation across preparers and assurance providers. The GBF sets global goals and targets that governments and companies can contribute to, but it does not prescribe a single "transition." We recommend revising the wording to: "the undertaking's response and contribution to the transition consistent with the goals and targets of the Global Biodiversity Framework." This would enhance clarity, align with international policy language, and improve comparability of disclosures. We also note that alignment with GBF goals and targets is relevant not only in the context of transition plans but also in the setting of policies and targets.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We understand the rationale for moving former paragraphs AR 15(a) and (b) to the NMIG to streamline data points. However, this weakens the responsibility of undertakings in ensuring appropriate management of issues related to the access and use of genetic resources. We suggest retaining references to access and benefit-sharing and to the free, prior and informed consent (FPIC) for access to genetic resources in AR3, as examples of policies that undertakings may cover when describing the content of their policies.	E4	E4-2 - Policies related to biodiversity and ecosystems	13.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The definition of biodiversity sensitive areas under E4 only partially aligns with GRI's definition of ecologically sensitive areas, particularly with regard to areas of biodiversity importance. We recommend closer alignment with the definitions used by GRI and TNFD by also including: (i) areas of high ecosystem integrity, (ii) areas of rapid decline in integrity, (iii) areas important for ecosystem service delivery, and (iv) areas of physical water risk. This would ensure greater consistency across standards and improve the relevance of disclosures.	E4	E4-2 - Policies related to biodiversity and ecosystems	14.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Similar to AR 5 for paragraph 17, we suggest adding an Application Requirement for paragraph 15. Specifically, when disclosing actions and resources related to biodiversity and ecosystems, the undertaking should be required to specify: the need to obtain the free, prior, and informed consent (FPIC) of Indigenous Peoples and local communities; the need for appropriate consultations; and the obligation to respect the decisions of these communities.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We understand the removal of the former paragraph 28 (a) "may disclose how it has applied the mitigation hierarchy with regard to its actions" to streamline data points. However, this unintentionally emphasizes offsets, which can mislead reporting. Best practice requires offsets only as a last resort, after avoidance, minimization, and restoration. Without this context, undertakings may focus disproportionally on offsets, undermining earlier stages of the mitigation hierarchy. Stakeholder engagement in developing the GRI Biodiversity Standard confirmed disclosure on the full mitigation hierarchy is decision-useful and provides essential safeguards. We recommend including an Application Requirement clarifying that offsets are to be disclosed only as the final step. Finally, AR33 for paragraph 37 in ESRS 2 makes classification of actions according to the mitigation hierarchy optional ('can'), which weakens recognition of the hierarchy as international best practice and fails to provide adequate safeguards to ensure appropriate use of offsets within E4.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The amendments delete the disclosure of how targets are informed by or aligned with the GBF (former 32 (b)) and move it to the NMIG 10. As noted in the comment on paragraph 11, the link to the GBF extends beyond transition plans and applies to all policies and targets set by companies, which are more widespread than transition plans. We recommend revising the DR, or adding a note in the Application Requirements, to strengthen and clarify this point, so that undertakings can demonstrate whether and how they contribute to the global goals and targets to halt and reverse biodiversity loss.	E4	E4-4 - Targets related to biodiversity and ecosystems	17.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	As noted in the comment on paragraph 16, the Application Requirements should clarify that undertakings explain how offsets used in target-setting are applied within the context of the mitigation hierarchy, to ensure they are reported as part of the full hierarchy rather than in isolation.	E4	E4-4 - Targets related to biodiversity and ecosystems	18.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We note that considerations on the need to obtain the free, prior, and informed consent (FPIC) of Indigenous Peoples and Local Communities; the need for appropriate consultations; and the obligation to respect the decisions of these communities, are currently referenced in the context of target-setting. While relevant to targets, these considerations are more directly applicable to the actions and resources that undertakings implement to address biodiversity and ecosystem impacts. FPIC and consultations are practical processes that must accompany concrete actions, rather than target-setting, to ensure legitimacy and respect for rights. We therefore recommend relocating this reference to paragraph 15 (actions and resources) and its Application Requirements. It may also be relevant not only to "consider" but also to "specify" how the undertaking has taken IPLC FPIC and consultations into account in its actions.	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We support the amendments in the context of streamlining data points. However, the amendments removed the requirement to report the area of sites (former paragraph 35), further reducing alignment with GRI 101-5-a. Information on spatial footprint is decision-useful as it enables, in combination with other disclosures (e.g., activities taking place at the sites), to assess the actual or potential impacts of the undertaking. While not always a relevant proxy for all organizations, it remains important for many, particularly those unable to easily measure ecosystem conversion or condition.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	The GRI Biodiversity Standard (Disclosure 101-5) requires reporting on the location of individual sites. Aggregation of location information across a group of sites is not permitted under GRI requirements. Therefore, the distinction made between "location" and "site" in the Log of Amendments is not consistent with the GRI Standards, contrary to what is claimed.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	We note that paragraph 21 has been reduced to a generic requirement to disclose material metrics, without further guidance. While we understand the rationale of reducing prescription in light of methodological maturity, the absence of any reference point leaves undertakings without clear direction and risks undermining comparability. We recommend either: - including a minimum set of metrics aligned with established standards, in particular GRI 101: Biodiversity 2024 disclosures 101-6 Direct drivers of biodiversity loss and 101-7 Changes to the state of biodiversity, which received stakeholder support during consultation and cover metrics on direct drivers of biodiversity loss, ecosystem size/extent, and condition; or - referring explicitly to GRI 101 in the Application Requirements as a source of metrics that have already been tested through extensive stakeholder consultation and are decision-useful for users of sustainability information. This would balance flexibility with comparability, and strengthen alignment with other Standards and Frameworks such as GRI, TNFD, and NPI.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	AR7 allows undertakings to select one of the three types of locations covered by (a), (b), and (c). This option enables undertakings to omit reporting on locations where material impacts occur or could occur. To ensure comprehensive coverage, we recommend revising the text to: "Information to be disclosed under this paragraph applies to locations that meet all of the following criteria (a), (b), and (c)." This change would close potential reporting gap and ensure that disclosures capture all relevant locations.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The language to identify if a site near a sensitive area is likely to affect this area is currently unclear. We suggest to amend as follows: "If the undertaking's site is in *or near* a biodiversity sensitive area, it is highly likely that its activities will negatively affect the area. For sites located outside a biodiversity-sensitive area, whether they are considered 'near' and likely to affect such an area shall be determined:".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	AR 8 refers to the IBAT tool, which is indeed often used by undertakings in practice but whose functionalities are not all freely accessible. We suggest adding a reference to equivalent publicly available tools as follows: "(b) Buffer zones can be determined following industry best practice and science-based recommendations, using tools such as the Integrated Biodiversity Assessment Tool (IBAT) or other equivalent publicly available tools, or based on findings of a site-level survey."	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The phrase “Depending on which sub-topic is assessed to be material” is unclear. If a location is assessed as material for biodiversity, all four metrics on direct drivers, state of biodiversity and ecosystem services are relevant to understand the undertaking's impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	To ensure that undertakings report decision-useful metrics, they should not only consider but also specify the baseline information used for their monitoring.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	1) The sentence "Transition plans for biodiversity and ecosystems are expected to address similar elements than transition plans for climate change mitigation" shall be removed\cancelled. The reference to similarity with climate transition plans is not appropriate: the two areas are fundamentally different, as are the related requirements. Climate transition plans rely on globally available metrics and quantitative pathways, whereas for biodiversity, such methodologies and comparable targets do not exist at a global level. 2) the compatibility with GBF shall be removed or explained in detail. The text requires that any transition plan be compatible/aligned with the targets of the GBF. A similar formulation exists for climate (referring to compatibility with the 1.5°C target), which is currently under discussion, as it is considered not directly applicable to companies. The same issue arises here with biodiversity. The GBF objectives are designed to guide public policies and national action plans, not to be directly applied to corporate business models. In this context, it is unclear what it means for a company to have a strategy or business model “compatible” with such objectives. The requirement is difficult to interpret and cannot be verified.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	With this new wording it is not clear which site should be reported (please see comment on AR 7 below). The term "location" is not very clear, please clarify if "location" refer to single sites or an aggregation of type of activities or geographies. It is recommended to use consistent wording in all the environmental ESRS . Moreover, para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The criteria identified in letter a), b), c) seems to require the disclosure on all the location with IRO + all the sites prioritised internally + the assets (and is not clear why we are not referring anymore to locations) with negative interactions with biodiversity areas. The interaction of the 3 points could lead to a ling ist of location to disclose. It should be clarified that the intention is not to require disclosure for every single site, but rather a limited number of representative sites selected according to prioritisation criteria defined by the company	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	In an attempt to clarify the concept of “near,” the text paradoxically ends up considering as near any site “not inside” a sensitive area. This would effectively imply conducting ad hoc analyses for hundreds of sites (all those not overlapping), in order to identify a science-based buffer based on the ecological specificities of each site. This represents an operational and documentation burden that is entirely disproportionate to the goal of simplification. Moreover, IBAT does not provide a buffer on a scientific basis; it is the user who enters the desired buffer to perform the mapping. Finally, it should be noted that ESRS is a disclosure standard, designed to harmonize reporting across companies, not to prescribe detailed operational management of impacts, which is addressed through other regulatory frameworks. The current wording of AR 8 risks turning the standard into a de facto operational requirement, going beyond the intended purpose of ESG disclosure.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	8.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The amendments are highly welcome. Please make clear that a reference to a transition plan is only necessary if there is a transition plan in place. If the undertaking does not have a transition plan in place it does not consequently have to disclose that this is the fact.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The amendments are highly welcome. Please make clear that a reference to a transition plan is only necessary if there is a transition plan in place. If the undertaking does not have a transition plan in place it does not consequently have to disclose that this is the fact.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The added para. 14 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-2 - Policies related to biodiversity and ecosystems	14.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The added para. 14 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The added para. 14 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The added para. 14 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 2
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR 3 for para. 13 should be removed as it only adds irrelevant additional information. At least please make clear that AR 3 does not require a “not applicable” disclosure.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 3
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	AR 4 for para. 13 can be removed as it brings no additional information.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 4
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree		E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The added para. 16 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards. At least, please make clear that the undertaking does not have to disclose the fact that it does not have any offsets in place.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree		E4	E4-4 - Targets related to biodiversity and ecosystems	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The added para. 18 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-4 - Targets related to biodiversity and ecosystems	18.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR 5 for para. 17 should make clear that this is only an information but no disclosure requirement.	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree		E4	E4-5 - Metrics related to biodiversity and ecosystems change	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please make clear that para. 21 only refers to metrics for the own operations.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR 8 should make clear that IBAT is only one of many different tools to examine biodiversity sensitive areas.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The way it is currently phrased, this AR is making it mandatory for the undertaking to create metrics. It should be amended to require disclosure of metrics 'if the undertaking has any'. This change would align the standard with its purpose of transparency on existing practices, rather than imposing an undue burden by forcing metric creation in a field where measurement is still emerging.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree		E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree		E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The location-based approach to environmental impacts proposed in the standards is disproportionate and should be entirely eliminated. It introduces unnecessary complexity, increases the reporting burden, and does not align with the principles of relevance and proportionality.	E4	E4 - Objective	9.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Check the consistency of the subtopics (Appendix A: List of topics). "Direct exploitation of organisms" is not included in the list, nor are Climate Change and Pollution. Moreover, here it is stated that the driver Climate Change is covered under E1, while in E1 it is stated that is covered in E4. The same inconsistency applies to Pollution	E4	E4 - Interaction with other ESRS	10.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In the other sections, it is not specified that the impacts are attributed to the company. This difference in wording should be clarified in order to avoid misinterpretation with the previous requirements (10. a-d)	E4	E4 - Interaction with other ESRS	10. (e)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	An explanation what is meant by "biodiversity offsets" would be helpful. Either in the ESRS E4 or in the glossary.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	18.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The section requires reporting metrics on "relevant" concepts (e.g., drivers of biodiversity loss, species status, ecosystems, ecosystem services), but does not specify which metrics to adopt or the level of detail required. On one hand, this allows for flexibility; on the other, in a disclosure context subject to assurance, it is problematic because it leaves wide room for subjective interpretation and does not ensure comparability between companies. Moreover, it does not provide parameters to assess the adequacy of the selected metrics. It is recommended to specify whether we are referring to impact metrics (of the company on these topics) or to ecological status metrics of the area and species.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	18.
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	"Some amendmends which reduce burden. However it is still a work-intensive disclosure that requires a lot of preparation and data collection and analysis. Site surveys are not feasible for big undertakings (which are the scope of the CSRD) with tens of thousands of locations. It would be desirable to specify the AR 8 for Par. 20 with more detailed information on what type of activities are relating to species and BSA and therefore determine the buffer zones. What is ""industry best practice and science-based recommendations"" in the field of biodiversity, which is less developed than other topics. These specifications leave a lot of room for interpretation regarding the distance to BSAs. The notes in the log of amendments seems to state that near=if company ""impacts"" BSA - this does not clarify the concept in our view The AR prematurely claims that sites in/near BSAs will ""highly likely (...) negatively affect the area"". This seems to pre-determine a materiality not assessed by DMA. Who determines if an office 3km away from an BSA has an impact or not? "	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	IPBES identifies five direct drivers of biodiversity loss to which it was explicitly referred to in the current standard: land and sea use change, direct exploitation of species, pollution, invasive alien species, and climate change. We recommend reintroducing all these five drivers and clarifying their connection to the E4 sub-topics. This could be done in the NMIG.	E4	E4 - Objective	4.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend clarifying how to consider the international frameworks to which it is referred to in the different DRs/DPs of ESRS E4, such as the reference made to the Kunming-Montreal Global Biodiversity Framework within the transition plan for biodiversity and ecosystems disclosures.	E4	E4 - Objective	8.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We welcome the overall simplification of the DR E4-1 and the alignment with the structure of the DR E1-1 (i.e. reporting on "key features"). However, we recommend including a definition of a biodiversity transition plan in the ESRS glossary. We also note that assessing the alignment of a transition plan for biodiversity with the GBF currently raises many difficulties in practice. Besides, we recommend using the term "compatible" instead of "aligned" to be consistent with ESRS E1.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend specifying in the NMIG that undertakings may disclose transition plans that are in place but not yet public, using the sustainability statement as a means of publication. Besides, we encourage EFRAG to clarify what is meant by "publicly released".	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	While AR 8 provides a detailed definition of how 'near' should be interpreted in relation to paragraph 20, no such clarification is offered for §14(b). We recommend either specifying the definition directly in relation to this paragraph or including a reference to this § in AR 8 to ensure consistency and clarity. Besides, we recommend including in this AR additional guidance from ID 1172 to help the undertaking assess how impacts from its activities negatively affect ecosystems and biodiversity and at what distance, since proximity to biodiversity sensitive area is of course to be considered but may not be conclusive in itself.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	This § should be amended as follows to cover material IROs and not only material impacts, consistently with the related rationale provided in the log of amendments: "... the undertaking shall report metrics related to its material impacts, risks and opportunities on biodiversity and ecosystems..."	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend integrating the following improvements in wording: (a) referring to "own operations" instead of "direct operations" to avoid any confusion; (b) specifying "where the undertaking has prioritised them..."; (c) specifying "where the assets and/or activities...".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend amending the first sentence of this AR as follows, to clearly highlight the requirement to also consider sites near a biodiversity sensitive area: "If the undertaking's site is in or near a biodiversity sensitive area, it is highly likely that its activities will negatively affect such area."	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	We welcome mandatory requirement for the transition plan for biodiversity and ecosystems. As proposed, this is only applicable when a plan exists. We want to stress the importants that all high risk sectors should be forced to have a transition plan or take steps to reduce negative impact on ecosystems and biodiversity. The way it is proposed now is too voluntary.	E4	E4-1 - Transition plan for biodiversity and ecosystems	1.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We propose to keep targets related to biodiversity and ecosystems to remain in place.	E4	E4-4 - Targets related to biodiversity and ecosystems	4.
Excels	Triodos Bank N.V.	Bank	Netherlands			I agree	Location-based disclosures in or near biodiversity-sensitive areas should be considered a minimum requirement and we supporting that this stays. As any biodiversity impact is highly dependent on the local ecological context, transparency on the locations of business activities of coorporations is highly important. Further location-based information is a minimum requirement as an input for a meaningful biodiversity impact indicator and also helps to keep corporates accountable.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	5.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	The current wording remains too generic and lacks practical guidance. It could be beneficial to use similar appoach to generate metrics for ESRS E4 as the approach covered in the TNFD's metric framework to address location specific aspect of the ESRS E4. TNFD provides a clearer, science-based structure with pressure, state, and response indicators, which are more actionable than the broad metric categories currently listed in ESRS E4. (https://tnfd.global/metrics/)	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	UNEP-WCMC	NGO	United Kingdom			I disagree	Para 4 mentions the sub-topics drivers of biodiversity and ecosystem change, state of species, extent and condition of terrestrial and marine ecosystems, ecosystem services. Para 3 states that "when only one of the sub-topics covered by this Standard is material, the undertaking shall report only on that sub-topic". However, the sub-topics are closely interrelated and it is likely that if one is material, others are too. We recommend adding a comment that acknowledges this.	E4	E4 - Objective	3.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Highlighting the importance of disaggregating information by site, asset, location etc., is useful. For companies to know how to implement this objective, we recommend elaborating on which disclosure requirements require site/asset/location level reporting and which can be reported at the company level.	E4	E4 - Objective	9.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Para 10 on the direct drivers of biodiversity and ecosystem change: We recommend referring IPBES to justify the list of drivers mentioned.	E4	E4 - Interaction with other ESRS	10.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Replace "Global Biodiversity Framework" with "Kunming-Montreal Global Biodiversity Framework"	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	UNEP-WCMC	NGO	United Kingdom			I disagree	We recommend removing the condition on publicly released TP. All data points should be applied to all companies that have, in their materiality assessment, identified high risks and dependencies on nature.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	Para 14a is useful and important and it reflects the best practice promoted by TNFD, SBTN and GRI.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Given that for most companies, especially those based in the EU, the most material impacts on biodiversity are likely to be found in the upstream part of their value chain, UNEP-WCMC would recommend adding the wording "sites in its own operations and its key sourcing locations that are in or near a biodiversity sensitive area".	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Please clarify whether this AR means that financial institutions do not need to report policies on how they are reducing financed impacts on biodiversity.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 2
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	It is good that ESRS 2 GDR-A defined "key actions" through their potential to address material impacts, risks and opportunities.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	Good that in ESRS 2 GDR-A, companies are asked to describe the expected outcomes of the key actions.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	It would be useful to add the following wording to explain how the provisions of ESRS 2 GDR-T should be applied for biodiversity and ecosystem targets: "For impact-related targets on biodiversity and ecosystems, the undertaking shall specify whether the target is related to its impact drivers/pressures or impact (i.e. change in biodiversity or ecosystem state)."	E4	E4-4 - Targets related to biodiversity and ecosystems	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	This is an important addition and likely to be relevant to targets related to other environmental topics. In the interest of simplification, we recommend moving this application requirement to the ESRS 2 GDR-T so that it applies to all targets (this would be similar to the Indigenous People's application requirement for key actions in ESRS 2 GDR-A).	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	The wording "biodiversity and ecosystems change-related impacts, risks and opportunities" is unclear. Should it be "biodiversity- and ecosystems change-related"? I.e. both biodiversity-related and ecosystems change-related?	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	It is not clear whether "negatively affected" means "negative effects wholly attributable to the company" or also "negative effects to which the company is contributing". For example, fertilizer run-off from multiple agricultural sites in an aquifer is affecting species in a river flowing through a Natura2000 site. Should a company report this as a biodiversity-sensitive area negatively affected by them, even though they are just one of many contributors to the risk? AR7 attempts to clarify this, but it is not clear what is meant by "significant drivers of material impacts, risks and opportunities" or what it means to "interact negatively with biodiversity sensitive areas".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (b)
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Given that Paragraph 20 refers to impacts, risks and opportunities, and risks and opportunities include potential future damage, we could recommend changing the wording in Para 20b from "for those locations, if applicable, a list of biodiversity-sensitive area(s) negatively affected" to "or those locations, if applicable, a list of biodiversity-sensitive area(s) that may be negatively affected".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (b)
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	We would recommend clarifying that "(name and type)" means "(name, type of biodiversity-sensitive area and type of impact, risk or opportunity)".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (b)
Excels	UNEP-WCMC	NGO	United Kingdom			I disagree	Limiting reporting to option (b) alone would be insufficient. Organizations should prioritize approaches (a) and/or (c), with option (b) serving as a potential supplement, to guarantee that disclosure adequately addresses significant nature-related impacts and dependencies and not only sustainability-related objectives covered by its policies, actions and targets.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Thanks for referencing the buffer zone approach from IBAT. The definition of what 'near' means is not clear. We recommend adapting similar language to TNFD's definition of Areas of influence and referring to IFC PS6, Good Practices in Collection of Biodiversity Baseline Data, and sector-specific standards, such as GRI Sector Standards or TNFD sector-specific guidance. "Nature-related impacts can arise beyond the immediate site boundary of an activity. Corporates (and financial institutions involved in project finance) should seek to understand areas of influence, noting that the size of the area may vary, depending on the nature of its activities and/or assets, and on the biome, and is often larger than the footprint of the site itself. It includes areas in which there is subject to direct and indirect impacts that may be positive or negative, depending on the site activity. When an organisation's area of influence overlaps with those of other organisations, cumulative impacts should also be considered. A comprehensive approach to outlining a project's area of influence is included in several good practice guidelines, such as IFC Performance Standard 6 and the Good Practices for the Collection of Biodiversity Baseline Data."	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	ESRS 2 GDR-M refers to metrics that the company uses to evaluate its performance in relation to material impacts, risks and opportunities. Para 21 in ESRS E4 complements this by stating that, in addition to this, the company should report metrics related to its material impacts on biodiversity and ecosystems. We recommend clarifying whether it is necessary to also include material biodiversity and ecosystem risks and opportunities.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Change the wording "the undertaking shall indicate which material impacts concern land degradation, desertification or soil sealing, and operations that affect threatened species" to "the undertaking shall indicate which material impacts are related to land degradation, desertification, soil sealing or threatened species".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	UNEP-WCMC recommends that, alongside any metrics of drivers of biodiversity and ecosystem change, companies also report metrics on ecosystem extent, condition and species risk in the location of those pressures. We recommend that EFRAG reviews the concept of "sub-topics" in this standard. We welcome that in the ESRS 2 GDR-M, there is the requirement "for environmental metrics, the specific environmental conditions and characteristics of the area where the impact is occurring".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Ideally, the standard itself would propose metrics, but we understand that the simplification process has required leaving out some details. However, ESRS E4 should make a reference to the related NMIG for para. 21, because that is where companies can find a list of metrics that can be used for reporting in line with AR9 for para. 21 in ESRS E4.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	UNEP-WCMC	NGO	United Kingdom			I disagree	Where possible, measurement of impacts on biodiversity and ecosystems should be based on primary data. This includes data collected on site or remote sensing data. Where primary data is not available, the company may estimate its impacts (i.e. changes in the state of nature it causes) using primary data on impact drivers and primary or secondary data on the state of nature.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. With the GDR-P this will be sufficiently transparent	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. With the GDR-P this will be sufficiently transparent	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. With the GDR-P this will be sufficiently transparent	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 3
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Proposition to delete, it's very detailed information with limited decision relevance for stakeholders	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	While we acknowledge the intention to provide further guidance on what 'near' a biodiversity sensitive area means, the additional requirements on the definition of a buffer zone „specific to the type of activity and the species and ecosystems in the area" will significantly increase the complexity of calculations and lead to high auditor alignments. We propose a simpler approach, e.g. a definition of 2km as a definition of what "near" means.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	The notion of "transition plan" is not yet clearly defined. Companies are currently exploring the best ways to develop action plans on this highly complex subject, whether through national or international initiatives, but no official certification of such analyses and plans exists to date. Making this datapoint mandatory, even with precautions (i.e. if the company has a transition plan and has published it), would discourage companies from taking initiatives, as it would trigger compulsory verification by auditors without existing auditing standards. Furthermore, "so it is aligned" with the Global Biodiversity Framework (GBF) lacks clarity. It would be more appropriate to refer instead to "consistency" with the objectives of the GBF.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The distinction between a "transition plan" and an "action plan" remains unclear and has already led to numerous discussions with auditors during the first reporting exercise, even in the case of climate transition plan. Moreover, as previously suggested, we propose to refer to "consistency" with relevant global goals, rather than "to become compatible with" them.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We would appreciate further clarification on the following points: what exactly is meants by the "action plans" reffered to? Should offsetting be considered voluntary or compulsory?	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Point (b) of AR9 seems to introduce a new obligation for undertakings, as metrics related to the state of species were previously optional, even if the subtopic was considered material.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Point b) of AR8 introduces the new notion of a "buffer zone" which is neither defined in this AR, nor in the Glossary. It should be suppressed.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E4. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E4	E4 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Para. 1 states that information on financial effects is expected under [Draft] Amended ESRS E4, which is a valuable acknowledgement given that such information on financial effects is highly decision-relevant, not only for the undertakings themselves, but also for other primary users of their sustainability statements, including those in the financial sector. However, [Draft] Amended ESRS E4 no longer contains specific DRs on financial effects on biodiversity since the former ESRS E4-6 is proposed to be removed. Financial effects are also not included in any other disclosure requirements in ESRS E4, which makes this statement somewhat void. Since nature-related financial effects can be substantial, the standards should ensure that they are considered in reporting on actual and anticipated financial effects under ESRS 2 SBM-3. If it proofs difficult to reinstate them as part of ESRS 2, they should at the least be included in the non-mandatory guidance.	E4	E4 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	Comment to IRO-1-related DR in E4: We are concerned that [Draft] Amended ESRS E4 no longer contains explicit topic-specific instructions or guidance on how to conduct the materiality assessment regarding biodiversity and ecosystems (as set out in previous AR 4), and do not consider this information redundant as laid out in the Log of Amendments, since ESRS 2 does not cover topic-specific provisions. The references in [Draft] amended ESRS 2, AR 22 to location-specific considerations and the "LEAP approach" should be strengthened (see comments on ESRS 2). Further, we advise EFRAG to include the essence of ESRS E4, AR 4 to AR 6 into the NMIG for ESRS 2.	E4	E4 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	[Draft] Amended ESRS E4 para. 3 explicitly states that undertakings shall report only on a sub-topic, when material. While it is reasonable to report only on material sub-topics, the sub-topics of [Draft] Amended ESRS E4 consider different levels and are not mutually exclusive. For example, the sub-topic "drivers of biodiversity and ecosystem change" addresses the reasons for biodiversity and ecosystem change, while other sub-topics address biodiversity loss/change itself (e.g. status of species, extent and condition of terrestrial and marine ecosystems; and ecosystem services). Focussing on one of these topics while neglecting another is not reasonable. We therefore recommend to include a clarification in E4, para. 3, on the interlinkages between sub-topics, and to ensure that both drivers and the loss of biodiversity are addressed.	E4	E4 - Objective	3.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	[Draft] Amended ESRS E4 in para. 4 only acknowledge a sub-set of drivers of change in biodiversity and ecosystems. The expression in brackets "terrestrial and marine habitat change, invasive species" should be deleted.	E4	E4 - Objective	4.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The standard mainly refers to terrestrial and marine ecosystems, while freshwater ecosystems are not explicitly mentioned / included. Given that freshwater habitats are among the most threatened ecosystems globally and provide critical services such as drinking water supply, irrigation, and biodiversity corridors, we recommend explicitly integrating freshwater ecosystems into the scope of ESRS E4. Extend para. 4: "the extent and condition of terrestrial, freshwater and marine ecosystems;"	E4	E4 - Interaction with other ESRS	4.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Glossary: We highlight that the definition of "biodiversity" in para. 7 differs slightly from the one in the glossary. From a conservation perspective, we strongly recommend aligning both definitions with the Convention on Biological Diversity (CBD), Article 2: „Biological diversity means the variability among living organisms from all sources including, inter alia, terrestrial, marine and other aquatic ecosystems and the ecological complexes of which they are part; this includes diversity within species, between species and of ecosystems." (https://www.cbd.int/convention/articles?a=cbd-02). Using the CBD definition would ensure consistency with the globally recognised reference framework.	E4	E4 - Interaction with other ESRS	7.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Using "objective" in this sentence is confusing, since the objective of the standard is already introduced in para. 2. Delete "The objective of" and start with "This Standard shall…"	E4	E4 - Objective	8.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Glossary: The GBF has a vision for 2050, a mission for 2030, four goals for 2050, and 23 targets for 2030. The phrase "To take urgent action to halt and reverse biodiversity loss" is part of the mission for 2030. We therefore recommend a slight change in wording for [Draft] Amended ESRS E4-1 para. 8.a.) to better align with the terms and concepts used in the GBF: "the vision and mission of the Kunming-Montreal Global Biodiversity Framework and …";	E4	E4 - Objective	8. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	ESRS E4 para. 10 is rather confusing: it states that climate change and pollution are covered only in E1/E2, but sub-points a–d indicate their impacts are addressed in E4. To avoid confusion, we recommend clarifying that ESRS E1 and E2 cover the drivers of climate change and pollution themselves, while ESRS E4 addresses their specific impacts on biodiversity and ecosystems. We suggest to modify the text of para. 10 in the following: delete "these drivers are covered in this Standard, except for", so that it reads "…alien species. Climate change and pollution are mainly addressed by [Draft] Amended ESRS E1 Climate Change and [Draft] Amended ESRS E2 Pollution. The main points of interaction…"	E4	E4 - Interaction with other ESRS	10.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Glossary: We recommend to adapt the glossary entry for "Drivers of ecosystem and biodiversity change" (prev. "Impact drivers") in the following way: 1.) specify "exploitation" similar to the wording in ESRS E4 para. 10 "direct exploitation of organisms; 2.) Substitute "indirect impact drivers" with "indirect drivers of ecosystem and biodiversity change" to reflect the new title of the entry.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We recommend to delete "when it has in place a biodiversity and ecosystems transition plan" from para. 11. This condition is already covered in para. 12.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Disclosure under ESRS E4-1 should be mandatory whenever a transition plan exists („if… has in place"). The additional condition of publication ("and has made public") should be deleted. This condition would set incentives for non-disclosure and lead to a duplication of published information, which should both be avoided. If EFRAG were to delete the condition of publication, users would also understand that non-disclosure according to E4-1 indicates the absence of a transition plan, which is considered a relevant information in itself.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We noticed that for some NMIG entries related to Biodiversity and Ecosystem the numbering is wrong: NMIG 1 and 2 should both be for para. 12.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The GBF has a vision for 2050, a mission for 2030, four goals for 2050, and 23 targets for 2030. The phrase "To take urgent action to halt and reverse biodiversity loss" is part of the mission for 2030. We therefore recommend a slight change in wording for para. 12 to better align with the terms and concepts used in the GBF: "…so it is aligned with the global mission of halting and reversing biodiversity loss".	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	AR 1 and NMIG 1 (note that paragraph numbering is wrong in NMIG): We recommend to use similar wording as in the transition plan for climate change mitigation, i.e. „key features" instead of "elements"	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Regarding ESRS E4-1 and its associated AR 1 and NMIG 2, we find misalignments in the references to the GBF and EU Biodiversity Strategy. We suggest: 1.) Embed the possible connection of the transition plan to further goals, concepts, strategies and frameworks in para. 12 with: "… as stated in the Kunming-Montreal Global Biodiversity Framework or other relevant local, national, EU and global public policy goals and targets related to biodiversity and ecosystems, it shall disclose its key features."; and 2.) Include references to relevant GBF goals and targets in a separate NMIG, to shift the focus away from providing guidance solely on the EU Biodiversity Strategy, which is not part of the mandatory para. 12 anymore.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Acronyms: the acronym list should include "GBF" – Global Biodiversity Framework since this abbreviation is used in ESRS E4, but not introduced before	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We note that para. 15 on actions and resources related to avoid, mitigate and remediate biodiversity- and ecosystem-related impacts remains unspecific. This risks placing undue emphasis on biodiversity offsets, (para. 16). We recommend carefully reviewing this disproportionate level of detail. Offsets should not become the primary focus, as they are not necessarily a net gain for nature, and may even divert attention from more effective biodiversity measures.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Since publication of the delegated act for the ESRS in 2023, the global community has agreed on a new mechanism for the Fair and Equitable Sharing of Benefits from the use of Digital Sequence Information on Genetic Resources (DSI) – the Cali fund. With updating the ESRS we see it as important to reference this global agreement and to offer undertakings, that make use of digital sequence information, guidance to consider this when disclosing their relevant actions. We therefore suggest to add an additional entry to the Non-Manadatory Implementation Guidance relating to E4-3 (para. 15): „When disclosing their key biodiversity and ecosystem-related actions and significant resources allocated to their implementation, users of digital sequence information on genetic resources in sectors that directly or indirectly benefit from their use in their commercial activities, can disclose their monetary contributions to the Cali Fund for the Fair and Equitable Sharing of Benefits from the use of Digital Sequence Information on Genetic Resources (DSI)."	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The term "biodiversity offsets" should be added to the glossary. EFRAG can rely on the work of IUCN: https://iucn.org/resources/issues-brief/biodiversity-offsets	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Glossary: replace the term "local and indigenous peoples" in AR 5 for para. 17 with the internationally more common wording of "indigenous peoples and local communities".	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I agree	We support the decision of EFRAG to maintain the concept of biodiversity-sensitive areas, since we also consider this location-specific information as highly decision-useful. It provides essential insights into impacts, risks and opportunities that cannot be captured through aggregated reporting alone. Even though E4-5 has lost in topical granularity, we generally welcome that [Draft] Amended ESRS E4-5 now foresees the mandatory disclosure of metrics related to material impacts on biodiversity and ecosystems.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	From a conservation perspective, we strongly recommend that AR 8 para. 20(b) specifies that undertakings should also take into account the type of buffer zone of biodiversity-sensitive areas, along with the resulting legal requirements, obligations and prohibitions. For example, the buffer zones of biosphere reserves are an integral part of these large protected areas, functioning as a 'maintenance zone' with a buffer function for the core zone, and are usually subject to strict regulatory requirements (e.g. comparable to a nature reserve regulation). For other types of buffer zones, measures in line with industry best practice standards may be more appropriate. This distinction is essential to ensure meaningful and comparable disclosure.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	AR 9 only acknowledges a sub-set of drivers of change in biodiversity and ecosystems.The expression in brackets "terrestrial and marine habitat change, invasive species" should be deleted.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Include "freshwater ecosystems" in item (c)	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Glossary: We recommend including a definition of „state of species“.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Regarding the structure of ESRS E4-5, it might make sense to swap order of current paras. 20 and 21 to first mention requirements (in this case metrics) related to ESRS 2 GDR-M and then other metrics specific for the topical standard similar to other DRs	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	NMIG 14 is highly welcome. However, it is particularly helpful for the guidance on how to conduct the materiality assessment regarding biodiversity and ecosystems and should belong with this section of the NMIG for ESRS 2 IRO-1 instead of ESRS E4-5.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	NMIG: The term "Natural Resources" was deleted from the Glossary, but is still used within the NMIG. Avoid use of the term in NMIG.	E4	E4 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We recommend to move the requirement to disclose "the specific environmental conditions and characteristics of the area where the impact is occurring;" from ESRS 2, para. 41 (b) to ESRS E4-5. Providing contextual information on the environmental conditions and characteristics of an area where the impact occurs, is most relevant for biodiversity and ecosystem metrics. The provision could be formulated as follows: "When providing contextual information on the metric, in accordance with ESRS 2 GDR-M, the undertaking shall explain the environmental conditions and characteristics of the area where the impact is occurring;"	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The new E4-1 requirement makes biodiversity and ecosystem transition plan disclosure mandatory if such a plan exists and is already public. While recognising the current maturity level for biodiversity transition plans, the AR 1 wording ("are expected to address…") remains vague, and there is no specific definition of a biodiversity transition plan in the ESRS glossary. There is also no clear distinction between a "biodiversity transition plan" and a "biodiversity strategy". Furthermore, the link with the Kunming-Montreal Global Biodiversity Framework (GBF) raises practical issues: there is no agreed methodology for assessing "alignment" with GBF at company scale, biodiversity impacts are often localised (by business line or geography), and sector-specific metrics are still under development. We suggest the following changes: • Provide a clear, short definition of a biodiversity and ecosystems transition plan in the ESRS glossary, distinguishing it from a biodiversity strategy. • Require only a core set of elements (targets, key actions, timelines, governance), similar in structure to ESRS E1-1, to ensure minimum comparability without overburden. • Indicate in the NMIG that companies may disclose plans not yet fully aligned with the GBF, provided they explain the degree of alignment and the steps planned to achieve it.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The removal of biodiversity-specific resilience analysis from ESRS E4 risks creating a gap in the disclosure framework, as it may lead undertakings to provide only generic resilience assessments under ESRS 2 SBM-3 without addressing biodiversity-specific risks and dependencies. While the intent to avoid redundancy is understandable, biodiversity resilience has distinct drivers compared to climate and merits dedicated consideration.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	While E4-3 and E4-4 introduce transparency requirements for biodiversity offsets, they remain significantly less detailed and prescriptive than the new E1-9 provisions on carbon removals and carbon credits. To ensure alignment and coherence across ESRS topical standards, and to avoid the biodiversity offset requirements being perceived as weaker than climate-related offset requirements, we recommend that EFRAG: • Provide a clear definition of "biodiversity offset" and distinguish it from general conservation or restoration actions. • Mirror E1's structure by separating disclosure of internal offsetting projects from offsets purchased or financed externally. • Require minimum integrity criteria similar to those for carbon credits, covering ecological quality factors. • Require reference to recognised quality standards (or state explicitly if none exists). • Mandate disclosure of the proportion of targets met through offsets versus direct biodiversity actions.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The removal of the previous requirement (number of sites and hectares affected) eliminates a more feasible and comparable metric for large groups. We recommend considering reinstating the previous "number of sites and hectares affected" metric as a baseline, complementing it with qualitative description of priority areas and allowing companies to report on prioritised biodiversity-sensitive areas only, with aggregation where appropriate.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Nature Positive Initiative Secretariat	NGO	United States			I agree	N/A	E4	E4-5 - Metrics related to biodiversity and ecosystems change	19.
Excels	Nature Positive Initiative Secretariat	NGO	United States			I agree	Support this update in the context of needing to remove datapoints.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (a)
Excels	Nature Positive Initiative Secretariat	NGO	United States			I agree	Support this update in the context of needing to remove datapoints.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (b)
Excels	Nature Positive Initiative Secretariat	NGO	United States			I agree	Support this update in the context of needing to remove datapoints.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (c)
Excels	Nature Positive Initiative Secretariat	NGO	United States			I partially agree and partially disagree	We support the alignment with the draft global consensus metrics on state of nature, convened by the Nature Positive Initiative. Removal of the metric specifications from the mandatory requirements is particularly problematic for biodiversity and ecosystems metrics, where standardisation is more limited at present than with other metrics. Specifying metrics (as is now in NMIG 18-20) would give companies the information they need to select and report practical, credible and comparable metrics.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Nature Positive Initiative Secretariat	NGO	United States			I partially agree and partially disagree	Suggest threatened species or ecosystems. Guidance would be needed for companies on how to identify impacts concerning land degradation, desertification or soil sealing, as these are not commonly reported as categories/sub-topics.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	Nature Positive Initiative Secretariat	NGO	United States			I disagree	Strongly recommend that it should not be an option to only report according to point (b). Companies should apply (a) and/or (c) and may additionally choose to apply (b). As it is currently written, companies may choose to disclose metrics for only sites with limited biodiversity-related impacts or risks but that it has focussed on in its wider sustainability programmes, whilst high risk/impact sites for biodiversity might not need reporting. This undermines the purpose of the standard.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	Nature Positive Initiative Secretariat	NGO	United States			I agree	N/A	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Nature Positive Initiative Secretariat	NGO	United States			I partially agree and partially disagree	Strongly support the alignment with the draft consensus state of nature metrics being convened by the Nature Positive Initiative. If the location has already been assessed as material for biodiversity and ecosystems then all four metrics are needed to indicate the impact of the company. It may be practical to move the qualification on materiality to point (d), i.e. companies shall report metrics for the most material ecosystem services.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	9.
Excels	Nature Positive Initiative Secretariat	NGO	United States			I disagree	Between site level measurement and estimation must be an additional step in the hierarchy: using national or global data layers. With the increasing availability of higher-quality remote sensing data, this is now more feasible and more accurate for measuring state of nature. It provides a much more accessible means of reporting for companies. Estimations should be the third resort.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	Nature Positive Initiative Secretariat	NGO	United States			I agree	N/A	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	1) The sentence "Transition plans for biodiversity and ecosystems are expected to address similar elements than transition plans for climate change mitigation" shall be removed\cancelled. The reference to similarity with climate transition plans is not appropriate: the two areas are fundamentally different, as are the related requirements. Climate transition plans rely on globally available metrics and quantitative pathways, whereas for biodiversity, such methodologies and comparable targets do not exist at a global level. 2) the compatibility with GBF shall be removed or explained in detail. The text requires that any transition plan be compatible/aligned with the targets of the GBF. A similar formulation exists for climate (referring to compatibility with the 1.5°C target), which is currently under discussion, as it is considered not directly applicable to companies. The same issue arises here with biodiversity. The GBF objectives are designed to guide public policies and national action plans, not to be directly applied to corporate business models. In this context, it is unclear what it means for a company to have a strategy or business model "compatible" with such objectives. The requirement is difficult to interpret and cannot be verified.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	With this new wording it is not clear which site should be reported (please see comment on AR 7 below). The term "location" is not very clear, please clarify if "location" refer to single sites or an aggregation of type of activities or geographies. It is reccomended consistency of wording in all the environmental ESRS.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (a)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The criteria identified in letter a), b), c) seems to require the disclosure on all the location with IRO + all the sites prioritised internally + the assets (and is not clear why we are not referring anymore to locations) with negative interactions with biodiversity areas. The interaction of the 3 points could lead to a ling ist of location to disclose. It should be clarified that the intention is not to require disclosure for every single site, but rather a limited number of representative sites selected according to prioritisation criteria defined by the company.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	In an attempt to clarify the concept of "near," the text paradoxically ends up considering as near any site "not inside" a sensitive area. This would effectively imply conducting ad hoc analyses for hundreds of sites (all those not overlapping), in order to identify a science-based buffer based on the ecological specificities of each site. This represents an operational and documentation burden that is entirely disproportionate to the goal of simplification. Moreover, IBAT does not provide a buffer on a scientific basis; it is the user who enters the desired buffer to perform the mapping. Finally, it should be noted that ESRS is a disclosure standard, designed to harmonize reporting across companies, not to prescribe detailed operational management of impacts, which is addressed through other regulatory frameworks. The current wording of AR 8 risks turning the standard into a de facto operational requirement, going beyond the intended purpose of ESG disclosure.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The section requires reporting metrics on "relevant" concepts (e.g., drivers of biodiversity loss, species status, ecosystems, ecosystem services), but does not specify which metrics to adopt or the level of detail required. On one hand, this allows for flexibility; on the other, in a disclosure context subject to assurance, it is problematic because it leaves wide room for subjective interpretation and does not ensure comparability between companies. Moreover, it does not provide parameters to assess the adequacy of the selected metrics. It is recommended to specify whether we are referring to impact metrics (of the company on these topics) or to ecological status metrics of the area and species.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Check the consistency of the subtopics (Appendix A: List of topics). "Direct exploitation of organisms" is not included in the list, nor are Climate Change and Pollution. Moreover, here it is stated that the driver Climate Change is covered under E1, while in E1 it is stated that is covered in E4. The same inconsistency applies to Pollution.	E4	E4 - Interaction with other ESRS	10.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	In the other sections, it is not specified that the impacts are attributed to the company. This difference in wording should be clarified in order to avoid misinterpretation with the previous requirements (10. a-d).	E4	E4 - Interaction with other ESRS	10. (e)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	With reference to point a) "supporting traceability of products, components and raw materials with material actual or potential impacts on biodiversity and ecosystems along the upstream and downstream value chain;" we see difficulties for companies in obtaining such information across the entire value chain (as already occurs with CBAM and EUDR). We propose deleting this point.	E4	E4-2 - Policies related to biodiversity and ecosystems	14.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Equinor supports significant reduction in the number of overall datapoints.	E4	E4 - Objective	1.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Equinor supports removal of Disclosures related to the resilience of strategy (former para.13) on this topical level and lifting it to the higher aggregated level (in ESRS 2 SBM-3) to avoid redundancy across the sustainability statement.	E4	E4-1 - Transition plan for biodiversity and ecosystems	1.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	The requirement to describe traceability policies along the value chain and for sites "in or near" biodiversity-sensitive areas (ESRS E4, 14a and b) is highly prescriptive. It poses operational, verification, and legal challenges. We recommend moving this DR to voluntary data points allowing proportionate flexibility consistent with materiality and preparer feasibility.	E4	E4-2 - Policies related to biodiversity and ecosystems	2.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	We support the objective of requirement 20 to enhance transparency on biodiversity-related impacts, risks and opportunities. Nevertheless, its current wording could be misinterpreted as requiring large multinational undertakings to enumerate every location with a material impact — an effort that may be disproportionate and obscure the most decision-useful information. We suggest clarifying that this is not the intent and allowing aggregation (e.g., disclosure of the most significant or representative locations, or grouping by geography, ecosystem type or business segment) so reporting remains both meaningful and practicable.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	5.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	AR. 9 for para. 21 - We support enhanced reporting on biodiversity and ecosystem change. However, mandatory metrics on drivers, species state, ecosystem condition, and ecosystem services are highly challenging due to the lack of globally accepted frameworks and robust methodologies. Defer methodology guidance until stable, widely accepted approaches exist; avoid locking-in immature voluntary frameworks. Premature mandatory guidance risks inconsistent disclosures and legal exposure.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Equinor recommends that all biodiversity metrics remain voluntary. Defer methodology guidance until stable, widely accepted approaches exist; avoid locking-in immature voluntary frameworks. Premature mandatory guidance risks inconsistent disclosures and legal exposure.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	5.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We believe the requirement in ESRS E4, paragraph 14b, should not be triggered if the site does not pose any specific risks or negative impacts on the area in question. For instance, having a sales office or similar activities like normal housing would normally not require reporting. Hence, we believe that the size or type of activities needs to be considered internally as part of the materiality assessment before requiring any external disclosure requirements, also in terms of policies.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	In our opinion, there is a lack of clarity on what should be done if a company does not have a biodiversity and ecosystems transition plan (there is a similar section for the E1 plan). Should section E4-1 be omitted from the report entirely if an E4 transition plan is not in place?	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	shouldnt it be reported if the transition plan has not made public?	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	does it mean that if the biodiversity transition plan is not aligned to the Kunming-Montreal Global Biodiversity Framework, nothing should be reported?	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	pls, bear in mind this AR could be contradictory to the paragraph above, as here relevant global goals are mentioned while above only the GBF is included.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	to be added " when applicable"	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)

Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	we would include a reference to some internationally recognized standards to be considered in this regard	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E4 Biodiversity , when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E4 Biodiversity, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	E4	ESRS E4 - Objective	1.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	E4	ESRS E4 - Objective	5.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Reporting on a biodiversity transition plan, if already in place and made public, should be mandatory as suggested, as it is assumed to provide the most relevant information regarding an undertaking's biodiversity measures. The removal of data points on resilience of the strategy from E4-1 and inclusion of these data points in ESRS 2 SBM-3 increases efficiency on reporting regarding the strategy's overall resilience. The sole focus of E4-1 on transition plan makes sense for both preparers and readers of the sustainability report. However, it should be possible to report on a biodiversity transition plan even if it defers from the Global Biodviversity Framework. This is an addition compared to current ESRS and not a simplification. We recommend to include the Global Biodiversity Framework as an example.	E4	Disclosure Requirement E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Reporting on a biodiversity transition plan, if already in place and made public, should be mandatory as suggested, as it is assumed to provide the most relevant information regarding an undertaking's biodiversity measures. The removal of data points on resilience of the strategy from E4-1 and inclusion of these data points in ESRS 2 SBM-3 increases efficiency on reporting regarding the strategy's overall resilience. The sole focus of E4-1 on transition plan makes sense for both preparers and readers of the sustainability report. However, it should be possible to report on a biodiversity transition plan even if it defers from the Global Biodviversity Framework. This is an addition compared to current ESRS and not a simplification. We recommend to include the Global Biodiversity Framework as an example.	E4	Disclosure Requirement E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	The removal of AR 4 and all reference of other E4 datapoints to AR 4 is welcome, as this led to a high level of repetition and unnessecary detail regarding the undertaking's biodiversity measures with little to no value / relevance for users of the sustainability report.	E4	Disclosure Requirement E4-1 - Transition plan for biodiversity and ecosystems	AR 4
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	This requirement was moved from IRO-1, which is welcomed. However (within IRO-1) it should be clarified that for sectors where it is not to be excpected that there are own sites of an undertaking with material IROs reg. biodiversity (e.g., withtin the financial services sector), no detailed analysis of all sites of the undertaking is required as part of the DMA.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	Removal is welcome as other regulation already drives the requirements regarding ESG risk management and there is no need to further address this within ESRS, especially for the financial services sector.	E4	Disclosure Requirement E4-6 - Anticipated financial effects from material biodiversity and ecosystem-related risks and opportunities	n/a
Excels	Allianz SE	Insurance	Germany			I disagree	NEW requierement: Divergence with other E-beyond metrics sections that are only applicable to own operations. Ammended DR 21 expand the application of Metrics for value chain. Request to have back original scope own operations. Biggest probelm is that metrics are not related to own operations anymore, which means that value chain is included from now on. This is a huge increase of burden for financial institutions due to the complexity of the value chain of financial institutions and the dependency of the data availabilty coming from real economy. Many companies do not disclose biodiversity data and, in addition, in the future less companies will be obliged to report under CSRD. This would require us to use estimates and very volatole numbers that depend on data providers methologies. Not one established methodology.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	use of "can" shall be avoided and only use "shall" or "may"	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 4
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	Site shall be clearly connected to own or direct operations	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Allianz SE	Insurance	Germany			I disagree	AR suggests the worst case if the site is in a biodiversity sensitive area "is highly likely that ist activities will negatively affect the area" We think this is an inappropriate assumption. AR makes prejudging assumptions for the DMA which contradict the DMA principles.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Allianz SE	Insurance	Germany			I disagree	The guidance to be complied with by undertakings when determining whether a site is near a sensitive are makes more complex than before.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Allianz SE	Insurance	Germany			I disagree	new requierement: disclosure of impact metrics fo value chain IRO is complex as data is not availible and metholdoogies are not mature yet. It shall be voluntary to disclosure metrics for value chain impacts	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Allianz SE	Insurance	Germany			I disagree	Additional metric requirement. Although "ecosystem services" is mentioned in the delegated act in several instances, it is not a metric requirement in the delegated act.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Allianz SE	Insurance	Germany			I disagree	Additional metric requirement. Although "drivers of [...] ecosystem change" is mentioned in the delegated act (ESRS E4.AR20f), it is not a metric requirement in the delegated act.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Allianz SE	Insurance	Germany			I disagree	new requierement: disclosure of impact metrics fo value chain IRO is complex as data is not availible and metholdoogies are not mature yet. It shall be voluntary to disclosure metrics for value chain impacts	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We disagree with this new (!) data point. As a matter of principle, no new data points should be included in the revised ESRS. We clearly disagree with the requirement for disclosures for IROs on location or asset basis. This data point also places a heavy additional burden on companies, as the reporting level would become highly disaggregated if reporting had to be done at the location or asset level. Furthermore, information on PAT is generally not specific to a location or asset level, but rather at a higher level. Reporting at such a low level of aggregation would therefore not be effective.	E4	E4 - Objective	9.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This is also a new data point. We therefore reject it on principle. In addition, this data point is highly complex and uncertain, as it remains unclear what is meant by nature metrics and how these indicators are to be collected. A design such as this will lead to heterogeneous reporting, which cannot contribute to standardized and comparable reporting.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	There seems to be a wrong assignment in E4-5 AR 6 is rather related to E4-2	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	E4	E4-4 - Targets related to biodiversity and ecosystems	17.
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	The disclosure of dependencies has been further weakened (to 'when relevant') in the new paragraph 1. The TNFD suggests to remove the specification 'when relevant' in paragraph 1 and reinstate, either at the level of ESRS 2 or at the level of the individual topical standard, a similar text to the Set 1 paragraphs, such as the one asking for disclosure of 'the nature, type and extent of the undertaking's material (...) dependencies (...) related to [biodiversity and ecosystems], and how the undertaking manages them'.	E4	E4 - Objective	1.
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	Comment related to former ESRS E4 IRO-1: The TNFD does not support the proposed removal of the following requirement as it reduces alignment with TNFD : Disclosure of whether and how actual and potential impacts on biodiversity and ecosystems at own site locations and in value chain have been identified and assessed (para 17(a) of Set 1) The TNFD also disagrees with the deletion of ESRS E4 paragraph 17(c) on whether and how the undertaking identified and assessed transition and physical risks and opportunities related to biodiversity and ecosystems, including assessment criteria applied based on its impacts and dependencies	E4	E4 - Objective	1.
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	The TNFD welcomes the retention of the provisions related to the disclosure of material sites negatively affected biodiversity-sensitive areas and the activities negatively affecting those areas (para. 20, ESRS E4 Exposure Draft). The TNFD notes some divergence with the TNFD recommended disclosure Strategy D, which recommends the disclosure of the locations of assets and/or activities in the organisation's full value chain, including where possible upstream and downstream value chain(s). The TNFD also recommends under Strategy D disclosure of assets and/or activities in sensitive locations beyond those deemed material	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	We do not support the option to report only metrics for locations relevant to existing sustainability objectives (AR7(b)). Such metrics should be reported in addition to (rather than in lieu of) those related to locations where the undertaking has identified material impacts, risks and opportunities arising from its direct operations – or locations that are significant drivers of material impacts, risks and opportunities. Otherwise, there is a risk that companies will significantly narrow the scope of locations disclosed, despite material risks to operations.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	This is highly relevant, but in the DASB view, the impact is negated because it will only be reported by companies large enough to fall under the ESRS. DASB imagines some might have a significant impact on their surroundings (in the Dutch context, exceeding local, municipal, and even provincial environmental regulations), yet are still too small to fall under the CSRD. As a result, this ultimately provides neither control nor insight.	E4	E4-4 - Targets related to biodiversity and ecosystems	20.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Most of the drivers are difficult to quantify, except when it suddenly becomes clear (e.g., in the case of invasive species). Many species arrive without ever becoming invasive. A species can only be classified as invasive once it has already become invasive — at which point it is too late. This makes steering, reporting, and similar activities in the early stages very difficult. The same applies to terrestrial and marine habitat change: while terrestrial change can, in some cases, be reversed or managed, this is much harder for the other two.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Particulate matter/pollution is a much more important and urgent issue for the Netherlands and Western Europe than microplastics. Pollutants are too often perceived as being gaseous (in the air) or dissolved (in water).	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Can consider the use of scenario analysis when defining...? Wouldn't it be much more practical and clearer to align this across all ESRS? After all, scenario analysis is scenario analysis...	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 4
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	Sites differ considerably and often (or in most cases) do not share the same measurement indicators. For companies large enough to fall under the ESRS, this often involves multiple sites with mostly different, site-specific measurements, which together produce too much of a data jumble to be truly steerable. I miss clarity and a sense of guidance or direction.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Suggestion to add the undertakings dependencies (resulting from the identified impacts) because they can cause significant supply chain discruption.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Suggestion to add a description how the organisation assessed / identified the biosensitive area's near sites of its own operations.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	For the quality of the (D)IRO assessment it is very important that the undertakings use the LEAP approach as provided by TNFD. This is mentioned in ESRS 2 AR 22 for para 26, but I can imagine users can oversee this when applying E4. I would recomment to make a reference to amended ESRS 2 paragraph 26 and related AR 22 in the objective of the E4 standard, justs as is included a reference to ESRS 2 in paragraph 5.	E4		
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The scenario analysis is part of the LEAP approach that is performed, good to make this clear with a link to the LEAP approach, mentioned in ESRS 2 AR 22 for para 26, so that also the TNFD guidance for scenario analysis can/will be used as a basis and as part of the LEAP approach.	E4	E4-2 - Policies related to biodiversity and ecosystems	13.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	This is not specifically for financial institutions, should there also be an additional description for financial institutions? (TNFD also pays attention to this seperately).	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Target setting is part of the LEAP approach that is performed, good to make this clear with a link to the LEAP approach, mentioned in ESRS 2 AR 22 for para 26, so that also the TNFD guidance for target can/will be used as a basis and as part of the LEAP approach. Adding this reference will increase quality of target setting.	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Suggestion to add 'dependencies' (also apply consistently in following paragraphs), since identifying and adressing material dependencies are crucial for the organisations resilience.	E4	E4-4 - Targets related to biodiversity and ecosystems	19.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	paragraph 20 only focusses on own operations, but for a lot of countries the most material (D)IRO's related to biodiversity manifest in the upstream value chain. Also 21 is only scoped to own operations (refers to 20), which also limits the scope to own operations. Furhermore ESRS 2 has more general requirements where you asess the level of aggregation and disaggregation. We suggest to align with ESRS 2.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Please note that this comment relates to objective 8 (can not be inserted / selected in this file): It shows several legislations but there is no data-point referencing to it afterwards. As this only should be discloses when relevant and material, this probably will be adressed if it is relevant. It might be misleading to include the frameworks in the objective as it could lead to reporting immaterial information. In the log of amendments file I read it that it is now included because it was used as a source for the standard, then it can better be included in the standard as a source then as an objective.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Objective 8.) with 5 references to other EU Regulations increase complexity and uncertaintiy for preparer of sustainability statement. Please delete these references.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	The IBAT Alliance licences commercial access to the IBAT platform. I think there shouldn't be a reference to a commercial plattform in a EU regulation.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	The paragraph doesn't consider material dependencies. "dependencies when relevant". The paragraph should be rephrased to ensure dependencies are not considered and after thought i.e. "when this topic relates to material impacts, DEPENDENCIES, risks and opportunities." This would align it with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming)	E4	E4 - Objective	1.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming).Should be "if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, DEPENDENCIES, risks and opportunities, it shall disclose this fact;"	E4	E4 - Objective	5. (a)
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming).Should be "the undertaking may present the description of its material impacts, DEPENDENCIES, risks and opportunities, in accordance with"	E4	E4 - Objective	5. (b)
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming).Should be "When material impacts, DEPENDENCIES, risks or opportunities arise at local level, it is important to consider appropriate disaggregation or aggregation of the reported information,"	E4	E4 - Objective	9.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I disagree	There is a missing reference to the use of scenario analysis here. Adding this specific reference would align the ESRS with the TNFD guidance and the forthcoming ISO on Natural Capital Accounting for Organizations. Please add the following sentence "Tranisition plans should be based on scenario analysis as referenced in the TNFD and can also use future looking natural capital balance sheets (NCBS) as set out in ISO 14054 natural capital accounting for organizations. The use of underpinning scenarios and future looking NCBS helps to support the organisation's financial planning and target setting"	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I disagree	Missing should - "The undertaking can consider the use of scenario analysis when defining its policies, actions and targets." How can an organisation consider its risk and opportunities into the future without scenario based analysis? Change to should - "The undertaking SHOULD consider the use of scenario analysis when defining its policies, actions and targets.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 4
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I disagree	This is missing a requirement of ensuring that the offsets are considered as part of the application of the mitigation hierarchy. Please add "reference should be made as to the application of the mitigation hierarchy when reporting the use of biodiversity offsets"	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies	E4	E4-5 - Metrics related to biodiversity and ecosystems change	19.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E4. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E4	E4 - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Para. 1 states that information on financial effects is expected under [Draft] Amended ESRS E4, which is a valuable acknowledgement given that such information on financial effects is highly decision-relevant, not only for the undertakings themselves, but also for other primary users of their sustainability statements, including those in the financial sector. However, [Draft] Amended ESRS E4 no longer contains specific DRs on financial effects on biodiversity since the former ESRS E4-6 is proposed to be removed. Financial effects are also not included in any other disclosure requirements in ESRS E4, which makes this statement somewhat void. Since nature-related financial effects can be substantial, the standards should ensure that they are considered in reporting on actual and anticipated financial effects under ESRS 2 SBM-3. If it proofs difficult to reinstate them as part of ESRS 2, they should at the least be included in the non-mandatory guidance.	E4	E4 - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	Comment to IRO-1-related DR in E4: We are concerned that [Draft] Amended ESRS E4 no longer contains explicit topic-specific instructions or guidance on how to conduct the materiality assessment regarding biodiversity and ecosystems (as set out in previous AR 4), and do not consider this information redundant as laid out in the Log of Amendments, since ESRS 2 does not cover topic-specific provisions. The references in [Draft] amended ESRS 2, AR 22 to location-specific considerations and the "LEAP approach" should be strengthened (see comments on ESRS 2). Further, we advise EFRAG to include the essence of ESRS E4, AR 4 to AR 6 into the NMIG for ESRS 2.	E4	E4 - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	[Draft] Amended ESRS E4 para. 3 explicitly states that undertakings shall report only on a sub-topic, when material. While it is reasonable to report only on material sub-topics, the sub-topics of [Draft] Amended ESRS E4 consider different levels and are not mutually exclusive. For example, the sub-topic "drivers of biodiversity and ecosystem change" addresses the reasons for biodiversity and ecosystem change, while other sub-topics address biodiversity loss/change itself (e.g. status of species, extent and condition of terrestrial and marine ecosystems; and ecosystem services). Focussing on one of these topics while neglecting another is not reasonable. We therefore recommend to include a clarification in E4, para. 3, on the interlinkages between sub-topics, and to ensure that both drivers and the loss of biodiversity are addressed.	E4	E4 - Objective	3.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	[Draft] Amended ESRS E4 in para. 4 only acknowledge a sub-set of drivers of change in biodiversity and ecosystems. The expression in brackets "terrestrial and marine habitat change, invasive species" should be deleted.	E4	E4 - Objective	4.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The standard mainly refers to terrestrial and marine ecosystems, while freshwater ecosystems are not explicitly mentioned / included. Given that freshwater habitats are among the most threatened ecosystems globally and provide critical services such as drinking water supply, irrigation, and biodiversity corridors, we recommend explicitly integrating freshwater ecosystems into the scope of ESRS E4. Extend para. 4: "the extent and condition of terrestrial, freshwater and marine ecosystems;"	E4	E4 - Interaction with other ESRS	4.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Glossary: We highlight that the definition of "biodiversity" in para. 7 differs slightly from the one in the glossary. From a conservation perspective, we strongly recommend aligning both definitions with the Convention on Biological Diversity (CBD), Article 2: „Biological diversity means the variability among living organisms from all sources including, inter alia, terrestrial, marine and other aquatic ecosystems and the ecological complexes of which they are part; this includes diversity within species, between species and of ecosystems." (https://www.cbd.int/convention/articles?a=cbd-02). Using the CBD definition would ensure consistency with the globally recognised reference framework.	E4	E4 - Interaction with other ESRS	7.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Using "objective" in this sentence is confusing, since the objective of the standard is already introduced in para. 2. Delete "The objective of" and start with "This Standard shall…"	E4	E4 - Objective	8.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Glossary: The GBF has a vision for 2050, a mission for 2030, four goals for 2050, and 23 targets for 2030. The phrase "To take urgent action to halt and reverse biodiversity loss" is part of the mission for 2030. We therefore recommend a slight change in wording for [Draft] Amended ESRS E4-1 para. 8.a.) to better align with the terms and concepts used in the GBF: "the vision and mission of the Kunming-Montreal Global Biodiversity Framework and …";	E4	E4 - Objective	8. (a)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	ESRS E4 para. 10 is rather confusing: it states that climate change and pollution are covered only in E1/E2, but sub-points a–d indicate their impacts are addressed in E4. To avoid confusion, we recommend clarifying that ESRS E1 and E2 cover the drivers of climate change and pollution themselves, while ESRS E4 addresses their specific impacts on biodiversity and ecosystems. We suggest to modify the text of para. 10 in the following: delete "these drivers are covered in this Standard, except for", so that it reads "…alien species. Climate change and pollution are mainly addressed by [Draft] Amended ESRS E1 Climate Change and [Draft] Amended ESRS E2 Pollution. The main points of interaction…"	E4	E4 - Interaction with other ESRS	10.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Glossary: We recommend to adapt the glossary entry for "Drivers of ecosystem and biodiversity change" (prev. "Impact drivers") in the following way: 1.) specify "exploitation" similar to the wording in ESRS E4 para. 10 "direct exploitation of organisms; 2.) Substitute "indirect impact drivers" with "indirect drivers of ecosystem and biodiversity change" to reflect the new title of the entry.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We recommend to delete "when it has in place a biodiversity and ecosystems transition plan" from para. 11. This condition is already covered in para. 12.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Disclosure under ESRS E4-1 should be mandatory whenever a transition plan exists („if… has in place"). The additional condition of publication ("and has made public") should be deleted. This condition would set incentives for non-disclosure and lead to a duplication of published information, which should both be avoided. If EFRAG were to delete the condition of publication, users would also understand that non-disclosure according to E4-1 indicates the absence of a transition plan, which is considered a relevant information in itself.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We noticed that for some NMIG entries related to Biodiversity and Ecosystem the numbering is wrong: NMIG 1 and 2 should both be for para. 12.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The GBF has a vision for 2050, a mission for 2030, four goals for 2050, and 23 targets for 2030. The phrase "To take urgent action to halt and reverse biodiversity loss" is part of the mission for 2030. We therefore recommend a slight change in wording for para. 12 to better align with the terms and concepts used in the GBF: "...so it is aligned with the global mission of halting and reversing biodiversity loss".	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	AR 1 and NMIG 1 (note that paragraph numbering is wrong in NMIG): We recommend to use similar wording as in the transition plan for climate change mitigation, i.e. „key features" instead of "elements"	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Regarding ESRS E4-1 and its associated AR 1 and NMIG 2, we find misalignments in the references to the GBF and EU Biodiversity Strategy. We suggest: 1.) Embed the possible connection of the transition plan to further goals, concepts, strategies and frameworks in para. 12 with: "... as stated in the Kunming-Montreal Global Biodiversity Framework or other relevant local, national, EU and global public policy goals and targets related to biodiversity and ecosystems, it shall disclose its key features."; and 2.) Include references to relevant GBF goals and targets in a separate NMIG, to shift the focus away from providing guidance solely on the EU Biodiversity Strategy, which is not part of the mandatory para. 12 anymore.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Acronyms: the acronym list should include "GBF" – Global Biodiversity Framework since this abbreviation is used in ESRS E4, but not introduced before	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We note that para. 15 on actions and resources related to avoid, mitigate and remediate biodiversity- and ecosystem-related impacts remains unspecific. This risks placing undue emphasis on biodiversity offsets, (para. 16). We recommend carefully reviewing this disproportionate level of detail. Offsets should not become the primary focus, as they are not necessarily a net gain for nature, and may even divert attention from more effective biodiversity measures.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Since publication of the delegated act for the ESRS in 2023, the global community has agreed on a new mechanism for the Fair and Equitable Sharing of Benefits from the use of Digital Sequence Information on Genetic Resources (DSI) – the Cali fund. With updating the ESRS we see it as important to reference this global agreement and to offer undertakings, that make use of digital sequence information, guidance to consider this when disclosing their relevant actions. We therefore suggest to add an additional entry to the Non-Manadatory Implementation Guidance relating to E4-3 (para. 15): „When disclosing their key biodiversity and ecosystem-related actions and significant resources allocated to their implementation, users of digital sequence information on genetic resources in sectors that directly or indirectly benefit from their use in their commercial activities, can disclose their monetary contributions to the Cali Fund for the Fair and Equitable Sharing of Benefits from the use of Digital Sequence Information on Genetic Resources (DSI)."	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The term "biodiversity offsets" should be added to the glossary. EFRAG can rely on the work of IUCN: https://iucn.org/resources/issues-brief/biodiversity-offsets	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Glossary: replace the term "local and indigenous peoples" in AR 5 for para. 17 with the internationally more common wording of "indigenous peoples and local communities".	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I agree	We support the decision of EFRAG to maintain the concept of biodiversity-sensitive areas, since we also consider this location-specific information as highly decision-useful. It provides essential insights into impacts, risks and opportunities that cannot be captured through aggregated reporting alone. Even though E4-5 has lost in topical granularity, we generally welcome that [Draft] Amended ESRS E4-5 now foresees the mandatory disclosure of metrics related to material impacts on biodiversity and ecosystems.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	From a conservation perspective, we strongly recommend that AR 8 para. 20(b) specifies that undertakings should also take into account the type of buffer zone of biodiversity-sensitive areas, along with the resulting legal requirements, obligations and prohibitions. For example, the buffer zones of biosphere reserves are an integral part of these large protected areas, functioning as a 'maintenance zone' with a buffer function for the core zone, and are usually subject to strict regulatory requirements (e.g. comparable to a nature reserve regulation). For other types of buffer zones, measures in line with industry best practice standards may be more appropriate. This distinction is essential to ensure meaningful and comparable disclosure.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	AR 9 only acknowledges a sub-set of drivers of change in biodiversity and ecosystems.The expression in brackets "terrestrial and marine habitat change, invasive species" should be deleted.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Include "freshwater ecosystems" in item (c)	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Glossary: We recommend including a definition of „state of species".	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Regarding the structure of ESRS E4-5, it might make sense to swap order of current paras. 20 and 21 to first mention requirements (in this case metrics) related to ESRS 2 GDR-M and then other metrics specific for the topical standard similar to other DRs	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	NMIG 14 is highly welcome. However, it is particularly helpful for the guidance on how to conduct the materiality assessment regarding biodiversity and ecosystems and should belong with this section of the NMIG for ESRS 2 IRO-1 instead of ESRS E4-5.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	NMIG: The term "Natural Resources" was deleted from the Glossary, but is still used within the NMIG. Avoid use of the term in NMIG.	E4	E4 - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We recommend to move the requirement to disclose "the specific environmental conditions and characteristics of the area where the impact is occurring;" from ESRS 2, para. 41 (b) to ESRS E4-5. Providing contextual information on the environmental conditions and characteristics of an area where the impact occurs, is most relevant for biodiversity and ecosystem metrics. The provision could be formulated as follows: "When providing contextual information on the metric, in accordance with ESRS 2 GDR-M, the undertaking shall explain the environmental conditions and characteristics of the area where the impact is occurring;"	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	1) The sentence "Transition plans for biodiversity and ecosystems are expected to address similar elements than transition plans for climate change mitigation" shall be removed. The reference to similarity with climate transition plans is not appropriate: the two areas are fundamentally different, as are the related requirements. Climate transition plans rely on globally available metrics and quantitative pathways, whereas for biodiversity, such methodologies and comparable targets do not exist at a global level. 2) the compatibility with GBF shall be removed or explained in detail. The text requires that any transition plan be compatible/aligned with the targets of the GBF. A similar formulation exists for climate (referring to compatibility with the 1.5°C target), which is currently under discussion, as it is considered not directly applicable to companies. The same issue arises here with biodiversity. The GBF objectives are designed to guide public policies and national action plans, not to be directly applied to corporate business models. In this context, it is unclear what it means for a company to have a strategy or business model "compatible" with such objectives. The requirement is difficult to interpret and cannot be verified.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	With this new wording it is not clear which site should be reported (please see comment on AR 7 below). The term "location" is not very clear, please clarify if "location" refer to single sites or an aggregation of type of activities or geographies. It is reccomended consistency of wording in all the environmental ESRS	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The criteria identified in letter a), b), c) seems to require the disclosure on all the location with IRO + all the sites prioritised internally + the assets (and is not clear why we are not referring anymore to locations) with negative interactions with biodiversity areas. The interaction of the 3 points could lead to a ling ist of location to disclose. It should be clarified that the intention is not to require disclosure for every single site, but rather a limited number of representative sites selected according to prioritisation criteria defined by the company	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	In an attempt to clarify the concept of "near," the text paradoxically ends up considering as near any site "not inside" a sensitive area. This would effectively imply conducting ad hoc analyses for hundreds of sites (all those not overlapping), in order to identify a science-based buffer based on the ecological specificities of each site. This represents an operational and documentation burden that is entirely disproportionate to the goal of simplification. Moreover, IBAT does not provide a buffer on a scientific basis; it is the user who enters the desired buffer to perform the mapping. Finally, it should be noted that ESRS is a disclosure standard, designed to harmonize reporting across companies, not to prescribe detailed operational management of impacts, which is addressed through other regulatory frameworks. The current wording of AR 8 risks turning the standard into a de facto operational requirement, going beyond the intended purpose of ESG disclosure	E4	E4-5 - Metrics related to biodiversity and ecosystems change	8.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The section requires reporting metrics on "relevant" concepts (e.g., drivers of biodiversity loss, species status, ecosystems, ecosystem services), but does not specify which metrics to adopt or the level of detail required. On one hand, this allows for flexibility; on the other, in a disclosure context subject to assurance, it is problematic because it leaves wide room for subjective interpretation and does not ensure comparability between companies. Moreover, it does not provide parameters to assess the adequacy of the selected metrics. It is recommended to specify whether we are referring to impact metrics (of the company on these topics) or to ecological status metrics of the area and species	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	3.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We support the changes proposed, especially the deletion of the resilience analysis required in current paragraph 13. However, we believe the datapoint in [DRAFT] paragraph 12 should remain voluntary. The notion of transition plan for biodiversity and ecosystems remains unclear at this stage, especially on how to assess alignment. While companies are trying to report under the TNFD framework, the CSRD should not include a mandatory DR while the topic is not yet mature.	E4	E4-1 - Transition plan for biodiversity and ecosystems	1.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	In any case, it should be maintained that reporting on the transition plan is only required once the transition plan has been implemented and published. The introduction of such a transition plan should remain voluntary. On the positive side, the disclosure requirement in ESRS E4 only applies if a company voluntarily draws up a transition plan for biodiversity and ecosystems. However, I take a critical view of the transition plan itself: as soon as biodiversity is identified as a material issue, there is indirect pressure to draw up a plan or to justify why no plan is in place. In contrast to the climate transition plan, there is a lack of reliable data, standardised methods and key performance indicators for biodiversity. The complexity of ecological relationships, the high cost of monitoring and the lack of standardisation make the transition plan difficult to implement and potentially ineffective.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	With the increased scope of SHALL for sub-topics, the reporting scope is increasing. In particular AR 9 for para. 21 (Metrics related to biodiversity and ecosystems change) and point c) and d) might be challenging to report on in a meaningful way without undue costs/systems.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	There are not necessarily common state of nature metrics being monitored across a large portfolio, so difficult to aggregate. Depending on interpretation can result in costly/complex implementation. State of nature is not linked to operational control. For renewable assets which are large and open and integrated with many other activities in the area - state of nature can be particularly challenging to measure on as its results may not be linked to ones own operations. Recommend to remove - or have longer phase-in for companies to identify meaningful and cost efficient ways of measuring.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Building on comment for AR 9 - these additionnal requirements/specifications to the metrics are likely to drive complex reporting and data collection/assessments with high costs of implementation. Recommend to remove - or have longer phase-in for companies to identify meaningful and cost efficient ways of measuring.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I agree	The further clarification of interactions between E4 and other standards was much needed and we agree with it. This has been a constant topic in our discussions with clients.	E4	E4 - Interaction with other ESRS	10.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	I understand the scientific rationale behind structuring ESRS E1 (Climate) separately from ESRS E4 (Biodiversity), and at the same time listing climate change as one of the direct drivers of biodiversity loss within E4. This reflects well-established evidence. However, in practice the overlap creates challenges for reporting entities. From a preparer's perspective, it is difficult to explain why climate is treated as both a standalone standard and as a subtopic within biodiversity. Many companies fear they must conduct two separate assessments, which risks duplication of effort. In particular, the assessment of materiality is unclear: most companies, outside of a few highly emission-intensive sectors, cannot reasonably demonstrate that their own emissions directly cause biodiversity loss. This makes it difficult to apply the E4 requirement consistently. I suggest that EFRAG clarify the intended relationship: results from E1 should be cross-referenced in E4, with companies only expected to explain the biodiversity implications of their climate analysis. Additional assessment should only be required if a company's emissions are significant in absolute or sectoral terms. Such clarification would increase user-friendliness, reduce unnecessary reporting burden, and preserve the scientific integrity of highlighting climate as a biodiversity driver.	E4	E4 - Interaction with other ESRS	10. (a)
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	The notion of "transition plan" is not yet clearly defined. Companies are currently exploring the best ways to develop action plans on this highly complex subject, whether through national or international initiatives, but no official certification of such analyses and plans exists to date. Making this datapoint mandatory, even with precautions (i.e. if the company has a transition plan and has published it), would discourage companies from taking initiatives, as it would trigger compulsory verification by auditors without existing auditing standards. Furthermore, "so it is aligned" with the Global Biodiversity Framework (GBF) lacks clarity. It would be more appropriate to refer instead to "consistency" with the objectives of the GBF.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The distinction between a "transition plan" and an "action plan" remains unclear and has already led to numerous discussions with auditors during the first reporting exercise, even in the case of climate transition plan. Moreover, as previously suggested, we propose to refer to "consistency" with relevant global goals, rather than "to become compatible with" them.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We would appreciate further clarification on the following points: what exactly is meants by the "action plans" reffered to? Should offsetting be considered voluntary or compulsory?	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Point (b) of AR9 seems to introduce a new obligation for undertakings, as metrics related to the state of species were previously optional, even if the subtopic was considered material.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Point b) of AR8 introduces the new notion of a "buffer zone" which is neither defined in this AR, nor in the Glossary. It should be suppressed.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	An explanation what is meant by "biodiversity offsets" would be helpful. Either in the ESRS E4 or in the glossary.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	18.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Is this applicable for only own operations or the entire value chain? Further explanations could help.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E4 Biodiversity and Ecosystems, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	E4	E4 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary duplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	E4	E4 - Objective	5.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	It should be clarified that this is intended to be a reference to a transition plan, regarding biodiversity (i.e., the mention of nature in a climate transition plan should not be sufficient to trigger these disclosure obligations)	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Amended ESRS E4 introduces a requirement for undertakings to disclose biodiversity transition plan features when such plans exist and are public. As users of transition plans, AFME supports the disclosure of transition plans on a voluntary basis if an entity has one (as with E1). AFME does not support the mandatory disclosure of biodiversity transition plans, and EFRAG should clarify that such disclosures are voluntary and subject to an entity's materiality assessment. While framed as conditional ("if the undertaking has in place"), there is a risk that this requirement could create an expectation that organisations must develop biodiversity transition plans aligned with the Kunming-Montreal Global Biodiversity Framework. In addition, climate transition plans disclosed under E1 may reference nature/biodiversity and include biodiversity-related metrics but would not be considered a standalone "transition plan" for biodiversity and ecosystems. It is unclear how organisations who integrate nature and biodiversity into their existing transition planning would meet this new E4 disclosure requirement.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	EFRAG should consider removing ESRS E4 AR 5 (engagement with indigenous peoples) associated with paragraph 17 as this undermines EFRAG's stated simplification goals. If the objective is to reduce prescriptive guidance and rely on ESRS 2 GDR-T frameworks, then AR5 represents an arbitrary exception. Moreover, AR5 introduces problematic scope creep by embedding social governance mechanisms within an environmental disclosure requirement. ESRS S3 (Affected Communities) already addresses indigenous people.	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	This marks an expansion of scope. While the current ESRS E4 (para 37) limits metrics to the undertaking's own operations, the revised draft removes that clarity. If the downstream value chain is material, a metric may now be expected, though its absence of definition allows for interpretive flexibility.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We request to clarify the cliteria of "material impacts, risks and opportunities" for disclosure. There is concern that each companies has defferent interpretation of this criteria. It should be discussed.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We request to clarify the cliteria of "material impacts, risks and opportunities" for disclosure. There is concern that each companies has defferent interpretation of this criteria.It should be discussed.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (a)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We request to clarify the cliteria of "material impacts, risks and opportunities" for disclosure. There is concern that each companies has defferent interpretation of this criteria. It should be discussed.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I agree	The new guidance on disaggregating locations and defining sensitive areas is primarily viewed as a useful clarification by ETSA member.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Value chain is mentioned only once in the whole ESRS – now referring to traceability of products/raw materials with actual or potential biodiversity impacts. Given the difficulty to implement EPD across industries we are wondering what the expectations are here.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The change from may to shall for this requirement can reduce flexibility for companies	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The requirement to describe policies related to the traceability of products, components of raw materials, with material or potential impacts on biodiversity and ecosystems in the entire value chain is burdensome. The same goes for the requirement to describe policies for own sites in/near sensitive areas	E4	E4-2 - Policies related to biodiversity and ecosystems	14.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While this requirement can be useful, it might create additional burden	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 6
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Prioritising sites in or near sensitive areas can be beneficial	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	IBAT	NGO	United Kingdom			I partially agree and partially disagree	Paragraph 14a on 'actual or potential impacts' shoud include 'impacts and dependencies' to make it relevant to businesses	E4	E4-2 - Policies related to biodiversity and ecosystems	2.
Excels	IBAT	NGO	United Kingdom			I partially agree and partially disagree	On paragraph 14b, we recommend adding the wording "sites in its own operations and its key sourcing locations that are in or near a biodiversity sensitive area" which would support the paragrpah above focusing on traceability across the upstream and downstream value chains	E4	E4-2 - Policies related to biodiversity and ecosystems	2.
Excels	IBAT	NGO	United Kingdom			I partially agree and partially disagree	IBAT is highly relevant by providing the datapoints in relation to identifying biodiversity sensitive areas. It would be good to mention here what the definition of 'biodiversity sensitive area (s)' are - making specific reference to the NMIG guidance of provide example datapoints as a footnote. We recommend adding the wording 'may be' to 'biodiversity-sensitive area(s) that may be negatively affected (name and type)' given that with biodiversity data, it might not always reflect the current situtation 100% of the time, accounting for the sensitiveness of nature.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (b)
Excels	IBAT	NGO	United Kingdom			I partially agree and partially disagree	Similar to the comment above, it would be beneficial to mention the datapoints suggested for biodiversity sensitive areas, incorporating the suggestions published by EFRAG in late 2024 on identification of biodiversity sensitive areas such as Protected Areas from the Protected Planets through IBAT.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	IBAT	NGO	United Kingdom			I disagree	IBAT's Disclosure Preparation Report provides some level of guidance on buffers for certain site types. However, this list is not as comprehensive and would not be appropriate for it to be mentioned as the industry standard. We suggest that IBAT is not mentioned directly here. Further research is being conducted by the IBAT alliance partners. Consider including references to IFC PS6 or the clear, Good Practices in Collection of Biodiversity Baseline Data, and sector-specific standards, such as GRI Sector Standards or TNFD sector-specific guidance where businesses can refer to for a more comprehensive breakdown and understanding of how they can consider their area of influence when conducting this analysis.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IBAT	NGO	United Kingdom			I partially agree and partially disagree	(b) Clarifying what state of species is - will organisations be able to refer to the IUCN Red List of Threatened Species for this? Consider making reference to the NPI species metric which considers metrics on extinction risk and relative abundance.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	IBAT	NGO	United Kingdom			I partially agree and partially disagree	Recommend providing definition of threatened species. Species assessed as CR, EN or VU in the global/and or national IUCN red lists and/or species assessed as threatened via national/local assessments.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	IBAT	NGO	United Kingdom			I partially agree and partially disagree	On paragraph 12 - the existing text can be misleading for companies not having to consider creating or disclosing a transition plan if they do not already have one publicly available. The goal of reporting is for companies to understand their DIROs but also then take the next step in creating an action plan, a transition plan on how they can look to further avoid or mitigate these impacts in the future. Consider rephrasing the text to remove a notion of businesses only needing to report their transition plans if they have 'made public' their plans.	E4	E4-1 - Transition plan for biodiversity and ecosystems	1.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Making biodiversity planning mandatory is necessary. However, focusing on transition planning seems too far ahead of where most companies currently are in terms of assessing their impacts to biodiversity.	E4	E4-1 - Transition plan for biodiversity and ecosystems	1.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Partially agree-partially disagree	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	The notion of "transition plan" is not yet clearly defined. Companies are currently exploring the best ways to develop action plans on this highly complex subject, whether through national or international initiatives, but no official certification of such analyses and plans exists to date. Making this datapoint mandatory, even with precautions (i.e. if the company has a transition plan and has published it), would discourage companies from taking initiatives, as it would trigger compulsory verification by auditors without existing auditing standards. Furthermore, "so it is aligned" with the Global Biodiversity Framework (GBF) lacks clarity. It would be more appropriate to refer instead to "consistency" with the objectives of the GBF.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The distinction between a "transition plan" and an "action plan" remains unclear and has already led to numerous discussions with auditors during the first reporting exercise, even in the case of climate transition plan. Moreover, as previously suggested, we propose to refer to "consistency" with relevant global goals, rather than "to become compatible with" them.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We would appreciate further clarification on the following points: what exactly is meants by the "action plans" reffered to? Should offsetting be considered voluntary or compulsory?	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Point (b) of AR9 seems to introduce a new obligation for undertakings, as metrics related to the state of species were previously optional, even if the subtopic was considered material.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Point b) of AR8 introduces the new notion of a "buffer zone" which is neither defined in this AR, nor in the Glossary. It should be suppressed.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We believe the requirement in ESRS E4, paragraph 14b, should not be triggered if the site does not pose any specific risks or negative impacts on the area in question. For instance, having a sales office or similar activities like normal housing would normally not require reporting. Hence, we believe that the size or type of activities needs to be considered internally as part of the materiality assessment before requiring any external disclosure requirements, also in terms of policies.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	DRSC	(National) standard setter	Germany			I disagree	Disaggregation will lead to too much detail level and will increase reporting workload. Although "appropriate disaggregation" is worded, a definition of "appropiate level" is needed.	E4	E4 - Objective	9.
Excels	DRSC	(National) standard setter	Germany			I disagree	This might be seen as an extension of the Delegated Act, as it is now proposed as a mandatory requirement (DA, E4.15 "The undertaking may disclose its transition plan..."); data point moved from "may" to "shall"	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: Clarification needed on what is meant with "has made public a transition plan". The sustainability report is publicly available	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: The DR "sites in its own operations that are in or near a biodiversity sensitive area" is still a huge, work-intensive disclosure. The simplification is highly questionable here.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: The para contains the term "action plan" (the undertaking shall describe the biodiversity offsets used in its action plans); however, "action plan" is not adressed in ESRS 2 GDR-A which this para refers to. This inconsistency should be adressed.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: A clarification should be added that this DR is related to actual impacts only.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: (1) The DR contains the term "direct operations" without saying what it is (the term should be explained). (2) The wording: "impacts, risks and opportunities arising from its direct operations" might create confusion as it it not consistent in itself. Impacts typically arise from the undertakings operations. In other words: The undertaking is the cause, and the effect results from this cause. The direction of the effect is: Undertaking -> Impact. For risks and opportunities this direction the opposite. Risks and opportunities - in most cases - have (financial) impacts on the undertaking but do not arise from the undertaking. Therefore, it should not be worded (all across the ESRS) that IROs arise from operations/undertaking etc. since the use of the term "arise" is correct for impacts only. Better word "impacts, risks and opportunities associated with or related to the undertaking/own operations etc."	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	DRSC	(National) standard setter	Germany			I disagree	The AR makes prejudging assumptions for the DMA which contradict the DMA principles. The AR suggests the worst case if the site is in a biodiversity sensitive area "is highly likely that its activities will negatively affect the area" We doubt, this assumption should be taken without the DMA.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	On AR8(b): The guidance to be complied with by undertakings when determining whether a site is near a sensitive are makes ot more complex than before. The discussion was already taken when developing the Set 1 in 2022; however, EFRAG might reconsider (1) to explicitly leave it to the undertaking to assess "near" or (2) label the AR as non-mandatory, i.e., move it to NMIG.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	The IBAT Alliance licences commercial access to the IBAT platform. There shouldn't be a reference to a commercial plattform in a EU regulation.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG A(9(a)): This seems an extension of the Delegated Act. Although "drivers of [...] ecosystem change" is mentioned in the delegated act (ESRS E4.AR20f), it is not a metric requirement in the delegated act, but in the ED it is.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG (AR9(b)): This seems an extension of the Delegated Act. Although "ecosystem services" is mentioned in the delegated act in several instances, it is not a metric requirement in the delegated act.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: The meaning of the first sentence is not clear.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: The meaning of this para is not clear. Probably it is meant to say that if an undertaking monitors an issue frequently by using a measure/a metric, this might indicate this metric is a material information.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The amendments are highly welcome. Please make clear that a reference to a transition plan is only necessary if there is a transition plan in place. If the undertaking does not have a transition plan in place it does not consequently have to disclose that this is the fact.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The amendments are highly welcome. Please make clear that a reference to a transition plan is only necessary if there is a transition plan in place. If the undertaking does not have a transition plan in place it does not consequently have to disclose that this is the fact.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E4	E4-2 - Policies related to biodiversity and ecosystems	13.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The added para. 14 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-2 - Policies related to biodiversity and ecosystems	14.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The added para. 14 is not necessary and should be removed or be made voluntary as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The added para. 14 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The added para. 14 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 2
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR 3 for para. 13 should be removed as it only adds irrelevant additional information. At least please make clear that AR 3 does not require a "not applicable" disclosure.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 3
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	AR 4 for para. 13 can be removed as it brings no additional information.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 4
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	15.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The added para. 16 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards. At least, please make clear that the undertaking does not have to disclose the fact that it does not have any offsets in place.	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E4	E4-4 - Targets related to biodiversity and ecosystems	17.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The added para. 18 is not necessary and should be removed as the reference to ESRS 2 GDR-P is sufficient. Otherwise it would differ from the structure of the other ESRS E standards. Additionally An explanation what is meant by "biodiversity offsets" would be helpful. Either in the ESRS E4 or in the glossary.	E4	E4-4 - Targets related to biodiversity and ecosystems	18.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	AR 5 for para. 17 should make clear that this is only an information but no disclosure requirement. FPIC reporting should be risk-based and focus on management systems.	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	N.a.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	19.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please make clear that para. 21 only refers to metrics for the own operations.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR 8 should make clear that IBAT is only one of many different tools to examine biodiversity sensitive areas.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR 9 is redundant as the sub-topics are already listed in ESRS 1	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The term "not feasible" is too subjective, creating significant audit risk. We recommend EFRAG provide further guidance to clarify this threshold.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Recommend EFRAG provide guidance that allows the use of practical alternatives like high-quality estimates.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Overall, the link between the biodiversity standard and other topical standards is clearer than in the previous version.	E4	General disclosures	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	In the objectives section, paragraph 9 the log of amendments states that the topic of sites is addressed in both ESRS 1 and ESRS 2. This objective paragraph only mentions ESRS 1. It should also reference the relevant paragraph in ESRS 2.	E4	General disclosures	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	General disclosures has been amended to remove redundancies	E4	General disclosures	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Disclosure is only required if the company has a transition plan in place and has made it public. EFRAG should require companies to disclose why they do not have a transition plan and/or when they plan to implement one.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It's not clear the specific disclosures that are required on the transition plan. E4 paragraph 12 states that the company "shall" disclose key features; however, the list of example features are included in the non-mandatory guidance document. It would improve comparability if EFRAG outlined which features are mandatory and then included "non-mandatory" features in the NMIG.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The previous disclosure in IRO 17a has been removed and ESRS 2 IRO 1 is referenced instead. It is not clear in ESRS 2 whether we need to address impacts at the site level. This should be made more clear in the E4 standard and/or in the IRO 1 section of ESRS 2.	E4		
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The disclosure update for AR4 in the amendment log is different from the disclosure in the clean version of the updated standard. The disclosure in the log of amendments is more clear and should be used in the final version.	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 4
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It is not clear if the information on the use of scenario analysis is a mandatory or non-mandatory requirement. If it is non-mandatory, the standard should use the term "may" instead of "can."	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 4
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The disclosure of information on policies requires the companies to disclose sites in it own operations that are in or near biodiversity sensitive areas. This is inconsistent with the update to the disclosure in paragraph 20 to update the wording to "location" instead of "site". This disclosure should be updated to use the term location for consistency.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	A definition should be included for biodiversity offsets	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	More detail is needed on what is meant by "financing effects in monetary terms"	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The standard should provide more detail on what is meant by "appropriate" consultation	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	AR 5
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	EFRAG should provide a mapping document between the E4 standard and TNFD disclosure requirements. Similar to what was done for TCFD and the E1 standard.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The metric addresses impacts on the undertaking's own operations. However, if the material IRO relates to the (upstream) value chain, its applicability remains unclear (like in the 2023 ESRS), leading to inconsistent interpretations and cost-inefficient discussions with auditors.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	1. Issue with "dependencies" only mentioned in objectives, "ecosystem services" not mentioned until metrics – Remove dependencies and revise objectives related to ecosystem services. 8. Issue with objective to understand the plans and capacity of the undertaking to adapt its strategy and business model in line with various EU Directives and Regulations – Revise to provide additional flexibility when some of a company's subsidiaries are located outside the EU.	E4	Objectives	1, 8
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Issue with language "transition plan to transform its business model…" – Revise text to "transition plans that improve and ultimately achieve alignment of its strategy and business model to contribute to…"	E4	Transition plan	11, 12
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Scenario analysis duplication with ESRS 2 SBM-3 – Remove from E4	E4	Policies	14
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Issue with "site" and "location" seemingly used interchangeably needs clarification/harmonisation. Issue with metrics related to ecosystem services (21, AR7) not used elsewhere in E4, not well defined or understood – Remove from AR7.	E4	Metrics	19-21, AR7
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Issues with lack of clarity of "biodiversity sensitive areas" definition	E4	Annex II	NA
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Mention the connection with AR 22 of ESRS 2 (e.g., local considerations such as threatened species and ecosystems in biodiversity-sensitive areas)	E4	E4 - Objective	9.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Place greater emphasis on the importance of the upstream and downstream value chain for biodiversity, as the value chain often represents the source of the most severe impacts and significant risks. Along with the principle on location-specific considerations in E4 §9, we propose introducing a principle on value chain. Proposed wording: "The most severe impacts and the most significant risks may originate in the undertaking's upstream and downstream value chain rather than in connection with its own operations. When material IRO arise in the value chain, it is important to consider appropriate information related to policies, actions, targets and metrics in accordance with ESRS 2 paragraph 29."	E4	E4 - Objective	9.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Highlight dependencies on biodiversity and ecosystems, as they serve as a proxy for physical risk. Along with the principle on location-specific considerations in E4 §9, we propose introducing a principle on dependencies Proposed wording: "Dependencies on biodiversity and ecosystems should be considered, as they serve as a proxy for physical risks"	E4	E4 - Objective	1.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Several clarifications are needed. - The plan should be made public by the company itself, not by a third party and the term "publicly available" should be clearly define. - A distinction should be made between a biodiversity action plan and transition plan. Companies are developing action plans through initiatives such as SBTN or TNFD. Most of these plans are published without formal certification, as methodologies and auditing standards are evolving. There is a risk that mandatory disclosure under ESRS could discourage companies from joining such initiatives, as they may wrongly fear that participation or commitments to biodiversity actions would automatically trigger the requirement to disclose an audited transition plan. We support adding a definition in the ESRS glossary and enhancing alignment with ESRS E1-1 on the meaning of "transition plan." A transition plan should be defined by its transformative impact on the business model, requiring only key elements: integration of biodiversity into strategy and business model, consistency between targets, actions, and resources, and approval by governance bodies.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Compatibility with the Kunming-Montreal Global Biodiversity Framework raises practical challenges: no standardised methodology exists at corporate level, impacts are localised, and sector-specific metrics are under development. Companies should be allowed to present a plan even if not fully compatible, provided they disclose the current level of alignment and measures planned to achieve it. The current contradiction between references to "alignment" in the main body and "compatibility" in the application requirements should be resolved by retaining "compatibility," consistent with E1.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Allow optional inclusion of sites under operational control when disclosing policies related to sites in or near biodiversity-sensitive areas; Add in AR2 : "The description of the policy can cover operations in the value chain that are in or near biodiversity sensitive areas" to open the door to value chain impacts.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Address net targets in a separate way as gross targets to clearly separate each step of the mitigation hierarchy, and to mirror the mechanism used in E1; the proposed wording does not imply anymore that a "net" target can be set (i.e., no more mixing of mitigation and offsetting) Simple rewording proposal to reflect this and improve consistency in how offsets are addressed across ESRS: "If the undertaking has set targets relating to offsets, the disclosure required by paragraph 17 shall include how it used them."	E4	E4-4 - Targets related to biodiversity and ecosystems	18.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Consider referencing free alternatives to IBAT tool, as it has high commercial costs (e.g., WWF Biodiversity Risk Filter) or developing public databases on key biodiversity areas	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Consider proposing the disclosure of aggregated metrics where relevant (e.g., share of locations with critical ecological status, covered by specific actions), especially in place of data points at the local level when such data is sensitive	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Allow optional inclusion of sites/locations under operational control	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	- Place materiality assessment results outside the metrics section and the application requirements to avoid confusion. The description of the undertaking's contribution to direct drivers of biodiversity loss is particularly important and should be included in the main body of the standard in relation to IRO-2. - Clarify the direct biodiversity pressures covered by ESRS E4 and their hierarchy Requirement on biodiversity-related impacts to be relocated outside the metrics and in relation to IRO-2 in the main body: "When providing description of material impacts, risks and opportunities in accordance with [Draft] Amended ESRS 2 IRO-2 the undertaking shall indicate which material impacts concern (16(b) amended) land degradation, desertification or soil sealing, and (16(c) amended) operations that affect threatened species." Application requirements : "Changes in land and sea use are the primary biodiversity pressure, followed by direct exploitation of organisms; climate change; pollution; and invasion of alien species, in order of importance according to IPBES. ESRS E4 focuses on land-use change in terrestrial, freshwater, and marine ecosystems, direct exploitation of threatened species, and introduction of invasive alien species or other ecosystem disturbances."	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Retain the optional LCA-based land use data point to capture value chain impacts, or provide guidance for qualitative assessment as part of the materiality assessment in the absence of metrics Proposed wording: "The undertaking may disclose land-use based on a Life Cycle Assessment to capture value chain impacts."	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Clarify that metrics on biodiversity may be "on own operations and when relevant on the value chain" (to be added at the end of the §21.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We note that biodiversity transition plans remain an emerging practice. Only the most mature undertakings are likely to have adopted and communicated on their transition plan. If EFRAG retains the current proposal, we recommend tackling the attention points below in AR 1. We recommend EFRAG to keep dedicated disclosures related to resilience analysis for ESRS E4 to enhance transparency around how the undertaking's strategy and business model would withstand biodiversity-related physical, transition, and systemic risks and dependencies across its value chain. Specific requirements in E4 would avoid boilerplate disclosures in ESRS 2.SBM-3 potentially overlooking complex nature-specific risks and dependencies, as biodiversity resilience has distinct drivers compared to other environmental topics. In our view, dedicated disclosures and guidance (in line with the granularity of requirements related to climate resilience) are needed as relevant information for users.	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	As noted above, if EFRAG retains the current proposal, we ask EFRAG to provide a specific definition of transition plans for biodiversity and ecosystems. The definition should be standalone and should not refer to transition plans for climate change mitigation as this will create confusion. It is essential to distinguish a biodiversity transition plan from a biodiversity strategy or action plan. Without a precise definition, preparers and auditors will face strong challenges to determine whether certain public information qualifies as a transition plan and therefore must be disclosed. We also recommend clarifying what is meant by "made public". Should preparers consider all publicly available information, including fragmented disclosures? How should this relate to transition plans published through initiatives such as SBTN? Furthermore, the requirement for plans to be "compatible with global goals" or "in line with the GBF" raises practical questions, in the absence of mature methodologies to assess compatibility with the Kunming-Montreal Global Biodiversity Framework (GBF). This could lead to inconsistent interpretations and disclosures. We recommend further alignment with the structure of DR E1-1 to provide the key features of the biodiversity transition plan. It could be specified in the standard that GBF stands for Kunming Montreal Global Biodiversity Framework	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We recommend EFRAG to specify what is meant by "sustainable land / agricultural practices" and "sustainable oceans / seas practices"	E4	E4-2 - Policies related to biodiversity and ecosystems	AR 3
Excels	Ernst & Young	Auditor	United Kingdom			I agree	The requirement to report metrics related to material impacts on biodiversity and ecosystems leaves flexibility to select relevant indicators. We encourage EFRAG to provide some clarifications or examples of metrics (in NMIG) drawing from existing frameworks and practices to support consistent reporting across undertakings, enhancing comparability of the disclosed information.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The amendments are highly welcome. Please make clear that a reference to a transition plan is only necessary if there is a transition plan in place. If the undertaking does not have a transition plan in place it does not consequently have to disclose that this is the fact.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The amendments are highly welcome. Please make clear that a reference to a transition plan is only necessary if there is a transition plan in place. The locations shall only be reported if there are significant and verifiable negative impacts affecting biodiversity sensitive areas. A general reporting of locations should be avoided as there is no added value.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Para. 20 should only refer to impacts. The locations shall only be reported if there are significant and verifiable negative impacts affecting biodiversity sensitive areas. A general reporting of locations should be avoided as there is no added value.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	20. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Please make clear that para. 21 only refers to metrics for the own operations and that these metrics could also be qualitative.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	21.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Para. 20 should only refer to impacts.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 6
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Para. 20 should only refer to impacts. The locations shall only be reported if there are significant and verifiable negative impacts affecting biodiversity sensitive areas. A general reporting of locations should be avoided as there is no added value.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 7
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	AR 8 should make clear that IBAT is only one of many different tools to examine biodiversity sensitive areas (otherwise ESRS lead to a monopoly-market). Para. 20 should only refer to impacts. The locations shall only be reported if there are significant and verifiable negative impacts affecting biodiversity sensitive areas. A general reporting of locations should be avoided as there is no added value.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 8
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	AR 9 is redundant as the sub-topics are already listed in ESRS 1	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 9
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	N.a.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	There is no major change to the shall disclosure of site level biodiversity impacts.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	FPIC reporting should be risk-based and focus on management systems.	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 5
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended this disclosure be made voluntary as it adds compliance burden without providing more decision-useful information.	E4	E4-2 - Policies related to biodiversity and ecosystems	14. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	The term "not feasible" is too subjective, creating significant audit risk. We recommend EFRAG provide further guidance to clarify this threshold.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Recommend EFRAG provide guidance that allows the use of practical alternatives like high-quality estimates.	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 11
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Value chain is mentioned only once in the whole ESRS – now referring to traceability of products/raw materials with actual or potential biodiversity impacts. Given the difficulty to implement EPD across industries we are wondering what the expectations are here.	E4	E4-1 - Transition plan for biodiversity and ecosystems	11.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The change from may to shall for this requirement can reduce flexibility for companies	E4	E4-1 - Transition plan for biodiversity and ecosystems	12.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The requirement to describe policies related to the traceability of products, components of raw materials, with material or potential impacts on biodiversity and ecosystems in the entire value chain is burdensome. The same goes for the requirement to describe policies for own sites in/near sensitive areas	E4	E4-2 - Policies related to biodiversity and ecosystems	14.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While this requirement can be useful, it might create additional burden	E4	E4-4 - Targets related to biodiversity and ecosystems	AR 6
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Prioritising sites in or near sensitive areas can be beneficial	E4	E4-5 - Metrics related to biodiversity and ecosystems change	AR 10
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We would appreciate further clarification on the following points: what exactly is meants by the "action plans" reffered to? Should offsetting be considered voluntary or compulsory?	E4	E4-3 - Actions and resources related to biodiversity and ecosystems	16.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Reclaim Finance	NGO	France			I partially agree and partially disagree	The AR lacks references to methodologies and frameworks that could guide companies (including SBTN, TNFD, Forest500…).	E4	E4-1 - Transition plan for biodiversity and ecosystems	AR 1
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Data not currently available; Lack of a common methodology. Analogous to E5-4, it should be made clearer that the metrics for resource outflows are only to be reported if the sub-topic has been assessed as material. The requirements are formulated more clearly and concisely. There is no definition of 'key products'. With a wide variety of products in countless areas of application, a pragmatic answer must be possible.	E5	E5-5 - Resource outflows	17. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Data is not always available, the level of granularity is disproportionate, and there are concerns about the overall usefulness of many different types of waste disclosures. Analogous to E5-4, it should be made clearer that the metrics for waste are only to be reported if the sub-topic has been assessed as material	E5	E5-5 - Resource outflows	18. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate cost. To be simplified.	E5	E5-5 - Resource outflows	18. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate cost. To be simplified. This issue is very strictly regulated in the Member States and is also collected via public digital tools and must also be reported to the environmental authorities. Therefore, this point should also be simplified in order to make things easier for companies and avoid double reporting.	E5	E5-5 - Resource outflows	18. (d)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Disproportionate cost. To be simplified.	E5	E5-5 - Resource outflows	19.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Resource inflows is mentioned as a sub-topic in the topics list in ESRS Appendix A, so the sentence should be adapted to "When 'Resource Inflows' is assessed as a material sub-topic […]". In this context, the topic list in Appendix A should already indicate that resource inflows only refer to key materials and not e.g. to components, so that the sub-topic is not considered material due to components.	E5	E5-4 - Resource Inflows	15.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	In the definition of key materials, the phrase "(can be sourced 'as is' or be assembled in goods and substances purchased)" should be deleted to clarify that it refers only to materials and not to prefabricated components/assemblies	E5	E5-4 - Resource Inflows	15.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	This is difficult to answer without burdening the supply chain with information about preliminary products. It should be possible to use standard values/average values here.	E5	E5-4 - Resource Inflows	15. (d)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	'total weight of critical and strategic raw materials' not meaningful; very high data collection efforts necessary, especially for critical/strategic raw materials that are/might be included in other products	E5	E5-4 - Resource Inflows	15. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	why are 'critical and strategic raw materials' mentioned? - strategic might be deleted, as all strategic raw materials listed in Critical Raw Materials Act are listed as critical raw materials too	E5	E5-4 - Resource Inflows	15. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	'critical and strategic raw materials' is not material for all companies and should therefore be marked as optional datapoint	E5	E5-4 - Resource Inflows	15. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	'biological materials' is not material for all companies and should therefore be marked as optional datapoint	E5	E5-4 - Resource Inflows	15. (e)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	This seems an extension of the DA. The content was moved from E5-5 Resource inflows and now includes the term "eco-design principles" which is not mentioned in the DA-	E5	E5-1 - Policies related to resource use and circular economy	11.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E5-3 (§13), NMIG 4 Issue: ESRS E5-3 (§13) does not explicitly allow undertakings to use EU Taxonomy (Substantial Contribution/DNSH) criteria for circular economy as a reference for their targets and actions. Proposed simplification: Add a clear option to reference EU Taxonomy criteria for circular economy in ESRS E5 disclosures. Proposed text: "Undertakings may use EU Taxonomy criteria for circular economy (Substantial Contribution or Do No Significant Harm) as the reference for their targets and actions under ESRS E5-3 (§13). Where this option is used, undertakings should indicate alignment and provide a cross-reference to the relevant Taxonomy criteria." Why it helps: This ensures regulatory coherence, reduces double reporting, and increases comparability for stakeholders.	E5	E5-3 - Targets related to resource use and circular economy	13.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I disagree	E5-4 (§15(b)) – Total Weight of Key Materials Issue: The requirement to report the total weight of key materials per material is not feasible or meaningful for the real estate sector. In practice, real estate companies do not track material flows at this level; sector practice is to report the overall carbon and material footprint of the building. Proposed simplification: Allow sector-specific metrics, such as whole-building carbon and material footprint, instead of a breakdown by material weight. Proposed text: "For sectors such as real estate, undertakings may use sector-specific metrics (e.g., building carbon and material footprint) in place of total weight per key material, to ensure disclosures are relevant and decision-useful." Why it helps: This aligns reporting with sector practices and provides more meaningful information for stakeholders.	E5	E5-4 - Resource Inflows	15. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E5-5 (§16–19) Resource outflows Issue: The requirement to disclose durability, reparability, and recycled content is not directly applicable to real estate assets, which are not "products" in the conventional sense. Proposed simplification: Allow real estate undertakings to report on building adaptability, design for disassembly, and compliance with EU Taxonomy waste and circularity criteria instead. Proposed text: "For real estate, undertakings may report on building adaptability, design for disassembly, and compliance with EU Taxonomy waste and circularity criteria, in place of product-level durability and reparability metrics." Why it helps: This ensures disclosures are relevant, feasible, and aligned with sector and regulatory expectations.	E5	E5-5 - Resource outflows	16.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	ESRS E5-5 Resource Outflows – Waste (§18) Issue: The requirement to disclose detailed waste streams and breakdowns (by hazardous/non-hazardous, recovery operations, etc.) is challenging for real estate, where waste data is typically aggregated at the project or site level and managed by external contractors. Sector practice and EU Taxonomy focus on overall rates of reuse, recycling, and recovery, not granular breakdowns. Proposed simplification: Allow real estate undertakings to report waste data in line with EU Taxonomy criteria (e.g., percentage of construction and demolition waste prepared for reuse, recycling, and recovery), and to aggregate data at the project/site level. Proposed text: "For the real estate sector, undertakings may report waste data in line with EU Taxonomy requirements (e.g., percentage of construction and demolition waste prepared for reuse, recycling, and recovery), and may aggregate data at the project or site level rather than by detailed waste stream." Why it helps: This aligns ESRS E5-5 with sector practice, leverages existing regulatory frameworks, and ensures disclosures are feasible and decision-useful.	E5	E5-5 - Resource outflows	18. (c)
Excels	CEWEP	Business association (other than association of financial institution)	Germany			I disagree	The recovery definition proposed in Annex II p. 27 and its application to ESRS E5, paragraph 18 on waste, do not align with existing EU legislation. The Waste Framework Directive (2008/98/EC, Article 3(15) and Annex II), which is the cornerstone of EU waste management legislation, defines recovery as including energy recovery. As currently drafted, 18.c and 18.d would lead to inaccurate reporting, as it would be unclear where to report incineration with energy recovery (WFD Annex II "R1"): it is explicitly excluded from the ESRS definition of "recovery", but is not a disposal operation and therefore should not be reported under "waste directed to disposal". This would misrepresent actual waste treatment performance, create inconsistencies in EU statistics and compliance reporting, and result in incorrect financial disclosures by companies, since waste treatment pathways directly affect cost allocations, liabilities, and sustainability performance indicators. The stated goal of the Amended ESRS consultation is simplification and greater usability without compromising EU objectives. Introducing a definition that conflicts with existing law instead increases reporting complexity, as companies would face two contradictory classifications. Suggestion: "iii. other recovery operation, including incineration with energy recovery (R1)". It ensures alignment with existing EU legislation and avoids unnecessary burdens.	E5	E5-5 - Resource outflows	18. (c)
Excels	CEWEP	Business association (other than association of financial institution)	Germany			I disagree	The recovery definition proposed in Annex II p. 27 and its application to ESRS E5, paragraph 18 on waste, do not align with existing EU legislation. The Waste Framework Directive (2008/98/EC, Article 3(15) and Annex II), which is the cornerstone of EU waste management legislation, defines recovery as including energy recovery. As currently drafted, 18.c and 18.d would lead to inaccurate reporting, as it would be unclear where to report incineration with energy recovery (WFD Annex II "R1"): it is explicitly excluded from the ESRS definition of "recovery", but is not a disposal operation and therefore should not be reported under "waste directed to disposal". This would misrepresent actual waste treatment performance, create inconsistencies in EU statistics and compliance reporting, and result in incorrect financial disclosures by companies, since waste treatment pathways directly affect cost allocations, liabilities, and sustainability performance indicators. The stated goal of the Amended ESRS consultation is simplification and greater usability without compromising EU objectives. Introducing a definition that conflicts with existing law instead increases reporting complexity, as companies would face two contradictory classifications. Suggestion: "i. incineration without energy recovery (D10)". It ensures alignment with existing EU legislation and avoids unnecessary burdens.	E5	E5-5 - Resource outflows	18. (d)
Excels	BDEW	Other - please specify (required)	Germany			I disagree	In our view, the extension of the standard to cover "services" is highly problematic. This obligation was not previously envisaged, yet EFRAG does not clearly identify it as a new requirement. As a result, additional effort is created, since the standard has so far been evidently tailored to manufacturing companies. We find it particularly concerning that EFRAG argues that the "services" sector has been included in the scope from the outset, whereas expert opinion—such as from EY or BET—has not supported this view.	E5	E5 - Objective	2.
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Content was moved from E5-5 Resource inflows and now contains the term "eco-design principles" which is not mentioned in the delegated act. BfC (388): The only addition on policies is how circularity and eco-design principles are integrated into key products and services, aligning with the "Eco-design for Sustainable Products Regulation" (EU) 2023/1230.	E5	E5-1 - Policies related to resource use and circular economy	11

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Reference seems wrong, the Eco-design for Sustainable Products Regulation has got the identifier (EU) 2024/1781 (Ökodesign-Verordnung für nachhaltige Produkte)	ES	ES-1 - Policies related to resource use and circular economy	BFC 388
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Additional requirement BfC (130): Added for better alignment with recent EU regulatory developments, particularly the Eco-design for Sustainable Product Regulation and Critical Raw Materials Act (Verordnung kritische Rohstoffe: Verordnung (EU) 2024/1252 vom 11. April 2024 „zur Schaffung eines Rahmens zur Gewährleistung einer sicheren und nachhaltigen Versorgung mit kritischen Rohstoffen“)	ES	ES-4 - Resource Inflows	15 (c)
Excels	BDEW	Other - please specify (required)	Germany			I agree	Par 15 (e) reintroduces the limitation of biological materials to “sustainably sourced”. The market wants a total figure for biobased materials, this metric is highly disputable and not relevant if limited.	ES	ES-4 - Resource Inflows	15 (e)
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Additional requirement: Additional labelling requirement increases the granularity.	ES	ES-4 - Resource Inflows	AR 2
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	needs clarification whether "thermal-based disposal" is something different to "thermal recovery"	ES	ES-5 - Resource outflows	18 (d) (i)
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	Additional requirement BfC (130): Als Erleichterung gedacht, "not forcing undertakings to make unreasonable estimations but instead allowing them to disclose on the figures they have and can reasonably document."	ES	ES-5 - Resource outflows	18 (e)
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Additional requirement, although the wording might indicate a relief: "When describing its waste streams, it is sufficient to provide a name and an indication of the key materials that are included in the waste stream"	ES	ES-5 - Resource outflows	AR 5
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Useful amendment and clear guidance (in NMIG)	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Clarification needed in context to definition of resource inflow: Product packaging is not mentioned explicitely anymore. Is it still in scope by "were part of the delivery of the undertaking's products" or completely out?	ES	ES-4 - Resource Inflows	15.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Higher disaggregation level for material inflow very positive, as opposed to biological vs technical. Though clarification is needed at which level the "key" material should be defined and reported - at the mateiral group level e.g. fibers, plastics and metals OR at the individual material level within the material group like polyester, alyminium etc., as this is important for defining a threshold for "key" materials	ES	ES-4 - Resource Inflows	15. (b)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Dependent on overarching understanding of definition of Resource inflows: Agree with the overall objective to include, but unclear whether there is a sufficient differentiation for companies/products, where the CRMs are truly material (e.g. solar panel producers) versus companies, that do retail products with CRMs, but where they overall account for a very small fraction of material inflow. These companies should be allowed to omit this DR. For example, if we derive that a material group "metals" is relevant for our Inflow (= key material), it should be allowed for us to focus on the most relevant metals within this group (like steel/iron) and exclude CRM metals from reporting as metals with only a tiny share of volume. Additional clarification: is it just one aggregated number for all CRMs together or disaggregated by concrete individual material?	ES	ES-4 - Resource Inflows	15. (c)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Amendment request: remove the limitation that only biological materials can be "sustainably sourced", since technical materials can be more sustainable not only when they are recycled. Examples - green steel (steel produced with green electricity) and biobased materials. Clearer wording needed that "secondary resourced" is not a subset of „sustainably sourced“, since recycled material are also "sustainable"	ES	ES-4 - Resource Inflows	15. (e)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	ANNEX definition of "resource inflow" - clarification needed how retailers are to interprete the new definition - if by the new definition only private-label products (that are produced in factories not owned by the company) remain in scope, and 3rd party brands are out (to avoid double acconting) - very positive. However if it means that even private label products are not considered as "inflow" for retail companies, since they dont produce in own facilities, but receive already the final product from their tier 1 suppliers (as opposed to semi-finished products or components), than we strongly disagree, as we dont considered it a balance to meet core sustainability objectives. Private labels should be considered as Inflow. Retail companies, even if not physically produce in own facilities, are strongly dependant on the natural resources and are in control of (and thus responsible for) which materials are used in their (private label) products and are put on the market for consumption	ES	ES-4 - Resource Inflows	15.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Clarification needed: Wording should be harmonized across different EU standards/methods, e.g. PEFCR. This DR should aim for the "recyclability" of the whole product (e.g. as defined by PEFCR with recyclability disruptors") as opposed to recyclability of individual materials within the product. It is decisive how the final product is assembled, which requires a consideration of more aspects rather than just materials. Currently the wording is misleading. Additional clarification needed: is "rate of" the same as "share of"?	ES	ES-5 - Resource outflows	17. (c)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Clarification needed: We need a clarification of the new definitions of resource outflow and key products in the annex, particularly with regard to their application in the retail sector. At present, it is not clear to us from the available definitions whether and to what extent a marketplace or platform business falls within the scope of the new definitions or is excluded from them.	ES	ES-5 - Resource outflows	17.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Good simplification and removal of redundancies	ES	ES-5 - Resource outflows	18.
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	For the marine sector,final destination of waste is very dependent on port reception facilities and third parties and is very often outside of the control of the vessel operators. As such it can be very difficult given the nature of multiple third parties in the waste management chain to accurately identify final destination of waste	ES	ES - Objective	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	Par. 15 is inconsistent regarding role of packaging materials in undertaking's resource inflows. The definition (Annex II) states that packaging are: "products made of any materials of any nature to be used for the containment, protection, handling, delivery, storage, transport and presentation of goods, from raw materials to processed goods, from the producer to the user or consumer". Therefore, packaging materials are not only those that are "part of the delivery", but they are used in all processes of product creation from resources extraction to products presentation. Also, materials used for packaging purposes may significantly differ from the materials used in products. Often, materials used for packaging have higher potential for recycling than materials used for products themselves. In conclusion, our suggestion is to include packaging as a important group of materials considered in DR 15 by replacing phrase "product and services" with phrase "products and it's packaging and services".	ES	ES-4 - Resource Inflows	15.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	Par. 15 d) is inconsistent regarding requirement of disclosing "recycled materials used". Annex II neither defines "recycled materials" nor "recycling". Annex II defines only "secondary resources" as "materials previously used (secondary) and that are recovered from waste streams and reintroduced into production cycles, reducing reliance on primary resources and minimizing environmental impact." For clarity, "recycled materials" should be defind and included in "secondary resources" definition.	ES	ES-4 - Resource Inflows	15. (d)
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	Par. 17 d) is inconsistent regarding definition of "secondary resourced materials". "Secondary resources" are defined (Annex II) as "Materials previously used (secondary) and that are recovered from waste streams and reintroduced into production cycles, reducing reliance on primary resources and minimizing environmental impact." However, DR 17 d) requires disclosing of the rate of "recycled materials used", whereas Annex II neither defines "recycled materials" nor "recycling". For clarity, "recycled materials" should be defind and included in secondary resources definition.	ES	ES-5 - Resource outflows	17. (d)
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	Par. 15 a) should be consistently amended to address packaging of the products. We propose the following wording: "the key materials used to manufacture products and their packaging, deliver them and/or provide services;"	ES	ES-4 - Resource Inflows	15. (a)
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	Par. 17 d) should be consistently amended to address packaging of the products. We propose the following wording: "the rate of recycled materials in its key products and their packaging."	ES	ES-5 - Resource outflows	17. (d)
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new version of ES-1 simplifies the requirement by focusing on the disclosure of policies in line with ESRS 2 GDR-P and explaining how circularity and eco-design principles are integrated into core products and services. The removal of information on the transition to recycled resources and sustainable sourcing may reduce visibility into the company's strategic ambition regarding the circular economy. On the other hand, the practical focus on applying these principles can strengthen the link between policy and innovation especially in resource-intensive sectors.	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of ES-2 simplifies the requirement by only requiring disclosure of actions in line with ESRS 2 GDR-A, removing the possibility to detail practices such as resource efficiency, use of recycled materials, circular design, and circular business models. This simplification reduces visibility into the company's level of innovation and operational transformation, particularly in sectors reliant on critical raw materials. However, by maintaining focus on core actions, it may facilitate reporting and reinforce the link between policy and execution, provided companies voluntarily include these transformative elements.	ES	ES-2 - Actions and resources related to resource use and circular economy	12.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of ES-3 simplifies the requirement by only requiring disclosure of targets in line with ESRS 2 GDR-T, removing the need to detail resource flows, circular design principles, waste hierarchy, and ecological thresholds. This simplification limits the ability to assess the ambition and strategic alignment of targets with advanced circular practices. However, by focusing on a common target structure, it may promote consistency across companies, as long as they choose to voluntarily include more transformative elements.	ES	ES-3 - Targets related to resource use and circular economy	13.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of ES-4 retains the main indicators but adopts a more simplified and standardised structure, with less demand for technical contextualisation. The exclusion of elements such as material intensity and methodological details may reduce comparability and understanding of material efficiency. On the other hand, the explicit inclusion of categories like critical raw materials and secondary materials strengthens the strategic view on circularity and resource security, which is particularly relevant for sectors with high dependency on specific inputs.	ES	ES-4 - Resource Inflows	14.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of ES-5 retains the main indicators but adopts a more simplified and outcome-oriented structure, with less demand for technical and methodological contextualisation. The exclusion of details on circular design and classification criteria may limit understanding of product ambition and innovation. However, the strengthened focus on waste measurement and traceability of its destination contributes to a more operational view of circularity, especially relevant for sectors with high waste generation.	ES	ES-5 - Resource outflows	16.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	The change of 'products and materials' to 'products and services' is aligned with the GRI Standards.	ES	ES - Objective	4. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	In the Log of Amendments, it is stated "Definitions added to the Annex II: circularity and eco-design". While the definition of eco-design exists in Annex II, the definition of 'circularity' is missing. We suggest clarifying whether 'circularity' refers to the definition of 'circular economy'.	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Note that the new definition of 'key products' added to Annex II does not include a reference to services. We suggest this be clarified.	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Introduction of term 'key materials': Note that the introduction of this term would be misaligned with GRI 301-1-a which requires to report the total weight or volume of materials used to produce and package the organization's primary products and services. GRI focuses on the primary products and services but does not focus on or use the term 'key materials'. This change results in a difference in the scope of the ES and GRI 301-1 requirements. In addition, the definition of 'key materials' is marked as 'amended' in Annex II whereas it is a 'new' definition.	ES	ES-4 - Resource Inflows	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Focus on key materials: GRI 301-1-a requires to report the total weight or volume of materials used to produce and package the organization's primary products and services. GRI does not focus only on key materials. In addition, the reference to products and services is not focusing on key products and services as done in paragraph 11. As such it is unclear whether the key materials of all products and services or only of key products and services shall be reported. We recommend aligning with GRI to require the total weight or volume of materials of primary products and services.	ES	ES-4 - Resource Inflows	15. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The Log of Amendments states that definitions for technical and biological material have been added to Annex II, but Annex II does not include a definition for technical material.	ES	ES-4 - Resource Inflows	15. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Note that the new Glossary definition states 'secondary resources' and not 'secondary resourced materials' as used in paragraph 15 (d). We also suggest clarifying the relationship between the definitions of 'raw materials' ("Primary or secondary material that is used to produce a product.") and 'secondary resources' ("Materials previously used (secondary) and that are recovered from waste streams and reintroduced into production cycles, reducing reliance on primary resources and minimizing environmental impact."). We propose that similar terminology be streamlined to facilitate the understanding of different concepts.	ES	ES-4 - Resource Inflows	15. (d)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We suggest clarifying the difference between 15 (d) ("the percentage of total weight of secondary resourced materials") and 17 (d) (" the rate of recycled materials used in its key products") and the reasons why they are included in different DRs, as both seem to be based on former paragraph 31 (c).	ES	ES-5 - Resource outflows	17. (d)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We propose aligning the Annex II definition of 'recovery' with GRI 306's definition: "operation wherein products, components of products, or materials that have become waste are prepared to fulfill a purpose in place of new products, components, or materials that would otherwise have been used for that purpose. Source: United Nations Environment Programme (UNEP), Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal, 1989; modified. Examples: preparation for reuse, recycling. Note: In the context of waste reporting, recovery operations do not include energy recovery."	ES	ES-5 - Resource outflows	18. (c)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	We propose changing the unit of measurement from tons or kilograms to metric tons, for alignment with GRI 306: Waste.	ES	ES-5 - Resource outflows	AR 4
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflows where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). Moreover, Good definition and focus of "key materials" for manufacturing. No mention anymore of process materials, packaging, water and property, plant and equipment.	ES	ES-4 - Resource Inflows	15.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). EFRAG should revise again whether a breakdown per key material is needed and useful information for stakeholders. Further „breakdown per key material" involves increased and additional effort. Currently there is just an overall total weight of technical and biological materials necessary.	ES	ES-4 - Resource Inflows	15. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The introduction of a new KPI counteracts the aim of reduing the reporting requirements and burden. Based on the new KPI, resource inflow needs to be reported on a more granular level, which increases the data requirement again. Not only is the information extremly challenging to obtain (as it requires information from the value chain and migh need IT adjustments) but transparency on the purchased material structure is sensitive information and might lead to competitive disadvantages. This new requirement on critical and strategical raw material should be removed.	ES	ES-4 - Resource Inflows	15. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). Nevertheless, Good focus on „secondary resourced materials". No mention anymore of reused and recycled materials/ components and packaging.	ES	ES-4 - Resource Inflows	15. (d)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). The definition on sustainable sourcing in the glossary should be revised again with a focus on more clarity and auditability of the required information; currently it seems a bit vague and open for interpretation. The concept of 'sustainably sourced' is should be clarified. Furthermore, limiting the scope of reporting exclusively to biological materials (which is well defined) is not justified, as technical materials may also meet sustainability criteria and should therefore be considered within the reporting framework.	ES	ES-4 - Resource Inflows	15. (e)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Focus on key products helps to disclose relevant information for stakeholders while reducing the burden for disclosing companies	ES	ES-5 - Resource outflows	17. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Focus on key products helps to disclose relevant information for stakeholders while reducing the burden for disclosing companies	ES	ES-5 - Resource outflows	17. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The requirement to report on the recyclable content of packaging should be removed. Packaging reporting requirements should be excluded and not considered as part of the product. Additionally, there is not a common definition for recyclable product, therefore, the requirement of reporting the rate of recyclable materials in products should be clarified.	ES	ES-5 - Resource outflows	17. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Focus on key products helps to disclose relevant information for stakeholders while reducing the burden for disclosing companies. However, Further “rate of recycled materials used in its “key products”” involves increased and additional effort. Added value questionable because 15. (d) “percentage of total weight of secondary resourced materials” also in the key products indirectly included	ES	ES-5 - Resource outflows	17. (d)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please see comment for ESRS E5 para. 17 (c)	ES	ES-5 - Resource outflows	AR 3
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This new requirement would entail additional work if this case were to arise.	ES	ES-5 - Resource outflows	18. (e)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Significant improvement, as the example makes it clearer what level of detail is required here.	ES	ES-5 - Resource outflows	AR 5
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	No objection	ES	ES-5 - Resource outflows	AR 4
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	E5-4 §30 has been removed which specified quite clearly, that only those resource inflows are to be looked at, that are used to manufacture the undertakings products and services. Now this paragraph was removed and the ESRS amended in a way, that it is less clear for retailers, whether products that are not manufactured, but just placed on the market, need to be taken into the scope of E5-4 §15 a-e or not. This should be more clearly defined, products placed on market will be a huge work intensive disclosure that does not stand in the light of burden reduction.	ES	ES-4 - Resource Inflows	15.
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	17 a) and b): Burden reduction is limited. Newly added definitions leave a lot of room for interpretation. How is "information" defined? Is this considered a metric or a qualitative disclosure? Definitions don't seem to be aligned with PPWR. Why are the definitions not aligned with PPWR, at least broadly? Due to the focus on key products? Besides that the metric is pretty similar. No specification, that the DR applies to manufacturing undertakings. Collecting information on durability and reparability as a retailer is overly burdensome and will likely double with disclosures of manufacturing undertakings. Undertakings should be obliged to report on their own products. Generally, there are currently no robust methodologies or proxy information to calculate this data. It is not feasible to calculate these metrics for the moment. Remove DP or move to NMIG.	ES	ES-5 - Resource outflows	17. (a)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	see above	ES	ES-5 - Resource outflows	17. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	In the current standard, it is clear that E5 related activities also interact with workers of the value chain (ESRS S2) : ""E5 related activities often involve intensive resource extraction, manufacturing, or waste processing, which can expose workers to hazardous conditions and low-wage labour, especially in lower tiers of the value chain". We recommend maintaining such interaction in the revised E5. This could be done in the NMIG.	ES	E5 - Interaction with other ESRS	9. (e)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend complementing this § as follows, in consistency with the wording used in other topical standards in relation to actions and resources: "The undertaking shall disclose its resource use and circular economy actions and significant resources allocated to their implementation, in accordance with…".	ES	ES-2 - Actions and resources related to resource use and circular economy	12.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	"Sustainably sourced" shall be put in bold italic as a new definition (referring to "sustainable sourcing/sustainable sourced" that could be complemented with "sustainably sourced") has been added in the ESRS glossary. We nonetheless recommend to enrich such definition which is quite broad/generic.	ES	ES-4 - Resource Inflows	15. (e)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We regret that EFRAG has not clarified in this DR whether and how value chain data can be used for reporting on own operations.	ES	ES-4 - Resource Inflows	15.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	"Can refer to" should be replaced by "shall refer to" in the last sentence of this AR as it illustrates a mandatory requirement: "… the undertaking shall designate the material in such a way as to identify this characteristic, e.g. the undertaking shall refer to ‘synthetic fibres’ and ‘natural fibres’ instead of just ‘fibres’."	ES	ES-5 - Resource outflows	AR 2
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend rewording this DP as "the rate of recycled materials included in its key products…" to ensure consistency in wording (cf. § 17(c)), instead of using "recyclable".	ES	ES-5 - Resource outflows	17. (c)
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We propose to keep the target related to waste management in.	ES	ES-3 - Targets related to resource use and circular economy	3.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	While reporting on key resources used to produce, put on the market or deliver, the material streams may vary significantly from one reporting entity to another. Accordingly, allowing for flexibility with regard to paragraph 15 a-e might encourage more tailored reporting solutions for the respective reporting entities.	ES	ES-5 - Resource outflows	15.
Excels	UPM-Kymmene Corporation	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	We are not 100% sure that it is not anymore required to disclose the amounts of each pollutant above the threshold from Annex II of the Industrial Emissions Portal Regulation. This is due to possible different interpretation of "The pollutants TO BE CONSIDERED for reporting …" in AR 2. Please clarify or re-formulate "to be considered" in the application requirement.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	UPM-Kymmene Corporation	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	AR 4 leaves room for interpretation in our opinion. Does it mean that the emissions to water are excluded from the reporting scope of E2-4 (which is defined as own operations in § 16 a) when the wastewater is not treated internally but send to an external treatment plant? Or should they nevertheless be reported even if they "qualify" as downstream pollution? Please clarify.	E2	E2-4 - Pollution of air, water and soil	AR 4
Excels	UPM-Kymmene Corporation	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	So far, there are no reliable methods to measure emissions of primary microplastics. There must be agreed methods to be able to comply with this disclosure requirement. Information from relevant suppliers about microplastics in there products is currently lacking and their mandatory reporting is starting only. Information on secondary microplastic in the downstream value chain is very challenging and will be very unprecise, especially for companies with a multi-tier downstream value chain. In general, the ESRS requirements for microplastics reporting should be in line, also timewise, with the REACH restriction for intentionally and unintentionally added microplastics and other microplastic-related reporting regulations. Please consider to add this DR to the NMIG list for now.	E2	E2-4 - Pollution of air, water and soil	16. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. With the disclosure in GDR-P this will be sufficiently transparent	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We recommended to align to the definition of CTI Methodology from WBCSD which is used from our peers and consultancies as standard for the methodological approach and tracking, depending on the respective sector; option to create a default list of standards to be used by sector	ES	ES-4 - Resource Inflows	15. (b)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We recommended to align to the definition of CTI Methodology from WBCSD which is used from our peers and consultancies as standard for the methodological approach and tracking, depending on the respective sector; option to create a default list of standards to be used by sector	ES	ES-4 - Resource Inflows	15. (e)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We recommended to align to the definition of CTI Methodology from WBCSD which is used from our peers and consultancies as standard for the methodological approach and tracking, depending on the respective sector; option to create a default list of standards to be used by sector	ES	ES-4 - Resource Inflows	15. (d)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We see the change from full scope to "key materials" critical as it will impact the comparability of the reporting. The definition of of "key products" leaves a lot of room for interpretation. We foresee that the definition of what is "key" will create additional work in assessment, definition and reporting.	ES	ES-4 - Resource Inflows	15.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Clearer guidance from EFRAG on the level of granularity of the key material clusters needed (especially for comparability). E.g. Packaging material vs. Glas/metal/paper/plastics split of packaging material.	ES	ES-4 - Resource Inflows	15. (a)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	While externally there is no additional reporting requirement (no completely new KPI, still sustainably sourced biological materials), we internally have to also calculate the total amount of key biological materials to calculate this figure. This means additional reporting burden. Furthermore we see critical that this might lead to a high reported percentage even if the volume is minimal.	ES	ES-4 - Resource Inflows	15. (e)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Rate of recycled material used in key products should be only considered in inflow OR outflow. With this proposal it would be in both, meaning an additional data point, which should be avoided.	ES	ES-5 - Resource outflows	17. (d)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We see the change from full scope to "key products" critical as it will impact the comparability of the reporting. The definition of of "key products" leaves a lot of room for interpretation. We foresee that the definition of what is "key" will create additional work in assessment, definition and reporting.	ES	ES-5 - Resource outflows	17.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	This AR provides better guidance on how to report waste materials,however the detail of all waste materials considering all other reporting requirements would significantly increase the complexity of the reporting. The AR does not detail if all materials are to be reported.	ES	ES-5 - Resource outflows	AR 5
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	At present, the notion of critical and strategic raw materials may evolve over time with the development of the Critical Raw Materials Act, and as the delegated acts deriving from the Eco-design for Sustainable Products Regulation are not yet approved. Companies consider this information hard to access and publish, particularly since these materials are often mixed with others. In this evolving context, this datapoint shall be inserted in the NMIG	ES	ES-4 - Resource Inflows	15. (c)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	"Preparation for reuse" does not correspond to any of the R/D codes of the Waste framework directive. This information should be retained only in the narrative part. In the future French translation of this standard, the title should be corrected to refer to "réutilisation" rather than "réemploi".	ES	ES-5 - Resource outflows	18. (c)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	What is the added value of this information? It should also be noted that some wastes are diverted from disposal, but their final destination remains unknown.	ES	ES-5 - Resource outflows	18. (e)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E5. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	ES	ES - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Para. 7 should in addition to the Green Deal also mention the Clean Industrial Act.	ES	ES - Objective	7.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We welcome the introduction of "key materials" in the standard, which increases the proportionality of DR E5-4. However, the introduction of "key materials" comes with the challenge of defining the term appropriately. The current definition is not fit for purpose, leaving too much room for inconsistent interpretations. In line with EFRAG's mandate to increase consistency with other pieces of EU legislation, we recommend to define key materials as follows: 1.materials included in the "list of relevant raw materials" under Art. 6 of Regulation (EU) 2024/1244 (Industrial Emission Portal-Regulation), if used by the undertaking, complemented by 2.additional materials that are essential for the undertaking's manufacturing and delivery of products and services or that are a driver of its material impacts, risks and opportunities. This approach would ensure a uniform and clear basis of what is considered a key material and would leave flexibility for companies to include additional materials that are relevant to their specific circumstances. The delegated act under Art. 6 IEP-Regulation is to be adopted by 31 December 2025 and would therefore be in time for the ESRS revision.	ES	ES-4 - Resource Inflows	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	While we consider the metrics proposed by EFRAG a step forward, we question the relevance of metrics that are based on the total weight of materials, since the use of different materials can vary by many orders of magnitude and the overall amount does not provide a good indication of environmental or social impacts, nor (financial) risks and opportunities. We, therefore, suggest to focus on the following datapoints in [Draft] amended ESRS E5-4: 1.the key materials used to manufacture products, deliver them and/or provide services 2.for each key material, whether it contains critical raw materials or strategic raw materials 3.the overall number of critical and strategic raw materials that are contained in its key materials 4.the percentage of key materials in dry weight that are from secondary sources. (text proposal see next line)	E5	E5-4 - Resource Inflows	15.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Text proposal for new set of metrics: "15. When 'Resource Inflows' is assessed as a material topic, the undertaking shall disclose: a) the key materials used to manufacture products, deliver them and/or provide services; and for each key material: (i) whether it contains critical raw materials or strategic raw materials; (ii) the percentage in dry weight that is from secondary sources; (b) the overall number of critical and strategic raw materials that are contained in its key materials	E5	E5-4 - Resource Inflows	15.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Text proposal for new application requirements: "Para. 15 (a)(i): Key materials can be raw materials, components or products procured. In case of key materials that are components and products, the undertaking shall report whether these contain critical raw materials or strategic raw materials. Para. 15 (a)(ii): The percentage ratio shall be calculated by dividing the dry weight of the key material that is from secondary sources by the total dry weight of the key material procured in the reporting period. The requirement also applies to key materials that are components or products. Para. 15 (b): If critical or strategic raw materials are contained in more than one key material, their number shall not be double counted." NMIG: include an examplary reporting template (table), with columns "Key material", "Is or contain a critical raw material?", "Is or contains a strategic raw material", "% of key material that is from secondary sources". Lines are the respective key materials.	E5	E5-4 - Resource Inflows	15.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Please consider the following proposals for ESRS E5-related terms and definitions: - Generally, we recommend to cross-check all definitions with the terminology from ISO 59004:2024 "Circular economy — Vocabulary, principles and guidance for implementation" and relevant legislation. - "resources" is used frequently in the, but not defined. It should be clarified in a separate definition that "resources" means "material resources" in the ESRS, not natural resources more broadly, nor financial nor human resources. This would help to clarify and be in line with how The International Resource Panel at UNEP is using the term. - "Circular economy principles" is used inconsistently and should be aligned with common frameworks such as 10R or Narrow/Slow/Close/Substitute. - "circular material use rate" is defined but not used in the standard. The definition is also unclear because it does not define "circular material use" and does not link to the definition of "secondary resources". It should be deleted.	E5	E5 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Further on definitions: - The new definition for "resource efficiency" introduces the term "material consumption" which is not explained. Instead, the definition should refer to the already defined term "resource inflow". We also not that resource efficiency is not used in E5. - The new definition for "secondary resources" misses the fact that those resources can also come from non-waste streams, e.g. by-products such as metallurgical slags. Hence, it should be amended to "waste and non-waste streams" - "sustainably sourced" is referring only to the assessment of direct suppliers. It is not in line with the OECD Guidelines for Multinational Enterprises for Responsible Business Conduct. Moreover, the term is not correctly used in the standard. The definition should either be removed or fundamentally revised. If our proposal to amend the set of metrics is adopted, the definition would not be needed anymore.	E5	E5 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Further on definitions: - the defintiion of „Critical raw materials" should be extended by "low end-of-life recycling input rates", so that it reads: „Critical raw materials are materials that have high economic importance and are subject to supply risk, due to factors such as geographic concentration, economic or geopolitical limitations, low end-of-life recycling input rates, or difficulties in substitution. Critical raw materials are those listed in Annex II, Section 1 in the Critical Raw Materials Acts (2023)."	E5	E5 - Objective	15. (c)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Further on definitions: - in the definition of "strategic raw materials", the phrase "subset of critical raw materials" should be deleted. It should better align with the CRMA, which states in recital 6: "raw materials that are of high strategic importance for the functioning of the internal market, taking into account their use in strategic technologies underpinning the green and digital transitions or for defence or aerospace applications, that are characterised by a potentially significant gap between global supply and projected demand, and for which an increase in production is relatively difficult, for instance due to long lead-times for new projects increasing supply capacity." and in Art. 3 (2): "the raw materials that score among the highest in terms of strategic importance, forecasted demand growth and difficulty of increasing production."	E5	E5 - Objective	15. (c)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	"Circularity" is highlighted as a defined term but not included in Annex II (Glossary). It should be defined in the finalization of the standard.	E5	E5-1 - Policies related to resource use and circular economy	11.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	"Circularity" is highlighted as a defined term but not included in Annex II (Glossary). It should be defined in the finalization of the standard.	E5	E5-4 - Resource Inflows	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	It should be be specified whether the reported weight of waste is in dry- or wet weight (which is especially relevant for organic waste).	ES	ES-5 - Resource outflows	AR 4
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The definition of "durability" should be aligned with the definition in the ESPR: " 'durability' means the ability of a product to maintain over time its function and performance under specified conditions of use, maintenance and repair;"	ES	ES-5 - Resource outflows	17. (a)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The definition of "ecodesign" should be aligned with the definition in the the ESPR: "'ecodesign' means the integration of environmental sustainability considerations into the characteristics of a product and the processes taking place throughout the product's value chain;"	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The definition of "scope of repairability" should not relate to "placing on the market" since this is not a product characteristc and, in line with the ESPR definition for "repair", also cover waste: "Extent to which a product or waste is designed in a manner that enables it to be restored to proper functioning through repair activities, taking into account factors such as product design, ease of disassembly, availability of spare parts and tools, accessibility of repair and maintenance information, and the legal and practical conditions under which end- users, professional repairers, or independent operators can carry out such repairs..."	ES	ES-5 - Resource outflows	17. (b)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	There is still no clarification on whether and how value chain data can be used for reporting on own operations under ES-4, which leaves preparers with practical uncertainties and risks of inconsistent interpretation. Challenges in sourcing reliable data – especially in complex, multi-tier supply chains such as retail – remain unaddressed.	ES	ES-4 - Resource Inflows	15.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The disclosure requirement in 15(e) on "sustainably sourced" biological materials is not defined in the ESRS. We recommend that EFRAG provide a clear definition of "sustainably sourced" in Annex II, aligned with recognised schemes and addressing minimum due diligence requirements. Additionally, moving the recycled material disclosure from inflows to outflows may overlook recycled content that does not remain in final products.	ES	ES-4 - Resource Inflows	15. (e)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We note a risk of double counting in waste reporting: incineration with energy recovery (Directive 2008/98/EC Annex II, category R1) appears to be covered under both "other recovery operations" [para. 18.c)iii] and "thermal-based disposal" [para. 18.d)i)], depending on interpretation. This could cause inconsistency in categorising incineration with energy recovery sometimes as recovery, sometimes as disposal depending on interpretation. This should be clarified to ensure consistent classification.	ES	ES-5 - Resource outflows	18. (d)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	It is suggested to clarify that this DR applies only to companies that are subject to the CRM Act: "the percentage of total weight of critical and strategic raw materials, whenever the undertaking is required to assess those material flows according to the CRM Act regulations".	ES	ES-4 - Resource Inflows	15. (c)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also "key products and services" (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure).	ES	ES-4 - Resource Inflows	15.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	With reference to point e) "the percentage and/or total weight for which the final destination is unknown," we believe that this new item does not add any value to the reporting (as it can be derived simply as the difference between the previous points). Furthermore, it is unclear from the explanation of the last column what is meant by this requirement and how the data should be obtained. Clarification is considered necessary.	ES	ES-5 - Resource outflows	18. (e)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	E5-4 para 15c When resource inflows is assessed as a material topic, the undertaking shall disclose the following information about. (...) "c) the percentage of total weight of critical and strategic raw materials;" We believe this may introduce a heavy reporting burden and undue effort for companies. Tracking the "percentage of total weight" of those materials is problematic because it relies on complex supply chains (could require deep tier-2 and tier-3 supplier transparency) where traceability is low, and the metric may not meaningfully reflect the company's real sustainability risks or impacts. Suggest to delete this requirement.	ES	ES-4 - Resource Inflows	15. (c)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Para. 15 (d) The undertaking shall disclose, for key materials: (d) the % ... of secondary resourced materials; Ambiguity in definitions: "secondary resourced materials" versus recycled material – possible overlap or confusion. Most recycled materials become secondary sources once they're processed and reused. There is a clear overlap. Without well-defined criteria, comparability value will be impacted. Suggestion to clarify definitions to distinguish recycled materials, secondary resourced materials, and other categories to ensure consistent reporting.	ES	ES-4 - Resource Inflows	15. (d)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	AR 1 for apra 15 c&d - We consider this denominator not to be a useful metric. The term "key materials" is vague and allows companies wide discretion in what to include, leading to inconsistent reporting, reduced comparability, and potential misrepresentation. Variations in material selection or year-over-year shifts in material mix can distort the indicator, making it unreliable. We recommend removing this metric.	ES	ES-4 - Resource Inflows	AR 1
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Para 18 e requires to disclose " the percentage and/or total weight for which the final destination is unknown." We believe there is limited usefulness of a "final destination unknown" metric. Disclosing the percentage or total weight of materials with unknown final destinations could generate significant reporting effort with limited value for stakeholders, particularly if large portions are unknown. Suggestion to move this paragraph to voluntary and focusing on qualitative information, or allowing aggregation of "unknown" categories with explanation of materiality and mitigation efforts (if material).	ES	ES-5 - Resource outflows	18. (e)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We find that this requirement has been added/changed from a "may" to a "shall" but is not counted as such and is not highlighted in Q23. Furthermore, we note that the requirement essentially drives detailed reporting on how other EU-legislation is met. We believe the relevant elements would be covered by the general reporting requirement in ESRSE5, paragraph 10, at an appropriate level.	ES	ES-1 - Policies related to resource use and circular economy	11.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We disagree to the amended standard as it increases the reporting requirement on resource inflows to include a breakdown on weight by key material and percentages of certain categories. This is an increase in the disclosure requirement which will impose a significant increase in the reporting burden. This should in particular be seen in relation to the definition of "key" products which includes a large range of products, which may be purchased in bulks as well as be included in raw material or assembled in semi-finished goods. It should, furthermore, be noted that such information would be confidential and business critical if disclosed for certain businesses. We disagree to this extension and suggest maintaining the requirements from current ESRS 5.	ES	ES-4 - Resource Inflows	15.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We disagree to the requirement to report on the recycled materials used in key products and their packaging. This is a significant reporting burden as many outflow-products depend on inflows that are mixed on reused/recycled and new/virgin materials. Therefore, the information would be impractical or add significant administrative or reporting burden both for entity and across the value chains. There are currently quite some debates as to what can be defined as recycled, so if these DRs are to stay, EFRAG need to offer very clear guidance or support with good, illustrative examples as to what can be regarded as recycled materials and what can't.	ES	ES-5 - Resource outflows	17.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree The description of other recovery operations, item (c) iii, and of thermal-based disposal, item (d) i, are inconsistent with the EU waste regulation which leads to difference in the sustainability report compared to reporting under the waste regulation and possible to difference in application. This is, in particular, the case for "incineration", which can be interpreted to be included In both item (c) iii and (d) i. We suggest amending the definitions to match those of the waste regulation and waste hierarchy: -Prevention -Preparing for Re-use -Recycling -Other Recovery (incl. energy recovery) -Disposal At an Outreach event we, furthermore, understood, that there should by a link between the requirements in ESRS E5 and ESRS E1, and that energy recovery should be disclosed according to ESRS E1. If that is the case such link should be clearly stated and linked to the definition in the waste regulation.	ES	ES-5 - Resource outflows	18.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	One of the fundamental changes to the E5 standard regarding inflows is the expansion or addition of definitions for terms used within the standard. This is certainly a welcome development; however, in our opinion, there are still some inconsistencies in terminology that could cause interpretation problems in the future, both for reporting entities and audit firms. The proposed expanded definition of "Resource inflows" first defines inflows as "all materials, substances, and products entering an organization's operations or value chain for the purpose," but later in the definition clarifies that this includes "virgin and secondary raw materials (including energy carriers used for material purposes), semi-finished goods, and components, regardless of whether they are purchased, reused, or internally recovered." The remainder of the definition therefore refers to raw materials, semi-finished products, and components, but does not specify products (as indicated at the beginning of the definition). This may lead to confusion as to whether the issue of input resources is implicitly intended to apply only to producers who "process" raw materials, semi-finished products, and components to some extent. How does this apply to companies that purchase products (e.g., finished IT products, ready-made clothing) and sell them under their own brand (market them)?	ES	ES-4 - Resource Inflows	14.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	The proposal for a simplified ESRS E5 includes paragraph 4(a): "resource inflows (including mineral and biotic marine resources)." The emphasis on marine resources stems from changes to the ESRS E3 scope, but it is unclear whether water (both fresh and marine) should be treated as an input resource and disclosed in metric E5-4 (e.g., for companies using large amounts of water to produce goods)?	ES	ES-4 - Resource Inflows	4. (a)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The proposed simplified ESRS E5 states (new paragraph 15) that if input resources are considered material, the company must disclose the following information regarding key materials used in the production, placed on the market, or formed part of the supply of the company's products and services during the reporting period. This section of the ESRS therefore emphasizes that this issue also applies to key materials placed on the market (but also products). Referring to the revised definition of key materials, we notice that it specifies, among other things, that key materials can be sourced 'as is' or assembled in purchased goods and substances. Again, it seems unclear whether key materials should also be understood as finished products that the company does not process but merely sells on.	ES	ES-4 - Resource Inflows	15.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The new paragraph 15(a) specifies that the entity discloses "the key materials used to manufacture products, deliver them, and/or provide services." In our opinion, it is unclear what information the entity is expected to provide here. Is this intended to describe all materials, substances, and products entering the organization's operations or value chain for production, consumption, maintenance, or service provision that the entity considers significant (with respect to the definition of inputs)? Or was the intention to present key materials broken down into categories identified in the definition of key materials, such as: plastic, plastic-metal composite, colored fabrics, solvents, wood, fabrics or fibers, glass, foam, adhesives, and finishes.	ES	ES-4 - Resource Inflows	15. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The new paragraph 15(b) specifies that an entity discloses "the total weight of key materials with a breakdown per key material (in weight or percentage of total weight)." Analyzing this point raises the question of how to approach multi-component materials (e.g., purchased IT equipment)? From a business perspective, the purpose of conducting and publishing these calculations is also puzzling. For example, one year, a company used 100 kg of plastics, and the next year, it reduced production and used 80 kg (the product's ecological footprint remained unchanged; the company only recorded a loss of revenue). Another company also used 100 kg of plastics, and the following year, it implemented resource-efficient solutions, reducing the amount of plastics in the product while simultaneously increasing the amount, and used 150 kg of plastics. What is the purpose of presenting this data from a stakeholder perspective?	ES	ES-4 - Resource Inflows	15. (b)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	The new paragraph 15(c) specifies that the entity discloses "the percentage of total weight of critical and strategic raw materials." Considering the experience from the first year of reporting (problems with determining the weight of input resources) and the fact that the aim of the ESRS review is to reduce companies' sustainability reporting obligations, this requirement seems difficult to meet. How can companies purchasing semi-finished products or components collect data on the percentage and weight of individual critical and strategic raw materials? How can audit firms verify these calculations later?	ES	ES-4 - Resource Inflows	15. (c)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The new paragraph 15(d) specifies that an entity discloses "the percentage of the total weight of secondary resourced materials." Similar to the comment above, this point appears to require companies to collect detailed data from suppliers, and determining the weight of recycled materials in purchased raw materials, semi-finished products, or components may be difficult. How could auditors verify the value presented in this metric? Is a supplier's declaration that the material is recycled sufficient?	ES	ES-4 - Resource Inflows	15. (d)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The new paragraph 15(e) specifies that the entity discloses "the percentage of the total weight of key biological materials sustainably sourced." While the missing definition of biological materials is certainly valuable, the term is defined rather broadly and, in our opinion, may raise interpretation issues in the future. For example, trees are listed in the definition as the source of biological materials. Is impregnated/varnished wood still considered biological materials? Should all paper be considered biological materials? It seems advisable to refine the definition to clarify for entities what should be considered biological materials. The second issue related to this paragraph concerns what should be considered sustainably sourced biological materials. How can an auditor verify whether an entity has correctly determined the weight of key biological materials sustainably sourced? Should certificates, for example, be the only criterion (or are all of them sufficiently reliable)? In our opinion, this metric leaves much room for interpretation for reporting entities, and very little verification for auditors.	ES	ES-4 - Resource Inflows	15. (e)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	In the new AR 2 (up to paragraph 15 a) the term "technical material" is written in bold, but the definition is not included in Annex II to [Draft] Amended ESRS Exposure Draft July 2025 – Aggregated acronyms and glossary of terms.	ES	ES-4 - Resource Inflows	AR 2
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	As explained in the Basis for Conclusions for the [Draft] Amended ESRS Exposure Drafts – July 2025, the terminology for resource outflows has been updated from the former term 'products and materials' to the revised 'products and services'. Analyzing the disclosures indicated in the new paragraph 17, it can be seen that they apply only to products. What information should a company disclose if it considers its services relevant to implementing a circular economy model?	ES	ES-5 - Resource outflows	17.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	while a reference to GDR is included in the standard to support undertakings on how to report about policies, actions, metrics and targets, no reference to financial effects related requirement is included. This could cause confusion.	ES	ES - Objective	1.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Please note that Annex II specifically mention to all materials, substances, and products; however, apparently, it does not encompass services.	ES	ES - Objective	4. (b)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	should then this be included in the the S2?	ES	ES - Objective	9. (e)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	what about the implications in affected communities? for instance, incineration activities may impact on neighborhood	ES	ES - Objective	9. (f)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Since this is referred to policies, should better the related commitments explain here, instead of the "how"?	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We would suggest to align this requirement with the ones included in GRI 306-5: disposal operations: i. Incineration (with energy recovery); ii. Incineration (without energy recovery); iii. Landfilling; iv. Other disposal operations.	ES	ES-5 - Resource outflows	18.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E5 Resource Use & Circular Economy, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E5 Resource Use & Circular Economy, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	ES	ESRS E5 - Objective	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	ES	ESRS ES - Objective	5.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	Removal is welcome as other regulation already drives the requirements regarding ESG risk management and there is no need to further address this within ESRS, especially for the financial services sector.	ES	Disclosure Requirement E5-6 - An-cipated financial effects from material resource use and circular economy-related risks and opportunies	n/a
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We reject this new data point on the disclosure of critical and strategic materials, as this is sensitive information that we will not publish.	ES	ES-4 - Resource Inflows	15. (c)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	ES	ES-2 - Actions and resources related to resource use and circular economy	12.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	ES	ES-3 - Targets related to resource use and circular economy	13.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The information disclosed should only relate to "key materials" used by the entity. Although a definition of key material is provided, the selection criteria are very general and may be omitted.	ES	ES-4 - Resource Inflows	15.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Par. 15 is inconsistent regarding role of packaging materials in undertaking's resource inflows. The definition (Annex II) states that packaging are: "products made of any materials of any nature to be used for the containment, protection, handling, delivery, storage, transport and presentation of goods, from raw materials to processed goods, from the producer to the user or consumer". Therefore, packaging materials are not only those that are "part of the delivery", but they are used in all processes of product creation from resources extraction to products presentation. Also, materials used for packaging purposes may significantly differ from the materials used in products. Often, materials used for packaging have higher potential for recycling than materials used for products themselves. In conclusion, our suggestion is to include packaging as a important group of materials considered in DR 15 by replacing phrase "product and services" with phrase "products and it's packaging and services".	ES	ES-4 - Resource Inflows	15.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Par. 15 d) is inconsistent regarding requirement of disclosing "recycled materials used". Annex II neither defines "recycled materials" nor "recycling". Annex II defines only "secondary resources" as "materials previously used (secondary) and that are recovered from waste streams and reintroduced into production cycles, reducing reliance on primary resources and minimizing environmental impact." For clarity, "recycled materials" should be defind and included in "secondary resources" definition.	ES	ES-4 - Resource Inflows	15. (d)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Par. 17 d) is inconsistent regarding definition of "secondary resourced materials". "Secondary resources" are defined (Annex II) as "Materials previously used (secondary) and that are recovered from waste streams and reintroduced into production cycles, reducing reliance on primary resources and minimizing environmental impact." However, DR 17 d) requires disclosing of the rate of "recycled materials used", whereas Annex II neither defines "recycled materials" nor "recycling". For clarity, "recycled materials" should be defind and included in secondary resources definition.	ES	ES-5 - Resource outflows	17. (d)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Par. 15 a) should be consistently amended to address packaging of the products. We propose the following wording: "the key materials used to manufacture products and their packaging, deliver them and/or provide services;"	ES	ES-4 - Resource Inflows	15. (a)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Par. 17 d) should be consistently amended to address packaging of the products. We propose the following wording: "the rate of recycled materials in its key products and their packaging."	ES	ES-5 - Resource outflows	17. (d)
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	The disclosure of dependencies has been further weakened (to 'when relevant') in the new paragraph 1. The TNFD suggests to remove the specification 'when relevant' in paragraph 1 and reinstate, either at the level of ESRS 2 or at the level of the individual topical standard, a similar text to the Set 1 paragraphs, such as the one asking for disclosure of 'the nature, type and extent of the undertaking's material (...) dependencies (...) related to [Resource use and circular economy], and how the undertaking manages them'.	ES	E5 - Objective	1.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I agree	agree that these exceptions to the general rule are appropriate and justified.	ES	ES-4 - Resource Inflows	15.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	regarding the Critical Raw Materials Act, but if there is already a reporting obligation based on that Act, this new datapoint does not create an additional reporting burden and it does provide useful information to users of an Annual Report.	ES	ES-4 - Resource Inflows	15.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I agree	Agree with the rationale that is given.	ES	ES-5 - Resource outflows	16.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The DASB suggests that the standard also explains how a preparer should handle if materials that are initially waste reach the 'End-of-waste criteria'. These specify when certain waste ceases to be waste and becomes a product, or a secondary raw material. Waste Framework Directive - European Commission Should these amounts be deducted from the waste numbers? And if so, how to handle if there is a time lag? [This question is not specific to the amendments, but already present from the first Set of ESRS]	ES	ES-5 - Resource outflows	18.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	The basis for much of the information in the Circular Economy ESRS is the availability and reliability of metadata (e.g., if this piece of wood comes from a sustainably managed forest, does that also mean that this table—composed of multiple pieces of wood—is made from sustainable wood?). How this should be arranged or managed by companies is unclear. In other ESRS topics, guidance is provided on what to use (e.g., scenario analysis), but here it is missing.	ES	ES-4 - Resource Inflows	15.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	An important foundation is having insight into the chain of custody/production chain of the raw materials used. At present, this is absolutely not transparent, even though this is requested under points c. and d. The proposal is to mention the Chain of Custody ISO standard here as a possible option.	ES	ES-4 - Resource Inflows	15. (b)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Please note that this comment relates to the objective - paragraph 5 does not seem consistent with the other standards (for example E4).	ES	ES-1 - Policies related to resource use and circular economy	10.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Please note that this comment relates to the objective - paragraph 6 references to a disclosure objective of each DR, but I think this should be removed (also saw this in other E-standards)	ES	ES-1 - Policies related to resource use and circular economy	10.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Please note that this comment relates to the objective - paragraph is not visualised in a consistent way with E2/3/4 (there bullets are used). Also the dcomment in line with the comments on E2/3/4: it shows several legislations but there is no data-point referencing to it afterwards. As this only should be discloses when relevant and material, this probably will be adressed if it is relevant. It might be misleading to include the frameworks in the objective as it could lead to reporting immaterial information. In the log of amendments file I read it that it is now included because it was used as a source for the standard, then it can better be included in the standard as a source then as an objective.	ES	ES-1 - Policies related to resource use and circular economy	10.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Objective 8.) with 4 references to other EU Regulations increase complexity and uncertaintiy for preparer of sustainability statement. Please delete these references.	ES	ES-1 - Policies related to resource use and circular economy	10.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- Due to a missing comparable definition of key materials this DR is not aligned with the Qualitative characteristics of information in ESRS 1 - Appendix B) and it won't be comparable to other companies. Thus, DR 15 a. & b. should be deleted. - The draft refers to various categories of raw materials, including "critical raw materials," "strategic raw materials," "key materials," and "secondary raw materials." However, only "critical raw materials" and "secondary raw materials" are defined in Annex II. The terms "strategic raw materials" and "key materials" are not included in the glossary, creating ambiguity and potential inconsistency in interpretation. This may hinder consistent application of the disclosure requirement across reporting undertakings. - Reporting on "strategic raw materials" is not about ESG/sustainability reporting. Reporting must not be used as vehicle for data-collection for geostrategical questions of the European Union.	ES	ES-4 - Resource Inflows	15.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	For waste management companies it would be suitable to report on waste generated by their own operation, but also total waste managed due to the following breakdowns c., d. ,e.	ES	ES-5 - Resource outflows	18. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	The change of the denominator in the Exposure Drafts is unclear. Previously, both the share of secondary reused/recycled materials and the share of bio-based (sustainably sourced) raw materials were determined in relation to the total amount of raw materials. Now, for bio-based (sustainably sourced) raw materials, the denominator has been changed to the amount of bio-based raw materials only. The previous approach was more intuitive keeping the same denominator and the new one may result in confusion due to a company reporting a very high percentage, while in absolute terms the share of bio-based raw materials in the total remains rather small.	ES	ES-5 - Resource outflows	AR 1
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Standardised global reporting is difficult (e.g. definition of "hazardous waste" in the ESRS glossary: "Waste which displays one or more of the hazardous properties listed in Annex III of Directive 2008/98/EC"). Reporting according to local definitions and legal provisions should be made possible. This ESRS is not clearly defined and causes legal uncertainties. We recommend specifying these data points more closely or deleting them.	ES	ES-5 - Resource outflows	
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Combination of Data points with glossary: Definition of "Hazardous Waste" should be amended to "or local law" since no double-accounting shoule be necessary to fulfil only reporting requirements (e.g. measuring according to local law in non-EU-countries and addtional to Annex III of waste framework directive)	ES	ES-5 - Resource outflows	
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	'- Recyclable content: This is a new metric (rate of recycled materials) which will lead to a significant increase in burden. The data is currently not available, lack of common methodolgy and standards, disproportionate costs (especially for companies using a large number of raw materials, ingredients, etc.).. - It is suggested to qualify this requirement as qualitative. - It is suggested to apply/limit this requirement only to "key materials" as defined in Annex II to the Amended ESRS Exposure Draft July 2025.	ES	ES-5 - Resource outflows	17. (c)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- Too granular, data currently not available and disproportionate costs. Data retrieval is very difficult since operators involved in disposal-related activities often are not direct partners of the company generating waste. - Reporting information on the value chain activities will be difficult for the first years and we suggest to qualify this information as qualitative or to consider adopting a phase in approach.	ES	ES-5 - Resource outflows	18. (d)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Companies that do not use radioactive substances in their production processes should not be required to report them. Exceptions should be introduced for laboratory applications, measuring instruments, markers, naturally occurring radioactive materials, and activities below the exemption threshold of radiation protection legislation, in order to avoid the effort of reporting insignificant quantities and negligible exposures.	ES	ES-5 - Resource outflows	19.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E5. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E5	E5 - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Para. 7 should in addition to the Green Deal also mention the Clean Industrial Act.	E5	E5 - Objective	7.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We welcome the introduction of "key materials" in the standard, which increases the proportionality of DR E5-4. However, the introduction of "key materials" comes with the challenge of defining the term appropriately. The current definition is not fit for purpose, leaving too much room for inconsistent interpretations. In line with EFRAG's mandate to increase consistency with other pieces of EU legislation, we recommend to define key materials as follows: 1.materials included in the "list of relevant raw materials" under Art. 6 of Regulation (EU) 2024/1244 (Industrial Emission Portal-Regulation), if used by the undertaking, complemented by 2.additional materials that are essential for the undertaking's manufacturing and delivery of products and services or that are a driver of its material impacts, risks and opportunities. This approach would ensure a uniform and clear basis of what is considered a key material and would leave flexibility for companies to include additional materials that are relevant to their specific circumstances. The delegated act under Art. 6 IEP-Regulation is to be adopted by 31 December 2025 and would therefore be in time for the ESRS revision.	E5	E5-4 - Resource Inflows	15.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	While we consider the metrics proposed by EFRAG a step forward, we question the relevance of metrics that are based on the total weight of materials, since the use of different materials can vary by many orders of magnitude and the overall amount does not provide a good indication of environmental or social impacts, nor (financial) risks and opportunities. We, therefore, suggest to focus on the following datapoints in [Draft] amended ESRS E5-4: 1.the key materials used to manufacture products, deliver them and/or provide services 2.for each key material, whether it contains critical raw materials or strategic raw materials 3.the overall number of critical and strategic raw materials that are contained in its key materials 4.the percentage of key materials in dry weight that are from secondary sources. (text proposal see next line)	E5	E5-4 - Resource Inflows	15.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Text proposal for new set of metrics: "15. When 'Resource Inflows' is assessed as a material topic, the undertaking shall disclose: a) the key materials used to manufacture products, deliver them and/or provide services; and for each key material: (i) whether it contains critical raw materials or strategic raw materials; (ii) the percentage in dry weight that is from secondary sources; (b) the overall number of critical and strategic raw materials that are contained in its key materials	E5	E5-4 - Resource Inflows	15.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Text proposal for new application requirements: "Para. 15 (a)(i): Key materials can be raw materials, components or products procured. In case of key materials that are components and products, the undertaking shall report whether these contain critical raw materials or strategic raw materials. Para. 15 (a)(ii): The percentage ratio shall be calculated by dividing the dry weight of the key material that is from secondary sources by the total dry weight of the key material procured in the reporting period. The requirement also applies to key materials that are components or products. Para. 15 (b): If critical or strategic raw materials are contained in more than one key material, their number shall not be double counted." NMIG: include an examplary reporting template (table), with columns "Key material", "Is or contain a critical raw material?", "Is or contains a strategic raw material", "% of key material that is from secondary sources". Lines are the respective key materials.	E5	E5-4 - Resource Inflows	15.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Please consider the following proposals for ESRS E5-related terms and definitions: - Generally, we recommend to cross-check all definitions with the terminology from ISO 59004:2024 "Circular economy — Vocabulary, principles and guidance for implementation" and relevant legislation. - "resources" is used frequently in the, but not defined. It should be clarified in a separate definition that "resources" means "material resources" in the ESRS, not natural resources more broadly, nor financial nor human resources. This would help to clarify and be in line with how The International Resource Panel at UNEP is using the term. - "Circular economy principles" is used inconsistently and should be aligned with common frameworks such as 10R or Narrow/Slow/Close/Substitute. - "circular material use rate" is defined but not used in the standard. The definition is also unclear because it does not define "circular material use" and does not link to the definition of "secondary resources". It should be deleted.	E5	E5 - Objective	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Further on definitions: - The new definition for "resource efficiency" introduces the term "material consumption" which is not explained. Instead, the definition should refer to the already defined term "resource inflow". We also not that resource efficiency is not used in ES. - The new definition for "secondary resources" misses the fact that those resources can also come from non-waste streams, e.g. by-products such as metallurgical slags. Hence, it should be amended to "waste and non-waste streams" - "sustainably sourced" is referring only to the assessment of direct suppliers. It is not in line with the OECD Guidelines for Multinational Enterprises for Responsible Business Conduct. Moreover, the term is not correctly used in the standard. The definition should either be removed or fundamentally revised. If our proposal to amend the set of metrics is adopted, the definition would not be needed anymore.	ES	ES - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Further on definitions: - the defintiion of „Critical raw materials" should be extended by "low end-of-life recycling input rates", so that it reads: „Critical raw materials are materials that have high economic importance and are subject to supply risk, due to factors such as geographic concentration, economic or geopolitical limitations, low end-of-life recycling input rates, or difficulties in substitution. Critical raw materials are those listed in Annex II, Section 1 in the Critical Raw Materials Acts (2023)."	ES	ES - Objective	15. (c)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Further on definitions: - in the definition of "strategic raw materials", the phrase "subset of critical raw materials" should be deleted. It should better align with the CRMA, which states in recital 6: "raw materials that are of high strategic importance for the functioning of the internal market, taking into account their use in strategic technologies underpinning the green and digital transitions or for defence or aerospace applications, that are characterised by a potentially significant gap between global supply and projected demand, and for which an increase in production is relatively difficult, for instance due to long lead-times for new projects increasing supply capacity." and in Art. 3 (2): "the raw materials that score among the highest in terms of strategic importance, forecasted demand growth and difficulty of increasing production."	ES	ES - Objective	15. (c)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	"Circularity" is highlighted as a defined term but not included in Annex II (Glossary). It should be defined in the finalization of the standard.	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	"Circularity" is highlighted as a defined term but not included in Annex II (Glossary). It should be defined in the finalization of the standard.	ES	ES-4 - Resource Inflows	14.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	It should be be specified whether the reported weight of waste is in dry- or wet weight (which is especially relevant for organic waste).	ES	ES-5 - Resource outflows	AR 4
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The definition of "durability" should be aligned with the definition in the ESPR: " 'durability' means the ability of a product to maintain over time its function and performance under specified conditions of use, maintenance and repair;"	ES	ES-5 - Resource outflows	17. (a)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The definition of "ecodesign" should be aligned with the definition in the the ESPR: "'ecodesign' means the integration of environmental sustainability considerations into the characteristics of a product and the processes taking place throughout the product's value chain;"	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The definition of "scope of repairability" should not relate to "placing on the market" since this is not a product characteristc and, in line with the ESPR definition for "repair", also cover waste: "Extent to which a product or waste is designed in a manner that enables it to be restored to proper functioning through repair activities, taking into account factors such as product design, ease of disassembly, availability of spare parts and tools, accessibility of repair and maintenance information, and the legal and practical conditions under which end- users, professional repairers, or independent operators can carry out such repairs..."	ES	ES-5 - Resource outflows	17. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	For issuers that are not producers, but still find resource inflows material (eg. Electronics resellers), there should be a relief allowing for qualitative disclosure based on industry analysis and averages, as extracting data from electronics producers is often difficult and would require significant administrative effort.	ES	ES-4 - Resource Inflows	15.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	For issuers that are not producers (eg. Electronics resellers), there should be a relief allowing for qualitative disclosure based on industry analysis and averages, as extracting data from electronics producers is often difficult and would require significant administrative effort, not proportional to the value for end user.	ES	ES-5 - Resource outflows	17.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Issuers that are not producers should be exempted from this requirement.	ES	ES-5 - Resource outflows	17. (c)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also "key products and services" (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure)	ES	ES-4 - Resource Inflows	15.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is suggested to clarify that this DR applies only to companies that are subject to the CRM Act: "the percentage of total weight of critical and strategic raw materials, whenever the undertaking is required to assess those material flows according to the CRM Act regulations".	ES	ES-4 - Resource Inflows	15. (c)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The description of the interaction with other ESRS in this standard differs from that in other environmental ESRS. Rather than clearly delineating the boundaries for disclosures between the standards, it presents more of an interpretation or opinion. Recommend revising Disclosure Requirement E5-9 (items a to f) to enhance clarity and consistency. The updated text should eliminate subjective language and instead establish clear, factual boundaries for reporting across the relevant ESRS standards.	ES	E5 - Interaction with other ESRS	9.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	ES	ES-2 - Actions and resources related to resource use and circular economy	2.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	The concept of recyclable content in the chemical industry is not as straightforward as in other industries for several reasons: i) many chemical products are being transformed in their first life cycle step and cannot therefore be considered recyclable, ii) the concentration of a chemical substance in a product will have an impact on the recyclability of the product, and iii) recyclable content of chemicals in products depends on the existence of collection/separation and re-marketing facilities.	ES	ES-5 - Resource outflows	17. (c)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While we agree with the changes proposed, additional definitions (e.g. sustainable-sourced products, secondary intermediary product) and clarifications (need for specific certifications for sustainably-sourced products, minimum content of biological material for considering a product as sustainable-sourced, minimum content of reused or recycled components in products/packaging for considering a raw material/packaging as covered by this datapoint) are required in [DRAFT] paragraphs 15 (d) and (e).	ES	ES-4 - Resource Inflows	15.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The definition of hazardous waste is based on an EU regulation. For a multinational organization, it is not practible nor in accordance with local laws, to account waste based on EU frameworks. Waste categorization is highly location-specific, and thus - should allow for some flexibility in terms of definition. In such cases, the ESRS may propose a "preferred" definition - however, should higlight that different definitions of hazardous may be applicable depending on global footprint.	ES	ES-5 - Resource outflows	18.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	Switch from quantitative metric to narrative-based is appreciated.	ES	ES-5 - Resource outflows	17.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	Switch from quantitative metric to narrative-based is appreciated.	ES	ES-5 - Resource outflows	17.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Concept of “Remanufacturing” – is defined but not mentioned in the E5 standard. It is therefore not clear where it should be considered.	ES	ES-5 - Resource outflows	18.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is unclear how does the E5 Standard consider By-Products. By-Products are defined in the EU Waste Directive, but not explicitly allocated to either metric element for Resource inflows or outflows.	ES	ES-5 - Resource outflows	18.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	“Recyclable” and “Recycled” materials are not specifically defined; it is unclear whether the definitions of “Recycling” are to be considered in this context.	ES	ES-5 - Resource outflows	18.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is unclear whether "recycling" covers by-products or only materials that were recovered from waste streams, excluding by-products; and whether materials such as supplementary cementitious materials are covered (i.e. materials that were not necessarily used previously, but produced as by-product in production processes without direct use, and then used as input material, thereby diverting the volume from waste). Overall, the concept of "recyclability" in the chemical industry is not as straightforward as in other industries since i) the concentration of a chemical substance in a product will have an impact on the recyclability of that product (both technical and financial), and ii) recyclable content of chemicals in products depends on the existence of collection/separation and re-marketing facilities.	ES	ES-5 - Resource outflows	18.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	It is unclear if the definition of “secondary reused materials” covers by-products or materials such as supplementary cementitious materials (i.e. materials that were not necessarily used previously, but produced as by-product in production processes without direct use, and then used as input material, thereby diverting the volume from waste).	ES	ES-4 - Resource Inflows	15.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Circular material use rate is defined but not mentioned elsewhere in the E5 standard draft. It is unclear if this metrid is supposed to be linked to Resource Inflows or Resource Outflows. Need more clarification for what is meant by "circular use" (i.e. recovered, reused, recylced).	ES	ES-4 - Resource Inflows	15.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	The change of the denominator in the Exposure Drafts is unclear. Previously, both the share of secondary reused/recycled materials and the share of bio-based (sustainably sourced) raw materials were determined in relation to the total amount of raw materials. Now, for bio-based (sustainably sourced) raw materials, the denominator has been changed to the amount of bio-based raw materials only. The previous approach was more intuitive keeping the same denominator and the new one may result in confusion due to a company reporting a very high percentage, while in absolute terms the share of bio-based raw materials in the total remains rather small.	ES	ES-5 - Resource outflows	1.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We would like to flag a potential timing issues with the ESPR, since the publication of the relevant Delegated Acts for all the sectors will take several years. A relief measure/postponement could be included.	ES	ES-4 - Resource Inflows	15. (c)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	The ESRS requirements for reporting waste should be aligned or mapped with the Recovery and Disposal Operations codes outlined in Annex I and Annex II of the Waste Framework Directive (WFD) (Directive 2008/98/EC). Currently it is unclear and open to too much interpretation on whether waste that is thermally treated, either at waste-to-energy plants or high-temperature incineration plants which recover energy and generate electricity and district heating, should be reported as “other recovery operations” or “thermal-based disposal/incineration”).	ES	ES-5 - Resource outflows	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	We suggest the following changes in the Disclosure Requirement ESS-5 – Resource outflows paragraph 18(c): c) the percentage and/or total weight diverted from disposal, with a breakdown between hazardous waste and non-hazardous waste, and a breakdown by the following recovery operation types: i. preparations for reuse; ii. recycling; and iii. other recovery operations; (This type should be split into material recovery and energy recovery. The option energy recovery should include recovery code R1 (Use principally as a fuel or other means to generate energy) as outlined in the Annex II of the Waste Framework Directive (Directive 2008/98/EC).) (d) the percentage and/or total weight directed to disposal with a breakdown between hazardous waste and non-hazardous waste, and a breakdown by the following disposal operation types: i. thermal-based disposal; (We believe that this type should be reverted back to incineration, and it should only include disposal codes D10 (Incineration on land) and D11 (Incineration at sea) as outlined in Annex I of the Waste Framework Directive (Directive 2008/98/EC)). ii. landfill; and iii. other disposal operations)	ES	ES-5 - Resource outflows	18. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Analogous to ES-4, it should be made clearer that the metrics for resource outflows are only to be reported if the sub-topic has been assessed as material. The requirements are formulated more clearly and concisely. There is no definition of 'key products'. With a wide variety of products in countless areas of application, a pragmatic answer must be possible.	ES	ES-5 - Resource outflows	17.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Analogous to ES-4, it should be made clearer that the metrics for waste are only to be reported if the sub-topic has been assessed as material	ES	ES-5 - Resource outflows	18.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Resource inflows is mentioned as a sub-topic in the topics list in ESRS Appendix A, so the sentence should be adapted to "When 'Resource Inflows' is assessed as a material sub-topic [...]". In this context, the topic list in Appendix A should already indicate that resource inflows only refer to key materials and not e.g. to components, so that the sub-topic is not considered material due to components.	ES	ES-4 - Resource Inflows	15.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	In the definition of key materials, the phrase "(can be sourced 'as is' or be assembled in goods and substances purchased)" should be deleted to clarify that it refers only to materials and not to prefabricated components/assemblies	ES	ES-4 - Resource Inflows	15.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	This is difficult to answer without burdening the supply chain with information about preliminary products. It should be possible to use standard values/average values here.	ES	ES-4 - Resource Inflows	15. (d)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	'total weight of critical and strategic raw materials' not meaningful; very high data collection efforts necessary, especially for critical/strategic raw materials that are/might be included in other products	ES	ES-4 - Resource Inflows	15. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	why are 'critical and strategic raw materials' mentioned? - strategic might be deleted, as all strategic raw materials listed in Critical Raw Materials Act are listed as critical raw materials too	ES	ES-4 - Resource Inflows	15. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	'critical and strategic raw materials' is not material for all companies and should therefore be marked as optional datapoint	ES	ES-4 - Resource Inflows	15. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	'biological materials' is not material for all companies and should therefore be marked as optional datapoint	ES	ES-4 - Resource Inflows	15. (e)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	This seems an extension of the DA. The content was moved from ES-5 Resource inflows and now includes the term "eco-design principles" which is not mentioned in the DA-	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The introduction of a new KPI counteracts the aim of reduing the reporting requirements and burden. Based on the new KPI, resource inflow needs to be reported on a more granular level, which increases the data requirement again. Not only is the information extremly challenging to obtain (as it requires information from the value chain and migh need IT adjustments) but transparency on the purchased material structure is sensitive information and might lead to competitive disadvantages.	ES	ES-4 - Resource Inflows	15. (c)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	It is unclear what constitute "materials used to manufacture the undertaking's products and services". Is the generation and sale of electricity in scope? Is the construction and sale of power plants in scope? Should we only include the key materials that goes into the production of products/services, and exclude key materials that goes into the construction of new manufacturing facilities or power plants?	ES	ES-4 - Resource Inflows	15.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Is energy (e.g., electricity, district heating) considered a product? If an undertaking is building and selling power plants, are the power plants considered products?	ES	ES-5 - Resource outflows	17. (a)
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	In case of a high consuming and producing company, some types of waste my be immaterial when comparing total volumes. For resource inflows for instance it is clearly stated that you should only indicate numbers and figures for material resources, this clarification is lacking for especially waste and may help to avoid discussions with auditors.	ES	ES-5 - Resource outflows	18.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I agree	ESRS 5 Resource outflows is the only standard where "product groups" are mentioned. However there is no further explanation what is meant by product groups. Also the NMIG doesnt mention examples. Please add a clarification or examples what is meant by product groups.	ES	ES-5 - Resource outflows	17.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	At present, the notion of critical and strategic raw materials may evolve over time with the development of the Critical Raw Materials Act, and as the delegated acts deriving from the Eco-design for Sustainable Products Regulation are not yet approved. Companies consider this information hard to access and publish, particularly since these materials are often mixed with others. In this evolving context, this datapoint shall be inserted in the NMIG. For issuers that are not producers, but still find resource inflows material, a phase-in approach should be adopted targeting at the begining product that are designed by those issuers.	ES	ES-4 - Resource Inflows	15. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	"Preparation for reuse" does not correspond to any of the R/D codes of the Waste framework directive. This information should be retained only in the narrative part. In the future French translation of this standard, the title should be corrected to refer to "réutilisation" rather than "réemploi". Issuers that are not producers should be exempted from this requirement if no public database are available.	ES	ES-5 - Resource outflows	18. (c)
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	What is the added value of this information? It should also be noted that some wastes are diverted from disposal, but their final destination remains unknown.	ES	ES-5 - Resource outflows	18. (e)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose re-integrating the breakdown between key technical and biological materials. The integration of this information would be useful for readers and for the organizations to better categorize the large family of "materials".	ES	ES-4 - Resource Inflows	15. (b)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose providing a more precise description of what "sustainably sourced" means, so that the organization can better understand what should be reported. We also suggest revising the definition in the glossary.	ES	ES-4 - Resource Inflows	15. (e)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We noted an inconsistency in the denominators. We propose also defining a comprehensive denominator for paragraphs 15 (c), (d), (e), in order to semplify and harmonize the reporting requirements for companies.	ES	ES-4 - Resource Inflows	AR 1
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Good definition and focus of "key materials" for manufacturing. No mention anymore of process materials, packaging, water and property, plant and equipment.	ES	ES-4 - Resource Inflows	15. (a)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Further „breakdown per key material" involves increased and additional effort. Currently there is just an overall total weight of technical and biological materials necessary	ES	ES-4 - Resource Inflows	15. (b)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Not evaluable with current IT-Tool landscape	ES	ES-4 - Resource Inflows	15. (c)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Good focus on „secondary resourced materials". No mention anymore of reused and recycled materials/ components and packaging.	ES	ES-4 - Resource Inflows	15. (d)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Good definition of biological materials and focus of percentage with sustainably sourced materials on total weight of key biological materials.	ES	ES-4 - Resource Inflows	15. (e)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Rate of recyclable materials and their packaging ? Is here the focus just on the "recyclability of materials in product" and should packaging (like product protection) disclosed separately	ES	ES-5 - Resource outflows	17. (c)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Further "rate of recycled materials used in its "key products"" involves increased and additional effort. Added value questionable because 15. (d) "percentage of total weight of secondary resourced materials" also in the key products indirectly included	ES	ES-5 - Resource outflows	17. (d)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This new requirement would entail additional work if this case were to arise.	ES	ES-5 - Resource outflows	18. (e)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Significant improvement, as the example makes it clearer what level of detail is required here.	ES	ES-5 - Resource outflows	AR 5
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	No objection	ES	ES-5 - Resource outflows	AR 4
Excels	PwC International Limited	Auditor	United Kingdom			I agree	The scope of the requirement to disclose metrics on key materials (used to manufacture, put on the market, or part of the delivery of the undertaking's products and services) is still ambiguous. The term 'undertaking's products and services' is not defined, raising questions about whether this obligation applies to retail chains, distributors, or importers (i.e. entities that buy and resell products)—or whether it applies solely to entities that manufacture using their own factories or outsourced production. Additionally, it is unclear if the reference to materials that are "part of the delivery" includes packaging, which is no longer explicitly mentioned in the current provisions. For service providers, such as real estate developers, it is also uncertain whether materials used in the execution of services—like building materials—must be reported under this requirement.	ES	ESRS E5 - Objective	15.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E5 Resource Use & Circular Economy, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	ES	E5 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary duplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	ES	E5 - Objective	5.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Comment on Disclosure Requirement 18 (a–c) – Waste: When applying the ESRS at the consolidated level—particularly where the ultimate parent company is located outside the EU—significant challenges arise due to differing definitions and classifications of "waste" across countries and regions. These inconsistencies make straightforward aggregation of waste data impractical and may lead to misleading disclosures. Recommendation: Consider removing this requirement.	ES	ES-5 - Resource outflows	5.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Since Outflow now focuses on key products, more efficient disclosure is possible. Similarly, Inflow now focuses on key materials, but since it does not focus on key products, the scope of disclosure differs from Outflow. Therefore, Inflow should also focus on key materials of key products.	ES	ES-4 - Resource Inflows	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding the percentage of total weight of critical and strategic raw materials, in order to be consistent with the CRM act, the target should be limited to raw materials that are extracted, processed, and recycled within Europe, rather than all products sold in Europe.	ES	ES-4 - Resource Inflows	15. (c)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	(We basically recommend deleting DR 18(a–c) on waste for the reasons stated in ES-5.) Previously, there was a condition that "The undertakings for which outflows are material shall disclose." However, this condition was deleted in this amendment and all undertakings are required to disclose. On the other hand, In ES-4, the condition is set as "When 'Resource Inflows' is assessed as a material topic,". We request to align the condition of outflows and inflow to disclose.	ES	ES-5 - Resource outflows	17.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	(We basically recommend deleting DR 18(a–c) on waste for the reasons stated in ES-5.) There is a requirement to disclose recyclability, but the definition is unclear.	ES	ES-5 - Resource outflows	17. (c)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	(We basically recommend deleting DR 18(a–c) on waste for the reasons stated in ES-5.) Disclosure of the recycling material usage rate has been added, but this is almost the same as the disclosure of secondary resourced materials in Inflow 15(d), resulting in duplication. Therefore, only one of the two should be disclosed.	ES	ES-5 - Resource outflows	17. (d)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	(We basically recommend deleting DR 18(a–c) on waste for the reasons stated in ES-5.) Waste has become one of the items in ES-5 resource outflow, but while Products and services target key products, Waste does not have a specific target. As with Products and services, Waste should target operations related to key products.	ES	ES-5 - Resource outflows	18.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	(We basically recommend deleting DR 18(a–c) on waste for the reasons stated in ES-5.) We request clarification of the scope of "waste" in "total weight of waste for which the final destination is unknown." It should be clarified whether "waste" covers all waste or only specific categories of waste.	ES	ES-5 - Resource outflows	18. (e)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The introduction of a new KPI counteracts the aim of reduing the reporting requirements and burden. Based on the new KPI, resource inflow needs to be reported on a more granular level, which increases the data requirement again. Not only is the information extremly challenging to obtain (as it requires information from the value chain and migh need IT adjustments) but transparency on the purchased material structure is sensitive information and might lead to competitive disadvantages.	ES	ES-4 - Resource Inflows	15. (c)
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ETSA members question the feasibility of establishing environmental targets linked to science and ecological thresholds, as suggested in GDR-T, especially for resource-related targets. In order for preparers to do so, target setting methodologies should be elaborated.	ES	ES-3 - Targets related to resource use and circular economy	13.
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	When reporting on "the rate of recycled materials" ETSA members stress the fact that if no or only limited proportions of recycled materials can be used due to technical standards – that this should be taken into account when comparing companies, industries and applications in terms of sustainability performance. In the field of personal protective equipment in particular, the use of recycled fibres can only be possible to a limited extent without compromising the necessary safety standards. ETSA members that report on the rate of recycled content in textiles will provide the necessary context on why certain levels of recycled content can(not) be integrated.	ES	ES-5 - Resource outflows	17. (d)
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I agree	ESRS ES is largely seen as consistent with its previous iteration. ETSA welcomes the clearer link that is being made with other flagship legislative packages like the Circular Economy Act, the CRM act and the ESPR.	ES	ES - Objective	8.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This streamlines the process by no longer considering the value chain. However, this now requires more disclosures. More clarification is needed for "key materials".	ES	ES-4 - Resource Inflows	15.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The process is now streamlined as only "key" products are required. However, more clarity is needed for the wording "key"	ES	ES-5 - Resource outflows	17.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	While the aim of this amendment is to bring more flexibility because it allows companies to report percentages instead of amounts, this DR is still burdensome because: - The amended waste requirements introduce a new metric that increases reporting burden by adding categories not aligned with the EU Waste Framework Directive, specifically for waste with an "unknown final destination". Creating a separate category forces companies to maintain parallel reporting systems, leading to overlap and reduced comparability. - There is no prescription on how to consider the upstream value chain if waste is identified as a material topic only in the company's value chain (i.e. in case it is not material in its own operations).	ES	ES-5 - Resource outflows	18.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Suppliers currently do not have a legal obligation to provide information on recyclability. As a result, disclosure provided by undertakings will be purely based on available information in the value chain and cannot be verified. On the other hand, it is required by companies to list the material composition and EoL instructions (including recycling potential) in the digital product passport required by the ESPR. The information provided in the digital product passport is specific to each product and will allow users to take more informed decisions. In view of this, CSRD should either: a. Mandate the accurate provision of material composition and/or recyclability information supplied to downstream users by suppliers, or b. Make this DR non-mandatory since the pertinent information is already available in the digital product passport. Current ESRS definitions do not clearly define key products and materials leading to potential discrepancy across companies to report KPIs related to the same. Clear guidance is needed on definition of key products or materials.	ES	ES-5 - Resource outflows	5.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	A standard metrics / a general classification scheme is required for industry wide usage across the KPIs required for resource inflows to enable standardization across companies for reporting.	ES	ES-4 - Resource Inflows	4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	At present, the notion of critical and strategic raw materials may evolve over time with the development of the Critical Raw Materials Act, and as the delegated acts deriving from the Eco-design for Sustainable Products Regulation are not yet approved. Companies consider this information hard to access and publish, particularly since these materials are often mixed with others. In this evolving context, this datapoint shall be inserted in the NMIG. For issuers that are not producers, but still find resource inflows material, a phase-in approach should be adopted targeting at the begining product that are designed by those issuers.	ES	ES-4 - Resource Inflows	15. (c)
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	"Preparation for reuse" does not correspond to any of the R/D codes of the Waste framework directive. This information should be retained only in the narrative part. In the future French translation of this standard, the title should be corrected to refer to "réutilisation" rather than "réemploi". Issuers that are not producers should be exempted from this requirement if no public database are available.	ES	ES-5 - Resource outflows	18. (c)
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	What is the added value of this information? It should also be noted that some wastes are diverted from disposal, but their final destination remains unknown.	ES	ES-5 - Resource outflows	18. (e)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	This paragraph introduces a new more granular requirement, namely a breakdown by key materials by weight, which will add extra complexity and effort without adding value. This will particularly penalise Wave 1 companies that have already invested substantial time, efforts and money to comply with the existing standard and meet the current requirements. Also this new requirements still does not clarify if this should include secondary products as inflows during their second life. The initial requirements to be kept and proposed amendments deleted.	ES	ES-4 - Resource Inflows	15. (b)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	This paragraph introduces a new more granular requirement, namely a breakdown of strategic and critical raw materials by weight, which will add extra complexity and effort without adding value. This will particularly penalise Wave 1 companies that have already invested substantial time, efforts and money to comply with the existing standard and meet the current requirements. Also this new requirements still does not clarify if this should include secondary products as inflows during their second life. The initial requirements to be kept and proposed amendments deleted.	ES	ES-4 - Resource Inflows	15. (c)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	The difference between this disclosure requirement and the one under paragraph 17. d) is unclear. DR 17. d) should be maintained in the standard while the DR 15. d) should be deleted.	ES	ES-4 - Resource Inflows	15. (d)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	This is clearer now.	ES	ES-5 - Resource outflows	17. (b)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	This is now clearer.	ES	ES-5 - Resource outflows	17. (d)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	Clarity is needed on whether estimations are allowed or not when classifying the waste, in cases where no primary data is available. Should it be the case, such an approach would be inconsistent with ESRS 1 and ESRS 2 standards. This requirement should be removed or reformulated to be made optional.	ES	ES-5 - Resource outflows	18. (e)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	Former paragraph 40 has been deleted (would have followed 19, but no new number). This deletion makes it unclear if and to what extent estimations and assumptions are acceptable.	ES	ES-5 - Resource outflows	18.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We find that this requirement has been added/changed from a "may" to a "shall" but is not counted as such and is not highlighted in Q23. Furthermore, we note that the requirement essentially drives detailed reporting on how other EU-legislation is met. We believe the relevant elements would be covered by the general reporting requirement in ESRSE5, paragraph 10, at an appropriate level.	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We disagree to the amended standard as it increases the reporting requirement on resource inflows to include a breakdown on weight by key material and percentages of certain categories. This is an increase in the disclosure requirement which will impose a significant increase in the reporting burden. This should in particular be seen in relation to the definition of "key" products which includes a large range of products, which may be purchased in bulks as well as be included in raw material or assembled in semi-finished goods. It should, furthermore, be noted that such information would be confidential and business critical if disclosed for certain businesses. We disagree to this extension and suggest maintaining the requirements from current ESRS 5.	ES	ES-4 - Resource Inflows	15.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We disagree to the requirement to report on the recycled materials used in key products and their packaging. This is a significant reporting burden as many outflow-products depend on inflows that are mixed on reused/recycled and new/virgin materials. Therefore, the information would be impractical or add significant administrative or reporting burden both for entity and across the value chains. There are currently quite some debates as to what can be defined as recycled, so if these DRs are to stay, EFRAG need to offer very clear guidance or support with good, illustrative examples as to what can be regarded as recycled materials and what can't.	ES	ES-5 - Resource outflows	17.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree The description of other recovery operations, item (c) iii, and of thermal-based disposal, item (d) i, are inconsistent with the EU waste regulation which leads to difference in the sustainability report compared to reporting under the waste regulation and possible to difference in application. This is, in particular, the case for "incineration", which can be interpreted to be included In both item (c) iii and (d) i. We suggest amending the definitions to match those of the waste regulation and waste hierarchy: -Prevention -Preparing for Re-use -Recycling -Other Recovery (incl. energy recovery) -Disposal At an Outreach event we, furthermore, understood, that there should by a link between the requirements in ESRS E5 and ESRS E1, and that energy recovery should be disclosed according to ESRS E1. If that is the case such link should be clearly stated and linked to the definition in the waste regulation.	ES	ES-5 - Resource outflows	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Sustainably sourced' is a not defined and is a vague term. There should be a requirement for an undertaking to define in its disclosures how it has been applied if it is using this term.	ES	ES-4 - Resource Inflows	15. (e)
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	It should be clarified if retail companies are intended to be included in the scope of this requirement.	ES	ES-4 - Resource Inflows	15.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	There is a risk of double counting in waste reporting: incineration with energy recovery (Directive 2008/98/EC Annex II, category R1) appears to be covered under both 'Other recovery operations' [para. 18.c)iii] and 'Thermal-based disposal' [para. 18.d)i)], depending on interpretation. This could cause inconsistency in categorisation: sometimes as recovery, sometimes as disposal, depending on interpretation. The approach should be clarified to ensure consistent classification and disclosure.	ES	ES-5 - Resource outflows	18. (d)
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: This seems an extension of the Delegated Act. The content was moved from E5-5 Resource inflows; and now it contains the term "eco-design principles" which is not mentioned in the delegated act.	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL regaring BfC, para 388: The reference seems wrong; the Eco-design for Sustainable Products Regulation has got the identifier "(EU) 2024/1781".	ES	ES-1 - Policies related to resource use and circular economy	11.
Excels	DRSC	(National) standard setter	Germany			I disagree	Para 15 (e) reintroduces the limitation of biological materials to "sustainably sourced". The market wants a total figure for biobased materials, this metric is highly disputable and not relevant if limited.	ES	ES-4 - Resource Inflows	15. (e)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: The delegated act requires disclosure of the "percentage of biological materials … sustainably sourced" in relation to "materials used to manufacture the undertaking's products and services" (para 31, 31(b)). The ED proposes to require "biological materials sustainably sourced" in relation to "key biological materials" (para 15(e), para AR1, second sentence). We note, this constitutes a change in the disclosure. At least, the figure (percentage) will significantly increase as the denominator in the ED ("key biological materials") is just a subset of the denominator of the delegated act ("materials used to manufacture the undertaking's products and services").	ES	ES-4 - Resource Inflows	15. (e)
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: This seems an extension of the Delegated Act: Additional labelling requirement increases the granularity.	ES	ES-4 - Resource Inflows	AR 2
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: According to BfC 379 this is meant to be a clarification. However, we note two stages of the value chain are mixed together. Para 17(d) of the ED addresses "rate of recycled material used in key products ", and it relates to resource outflows. This datapoint is not in the delegated act, so it is a new datapoint (a disclosure on the recycled content in products is not required in the delegated act). At the same time, it is proposed to amend 31(c) in resource inflows ("the weight … of secondary reused or recycled components …) to require disclosing "secondary resourced materials" in ED E5.15(d), which leaves it to the undertaking to understand the difference – if any – to current 31(c). Furthermore, the new datapoint in ED E5.17d will result in additional burden.	ES	ES-5 - Resource outflows	17. (d)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: Clarification is needed whether "thermal-based disposal" is something different to "thermal recovery".	ES	ES-5 - Resource outflows	18. (d)
Excels	DRSC	(National) standard setter	Germany			I disagree	On 18(d)(i): Standardised global reporting is difficult (e.g. definition of "hazardous waste" in the ESRS glossary: "Waste which displays one or more of the hazardous properties listed in Annex III of Directive 2008/98/EC"). Reporting according to local definitions and legal provisions should be made possible. This ESRS causes legal uncertainties. We recommend specifying these data points more closely or deleting them.	ES	ES-5 - Resource outflows	18. (c)
Excels	DRSC	(National) standard setter	Germany			I agree	As this new para seems to help undertakings in preparing the reports, the addition is regarded helpful.	ES	ES-5 - Resource outflows	18. (e)
Excels	DRSC	(National) standard setter	Germany			I disagree	(1) Companies that do not use radioactive substances in their production processes should not be required to report them. (2) Exceptions should be introduced for laboratory applications, measuring instruments, markers, naturally occurring radioactive materials, and activities below the exemption threshold of radiation protection legislation, in order to avoid the effort of reporting insignificant quantities and negligible exposures.	ES	ES-5 - Resource outflows	19.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflows where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). Additionally: Unclear whether "materials used to manufacture" are only materials or also finished product components. Please clarify, suggestion: only materials, not components.	ES	ES-4 - Resource Inflows	15.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies).	ES	ES-4 - Resource Inflows	15. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This is a resource intensive exercise to calculate and it is not clear what the benefit is of reporting the total weight of key materials used. Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with E5-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). EFRAG should revise again whether a breakdown per key material is needed and useful information for stakeholders.	ES	ES-4 - Resource Inflows	15. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We understand the rationale for the proposed datapoint 15(c) is to align with the EU Critical Raw Materials Act (CRMA). However, we have significant concerns about the practicality (tracking all raw materials in complex value chains) and decision-usefulness of this metric. Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of the datapoint for critical and strategic raw material (for manufacturing companies). This new datapoint requires companies to disclose sensitive information which may lead to competitive disadvantages; should hence be a "may"-disclosure; further it increases burden on the disclosing companies in gathering these information.	ES	ES-4 - Resource Inflows	15. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ESS-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies).	ES	ES-4 - Resource Inflows	15. (d)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ESS-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). The definition on sustainable sourcing in the glossary should be revised again with a focus on more clarity and auditability of the required information; currently it seems a bit vague and open for interpretation.	ES	ES-4 - Resource Inflows	15. (e)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Focus on key products helps to disclose relevant information for stakeholders while reducing the burden for disclosing companies	ES	ES-5 - Resource outflows	17. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Focus on key products helps to disclose relevant information for stakeholders while reducing the burden for disclosing companies	ES	ES-5 - Resource outflows	17. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Focus on key products helps to disclose relevant information for stakeholders while reducing the burden for disclosing companies.	ES	ES-5 - Resource outflows	17. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Focus on key products helps to disclose relevant information for stakeholders while reducing the burden for disclosing companies.	ES	ES-5 - Resource outflows	17. (d)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Rate of recyclable materials and their packaging Is here the focus just on the "recyclability of materials in product" and should packaging (like product protection) disclosed separately	ES	ES-5 - Resource outflows	17.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	This new requirement would entail additional work if this case were to arise.	ES	ES-5 - Resource outflows	18. (e)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Significant improvement, as the example makes it clearer what level of detail is required here.	ES	ES-5 - Resource outflows	AR 5
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	No objections	ES	ES-5 - Resource outflows	AR 4
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands				Overall, ES lacks sufficient clear guidance on methodologies for disclosing metrics. Circularity is still a relatively new reporting topic for companies; therefore, additional guidance will help clarify the correct approach and improve comparability. It is evident from the first wave of CSRD reporting, that companies are interpreting the ES metrics differently and the amendments to ES do not sufficiently address this risk.	ES		
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands				The amended definition of circular economy is not detailed enough. In addition, the reference to 2030 will become outdated. EFRAG should update the definition to be similar to the original, but slightly more condensed.	ES		
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The newly introduced definition of key materials leaves room for differences in interpretation which could hinder comparability. To mitigate this, EFRAG should provide guidance in the NMIG for determining materials that meet the criteria for "key materials."	ES	ES-4 - Resource Inflows	15. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	This disclosure allows absolute or percentage disclosure. The standard should choose one or both of these to be mandatory for comparability	ES	ES-4 - Resource Inflows	15. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Adding the disclosure option for waste where the final destination is unknown is positive as there are instances where a third-party may control the final destination of waste.	ES	ES-5 - Resource outflows	18. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	For many companies, post-consumer packaging is a relevant topic. Post-consumer packaging is not addressed in the ES standard because it is not waste from own-operations. The standard or value chain implementation guidance should provide clarity on the scope of the value chain, specifically addressing post-consumer packaging.	ES	ES-5 - Resource outflows	18. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The original definition of resource inflows was much clearer and focused on inflows. The new definition has shifted its focus towards outflows.	ES	ES-4 - Resource Inflows	15.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The total weight of key materials has been amended to include a breakdown. This breakdown is an improvement as it will allow companies to compare materials that are similar in nature. On the other hand, this update will create additional work for companies that already report as they will now need to tag each type of key material for the breakdown.	ES	ES-4 - Resource Inflows	15. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The AR should specify what the denominator is for the critical and strategic materials %.	ES	ES-4 - Resource Inflows	15. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The AR should clarify whether critical and strategic materials should always be included as a "key material."	ES	ES-4 - Resource Inflows	15. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The reused and recycled input materials KPI has been replaced with the term secondary resourced materials. Neither the disclosure nor definition of secondary resources mentions the terms reused or recycled. It is unclear if both reused and recycled materials continue to be in scope for this disclosure. EFRAG should add clarity to the definition of secondary resources and specify whether it includes reused and/or recycled materials. For example, does this KPI only require disclosure on reused materials and not recycled content?	ES	ES-4 - Resource Inflows	15. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Non-recycled waste disclosure removed. This KPI did not make sense as the formula included waste prepared for reuse. Therefore, it is positive that it was removed.	ES	ES-5 - Resource outflows	18.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The AR should specify what the denominator is for the secondary resourced materials KPI. It would make the most sense if the denominator only includes key materials that are capable of being reused or recycled. For example, certain food products may not be capable of being reused or recycled. Including them in the denominator creates confusion for stakeholders.	ES	ES-4 - Resource Inflows	15. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The removal of refernce to the cascading principle helps condense this disclosure requirement	ES	ES-4 - Resource Inflows	15. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The proposed amendment states that the denomintator for the % is key biological materials. This makes more sense than the current version which states that the denominator must be total inflow materials.	ES	ES-4 - Resource Inflows	15. (e)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Reference to a certification scheme was removed in the disclosure requirement. Without reference to certification schemes, this disclosure loses credibility.Reference to certification schemes should be added back to this disclosure requirement.	ES	ES-4 - Resource Inflows	15. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The glossary should include a definition for sustainably sourced	ES	ES-4 - Resource Inflows	15. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The ED separates out this KPI from the current version DR ES-4 31c, does this mean that the ESRS ED ES -15d does not require recycled content?	ES	ES-5 - Resource outflows	17. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It does not make sense for recycled content to be included in the resource outflows section, it should remain in the resource inflows section as it is in the current version.	ES	ES-5 - Resource outflows	17. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The specific matters that needed to be included in relation to policies in the current draft ES-1 15 have been removed. This allows companies to address the specific matters which address their material IROs.	ES	ES-1 - Policies related to resource use and circular economy	10.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It is not clear what the denominator is that needs to be applied for ES-17d. For example, could the denominator only include packaging or does it need to be the total weight of key materials (KPI ES-15b?)	ES	ES-5 - Resource outflows	17. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It is not clear if recycled materials refers to recycled content or also reused materials? This clarification is especially important given the other disclosure requirement for ES-15d.	ES	ES-5 - Resource outflows	17. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This AR states that packaging is not included in disclosures ES-5 17 c and d. This implies that companies would not be required to disclose information on their packaging that is recyclable by design or includes recycled content. For many companies packaging is one of the main waste streams; therefore, it does not make sense to remove packaging from these disclosures.	ES	ES-5 - Resource outflows	AR 3
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Addition on making the reference to key material introduced: Disclosing key raw materials and their exact weights per key material - involves sensitive information and may be misinterpreted as shrinkflation, despite resulting from more efficient material use.	ES	ES-4 - Resource Inflows	15. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Addition on making the reference to key material introduced: Disclosing key raw materials and their exact weights per key material - involves sensitive information and may be misinterpreted as shrinkflation, despite resulting from more efficient material use.	ES	ES-4 - Resource Inflows	15. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Statements made which are not universally true (e.g., related activities are "by nature energy intensive" and "require large volumes of water") should be removed, or need clarification (e.g., "collecting energy efficiency in own operations").	ES	Interactions with other ESRS	9
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Total and breakdown weights of key materials is excessively granular and challenging to gather data from activities around the world, potentially cluttering and not useful. In addition, the definition of resource inflows includes "internally recovered" resources, which should not be included as they are not inflows and are often the result of internal optimisations and efficiency improvements.	ES	Metrics - Resource inflows	15
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Product durability and rate of recycled materials used per product are excessively granular and very challenging to determine and gather data for each key product. "Incineration" changed to "thermal-based disposal" may lead to challenges - recommend to revert.	ES	Metrics - Resource outflows	17-18
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It is not clear how it relates to a service provider. How does it relate to assets (finished goods) needed to provide services (i.e. telecom services)? How does it relate to the reselling of products (finished goods) that have been manufactured by another company?	ES	ES-4 - Resource Inflows	15.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This is an additional datapoint which runs counter to the simplification objective of the ESRS. It is difficult to quantify in practice and would create additional administrative burden for preparers without significantly enhancing decision-usefulness.	ES	ES-4 - Resource Inflows	15. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Where previously it related to "the undertaking's production process", this now seems to relate to resale of primary goods as well. If so, these datapoints are hard to report for a reseller. A producer should report on the product design related datapoints (e.g. durability, reparability, recyclable/recycled material). A service provider/reseller by adding circular economy principles to services (e.g. offering repair services). Suggest to split products and services here to make it more clear.	ES	ES-5 - Resource outflows	17.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Although this is an additional datapoint for producers, it helps reporting on datapoints for inflow w.r.t. products bought by service providers.	ES	ES-5 - Resource outflows	17. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	It adds value to have weight diverted to disposal as a sub-metric in percentage and weight. Yet, it is not clear if it refers to waste 'send-to' e.g. recycling or to 'mass-balance' approach e.g. materials recovered through recycling. Additional guidance would support uniformity.	ES	ES-5 - Resource outflows	18. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Although this is an additional datapoint, it adds flexibility as a 'residual bucket'. It is not (yet) clear how it relates to potential assumptions made under 18b, c, d. For example, if we don't know how a tier-2 waste processor treats a certain waste flow, should we make an assumption with a rationale where possible or report it as 'unknown'?	ES	ES-5 - Resource outflows	18. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Could you please provide more information as why thermal-based disposal is reported separately?	ES	ES-5 - Resource outflows	18. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The revised requirement related to "total inflow" weight changed from inflow in total weight to weight with breakdown to key materials. A breakdown in weight for key materials increases the number of datapoints needed for this DR, thereby increasing the reporting burden without clear justification how this helps to achieve objectives under the EU Grean Deal.	ES	ES-5 - Resource outflows	15. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This item is related to ES- 15 c): the percentage of total weight of critical and strategic raw materials. We refer to the item listed above, with the addition that by requiring disclosures on all critical and strategic raw materials (beyond impacts on people and the environment), the scope of reporting expands beyond sustainability information and the objectives of the CSRD.	ES	ES-5 - Resource outflows	15. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Introduce the reference to marine resources, ensuring that material IROs related to them can be addressed through entity-specific disclosures under ESRS E5. In line with the principle on location-specific considerations in ESRS E4 §9, we propose introducing a corresponding principle on marine resources. Proposed wording: "Marine resources should be considered when they are relevant to the undertaking's strategy and business model. Where material IROs arise in relation to marine resources, it is important to consider appropriate entity-specific information in accordance with ESRS 1, paragraph 11."	E5	E5 - Objective	1.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Require only a qualitative description of resource inflows Firstly, there is no clear or stable definition of "key," "strategic," "critical" materials", and "key biological sustainably sourced". The scope of critical materials may change over time with the evolution of the CRMA, and the Delegated Acts deriving from the ESPR are not yet approved. Companies therefore expect this information to be difficult to access and disclose. However, EFRAG could reference these regulations (e.g., CRMA annexes) and provide pedagogical resources and data (e.g., JRC) in the NMIG to support qualitative disclosures on resource inflows. Secondly, the data would be technically complex to obtain. These materials are often mixed, transformed, or embedded in products, making it very difficult to determine their exact weight without reverse engineering. Companies stress that they may not know the precise quantities of raw materials used, which could result in unreliable or even zero reporting. Proposed wording: "When 'Resource Inflows' is assessed as a material topic, the undertaking shall disclose: a) which materials used to manufacture, were put on the market or were part of the delivery of the undertaking's products and services can be considered as key for its business model, including, where appropriate, critical materials, and the major reasons behind;"	E5	E5-4 - Resource Inflows	15. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	See above	E5	E5-4 - Resource Inflows	15. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	See above	E5	E5-4 - Resource Inflows	15. (c)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Proposed wording: "When 'Resource Inflows' is assessed as a material topic, the undertaking shall disclose: (...) b) which of these materials are biological and sustainably sourced;	E5	E5-4 - Resource Inflows	15. (e)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Specify the circular economy principles in the objective to facilitate entity-specific disclosures, as the data points only cover durability and reparability Proposed wording: "... in accordance with circular economy principles (i.e., durability, reusability, repairability, disassembly, remanufacturing, refurbishment, recycling, recirculation by the biological cycle, or optimisation of the use of the product or material through other circular business models) ...")	E5	E5-5 - Resource outflows	16.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Specify in the NMIG that the information on the expected durability of key products should be "in relation to the industry average for each product group"	E5	E5-5 - Resource outflows	17. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Specify in the NMIG that the scope of reparability should be assessed "where possible, using an established rating system"	E5	E5-5 - Resource outflows	17. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete the datapoint on "recycled materials used in key products" and retain only the one on "recyclable materials included in key products and their packaging". This ensures consistency with the focus on outflow metrics (product characteristics) rather than inflow metrics (use of recycled inputs)	E5	E5-5 - Resource outflows	17. (d)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	ANC disagrees with the new datapoint on the percentage or total weight with unknown final destination. The key question is whether this should be entity-specific or managed jointly by companies and auditors, given the political objective of avoiding new datapoints and focusing on absolute reduction. This issue is not critical, as it could be addressed in other ways.	E5	E5-5 - Resource outflows	18. (e)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	The policy and metrics regarding unsold products appear to be a missing point in ESRS E5. In line with the objective of the ESRS revision to ensure better connectivity with other European regulations, an AR related to ESPR (Ecodesign for Sustainable Products Regulation which entered into force on 18 July 2024) could be added. In reference to the ESPR Art 24.1(a) - number and weight of unsold consumer products discarded per year, differentiated per type or category of products, the undertaking could provide this information in ESRS E5-5.	E5	E5-5 - Resource outflows	5.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We suggest to remove wording in brackets ("including mineral and biotic marine resources") and incorporate it either in the Application Requirements or in the term "resources inflows" defined in the glossary in Annex II. The specific focus on "marine resources" could create confusion and imply a stronger focus on one resource/ecosystem whereas the definition is larger.	E5	E5 - Objective	4. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We suggest to remove wording 'products and services' and incorporate it either in the Application Requirements or in the term "resource outflows" defined in the glossary Annex II. This would ensure clarity and consistency throughout the standard.	E5	E5 - Objective	4. (b)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Resource use', while in bold, is not included in the glossary Annex II.	E5	E5-2 - Actions and resources related to resource use and circular economy	12.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Resource use', while in bold, is not included in the glossary Annex II.	E5	E5-3 - Targets related to resource use and circular economy	13.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	'Circularity', while in bold, is not included in the glossary Annex II. We suggest providing specific guidance on how to consider value chain data (e.g. product composition) when reporting on inflows in reporting resources inflows for own operations. This is challenging, namely in sectors involving different layers of suppliers for a product, with thousands of products concerned (such as distribution sector).	ES	ES-4 - Resource Inflows	14.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The "resource inflows" should be in bold, instead of in brackets We encourage EFRAG to modify the definition of 'Key materials" as this definition only relates to financial materiality and does not consider impact materiality.	ES	ES-4 - Resource Inflows	15.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	We disagree from an auditability perspective. Based on our experience, few companies actively monitor the list of critical and/or strategic materials outlined in the Critical Raw Materials Act (2023). Those that do are likely to do so because some of these materials are considered high-risk (e.g. conflict minerals such as tungsten and tantalum). The requirement to disclose these materials is not consistent with the simplification objective. The data is complex to determine since these materials are rarely isolated but are rather mixed with other materials or assembled in products. We are concerned that companies not operating in key sectors that use these raw materials will be forced to make complex estimates, increasing the reporting burden. The definition of critical and strategic raw materials is unclear as strategic material is defined in the glossary by reference to an external definition of critical material. The conceptual perimeter of the disclosure is unclear. Importantly, we acknowledge that EU Member States are currently focused on identifying strategic raw material projects, aligning national permitting processes with the Act's timelines, and participating in the EU's Critical Raw Materials Board.	ES	ES-4 - Resource Inflows	15. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We ask EFRAG to provide a definition of 'sustainably sourced', including any relevant framework/due diligence needed to ascertain the sustainable source of the biological materials. In addition, better alignment should be sought for the new definition of "biological materials" for example, aligning it to the definition based on biological and technical cycles defined by Ellen MacArthur Foundation.	ES	ES-5 - Resource outflows	15. (e)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Further guidance in Application requirements is sought on what disclosures are expected on "expected durability' and how this aligns to EU regulations (i.e., EU Digital Passport)	ES	ES-5 - Resource outflows	17. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We consider this a good approach in terms of transparency and assurance / auditability as this enables to reconcile the total waste generated (as disclosed in point b) with the detailed breakdowns provided in points (c - waste diverted from disposal) and (d - directed to disposal). It ensures that any gaps between the total and the sum of known operations are transparently accounted for, thereby improving the completeness and reliability of the waste reporting.	ES	ES-5 - Resource outflows	18. (e)
Excels	Dragerwerk AG &Co.KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	recyclable' is not defined and therefore 'the rate of recyclable materials' is neither meaningful nor comparable. Delete or replace with qualitative 'information on recyclable materials included in its key products and in their packaging'.	ES	ES-5 - Resource outflows	17. (c)
Excels	Dragerwerk AG &Co.KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This information is almost impossible to determine with certainty. Metals, for example, usually contain an unknown recycled content. As a single figure, the information is also useless.	ES	ES-5 - Resource outflows	17. (d)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). Additionally: Unclear whether "materials used to manufacture" are only materials or also finished product components. Please clarify, suggestion: only materials, not components.	ES	ES-4 - Resource Inflows	15.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies).	ES	ES-4 - Resource Inflows	15. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). EFRAG should revise again whether a breakdown per key material is needed and useful information for stakeholders.	ES	ES-4 - Resource Inflows	15. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of the datapoint for critical and strategic raw material (for manufacturing companies). This new datapoint requires companies to disclose sensitive information which may lead to competitive disadvantages (regarding competitors and partners in the value chain; also many supplier contracts include duty of confidentiality); should hence be a "may"-disclosure, if any; further it increases burden on the disclosing companies in gathering these information.	ES	ES-4 - Resource Inflows	15. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies).	ES	ES-4 - Resource Inflows	15. (d)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Disclosure should be limited not only to key materials (already in the current Draft) but also key products (new suggestion for reducing the reporting burden while maintaining a comprehensible level of disclosure; also in line with ES-5 Resource Outflws where this focus is implemented in the current Draft). Further proposed simplification: omission of e.g. clippings/scrap (for manufacturing companies). The definition on sustainable sourcing in the glossary should be revised again with a focus on more clarity and auditability of the required information; currently it seems a bit vague and open for interpretation.	ES	ES-4 - Resource Inflows	15. (e)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs

Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Add deleted paragraph 28 back in, as it clarifies that the disclosure requirements are only for those resource inflows related to the material IRO, not all resource inflows.	ES	ES-4 - Resource Inflows	14.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				The mass-balance approach should be explicitly permitted.	ES	ES-4 - Resource Inflows	15.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This is a resource intensive exercise to calculate and it is not clear what the benefit is of reporting the total weight of key materials used.	ES	ES-4 - Resource Inflows	15. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We understand the rationale for the proposed datapoint 15(c) is to align with the EU Critical Raw Materials Act (CRMA). However, we have significant concerns about the practicality (tracking all raw materials in complex value chains) and decision-usefulness of this metric.	ES	ES-4 - Resource Inflows	15. (c)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				15. (e) - "sustainably sourced" is not defined, but is a contentious topic. Recommend adding a requirement that the undertaking provide a description of how the undertaking defines or categorizes "sustainably sourced". If the authors would like to have a discussion on how best to define this officially, we'd be very open to a call to share our approach.	ES	ES-4 - Resource Inflows	15. (e)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				These disclosure requirements should be closely aligned with existing ecodesign regulations (ESPR) and underlying standards (EN 4555X) which define durability, reparability, recyclability and recycled content.	ES	ES-4 - Resource Inflows	16.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				These disclosure requirements should be closely aligned with existing ecodesign regulations (ESPR) and underlying standards (EN 4555X) which define durability, reparability, recyclability and recycled content.	ES	ES-4 - Resource Inflows	17.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Add "as relevant to any material IRO" to "The undertaking shall disclose its resource use and circular economy actions"	ES	ES-5 - Resource outflows	12.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				Add point (e): rate of biological material used in its key products	ES	ES-5 - Resource outflows	17.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				Current: "(b) information on the scope of reparability of its key products;" Change to "information on the reparability of its key products per EN45554"	ES	ES-5 - Resource outflows	17. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				The disclosure requirements should be aligned with the Waste Framework Directive, the Packaging and Packaging Waste Regulation (PPWR) and the WEEE Directive, which is currently under revision. Change to: The undertaking shall disclose the following information on waste streams that are linked to a material impact, risk or opportunity from its own operations:) a description of the material waste streams relevant to its sector or own activities (identified through the DMA process)"	ES	ES-5 - Resource outflows	18.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This streamlines the process by no longer considering the value chain. However, this now requires more disclosures. More clarification is needed for "key materials".	ES	ES-4 - Resource Inflows	15.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The process is now streamlined as only "key" products are required. However, more clarity is needed for the wording "key"	ES	ES-5 - Resource outflows	17.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	While the aim of this amendment is to bring more flexibility because it allows companies to report percentages instead of amounts, this DR is still burdensome because: - The amended waste requirements introduce a new metric that increases reporting burden by adding categories not aligned with the EU Waste Framework Directive, specifically for waste with an "unknown final destination". Creating a separate category forces companies to maintain parallel reporting systems, leading to overlap and reduced comparability. - There is no prescription on how to consider the upstream value chain if waste is identified as a material topic only in the company's value chain (i.e. in case it is not material in its own operations).	ES	ES-5 - Resource outflows	18.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				The disclosure requirements should be aligned with the Waste Framework Directive, the Packaging and Packaging Waste Regulation (PPWR) and the WEEE Directive, which is currently under revision.	ES	ES-5 - Resource outflows	18.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				Add point (e): rate of biological material used in its key products	ES	ES-5 - Resource outflows	17.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				Current: "(b) information on the scope of reparability of its key products;" Change to "information on the reparability of its key products per EN45554"	ES	ES-5 - Resource outflows	17. (b)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				15. (e) - "sustainably sourced" is not defined, but is a contentious topic. Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				These disclosure requirements should be closely aligned with existing ecodesign regulations (ESPR) and underlying standards (EN 4555X) which define durability, reparability, recyclability and recycled content.	ES	ES-4 - Resource Inflows	17.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Since Outflow now focuses on key products, more efficient disclosure is possible. Similarly, Inflow now focuses on key materials, but since it does not focus on key products, the scope of disclosure differs from Outflow. Therefore, Inflow should also focus on key materials of key products.	ES	ES-4 - Resource Inflows	14.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Waste has become one of the items in ES-5 resource outflow, but while Products and services target key products, Waste does not have a specific target. As with Products and services, Waste should target operations related to key products.	ES	ES-5 - Resource outflows	18.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	There is a requirement to disclose recyclability, but the definition is unclear.	ES	ES-5 - Resource outflows	17. (c)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure of the recycling material usage rate has been added, but this is almost the same as the disclosure of secondary resourced materials in Inflow 15(d), resulting in duplication. Therefore, only one of the two should be disclosed.	ES	ES-5 - Resource outflows	17. (d)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding the percentage of total weight of critical and strategic raw materials, in order to be consistent with the CRM act, the target should be limited to raw materials that are extracted, processed, and recycled within Europe, rather than all products sold in Europe.	ES	ES-4 - Resource Inflows	15. (c)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The introduction of a new KPI counteracts the aim of reduing the reporting requirements and burden. Based on the new KPI, resource inflow needs to be reported on a more granular level, which increases the data requirement again. Not only is the information extremly challenging to obtain (as it requires information from the value chain and migh need IT adjustments) but transparency on the purchased material structure is sensitive information and might lead to competitive disadvantages.	ES	ES-4 - Resource Inflows	15. (c)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				Re. Row 4 The disclosure of the rate of biological materials is already required in the inflow. Therefore, this additional point is considered unnecessary.	ES	ES-5 - Resource outflows	17.
Excels	Polish Chamber of Chemical Industry	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Clarification is needed on how to interpret the requirement to disclose the share and/or total mass of waste for which the final destination is unknown. What should companies do when they do not have information that clearly determines the type of process applied? In some cases, it can be assumed that the waste will be reused (e.g. scrap metal), but the problem is the lack of sufficient qualitative data confirming that waste recipients will actually perform the declared process (e.g. a statement on waste treatment). Guidance is needed on whether, in such cases, companies should estimate the amount of waste likely to undergo recovery processes in order to avoid disposal, even though no definitive proof is available, and disclose this under point (e).	ES	ES-5 - Resource outflows	18. (e)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	At present, the notion of critical and strategic raw materials may evolve over time with the development of the Critical Raw Materials Act, and as the delegated acts deriving from the Eco-design for Sustainable Products Regulation are not yet approved. Companies consider this information hard to access and publish, particularly since these materials are often mixed with others. In this evolving context, this datapoint shall be inserted in the NMIG	ES	ES-4 - Resource Inflows	15. (c)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	What is the added value of this information? It should also be noted that some wastes are diverted from disposal, but their final destination remains unknown.	ES	ES-5 - Resource outflows	18. (e)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	Preparation for reuse does not correspond to any of the R/D codes of the Waste framework directive. This information should be retained only in the narrative part. In the future French translation of this standard, the title should be corrected to refer to "réutilisation" rather than "réemploi".	ES	ES-5 - Resource outflows	18.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	This indicator shall not be compulsory as it can induce to add waste which have no coherence and as such may false the interpration of the reality. This paragraph could be deleted.	ES	ES-5 - Resource outflows	18. (b)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	This needs to be clarified because, at first glance, it seems to imply that incineration with energy recovery falls under the "disposal" category, whereas it is actually treatment code R1, which is indeed part of material recovery. The definition of R1 further on in the standard needs to be read in order to clearly differentiate between the two.	ES	ES-5 - Resource outflows	18. (d)
Excels	ASD					I disagree	The introduction of this request - "employee head count in the ten largest countries in terms of number of employees" - increases reporting burden, compared to the previous requirement (countries with at least 10% of employees). We ask to reintroduce the previous requirement, or to keep the 2 options.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	ASD					I disagree	The elimination of the concept of "severe" related to human rights incident increases the reporting burden. We ask to reintroduce that concept.	S1	S1-16 - Incidents of discrimination and other human rights incidents	16.
Excels	ASD					I agree	Under the current ESRS, undertakings are required to disclose whether all employees are covered by social protection. Under the Exposure Draft, the disclosure is mandatory only when employees lack this protection. We welcome EFRAG proposed change.	S1	S1-10 - Social protection	34.
Excels	ASD					I disagree	All reporting obligations regarding people with disability can produce an inherent conflict with national laws. Whether or not a person has a disability, it is an information provided by employees on a voluntary basis. Therefore, reporting on this category is very difficult since it requires data that is often not known by the employer. The proposed change does not appear to bring significant simplification	S1	S1-11 - Persons with disabilities	AR 23
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	A boolean DP (whether) will complicate the structure of a generic GDR-P. Suggestion: create a separate datapoint in S1-1 to disclose whether policies cover specific groups or all: "It shall state whether policies cover specific groups within its own workforce (for example, employees working in a particular factory or geography or self-employed) or all of its own workforce." Or, create an AR to specify content (without a boolean).	S1	S1-1 - Policies related to Own workforce	11.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	This DP would likely be overlapping with the generic GDR-A content. Transforming it to a AR would allow to include the content in the GDR-A: "The undertaking shall describe key actions taken, planned or underway to prevent, mitigate and remediate material negative impacts on its own workforce, including its approach in situations where tensions arise between such actions and other business pressures are related to"	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	In principle, the BAK welcomes the restructuring into topics and companies (no more sub-subtopics) for better alignment with management processes as well as a more comprehensible presentation of the materiality analysis and the IROs (Impact Risks Opportunities). However, in the objectives for S 1 (page 3 of the "Log of Amendments S 1"), it was clarified that a company only has to report on the sub-topics "own workforce" (S1-5), "non-employees S1-6) and "remuneration parameters" (S1-16) if the company comes to the conclusion that its own workforce is material. We are of the opinion that the interests of the company's own workforce are generally to be regarded as material in every company and that this information should therefore not be subject to the materiality reservation. The CSRD has also specified in detail the social concerns to be reported in Article 29b – which forms the basis for the ESRS.	S1	S1 - Objective	3.
Excels	Chamber of Labour, Austria	Trade union	Austria				The consolidation of human rights and their alignment with different frameworks in a single place for "human rights policy" (ED, ESRS 2, GDR-P) is advocated. This underlines the importance of the topic and increases transparency.	S1	S1 - Objective	
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	The envisaged definitions for the different employment groups increases the clarity and comparability of reporting.	S1	S1 - Objective	8.
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	The envisaged definitions for the different employment groups increases the clarity and comparability of reporting.	S1	S1 - Objective	8. (a)
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	The envisaged definitions for the different employment groups increases the clarity and comparability of reporting.	S1	S1 - Objective	8. (b)
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	The envisaged definitions for the different employment groups increases the clarity and comparability of reporting.	S1	S1 - Objective	9.
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	The envisaged definitions for the different employment groups increases the clarity and comparability of reporting.	S1	S1 - Objective	9. (a)
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	The envisaged definitions for the different employment groups increases the clarity and comparability of reporting.	S1	S1 - Objective	9. (b)
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	Compared to the current ESRS, the information according to ESRS SBM-2 is no longer provided for in this ED S1. From the BAK's point of view, the interests and perspectives of the stakeholders are important information and should therefore be disclosed again on a mandatory basis.	S1	S1 - Interaction with other ESRS	
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	The change in the thresholds for reporting the number of persons employed is welcomed, as it provides more information on the number of employees, especially from companies operating in several countries, and this data is also necessary for other social indicators.	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	The breakdown for "Non-guaranteed hours employees" should continue to be mandatory by gender.	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	The number of employees who left the company in the year under review is no longer planned. From the BAK's point of view, this is an important social indicator and therefore requests resumption.	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	The BAK criticises the lack of definition of RTD in the present ED. In the interests of comparability, transparency and simplification for reporting, the BAK calls for a uniform definition of the term FTE to be included in the ESRS. Compared to the current ESRS, there is no longer any provision of explanations to understand the fluctuation rate. From the BAK's point of view, fluctuation is a central social indicator and therefore a statement on the development of fluctuation rates should be disclosed.	S1	S1-5 - Characteristics of the undertaking's employees	23. (d)
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	For this group of employees, only their total number must be given – and only in the event that they (e.g. temporary workers or work contractors) are a key element in the company's business model (see S1-AR 14). The BAK criticises this, as companies also have a social responsibility towards non-salaried employees on the one hand and important information is also lost for works councils on the other.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	The BAK is extremely critical of the provision for determining adequate wages outside the EU: reference is also made to national statutory minimum wages for the determination of adequate wages outside the EU. These are often far from adequate in third countries. Reference must be made here to the relevant provisions on living wages of the International Labour Organization.	S1	S1-9 - Adequate wages	
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	The breakdowns (especially by gender) for performance assessments and training hours have been deleted. Since training and further education are often the basis for higher pay in practice, gender-specific differentiation in access to further training can lead to pay discrimination. Therefore, a reporting obligation is necessary here. The "granularity" in the draft cited as a justification, i.e. to reduce the depth of information in the information, is incomprehensible, since in practice such information can usually be retrieved from the corresponding personnel programs at the "push of a button".	S1	S1-12 - Training and skills development metrics	38.
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	Changed working conditions and increasing work pressure lead to more work-related mental illnesses among employees. For BAK, it is therefore incomprehensible why these important indicators are deleted from reporting. It is precisely this information that is an indispensable component for assessing corporate social responsibility. The BAK therefore requests that this data be disclosed accordingly.	S1	S1-13 - Health and Safety metrics	
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	The entire sum of penalties and penalties that companies had to pay in cases of discrimination must be disclosed. The wording is problematic because in practice settlements (which, usually at the express request of the companies, are not explicitly dedicated to a "discrimination case") are often concluded in order to settle discrimination cases. However, according to the present wording ("fines, penalties and compensation"), such a settlement payment would not be covered by the reporting obligation, which would greatly distort the cases of discrimination to be reported and would not be able to shed light on the already large number of unreported cases.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	The reporting obligation regarding preventive measures against discrimination (incl. harassment) in the workplace has been deleted without replacement, according to the comment with the following reason: "deleted from mandatory content and moved to NMIG (...) to enhance clarity and simplify content". This does not create clarity or simplification, but rather a unilateral reduction of reporting obligations in favour of companies, at the expense of transparency.	S1	S1-1 - Policies related to Own workforce	24.
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	The BAK welcomes the transfer from the CSRD to the involvement of the employee representatives and forwarding their opinion to the supervisory bodies. This is a significant step forward transparency and stakeholder involvement and represents a significant improvement for clear reporting.	S1	S1-3 - Actions and Resources related to Own workforce	AR 11
Excels	Chamber of Labour, Austria	Trade union	Austria				Basic remarks on ESRS S 1: The CSRD specifies the social aspects (Article 29b, paragraph 2 b): • Equal treatment and opportunities for all, including gender equality and equal pay for work of equal value, training and skills development, employment and inclusion of persons with disabilities, action against violence and harassment in the workplace, and diversity; • Working conditions, including secure employment, working hours, decent wages, social dialogue, freedom of association, existence of works councils, collective bargaining, including the proportion of workers covered by collective agreements, workers' rights to information, consultation and participation, work-life balance, and health and safety; • Respect for human rights, fundamental freedoms, democratic principles and international standards.	S1		
Excels	Chamber of Labour, Austria	Trade union	Austria				This explicit mention of the social aspects in the CSRD underlines the importance of this information for the BAK. For this reason, it is incomprehensible to the BAK why the disclosure requirements have been reduced so massively. Deleted data points, such as the age distribution in diversity metrics (S1-8), parental leave is replaced by maternity leave (S1-10), workers without social protection (S1-10), leave from work for family reasons (S1-14), recording of fines and sanctions for incidents of discrimination and harassment (S1-16), should be re-disclosed. It is precisely these topics that provide important information for the co-determination actors (works councils, employee representatives) on the sustainability indicators relevant to them (e.g. health and safety, remuneration) and on their qualitative development, especially in the supervisory board. In addition, reporting requirements have already been significantly reduced twice since the first ESRS Exposure Draft (April 2022). From the BAK's point of view, all social concerns are essential for the successful implementation of the socio-ecological transformation of economic activities in addition to environmental issues. Accordingly, the deleted social data points should be re-examined. There must be no further reduction or dilution of the social aspects.	S1		
Excels	Chamber of Labour, Austria	Trade union	Austria				A lot of information can be collected in the companies without much effort or is basically available. The data points on non-employees are only to be reported if the external workers contribute significantly to the IROs. In particular, information about the working conditions of temporary workers and self-employed contract workers is an indispensable component for assessing the social responsibility of companies. A structure should be expanded to include the categories of gender and countries from the BAK's point of view. The BAK also emphasises that the ESRS must be in line with the future CSRD or the Corporate Sustainability Due Diligence Directive.	S1		
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The terms pay, remuneration and wages (ESRS S1-9) should be better differentiated from one another. It would be desirable if the requirements of ESRS S1-9 and S-15 were combined, as all reporting requirements relate to pay and other remuneration.	S1	S1-15 - Remuneration metrics	44.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Information on the grievance mechnism should be removed from S1-2, as this is addressed in the G-standard. Alternatively, it should be noted in the DR that a reference to the Governance information is sufficient, if there is no separate channel for employees..	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	The publication of remuneration ratios is problematic because it can reveal sensitive information about individuals (data protection). In addition, the ratio is often distorted and not very meaningful, especially in small or specialised companies. Finally, there is a lack of clear methodological standards for calculation (gross/net, bonuses, full-time equivalents, etc.), which further limits comparability and meaningfulness -> deletion	S1	S1-15 - Remuneration metrics	44. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	The workload is extremely high, as appropriate wages must be researched for each country. The EU should publish an annual overview of all appropriate wages for each country. How should performance-related salary components be included? Need for clarification.	S1	S1-9 - Adequate wages	13.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	simplification edit, thanks for the examples in brackets - better move to ESRS 2	S1	S1-1 - Policies related to Own workforce	11.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	duplication of ESRS S1-18	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	duplication of ESRS S1-18	S1	S1-3 - Actions and Resources related to Own workforce	19. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	new disclosure requirement description without helpful examples	S1	S1-3 - Actions and Resources related to Own workforce	AR 6

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	previous description more clear	S1	S1-3 - Actions and Resources related to Own workforce	AR 7
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	For social standards the removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency.	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	The removal of the workforce age distribution is not necessarily possitive to us since age distribution is monitored and disclosed as a key dimension of our strategy.	S1	S1-8 - Diversity metrics	29.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It may be excessively complex to identify isolated cases of employees who lack social protection, and even more so to determine in which countries they are located, since as a general rule, all our employees live in countries where minimum social protection is guaranteed by the government, and the company fully complies with local laws.	S1	S1-10 - Social protection	34.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We offer paternity leave in every operation. Both maternity leave and paternity leave are key to our work-life balance commitment.	S1	S1-10 - Social protection	34. (d)
Excels	BDEW	Other - please specify (required)	Germany			I disagree	The requirements concerning non-employees should be removed. They create significant additional effort without providing a clear added value in terms of comparability or decision-usefulness.	S1	S1 - Objective	4.
Excels	BDEW	Other - please specify (required)	Germany			I disagree	change from "pay gap" to "global pay gap"	S1	S1-15 - Remuneration metrics	44(a)
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	- is calculated on the basis of the average wage: however, a median wage would be better	S1	S1-15 - Remuneration metrics	44(a) AR21, AR22
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	- Feedback to EFRAG for V 1.5: so far (ESRS S1.104) only addressed"severe human rights incidents" - also Indicator #14 in Table III of Annex I Delegegated Regulation (EU) 2022/12888 refers to "severe human rights incidents"	S1	S1-16 - Incidents of discrimination and other human rights incidents	45, 46(b)
Excels	BDEW	Other - please specify (required)	Germany			I agree	- Feedback to EFRAG for V 1.5: "In the ESRS Set 1 depending on the standard "incidents" meant different things."; if it is about the complaints filed through channels it should state that/ if it is about actual confirmed incidents, it should also state that - nevertheless "Incident" is a defined term, which should be specified.	S1	S1-16 - Incidents of discrimination and other human rights incidents	
Excels	BDEW	Other - please specify (required)	Germany			I agree	- "confirmed incidents" maybe better.	S1	S1-16 - Incidents of discrimination and other human rights incidents	
Excels	BDEW	Other - please specify (required)	Germany			I agree	- duplication of ESRS GDR-A	S1	S1-3 - Actions and resources related to own workforce	19(a)
Excels	BDEW	Other - please specify (required)	Germany			I agree	- duplication of ESRS GDR-AT	S1	S1-3 - Actions and resources related to own workforce	19(b)
Excels	BDEW	Other - please specify (required)	Germany			I agree	- Feedback to EFRAG for V 1.5: ESRS S1.19a is a duplication to 18 - Question: Is this really a duplication or a clarification with regard to key actions with regard to material negative impacts	S1	S1-3 - Actions and resources related to own workforce	19(a)
Excels	BDEW	Other - please specify (required)	Germany			I disagree	- Proposal: replace this metric by a number of confirmed incidents of "non-respect of adequate wages"	S1	S1-9 - Adequate wages	
Excels	Randstad	Preparer (non-financial preparing a sustainability report)	Netherlands			I disagree	Proposal: Allow companies to choose between reporting the unadjusted gap or the adjusted gap, with an explanation for their choice. Rationale: This provides flexibility while ensuring a high level of transparency and relevancy. Arguments: We believe that there is no added value for disclosing the unadjusted pay gap, here are our arguments: - Misleading Indicator: The unadjusted pay gap fails to measure equal pay for equal work. It can falsely imply pay discrimination and misrepresent a company's commitment to pay equity. It is an oversimplification of an equal pay analysis and ignores structural factors. - Contradicts "Fair Presentation": For a global company like Randstad, a single, consolidated figure is not a fair or faithful representation of our remuneration practices across diverse labor markets. - Not Actionable: The raw number doesn't identify the root cause of the gap (e.g., representation in leadership, geographic pay scales), making it a poor tool for driving meaningful, targeted action. - Flawed for Multinationals: A global, unadjusted figure is statistically unsound as it averages vastly different economic realities, currencies, and costs of living.	S1	S1-15 - Remuneration metrics	AR 33
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Regarding the indication of whether employees are covered by collective agreements: does this refer to collective agreements that cover all working conditions (including salary, in German "Manteltarifvertrag"), or should collective agreements (in German "Tarifverträge") that regulate only parts of the working conditions also be included? We assume that work agreements (in German "Betriebsvereinbarungen") are not included in the scope of collective agreements, but are considered policies. Please validate.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	There may be countries outside the EU that apply a minimum wage which, however, does not fully cover the ILO wage-setting principles (particularly the aspect of tripartite social dialogue). Does the incomplete consideration of all ILO wage-setting principles lead to a mandatory exclusion of the data point wage applied in these countries from the reporting?	S1	S1-9 - Adequate wages	32.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Is the understanding correct that S1-12, alongside S1-5 and S1-7, also refers only to the ten countries with the highest number of employees? The calculation logic refers in the denominator to the new definition according to S1-5. If we voluntarily report on more countries in S1-5, are we still allowed to apply the limit of ten countries in S1-12?	S1	S1-12 - Training and skills development metrics	AR 24
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	What is meant by b i) "as well as other workers that work on its sites". Does this include only non-employees or value chain workers as well? According to ESRS1, AR 28 metrics does not include value chain workers within S1	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	On the one hand it refers to employees (first paragraph) but on the other hand it refers to own workforce (with includes employees and non-employees), so should work-related accidents only be reported for employees or also for non-employees?	S1	S1-13 - Health and Safety metrics	AR 27

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Fatalities from work-related ill health may have existed before the employee started working at the undertaking. This metric does not allow any conclusions to be drawn about whether work at the undertaking leads to corresponding fatalities and should therefore not be reported	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	AR 27 states that the company should use definitions for work-related injuries according to the national laws of the countries. However, AR 29 on work-related illnesses does not mention this. Shouldn't the company use the definitions according to the national laws of the countries to determine the type of work-related illness too?	S1	S1-13 - Health and Safety metrics	AR 29
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	In 44a), the average is requested (whereas the Pay Transparency Directive (EU) 2023/970 refers to the median), but in 44b) the median is asked for. Do you want the median or the average in the ESRS reporting or does the undertaking have a choice regarding 44a)?	S1	S1-15 - Remuneration metrics	44. (a)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	As the deletion of the reporting obligation regarding "severe" human rights incidents does not lead to a simplification but to an increase of reportable incidents and to a decrease of specificity of incidents, the term "severe" in relation to human rights incidents should be reinstated to simplify the reporting process. However, a definition of "severity" in this context is required.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	From our perspective, the change does not make much difference for international undertakings with many subsidiaries in different countries, because the number of employees must be queried anyway in order to consolidate the figures and then decide which are the ten countries with the most employees. Unless this threshold applies to all reporting obligations, it represents hardly any noticeable relief. Moreover all information about the new DR S1-5 concerning employees have to be in line with IFRS. With regard to new DR S1-7, it could be a relief.	S1	S1-5 - Characteristics of the undertaking's employees	5.
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I disagree	The definition of recordable accidents needs clarifying, as this can vary depending on jurisdiction. This is particularly relevant for companies working internationally. The ESRS requires a TRIF report (per 1,000,000 hours), but definition of what the ESRS considers as recordable is not given – It is also the case that multiple different regulations both at EU and national level require reporting of this information, for example in the marine sector, the EU offshore reporting directive already asks this. It is not necessary to report this same data multiple times via multiple regulations	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	Annual remuneration of the highest paid individual is reported under financial reporting regulations and does not need to be double-reported under ESRS S1	S1	S1-15 - Remuneration metrics	44. (b)
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Similar to comment for ESRS 1 Appendix A: the social susubtopics in parenthesis are not exhaustive of the sub-topic title/ human rights instruments mentioned in CSRD. Hence all parentheses should start with 'including'.	S1	S1 - Objective	4.
Excels	Danish Institute for Human Rights	NGO	Denmark			I agree	Support the top 10 country suggestion	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Danish Institute for Human Rights	NGO	Denmark			I disagree	Non-EU hierarchy should be amended to prevent use of minimum wage without relevant 'adequacy' check. ILO wage setting principles check is not a correct adequate wage check. ILO principles for Estimating a Living Wage is the right benchmark, not the wage setting principles for i. See also answer to q 28 in the survey.	S1	S1-9 - Adequate wages	AR 22
Excels	Danish Institute for Human Rights	NGO	Denmark			I disagree	Disagree with the arbitrary removal of age. Age a known discrimination factor in workplaces and managing risks and impacts related to demographic developments requires access to data. Suggest to reinstate former requirement S1 66 (b) on the distribution of employees by age group.	S1	S1-8 - Diversity metrics	30.
Excels	Danish Institute for Human Rights	NGO	Denmark			I disagree	Parental leave rather than maternity leave should be retained. As should retirement. Arbitrary deletions of decision useful datapoints.	S1	S1-10 - Social protection	34.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Suggest reinstating the requirement to report the percentage of entitled employees that took family related leave not just how many is entitled.	S1	S1-14 - Work-life balance metrics	42.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I partially agree and partially disagree	Gender breakdown for zero-hours employees should be brought back in	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I partially agree and partially disagree	Age distribution should not be deleted, as it provides crucial information on the characteristics of workforce, which is relevant for a whole host of IROs, e.g. aging of the workforce	S1	S1-8 - Diversity metrics	29.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I partially agree and partially disagree	Retirement should be brought back in as a mandatory datapoint	S1	S1-10 - Social protection	34.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I partially agree and partially disagree	Gender breakdown for training hours should be reinstated	S1	S1-12 - Training and skills development metrics	38.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I partially agree and partially disagree	Fatalities from ill health for non-employees and workers on site should be reinstated	S1	S1-13 - Health and Safety metrics	40.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I partially agree and partially disagree	Datapoint on workers actually taking family-related leave should be reinstated	S1	S1-14 - Work-life balance metrics	42.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I partially agree and partially disagree	Country-level information should be provided on the ratio of the higest paid individual in that country to the country median should be reported	S1	S1-15 - Remuneration metrics	44. (b)
Excels	Punto 3 S.r.l. S.B.	Consultant (including software vendor)	Italy			I partially agree and partially disagree	The information requested could be more meaningful to the reader of the sustainability statement if, in addition to the number of training hours per employee, a breakdown by job category (manual worker, office worker, middle manager, or executive) were also requested. This would provide a more comprehensive and general overview.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	Punto 3 S.r.l. S.B.	Consultant (including software vendor)	Italy			I partially agree and partially disagree	To make the comparative analysis more effective, it would be useful to specify which components of total remuneration should be included and which should not. Furthermore, total remuneration does not take into account part-time contracts (except through a normalization carried out by the report preparer, which could also distort the data). The total annual remuneration of these employees is obviously lower than that of their full-time colleagues performing the same role. The ratio is significantly altered and distorted upwards, as the median value of the remuneration of all employees (except the highest paid), the denominator, is reduced.	S1	S1-15 - Remuneration metrics	44. (b)
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The changes to S1-1 make the rules clearer, cut duplication, and reduce the reporting effort, which is helpful. This simplification makes the standards easier to follow. However, moving DEI to a voluntary level reduces transparency and may lead to uneven reporting between companies. At a time when diversity and inclusion are increasingly important for investors, workers and society, this information should stay mandatory.	S1	S1-1 - Policies related to Own workforce	11.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GKK Partners	Consultant (including software vendor)	Germany			I disagree	Unclear why "existing" definition "10% threshold" is changed to "ten largest countries". This constitutes a more complex way. Furthermore, it can be expected that the "10% threshold" is available within undertaking's data.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	23. (a)
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Simplification. However, data can be expected to be there for the calculation of the ratio.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	23. (c)
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Simplification	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Simplification	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	29.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Simplification	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	30.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I partially agree and partially disagree	Simplification. However, with deletion of "parental" only partical information for female gender. Might be seen in contrast to an overall equality perspective aligning gender. Since it is exceptable, that current HR-systems have information of leave (for both genders, when applying for leave), it is suggested to add this again.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	34. (d)
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Simplification	S1	S1-12 - Training and skills development metrics	38. (a)
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Simplification	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	GKK Partners	Consultant (including software vendor)	Germany			I disagree	Table 2: is the connection to corresponding adjustment of "10 % threshold" (see line 1) clear enough? As outlined above, "10% threshold" preferred and suggested.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Original ESRS, ESRS 2 paragrapg 65 f states: if relevant, whether and how the undertaking makes the policy available to potentially affected stakeholders, and stakeholders who need to help implement it. Revised ESRS S2 AR 1 is making this disicosure as "example of policy apects to disclose", which might create differnent interpretation even within one report. Suggested to either remove this DP or move back to ESRS 2 with amended wording.	S1	S1-1 - Policies related to Own workforce	AR 1
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(15) Requirements are simplified with regards to engagement, reduces the volume of reporting, especially for global companies	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	(19 a) "including the approach in situations where tensions arise between such actions and other business pressures" - voluntary DP in original ESRS. Making voluntary DP mandatory goes against aim of simplification. Initial disclosure requirement S1-4 paragraph 41 is sufficient " whether and how it ensures that its own practices do not cause or contribute to material negative impacts on own workforce".	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(21) and (AR 8) allows not to disclose whether and how entity is engaged with workforce in "tracking performance against targets" and "identification of lessons learnt or improvements". original ESRS (S1-5 47b, c) required to do so.	S1	S1-4 - Targets related to Own Workforce	21.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(23) requirement of top 10 countries enhances the presentation	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(AR 13) turnover rate calculation now refers to "average employee headcount" which provides clarity. Original (old S1-6 AR 59) allowed company to determine the denominator and describe the methodology.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	(AR 11, AR 12) inconsistency in templates for Table 1 and Table 3 remain between "not reported" and "not disclosed". Suggested to align to remove the inconsistency for streamlined reporting.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	(23 b e) requirement to disclose non-guaranteed hours employees. Definition provided by ESRS does not match with categories of non-headcount relevant employees in some companies. Suggested to allow flexibility in this requirement, including to remove this line from template in case it is not applicable.	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	(old S1-7 55 b) removed the requirement on disclosure whether its FTE/HC; whether its average, as of year end > limits comparability, suggested to add back requirement to disclose methodology.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(27 b and 28 a) refer to top 10 countries instead of countries presenting over 10% of total number of employees > provides more insights, since original requirement gives very limited overview	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(27 b and 28 a) added references which total number of employees to consider > removes any uncertainty	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(AR 17) allows now present information in narrative or table, earlier only table was allowed > gives more flexibility	S1	S1-7 - Collective bargaining coverage and social dialogue	17.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	(33) the topic is kept, while is highly regulated by local laws in each country, so the benefit of this information is limited; we suggest revisiting the related disclosure requirements	S1	S1-10 - Social protection	33.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	(33) no further guidance is provided on scope and how to disclose in case of local specifics (for example: in different countries eligibility for such protection might depend on type of employees, i.e temporary or and hourly paid employees). For global companies reporting burden remains > further guidance is needed	S1	S1-10 - Social protection	33.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(34) retirement is removed from list of events; parental leave is replaced with maternity leave > if the topic reimains in the ESRS, less reporting and data collection burden.	S1	S1-10 - Social protection	34.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	(35) the topic is kept, while it is subject to legal restrictions on data collection, so the benefit of this information is limited. Suggested revisiting the topic/ required metrics.	S1	S1-11 - Persons with disabilities	35.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(AR 23) allows companies use the same definition of persons with disabilities across various countries	S1	S1-11 - Persons with disabilities	AR 23
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(38 a) methodology to calculate % of employees participated in performance review simplified	S1	S1-12 - Training and skills development metrics	38. (a)
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	(44) Adjusted gender pay gap is more representative metric compared to unadjusted, it would be great to allow companies at least to choose which gender pay gap to report on.	S1	S1-15 - Remuneration metrics	44.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Word "Severe" has been removed from the disclosure of "human rights incidents", while reference to SFDR PAI indicator remained, where disclosure of "severe human rights incidents" remained, this creates inconsistency. Suggested to add "severe" back to the DR. In addition, definition of "severe" should be provided in alignment with internationally recognized standards.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	(AR 38) clarity provided that only substantiated incidents are to be reported > suggested to move this to main body of the requirement from AR (i.e. to 46)	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	S1-16 (AR 41) good clarification no cross-reference or reconciliation to financial statements is required.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 41
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Paragraph 45: 'Previously only "severe human rights issues" were mentioned. The SFDR also refers to "severe human rights issues and incidents". We suggest to add the word "severe" again to ensure consistency between both frameworks. Furthermore, we would welcome to refer to the definition of the United Nations Guiding Principles on Business and Human Rights regarding "severe human rights issues".	S1	S1-16 - Incidents of discrimination and other human rights incidents	44.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The definition of non-employees in the undertaking's own workforce is too narrow and does not provide a fair presentation of an organization's own workforce. We recommend using 'control of work' as the criteria for determining an organization's own workforce. This is consistent with GRI Standards (Disclosure 2-8) and has also been included in the recent Proposed Amendments to the SASB Standards. For the topic of occupational health and safety, the scope of workers should be further extended to cover other workers that work on the undertaking's site (i.e., control of workplace).	S1	S1 - Objective	7.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We propose retaining former 14 (e) regarding impacts on the undertaking's own workforce that may arise from the transition plan. This is important information for understanding the social dimension of climate change. In addition, S1 could refer to the just transition-related metrics in GRI 102: Climate Change, to further support undertakings in reporting on the impacts on their own workforce resulting from the transition plan. At the least, this content should be retained within the NMIG.	S1	S1-1 - Policies related to Own workforce	10.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We propose retaining former S1 32 (e) on how the undertaking involves stakeholders in ensuring the effectiveness of their grievance mechanisms, in line with GRI 2-25-e.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	For the purpose of simplification, data points on the availability of channels such as grievance mechanisms from S1, S2, S3 and S4 could be consolidated into one data point covering all categories of stakeholders and moved to ESRS 2. This would be equivalent to the consolidation done for the data point on the human rights policy commitment. This would also increase alignment with GRI 2-25. In addition, the data point could be further aligned verbatim with GRI 2-25-b and e, for greater clarity and interoperability.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	For the purpose of simplification, data points on the general approach to and processes for providing or contributing to remedy from S1, S2, S3 and S4 could be consolidated into one data point covering all categories of stakeholders and moved to ESRS 2. This would be equivalent to the consolidation done for the data point on the human rights policy commitment. This would also increase alignment with GRI 2-25. In addition, the data point could be further aligned verbatim with GRI 2-25-c, for greater clarity and interoperability.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	17.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining remedy actions (former S1 38 (b)) as a stand-alone data point, in line with GRI 3-3-d-ii. Having a standalone data point ensures that this information is not overlooked and it is easily identifiable by users and stakeholders.	S1	S1-3 - Actions and Resources related to Own workforce	19.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The breakdown by gender for 'non-guaranteed hours employees' in 23 (b) iii has been removed. This removal seems arbitrary and seems to establish a hierarchy between permanent and temporary contracts on one hand, and non-guarantee hours contracts on the other. We thus recommend reinstating the breakdown by gender in line with GRI 2-7-b-iii.	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	This comment pertains to paragraph 23 (f) - which is not listed in the drop-down list in column B. We recommend retaining the total number of employees who have left the undertaking during the reporting period. Since the average employee headcount used for the denominator could be calculated in different ways, it is important to keep the absolute data to provide transparency on the actual total number of employees that have left the undertaking.	S1	S1-5 - Characteristics of the undertaking's employees	23. (d)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend that former paragraph 50(e) on fluctuations in number of employees during the reporting period be retained within new AR10, as important contextual information depending on which methodology has been selected for calculating the number of employees (e.g., at the end of the reporting period vs as an average).	S1	S1-5 - Characteristics of the undertaking's employees	AR 10
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	This paragraph should specify whether the data is reported as headcount or FTE, in line with paragraph 23 on employees. Similarly, AR10 should be included for this DR as well, to provide transparency on the methodology used and other important contextual information (such as on fluctuations during the reporting period). See comment to suggest retaining former paragraph 50(e) on fluctuations within AR10.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	DR S1-8 on diversity has been reduced to just reporting gender diversity at the top management level. We deem it important to reinstate former requirement S1 66 (b) on the distribution of employees by age group to provide additional information about the diversity among employees and as important contextual information on potential impacts. This also supports alignment with GRI 405-1-b-ii. However, to support simplification, each organization could define its own specific age groups, as suggested in the latest GRI Diversity and Inclusion exposure draft (available for public consultation until 15 September), since different age groups may be relevant depending on the organization's specific characteristics, such as its sector of operation.	S1	S1-8 - Diversity metrics	30.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining parental leave and retirement (former S1 74 (d) and (e)), as two important areas of social protection. GRI's Remuneration and Working Time exposure draft, which was available for public consultation in 2024, includes both maternity and paternity leave in the context of social protection: "Maternity and paternity benefits in case of pregnancy or childbirth – covers income security, maternal healthcare, maternity leave, paternity leave, parental leave, adoption leave, breastfeeding arrangements, employment protection, and childcare solutions after return to work."	S1	S1-10 - Social protection	34.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	This data point does not provide meaningful information as it only provides a list of countries where employees do not have social protection for certain life events. It does not indicate how many or which types of employees are not covered by which social protection. Since DR S1-5 23(a) is limited to the top ten countries, it adds further difficulty in interpreting the data for S1-10, in terms of the coverage of employees.	S1	S1-10 - Social protection	34.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining the breakdown by gender when reporting the percentage of employees that participated in regular performance and career development reviews. This breakdown demonstrates the extent to which the system is applied throughout the organization, and whether there is inequity of access to these opportunities. This also supports alignment with GRI 404-3-a. At the least, we suggest to retain this content within the NMIG.	S1	S1-12 - Training and skills development metrics	38. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining the breakdown by gender when reporting the average number of training hours per employee. This breakdown demonstrates the extent to which the system is applied throughout the organization, and whether there is inequity of access to these opportunities. This also supports alignment with GRI 404-1-a-i. At the least, we suggest to retain this content within the NMIG.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	GRI deems it important to require separate reporting of fatalities from work-related injuries on one hand, and fatalities from work-related ill health on the other. Disaggregating this information is important for understanding the types of occupational health and safety impacts. This also supports alignment with GRI 403-9 and GRI 403-10. At the very least, we suggest that former AR 82 be retained within the NMIG.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Paragraph 40 (b) seems to suggest that sub-points i and ii should be aggregated into a total figure on fatalities. Aggregating figures with different scopes (point i includes non-employees and other workers that work on its sites, while point ii excludes these) can obscure material information. We thus recommend that fatalities be reported separately for employees on one hand, and for non-employees and other workers that work on its sites on the other hand. This also supports alignment with GRI 403-9 and GRI 403-10.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend reinstating the requirement to report fatalities as a result of work-related ill-health for non-employees and workers in the value chain (former 88 (b) and supporting provision "The information for (b) shall also be reported for other workers working on the undertaking's sites, such as value chain workers if they are working on the undertaking's sites."). Non-employees are often at a higher risk of negative impacts related to occupational health and safety. Reinstating this requirement also supports better alignment with GRI 403-9-b-i and GRI 403-10-b-i. At a minimum, it should be retained within the NMIG.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The data point to report the number and rate of recordable work-related accidents is not consistent with GRI 403-9. GRI requires reporting the number and rate of recordable work-related injuries, excluding cases of ill health in GRI 403-9. In GRI 403-10, cases of work-related ill health are reported separately and as an absolute number, rather than as a rate. Many illnesses develop slowly over time after exposure, thus making the reporting of a rate more challenging and less meaningful. This can also support further simplification of this metric.	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining former AR 83-86, 88 and 92 within the ARs or at least within the NMIG, as important guidance for compiling the required information on health and safety and to enable comparability.	S1	S1-13 - Health and Safety metrics	AR 27
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining the following former guidance from AR 94 within new AR29: "the disclosure may include cases of work-related ill health that were detected during the reporting period among people who were formerly in the undertaking's workforce."	S1	S1-13 - Health and Safety metrics	AR 29
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend reinstating the requirement to report the percentage of entitled employees that took family-related leave, and a breakdown by gender (former S1 93 (b)). Many employees are discouraged from taking leave and returning to work by employer practices that affect their employment security, remuneration and career path. Therefore, reporting entitlement alone does not provide sufficient information with regards to the ability of employees to take such leave. Reinstating this requirement also supports alignment with GRI 401-3-b.	S1	S1-14 - Work-life balance metrics	42.
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Insert "and how it makes it known to its own workforce." at the end of the second sentence. REASON: For companies' grievance mechanism, outreach (the process of informing potential claimants of the existence of grievance mechanisms and how to access them) is key. See https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and references cited.	S1	S1-1 - Policies related to Own workforce	16.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Insert, "including a description of all actual remedies provided for negative human rights impacts." to end the sentence. REASON: Specific remedy disclosures are essential to the usefulness of disclosures on human rights actions. See our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf and draft paper https://warwick.ac.uk/fac/soc/law/research/centres/chrp/publications/corporate_disclosure_and_mhrdd_june_2026_ext.pdf.	S1	S1-1 - Policies related to Own workforce	18.
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Add: "In accordance with ESRS 2 GDR-A key actions describe all actual remedies provided for negative human rights impacts." REASON: Specific remedy disclosures are essential to the usefulness of disclosures on human rights actions. see our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf CITE DISCLOSRUE PAPER.	S1	S1-1 - Policies related to Own workforce	AR 6
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Delete the final word "region" and insert "country". REASON: To disclose this information by region risks aggregating workforces in countries with widely divergent rates of securing collective bargaining agreements and so rendering the information misleading and uninformative.	S1	S1-1 - Policies related to Own workforce	27. (c)
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Insert at the beginning of (b) "For each country in which the undertaking operates: " REASON: This is a valuable addition with little added reporting cost. Often the most important information on workplace fatalities is where they occurred and so can highlight particularly dangerous and insufficiently controlled operations.	S1	S1-1 - Policies related to Own workforce	40. (b)
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Add to AR 37: "In addition to the total number of incidents reported under DR 46(b) disaggregate by human right negatively impacted and the country in which they occurred." REASON: These are essential metrics needed to make these disclosures useful for relevant audiences. see: https://wrap.warwick.ac.uk/id/eprint/185392/ and https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and references cited	S1	S1-1 - Policies related to Own workforce	AR 37
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Paragraph 3 makes reporting on S1-5 and S1-16 as well as S1-6 (if non-employees are considered material) mandatory for every company that identified any material impact, risk or opportunity that is allocated to S1. Whereas we can follow the argument for S1-5 and S1-6, we cannot follow the argument for S1-16. Disclosure Requirement S1-16 is clearly targeted at the topic discrimination and human rights incidents. Thus, it is indirectly assumed these sub-topics are always considered to be material for a company that may hovever only have identified S1 as partially material. If the DMA result shows that for example only the sub-topic health and safety is material for a company, the DR S1-16 does not include any related additional information for descriping the management approach for health and safety as e.g. health and safety incidents will already be reported under DR S1-13. The same may apply for training and skills development. Thus, we conclude a mandatory reporting of DR S1-16 as disproportionate if no related material subtopic is identified. We therefore recommend to either fully remove DR S1-16 as mandatory datapoint or to add addtional requirements just as for S1-6.	S1	S1 - Objective	3.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We would appreciate to have a common Database on adequate wages provided by the EU to ensure comparability between Companies. Moreover, the current methodology imposes the burden of judge whether a statutory minimum wage or a collective bargaining wage takes into account the ILO wage setting principles on the reporting undertaking, which could lead to an excessive burden which surpasses both the companies knowledge and responsibility as well as to different conclusions about the same wage being an adequate wage or not. Furthermore, in AR 22 b) i) it is established that in order to be considered as an adequate wage, it should be reviewed/adjusted every two years. The ILO wage setting principles do not establish this particular period of time, therefore, the ESRS should not create a requirement in this sense. Even more, taking into account that the reality on the field demonstrates that a great part of statutory minimum wages/collective bargaining agreements wages are not adjusted on this period.	S1	S1-9 - Adequate wages	22.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The current remuneration metrics fail to incorporate key stakeholder feedback, such as from the ANC working group, which called for greater flexibility to reduce the reporting burden. We strongly recommend allowing companies to provide disclosures at a country or category level, as this provides more meaningful and context-relevant information. As such, we including as a "may" option to disclose another gender pay gap metric to comply with other laws and regulations. Companies do have to bear in mind that they are subject to assurance requirements if they decide to disclose the adjusted gender pay gap.	S1	S1-15 - Remuneration metrics	44. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	the removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The paragaph does not support the aim of simplifying the ESRS. This paragraph generates considerable additional work in reporting and additional coordination requirements (e.g. determining and adjusting the reporting scope yearly, establishing new data collection processes). Due to the varying and company-specific reporting scope we do not see any added value, as it prevents meaningful comparisons across years and between companies. We do not agree with the definition "50 or more employees by head count and that are the 10 largest countries in terms of employee numbers for the undertaking" for significant employment. The definition misleadingly implies a substantial employee presence in these countries, when in reality, the number of employees may be very small. In our case, these 10 countries also include countries that cover only 0.2 % of the total number of employees. The total number of employees should be shown by region, as the undertakings are easier to compare than by country breakdown. For this, a standardised definition of region should be used (e.g. UN classification). The regional breakdown enables to take a position on regional priorities,	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In general, the reporting requirements are now more clearly defined. We welcome that the disclosure requirements have been narrowed down and that the word "complaint" has been removed. However, we suggest including as an application requirement that we can refer to G1 if our grievance mechanism also includes HR discrimination and/or human rights incidents.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The inconsistent scope for health and safety metrics, which alternates between 'employees', 'non employees' and 'workers on site', creates confusion and hinders comparability. We propose streamlining these datapoints to mandate reporting only for a company's own workforce. Including non-employees is problematic as companies lack the direct operational control and access required to collect reliable and verifiable data from third-party entities, making disclosure on them optional and based on materiality is a more practical approach.	S1	S1-13 - Health and Safety metrics	40.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Referenc to S1 §4a-f: Very confusing why previous sub-sub-topics are sometimes moved to extra points and sometimes in brackets. This will lead to huge discussions on which level materiality is going to be defined, whether to use topics in front or in the brackets. Materiality analysis needs to be fully and new implemented due to this change. Only resonable approach: Leave out sub-topics in general and just list the previous sub-sub-topics one after each other. Furthermore, a proper mapping won't be possible like this!! We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one.	S1	S1 - Own workforce	4.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Move this to ESRS 2, this is related to the general statement with regards to the human rights policy.	S1	S1-1 - Policies related to Own workforce	12.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Either move this to ESRS 2, as it is a general disclosure no matter if the sub-topic "Health&Safety" is material, or delete it and only state a health & safety policy if health&safety is material for this company. This again does not follow the overall systematic.	S1	S1-1 - Policies related to Own workforce	13.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	I understand why this is being required, but again it would make sense to move this disclosure requirement to ESRS 2 as it related to the human rights policy and how the company works with it and how the HR policy is being trated within the company with regards to stakeholders.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	What is meant with resources (personnel, money, time...)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Delete the word "key".	S1	S1-3 - Actions and Resources related to Own workforce	18.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please note that the possibility to report in FTE is only stated under 23(b), not 23(a). This could lead to confusion. Maybe put the remark whether to report in head count or FTE under 23. in general. Moreover, the presentation of the required information should be reviewed to ensure greater clarity regarding the specific disclosure obligations. This need is particularly evident in paragraph 23(a), where the expectations are insufficiently defined. The same applies to the subsequent layers of paragraph 23(b), which would benefit from a more structured and precise formulation. In contrast, paragraph 27 serves as a good example of a well-articulated and actionable disclosure requirement. Reporting on "non-guaranteed hours employees" should be deleted overall. No information materiality (see benchmaking of already existing ESRS reports).	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Great that you deleted the number which is less meaningful than the rate.	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure of countries in EEA and their collective bargaining coverage is fine, but stating how many different bargaining contract there are is not a valuable information. Left alone that due to different countries, there are always more than one. And knowing how much does not really represent anything. Percentage per country should be sufficient!! Moreover, shifting from a "50 employees and 10% of total headcount" threshold to reporting for the "top 10 largest countries by employee headcount (if >50 employees)" will expand the number of countries for which many multinational companies must disaggregate data. Each additional country introduces distinct challenges in data collection. We suggest the inclusion of an additional option to avoid additional increase to only mandate disclosure until the first of either threshold is hit. So either 10% or the top 10 –whichever causes least burden. Lastly, The number of EEA countries to be reported in S1-7 is unclear. Should the list be derived from 23a (minus non-EEA), potentially resulting in fewer than 10 EEA countries, OR should a separate list of 10 EEA countries be compiled, potentially including more EEA countries than listed in 23a.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The definition of Collective Bargaining can be interpreted in several ways. We advocate for a broader interpretation: In countries where trade unions exist but their agreements do not apply to a company, internal agreements covering working conditions should be considered "Collective Bargaining". ESRS S1 aims to protect employees, and this protection can be provided through agreements with both trade unions and Works Councils. We recommend to clarify the definition accordingly. A clear definition will lead to better cross-company comparability. Since AR 54 was deleted, the definition of region no longer exists. For S1-7, 27c, Collective Bargaining, a definition of region is needed (e.g. Classification UN) for cross-company comparability. Moreover, consistency and efficiency, a 'significant employment' threshold should also be applied to non-EEA countries, aligning the reporting requirements of 27c with 27b.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Definition required what "loss of income" means: Is a one-off payment sufficient or does social protection only mean that there is a monthly payment covering an adequate amount?	S1	S1-10 - Social protection	33.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	More clear to only refer to maternity leave. Open question: the basis to calculate the coverage is then only all female employees? Which would be different basis than calculating the coverage for the other life events.	S1	S1-10 - Social protection	34. (d)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Reduction is perceived very well.	S1	S1-12 - Training and skills development metrics	38. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Reduction is perceived very well.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Fine.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We do not support the removal of the "severity" concept from ESRS S1-16 § 46b). The previous focus on severe human rights incidents provided a clear and operational threshold for reporting, which enabled consistent and justifiable disclosures—such as the exclusion of non-severe cases from our 2024 reporting. Eliminating this threshold introduces ambiguity and would require us to define our own criteria for inclusion, particularly in areas like occupational safety or freedom of association. This increases complexity and audit effort while undermining comparability. For example, we are not classifying occupational safety issues as human rights violations under the LkSG framework, given our robust governance and preventive measures. We believe that fair and decision-useful reporting requires clear boundaries, and the removal of the severity filter undermines this principle. We support the narrowing of the former 103b scope (labor-related complaints) to incidents specifically concerning respect for internationally recognized human rights.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Table 2: Make sure to combine the requirement of former ESRS 2, paragraph 40(a)iii in the table. Both geographical areas as well as countries can be combined in this table. In general, mix-up of FTE and headcount again that is not made clear in S1-5.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Table 1,2,: The undertaking should not be allowed to choose how it presents the information. For benchmarking, it is better if only the tables are used. Table 3: The table in this way does not allow multi-year reporting. In general, mix-up of headcount and FTE that is not made clear throughout S1-5! Moreover, Gender as specified by the employees themselves..." in Table 3 should also be integrated into the explanlation of "others" in AR 11.	S1	S1-5 - Characteristics of the undertaking's employees	AR 12
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Table is fine, just the mix-up of region and country is difficult. No clear definition on what a region is. Continents as per UN definition could be used instead of region to make it more comparable. Or for non-EEA, also use country and the threshold. Could be more of use for the reader.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The inherent diversity in national definitions for "work-related accidents" means that data collected from different countries within the same undertaking will not be directly comparable. This significantly complicates the ability to aggregate global health and safety data consistently, limiting an undertaking's capacity to gain a holistic and accurate view of its performance across all operations, and provide precise and reliable information essential for robust management of health and safety aspects, as expected by financial markets.. Therefore, suggestion of deletion of "work-related accidents, the undertaking shall use the definitions as per the national laws of the countries where the employees are based." Please add: "However, the undertaking can use its own definition for accident. In this case it shall disclose that fact."	S1	S1-13 - Health and Safety metrics	AR 27
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Since a work-related accident inherently involves an injury, distinguishing fatalities by injury and accident in this context is redundant. All accidents are already injuries, so the differentiation does not make sense. Please exclude "number". Rate is sufficient for transparency and more valuable to reader and it is relatable. Moreover, please exclude "number". Rate is sufficient for transparency and more valuable to reader and it is relatable.	S1	S1-13 - Health and Safety metrics	AR 28
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please add to the first part: "and where an official investigation has show that the case of work-related ill health is causally linked to the company's working conditions and requirements."	S1	S1-13 - Health and Safety metrics	AR 29
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This AR is not required if it is already stated in MDR-M and guidance is already provided in a general manner under GDR-M, applicable for all metrics.	S1	S1-15 - Remuneration metrics	AR 34
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This is a non-understandable AR. Why is S1-15 the only metric where you indicate how many previous years need to be reported? This is usually standardized within the integrated reports (usually 5 years, depending on when the reporting on this metric started). This AR should be deleted and the company should decide on how many years are reported and harmonize this themselves.	S1	S1-15 - Remuneration metrics	AR 35
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This should also be the definition of gross pay as stated in amended ESRS S1 paragraph 44(b) for the gender pay gap. And it should also be the reference on how to calculate the CEO remuneration. Still not enough clarification between remuneration and pay. Too many different definitions and non-alignment with EU Pay Transaprency Act, where salary components are not clarified.	S1	S1-15 - Remuneration metrics	AR 36. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The life areas of social security are not clear after discussion with several experts worldwide: Most of the time, the topic acquired disability is secured via the health insurance. So the five areas are not separate, rather then intertwined, at least for reason 1 and 3.	S1	S1-10 - Social protection	34. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Although the information on non-employees is subject to a phase-in period, the mandatory disclosure requirement should be reconsidered and made voluntary. Requiring quantitative data on non-employees would represent a disproportionate effort for companies.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Likewise, the use of estimates outside the workforce lacks conceptual coherence and may result in disclosures that are neither meaningful nor reliable.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 15
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please see comment for ESRS S2 para. 21	S1	S1-4 - Targets related to Own Workforce	21.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please see comment for ESRS S2 para. 18 (b)	S1	S1-3 - Actions and Resources related to Own workforce	19. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The scope of this disclosure has been expanded. The requirement to disclose the methodology used to compile incidents data should be eliminated. Such expanded requirement may lead to disproportionate reporting efforts, without necessarily enhancing the relevance or comparability of the information disclosed.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 39

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This is not a simplification therefore we suggest to eliminate the brackets or insert "or".	S1	S1-3 - Actions and Resources related to Own workforce	AR 6
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The current absence of a clear, standardized definition for "work-related ill health" presents a critical vulnerability within the disclosure requirements. Suggestion: Add the comprehensive definition of "work-related ill health" to the annex or guidance notes, as per the previous version: "Work-related ill health can include acute, recurring, and chronic health problems caused or aggravated by work conditions or practices. These include musculoskeletal disorders, skin and respiratory diseases, malignant cancers, diseases caused by physical agents (for example, noise-induced hearing loss, vibration-caused diseases), and mental illnesses (for example, anxiety, post-traumatic stress disorder). For the purpose of the required disclosures, the undertaking shall, at a minimum, include in its disclosure those cases outlined in the ILO List of Occupational Diseases" Moreover, fatalities of external employees should never be summed up with internal employees. Since there are usually more fatal accidents among external than internal employees. Additional external accidents do not result in necessary actions for a company's internal processes as they don't have full responsibility for the measures. Especially for the reputation, it is essential to differentiate between fatal incidents which we are not responsible for but has happened on our premises and incidents we are fully responsible for.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We welcome the use of the average, because in case of averaging, consideration of additions and disposals pro rata, this reduces the calculation effort. This leads to better comparability for benchmarking by using a standardised average. However, we do not agree that the denominator "by average number of employees" includes 23 a (total number by number of employees). We would welcome it, if the involvement of employees by contract can be defined and described. If, for example, a large number of holiday workers are employed during the summer holidays, this drives up the fluctuation rate and distorts the informative value.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We welcome the fact that companies can use their own definitions, but only in addition. The first step must be mandatory reporting according to the definition of "top management". If the own definition will be used, we agree with the obligation to disclose.	S1	S1-8 - Diversity metrics	AR 19
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	While the proposal to further specify the definition of social dialogue was rejected to take account of national differences, the decision has a significant drawback. Without a more standardized definition, the breakdown by 10 countries creates a misleading impression of comparability between these countries that does not exist. If the 10-country rule is introduced, the Collective Bargaining and Social Dialogue KPIs would be disproportionately weighted compared to other KPIs. Moreover, the number of EEA countries to be reported in S1-7 is unclear.	S1	S1-7 - Collective bargaining coverage and social dialogue	28. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Better comparibility for benchmarking by using only rate of employee turnover.	S1	S1-5 - Characteristics of the undertaking's employees	23 (f)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	The legal text now specifies exactly how the distribution must be reported; distribution in number (head count) and percentage. Moreover, for "age group", deleting as mandatory content and moving to NMIG is not useful for comparability in benchmarking. Information on age should continue to be integrated into S1-8. Statements on age have an interesting informative value in the context of HR strategy and other reporting topics/key figures (e.g. diversity, promotion of young talent, trainings, health and safety). As an alternative, the company-wide average age should be integrated into the report.	S1	S1-8 - Diversity metrics	30.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We welcome, S1-5 as the basis for calculating certain quantitative metrics required by other DRs in this Standard. This helps to create transparency and comparability. It should be no deviation in the KPIs from this (exception S1-9). However, the designation "not reported/not disclosed" should be defined clearly. Does this refer to values that cannot be determined due to the current personnel systems (e.g., the system does not evaluate gender), or does it refer to an additional gender specification by the employee (i.e., the employee did not provide a gender)?	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We support the introduction of a threshold for incidents. However, we strongly recommend defining the term "substantiated" or changing it to "confirmed" to ensure cross-company comparability. The interpretation of the term "substantiated" varies significantly across countries and legal fields, and without a clear definition, we anticipate challenges in establishing a reporting approach.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	The elimination of the distinction of performance reviews according to number/proportion of performance reviews per employee (a) and number of reviews in proportion to the agreed number of reviews by the management (b) simplifies data collection and thus involves less effort in the data collection process. Morover, there are diverging requirements from ESRS S1-12 § 38a (regular performance and career development reviews) and AR 24 (here only performance review). It is therefore unclear whether the disclosure requirement only includes performance meetings and/or development discussions. This can lead to a lack of comparability in the disclosure.	S1	S1-12 - Training and skills development metrics	AR 24
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	The elimination of the gender distinction in the training hours simplifies data collection and is therefore associated with less effort in the data collection process.	S1	S1-12 - Training and skills development metrics	38.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We agree that EFRAG also declined to give guidance about whether interns, trainees or inactive employees must be included as this depends on the national legislation. But to increases the transparency and comprehensibility of the data the undertakings must explain the sope "total number of employe" in a qualitative way and had to give feedback which employees are included or not. In our opinion, the explanation of this applied scope is particularly also necessary due to pragraph 23g "in case of inconsistency between financial statement".	S1	S1-5 - Characteristics of the undertaking's employees	23 (g)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	In order to data quality and comparability, the definition of "non-guaranteed" rather should be concretised clearly and not consistently removed. It is clear that this category includes "own workforce" employees, not "non-employees" or "value chain workers," and these employees do not have guaranteed minimum working hours. However, it is not explicitly stated if "non-guaranteed hours employees" only include on-call workers considered vulnerable workers. It should be clarified whether non-guaranteed hours employees only include on-call workers or also include employees without guaranteed hours but with mutual agreements on work availability.	S1	S1-5 - Characteristics of the undertaking's employees	AR 9
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We welcome the standardised use of scope between the KPIs. In S1-7 we use the scope of EEA- and non-EEA countries. We think it is better to use the EU/Non-EU Scope for this (as for S1-9).	S1	S1-7 - Collective bargaining coverage and social dialogue	27.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We agree that total number of non-employee only have to be reported, when they are significant driver of IROs. But it is not clear when this situation arises. The definition "key part of the undertaking's business model, for example when they are used to provide flexible labour or when they are used in key processes" is missing. Possible interpretation: If we would not use the non-employees model, the business could not be continued. We recommend to clarify the definition accordingly.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We agree, the undertaking shall disclose the calculation methodology, data types and sources used as input. However, we recommend that a combination of "collected voluntary employee surveys and the information from mandatory disability quotas reported by the undertaking" be used for this. This also covers the nation legal definiton. We welcome it only to report data that can be lawfully collected and the recognition that disability status depends on national legal definition Moreover, The reference to GDR-T within this specific AR appears to lack relevance and should be removed	S1	S1-11 - Persons with disabilities	AR 23
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We welcome the eliminating of the requirement to disclose the types of employees that do not enjoy social protection and eleminating of retirement from the list of life events and changing 'parental leave' to 'maternity leave.	S1	S1-10 - Social protection	34.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We welcome the move to NMIG in relation to the percentage of employees who have taken leave for family reason.	S1	S1-14 - Work-life balance metrics	42.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We welcome the reduction of non-employee reporting (all disclosures about non-employees were deleted except for the total number) due to data limitations.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We welcome the changes. It would be helpful to clarify whether fines, penalties and compensation for damages that are recognised during the current reporting year but relate to incidents disclosed under 46(a)(b) in the previous reporting year(s) also fall under 46c.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We disagree as now the "tension" description becomes a "shall" criteria (initally, it was a "may" datapoint). The wording "where potentially / significant tension arise" should be added as otherwise it would counteract the intention to simplify the reporting requirements.	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The proposal introduces a new term, 'work-related accident,' which is not defined anywhere in the standard. This fundamental omission immediately introduces significant misleading ambiguity and confusion, leaving its precise meaning open to subjective interpretation by different undertakings and jurisdictions. Suggestion: Amend to: The objective of this DR is to allow an understanding of the coverage, quality and performance of the health and safety management system established to prevent work-related injuries, ill-health and fatalities.	S1	S1-13 - Health and Safety metrics	39.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The definition of "recordable work-related accidents" within the EFRAG proposal explicitly encompasses both work-related injury and ill-health. 1)Duplication and Misalignment with Simplification: If "recordable work-related accidents" includes ill-health, and there is also a separate requirement for "recordable work-related ill health" (40. (d)), this creates a direct duplication of reporting requirements. This redundancy contradicts the fundamental objective of simplification and streamlining data collection, leading to unnecessary complexity and potential inconsistencies in reported figures.	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	ANNEX II to the [Draft] Amended ESRS Exposure Draft July 2025: This definition, rooted in OSHA criteria, introduces ambiguity through two critical flaws: 1)Loss of Consciousness as a Standalone Criterion The current framework treats all loss of consciousness incidents as recordable, regardless of causation (e.g., workplace hazards like chemical exposure vs. pre-existing conditions like epilepsy). This overinclusiveness distorts workplace safety metrics by conflating occupational and non-occupational factors. Further, severity variations (e.g. brief first-aid cases vs. multi-day absences) are unaddressed, preventing nuanced risk assessment. 2)Undefined "Significant Injury" The term "significant injury" lacks objective parameters, leading to inconsistent interpretation across medical professionals and jurisdictions. For example, a laceration requiring stitches might be deemed "significant" in one context but not another. This subjectivity undermines data harmonization and comparative analysis. Suggestion to delete: Deletion of "loss of consciousness" and "significant injury", remaining "Work-related injury or ill health that results in any of the following: death, days away from work, restricted work or transfer to another job, medical treatment beyond first aid or ill health diagnosed by a physician or other licensed healthcare professional, even if it does not result in death, days away from work, restricted work or job transfer, medical treatment beyond first aid"	S1	S1-13 - Health and Safety metrics	40. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The definition of "recordable work-related accidents" within the EFRAG proposal explicitly encompasses both work-related injury and ill-health, and critically, it also includes fatalities. To emphasize and uphold the clear EFRAG decision regarding the deletion of 'days lost to fatalities' – a decision made due to the inherent lack of a robust and comparable methodology for such calculations – it is fundamental to sharpen the interpretation of this requirement. Therefore, while the term "recordable work-related accident" encompasses fatalities, the calculation of "days away from work" must be understood to apply solely to non-fatal incidents. Suggestion: Amend to: with regard to the undertaking's employees, the number of days away from work related to work-related injuries or work-related ill health. Moreover, please note that from a definition perspective, every injury includes an accident. Especially work-related. It does not make sense at all to separate work-rleated accidents and work-related injuries. An accident always includes an injury and vice-versa. Please only write "work-related accident" and ill-health! This will also be more relatable to S1 - 40. (b) and (c).	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	Aquaculture Stewardship Council	NGO	Netherlands			I disagree	The objective should include an aim to understand if companies are taking steps towards closing gaps to an adequate wage. In many countries, especially lower-income countries, there is a substantial gap between current wages and adequate wages (defined as the wage required for a worker and his or her family to have a decent standard of living). This means that this clause should specify that closing the gap needs to be a gradual process to ensure sustainable employment. In almost all of these countries, it is unrealistic and potentially counterproductive to expect companies to pay an adequate wage to all employees immediately, as this could encourage outsourcing of the workforce to contractors outside the scope of ESRS and other harmful strategies. It is important to convey this message as part of the overall objective.	S1	S1-9 - Adequate wages	31.
Excels	Aquaculture Stewardship Council	NGO	Netherlands			I disagree	The previous version, "The undertaking shall disclose whether all its employees are paid an adequate wage, in line with applicable benchmarks" provides much clearer guidance at this first mention for how companies should assess whether or not all employees are paid an adequate wage. Without this clarification, companies may take a subjective view on whether wages are adequate. Indeed, not only should this clause be retained, but it should be strengthened to say that companies should be required to indicate progress they are making in closing adequate wage gaps. The removal of the voluntary clause #71 to disclose information on non-employees is an unwelcome dilution of the requirement given that non-employees, particularly workers indirectly employed through contractors, are often at greatest risk of excessively low wages and wage-related violations such as non-payment of wages. Without a requirement to ensure adequate wages for non-employees, the ESRS risks incentivising companies to replace directly employed workers with indirectly employed workers who are paid below adequate wages.	S1	S1-9 - Adequate wages	32.
Excels	Aquaculture Stewardship Council	NGO	Netherlands			I disagree	Companies should be required to provide evidence as to the wages of lowest paid workers in each country of operation to support their assertion that adequate wages are paid.	S1	S1-9 - Adequate wages	20.
Excels	Aquaculture Stewardship Council	NGO	Netherlands			I disagree	The basis of this calculation must indeed be the lowest wage but related to all individuals working in the company's operations, directly and indirectly employed, and so also including self-employed or sub-contracted workers (termed "non-employees" in the ESRS) working alongside directly employed workers but at risk of wage exploitation if not included in scope. Further, since human rights are universal, making a distinction between EU and non-EU countries as to how adequate wages are defined is not appropriate.	S1	S1-9 - Adequate wages	21.
Excels	Aquaculture Stewardship Council	NGO	Netherlands			I disagree	The benchmark for an adequate wage should be the amount that is needed by workers to support a decent standard of living, i.e., a Living Wage. There should be no distinction between defining adequate wages in EU and non-EU countries as this would represent a discriminatory policy. The proposed hierarchy of benchmarks and in particular, the acceptance of statutory minimum wages as a benchmark for adequate wages is highly problematic and goes against the principle of adequate wage which is an objective and evidence-based measure. Minimum wage setting processes, even when in accordance with ILO wage setting principles, necessarily involve consideration of not only the needs of workers and their families but also economic factors and this almost always results in a minimum wage that is in no way adequate to afford a decent standard of living. Further, the practicality and feasibility of implementation is questionable given the resources required to determine whether wage setting has occurred in line with ILO principles. The EU should instead support the creation of a global Living Wage database with the help of technical experts and companies should regularly report progress towards Living Wages for all workers in their operations.	S1	S1-9 - Adequate wages	22.
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We suggest aligning the ESRS S1 gender pay gap disclosure with the EU Pay Transparency Directive. Most companies will need to calculate the PTD metrics anyway - thereby lowering the burden on calculating the same metric twice in different ways. Furthermore, alignment would improve comparability, and future-proof reporting. We propose keeping the current ESRS ratio as a minimum, but allowing or encouraging companies to report using the PTD methodology where available, and revising ESRS S1 once the Directive is fully transposed."	S1	S1-15 - Remuneration metrics	44. (a)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Harmonize the calculation methodology with that applied in the context of the gender pay gap in order to promote methodological consistency and ensure comparability across reporting frameworks. Explicitly exclude board members (not only the highest paid individual) from the scope of remuneration metrics to ensure more meaningful and consistent disclosures.	S1	S1-15 - Remuneration metrics	44. (b)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We suggest that non-employees whose numbers cannot be reliably quantified — such as freelancers — may be excluded from the disclosure, with a note explaining the limitation.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Adjustment of the data point: According to (amended) S1-14, para. 88 b, ""work-related ill-health"" should be reported. Due to GDPR and national data protection laws, it is currently not possible to report this metric as a connection between an employee's illness and professional activity cannot be established. According to the GDPR, a sick note is considered health data and thus personal data that is particularly worthy of protection. For instance, in Germany, according to the Social Security Code (Sozialgesetzbuch, SGB X), the transmission of information about the diagnosis to the employer is not permitted. Undertaking must fall back on estimates to report this data point using publicly available data sources (e.g., statistic published by DGUV in Germany). As all companies in a country with strong data protection laws will face the same issue, all would have to use estimations with non-company-specific (or even industry-specific) data bases. Therefore, it would not be a meaningful comparison.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We note that the amended ESRS now refers only to maternity leave, whereas the previous version included parental leave. We suggest restoring the broader scope to parental leave, as this better reflects companies' social protection practices, ensures gender-neutral coverage, and aligns with international standards. Limiting the disclosure to maternity leave reduces comparability and excludes relevant data on paternity or shared parental leave policies.	S1	S1-10 - Social protection	34. (d)
Excels	UNICEF	NGO	United States			I disagree	UNICEF believes that all parents have a right to be involved in their child's upbringing and that parental rights should not be constrained by traditional gender roles and outdated assumptions about who provides care for a new child. Parental leave is a gender-neutral policy that is available to all parents, including fathers, same-sex partners, and non-birthing parents. This encourages fathers to take time off and be more involved in early childcare, which has been shown to improve family dynamics and the child's development. For these reasons, we disagree with the narrowing of "parental leave" to "maternity leave".	S1	S1-10 - Social protection	34. (d)
Excels	UNICEF	NGO	United States			I partially agree and partially disagree	UNICEF welcomes that the metric to disclose the percentage of employees entitled to take family-related leave during the period has been retained in the exposure draft. However, UNICEF disagrees wih the removal of the metric relating to the percentage of entitled employees that actually took family-related leave. The latter data point is essential to understanding the effectiveness of a company's family leave policies and the extent to which the company supports working parents in practice. UNICEF does not agree that the removal of the second metric is a meaningful reduction in the reporting burden since the effort required to disclose the percentage of employees taking family-related leave is only a marginal increase in the effort required to disclose the percentage of employees entitled to take family-related leave. Indeed, they can be combined into a single metric with two parts: (1) the percentage of employees entitled to take family-related leave during the period, and (2) the percentage of these entitled employees taking family leave.	S1	S1-14 - Work-life balance metrics	42.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	The term "people" should be added at the end of the following sentence :"(employees working in a particular factory or geography or self-employed people)".	S1	S1-1 - Policies related to Own workforce	11.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	The log of amendments does not contain the reference to "actual negative impacts" in the 2nd paragraph of this AR. We recommend retaining the broader wording from the log of amendments, as key actions may also address material potential negative impacts. This approach would also ensure consistency with para 19(a) of the ESRS S1 ED, which refers broadly to "negative impacts".	S1	S1-3 - Actions and Resources related to Own workforce	AR 6
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	The term "(employees" should be removed in the following sentence: "(AR 56 amended) The definitions of permanent, temporary, non-guaranteed hours (employees differ among countries."	S1	S1-5 - Characteristics of the undertaking's employees	AR 9
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	The following content shall be added at the end of the title of the table 1: ""in the ten largest countries in terms of number of employees, where the undertaking has at least 50 employees".	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend clarifying whether the end of temporary contracts shall be considered in the rate of employee turnover calculation (different practices observed for the first year of reporting under the ESRS).	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We invite EFRAG to modify the numbering of current § 23(c), (d) and (e) as they should be presented as a detailed list under § 23(b) (therefore presented under separate points (i), (ii) and (iii)).	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We suggest specifying that the total number of non-employees shall be disclosed by head count to ensure alignment with the reporting of the total number of employees.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend either clarifying the new concept of "significant driver" of material IROs that has been introduced or removing the word "significant" (i.e. stick to "drivers") to avoid confusion with the materiality assessment approach or the materiality of information principle.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	The content "with >50 employees" in the table should be added in the following sentence: "(for the EEA countries with >50 employees included in the ten largest countries)".	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	The way former § 74 and § 75 have been simplified and consolidated may raise questions on how to assess a "lack of social protection" (previously, ESRS 1 required to disclose whether all the undertaking's employees were covered by social protection and, if not all employees were covered, the list of countries concerned). We therefore believe the new wording should be clarified to avoid potential different interpretations. Finally, should this proposal be maintained, we highly recommend providing a framework that defines thresholds for social protection (and lack of).	S1	S1-10 - Social protection	34.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend clarifying how to calculate the number of "days lost" as this topic has raised questions in practice. Besides, it would be useful to clarify in the AR that this number does not take into account days lost to fatalities (contrary to Set 1).	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	The fact that the remuneration to be taken into account for the gender pay gap and for the annual total remuneration ratio is different raises difficulties in practice (the definition of "pay" in the ESRS Glossary shows discrepancies compared with the elements for the annual total remuneration calculation provided under AR 36). We encourage EFRAG to further investigate the matter and to clearly explain which difference exist (where relevant) and to justify why there should be any difference.	S1	S1-15 - Remuneration metrics	44.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend clarifying that the « highest paid individual » may be a member of the administrative, management and supervisory bodies that is not an employee. We also recommend clearly indicating that the highest paid individual may not always be the CEO (consistently with the indicator to be presented under the SFDR and despite the wording of such indicator).	S1	S1-15 - Remuneration metrics	AR 36
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Insert "and how it makes it known to its own workforce." at the end of the second sentence. REASON: For companies' grievance mechanism, outreach (the process of informing potential claimants of the existence of grievance mechanisms and how to access them) is key. See https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and references cited.	S1	S1-1 - Policies related to Own workforce	16.
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Insert, "including a description of all actual remedies provided for negative human rights impacts." to end the sentence. REASON: Specific remedy disclosures are essential to the usefulness of disclosures on human rights actions. See our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf CITE DISCLOSRUE PAPER.	S1	S1-1 - Policies related to Own workforce	18.
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Add: "In accordance with ESRS 2 GDR-A key actions describe all actual remedies provided for negative human rights impacts." REASON: Specific remedy disclosures are essential to the usefulness of disclosures on human rights actions. see our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf CITE DISCLOSRUE PAPER.	S1	S1-1 - Policies related to Own workforce	AR 6
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Delete the final word "region" and insert "country". REASON: To disclose this information by region risks aggregating workforces in countries with widely divergent rates of securing collective bargaining agreements and so rendering the information misleading and uninformative.	S1	S1-1 - Policies related to Own workforce	27. (c)
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Insert at the beginning of (b) "For each country in which the undertaking operates: " REASON: This is a valuable addition with little added reporting cost. Often the most important information on workplace fatalities is where they occurred and so can highlight particularly dangerous and insufficiently controlled operations.	S1	S1-1 - Policies related to Own workforce	40. (b)
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Add to AR 37: "In addition to the total number of incidents reported under DR 46(b) disaggregate by human right negatively impacted and the country in which they occurred." REASON: These are essential metrics needed to make these disclosures useful for relevant audiences. see: https://wrap.warwick.ac.uk/id/eprint/185392/ and https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and references cited	S1	S1-1 - Policies related to Own workforce	AR 37
Excels	Triodos Bank N.V.	Bank	Netherlands			I agree	We agree with the new thresholds of 50 employees or more and reporting on ten largest countries.	S1	S1-5 - Characteristics of the undertaking's employees	5.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	While the simplification of reporting requirements is a legitimate objective, excluding wage information for non-employee workers risks undermining the standard's alignment with core human rights principles. Non-employees such as temporary agency workers, contractors, and platform workers, often operate under precarious conditions and are disproportionately exposed to wage-related vulnerabilities. Their exclusion from wage transparency metrics may obscure material risks and impacts, particularly in sectors with high reliance on outsourced labor. The original inclusion of wage disclosures for non-employees reflected a commitment to the International Labour Organization's standards and the broader social dimension of sustainability. Removing these disclosures may inadvertently signal that adequate remuneration is only relevant for direct employees, which contradicts the ESRS's stated ambition to cover the full scope of the undertaking's own workforce. We recommend that EFRAG reconsider this amendment and explore proportionality-based approaches that allow undertakings to report wage information for non-employees where material.	S1	S1-9 - Adequate wages	9.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	We strongly disagree with the removal of fatality disclosures for non-employees in ESRS S1-13. This change risks concealing serious safety incidents involving subcontractors and other third-party workers who often operate in high-risk environments. Fatalities among non-employees are not only tragic but also indicative of systemic issues in health and safety management. Their exclusion from mandatory reporting undermines the ESRS's commitment to capturing material impacts across the full scope of the undertaking's workforce. Subcontractors working on-site are frequently subject to the same operational risks as direct employees. Omitting their fatalities from disclosures creates a misleading picture of workplace safety and may reduce accountability for companies that rely heavily on outsourced labor. It also weakens alignment with international standards on occupational health and safety, which emphasize the importance of protecting all workers under an undertaking's control. We recommend reinstating the requirement to report fatalities among non-employees, particularly those working on-site or under direct supervision. Where full data is not available, a proportionality-based approach could be adopted to ensure meaningful reporting. Transparency in this area is essential to drive improvements in safety practices and uphold the ESRS's social objectives.	S1	S1-13 - Health and Safety metrics	13.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Not sure how targets set to manage material impacts, risks and opportunities related to own workforce have changed. But I propose to keep it included.	S1	S1-4 - Targets related to Own Workforce	5.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	We agree that many indicators related to discrimination can be deleted. But considering the relevance of the topic and the fact that it is a core ILO convention we recommend to leave a policy aimed at elimination of discrimination in place.	S1	S1-1 - Policies related to Own workforce	1.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	Core ILO conventions covers right to organise and collective bargaining and equal remuneration. We recommend that a labour policy includes these topics.	S1	S1-1 - Policies related to Own workforce	1.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We recommend changing the term "maternal leave" to "parental leave", as this would be more gender inclusive and avoids any misunderstandings.	S1	S1-10 - Social protection	34. (d)
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We would like to refer you to Directive (EU) 2023/970, which provides exactly this information, and suggest therefore a deletion of the disclosure requirement. If this is not possible, we would at least propose a simplification of the data point (and subsequently the associated ARs) since calculating the median is disproportionately burdensome.	S1	S1-15 - Remuneration metrics	44. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Adapt. Consider to publish this in the annex or a seperate publication	S1	S1-5 - Characteristics of the undertaking's employees	AR 10
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	ESRS S1 - 32 The simplification of the disclosure requirement is appreciated. However, the current wording does not sufficiently clarify how companies should proceed when national benchmarks differ significantly from EU adequate wage definitions. This is particularly relevant in countries like Germany, where the statutory minimum wage may not meet EU adequacy standards. Suggest adding a clarification that companies should disclose when national benchmarks are used and explain how they diverge from EU or ILO principles.	S1	S1-9 - Adequate wages	32
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	ESRS S1 - AR 22 The simplification of the disclosure requirement is appreciated. However, the current wording does not sufficiently clarify how companies should proceed when national benchmarks differ significantly from EU adequate wage definitions. This is particularly relevant in countries like Germany, where the statutory minimum wage may not meet EU adequacy standards. We suggest adding a clarification that companies should disclose when national benchmarks are used and explain how they diverge from EU or ILO principles.	S1	S1-9 - Adequate wages	AR 22
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	40 (b) (i) - adapt: "other workers" please define other workers	S1	S1-13 - Health and Safety metrics	40.(b)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	40 (b) (ii) - delete for non-employees: Fatalities from work-related ill health only recordable for own employees not for non-employees	S1	S1-13 - Health and Safety metrics	40.(b)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	we recommend to delete the number of lost days due to work-related ill health: 1) 'Clear definitions of reportable number of days lost are needed (e.g. reporting period for days lost in chronic disease for multiple years? reporting after end of employment?). 2) It is very difficult up to impossible to record, since on sick leave certificates the reason is not noted due to privacy reasons	S1	S1-13 - Health and Safety metrics	40.(e)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Using national definitions makes aggregation and comparability across countries nearly impossible, especially due to privacy laws (e.g., GDPR). This undermines ESRS objectives of transparency and consistency. Focus should be on "recordable work-related injuries" for feasible, comparable reporting.	S1	S1-13 - Health and Safety metrics	40.(c)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Recordable work-related accidents" already include fatalities, but "days away from work" should apply only to non-fatal cases. Including fatalities would reintroduce methodological flaws and compromise data integrity.	S1	S1-13 - Health and Safety metrics	40.(e)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Including ill-health in "recordable work-related accidents" duplicates reporting with para. 40(d), contradicting simplification goals and creating complexity. Ill-health data for non-employees is also hard to collect due to privacy constraints.	S1	S1-13 - Health and Safety metrics	40.(c)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Work-related ill health" lacks a clear definition, leading to inconsistent interpretation and unreliable data. Reintroducing a definition (aligned with ILO Occupational Diseases) is essential for comparability and credible reporting. Recommended amendments: Add the detailed definition of "work-related ill health" (same as previous version): "Work-related ill health can include acute, recurring, and chronic health problems caused or aggravated by work conditions or practices. These include musculoskeletal disorders, skin and respiratory diseases, malignant cancers, diseases caused by physical agents (for example, noise-induced hearing loss, vibration-caused diseases), and mental illnesses (for example, anxiety, post-traumatic stress disorder). For the purpose of the required disclosures, the undertaking shall, at a minimum, include in its disclosure those cases outlined in the ILO List of Occupational Diseases"	S1	S1-13 - Health and Safety metrics	40.(b)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Current definition includes vague terms like "loss of consciousness" and "significant injury," causing overinclusion and subjectivity. These should be removed for clarity and consistency. Recommended new text: "Work-related injury or ill health that results in any of the following: death, days away from work, restricted work or transfer to another job, medical treatment beyond first aid or ill health diagnosed by a physician or other licensed healthcare professional, even if it does not result in death, days away from work, restricted work or job transfer, medical treatment beyond first aid."	S1	S1-13 - Health and Safety metrics	ANNEX II
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Adapt. We support disclosures on the gender pay gap. However the way this number is calculated (i.e. unadjusted) is not informative. This is because the formula does not take into account the tasks and responsibilities of the employees at all and therefore cannot make any statement on equal pay for work of equal value. In order to be able to make a meaningful statement, the cost of living in the different countries and the comparability of responsibilities should at least be taken into account. This should be aligned with planned directives on pay transparency.	S1	S1-15 - Remuneration metrics	44. (a)
Excels	German Social Insurance European Representation (DSV)	Association of financial institutions	Germany			I disagree	When implementing disclosure requirements on health and safety metrics (S1-13), it is important to recognise that reporting on occupational diseases – referred to as "work-related ill health" – offers little to no informative value for assessing a company's sustainability performance. Many occupational diseases emerge only after long latency periods and are assessed across a worker's entire career exposure history rather than a single employer's current practices. Including such cases in sustainability reporting risks creating a misleading picture that does not reflect the actual causes of the illness. For this reason, S1-13 - 40(b)(ii) should exclude the reporting of figures on work-related ill health.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	German Social Insurance European Representation (DSV)	Association of financial institutions	Germany			I disagree	When implementing disclosure requirements on health and safety metrics (S1-13), it is important to recognise that reporting on occupational diseases – referred to as "work-related ill health" – offers little to no informative value for assessing a company's sustainability performance. Many occupational diseases emerge only after long latency periods and are assessed across a worker's entire career exposure history rather than a single employer's current practices. Including such cases in sustainability reporting risks creating a misleading picture that does not reflect the actual causes of the illness. For this reason, S1-13 - 40(d) should exclude the reporting of figures on work-related ill health.	S1	S1-13 - Health and Safety metrics	40. (d)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Social Insurance European Representation (DSV)	Association of financial institutions	Germany			I disagree	When implementing disclosure requirements on health and safety metrics (S1-13), it is important to recognise that reporting on occupational diseases – referred to as "work-related ill health" – offers little to no informative value for assessing a company's sustainability performance. Many occupational diseases emerge only after long latency periods and are assessed across a worker's entire career exposure history rather than a single employer's current practices. Including such cases in sustainability reporting risks creating a misleading picture that does not reflect the actual causes of the illness. For this reason, S1-13 - 40(e) should exclude the reporting of figures on work-related ill health.	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	German Social Insurance European Representation (DSV)	Association of financial institutions	Germany			I disagree	AR 29 lists several potential sources of information on work-related ill health, yet many of these sources have significant limitations. Employee reports are often too subjective to serve as a reliable basis. Company doctors examine only current employees and, unlike Germany's accident insurance institutions, are not bound by the official list of occupational diseases set out in the Ordinance on Occupational Diseases. Compensation agencies, such as the accident insurance institutions in Germany, include all recognised occupational diseases where the last harmful exposure occurred within the company, which also regularly covers former employees. Because the scope of individuals considered based on AR 29 differs widely depending on the source, the resulting figures lack consistency and comparability. These methodological shortcomings undermine the reliability of such data, making mandatory disclosure problematic. For this reason, the reporting of figures on work-related ill health should be excluded.	S1	S1-13 - Health and Safety metrics	AR 29
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	See our response to the questionnaire : Companies do not agree with the new definition of the treshold for reporting metrics disaggregated at Country Level	S1	S1-5 - Characteristics of the undertaking's employees	AR 9
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Non-employees are not part of the company's own workforce by principle ; by consequence they are not recorded in the social data information systems of companies : that makes it impossible to disclose information on this category of workers. The notion of "non employees being a key part of the undertaking's business model" will open the door to interpratation and endless discussions with auditors. We continue to ask for deletion of this DR	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	14.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Companies prefer to return to the previously proposed definition of the threshold for all DR. Outside the EEA, companies do not understand what a region is (which countries are included in a region ?) and prefer to report on countries where they have significant employment only.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 16
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I agree	The term 'diversity' does not correspond to the indicator, which only measures gender distribution	S1	S1-8 - Diversity metrics	AR 19
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	We still consider it irrelevant and very complicated to publish information outside the EU ; however in the AR 22 we believe outside the EU, it is entirely appropriate to compare the lowest wages in the company with the statutory minimum wage established by legislation or collective bargaining; and where these do not exist, to use the benchmarks developed by the ILO – a tripartite international organisation – on living wage estimates rather than resorting to consultants or private organisations.	S1	S1-9 - Adequate wages	AR 20
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	The two-year review frequency does not depend on companies and should be abolished.	S1	S1-9 - Adequate wages	AR 22
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The number of life events covered remains very broad and should focus only on (i)sickness (ii) employment injury. Other items depend heavily on jurisdictional factors with limited company involvement (e.g., unemployment) or are already covered elsewhere in the standard (e.g., maternity leave overlaps with S1-14). The DR requires disclosure by country, with cumulative consideration of the risks listed: are countries listed rather than risks? If a single risk is not covered, the country is 'disqualified'? This DR shall limit disclosure to significant employment countries, applying the old threshold, and allow for refinement based on the risks covered	S1	S1-10 - Social protection	14.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	This data is very difficult to aggregate at group level. Definitions vary from one country to another. The company cannot collect individual data. The data is aggregated at country level, so it cannot be verified, which will complicate the audit.	S1	S1-11 - Persons with disabilities	AR 23
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	To be relevant this disclosure should be based on the number of employees eligible for training and appraisal interviews, rather than the total number of employees.	S1	S1-12 - Training and skills development metrics	AR 24
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	The amount of information to be disclosed is too detailed and redundant; the number of cases of recordable work related ill health and the number of days lost to work related injuries shall be removed. The publication of all these indicators shall be limited to employees and to countries where the undertaking has a significant workforce.	S1	S1-13 - Health and Safety metrics	AR 26
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	This disclosure will require a lot of work and is of little interest: it merely lists the existence of leave for family reasons, whether provided for by law or by a collective agreement.	S1	S1-14 - Work-life balance metrics	AR 31
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	With regard to remuneration, whether it be the pay gap or the ratio (S1-15), companies question the value of unadjusted indicators that do not provide any useful information and which, if reproduced without contextual explanation, may contribute to damaging their reputation. The adjusted pay gap is the only metric that directly measures compliance with the principle of "equal pay for equal work or work of equal value."	S1	S1-15 - Remuneration metrics	AR 33
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	The same remuneration elements should be provided for both indicators – why is only the ratio (AR36) detailed and not AR 35?	S1	S1-15 - Remuneration metrics	AR 35
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Interns and work-study students shall be excluded, and only the company's own workforce should be targeted. Benefits in kind will be very difficult to isolate and aggregate.	S1	S1-15 - Remuneration metrics	AR 36
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Our requests for amendments have not been taken into account; the definition of incident of discrimination is still too broad. It shall be limited to proven and dealt with incidents, i.e. those that have resulted in a final court decision.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 37
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Regarding penalties: what period should be taken into account? There is inevitably a time lag between the incident and any penalty. A financial materiality threshold should be introduced	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 41

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ETUC	Trade union	Belgium			I partially agree and partially disagree	Gender breakdown for zero-hours employees should be brought back in	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	ETUC	Trade union	Belgium			I partially agree and partially disagree	Age distribution should not be deleted, as it provides crucial information on the characteristics of workforce, which is relevant for a whole host of IROs, e.g. aging of the workforce	S1	S1-8 - Diversity metrics	29.
Excels	ETUC	Trade union	Belgium			I partially agree and partially disagree	Retirement should be brought back in as a mandatory datapoint	S1	S1-10 - Social protection	34.
Excels	ETUC	Trade union	Belgium			I partially agree and partially disagree	Gender breakdown for training hours should be reinstated	S1	S1-12 - Training and skills development metrics	38.
Excels	ETUC	Trade union	Belgium			I partially agree and partially disagree	Fatalities from ill health for non-employees and workers on site should be reinstated	S1	S1-13 - Health and Safety metrics	40.
Excels	ETUC	Trade union	Belgium			I partially agree and partially disagree	Datapoint on workers actually taking family-related leave should be reinstated	S1	S1-14 - Work-life balance metrics	42.
Excels	ETUC	Trade union	Belgium			I partially agree and partially disagree	Country-level information should be provided on the ratio of the higest paid individual in that country to the country median should be reported	S1	S1-15 - Remuneration metrics	44. (b)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Disclosure of "lack of social protection" Regarding the change from : (Former paragraph 74) "The undertaking shall disclose whether all its employees are covered by social protection[...] against loss of income" to (New paragraph 34) "In situations where an undertaking's employees lack social protection, the undertaking shall disclose the countries where employees lack those protections" As drafted this paragraph requires the use of a highly significant judgment for both the entity and the auditor as to determine whether there is a "lack" of social protection. What is the threshold for each social protection listed? However, the previous wording refering to loss of income was also not clear. We recommend that either 1) EFRAG provide an auditable framework that defines thresholds for social protection - and lack of - (reference to a standard framework, i.e. ILO) or 2) revert to previous wording but provide clarification on what is meant by "loss" of income - is it any dollar amount ? Or is there a threshold?	S1	S1-10 - Social protection	34.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Definition of total number of employees to be used S1-5 - Characteristics of the undertaking's employees requires the total number of employees by head count or FTE broken down by permanent employees, temporary employees, and non guaranteed hours employees. Multiple metrics throughout S-1 are calculated using a denominator "number of employees" (AR 13, AR 16, AR 18, AR 24, AR 25). Multiple datapoints(AR 13, AR 24, and AR 25) specify to use the headcount from S1-5. However, in AR 16, it is not specified if it is head count or FTE. We recommend specifying this in AR 16, and applying the same methodology used for each datapoint requiring number of employees as denominator.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 16
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I disagree	Mis-numbered sub bullet points: Paragraph 23 (c), (d), and (e) appear to be sub-bullets of (b) (should be (b)i,(b)ii, (b)iii). This also seems to cause an issue with the AR 13 for para 23 (c) which is permanent employees and not the rate of employee turnover.	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Introduction of the term "Management Systems" for which further clarification is needed	S1	S1-1 - Policies related to Own workforce	13.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	For the turnover ratio : further clarification needed regarding how to treat the natural end to a defined term term contract	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Total number of non employees : further clarification needed on whether to use head count or FTE.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The AR refers to "Significant" drivers: clarification is needed on what constitutes "significant" or we recommend to delete the word "significant".	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Introduction of term "establishments" and "significant" employment - for which clarification needed	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Further clarification needed for reporting on "Days Lost" : - Clarify on whether it includes fatalities - Clarify whether it includes only those occuring in the period, or those from a previous period but days lost in the current period, the cumulative amount of days included ?	S1	S1-13 - Health and Safety metrics	40. (e)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Clarification needed regarding the highest paid individual for the total remuneration metric 1) We recommend that EFRAG clarify the definition of the highest paid individual to specify if they must be an employee or not. 2) We also recommend that EFRAG clearly indicate that the highest paid individual may not always be the CEO (consistently with the indicator to be presented under the SFDR and despite the wording of such indicator). 3) Besides, we recommend that EFRAG clarify how to determine the annual total remuneration to identify the "highest paid individual": are we positioning ourselves at the level of the position held or at the level of the individual, bearing in mind that the individual may be remunerated for several different functions performed within the company?	S1	S1-15 - Remuneration metrics	44. (b)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	For the gender pay gap and remuneration ratio, difficulty arises in determining what is to be included in the calculation of these metrics as the guidance differs between the two. For the gender pay gap, AR 33 states that the metric shall include "all employees gross hourly pay level". For the total remuneration ratio – AR 36b requires the undertaking to consider base salary, benefits in cash, benefits in kind, and fair value of long-term incentives. It is unclear why there are differences between the two definitions and if it is intended that different forms of compensation are included within each. We recommend that EFRAG clarify this point. If the amount is intended to be different between these two metrics, state this and clarify what is to be included for each metric.	S1	S1-15 - Remuneration metrics	44.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Clarification is needed regarding incidents of discrimination and other human rights incidents. We recommend that EFRAG clarify if it is only the number initiated in the period, or does it also cover procedures that were initiated in a previous year but are still ongoing during the current reporting year?	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We note that there are still redundancies and overlaps which could be further streamlined: - 15a and 16 on insights and perspectives - 17 & 19a on remediation - 13 & 40a on management system related to H&S We recommend that EFRAG review to see if these could be further streamlined.	S1	S1 - Objective	1.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The first paragraph mentions dependencies and financial effects related to own workforce material IROs. However, there is no datapoint in the standard requiring to describe those dependencies and financial effects. In the absense of a datapoint, we recommend to make a connection with the requirements in the cross cutting standards.	S1	S1 - Objective	1.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Since sub-sub topics were eliminated, it is not clear why they are still indicated in brackets of sub-topics and what is expected to be disclosed. We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one	S1	S1 - Objective	4.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This is not a simplification therefore we suggest to eliminate the brackets or insert "or".	S1	S1-3 - Actions and Resources related to Own workforce	AR 6
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Please refer to question 27 of the General section	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The disaggregation required by this disclosure is not relevant. Especially for a multinational company, it is more meaningful to ask for the disclosure of workforce in every macro-geographical area or continent rather than per country with more than 50 employees (that for example may be all in Europe without adding any value to the information disclosed). We recommend to restore to the previous version of the disclosure, asking for the disclosure in countries where there are more than 50 employees representing 10% of the total workforce.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Please refer to question 28 of the General section	S1	S1-9 - Adequate wages	22.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	With reference to the number of days lost due to work-related ill health, it is important to highlight that, once an employee submits a medical certificate to justify their absence, the nature of the illness—whether work-related or not—is typically not specified. In many countries, employees are not allowed to self-declare a work-related illness. Instead, they must submit a formal request to the National Institute for Social Security, which is the only authority entitled to assess and officially recognize the illness as work-related. As a result, companies are generally unable to determine how many of the lost workdays are attributable to occupational diseases, since this information depends on external validation and is not systematically reported to employers.	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	it is required "the number of fatalities from work-related injuries among everybody in the undertaking's own workforce as well as other workers that work on its sites; [...]". Please clarify or delete "among everybody". It does not sound appropriate.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Please refer to question 31 of the General section	S1	S1-15 - Remuneration metrics	44. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency. It is of utmost importance to clarify if incidents are referred basically to social aspects (child labor, restrictions, overtime not recognized or not compensated) or if they are referred also to security aspects and healty environment.	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	We do not have a reporting regime spesifically for "non-employees" as we have an extended reporting practice that includes all personnell (own employees, non-employees and contractors) at our operated facilities. Suggest to make reporting spesifically for non-employees not mandatory if the company can provide evidence of a broader reporting practice where non-employees are included.	S1	S1-13 - Health and Safety metrics	40.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Suggest to replace term "work related accidents" with "work related accidents resulting in either fatality, lost-time injuries, injuries involving substitute work, or medical treatment injury." in order to be in line with international industry standards for injury frequency (ref. for example IOGP Safety Data reporting User Guide - scope and Definitions, chapter App2: "Total recordable injury rate (TRIR) The number of recordable injuries (fatalities + lost work day cases + restricted work day cases + medical treatment cases) per million hours worked. ")	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	This metric is currently not reported by Equinor due to personnel privacy concerns. Given sensitivities suggest to at least set this as "may report", not "shall".	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Inconsistency of "severe": the classifier "severe" has been removed when asking for the number of human rights incidents connected to own workforce. This signficiantly broadens the scope of what a company may be expected to disclose as an own-workforce human rights impact, as now it reads " number of human rights incidents connected to its own workforce that it has idenified in the reporing period, but excluding those that relate to discriminaion which are reported according to paragraph 46 a)". Potentially in the pursuit of simplification, this has signficantly increased the reporting scope by removing an imporant classifier. This would thus become a very different datapoint than what wave 1 companies reported on for FY2024 (according to only severe human rights incidents in OW). In accordance with the concept of risk-based due diligence, Equinor believes in including the risk-classifier word ("severe") regarding disclosures on human rights incidents. Otherwise, the scope is too large. There should, additionally, be consistency in including the "severe" classifier across S1, S2 and S3 (this is not the case in the current draft standard).	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	UGT-ESPAÑA	Trade union	Spain			I partially agree and partially disagree	Gender breakdown for zero-hours employees should be brought back in	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	UGT-ESPAÑA	Trade union	Spain			I partially agree and partially disagree	Age distribution should not be deleted, as it provides crucial information on the characteristics of workforce, which is relevant for a whole host of IROs, e.g. aging of the workforce	S1	S1-8 - Diversity metrics	29.
Excels	UGT-ESPAÑA	Trade union	Spain			I partially agree and partially disagree	Retirement should be brought back in as a mandatory datapoint	S1	S1-10 - Social protection	34.
Excels	UGT-ESPAÑA	Trade union	Spain			I partially agree and partially disagree	Gender breakdown for training hours should be reinstated	S1	S1-12 - Training and skills development metrics	38.
Excels	UGT-ESPAÑA	Trade union	Spain			I partially agree and partially disagree	Fatalities from ill health for non-employees and workers on site should be reinstated	S1	S1-13 - Health and Safety metrics	40.
Excels	UGT-ESPAÑA	Trade union	Spain			I partially agree and partially disagree	Datapoint on workers actually taking family-related leave should be reinstated	S1	S1-14 - Work-life balance metrics	42.
Excels	UGT-ESPAÑA	Trade union	Spain			I partially agree and partially disagree	Country-level information should be provided on the ratio of the higest paid individual in that country to the country median should be reported	S1	S1-15 - Remuneration metrics	44. (b)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	(Part 1): The definition and handling of "non-employees" is a significant challenge and not precise enough. The definitions are not workable and does not capture the development in the labour market (including discussion on whether it's labour or a service that is being delivered) The reliance on the suppliers NACE-code is not practical as this is not something that is logged in the ERP-systems and often quite arbitrary and linked to the historic establishment of the business. Two identical suppliers can belong to different NACE-codes, and hence their services would be accounted for differently. Most ERP-systems does not capture the numbers, partly because defining and gathering the data is very difficult. There may exist "proxies", like "# of deliveries" or similar accounting trails, but they are not standardised or uniform. We believe the definition should exclude all individuals already counted as "employees", even though some of these are technically "non-employees" but are handled as employees for practical reasons. This will ensure consistency to the financial statements.	S1	S1 - Objective	7.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	(Part 2): We believe that "Non-employees" can never be regarded as part of an entity's own workforce from a financial or strategic perspective. From an operational and workforce planning perspective, it makes sense to include the non-employees. The premise for reporting is a clear distinction between the two and ensure consistency in the Annuel Report i.e. financial FTE is based on "people" who are in an employment relationship with the undertaking only and does not include non-employees. We believe the only solution is to delete ESRS S1, paragraph 25, (disclose the number of non-employees) and instead put more emphasis on the narratives as we suggest in the comments to ESRS S1, paragraph 24. This also makes sense as to consistency to the other elements in S1, where employee statistics are only required for employees.	S1	S1 - Objective	7.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	The definition of "self-employed" is extremely difficult to navigate in practise. There are so many borderline definitions between being "self-employed" or "employed" and whether the work performed is in reality a delivery of service. We also believe that the current change in the dynamics of the labour market - for instance the shift in marketing from formal agencies to broader use of influencers – is making the traditional definitions very difficult to navigate. If removing the requirement in ESRS S1, paragraph -25, and place more emphasis on the narrative part as well as clearly outlining the materiality element, then we may be able to work with the current definition. If ESRS S1, paragraph 25, is retained, then a much more narrow and precise definition of ESRS S1, paragraph -8, needs to be developed.	S1	S1 - Objective	8.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree The amendment made is not just clarifying timeframe. An important word 'whether' is proposed deleted. As some entities might not engage directly with its own workforce or worker's representatives, whether can't be deleted as it is difficult to disclose on a SHALL, if the DR does not apply. In ESRS-S1-15a, the amendment made is not just editorial. Applicable needs to stay in the sentence. Similar in ESRS-S1-15b "applicable" is proposed deleted. Applicable needs to stay in the sentence.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree We believe additional reporting obligations have been added with the following addition: "In particular, it shall state whether it has grievance mechanism3. It shall also explain how it assesses the effectiveness of these channels." We believe this is added as it was not previously a "shall" requirement and should consequentially be removed as a "shall" requirement.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We suggest deleting ESRS-S1-19 We believe the content of this DR is already covered by ESRS-S1-18 The content in 19a could be part of the NMIG-document, but we suggest to delete 19 as it from our perspective only add complexity thereby increasing the reporting obligations and compliance without adding essential reporting requirements not already covered by ESRS-S1-18 – if material.	S1	S1-3 - Actions and Resources related to Own workforce	19.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We suggest deleting ESRS-S1-21 We believe the content of this DR is already covered by ESRS-S1-20 as well as the other requirements around stakeholder engagement. The content in 21 could be part of the NMBIGNBMIGNMIGNMIGNMIG-document, but we suggest deleting this as an DR as it from our perspective only add complexity.	S1	S1-4 - Targets related to Own Workforce	21.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	Please refer to our answer for Q27 in part 2. In addition to this we note that the requirement in ESRS-S1-27c refers to regions when being outside the EEA, which for annual reporting context makes more sense than individual countries. We believe this needs to be harmonised – referring to regions – or similar relevant aggregation for the reporting entity.	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree We do not agree with the first sentence in the AR "The undertaking shall present the requested disclosures either in a narrative format or in the following tabular formats…" We agree that the information can be provided both in a narrative way as well as in a tabular format, but we do not agree with mandating the specific tabular format no limiting the use of other presentation formats, like graphs. We believe the tabular format should be only an example, located in the NMIG.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree We do not agree with the first sentence in the AR "The undertaking shall present the requested disclosures either in a narrative format or in the following tabular formats…" We agree that the information can be provided both in a narrative way as well as in a tabular format, but we do not agree with mandating the specific tabular format no limiting the use of other presentation formats, like graphs. We believe the tabular format should be only an example, located in the NMIG.	S1	S1-5 - Characteristics of the undertaking's employees	AR 12
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree We believe the first sentence of AR 14 needs to be included directly in the DR to avoid misunderstanding as it is a very important materiality filer. More emphasis should be placed on the narrative element, including the description about the critical/key parts of the business model/business functions that are performed by non-employees. This description will naturally depend on the facts and circumstances of the individual reporting entity, but would naturally touch on the types of services/functions performed. The description could also cover for instance coverage of H&S-policies etc..	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We believe the requirement to disclose the total number of non-employees should be deleted. As stated in our comments to ESRS S1, paragraph 7, we believe the requirement to disclose a number should be removed. We believe that the narrative elements in ESES-S1-24 should provide the relevant information needed, but we could encourage the inclusion of relevant proxies to support/quantify the explanations (for instance # of deliveries or percentage of deliveries). If retained, the materiality threshold in AR 14 needs to included. Furthermore, "non-employees" reported as part of "employees" in the financial statements (see our comment on ESRS-S1-7) should be excluded.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree We believe the reference should be to ESRS-S1-24, not 25. We further believe that the AR should be more neutral in the language as it focusses primarily on the potential, negative impacts while disregarding for instance flexibility. The AR should cover our comments on ESRS S1, paragraph 24.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree Please refer to our answer for Q27 in part 2 – opposing the change in 27b as it refers to "top ten". In addition to this we note that the requirement in ESRS-S1-27c refers to regions when being outside the EEA, which for annual reporting context makes more sense than individual countries. We believe this needs to be harmonised – referring to regions – or similar relevant aggregation for the reporting entity	S1	S1-7 - Collective bargaining coverage and social dialogue	27.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree We do not agree with the first sentence in the AR "The undertaking shall present the requested disclosures either in a narrative format or following the table below …" We agree that the information can be provided both in a narrative way as well as in a tabular format, but we do not agree with mandating the specific tabular format no limiting the use of other presentation formats, like graphs. We believe the tabular format should be only an example, located in the NMIG.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	Regarding ESRS S1, paragraph 38b, we suggest that EFRAG carefully reconsiders the need for this, and if so, then how this can be measured in practice and become "decision useful" The average number of training hours per employee is very difficult to calculate in practice for a modern workplace. We are concerned about whether this could be anything other than an estimate, as training in a modern workplace consist of 1) formal training, 2) informal training, 3) on the job training, 4) coaching & mentoring, 5) microlearning and 6) social & collaborative learning. Of which 5 out of 6 is not necessarily recorded, and the last (formal training), the hours are most often not recorded. Strong definitions as to expectations to what is included and how entities are expected to do complete reporting is needed in order to make the DR decision useful.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree We note that the inconsistency between 44 (a) and 44 (b) is not proposed amended. We also understand that the current definitions originate from other EU-regulation as they are PAI-indicators. We propose that EFRAG secures consistency between the calculation of gender pay gap (average pay level) and total remuneration ratio (median annual). Our preference is to use average for both calculations, following how financial reporting would normally deal with assessing aggregated impact and budgeting. In achieving the consistency, we believe this also needs to be accompanied by a suggestion to the EU-Commission on how to ensure consistency with the other EU-legislation, based on the EFRAG proposal achieving this consistency. It is important that the inconsistency is amended both in the EFRAG disclosures as well as the corresponding legislations in order to ensure the infrastructure of information remains in place.	S1	S1-15 - Remuneration metrics	44.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree ESRS S1, paragraph 46a, refers to "own workforce", which includes "non-employees". In most instances, It does not make sense, that an entity is made responsible for disclosing non-employee incidents of discrimination, as these would be registered with the legal structure for that non-employee and not with the entity. This also impacts 46b+c, as the entity would not be the receiver of such fines. In most of these situations, "non-employees" are more aligned with the generics of "workers in the value chain" and not aligned with own employees.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	Anker Research Institute	NGO	United States			I partially agree and partially disagree	The objective should include an aim to understand if companies are taking steps towards closing gaps to an adequate wage. In many countries, especially low-income countries, there is a substantial gap between current wages and adequate wages (defined as the wage required for a worker and his or her family to have a decent standard of living) and closing the gap is a gradual process to ensure sustainable employment. In these countries, it is unrealistic and potentially counterproductive to expect companies to pay an adequate wage to all employees immediately, as this could encourage outsourcing of the workforce to contractors outside the scope of ESRS and other harmful strategies. It is important to convey this message as part of the overall objective.	S1	S1-9 - Adequate wages	31.
Excels	Anker Research Institute	NGO	United States			I disagree	The previous version, "The undertaking shall disclose whether all its employees are paid an adequate wage, in line with applicable benchmarks" provides much clearer guidance at this first mention for how companies should assess whether or not all employees are paid an adequate wage. Without this clarification, companies may take a subjective view on whether wages are adequate. The removal of the voluntary clause #71 to disclose information on non-employees is an unwelcome dilution of the requirement given that non-employees, particularly workers indirectly employed through contractors, are often at greatest risk of excessively low wages and wage-related violations such as non-payment of wages. Without a requirement to ensure adequate wages for non-employees, the ESRS risks incentivising companies to replace directly employed workers with indirectly employed workers who are paid below adequate wages.	S1	S1-9 - Adequate wages	32.
Excels	Anker Research Institute	NGO	United States			I partially agree and partially disagree	Companies should be required to provide evidence as to the wages of lowest paid workers in each country of operation to support their assertion that adequate wages are paid.	S1	S1-9 - Adequate wages	AR 20
Excels	Anker Research Institute	NGO	United States			I disagree	The basis of this calculation must indeed be the lowest wage but related to all individuals working in the company's operations, directly and indirectly employed, and so also including self-employed or sub-contracted workers (termed "non-employees" in the ESRS) working alongside directly employed workers but at risk of wage exploitation if not included in scope. Further, since human rights are universal, making a distinction between EU and non-EU countries as to how adequate wages are defined is not appropriate.	S1	S1-9 - Adequate wages	AR 21

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Anker Research Institute	NGO	United States			I disagree	The benchmark for an adequate wage should be the amount that is needed by workers to support a decent standard of living, i.e., a Living Wage. There should be no distinction between defining adequate wages in EU and non-EU countries. The proposed hierachy of benchmarks and in particular, the acceptance of statutory minimum wages as a benchmark for adequate wages is highly problematic. Minimum wage setting processes, even when in accordance with ILO wage setting principles or the EU Adequate Minimum Wages Directive, involve consideration of not only the needs of workers and their families but also economic factors and this often results in a minimum wage that is in no way adequate to afford a decent standard of living. This is especially common in countries that seek comparative advantage by keeping wage costs low for national producers and investors. Further, the practicality and feasiblity of implementation is an issue given the resources required to determine whether wage setting has occurred in line with ILO principles. The EU should instead support the creation of a global Living Wage database with the help of technical experts and companies should regularly report progress towards Living Wages for all workers in their operations.	S1	S1-9 - Adequate wages	AR 22
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The currently applicable version (ESRS S1 paragraph 26) specifies that disclosures on engagement with the workforce refer to material impacts on them. In the proposed draft ESRS S1 paragraph 14, this clarification has been removed. In addition, the proposed draft ESRS S1 paragraph 15 refers to actual and potential impacts on the undertaking's own workforce, without specifying that this only concerns material impacts. This raises the question of whether section S1-2 is intended to address workforce engagement more generally, without reference to material impacts. If the intention is to preserve the current meaning, in our view this should be explicitly clarified, confirming that workforce engagement relates specifically to material impacts.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Draft AR 2 states that the engagement with the own workforce can take different forms, such as information. Whereas, Annex II Acronyms and Glossary of Terms defines stakeholder engagement as an ongoing process of interaction and dialogue between the undertaking and its stakeholders that enables the undertaking to hear, understand and respond to their interests and concerns. It is recommended to harmonise these formulations so that the concept of engagement is applied consistently across the standard.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	AR 2
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	In our view, companies should disclose the processes through which they support the availability of the channels available to its own workforce to bring their concerns or needs. This would show whether such mechanisms are effectively implemented in practice rather than existing only formally, and would give stakeholders a clearer picture of the real effectiveness of due diligence and ethical standards.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	We note that the draft lacks a reference to methodical context information, as is included in draft ESRS S1-5 AR 10 for paragraph 23 ("The undertaking's method for compiling employee data (for example, at the end of the reporting year or average) may provide contextual information"). In our view, to ensure consistency, an equivalent point should be added to the Application Requirements fot S1-6, or a cross-reference to S1-5 AR 10 should be made.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The change in AR 73 represents a shift in focus: in the currently applicable version, the starting point for remuneration outside the EU was a living wage based on recognised benchmarks, whereas in the new proposal, the starting point is the minimum wage. However, the methodology assumes that companies will have to assess for themselves whether the minimum wages in individual countries comply with ILO principles on wage setting and whether the available living wage indicators comply with ILO principles on its estimation. Companies may not have the resources or expertise to make such assessments in multiple jurisdictions, which inevitably leads to divergent conclusions and a lack of comparability in disclosures.	S1	S1-9 - Adequate wages	AR 22
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	why par b) is not included under working conditions?	S1	S1 - Objective	4. (b)

Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The new DP is meaningful not for every company. The change from 10 % to top 10 can lead to excessive and confusing disclosure just because a country with small number of employees lands in the top 10. There are companies with presence in less than 10 countries. It should be clarified that the list can be shorter than 10 countries. It depends on the company, whether the list of countries with more than 50 employees or of countries with more than 10 % of employees is longer. It should be explicitly clarified that only countries with both more than 50 employees and more than 10 % are to be listed. AR 11 seems to not provide this clarity. In general we propose not to prescribe the kind / granularity of breakdown as metrics on the group level are more common and meaningful.	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	We do not support the newly proposed threshold for reporting metrics disaggregated at country level in draft ESRS S1-5 and S1-7 (S1-23(a), S1-27(b), and S1-28(a)). Defining the threshold as the ten largest countries in terms of employee numbers contradicts and undermines the principle of reporting only material information. We recommend maintaining the current threshold of 10% of the total workforce. The proposed definition would significantly increase data collection requirements while adding minimal value, as it would necessitate disclosures for countries with only a very small share of employees and limited relevance to the undertaking. Establishing "ten largest countries" instead of "at least 10%" creates a disproportionately low materiality threshold: with only 50 employees, even small subsidiaries would fall within scope. Such an approach would introduce additional complexity while providing little benefit. For groups with multiple subsidiaries, the requirement would also result in inconsistent reporting across the group, thereby adding unnecessary complexity. Compared with the existing 10% threshold, the new approach produces not more meaningful information but rather more noise.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The requirement is not clear (top 10 of EEA-countries or EEA-Countries from the top 10 list; what is about companies with the presence or material presence in less than 10 (EEA-)countries?). In general we propose not to prescribe the kind / granularity of breakdown, but - if disclosed - the method of breakdown calculation should be aligned with S1-5.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	We do not support the new threshold proposed for reporting metrics disaggregated at country level in draft ESRS S1-5 and S1-7 (S1 -23(a), S1- 27(b) and S1–28(a)). The new threshold (10 largest countries in terms of employee numbers) contradicts/dilutes the principle of only reporting material information. We recommend maintaining the current threshold of 10% of total number of employees. The updated/new definition in draft ESRS S1-5 and S1-7 would expand the data gathering efforts for the disclosure, with minimal value added because the new threshold would entail that countries with a relative low percentage of total workforce would need to be disclosed despite their relatively little effect on the undertaking.	S1	S1-7 - Collective bargaining coverage and social dialogue	28. (a)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The approach is oversimplified. In light of the objective set out in §29, disclosure should have been required for the entire pyramid, not only for the top. The deletion of the age distribution requirement is inappropriate, as age discrimination is clearly observable in the market. More quantitative data would therefore have been warranted, not less.	S1	S1-8 - Diversity metrics	30.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	For the sake of confidentiality of sensitive personal information employees employed by small sized sites (e.g. <10) of an undertaking , we kindly ask to apply a threshold for the size (e.g. >20) of eligible sites of an undertaking. A possibility of an individual threshold decision would be appreciated.	S1	S1-11 - Persons with disabilities	36.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	Please clarify in S1 or glossary whether the term "training" includes mandatory / legally required corporate trainings such as compliance, IT security or data protection training and onboarding training, such as training on corporate values and policies.	S1	S1-12 - Training and skills development metrics	37.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Adding own workforce and other workers on the premises is confusing, especially since point (i) uses "workforce," which also includes non-employees, while point (ii) is limited to employees. As a result, this KPI mixes two types of events across three different categories of workers.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Proper instructions for the gender category "other" are missing. Out of respect and inclusion, it should be addressed with adequate reporting guidance on how to handle it. The current S1-15 is very negative in this respect.	S1	S1-15 - Remuneration metrics	44. (a)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	§46.b: The reference to privacy regulations is unnecessary. Naturally, when a regulation prohibits disclosure, this cannot be overridden by a reporting standard. Adding a dedicated reference could even encourage companies to "abuse" it as a justification to hide relevant cases. §46.c: For the sake of clarity, it should be specified whether provisions for risks are also in scope, or only asserted amounts.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	S1	S1 - Objective	5.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The statement about value chain workers does not belong to S1. Suggestion: The paragraph should be moved to S2.	S1	ESRS S1 - Objective	9.

Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Es ist unklar, wie der Begriff „significant driver" zu verstehen ist. Es wird impliziert, dass einzelne DR bei Unwesentlichkeit weggelassen werden können. Es ist des Weiteren unklar, welche Anforderungen zutreffen müssen, damit non-employees keine Auswirkungen auf IROs haben, anstelle der bisherigen Sichtweise, damit IROs in Bezug auf non-employees nicht wesentlich werden können. Beides widerspricht der bisherigen Lesart aus ESRS 1.0 zur Wesentlichkeit von Nachhaltigkeitsaspekten (u.a. Explanation – ID 177 – Mapping sustainability matters with disclosure requirements).	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	With the requirement to report the metric for all employees of all Non-EEA countries, undertakings with numerous small sized (e.g. <20) Non-EEA sites need to collect regulatory data for all sites which would cause an immense workload contradicting the purpose of the Omnibus simplification package. We kindly ask to make it possible to limit not only the number of the EEA sites, but the number of the Non-EEA sites too, where the employee metrics have to be disclosed.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Redundant to GDR-A Suggestion: Delete	S1	S1-9 - Adequate wages	AR 22
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	According to German law and applicable bargaining agreements, there are multiple forms of carer's leave (Sonderurlaub für Pflege) which can be taken also for serious medical reasons but encompass all medical reasons that are not classified as serious. The reason for taking the carers' leave cannot be specified to the extent that the undertaking cannot verify whether a serious medical reason was existent or not considering the applicable data protection regulations. Please specify whether the carers' leave encompasses leaves which can include leave to provide personal care in general without the possibility of verification of extent of the required degree of medical seriousness or care.	S1	S1-14 - Work-life balance metrics	AR 32
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	The term "annual remuneration" may refer both to full-time as well as part-time employees. Practice shows that undertakings apply different approaches, both extrapolation as well as non-extrapolation which reduces the comparability of the results. We understand that the purpose of this metric is to encapsulate the reason for the difference in annual remuneration, which includes the difference arising out of the distinguishment between part-time and full-time remuneration. Please kindly specify whether it refers either to the extrapolated annual remuneration or the non-extrapolated annual remuneration of part-time employees.	S1	S1-15 - Remuneration metrics	AR 36
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Redundant to GDR-A Suggestion: Delete	S1	S1-3 - Actions and Resources related to Own workforce	AR 6
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Redundant to GDR-A Suggestion: Delete	S1	S1-3 - Actions and Resources related to Own workforce	AR 7
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				• From the point of view of the qualitative data points (all non-metrics requirements), the revised version only slightly simplifies reporting effort. • We recognize that an effort has been made to express things more simply. For example, content that was written down in two paragraphs (e.g. both in ESRS S1 and ESRS 2) was deleted. This accounts for a large part of the change, but it only helps companies that are newly subject to the regulation. • The adapted layout with the application requirements presented directly after the disclosure requirements is to be welcomed. This way, all relevant information are in one place. • It is unfortunate that the previous grid of paragraphs is not simply reused. This also applies to the quantitative data points. Especially here, the previous numbering represents a lived and well-known practice. All renaming of data points entails an unnecessary administrative effort. • More common than renouncing content is moving the content to other standards. This also means text work. • By no means only deletions take place, there are formerly voluntary data points that are now mandatory and new mandatory data points (e.g. engagement with vulnerable groups or "approach in situations where tensions arise between such actions and other business pressures") • Only the requirements regarding the targets have been simplified, MDR-As and MDR-Ps have remained almost the same. In the implementation, this means that individual sentences have to be "dissected" from the text. Renaming the MDR's to GDR's is confusing. • Clarification that policies do not have to apply to the entire Own Workforce opens up more leeway, but internal guidelines is now needed.	ESRS2	ESRS 2 & ESRS S1 - General - qualitative requirements	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				The general deletion or simplification and merging of introductory texts with concrete legal requirements for the metrics is to be welcomed. • The planned establishment of a separate glossary for definitions is, in our view, easier to maintain in the implementing provisions. • In our view, the introduction of a non-mandatory illustrative guidance document for remaining voluntary data points is not necessary and would entail effort. It is better to leave these voluntary data points in the law as before. • Criticism: It is incomprehensible why international rating-relevant information is voluntary or should be removed (e.g. full-time and part-time, age distribution, qualification hours by gender).	ESRS2	ESRS S1 - General - Metrics	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				If we read it correctly, materiality analysis should no longer be described as a separate chapter in S1. This also means that the entire text structure has to be changed.	S1	S1-1 - Policies related to Own workforce	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				We appriciate the simplifications in the phase-in data points S1-10, S1-11, S1-12 Performance and S1-15. Here, the effort for our entities to assess social protection, etc., is reduced.	S1	S1-10, S1-11, S1-12 Performance & S1-14 (former S1-11, S1-12, S1-13 Performance and S1-15)	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				Adding own workforce and other workers on the premises is confusing. Point (i) uses "workforce," thereby also including non-employees, while point (ii) is limited to employees. This means the KPI combines two types of events across three different categories of workers.	S1	S1-13 - Health and Safety metrics	

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				• Criticism regarding S1.13.39/40 (b), (d) and (e) (formerly S1.14.87 + 88) which refers to the term recordable work- related ill health: To be able to provide high-quality definitions to our respective entities in an international context, it is crucial to have a basic guide on reportable work-related health problems. In the ESRS S1 Set according to the 2023 Delegated Act, AR 92 has provided this guideline. In particular, the minimum disclosure requirement, as set out in the ILO list of occupational diseases, was a valuable clarification for efficient reporting. With the draft amendment, this clarity of definition and uniformity would be lost and additional work would be incurred in terms of new definition work. • Criticism of the general focus on the topic of "work-related ill-health"; Key figures for this purpose provide only very poor information about the company's health performance in the reporting period. Work-related illnesses occur with a significant time lag after exposure to the dangerous conditions. • Moreover, in contrast to TRIR, LTIFR enables more robust and internationally comparable reporting of accident rates. To enhance the consistency and transparency of safety performance metrics, LTIFR could be adopted as an additional mandatory indicator—on the condition that it is applied in accordance with an internationally harmonized definition by ESRS. • Criticism of the planned implementing regulation AR 27: This amendment obliges companies to use the definitions of reportable accidents at work in accordance with the national laws of the respective countries in which the employees are resident. For multinational companies such as the Volkswagen Financial Services, accident figures are an instrument for managing and benchmarking their international activities in the field of occupational health and safety. In the international context of reportable accidents at work, national definitions differ significantly, as they are often based on national insurance criteria. When consolidating the accident figures of companies across different countries using the definition under the national law of the respective countries, the importance of the consolidated and the reported data point is not specified. This leads to non-comparable disclosures from companies in CSRD reporting, without the possibility of benchmarking either internally or externally. Therefore, we	S1	S1-13 - Health and Safety metrics	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				Proper instructions for the gender category "other" are missing. For reasons of respect and inclusion, it should be addressed with clear reporting guidance on how to handle it. The current S1-15 is very negative in this regard.	S1	S1-15 - Remuneration metrics	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				• A new text structure would have to be built, the previous 3 sub-topics (plus sub-sub-topics) become 6 sub-topics (plus sub-sub-topics). Former sub-sub-topics become sub-topics. • Materiality analysis would have to be adjusted, as work was done at the sub-topic level and the new structure did not evaluate topics.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				The adjustment in S1-6 (former S1-7) is welcomed as the most common types of external workers do not have to be reported per type, but as a whole	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany				Criticism: In the data point adequate wages, it is due to the changes now unclear, whether the lowest wage category of the entity can be used as the basis for comparing and evaluating the adequate wage or whether now the lowest salary paid in the reporting period must to be used for comparing. Adaptation to the latter would entail an adaptation of the previous procedure and would significantly increase the effort of coordination within the entities, as the payroll departments need to be involved. Therefore, we would suggest the following expression in the (new) AR21: "The basis of this calculation is the lowest active wage category among the undertaking´s employees…" • We would welcome if standardized reference values would be provided for all companies in scope of the CSRD requirements • We would suggest a fourth and final analysis step to check whether the employee concerned was really inappropriately remunerated in the reporting year (below the reference value). This leads us to the wish of the harmonization of this data point with the CSDDD objective of adequate wage/remuneration in order to avoid workload in relation to the same objective.	S1	S1-9 - Adequate wages	
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I disagree	There is an inconsistency with the exposure draft language on this paragraph and the log of amendments which states that S1-5,S1-6 and S1-16 are all mandatory but this paragraph states S1-6 is subject to materiality.	S1	S1 - Objective	3.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	There is an inconsistency with the disclosure requirement. Work-related accidents is a new term that is defined in the glossary as including ill-health and fatalaties. The disclosure requirements makes reference to all three things (work-related accidents, ill-health and fatalities). The latter two should be deleted from the sentence.	S1	S1-13 - Health and Safety metrics	13.
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	We disagree with the addition in AR 22 (b) i) for the adequate benchmark outside the EU "which is periodically reviewed/adjusted every two years". We contend that it is not the responsibility of individual undertakings to regularly check/ ensure this (see also survey) and therefore recommend to delete this addition.	S1	S1-9 - Adequate wages	AR 22
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	We disagree with the newly introduced last sentence of AR 22 (b) that the adequate wage benchmarks outside the EU "should take into account both needs of workers and their families, as well as economic factors, as stated in the ILO Minimum Wage Fixing Convention No.131". Again, we contend that it is not the responsibility of individual undertakings to ensure this.	S1	S1-9 - Adequate wages	AR 22

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Allianz SE	Insurance	Germany			I disagree	We disagree with ESRS S1 - 23 (a), the new threshold for country-by-country disclosure, as it significantly increases 1) the burden of global data collection and 2) the number of data points to be disclosed or S1-5 and S1-7 (Collective bargaining coverage and Social dialogue). Reg 1) The burden of global data collection is significantly increased when metrics on employees are collected primarily by operating entity rather than by country, which is the case in many companies for internal steering purposes. Reg 2) An increased number of data points to be disclosed reduces the readability and conciseness of the final Sustainability Statement. Both arguments contradict the aim of the Omnibus initiative to simplify it (see also survey) and therefore, we recommend keeping the hitherto country-by-country disclosure threshold.	S1	S1-5 - Characteristics of the undertaking's employees	
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	For ESRS S1 AR 30, we recommend using working days instead of calendar days for the calculation of the number of days lost.	S1	S1-13 - Health and Safety metrics	
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	For ESRS S1 DR 44 (b) on total remuneration ratio we recommend aligning the wording with SFDR and using CEO instead of highest-paid individual.	S1	S1-15 - Remuneration metrics	
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	For ESRS S1 DR 34 we recommend further simplification as social protection for listed life events is (at least partially) outside of the company's control and knowledge. We recommend full deletion of metrics and country disclosure. PATs still need to be reported if topic is material.	S1	S1-10 - Social protection	
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	We partially disagree with ESRS S1 DR 12 as the undertaking should only be required to disclose information about policies if the topics listed here have been identified as material. Suggestion: Add "if assessed as material".	S1	S1-1 - Policies related to Own workforce	
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Adjusted gender pay gap should remain a voluntary option as this figure is much more meaningful	S1	S1-15 - Remuneration metrics	44. (a)
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	deletion of days lost due to fatalities leads to deviation of SFDR regulation, should be aligned	S1	S1-13 - Health and Safety metrics	40.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	deletion of "severe" leads to difference to SFDR requirement and should therefore be changed again and "severe" should be added, otherwise, extended reporting burden	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	Table 1 in AR 11 for para 23(a) contains the same information as Table 3 in AR 12 for para 23B	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	The percentage of employees entitled to take family related leave. We have a policy that covers 100% but it has an earling period of 2 years until you are entitled. Unclear whether it is sufficient to report the policy coverage or if we must do an analysis of seniority of all employees and get the number of employees entitled, according to the policy, in the reporting year.	S1	S1-14 - Work-life balance metrics	42.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I disagree	Average number of training hours is a metric very difficult to track. When done on an online learning management system, it doesnt track duration - it tracks completion of trainings. Also, people do workshops, in person trainings courses, MBAs etc that are not registered anywhere. So this will not be accounted for either. It will therefore be very difficult to achieve completeness for this metric.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	S1	S1-3 - Actions and Resources related to Own workforce	18.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	S1	S1-4 - Targets related to Own Workforce	20.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	To ensure confirmity among standards this sentence should also refer to ESRS S3 and ESRS S4.	S1	S1 - Objective	10.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"directly their attention" should be replaced with "directly its attention"	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	With respect to non-guaranteed hours employees breakdown by gender should be added - this would also be in line with AR 12. The total head cout of employees should also be provided as other metrics (e.g. non-employees, health & safety management system coverage) are also provided in head counts and they require contextual information of total head count. The numbering should be amended.	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"non-guaranteed hours (employees" should be amended to remove a bracket.	S1	S1-5 - Characteristics of the undertaking's employees	AR 9
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"average employee head count" should be amended into "average employee head count during the reporting year".	S1	S1-5 - Characteristics of the undertaking's employees	13.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	The AR makes the ESRS S1-6 sub-topic disclosure subject to materiality assessment. Materiality assessment of non-employee importance may be location specific/country etc. And this raises doubts whether in such a case the undertaking should provide numbers for the whole undertaking or only for location where non-employees are important. However, providing numbers only for a location where non-employees are important without further details will be usesless for users. Moreover, difficulties in interpretatino of this metric will mostly result in nonreporting. Furtheremore, data on non-empoloyees are required under other DRs(e.g. S1-13), and if S1-6 is not mandatory, then such DRs lack contextual data. Conseqently, this metric should be mandatory if own-workforce topic is material.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	S1-6 should also be material if own-workforce topic is material.	S1	S1 - Objective	3.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	In order to ensure consistency, it should be indicated that the undertaking should use the same manner of presentation (head count vs. FTE) as in S1-5 par 23(b). Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	In order to ensure consistency, it should be indicated that the undertaking should use the same manner of presentation (head count vs. FTE) as in S1-5 par 23(b).	S1	S1-12 - Training and skills development metrics	AR 25
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	The average number of training hours per employee should also be disclosed broken by gender as lack of trainings is the most common form of indirect discrimination.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	In order to ensure consistency, it should be indicated that the undertaking should use the same manner of presentation (head count vs. FTE) as in S1-5 par 23(b).	S1	S1-14 - Work-life balance metrics	42.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Whole phrase "human rights incidents" should be in bold as it is a separate defined term.	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Whole phrase "human rights incidents" should be in bold as it is a separate defined term.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Whole phrase "human rights incidents" should be in bold as it is a separate defined term.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 37
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It should be considered if this AR is necessary as "human rights incidents" is a separate defined term.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 37
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	"that have been initiated" should be rephrased into "that have been initiated in the reporting periof and/or of which the undertaking have learnt in the reporting period for the first time"	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	Reporting is required on the risk of child labour, but we do not see a definition.What constitutes child labour? If there are standards, for example in ILO or OECD regulations, these should be indicated. If the standard follows local practice, this should be explained. Are the standards the same everywhere, or is there a universal norm?	S1	S1-1 - Policies related to Own workforce	
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Par 14 now say: "The objective of this Disclosure Requirement is to enable an understanding of how the undertaking's general approach to engagement with its own workforce (..)". Only engagement with own workforce? S1-2 still refers to engagement with both own workforce and workers' representatives - this seems unclear.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	14.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	More balanced application; however "head count" deviated from our countries' definition of Fulltime Employees (FTE) to determine whether or not to comply with ESRS	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Maybe add; depending on defenition from national legislation (analogue to #8)	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Consitency on the use of head count versus FTE We recommend that the use of the terms 'employees', 'non-employees' and 'own workforce' is more prominent in the DRs to make it clear on the scope for each DR. This could be explicitly included in the DR name for example.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Definition #8 based on national legislation, but consistentcy is important for ESRS S1 #23 as well. Sometimes, the definition of certain terms refers to local legislation in different countries. What happens if the local definition is missing in the law or interpreted in different ways? Differences per country should be explained.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	This DR only requires the total number. There are no characteristics requested anymore. Does this address the objective of the DR?	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The threshold of 'top10' is arbitrary, and should be threshold (% or absolute of workforce). Top 10 does not make sense.	S1	S1-7 - Collective bargaining coverage and social dialogue	27.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	Employees Non-EEA - the DR does not contain the condition on regions of top 10 countries, and this does not make sense to have such a condition on a regional level. If a country meets the reporting thrsehold, do you report only the country in scope, or the entire region	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Reinstart diversity by age group, and this should include an <18 years old category	S1	S1-8 - Diversity metrics	

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	The emphasis in the text seems to be too much on the minimum wage (often not an adequate wage), prefer to see this replaced by: 1. The applicable adequate minimum wage, established by legislation or collective bargaining, which is periodically reviewed and takes into account the ILO wage setting principles, as long as a Minimum wage is a living wage. 2. If an adequate minimum wage does not exist, any living wage estimate produced by an institution mandated by the public authorities of the country where the workers are based and which takes into account the ILO principles on estimating a living wage; 3. If neither i) nor ii) exists, any existing living wage estimate, which takes into account the ILO principles on estimating a living wage; 4. Any living wage estimate that meets the criteria set out by the Sustainable Trade Initiative (IDH) ('Roadmap on Living Wages - A Platform to Secure Living Wages in Supply Chains') and which takes into account the ILO principles on estimating a living wage. Even within the EU, it may occur that the minimum wage is not an adequate wage. Therefore, in each country it should also be assessed whether the statutory minimum wage is indeed an "adequate" or "living" wage.	S1	S1-9 - Adequate wages	AR 22
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	include predefined AR to prevent "greenwashing" opportunities	S1	S1-9 - Adequate wages	AR 22
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Does the undertaking exclude all employees in countries/regions where there is a legal restriction to collecting data? Or is this then assumed to be zero percent in those countries/regions?	S1	S1-11 - Persons with disabilities	36.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Include definition to prevent "greenwashing" opportunities	S1	S1-11 - Persons with disabilities	35.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	How should fatalities be treated in the lost working day reporting?	S1	S1-13 - Health and Safety metrics	AR 30
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	The inconsistent use of categories in the reporting requirements is confusing. At times, reporting is required only on employees, while in other cases it must cover both employees and non-employees. For example, data on persons with disabilities may only be reported for employees. Wherever data is requested, it should consistently apply to both employees and non-employees, but broken down separately. This would provide insight into any potential differences in the treatment of own employees versus contracted staff.	S1	S1-13 - Health and Safety metrics	40.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I agree	Note typo. Should refer to paragraph 42	S1	S1-14 - Work-life balance metrics	AR 31
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	There is no AR associated with this. Is this deliberate?	S1	S1-15 - Remuneration metrics	44.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	45 (a) should be 44 (a) + in the old version hourly pay level was clearly defined. Suggestion to reinstal definition with salary components	S1	S1-15 - Remuneration metrics	AR 33
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Comment regarding removal of the old paragraphs 14(f) and (g) of ESRS S1, with reference to their inclusion in ESRS 2 SBM-3. These paragraphs contained SFDR indicators, which are not explicitly included in ESRS 2. The relocation of ESRS S1 paragraph 20 to ESRS 2 GDR-P paragraph 35 does cover them. Attention should be paid to ensure that no data gap arises between CSRD/ESRS and SFDR for this specific disclosure requirement.	S1		
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands				DASB asks for clarification. Is it unclear whether especially under b iv) may differ from accounting requirements; maybe exemption that you can simply use the figures as applied for financial reporting purposes?	S1		AR 36
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	For this data point no information can be gathered due to lacking access to data. Data points for which no information can be gathered due to lacking access to data should be deleted from the ESRS Set 1.	S1	S1-4 - Targets related to Own Workforce	
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	In the definition of value chain workers (9) is the following part missing: "workers for a supplier contracted by the reporting undertaking who work on the undertaking's premises using the supplier's work methods." (German: z.B. Werkvertrag)	S1	S1-5 - Characteristics of the undertaking's employees	
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	The change in the country definition (from min.10% of workforce to largest 10 countries) might lead to an overrating of countries that are not signifcant for the undertaking (in particular referring to DRs that are following to this definition e.g. collective bargaining). This might lead to high effort for in fact small countries for bigger mulitnational companies.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	23. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	The change in the country definition (from min.10% of workforce to largest 10 countries) might lead to an overrating of countries that are not signifcant for the undertaking (in particular referring to DRs that are following to this definition e.g. collective bargaining). This might lead to high effort for in fact small countries for bigger mulitnational companies.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	The change in the country definition (from min.10% of workforce to largest 10 countries) might lead to an overrating of countries that are not signifcant for the undertaking (in particular referring to DRs that are following to this definition e.g. collective bargaining). This might lead to high effort for in fact small countries for bigger mulitnational companies.	S1	S1-7 - Collective bargaining coverage and social dialogue	28. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	For this data point no information can be gathered due to lacking access to data. Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The adequate wage benchmark used for comparison in the EU might be difficult for companies in Germany, because currently the German minimum wage is below EU regulations, which makes it difficult for companies to set a correct benchmark value. Suggestion to add a sentence that if national law differs to EU regulation the national benchmark shall be disclosed with the remark that it differs from EU legislation.	S1	S1-9 - Adequate wages	AR 22
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	For this data point no information can be gathered due to lacking access to data. Data points for which no information can be gathered due to lacking access to data should be deleted from the ESRS Set 1.	S1	S1-10 - Social protection	
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	For this data point no information can be gathered due to lacking access to data. Data points for which no information can be gathered due to lacking access to data should be deleted from the ESRS Set 1.	S1	S1-12 - Training and skills development metrics	

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- 40 (b) (i) - "other workers" please define other workers - 40 (b) (ii) - FAT from work-related ill health only recordable for own employees not for non-employees - 40 (e) number of lost days due to work-related ill health is very difficult up to impossible to record, since on sick leave certificates the reason is not noted due to privacy reasons	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Paragraph is lacking further definitions of family-related leaves and entitlement. Does an employee needs to be entitled to all kind of famility related-leaves (a) or at least to one type of leave (b) to count? In case of option a: What about men in case of maternity leaves?	S1	S1-14 - Work-life balance metrics	42.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	For this data point no information can be gathered due to lacking access to data. Data points for which no information can be gathered due to lacking access to data should be deleted from the ESRS Set 1.	S1	S1-14 - Work-life balance metrics	
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	For this data point no information can be gathered due to lacking access to data. Data points for which no information can be gathered due to lacking access to data should be deleted from the ESRS Set 1.	S1	S1-15 - Remuneration metrics	
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Employees with another Gender than male or female will not be represented in this metric.	S1	S1-15 - Remuneration metrics	44. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	The information value of annual total remuneration value AR 36 44 (c) is limited. Looking at currently reported data, there is a high variance in the numbers presented by companies.	S1	S1-15 - Remuneration metrics	AR 36
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Please specifiy incidents in this case more clear in regards to confirmed incidents vs. incidents under investigation vs. not confirmed incidents.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Main point of criticism: The sub-sub-topic level has been removed, which means that very diverse topics now have to be considered together within the sub-topics for the DMA (without the option to open the sub-sub-topic level). These combinations cannot be meaningfully assessed. This is especially true for the sub-topic "wording conditions."	S1		
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	RE S1 par 8: The definition of "non-employees" has become even more unclear. Which groups are meant to be included? What falls under S1 and what under S2? For S1, we interpret it to mean "agency workers" (i.e., people employed by third parties engaged in employment activities) and "freelancers" (i.e., self-employed persons). Now, the definition is becoming "blurred" by the use of the term "contractors," which we have so far classified as value chain workers (see also point 7: "This Standard does not cover workers in the undertaking's upstream or downstream value chain.").	S1		
Excels	SZEF	Trade union	Hungary			I partially agree and partially disagree	Gender breakdown for zero-hours employees should be brought back in	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	SZEF	Trade union	Hungary			I partially agree and partially disagree	Age distribution should not be deleted, as it provides crucial information on the characteristics of workforce, which is relevant for a whole host of IROs, e.g. aging of the workforce	S1	S1-8 - Diversity metrics	29.
Excels	SZEF	Trade union	Hungary			I partially agree and partially disagree	Retirement should be brought back in as a mandatory datapoint	S1	S1-10 - Social protection	34.
Excels	SZEF	Trade union	Hungary			I partially agree and partially disagree	Gender breakdown for training hours should be reinstated	S1	S1-12 - Training and skills development metrics	38.
Excels	SZEF	Trade union	Hungary			I partially agree and partially disagree	Fatalities from ill health for non-employees and workers on site should be reinstated	S1	S1-13 - Health and Safety metrics	40.
Excels	SZEF	Trade union	Hungary			I partially agree and partially disagree	Datapoint on workers actually taking family-related leave should be reinstated	S1	S1-14 - Work-life balance metrics	42.
Excels	SZEF	Trade union	Hungary			I partially agree and partially disagree	Country-level information should be provided on the ratio of the higest paid individual in that country to the country median should be reported	S1	S1-15 - Remuneration metrics	44. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	This change brings no relevance to the table and renders the concept of significative country less practical, it may inflict an undue charge of work on smaller entities for bigger groups, hence going against the concept of simplification. We suggest reverting back to 10% total employees + 50+ employees.	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Precision on the methodology while useful for comparability, here means all historic values won't be comparable t o the new one when changing methodology, making reports unequal between companies that already had that methodology and others.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	This new threshold proves an issue here and will mean a new workload for a lot of entities, some very small.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Taking away the reference to benchmarks and to the fair wage network means additional workload for companies committed to the Fair Wage Network work and methodology, while proving lesser results and benefits.	S1	S1-9 - Adequate wages	AR 22
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	No significant simplification has been proposed and no issues are adressed. To ensure the relevance of such an indicator, we suggest disaggregating by significative countries to avoid unfairly comparing countries with different purchasing powers for multi-countries companies.	S1	S1-15 - Remuneration metrics	44.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Due to local legislation, it is not possible to use the hourly pay, however this would be solved by allowing companies to use either hourly or annual, and making it mandatory to write which one was chosen within the report.	S1	S1-15 - Remuneration metrics	AR 33
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	This topic presents a high reputational risk for big companies that are more likely to have more reported incidents (due to the sheer number of employees). We suggest to make the reporting mandatory on either proven cases or cases judged by courts, rather than the number of incidents reported.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	This reporting provides little value to readers of the reports as it is related to local legislation and would be the same for all companies report. As such, it seems like a big workload for very little relevance or value. We suggest either deleting it or making it disagregated on significative countries.	S1	S1-10 - Social protection	34.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	We suggest making this datapoint voluntary. Depending on the negative impact aforementionned, the companies may be tied by local legislation in what remediation plans it can offer (ex : health and safety).	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Please clarify "own workforce is a material topic" (similar comment for non-employees). Suggest replacing with "...concludes that one or more specific topics of its own workforce (or non-employees) are a significant driver of material impacts, risks, or opportunities".	S1	S1 - Objective	3.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Since sub-sub topics were eliminated, it is not clear why they are still indicated in brackets of sub-topics and what is expected to be disclosed. We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one	S1	S1 - Objective	4.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Exclude "non-employees" from S-1 Own workforce reporting. They are implicitly covered under S-2. Metrics for "non-employees" are monitored and stewarded as part of site contractor (i.e., workers in the value chain) management programs and policies. Itemizing the metrics for this group of site contractors requires a major system and work process revision across all operating and/or office assets.	S1	S1 - Objective	7.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I agree	Removal of the additional requirements on the ESRS2 parts reporting (ie SBM / IRO / GOV) that were in the previous versions is very positive and creates better readability.	S1	S1-1 - Policies related to Own workforce	11.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Too prescriptive. Remove or clarify what is meant by, or examples of "other outcomes that the undertaking has reached with workers' representatives."	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Assessing the effectiveness of channels presents an additional layer of complexity for us, as we are essentially evaluating the very mechanisms designed to verify the effectiveness of our system.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	(a) We suggest to append 2nd line where examples are given for channels with phrase "for example but not limited to.." to ensure that it is open and not interpreted as only those in example. (b) Last sentence need to be clarified - "..as well as, under certain circumstances whistleblowing mechanisms.". What are those circumstances, why do not we simly include that mechanism?	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	AR 3
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Last phrase in this paragraph is not clear and open for interpretation: "including its approach in situations where tensions arise between such actions and other business pressures".	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This is not a simplification therefore we suggest to eliminate the brackets or insert "or"	S1	S1-3 - Actions and Resources related to Own workforce	AR 6
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Remove statement: "This applies to measures taken to mitigate negative impacts on its own workforce that arise from the transition to a greener, climate-neutral economy." This may not be relevant or material for all undertakings. The objective of this statement is unclear.	S1	S1-3 - Actions and Resources related to Own workforce	AR 7
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	DRs are subject to materiality, but S1-5 lacks a clear connection to a specific material sub-topic and does not provide decision-useful information, except in the limited context of secure employment. The requirement is triggered whenever the own workforce is deemed a material topic, yet the stated objective—to offer insight into employment practices—is not effectively achieved through headcount and employee breakdowns. Consequently, we recommend removing DR S1-5. If S1-5 is retained, it should be made clear that it only should be disclosed if related to a specific material topic and relevant to the reader. We strongly propose the removal of the requirement to disaggregate employees by contract type (permanent, temporary, non-guaranteed). This level of granularity introduces significant complexity for preparers while offering limited value to users. Definitions of contract types vary widely across jurisdictions, resulting in inconsistent and non-comparable data. Moreover, these categories tend to fluctuate throughout the year, particularly in sectors with seasonal or project-based employment, further undermining the reliability and relevance of the data.	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Please refer to question 27 of the General section	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Comment to §23e: in some companies the "non-guaranteed hours employees" are the non-employee, therefore it creates confusion to §25 where the total amount of non-employees to be reported. We suggest removing §23e requirement or changing it to "other group" to remove confusion.	S1	S1-5 - Characteristics of the undertaking's employees	23. (d)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	"Disregarding differences in national legal definitions" will provide an inaccurate total number. Suggest removing requirement to count temporary or non-guaranteed hours employees.	S1	S1-5 - Characteristics of the undertaking's employees	AR 9
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	"significant" term is not clear how to be applied (2nd line)	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This requirement presents a significant hurdle for disclosure, as in many countries (both within and outside the EU), this information cannot be obtained legally or without incurring undue costs. We suggest either removing this requirement or clarifying that the information should be obtainable without additional cost.	S1	S1-7 - Collective bargaining coverage and social dialogue	27.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The disaggregation required by this disclosure is not relevant. Especially for a multinational company, it is more meaningful to ask for the disclosure of workforce in every macro-geographical area or continent rather than per country with more than 50 employees (that for example may be all in Europe without adding any value to the information disclosed). We recommend to restore to the previous version of the disclosure, asking for the disclosure in countries where there are more than 50 employees representing 10% of the total workforce	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This requirement presents a significant hurdle for disclosure, as in many countries (both within and outside the EU), this information cannot be obtained legally or without incurring undue costs. We suggest either removing this requirement or clarifying that the information should be obtainable without additional cost.	S1	S1-7 - Collective bargaining coverage and social dialogue	28.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	"significant" term is not clear how to be applied (3rd line)	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 18
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Remove "which is periodically reviewed/adjusted every two years" as this is a behavioral requirement and should not be a part of the reporting instructions.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 22
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please refer to question 28 of the General section	S1	S1-9 - Adequate wages	22.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Remove "At least once per year" as this is a behavioral requirement and should not be a part of the reporting instructions.	S1	S1-12 - Training and skills development metrics	AR 24
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Not every company makes a break-down between employees and non-employees, we suggest the figure to be reported for the own workforce in total.	S1	S1-13 - Health and Safety metrics	40.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	With reference to the number of days lost due to work-related ill health, it is important to highlight that, once an employee submits a medical certificate to justify their absence, the nature of the illness—whether work-related or not—is typically not specified. In many countries, employees are not allowed to self-declare a work-related illness. Instead, they must submit a formal request to the National Institute for Social Security, which is the only authority entitled to assess and officially recognize the illness as work-related. As a result, companies are generally unable to determine how many of the lost workdays are attributable to occupational diseases, since this information depends on external validation and is not systematically reported to employers	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Remove AR and allow an undertaking to use their own system for calculating work-related accidents and hours as these are built for consistency across their business for strategy purposes. Requiring use of definitions as per the national laws of every country in which an undertaking operates would necessitate building a complex and inconsistent system to count accidents.	S1	S1-13 - Health and Safety metrics	AR 27
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I agree	Excellent option for simplification.	S1	S1-14 - Work-life balance metrics	AR 31
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Please refer to question 31 of the General section	S1	S1-15 - Remuneration metrics	44. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Delete DR as it is not decision useful to the reader. This disclosure is not related to a sustainability topic or subtopic (equal pay for equal work or gender pay gap). Higher paid individuals reflect their level of experience, performance, and decision making. In addition, this disclosure is burdensome and may require a complex system to calculate.	S1	S1-15 - Remuneration metrics	44. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency. It is of utmost importance to clarify if incidents are referred basically to social aspects (child labor, restrictions, overtime not recognized or not compensated or if they are referred also to security aspects and healty environment	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Compensation for incidents is often private and privileged information and will likely require creating a system to track. This information is not decision useful, and reflects outcomes of due diligence rather than demonstrating actively conducting it. Suggest deleting.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (c)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the deletion of S1 paragraph 14, as it was flagged as excessively burdensome.	S1	S1 - Interaction with other ESRS	1.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Need to further clarify: basic wage, pay category, and fixed additional payments	S1	S1-9 - Adequate wages	AR 21
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	S1	S1-3 - Actions and Resources related to Own workforce	3.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Risk of lenghty disclosures: As soon as any one employee is not covered collectively by all social protection types as listed in [DRAFT] S1-10 para. 34, the reporting entity must disclose "the countries where employees lack those protections for the following major life events." As the unavailability of any one social protection from the list is treated as non-fulfilment of the disclosure requirement, this is likely to result in lengthy disclosures on a very detailed level (i.e. i) country, ii) type of social protection, iii) type of employee group for each type of social protection). In order to address these challenges and to streamline data collection efforts while still achieving the declared goal, we suggest limiting the reporting on social protection like in current S1-6 para. 50a to "countries in which the undertaking has 50 or more employees representing at least 10% of its total number of employees". Furthermore, in order to address the challenge on lengthy disclosures, we suggest introducing to [DRAFT] S1-10 the same principle as applied in current S1-15 para. 93 (report on percentage of employees entitled to social protection instead of country level disclosures).	S1	S1-10 - Social protection	10.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	S1	S1-4 - Targets related to Own Workforce	4.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We support the changes proposed, but human rights incidents required in current S1-17, S2-4, S3-4, and S4-4 could be centralised for more efficient reporting.	S1	S1-16 - Incidents of discrimination and other human rights incidents	16.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Appraisal interviews are not always compulsory, and there is no need to introduce them. When they are introduced, companies often exclude employees on fixed-term contracts, or even impose a minimum length of service requirement for employees on permanent contracts. Certain categories, such as blue-collar workers, are sometimes excluded. Finally, the frequency of these interviews is not always annual. This paragraph should be replaced by: "Percentage of eligible employees that participated in regular performance and career development reviews". Provide for an adjusted indicator accounting for eligibility. Indeed, not all employees are eligible for training (e.g. due to seniority requirements) which distorts the interpretation of the indicator.	S1	S1-12 - Training and skills development metrics	38. (a)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It remains unclear/illogic if only employees who are entitled to all four types of family-related leave during the reporting year qualify for counting into this percentage. Availablity of family-related leave types depends on national law, and is outside of the sphere of influence of any organization. If a break-down by family-related leave type availability is required, the disclosure becomes lengthy. Overall, the message of the DR is unclear - if any type counts, the percentage would like be large/close to 100% if considering only e.g. maternity leave; while if all should be considered, close to 0%. Suggestion to make information related to work-life balance narrative-based.	S1	S1-14 - Work-life balance metrics	14.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Explanation in AR 18 does not fully match with the definition provided in the DR28 to which it relates. Should be clarified, that the percentage of employees covered by worker's representatives or councils, should be reportet - avoiding adding complexity through the specification mentioned in AR "employees in that country which are employed in establishments in which employees are represented by workers representatives".	S1	S1-7 - Collective bargaining coverage and social dialogue	7.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Social protection against listed major life events is publicly driven, and does not depend on the organization. There is a risk of lengthy disclosures and more excessive than in previous format. Could be limited to a principle of the 10 largest countries or another threshold.	S1	S1-7 - Collective bargaining coverage and social dialogue	10.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Reference to ILO wage setting principles not helpful; leaves it up to undertakings to judge if local legislation, collective bargaining agreements, institutional living wage estimates are considering ILO wage setting principles. There needs to be a country-level indication of adequate wage levels to be practical.	S1	S1-9 - Adequate wages	9.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	It should be defined for which countries this information is expected to be legally collected, and for which countries it is prohibited. This exercise should not be performed by the organizations themselves, as there is a high risk of unlawful disclosure.	S1	S1-11 - Persons with disabilities	11.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	While we agree with the deletion of that voluntary datapoint, [DRAFT] DR S1-15 still requires the undertaking to disclose the percentage gap in pay between its female and male employees and the ratio between the remuneration of its highest paid individual and the median remuneration for its employees. The undertaking must also disclose the annual total remuneration ratio of the highest paid individual to the median annual total remuneration for all employees (excluding the highest-paid individual). Depending on the local legislation, it is impossible to apply hourly pay since some work contracts rely specifically on there being no working hours (annual working days). Creating a methodology to approach hourly pay would defeat the purpose of this kind of contract and couldn't represent accurately the hourly pay of such workers. In addition, disclosing only one gender pay gap disadvantages disproportionately groups that have companies in emerging countries, as the pay in such countries will be compared to those of developed countries.	S1	S1-15 - Remuneration metrics	43.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	[1] As regards [DRAFT] DR S1-15 paragraph 44(b) on the ratio of highest to median pay, the indicators are too global and not relevant, difficult to prepare and again, will disproportionately discriminate groups that have activities in Asia, Eastern Europe or Africa. In addition, a consequent amount of the top management's remuneration relies on variable income, which in turn relies on the financial results and statements; this indicator cannot therefore be calculated accurately before the certification of the financial statement, which puts its publication in jeopardy every year. The preparation of these disclosures is significantly challenging for large multinational groups with numerous subsidiaries. This would require having data on the annual salary of each employee of the group, which would have to be collected outside the HR and payroll system. Obtaining such data would be also difficult in the context of the EU data protection law, as it is only available to the employer at subsidiary level.	S1	S1-15 - Remuneration metrics	44. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	[2] We reiterate that [DRAFT] DR S1-15 paragraph 44(a) should be calculated on the basis of comparable profiles. It should be replace by "Gender pay gap by employee category". In [DRAFT] DR S1-15 paragraph 44(b), the ESRS should give the possibility to present only an adjusted ratio or to use the concept defined previously by the EFRAG of "countries with a significant number of employees" and disclose the ratio of such countries, or the 5 biggest countries of the company (e.g. current S1-8).	S1	S1-15 - Remuneration metrics	44. (b)
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	EFRAG should consider excluding "non-employees" from S-1 Own workforce reporting. Non-employees are implicitly covered under S-2 as they are contractors (i.e., workers in the value chain). Treating non-employees as part of own workforce can have legal implications. Furthermore, metrics for non-employees are monitored and stewarded as part of site contractor management programs and policies. Itemizing the metrics for this group of site contractors requires a major system and work process revision across all operating and/or office assets.	S1	S1 - Objective	1.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The terms pay, remuneration and wages (ESRS S1-9) should be better differentiated from one another. It would be desirable if the requirements of ESRS S1-9 and S-15 were combined, as all reporting requirements relate to pay and other remuneration.	S1	S1-15 - Remuneration metrics	44.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Information on the grievance mechnism should be removed from S1-2, as this is addressed in the G-standard. Alternatively, it should be noted in the DR that a reference to the Governance information is sufficient, if there is no separate channel for employees..	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The publication of remuneration ratios is problematic because it can reveal sensitive information about individuals (data protection). In addition, the ratio is often distorted and not very meaningful, especially in small or specialised companies. Finally, there is a lack of clear methodological standards for calculation (gross/net, bonuses, full-time equivalents, etc.), which further limits comparability and meaningfulness -> deletion	S1	S1-15 - Remuneration metrics	44. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The workload is extremely high, as appropriate wages must be researched for each country. The EU should publish an annual overview of all appropriate wages for each country. How should performance-related salary components be included? Need for clarification.	S1	S1-9 - Adequate wages	13.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	Simplification	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	10.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	simplification edit, thanks for the examples in brackets - better move to ESRS 2	S1	S1-1 - Policies related to Own workforce	11.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	simplification edit	S1	S1-1 - Policies related to Own workforce	12.

Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The proposal introduces a new term, 'work-related accident,' which is not defined anywhere in the standard. This fundamental omission immediately introduces significant misleading ambiguity and confusion, leaving its precise meaning open to subjective interpretation by different undertakings and jurisdictions. Suggestion: Amend to: The objective of this DR is to allow an understanding of the coverage, quality and performance of the health and safety management system established to prevent work-related injuries, ill-health and fatalities. The current absence of a clear, standardized definition for "work-related ill health" presents a critical vulnerability within the disclosure requirements. Suggestion: Add the comprehensive definition of "work-related ill health" to the annex or guidance notes, as per the previous version: "Work-related ill health can include acute, recurring, and chronic health problems caused or aggravated by work conditions or practices. These include musculoskeletal disorders, skin and respiratory diseases, malignant cancers, diseases caused by physical agents (for example, noise-induced hearing loss, vibration-caused diseases), and mental illnesses (for example, anxiety, post-traumatic stress disorder). For the purpose of the required disclosures, the undertaking shall, at a minimum, include in its disclosure those cases outlined in the ILO List of Occupational Diseases"	S1	S1-13 - Health and Safety metrics	39.

Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	Unchanged	S1	S1-13 - Health and Safety metrics	40. (a)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	simplification edit - deletion of the datapoints related to ill-health for non-employees and workers in the value chain. Reduction of scope of the metric	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The definition of "recordable work-related accidents" within the EFRAG proposal explicitly encompasses both work-related injury and ill-health. 1)Duplication and Misalignment with Simplification: If "recordable work-related accidents" includes ill-health, and there is also a separate requirement for "recordable work-related ill health" (40. (d)), this creates a direct duplication of reporting requirements. This redundancy contradicts the fundamental objective of simplification and streamlining data collection, leading to unnecessary complexity and potential inconsistencies in reported figures. 2) Data Collection Challenges for Non-Employees (Privacy Concerns): The most critical issue arises from the inclusion of ill-health, particularly for non-employees. While injury data for non-employees working on site is generally accessible (e.g., through incident reports), collecting detailed ill-health data for non-employees is exceptionally difficult, if not impossible, due to stringent data privacy regulations. In most countries, especially within the European Union, policies like GDPR severely restrict an undertaking's access to, and processing of, sensitive medical information for individuals not directly employed by them, adding a challenge that was already limited from 40. (d). Amend to: "the number and rate of recordable work-related injuries.	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	Unchanged	S1	S1-13 - Health and Safety metrics	40. (d)

Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	simplification edit - deletion of the datapoint days lost to fatalities. The definition of "recordable work-related accidents" within the EFRAG proposal explicitly encompasses both work-related injury and ill-health, and critically, it also includes fatalities. To emphasize and uphold the clear EFRAG decision regarding the deletion of 'days lost to fatalities' – a decision made due to the inherent lack of a robust and comparable methodology for such calculations – it is fundamental to sharpen the interpretation of this requirement. Therefore, while the term "recordable work-related accident" encompasses fatalities, the calculation of "days away from work" must be understood to apply solely to non-fatal incidents. Suggestion: Amend to: with regard to the undertaking's employees, the number of days away from work related to work-related injuries or work-related ill health	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	simplification edit - Editorial change	S1	S1-13 - Health and Safety metrics	AR 26
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The inherent diversity in national definitions for "work-related accidents" means that data collected from different countries within the same undertaking will not be directly comparable. This significantly complicates the ability to aggregate global health and safety data consistently, limiting an undertaking's capacity to gain a holistic and accurate view of its performance across all operations, and provide precise and reliable information essential for robust management of health and safety aspects, as expected by financial markets.. Therefore, suggestion of deletion of "work-related accidents, the undertaking shall use the definitions as per the national laws of the countries where the employees are based." Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	ANNEX II to the [Draft] Amended ESRS Exposure Draft July 2025: This definition, rooted in OSHA criteria, introduces ambiguity through two critical flaws: 1)Loss of Consciousness as a Standalone Criterion The current framework treats all loss of consciousness incidents as recordable, regardless of causation (e.g., workplace hazards like chemical exposure vs. pre-existing conditions like epilepsy). This overinclusiveness distorts workplace safety metrics by conflating occupational and non-occupational factors. Further, severity variations (e.g. brief first-aid cases vs. multi-day absences) are unaddressed, preventing nuanced risk assessment. 2)Undefined "Significant Injury" The term "significant injury" lacks objective parameters, leading to inconsistent interpretation across medical professionals and jurisdictions. For example, a laceration requiring stitches might be deemed "significant" in one context but not another. This subjectivity undermines data harmonization and comparative analysis. Suggestion to delete: Deletion of “loss of consciousness” and “significant injury”, remaining "Work-related injury or ill health that results in any of the following: death, days away from work, restricted work or transfer to another job, medical treatment beyond first aid or ill health diagnosed by a physician or other licensed healthcare professional, even if it does not result in death, days away from work, restricted work or job transfer, medical treatment beyond first aid"	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Statkraft has previously emphasized the importance of clarifying whether business consultants should be classified as non-employees—such as consultants hired (typically through firms like KPMG, EY, PwC, etc.) to support sustainability reporting teams within the reporting undertaking in implementing ESRS requirements. Historically, Statkraft has engaged a significant number of consultants. These individuals perform the same tasks as employees, work on Statkraft premises, and follow Statkraft’s working methods. Statkraft believes they should be classified as non-employees, as excluding them would present a misleading picture of the number of employees/non-employees. The amended ESRS remains unclear on this point. While some examples have been removed, the scope has been broadened through language changes—from “include” to “could include” and the use of “such as.” This creates ambiguity around who should be counted as non-employees. Statkraft therefore requests further guidance on which individuals should be included in the non-employee category, and specifically recommends that the ESRS provide an explicit example confirming that business consultants fall within this scope.	S1	S1 - Objective	7.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	See comment above.	S1	S1 - Objective	8.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Agree with the changes to the breakdown of employees by country. Removing the sentence 'representing at least 10% of its total number of employees' will likely lead companies to include more countries in their reporting, thereby enhancing transparency.	S1	S1-5 - Characteristics of the undertaking’s employees	23. (a)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Agree with the changes whereby no ESRS 2 specifications for SBM in the topical standards. Reduce repetition.	S1	S1 - Interaction with other ESRS	10.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I disagree	Insufficient reasoning as to why parental leave has been removed in favour of JUST maternity leave.	S1	S1-10 - Social protection	10.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I disagree	Since policies around inclusion and discrimination are no longer required, diversity metrics should be increased beyond just gender disaggregation.	S1	S1-8 - Diversity metrics	8.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	In the application requirements for the number and rate of accidents (AR29), it says that undertakings should include fatalities caused by work-related injuries should be included in the number and rate of work-related accidents. Is this the same case for the number of days lost due to work-related accidents? Should it also be considered?	S1	S1-13 - Health and Safety metrics	13.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I disagree	The suggested table in AR 16/17 is confusing. Where is the total % for bargaining agreements supposed to go? Is it listed separately? Also, the % coverage for the employees per country is unclear. Is it the % of total employees that are covered by that country's bargaining agreement, or is it the % of the country's employees covered by a bargaining agreement? If the second, it would also help if the example included a case where two countries fit into the same category, to show how best to go about this	S1	S1-7 - Collective bargaining coverage and social dialogue	7.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	It is not clear whether the total hours worked refer to gross or net hours. We assume it is net hours, but this is not explicitly defined, as compared to previous paragraphs where gross working hours are required.	S1	S1-13 - Health and Safety metrics	AR 27
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I agree	We agree with the new threshold requirement of top 10 countries.	S1	S1-7 - Collective bargaining coverage and social dialogue	7.
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I partially agree and partially disagree	Gender breakdown for zero-hours employees should be brought back in	S1	S1-5 - Characteristics of the undertaking’s employees	23.
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I partially agree and partially disagree	Age distribution should not be deleted, as it provides crucial information on the characteristics of workforce, which is relevant for a whole host of IROs, e.g. aging of the workforce	S1	S1-8 - Diversity metrics	29.
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I partially agree and partially disagree	Retirement should be brought back in as a mandatory datapoint	S1	S1-10 - Social protection	34.

Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I partially agree and partially disagree	Gender breakdown for training hours should be reinstated	S1	S1-12 - Training and skills development metrics	38.
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I partially agree and partially disagree	Fatalities from ill health for non-employees and workers on site should be reinstated	S1	S1-13 - Health and Safety metrics	40.
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I partially agree and partially disagree	Datapoint on workers actually taking family-related leave should be reinstated	S1	S1-14 - Work-life balance metrics	42.
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I partially agree and partially disagree	Country-level information should be provided on the ratio of the higest paid individual in that country to the country median should be reported	S1	S1-15 - Remuneration metrics	44. (b)
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	See our response to the questionnaire : Companies do not agree with the new definition of the treshold for reporting metrics disaggregated at Country Level	S1	S1-5 - Characteristics of the undertaking's employees	AR 9
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Non-employees are not part of the company's own workforce by principle ; by consequence they are not recorded in the social data information systems of companies : that makes it impossible to disclose information on this category of workers. The notion of "non employees being a key part of the undertaking's business model" will open the door to interpratation and endless discussions with auditors. We continue to ask for deletion of this DR	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	14.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Companies prefer to return to the previously proposed definition of the threshold for all DR. Outside the EEA, companies do not understand what a region is (which countries are included in a region ?) and prefer to report on countries where they have significant employment only.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 16
Excels	MEDEF	Business association (other than association of financial institution)	France			I agree	The term 'diversity' does not correspond to the indicator, which only measures gender distribution	S1	S1-8 - Diversity metrics	AR 19
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	We still consider it irrelevant and very complicated to publish information outside the EU ; however in the AR 22 we believe outside the EU, it is entirely appropriate to compare the lowest wages in the company with the statutory minimum wage established by legislation or collective bargaining; and where these do not exist, to use the benchmarks developed by the ILO – a tripartite international organisation – on living wage estimates rather than resorting to consultants or private organisations.	S1	S1-9 - Adequate wages	AR 20
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	The two-year review frequency does not depend on companies and should be abolished.	S1	S1-9 - Adequate wages	AR 22
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The number of life events covered remains very broad and should focus only on (i)sickness (ii) employment injury. Other items depend heavily on jurisdictional factors with limited company involvement (e.g., unemployment) or are already covered elsewhere in the standard (e.g., maternity leave overlaps with S1-14). The DR requires disclosure by country, with cumulative consideration of the risks listed: are countries listed rather than risks? If a single risk is not covered, the country is 'disqualified'? This DR shall limit disclosure to significant employment countries, applying the old threshold, and allow for refinement based on the risks covered	S1	S1-10 - Social protection	14.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	This data is very difficult to aggregate at group level. Definitions vary from one country to another. The company cannot collect individual data. The data is aggregated at country level, so it cannot be verified, which will complicate the audit.	S1	S1-11 - Persons with disabilities	AR 23
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	To be relevant this disclosure should be based on the number of employees eligible for training and appraisal interviews, rather than the total number of employees.	S1	S1-12 - Training and skills development metrics	AR 24
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	The amount of information to be disclosed is too detailed and redundant; the number of cases of recordable work related ill health and the number of days lost to work related injuries shall be removed. The publication of all these indicators shall be limited to employees and to countries where the undertaking has a significant workforce.	S1	S1-13 - Health and Safety metrics	AR 26
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	This disclosure will require a lot of work and is of little interest: it merely lists the existence of leave for family reasons, whether provided for by law or by a collective agreement.	S1	S1-14 - Work-life balance metrics	AR 31
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	With regard to remuneration, whether it be the pay gap or the ratio (S1-15), companies question the value of unadjusted indicators that do not provide any useful information and which, if reproduced without contextual explanation, may contribute to damaging their reputation. The adjusted pay gap is the only metric that directly measures compliance with the principle of "equal pay for equal work or work of equal value."	S1	S1-15 - Remuneration metrics	AR 33
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	The same remuneration elements should be provided for both indicators – why is only the ratio (AR36) detailed and not AR 35? The requirements for collecting data on the pay ratio are too burdensome, and we would be in favor of aligning its calculation basis with that of the gender pay gap, which is simpler and more realistic for large global groups.	S1	S1-15 - Remuneration metrics	AR 35
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Interns and work-study students shall be excluded, and only the company's own workforce should be targeted. Benefits in kind will be very difficult to isolate and aggregate.	S1	S1-15 - Remuneration metrics	AR 36
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Our requests for amendments have not been taken into account; the definition of incident of discrimination is still too broad. It shall be limited to proven and dealt with incidents, i.e. those that have resulted in a final court decision.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 37
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Regarding penalties: what period should be taken into account? There is inevitably a time lag between the incident and any penalty. A financial materiality threshold should be introduced	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 41
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This is problematic, as it suggests that disclosure requirements related to the topic of "own workforce" are dispersed across various sections of the ESRS, which may hinder clarity and coherence in implementation.	S1	S1 - Objective	2.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The current wording stipulates that the undertaking must report on DRs S1-5 and S1-16 whenever "own workforce" is deemed a material topic, regardless of the materiality assessment for the specific sub-topic. This contradicts the principle that disclosures should only be required if the relevant topic is identified as material. The same issue applies to DR S1-6 in relation to "non-employees." Furthermore, the "Objective" section should not contain disclosure requirements.	S1	S1 - Objective	3.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	It is unclear why the sub-topic of social protection is classified under "working conditions," given that social protection is primarily a state responsibility. This categorisation is not compatible with the CSRD, where the term "social protection" does not appear once, nor is it included among the 24 social and human rights factors referenced in the directive. Beyond that we would like to address generally the issue with the new breakdown of sub-sub-topics (SSTs). It is very unclear how the brackets in the new ESRS are to be interpreted and why some SSTs stand alone while others are placed in brackets. We are concerned that this could lead to additional reporting requirements and discussions with auditors.	S1	S1 - Objective	4. (a)
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The inclusion of "privacy" and "adequate housing" as sub-topics in the ESRS is highly problematic. These concepts are neither among the 24 social and human rights factors referenced in the CSRD, nor do they reflect corporate responsibilities in a manner consistent with the directive's scope. "Privacy" is already comprehensively regulated under existing legal frameworks such as the GDPR, and "adequate housing" is a state obligation, not a corporate one. Moreover, these topics appear solely in the "Objective" section without any corresponding disclosure requirements, creating unnecessary ambiguity for undertakings as to whether reporting obligations arise from the descriptive text alone.	S1	S1 - Objective	4. (f)
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The expectation to avoid duplication entirely is unrealistic and potentially counterproductive. In practice, overlapping or identical reporting content is required across multiple disclosure requirements, which creates confusion for undertakings. Faced with ambiguity, companies are likely to over-comply to avoid the risk of non-compliance or penalties—undermining the goal of streamlined and efficient reporting.	S1	S1 - Objective	5. (b)
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The current structure would lead to fragmented reporting if companies struggle to align general Policies, Actions, Targets (PAT) disclosures with the specific impacts, risks, and opportunities (IROs) identified in ESRS S1. A more integrated approach, such as allowing optional topic-specific PAT disclosures where material is needed.	S1	S1 - Objective	6.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The inclusion of self-employed individuals and agency workers (NACE Code N78) under the same reporting umbrella raises serious concerns regarding data availability, legal clarity, and cross-border comparability. Although the paragraph rightly states that this classification does not affect legal status under labour law, in practice, undertakings face significant challenges in collecting consistent and reliable data on non-employees—particularly when these individuals are engaged via third-party contracts. This creates a high risk of reporting inconsistencies and audit complications, especially in multinational contexts where labour classifications differ. Furthermore, while the conceptual separation between ESRS S1 and ESRS S2 is sound, the boundary between "own workforce" and "value chain" is often blurred in complex outsourcing arrangements. To avoid co-employment risks and ensure legal certainty, non-employees should be reported exclusively under ESRS S2.	S1	S1 - Objective	7.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The proposed definitions of self-employed individuals and agency workers (NACE Code N78) are overly broad and operationally unworkable. Reporting entities do not have access to reliable data on these individuals, especially when engaged via third-party contracts, due to legal constraints under GDPR and the "need-to-know" principle. Including such workers under ESRS S1 risks misclassification and co-employment liabilities. These categories should be clearly excluded from the "own workforce" as they are already sufficiently addressed under ESRS S2, where value chain relationships are more appropriately framed.	S1	S1 - Objective	8.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The examples stretch the definition of value chain workers to include individuals with regular on-site presence and operational integration. This risks blurring the line between own workforce and value chain labour, especially in cases of long-term maintenance contracts. Such ambiguity undermines legal clarity and creates potential co-employment risks. The standard must provide sharper boundaries and adopt a risk-based approach reflecting the limited control and visibility undertakings have over third-party personnel.	S1	S1 - Objective	9.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The call for consistency and linkage between ESRS S1 and ESRS S2 is conceptually sound but practically problematic. The boundaries between own workforce and value chain workers remain unclear, and the standards lack operational guidance on how to ensure coherent reporting across both. This risks double reporting, legal uncertainty, and disproportionate burden—especially in complex outsourcing arrangements. Clear separation and risk-based alignment are needed to avoid confusion and ensure legal compliance.	S1	S1 - Interaction with other ESRS	10.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to describe workforce policies and specify coverage for "specific groups" or "all of its own workforce" is overly granular, lacks a clear legal basis in the CSRD, and creates unnecessary reporting complexity. The CSRD only requires information "necessary to understand the undertaking's impacts on sustainability matters." The level of detail demanded here—especially the breakdown by sub-groups—exceeds the directive's intent and imposes a disproportionate burden on companies, particularly those with complex or international structures. This requirement is also redundant with disclosures already required under ESRS 2, leading to double reporting and further increasing complexity. To ensure legal certainty, proportionality, and practical feasibility, the obligation to specify coverage by "specific groups" should be deleted. Beyond that we suggest that this should be a voluntary information.	S1	S1-1 - Policies related to Own workforce	11.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	Disclosure of policies on trafficking, forced or compulsory labour, and child labour should only be required if these topics are material, as per the CSRD's materiality principle. Mandating disclosure regardless of materiality is disproportionate (Art. 5(4) TEU) and exceeds the CSRD's intent. The "explicit address" requirement should be deleted, as the CSRD does not require policies to use specific wording. This change would ensure legal certainty, reduce unnecessary reporting burden, and align with the principle of proportionality. Beyond that we suggest that this should be a voluntary information.	S1	S1-1 - Policies related to Own workforce	12.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	Disclosure of health and safety policies or management systems should only be required if these topics are material. Mandating disclosure regardless of materiality is disproportionate (Art. 5(4) TEU) and exceeds the CSRD's intent. This risks obscuring material information among immaterial details, undermining transparency and increasing reporting burden. Beyond that we suggest that this should be a voluntary information.	S1	S1-1 - Policies related to Own workforce	13.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to disclose communication channels for policies is redundant, overly granular, and goes beyond the CSRD. This disclosure was intentionally removed from ESRS 2 and should not be reintroduced in topical standards. If guidelines for policy disclosure are not streamlined in ESRS 2, this will lead to inconsistent presentations across standards and increased reporting burden. To ensure clarity, comparability, and proportionality, AR 1 should be deleted.	S1	S1-1 - Policies related to Own workforce	AR 1
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to disclose information on grievance mechanisms is redundant and should be removed. Grievance mechanisms are already addressed, e.g., in the Governance standard, and duplicating this requirement in S1-2 leads to unnecessary double reporting and increased complexity. Maintaining consistency and avoiding overlap is essential for clarity and proportionality (Art. 5(4) TEU). The standard should be streamlined to prevent redundant disclosures and ensure comparability across reporting. Beyond that we suggest that this should be a voluntary information.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	14.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to disclose engagement with the workforce and perspectives of vulnerable or marginalised groups is overly vague and lacks clear criteria. Terms such as "particularly vulnerable," "marginalised," and "perspectives" are undefined, risking inconsistent application and undermining comparability. The CSRD does not require such granularity or sub-classification. Disclosure should be limited to material engagement processes, and only where relevant and clearly defined. The obligation to report on Global Framework Agreements or similar outcomes can only be voluntary, as not all undertakings are party to such agreements. The standard must provide precise definitions and avoid unnecessary complexity to ensure legal certainty and proportionality.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to disclose channels and grievance mechanisms is redundant, as grievance mechanisms are already addressed in the Governance standard (G-standard). Duplicating this requirement increases the reporting burden and risks inconsistent reporting. The obligation to explain the effectiveness of these channels is vague and impractical, especially for large or global undertakings. To ensure clarity, comparability, and proportionality (Art. 5(4) TEU), this requirement should be deleted or streamlined.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The generic application requirement risks inconsistent interpretation and reporting across undertakings and Member States, especially endless negotiations with auditing entities. Without a clear definition or threshold, companies may face uncertainty about what is expected, undermining comparability and legal certainty. The standard should state that only material engagement processes need to be disclosed and should avoid prescriptive or open-ended requirements that go beyond the CSRD's intent. To ensure proportionality and reduce unnecessary reporting burden, the application requirement should be streamlined and aligned with established legal frameworks and national practices.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	AR 2
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The definition of "channels" is overly broad and lacks clarity, risking inconsistent interpretation and reporting across undertakings and Member States. The inclusion of third-party and external mechanisms (such as NGOs or industry associations) goes beyond the CSRD's intent and established national practices. This could create legal uncertainty and unnecessary reporting burden, especially where such channels are not under the undertaking's control. Whistleblowing channels are typically regulated by specific national or EU legislation (e.g., the EU Whistleblower Directive) and are designed for reporting legal violations, not general workforce concerns. Mandating their disclosure in this context risks conflating distinct legal frameworks and could undermine the protective intent of whistleblowing laws. The standard should focus on channels directly established or managed by the undertaking and clarify that only material, relevant channels must be disclosed. Overly prescriptive or open-ended requirements should be avoided to ensure proportionality and comparability.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	AR 3
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The reference to the UN Guiding Principles' effectiveness criteria (principle 31) introduces subjectivity and complexity, risking inconsistent application and legal uncertainty across Member States. Many companies already have governance structures and management systems for human rights due diligence, often based on the UN Guiding Principles or OECD Guidelines. Making these voluntary frameworks de facto mandatory through reporting standards is not appropriate, as they are not intended as binding corporate policy instruments. Other frameworks should be equally acceptable. The cross-reference to ESRS G1-1 adds another layer of complexity and creates overlapping requirements, increasing the risk of double reporting and confusion for preparers. The standard should ensure that requirements are streamlined, mutually exclusive, and do not require the same information to be reported in multiple places. Overly prescriptive requirements and redundant disclosures must be avoided to ensure proportionality, clarity, and practical feasibility.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	AR 4
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to disclose "key actions and resources" is overly broad and lacks clear boundaries, risking excessive and inconsistent reporting. The CSRD does not require such a level of detail; the focus should remain on material information only. Disclosing detailed information on resources—especially financial or human resources—poses a high risk to competitiveness and may reveal sensitive business strategies. Furthermore, the standard's lack of clarity on what constitutes "key actions" and "resources" undermines comparability and legal certainty. The requirement should be strictly limited to material actions, avoid duplication with other disclosure requirements, and ensure that sensitive or strategic information is protected. Overly granular or redundant disclosures must be avoided to ensure proportionality and practical feasibility. Beyond that we suggest that this should be a voluntary information.	S1	S1-3 - Actions and Resources related to Own workforce	18.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This requirement duplicates the requirement of para 18 and unnecessarily expands the reporting burden. The focus should be strictly on "key actions" addressing "material negative impacts," in line with the CSRD's materiality principle. Requiring detailed descriptions of actions planned or underway, especially in relation to business pressures, goes beyond the CSRD and risks introducing subjectivity and inconsistency1. The standard should be clarified and streamlined to avoid double reporting and to ensure that only material, outcome-relevant actions are disclosed.	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This requirement is duplicative of the general disclosures on tracking performance in ESRS 2 GDR-T and GDR-M. While a cross-reference is permitted, this creates unnecessary structural complexity in the standards. More fundamentally, the requirement to track the "effectiveness" of actions in delivering "outcomes" is disproportionately burdensome and often unfeasible. It is practically impossible to isolate the causal link between a specific corporate action and a subjective "outcome" for an employee, as countless external factors are at play. This level of detailed effectiveness measurement goes beyond the scope of the CSRD, which focuses on disclosing the actions taken, not on conducting a complex impact assessment for each one. Therefore, to reduce redundant reporting and avoid imposing an impractical and overly granular burden, this paragraph should be deleted entirely. The general requirements in ESRS 2 are sufficient.	S1	S1-3 - Actions and Resources related to Own workforce	19. (b)
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement introduces the concept of using "leverage," which is legally problematic and practically unfeasible. The expectation that a company must use commercial "leverage" over its business partners is an exaggerated and normative standard of conduct not mandated by the CSRD. This requirement interferes with the right to entrepreneurial independence and freedom of contract, representing a significant legal overreach. Furthermore, the concept is unrealistic for many companies that hold a weak market position relative to their partners, failing to reflect business realities. The term "leverage" itself is vague and undefined, which will inevitably lead to inconsistent application and legal uncertainty for both preparers and auditors. To ensure the standards remain grounded in law and practical application, the reference to using "leverage" must be deleted. The focus should be on actions within a company's direct sphere of control and influence.	S1	S1-3 - Actions and Resources related to Own workforce	AR 6
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	While the CSRD mentions the principle of a "just transition" in its recitals, it does not provide a legal definition or prescribe detailed reporting obligations on the matter. This requirement oversteps its mandate by taking this high-level, undefined concept and turning it into a specific, prescriptive reporting requirement. This constitutes a significant infringement on entrepreneurial freedom. By imposing a specific and politically charged framework, the standard dictates how a company must frame and manage the social impacts of its climate strategy, interfering with its fundamental freedom to make independent strategic and operational decisions. Furthermore, the term "just transition" is inherently vague, introducing subjectivity and legal uncertainty that undermine the goal of comparable reporting. This creates a disproportionate analytical burden. To respect entrepreneurial freedom and ensure legal clarity, the specific, prescriptive references to "just transition" must be deleted from this Application Requirement.	S1	S1-3 - Actions and Resources related to Own workforce	AR 7
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph as it is structurally redundant and substantively problematic. It creates unnecessary complexity by placing a target-setting requirement in a topical standard that is governed entirely by the general standard, ESRS 2 GDR-T. This cross-reference is flawed: The requirement forces the disclosure of specific workforce targets that often constitute strategic business secrets. Targets for skills, talent, or restructuring are core to a company's competitive strategy. Publicly disclosing them is detrimental to a company's competitive position and infringes upon its entrepreneurial freedom. To streamline the standards and protect commercially sensitive information, this DR should be deleted. The general requirements for target-setting must reside exclusively in ESRS 2, which itself must be amended to introduce a robust, explicit exemption for strategic targets that are commercially sensitive.	S1	S1-4 - Targets related to Own Workforce	20.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	While the CSRD mandates a dialogue with workers' representatives, this paragraph's requirement to disclose engagement specifically on "target-setting" is an overreach. Worker consultation and co-determination are highly regulated and sensitive areas governed by diverse national laws and established practices across the EU. By imposing a uniform, granular disclosure requirement on the process of setting strategic targets, the ESRS interferes with these carefully balanced national systems. It creates a de facto European standard that runs parallel to, and potentially conflicts with, existing national legal frameworks, infringing upon both corporate governance structures and the specific rights and duties established in member states. This represents a clear intrusion into entrepreneurial freedom and national legal competences. The reporting standard should not be used to harmonize complex national labor relations through the back door. Therefore, this paragraph must be deleted. The general obligation for dialogue is set by the CSRD, and its practical application is properly managed by the applicable national laws on co-determination.	S1	S1-4 - Targets related to Own Workforce	21.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement reinforces the overreach identified in paragraph 21 by intruding further into a company's internal management processes. While engagement is mandated by the CSRD, this AR goes beyond a general dialogue about "sustainability information." It prescriptively frames worker engagement as a specific tool for "informing the undertaking's understanding of the effectiveness of its management" and for the "identification of lessons learnt or improvements". These are core functions of internal management, control, and strategic review. Dictating how a company should derive its "lessons learnt" or assess its own management effectiveness is a clear infringement on entrepreneurial freedom and organizational autonomy. The ESRS's role is to standardize the reporting of outcomes, not to prescribe the internal methodologies for performance review and strategic adaptation. This requirement is a disproportionate and unjustified intrusion into corporate governance. It should be deleted.	S1	S1-4 - Targets related to Own Workforce	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph's stated objective to "provide insight into the undertaking's approach to employment practices" is an overreach and an infringement on entrepreneurial freedom. A company's employment practices and its approach to employment security are core components of its business model and human resources strategy. The CSRD requires reporting on material impacts, not a broad, subjective disclosure of the company's "approach," which is not defined and can be interpreted in a way that forces the disclosure of commercially sensitive strategic information. This requirement goes beyond the specific 24 social human rights and factors listed in the directive and forces a narrative justification of internal HR policy, which must not the purpose of a reporting standard. The vague and overreaching objective of providing "insight into the undertaking's approach" should be deleted.	S1	S1-5 - Characteristics of the undertaking's employees	22.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph mandates the disclosure of granular employee data that is not necessarily indicative of any material sustainability impact and therefore goes beyond the CSRD's requirements. The disproportionate breakdown by contract type—permanent, temporary, and non-guaranteed hours—does not, in itself, provide meaningful information about a company's sustainability performance. It touches upon sensitive aspects of a company's business model and HR strategy without a clear link to a sustainability outcome. Furthermore, the new threshold for country-level reporting in point (a)—the ten largest countries with over 50 employees—is not a simplification. For many international companies, this significantly increases the administrative burden by expanding the number of jurisdictions for which data must be collected and reported. To align with the principle of materiality and reduce the burden, the breakdowns by contract type in (c), (d), and (e) should be deleted. The threshold for country reporting in (a) should revert to the previous, less burdensome rule (10% threshold of the workforce in a country).	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is methodologically flawed and undermines the fundamental objective of comparability. The text acknowledges that the definitions of key employment types differ across national laws. It then instructs companies to aggregate these legally distinct, non-comparable data points into a single, meaningless total. This approach is illogical and misleading. Combining data from different legal contexts creates a distorted figure that has no analytical value and cannot be reliably compared across different international companies. This requirement creates a significant burden for companies to collect and aggregate data, only to produce a result that is inherently unreliable and worthless for any meaningful analysis. It is a prime example of a disproportionate reporting obligation that fails to produce decision-useful information.	S1	S1-5 - Characteristics of the undertaking's employees	AR 9
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement highlights a significant operational challenge. Its permissive and vague language ("may provide") implicitly concedes that compiling consistent, high-quality employee data is extremely difficult in practice. The operational reality for large, international companies is that sourcing reliable data on headcount, FTEs, and contract types across numerous jurisdictions with disparate HR systems is a complex and disproportionately burdensome task. The lack of a single, feasible compilation methodology—as acknowledged by this AR's vagueness—ensures that the data reported under DR S1-5, paragraph 23 will not be comparable across undertakings, severely limiting its value for any stakeholder. Given that the data is operationally difficult to collect consistently and the resulting metrics lack comparability, the underlying disclosure requirement imposes an excessive burden for little informational gain. It should therefore be deleted.	S1	S1-5 - Characteristics of the undertaking's employees	AR 10
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is overly prescriptive and its templates highlight flawed underlying requirements. The template in Table 1 mandates an "Other" gender category that is not legally recognized in all Member States, forcing companies into a legally inconsistent reporting framework that requires burdensome explanations. The template in Table 2 is driven by the new "ten largest countries" rule, which is not a simplification. For international companies, this significantly increases the administrative burden by expanding the number of countries to report on, without a clear increase in the value of the information. To ensure proportionality and legal consistency, the tabular formats must be presented as optional, non-mandatory examples. Furthermore, the country reporting threshold must revert to the previous, less burdensome rule.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement and its prescriptive Table 3 mandate a granular breakdown of employees by contract type and gender that goes beyond the CSRD's requirements and infringes on entrepreneurial freedom. This detailed data, especially the distinction between permanent, temporary, and non-guaranteed hours employees, does not in itself provide meaningful information about a company's material sustainability impacts. Forcing all companies to report this specific breakdown is a disproportionate burden that reveals sensitive aspects of a company's HR strategy and business model without a clear link to a sustainability outcome. Furthermore, the rigid, mandatory format is an unnecessary intrusion into how a company presents its data. The template should be provided as an optional, non-mandatory example, not a prescribed format. Companies must retain the flexibility to report relevant data in a way that accurately reflects their operational reality and legal context, especially given the legal and cultural complexities surrounding gender reporting in different Member States.	S1	S1-5 - Characteristics of the undertaking's employees	AR 12

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is overly simplistic and prescribes a one-size-fits-all calculation that fails to reflect diverse business realities. The mandated formula for employee turnover aggregates vastly different reasons for departure—voluntary leave, dismissal, retirement, and death—into a single, crude metric. This approach is methodologically weak, as it obscures the underlying drivers of turnover. For example, a high turnover rate due to retirements in an aging workforce has a completely different strategic implication than one caused by dismissals or voluntary departures. By forcing a single, non-nuanced calculation, the standard produces a metric that is of limited value and can be highly misleading. It infringes upon a company's ability to report on workforce dynamics in a way that is meaningful and relevant to its specific situation, industry, and strategic context. To provide decision-useful information, this AR should be amended to allow companies to use their own established and more contextually relevant methodologies for calculating and explaining employee turnover, rather than mandating a single, overly simplified formula.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	A company's reliance on non-employees is a core component of its business model and strategic resourcing. Forcing a company to provide an "understanding" of this reliance compels the disclosure of sensitive operational and strategic information without a direct or necessary link to a material sustainability impact. Critically, lumping non-employees into the concept of an undertaking's "own workforce" is legally problematic. It disregards the clear legal and contractual separation between employees and independent contractors or workers from third-party agencies. This risks creating a false impression of a direct employment relationship, which could have unintended legal consequences (e.g., co-employment risk). The CSRD's focus is on material impacts, not on demanding a justification of a company's chosen business model. This DR and its objective go beyond the directive's mandate. Therefore, this Disclosure Requirement should be deleted. Any material impacts on non-employees should be covered under ESRS S2 "Value Chain Workers. Beyond that we suggest that this should be a voluntary information.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph mandates the disclosure of data that is practically unfeasible and legally problematic for companies to obtain. A reporting company does not have direct access to the personnel data of its contractors or the employees of third-party agencies. The details of these non-employees are the responsibility of the third-party employer, and this information is rightly protected by data protection laws and the "need to know" principle. Forcing a company to report on a total number of individuals over which it has no direct oversight or data access creates an impossible compliance burden. The expected effort is significant, as this data cannot be derived from a company's own systems and would require extensive manual data requests that third parties are often legally unable or unwilling to fulfill. Given that the data is not reliably accessible and its collection raises significant legal and data protection issues, this requirement is disproportionate and impractical. It must be deleted.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	While the new Application Requirement attempts to introduce a materiality filter, it does not solve the fundamental flaws of the Disclosure Requirement in paragraph 25. The AR itself relies on vague, subjective terms like "significant driver" and "substantial proportion," which fail to provide a clear, auditable threshold for reporting and thus create legal uncertainty. More importantly, even if the topic were deemed material under this ambiguous test, it does not change the operational reality: companies cannot reliably and legally access the personnel data required to report a total number of non-employees. This information is held by third-party agencies or contractors and is rightly protected by data protection laws. The requirement to provide a specific number remains practically unfeasible. Given these overriding practical and legal barriers, the requirement to disclose a specific number is not fit for purpose. It imposes an impossible compliance burden. Therefore, both this Application Requirement and the underlying disclosure in paragraph 25 must be deleted.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is an unworkable fallback for a fundamentally flawed disclosure. It fails to recognize that estimates in social reporting are vastly different from those in financial reporting. Financial estimates are typically based on historical data, statistical models, and established valuation techniques within a company's control. In contrast, estimating the number of non-employees—individuals who are not in a company's own HR systems—lacks any reliable basis. Such an estimate would be pure speculation, not a reasoned calculation. It would be impossible to audit and would have no informational value. By suggesting estimation as a solution, this AR sidesteps the core issue: the data is not just difficult to collect; it is fundamentally inaccessible to the reporting entity for legal and practical reasons. Forcing companies to produce a speculative number is misleading and creates a false sense of precision. This AR does not provide a viable solution to an impractical requirement. It should be deleted along with the underlying disclosure in paragraph 25.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 15
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph's objective is an overreach that disregards the diverse and legally established systems of labor relations across the EU. "Social dialogue" and collective bargaining are governed by specific national laws, with which companies are already legally required to comply. Demanding a standardized, separate report on this topic is therefore redundant and offers no added value, as it merely documents existing legal compliance. Furthermore, this DR overlaps significantly with other requirements, such as DR S1-2, which already requires a description of how workers are engaged. This creates internal redundancy within the standard itself. Given that the subject is already covered by both national law and other disclosure requirements, this DR is superfluous and should be deleted.	S1	S1-7 - Collective bargaining coverage and social dialogue	26.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph mandates granular data disclosures that are disproportionately burdensome and produce misleading, non-comparable metrics. The requirement in point (b) to report on the "10 largest countries" creates an excessive administrative burden for international companies, forcing extensive data collection for no clear informational gain. Critically, the entire exercise is methodologically flawed. The meaning of "collective bargaining agreements" differs profoundly across national legal systems, rendering any comparison of these percentages misleading. This problem is compounded in point (c) by the use of the term "region," which is completely undefined. This creates significant legal uncertainty and forces companies to use arbitrary definitions, making the resulting data worthless for comparison. Given that the data is burdensome to collect and the resulting metrics are not comparable or decision-useful, this entire paragraph should be deleted.	S1	S1-7 - Collective bargaining coverage and social dialogue	27.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph mandates granular, country-level data that is disproportionately burdensome and produces a misleading metric. The requirement in point (a) to report the percentage of employees covered by workers' representatives is flawed. The definition, role, and structure of "workers' representatives" are governed by diverse and complex national laws, meaning the data is not comparable across different EEA countries. Forcing this disclosure creates a significant administrative burden to produce a metric that has little to no comparative value. Furthermore, the requirement in point (b) regarding European Works Councils is redundant. The existence of these bodies is already a matter of public record and is governed by specific EU directives. Demanding this disclosure within the ESRS adds no new information and is a superfluous reporting exercise. Given that the data is not comparable and the requirements are redundant with existing legal frameworks, this entire paragraph should be deleted.	S1	S1-7 - Collective bargaining coverage and social dialogue	28.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement provides a formula that is deceptively simple and produces a fundamentally flawed and misleading metric. The formula's critical weakness is its reliance on the term "collective bargaining agreements," which lacks a uniform legal definition across the EU. The legal status, scope, and application of such agreements vary significantly between Member States. This AR creates a false sense of precision by mandating a single calculation for legally distinct national concepts, making the resulting percentage non-comparable and worthless for any meaningful cross-country or cross-company analysis. Furthermore, it fails to account for diverse national practices, such as "in-house collective bargaining agreements" or situations where companies voluntarily apply the terms of an agreement without being legally bound to it. By forcing a simplistic calculation onto a complex legal reality, this AR produces a distorted and unreliable figure. It is not fit for purpose and should be deleted.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 16
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement and its prescriptive table are methodologically flawed and create a misleading picture of social dialogue. The table mandates the aggregation of legally distinct and non-comparable data points from different EEA countries into a single format. As a result, the concepts of "collective bargaining" and "workers' representatives" vary significantly across jurisdictions, so presenting them as uniform metrics is analytically unsound and provides no decision-useful information. The rigid format infringes on a company's ability to report this information in a way that accurately reflects the specific national legal contexts in which it operates. Therefore, this table cannot be a prescribed template. If material, companies must retain the flexibility to report on these matters in a narrative format that respects the legal diversity of their operations.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement and its formula are overly simplistic and legally inconsistent, producing a metric that is both misleading and non-comparable. The calculation relies on the term "workers' representatives," which has vastly different legal definitions, roles, and structures across the EEA. Forcing a single, uniform calculation onto these diverse national systems is methodologically flawed and creates a distorted picture that cannot be reliably compared. Furthermore, the formula is legally imprecise. For example, in Germany, members of upper management ("Leitende Angestellte") are counted as employees in the denominator but are not represented by the works council. This makes a simple "100% or 0%" calculation for single establishments incorrect and demonstrates the AR's failure to account for critical details in national law. This AR produces a meaningless metric through a disproportionate effort. It is not fit for purpose and should be deleted.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 18
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph's objective is overly narrow and reductionist. It incorrectly equates the broad concept of "diversity" with a single, prescribed metric: "gender diversity at top management level". This one-size-fits-all approach is flawed as it disrespects the undertaking's own materiality assessment and fails to reflect the broader scope of diversity outlined in the CSRD itself. The directive lists multiple grounds for equal treatment, including age, disability, and racial or ethnic origin, not just gender. The aspects of diversity that are most material will vary significantly between companies. Therefore, this narrow objective should be deleted. It should be replaced with a principles-based objective that enables an understanding of the company's overall approach to diversity and inclusion, allowing undertakings to report on the specific topics and metrics they have identified as material for their business. This ensures the information is relevant and aligns with the holistic view of diversity intended by the CSRD.	S1	S1-8 - Diversity metrics	29.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This requirement to disclose a single, prescribed diversity metric is reductionist and inconsistent with the principle of materiality. Forcing the disclosure of this specific metric is especially problematic and misleading when the general topic of diversity is material to a reporting company. It disproportionately elevates one aspect of diversity, implying it is the most important one, while obscuring other issues—such as age, disability, or ethnicity—that the company may have identified as being far more material to its specific context. This creates a distorted and incomplete picture of the company's actual diversity priorities and performance. This approach infringes upon a company's ability to report on what is genuinely material. Therefore, this specific metric should not be mandatory. It should be presented as an optional example of a diversity metric that a company may choose to report if it has identified gender diversity at the top management level as a material topic.	S1	S1-8 - Diversity metrics	30.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	While the CSRD mandates reporting on "adequate wages," this paragraph's objective is based on a flawed premise that a single, comparable "understanding" of wage adequacy can be achieved across the EU. The concept of an "adequate wage" is not a uniform standard but is inextricably linked to diverse national socio-economic conditions, legal frameworks, and long-standing systems of collective bargaining managed by social partners. Companies comply with these diverse and complex national systems. By setting a single, overarching objective, the ESRS disregards these fundamental national differences and disrespects the legal competence of Member States and the autonomy of social partners in the sensitive area of wage-setting. It forces companies to report against an ambiguous and non-existent European benchmark, which is a clear overreach. The objective should be reframed to respect national diversity. It should focus on enabling an understanding of how a company's wage practices align with the specific legal and collective bargaining frameworks of the countries in which it operates, rather than pursuing an unworkable, one-size-fits-all European standard.	S1	S1-9 - Adequate wages	31.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph's requirement for a binary "yes/no" disclosure on paying an "adequate wage" is unworkable and fundamentally flawed. The term "adequate wage" lacks a single, legally binding, or universally accepted benchmark, especially across different countries. It is a complex socio-economic concept, not a simple compliance check. Forcing a company to make a definitive "yes/no" statement against such a vague and subjective standard is misleading and creates significant legal uncertainty. Different companies will inevitably use different benchmarks, making any disclosures non-comparable and of little value to stakeholders. This requirement forces companies into a disproportionate and legally precarious exercise of judging their own wage practices against a non-existent standard. Given the lack of a clear and objective benchmark, this disclosure requirement is not fit for purpose and should be deleted.	S1	S1-9 - Adequate wages	32.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	While presenting a "single affirmative statement" appears simple, it does not reduce the operational burden. To make such a definitive claim, a company would need to conduct an extensive, legally precarious internal assessment against a non-existent, universally accepted benchmark for an "adequate wage". Furthermore, this statement would need to be verified by an auditor, who would require robust, objective evidence to support the claim. Since no such objective standard for "adequate wage" exists, proving compliance would be impossible, leading to significant legal risk and potential conflicts during the assurance process. This AR creates a false sense of simplicity while ignoring the immense compliance and audit challenges it generates. It is a prime example of a requirement that is unworkable at the operational level and should be deleted along with the underlying disclosure in paragraph 32. The requirement to research "appropriate wages" for each country of operation imposes a disproportionate and impractical burden on undertakings. To ensure consistency and feasibility, the EU Commission or EFRAG must provide a centralized, annual overview of these wage benchmarks. Furthermore, the standard lacks critical guidance on the treatment of variable, performance-related salary components, creating significant ambiguity that makes a reliable calculation impossible.	S1	S1-9 - Adequate wages	AR 20
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is legally problematic and operationally unworkable. The requirement to calculate the "lowest wage" is a significant infringement on employee privacy and personal data protection rights. In many cases, especially within specific countries or company units, the lowest-paid individual can be easily identified, and disclosing their remuneration data, even indirectly, would constitute a serious data breach. A legal basis for processing and disclosing this highly sensitive personal data is not provided for in the GDPR. Furthermore, the calculation methodology is ambiguous. The term "fixed additional payments that are guaranteed to all employees" is unclear. Many allowances (e.g., Christmas bonuses) are subject to tenure or other conditions and are not guaranteed to all employees, making a consistent calculation impossible. Given the severe data privacy violations and the practical impossibility of a consistent calculation, this AR is not fit for purpose and must be deleted.	S1	S1-9 - Adequate wages	AR 21

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is a clear case of regulatory overreach that infringes on national sovereignty and the autonomy of social partners. The AR attempts to define a benchmark for "adequate wage" by referencing various sources, but it fundamentally misrepresents their legal nature: First, the values in the EU Directive on Adequate Minimum Wages are indicative and non-binding for Member States, who retain the sovereign competence for setting wage policies. On top of that, in January 2025, ECJ Advocate General Nicholas Emiliou delivered his Opinion agreeing with Denmarkt proposing to repeal the directive in full. Secondly, the ILO conventions and principles it refers to are addressed to sovereign states, not directly to private companies. They do not create direct, legally binding corporate obligations. By elevating these non-binding and state-level principles into a de facto benchmark for corporate reporting, the ESRS improperly interferes with national wage-setting systems and creates legally unfounded obligations for companies. The entire framework is built on a flawed legal premise and is practically unworkable. This AR must be deleted.	S1	S1-9 - Adequate wages	AR 22
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Disclosure Requirement lacks a clear legal basis, as "social protection" is not one of the social and human rights factors explicitly listed for reporting in the CSRD. This omission in the directive is appropriate, as social protection is a matter of state social policy and national law, not a corporate responsibility. This objective improperly blurs the lines between corporate duties and state functions. Furthermore, it is impractical to expect a company to conduct its own "field research" to assess the adequacy of diverse and complex national social security systems worldwide. This creates a disproportionate burden for little valuable information, a fact underscored by this DR's recurring status as a phase-in requirement. Given that this DR lacks a clear mandate in the CSRD, infringes on national competences, and is unworkable in practice, it must be deleted.	S1	S1-10 - Social protection	33.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph is unworkable, legally precarious, and imposes a disproportionate burden. It requires an undertaking to make a definitive assessment of whether its employees "lack social protection". This is practically impossible, as a company cannot reliably possess or verify the detailed, personal information needed to determine the social security coverage of every individual employee. Requesting such sensitive data would likely violate data protection laws. Furthermore, companies already adhere to all applicable national social policy laws. Reporting on the outcomes of these legally mandated systems - in terms of the elements mentioned in a)-d) - is redundant and provides little value to users. Given that the disclosure is unfeasible, legally problematic, burdensome, and redundant, this paragraph must be deleted.	S1	S1-10 - Social protection	34.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph's objective is unworkable and legally precarious, as it requires data that companies are often prohibited by law from collecting. In many Member States, directly asking employees about disabilities is prohibited by law and is considered an illegitimate invasion of privacy. The legal framework for collecting such sensitive personal data is extremely restrictive, and companies cannot simply request this information to fulfill a reporting requirement. Even where legally permissible, data on disabilities relies on voluntary self-disclosure by employees. This makes any collected data unverifiable, inconsistent, and ultimately unreliable for standardized reporting. Companies already comply with all applicable national laws regarding the employment of persons with disabilities. Reporting on this topic is a redundant exercise in documenting existing legal compliance. From the offset this disclosure requirement has been a phase-in requirement, which is now again subject to new transitional provisions of the delegated act "quick fix". Information related to compliance with existing legal requirements appears to be of litle to users of the information. Given that the necessary data is legally protected and practically impossible to collect reliably, this disclosure requirement is not fit for purpose. It must be deleted.	S1	S1-11 - Persons with disabilities	35.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph is unworkable and its caveat, "subject to legal restrictions," is a tacit admission of its fundamental flaws. The requirement to disclose a percentage of employees with disabilities is legally problematic in many Member States, where collecting such sensitive personal data is prohibited to protect employee privacy. The caveat does not solve this problem; it fractures it. It will lead to a situation where companies in some countries report a number (based on unreliable self-disclosure) while those in stricter jurisdictions report nothing. This makes the resulting data completely non-comparable and of no value for any meaningful analysis. Given that it is legally contentious and produces non-comparable data, this paragraph should be deleted.	S1	S1-11 - Persons with disabilities	36.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement does not solve the fundamental flaws of paragraph 36; it only highlights them. The AR explicitly states that the DR only requires data that can be "lawfully collected". This is a direct acknowledgement that the requirement is unworkable in many Member States where such data collection is prohibited by law. A standard that is not universally applicable is not a standard. The AR allows undertakings to use either a single internal definition or various national definitions of "disability". This flexibility guarantees that the resulting data will be completely non-comparable across companies, rendering it useless for stakeholders. The suggestion to use "voluntary employee surveys" as a data source confirms that the data is unverifiable and unreliable. This AR attempts to provide flexibility for a requirement that is fundamentally broken. It produces non-comparable, unreliable data. This AR should be deleted along with the entire Disclosure Requirement.	S1	S1-11 - Persons with disabilities	AR 23

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph's objective is an overreach that imposes a normative standard on companies not mandated by the CSRD. The CSRD's focus regarding training is on ensuring "equal treatment and opportunities for all". This DR's objective, however, shifts the focus to broader, undefined concepts like "continuous professional growth" and "continued employability". This represents a significant expansion of scope. It imposes a specific, normative view of a company's responsibility for its employees' entire career trajectory, which is a matter of entrepreneurial freedom and strategic HR management, not a standardized reporting topic. The ESRS should not be used to prescribe specific HR policy goals. The objective should be reframed to align strictly with the CSRD's mandate: to enable an understanding of how the undertaking ensures equal treatment and opportunities in its training and skills development activities. Beyond that we suggest that this should be a voluntary information.	S1	S1-12 - Training and skills development metrics	37.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	These prescribed, one-size-fits-all metrics are simplistic and produce a misleading, non-comparable picture of a company's training efforts. A simple percentage of performance reviews or an average of training hours provides no insight into the quality, relevance, or effectiveness of the training provided. A high number of hours in outdated or irrelevant training is of less value than fewer hours in highly specialized, strategic skills development. These metrics encourage a focus on quantity over quality. The metric for "training hours" is based on an outdated, classroom-centric view of learning. Modern professional development often consists of on-the-job learning, coaching, peer exchanges, and self-directed digital learning, none of which can be meaningfully or consistently measured in "hours". Because "training" and "performance reviews" are not uniformly defined and companies utilize vastly different methods, these metrics will not be comparable across undertakings, rendering them useless for benchmarking. These simplistic and misleading metrics should be deleted. Companies should instead be allowed to report on their overall approach to training and skills development, focusing on the qualitative and quantitative information that is material to their specific strategic needs and business context.	S1	S1-12 - Training and skills development metrics	38.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement and its formula are overly simplistic and fail to produce a meaningful metric. The AR attempts to create a standardized definition for "regular performance review," but the reality is that modern performance management systems are diverse and continuous, often moving away from the traditional, once-a-year model this AR describes. Forcing companies to report a single percentage based on this outdated definition is a reductionist exercise that provides no insight into the quality or effectiveness of their performance and career development processes. A simple participation rate does not distinguish between a brief, formalistic check-in and a substantive, year-round development dialogue. This creates a non-comparable metric that encourages a check-the-box approach rather than a focus on meaningful employee development. This prescribed metric is a poor proxy for performance management and should be deleted.	S1	S1-12 - Training and skills development metrics	AR 24
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement and its prescribed formula are based on an outdated and overly simplistic view of professional development, leading to a misleading and non-comparable metric. The formula's reliance on "training hours" fails to capture the reality of modern corporate learning, which increasingly consists of non-hourly activities like on-the-job coaching, self-directed digital learning, and peer exchanges. Forcing these diverse and often more effective methods into an artificial "hour" equivalent is impractical and produces an unreliable figure. This creates a perverse incentive for companies to focus on easily quantifiable but low-quality "hours" of training rather than on impactful skills development. The resulting metric is a poor proxy for the quality of a company's training efforts and will not be comparable across undertakings that use different learning methodologies. This AR is not fit for purpose and should be deleted.	S1	S1-12 - Training and skills development metrics	AR 25
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This objective is redundant and leads to a disproportionately burdensome reporting exercise that is not fit for purpose. Occupational health and safety is already governed by strict and comprehensive national laws and regulations in Member States, which are monitored by state authorities and accident insurance bodies. Companies are already legally required to comply with these high standards. Demanding a separate, standardized report on this topic is a redundant exercise in documenting existing legal compliance and provides no added value. The definitions of "work-related accidents" and "ill-health," as well as the specific legal requirements, differ significantly across countries. This makes it impossible to produce a single, standardized set of metrics that would be meaningful or comparable across the EU. Given that this area is already heavily regulated at the national level and a standardized, comparable report is practically impossible, this Disclosure Requirement is superfluous. It should be deleted.	S1	S1-13 - Health and Safety metrics	39.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph mandates the collection and disclosure of metrics that are impractical to collect, legally problematic, and not comparable across jurisdictions due to vague and undefined terms. The requirement in point (d) to report on "work-related ill health" is unworkable. In many Member States, companies are legally prohibited from demanding the specific diagnosis for an employee's sick leave and cannot determine if an illness is "work-related". The definitions of "recordable work-related accidents" and "ill-health" differ significantly across countries, making a standardized, comparable metric impossible. The term "recordable" is insufficiently defined and creates significant legal uncertainty. As it stands, "recordable" could be broadly interpreted to mean any circumstance that can be documented, which is an unworkably vague standard. To ensure clarity and a consistent basis for reporting, the term must be replaced with the more precise phrase "subject to recording," linking the requirement to a clear legal or official obligation. The phrase in point (b)(i) "other workers that work on its sites" is completely undefined. It is unclear if this refers to contractors, visitors, or employees of other tenants. The difference between "work-related incident" and "work-related accident" is not rational. This entire paragraph should be deleted.	S1	S1-13 - Health and Safety metrics	40.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is overly prescriptive and unnecessarily rigid. By mandating a single calculation method ("head count rather than a full-time equivalent basis"), this AR infringes on a company's ability to present data in a way that is most meaningful and relevant to its specific operational reality. Different industries and business models may use FTE as a more accurate and established basis for workforce-related metrics. This one-size-fits-all approach reduces flexibility without a clear corresponding increase in the quality or comparability of the information, as the underlying national health and safety systems are already non-comparable. The requirement should be amended to allow companies the flexibility to use either a head count or an FTE basis, provided they clearly disclose the methodology used.	S1	S1-13 - Health and Safety metrics	AR 26
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is methodologically flawed and produces a non-comparable, misleading metric. The AR explicitly instructs undertakings to use the differing national legal definitions of "work-related accidents" and then plug them into a single, standardized formula. This is analytically unsound. It creates a false sense of precision and comparability by treating legally distinct concepts as if they were the same. The resulting accident rate will be a meaningless aggregation of disparate national statistics, not a comparable EU-wide metric. The formula's denominator ("total hours worked") may conflict with established national reporting systems, which often use a different basis for calculation (e.g., per 1,000 employees). This forces companies into a duplicative calculation for no added value. This AR mandates a burdensome calculation that produces a fundamentally unreliable and non-comparable metric. It is not fit for purpose and should be deleted.	S1	S1-13 - Health and Safety metrics	AR 27
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is methodologically flawed and undermines the clarity of health and safety reporting. Conflating "recordable work-related accidents" with "fatalities" into a single metric is analytically unsound. These are two distinct categories with vastly different levels of severity and regulatory implications. Combining them into one number obscures the most critical information—the occurrence of a fatality—and diminishes the analytical value of the accident rate. Fatalities should be treated as a separate, standalone key performance indicator to ensure they are given the appropriate visibility and severity they warrant. This AR creates a less transparent and less decision-useful metric. Therefore, this requirement should be amended. Fatalities must be reported as a distinct metric, separate from the general rate of recordable accidents.	S1	S1-13 - Health and Safety metrics	AR 28
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is unworkable and legally precarious. It requires an undertaking to record and report "cases of work-related ill health" based on informal notifications from various parties, including the affected person. This is fundamentally flawed. A company is neither qualified nor legally permitted to make a medical determination that an employee's illness is "work-related". In Member States like Germany, the official determination of an occupational disease is the exclusive responsibility of competent national authorities, such as statutory accident insurance bodies. This AR improperly shifts a state-level diagnostic responsibility onto the company, creating significant legal risk and forcing it to report on data that has no official, verified status. The requirement is based on a misunderstanding of a company's legal role and capabilities. It must be deleted.	S1	S1-13 - Health and Safety metrics	AR 29
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is methodologically flawed and produces a misleading, non-comparable metric. Mandating the use of "calendar days" instead of "work days" to calculate lost time is inconsistent with established and logical national practices. It artificially inflates the number of lost days by including weekends and public holidays, which are non-working days. This approach creates a distorted and less accurate picture of the actual impact on productivity and operations. Furthermore, it undermines comparability, as it conflicts with the "work day" basis used by many national authorities and companies for their own internal and statutory reporting. This AR is illogical and counterproductive. It must be amended to require the calculation to be based on "work days" to ensure the metric is accurate, meaningful, and consistent with established practices.	S1	S1-13 - Health and Safety metrics	AR 30
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph's objective is overly narrow and reductionist. This requirement's continuous deferral as a phase-in signals its practical complexity and questionable value. Reporting on mandatory legal compliance is redundant and offers minimal insight to users. The objective incorrectly equates the broad and complex topic of "work-life balance" with a single, specific issue: "family-related leave". This is a misleading oversimplification. Modern work-life balance encompasses a wide range of material topics, such as flexible work options, part-time arrangements, and mental health support, which are completely ignored by this narrow focus. Entitlement to family-related leave is already comprehensively regulated by national law in Member States. Companies are legally required to comply with these provisions. Demanding a separate disclosure on this topic is a redundant exercise in documenting existing legal compliance and provides no added value to users. This DR is not fit for purpose. It focuses on a non-material, legally mandated entitlement while ignoring more relevant aspects of work-life balance. It should be deleted. A meaningful disclosure on this topic would allow companies to report on the material work-life balance initiatives relevant to their specific workforce, rather than mandating a single, redundant metric. Beyond that we suggest that this should be a voluntary information.	S1	S1-14 - Work-life balance metrics	41.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph is redundant and legally problematic. Entitlement to family-related leave is comprehensively regulated by binding national law in all Member States. Companies are already legally required to grant these entitlements. Disclosing a percentage of entitled employees is a superfluous exercise in documenting existing legal compliance and provides no meaningful insight into a company's performance. Furthermore, determining an individual employee's specific entitlement often depends on personal circumstances (e.g., the age of a child, the health of a relative). Requesting such sensitive personal information from the entire workforce to calculate a percentage raises significant data privacy concerns and is a disproportionate intrusion. Given that this requirement is redundant and legally problematic, it should be deleted.	S1	S1-14 - Work-life balance metrics	42.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph is redundant and highlights the flawed premise of the entire Disclosure Requirement. Entitlement to family-related leave is already comprehensively regulated by binding national law in all Member States. Therefore, for a vast majority of undertakings operating in the EU, the condition in this paragraph—that all employees are entitled to such leave—is already met by default through legal compliance. This AR merely confirms that companies can state what is already a legal fact. It is a superfluous provision for a superfluous requirement. Given that the underlying disclosure is redundant with existing national law, this paragraph and the entire DR should be deleted.	S1	S1-14 - Work-life balance metrics	AR 31
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement is redundant and creates a misleading picture of the legal reality. The primary and overriding basis for an employee's entitlement to family-related leave is binding national law, not a disparate mix of "organisational policies, agreements, contracts or collective bargaining agreements". Companies and employees are already subject to these comprehensive legal frameworks. This AR is therefore superfluous, as the entitlement is a matter of statutory law, not optional company policy. It also creates a false impression that these entitlements are discretionary or based on company-specific arrangements, which is incorrect in the vast majority of cases within the EU. This AR is a redundant and confusing provision. It should be deleted.	S1	S1-14 - Work-life balance metrics	AR 32
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This objective is based on flawed metrics and confusing terminology, leading to a misleading and disproportionate reporting requirement. The objective focuses on the "global gap in pay," which refers to the unadjusted gender pay gap. This is a statistically flawed and misleading indicator that does not account for legitimate factors like job role, experience, or location. It creates a false impression of discrimination where none may exist and fails to align with the CSRD's focus on "equal pay for work of equal value". The concept of "remuneration inequality" is a vague, normative standard that goes beyond the CSRD's mandate. It is not the role of a reporting standard to assess or define "inequality"; this is a complex socio-economic issue that falls under the competence of national law and social partners. The standard fails to clearly differentiate between "pay," "remuneration," and "wages," creating ambiguity. Given that its objective is based on a misleading metric and constitutes a legal overreach, this Disclosure Requirement is not fit for purpose and should be deleted. Beyond that the "global gap in pay" is not aligned with the pay transparency directive.	S1	S1-15 - Remuneration metrics	43.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	There are serious concerns regarding this requirement to disclose the gender pay gap and the highest-to-median pay ratio. Such disclosure risks violating data protection laws, as publishing pay figures might reveal personal information (e.g. the top earner's pay) beyond what GDPR permits. The measure also lacks proportionality and materiality: it imposes a burdensome one-size-fits-all obligation even when these metrics are not salient to a company's sustainability context. Undertakings should have the option of using the median or the average for the calculation. Using the average for the calculation would simplify the data collection. Operationally, calculating and explaining these figures is complex and costly, amounting to unnecessary "gold-plating" of the CSRD's requirements. Furthermore, the EU Pay Transparency Directive already mandates extensive internal gender pay gap reporting; duplicating similar disclosures in ESRS creates inconsistency and needless effort. Finally, there are doubts about comparability and relevance of these indicators: divergent methodologies and definitions can yield incoherent results across companies, and the highest-vs-median pay ratio (a non-PTD metric) may mislead stakeholders without meaningful context. Removing this requirement and focusing on truly material information remain important. Beyond that we suggest that this should be a voluntary information.	S1	S1-15 - Remuneration metrics	44.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement for a gender pay gap disclosure based on average gross hourly pay is an impractical and misleading obligation. The provided formula yields a single, raw figure that is a "simplistic calculation". It fails to account for legitimate, objective factors such as occupational segregation, seniority, or the distribution of part-time versus full-time work.This metric, lacking context, is not "necessary" for a sound sustainability assessment. It also introduces a "group-based approach" that is not clearly provided for in the CSRD. The disclosure imposes an excessive administrative burden on companies, leading to a focus on compliance rather than performance. This also can lead to public misinterpretation and reputational damage for companies. The disclosure of such data points is part of the ESRS framework that has proven to be excessively burdensome.	S1	S1-15 - Remuneration metrics	AR 33
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement for an undertaking to disclose its data compilation methodology, cross-referencing GDR-M paragraph 41(a), is viewed as redundant and an instance of excessive administrative burden. This provision risks creating a cascade of duplicative reporting, a problem explicitly identified in the BDA's position paper. By mandating that companies detail their methodology, the regulation requires them to disclose information that is already often standardized within auditing processes. This level of granularity is neither necessary nor proportionate to the CSRD's goals.	S1	S1-15 - Remuneration metrics	AR 34
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	For a company that has recently started reporting under the new directive, a three-year lookback period is not always feasible. Such retrospective reporting can be difficult and costly to compile accurately, diverting valuable resources from core business activities. Furthermore, this requirement for historical data is based on a metric that is, in itself, considered flawed and misleading. Instead of focusing on a single, decontextualized figure, the reporting should be more flexible and principles-based to provide genuinely useful information for capital allocation and decision-making.	S1	S1-15 - Remuneration metrics	AR 35

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	Mandating the inclusion of every component of remuneration, from base salary to benefits in kind and long-term incentives, is excessively granular and burdensome. It represents an "overstretching" of the CSRD's framework. The concepts used are also not clear in a cut-and-dry manner. The pay ratio is a fundamentally flawed metric that provides no meaningful insight into a company's remuneration strategy. A high ratio can simply reflect a company's high performance and subsequent market-based executive bonuses, not an inherently unfair pay structure. This detailed reporting interferes with entrepreneurial freedom by implicitly forcing companies to justify their compensation decisions. The CSRD is an information directive, not a tool to enforce a "race to the top" for pay practices.	S1	S1-15 - Remuneration metrics	AR 36
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The term “incident” is not clearly defined, creating legal uncertainty for companies. It is unclear whether all allegations, including unsubstantiated or minor complaints, must be reported, or only substantiated and material cases. This ambiguity risks inconsistent reporting and undermines comparability. Collecting and disclosing data on discrimination or human rights incidents may conflict with national data protection laws (e.g., GDPR). In many jurisdictions, companies are prohibited from processing or publishing sensitive personal data, especially if individuals could be identified. Companies are already subject to strict anti-discrimination laws and national frameworks (e.g., AGG in Germany). Additional reporting obligations create unnecessary administrative burden without added value, as legal remedies and sanctions already exist. The DR does not distinguish between material and immaterial incidents. Reporting all incidents, regardless of severity or outcome, may lead to information overload and reputational harm based on unsubstantiated claims, rather than focusing on genuinely material risks. Disclosure should be limited to substantiated, significant cases, in line with national legal definitions and only where reporting is legally permissible. Clear definitions and thresholds are needed to ensure legal certainty, proportionality, and relevance.	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	To ensure consistency between the SFDR and the ESRS, the term “severe” should be reintroduced. The meaning of “incidents” varies across standards; if the intention is to report complaints filed through specific channels, this should be explicitly stated. If the requirement concerns actual, confirmed incidents, this must also be clearly indicated. Only confirmed (substantiated) incidents should be subject to reporting. Importantly, the term “substantiated” should appear directly in the Disclosure Requirement itself, not just in the Application Requirements, to provide legal clarity and prevent over-reporting of unverified cases.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The reference to “internationally recognised human rights” as defined in ESRS 2 AR 30 and CSRD Art. 29b(2)(b)(iii) lacks sufficient clarity and legal certainty for reporting companies. The scope of “human rights incidents” remains vague, as the referenced instruments are broad and open to interpretation. Without a clear, operational definition, companies face significant uncertainty about what must be reported, risking both over-reporting and inconsistent application across undertakings. Furthermore, the requirement does not specify whether only substantiated and material incidents are in scope, or if all allegations must be included. This ambiguity increases the risk of reporting unverified or immaterial cases, which may conflict with data protection obligations and undermine the relevance and comparability of disclosures. The AR should explicitly limit the scope to substantiated, significant violations of internationally recognised human rights, and provide concrete definitions or examples. Alignment with national legal definitions and reporting only where legally permissible is essential to ensure legal certainty and proportionality.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 37
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The inclusion of both judicial/non-judicial proceedings and internally registered incidents as “substantiated instances” lacks legal clarity and creates significant uncertainty for reporting companies. The scope is overly broad: it is unclear what threshold or process determines when an internal incident is considered “substantiated,” especially in the absence of a formal legal outcome. This risks inconsistent reporting and over-inclusion of unverified or minor cases. Furthermore, including all complaints filed with external bodies (such as OECD National Contact Points) regardless of outcome may lead to reporting of unresolved or unsubstantiated allegations. It is important to note that the OECD Guidelines for Multinational Enterprises are voluntary instruments, not binding legal standards. Reporting requirements should not be based on voluntary frameworks, as this may conflict with national law and create legal uncertainty. Only incidents that are confirmed and substantiated—either by a final legal decision or a robust internal investigation—should be reported. The standard should provide clear criteria for what constitutes a “substantiated” incident and ensure alignment with national legal definitions and data protection requirements.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	While acknowledging that an increase in reported incidents may reflect improved grievance mechanisms, this requirement risks misinterpretation and reputational harm. Without clear guidance, stakeholders may wrongly equate a higher number of reported incidents with deteriorating workplace conditions, rather than improved transparency or trust in reporting channels. Furthermore, requiring disclosure of the methodology for compiling incident data is appropriate for transparency, but only if the underlying definitions and thresholds for what constitutes a reportable incident are clear and harmonized. Without such clarity, methodologies will vary widely, undermining comparability and legal certainty. The standard should clarify that increases in reported incidents may result from enhanced reporting culture, not necessarily from more actual incidents. Methodology disclosures must be accompanied by clear, standardized definitions of incidents and substantiation criteria to ensure meaningful, comparable, and fair reporting.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 39

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The instruction to cross-reference how incidents have been addressed with DR ESRS S1-3 is redundant and adds unnecessary complexity. DR S1-3 already requires disclosure of actions and resources related to managing material impacts, including remediation processes. Repeating this requirement here does not provide additional value and may lead to duplicative or fragmented reporting. To avoid unnecessary duplication and ensure clarity, the standard should require reporting on remediation actions only once, with a clear reference to the relevant section. Cross-references should be minimized to streamline reporting and reduce administrative burden.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 40
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The definition of "fines, penalties and compensation" should be strictly limited to amounts imposed through final administrative or judicial proceedings. Reporting on amounts that are not legally final or are still under dispute could mislead stakeholders and expose companies to reputational and legal risks.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 41
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	An explicit reference to non-discrimination, including harassment, should remain part of the mandatory disclosure requirements. While the proposed revision retains disclosures on serious human rights violations such as forced labour and child labour, it omits discrimination — an issue that is more prevalent across sectors and geographies. Non-discrimination, equal opportunity, and inclusion are material for most undertakings. Relegating these disclosures to non-mandatory guidance weakens the standard's ability to capture key social impact.	S1	S1-1 - Policies related to Own workforce	12.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	This paragraph appears to summarize the general intention behind the disclosure rather than clearly specifying the information to be disclosed. A clear separation between the purpose of the requirement and the actual disclosure content would improve clarity and ensure consistent application, aligning with EFRAG's decision to remove explicit 'Objectives' paragraphs from topical disclosure requirements.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	14.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	The disclosure requirements address the existence of channels for raising concerns and the assessment of their effectiveness. However, there is a lack of explicit requirements regarding the accessibility and promotion of channels for raising concerns, beyond the reference in paragraph 14. Accessibility and awareness are critical factors influencing the practical effectiveness of grievance mechanisms. To improve usefulness for intended users and ensure undertaking's accountability, mandatory disclosure on this aspect is recommended.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	Regarding paragraph 23. (g). The phrase "most representative number in the financial statement" lacks clarity. It is recommended to specify which financial statement metric this refers to (e.g. most representative number in the financial statement related to the number of employees), so that undertakings can clearly assess whether a discrepancy requires explanation. This would improve consistency in interpretation and prevent unjustified omissions.	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	Although Application Requirements (ARs) are intended to be mandatory methodology, the phrase "may provide contextual information" suggests optionality. If the intention is to require the disclosure of the method used (e.g. year-end vs average), this should be reworded using prescriptive language (e.g. "shall disclose"). Otherwise, it risks being overlooked and creates ambiguity.	S1	S1-5 - Characteristics of the undertaking's employees	AR 10
Excels	BDO Poland	Auditor	Poland			I disagree	Limiting disclosure under DR S1-6 only when non-employee workers are deemed material may lead to inconsistent or under- reporting due to the subjective nature of materiality assessments. Given the prevalence of non-employees in certain industries and member states, clearer guidance or quantitative thresholds for assessing materiality in this context are needed to reduce discretion. To enhance transparency, comparability and usefulness for all intended users, a "disclose or explain" approach is recommended. This balances the need for relevant disclosures with practical reporting considerations.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	Both the current disclosure requirement and the proposed change do not fulfill their intended purpose. From this information, we cannot determine what the actual work-life balance looks like or whether the company is family-friendly. The GRI indicators are better, as they require reporting how many people took parental leave, how many returned, and how many stayed for 12 months afterward. This way, we can assess whether the company is truly family-friendly and whether employees want to return after parental leave.	S1	S1-14 - Work-life balance metrics	42.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	This point is a DP so should be put in paragraph in DR and not as an AR.	S1	S1-1 - Policies related to Own workforce	AR 1
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Not clear concerning the part on policies for protecting individuals. Is it a DP ? If yes, it would be better to put it directly as a paragraph	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	AR 4
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We think it would be better to separate the point on the effectiveness of theses channels as it is another DP	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The first part of the paragraph is coved by GDR-A ? Why do we need to reapeat it?	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I disagree	Need to be clarified.	S1	S1-3 - Actions and Resources related to Own workforce	AR 6

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I agree	Simplification ok	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I partially agree and partially disagree	Does rate refer to % or integer?	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I agree	Good clarification and reasonable reporting.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I agree	Good clarification and reasonable reporting.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I disagree	This is related to former para 61 (not S1 - 27c. I disagree that it should be deleted. It is essential to disclose how organisations (or part of organisations) ensure fair working conditions and enable social dialogue for employees that are not covered by a collective agreement. The DR might need a rephrasing.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	27. (c)
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I disagree	Age distribution within top management and among employees are a rather basic level of reporting, and fundamental part of an organisation. It is my firmest belief that S1-8 30b should be mandatory.	S1	S1-8 - Diversity metrics	30.
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest to remove this AR, considering that the information has been already deleted from GDR-P.	S1	S1-1 - Policies related to Own workforce	AR 1
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose re-integrating the total number of employees who have left the undertaking, since it remains essential for calculating the turnover rate and its exclusion therefore results in only an apparent simplification.	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We suggest formulating the requirement with "shall" and rewording it in order to clarify the methodology used.	S1	S1-5 - Characteristics of the undertaking's employees	AR 10
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest reintegrating former paragraph 55(b) (with "shall") into the main standard as a new Application Requirement under ESRS S1 paragraph 25 (on how non-employee data are compiled- e.g. at yera-end or as an average) in line with the approach applied for employees.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS S1-6 the "NMIG 25 for para. 25 " in the main standard as a new Application Requirement to ESRS S1 para 25. (most common type of non employees)	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS S1-8 the "NMIG 27 for para. 29 " in the main standard as a mandatory Data Point to ESRS S1 para 30. We propose retaining this Data Point, as it is essential for reflecting diversity and is readily available to companies. (distribution of employees by age group)	S1	S1-8 - Diversity metrics	30.
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest keeping the reference to "parental leave," or replacing it with "family related leave," as defined in the glossary to include paternity leave, parental leave, and carers' leave.	S1	S1-10 - Social protection	34. (d)
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest considering the retention as AR of the elements that were removed, which provided guidance on what qualifies as an accident or occupational disease. Their inclusion could support undertakings by offering clearer direction and facilitating more consistent and comparable reporting.	S1	S1-13 - Health and Safety metrics	AR 26
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS S1-15 the "NMIG 35 for para. 44 " in the main standard as a mandatory Data Point to ESRS S1 para 44. We propose retaining in the main standard as a new Application Requirement to ESRS S1 para 44. Furthermore, we propose restoring former paragraphs 98 and 99, as they add useful detail to gender pay gap reporting. In particular, we suggest para 98, which requires disclosure of the gender pay gap by employee category (and, where applicable, by country), to be a "shall" requirement; while para 99, which introduces the adjusted gender pay gap to account for differences in purchasing power, as to be disclosed where relevant.	S1	S1-15 - Remuneration metrics	44.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We don't agree with the renaming of the paragraphs (e.g. S1-6, now S1-5). It is understandable, but in practice this leads to additional work and a need for clarification for undertaking that already report in ESRS. The names of the pragraphs have already become established in undertaking reporting worldwide. Furthermore, the designations have also been stored in the IT systems. A renaming would also lead to additional effort and possibly additional costs.	S1	S1 - all	all
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome the use of the average, because in case of averaging, consideration of additions and disposals pro rata, this reduces the calculation effort. This leads to better comparability for benchmarking by using a standardised average.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The paragaph does not support the aim of simplifiying the ESRS. This paragraph generates considerable additional work in reporting and additional coordination requirements (e.g. determining and adjusting the reporting scope yearly, establishing new data collection processes). Due to the varying and company-specific reporting scope we do not see any added value, as it prevents meaningful comparisons across years and between companies.	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We do not agree with the definition "50 or more employees by head count and that are the 10 largest countries in terms of employee numbers for the undertaking" for significant employment. The definition misleadingly implies a substantial employee presence in these countries, when in reality, the number of employees may be very small. In our case, these 10 countries also include countries that cover only 0.2 % of the total number of employees.	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The total number of employees by head count should not be shown as a breakdown by country. The total number of employees should be shown by region, as the undertakings are easier to compare than by country breakdown. For this, a standardised definition of region should be used (e.g. UN classification). The regional breakdown enables to take a position on regional priorities, benchmarking, undertaking culture.	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome the general definition of the management levels 1 and 2 - this should be mandatory for all companies for benchmarking reasons. Maybe this obligation needs to be made clearer.	S1	S1-8 - Diversity metrics	AR 19

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We welcome the fact that companies can use their own definitions, but only in addition. The first step must be mandatory reporting according to the definition of "top management". If the own definition will be used, we agree with the obligation to disclose.	S1	S1-8 - Diversity metrics	AR 19
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The paragaph does not support the aim of simplifying the ESRS. This paragraph generates considerable additional work in reporting and additional coordination requirements (e.g. determining and adjusting the reporting scope yearly, establishing new data collection processes). Due to the varying and company-specific reporting scope we do not see any added value, as it prevents meaningful comparisons across years and between companies.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We do not agree with the definition "50 or more employees by head count and that are the 10 largest countries in terms of employee numbers for the undertaking" for significant employment. The definition misleadingly implies a substantial employee presence in these countries, when in reality, the number of employees may be very small. In our case, these 10 countries also include countries that cover only 0.2 % of the total number of employees.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	While the proposal to further specify the definition of social dialogue was rejected to take account of national differences, the decision has a significant drawback. Without a more standardized definition, the breakdown by 10 countries creates a misleading impression of comparability between these countries that does not exist.	S1	S1-7 - Collective bargaining coverage and social dialogue	28. (a)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	If the 10-country rule is introduced, the Collective Bargaining and Social Dialogue KPIs would be disproportionately weighted compared to other KPIs.	S1	S1-7 - Collective bargaining coverage and social dialogue	28. (a)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We would appreciate to have a common Database on adequate wages provided by the EU to ensure comparability between Companies. Especially as it cannot be ensured that published local minimum wages take into account the ILO wage setting principles.	S1	S1-9 - Adequate wages	AR 22
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We do not agree that the denominator "by average number of employees" includes 23 a (total number by number of employees). We would welcome it, if the involvement of employees by contract can be defined and described. If, for example, a large number of holiday workers are employed during the summer holidays, this drives up the fluctuation rate and distorts the informative value.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Better comparibility for benchmarking by using only rate of employee turnover.	S1	S1-5 - Characteristics of the undertaking's employees	23 (f)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	The legal text now specifies exactly how the distribution must be reported; distribution in number (head count) and percentage.	S1	S1-8 - Diversity metrics	30.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The designation "not reported/not disclosed" should be defined clearly. Does this refer to values that cannot be determined due to the current personnel systems (e.g., the system does not evaluate gender), or does it refer to an additional gender specification by the employee (i.e., the employee did not provide a gender)?	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The specification "Gender as specified by the employees themselves..." in Table 3 should also be integrated into the explanlation of "others" in AR 11.	S1	S1-5 - Characteristics of the undertaking's employees	AR 12
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Also refers to AR 11, table 1, 2: The undertaking should not be allowed to choose how it presents the information. For benchmarking, it is better if only the tables are used.	S1	S1-5 - Characteristics of the undertaking's employees	AR 12
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	In general, the reporting requirements are now more clearly defined. We welcome that the disclosure requirements have been narrowed down and that the word "complaint" has been removed.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We support the narrowing of the former 103b scope (labor-related complaints) to incidents specifically concerning respect for internationally recognized human rights. However, we recommend to reintroduce the severity threshold of former 104 here as our reporting approach for severe human rights incidents is already set up.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We support the introduction of a threshold for incidents. However, we strongly recommend defining the term "substantiated" or changing it to "confirmed" to ensure cross-company comparability. The interpretation of the term "substantiated" varies significantly across countries and legal fields, and without a clear definition, we anticipate challenges in establishing a reporting approach.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Diverging requirements from ESRS S1-12 § 38a (regular performance and career development reviews) and AR 24 (here only performance review). It is therefore unclear whether the disclosure requirement only includes performance meetings and/or development discussions. This can lead to a lack of comparability in the disclosure.	S1	S1-12 - Training and skills development metrics	AR 24
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	The elimination of the distinction of performance reviews according to number/proportion of performance reviews per employee (a) and number of reviews in proportion to the agreed number of reviews by the management (b) simplifies data collection and thus involves less effort in the data collection process.	S1	S1-12 - Training and skills development metrics	AR 24
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	The elimination of the gender distinction in the training hours simplifies data collection and is therefore associated with less effort in the data collection process.	S1	S1-12 - Training and skills development metrics	38.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome the possibility of the undertakings to explain the scope of the report in a qualitative way, in case of inconsistency between financial statement. This increases the transparency and comprehensibility of the data. It promotes the flexibility of the undertakings if the data collection on the own workforce is not possible due to legal/country-specific or undertakings regulations.	S1	S1-5 - Characteristics of the undertaking's employees	23 (g)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	For "age group", deleting as mandatory content and moving to NMIG is not useful for comparability in benchmarking. Information on age should continue to be integrated into S1-8. Statements on age have an interesting informative value in the context of HR strategy and other reporting topics/key figures (e.g. diversity, promotion of young talent, trainings, health and safety). As an alternative, the company-wide average age should be integrated into the report.	S1	S1-8 - Diversity metrics	30.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We disagree with the delete of the definition "non-guaranteed hours employees" and we strongly recommend to keep this definition. This definition has supported us in establishing a reporting approach and has now been recognised and accepted in the whole undertaking worldwide. Without this definition, we have difficulties with the worldwide data collection, the KPI has no meaningfulness and cross-company comparability is not guaranteed in the future.	S1	S1-5 - Characteristics of the undertaking's employees	AR 9

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	In order to data quality and comparability, the definition of "non-guaranteed" rather should be concretised clearly and not consistently removed. It is clear that this category includes "own workforce" employees, not "non-employees" or "value chain workers," and these employees do not have guaranteed minimum working hours. However, it is not explicitly stated if "non-guaranteed hours employees" only include on-call workers considered vulnerable workers. It should be clarified whether non-guaranteed hours employees only include on-call workers or also include employees without guaranteed hours but with mutual agreements on work availability.	S1	S1-5 - Characteristics of the undertaking's employees	AR 9
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The number of EEA countries to be reported in S1-7 is unclear. Should the list be derived from 23a (minus non-EEA), potentially resulting in fewer than 10 EEA countries, OR should a separate list of 10 EEA countries be compiled, potentially including more EEA countries than listed in 23a.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Same as above. The number of EEA countries to be reported in S1-7 is unclear.	S1	S1-7 - Collective bargaining coverage and social dialogue	28. (a)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The undertaking should not be able to choose how it presents the information. For benchmarking, it is better, if only the tables are used.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Since AR 54 was deleted, the definition of region no longer exists. For S1-7, 27c, Collective Bargaining, a definition of region is needed (e.g. Classification UN) for cross-company comparability.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	For consistency and efficiency, a 'significant employment' threshold should also be applied to non-EEA countries, aligning the reporting requirements of 27c with 27b.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We welcome the standardised use of scope between the KPIs. In S1-7 we use the scope of EEA- and non-EEA countries. We think it is better to use the EU/Non-EU Scope for this (as for S1-9).	S1	S1-7 - Collective bargaining coverage and social dialogue	27.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The definition of Collective Bargaining can be interpreted in several ways. We advocate for a broader interpretation: In countries where trade unions exist but their agreements do not apply to a company, internal agreements covering working conditions should be considered "Collective Bargaining". ESRS S1 aims to protect employees, and this protection can be provided through agreements with both trade unions and Works Councils. We recommend to clarify the definition accordingly. A clear definition will lead to better cross-company comparability.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome, S1-5 as the basis for calculating certain quantitative metrics required by other DRs in this Standard. This helps to create transparancy and comparability. It should be no deviation in the KPIs from this (exception S1-9).	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We agree that EFRAG also declined to give guidance about whether interns, trainees or inactive employees must be included as this depends on the national legislation. But to increases the transparency and comprehensibility of the data the undertakings must explain the sope "total number of employe" in a qualitative way and had to give feedback which employees are included or not. In our opinion, the explanation of this applied scope is particularly also necessary due to pragraph 23g "in case of inconsistency between financial statement".	S1	S1-5 - Characteristics of the undertaking's employees	23 (g)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The defintion "For work-related accidents, the undertaking shall use the definition as per national laws of the countries where the employees are based." shall include the wording "recordable" as it only refers to the recordable definition but does not refer to the accident definition itself. If not, all accidents do not have the same scope and base and therefore are not comparable. Extended workload without any sense for all participants incoming.	S1	S1-13 - Health and Safety metrics	AR 27
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Number of fatalities from accidents and ill-health cases shall not be summed up as for accidents there are short term actions necessary and ill-health very long term or none actions. Also fatalities of external employees shall never be summed up with internal employees Since there are usually more fatal accidents among external than internal employees. Additonally external accidents do not result in necessary actions for a company internal processes as we dont have full responsibility on the measures. Especially for the reputation it is essential to differentiate between fatal incidents which we are not repsonsible for but has happened on our premises and incidents we are fully responsible for.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We agree that total number of non-employee only have to be reported, when they are significant driver of IROs. But it is not clear when this situation arises. The definition "key part of the undertaking's business model, for example when they are used to provide flexible labour or when they are used in key processes" is missing. Possible interpretation: If we would not use the non-employees model, the business could not be continued. We recommend to clarify the definition accordingly.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Reporting of the total number of non-employees should not be required (at first step) to prove that non-employees are a driver of IROs, if they make up a significant portion of own workforce. If this is the case, AR 14 would not be an advantage for the undertakings and would not make reporting easier.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We agree, the undertaking shall disclose the calculation methodology, data types and sources used as input. However, we recommend that a combination of "collected voluntary employee surveys and the information from mandatory disability quotas reported by the undertaking" be used for this. This also covers the nation legal definiton.	S1	S1-11 - Persons with disabilities	AR 23
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome it only to report data that can be lawfully collected and the recognition that disability status depends on national legal definition	S1	S1-11 - Persons with disabilities	AR 23
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome the eliminating of the requirement to disclose the types of employees that do not enjoy social protection.	S1	S1-10 - Social protection	34.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome the eleminating of retirement from the list of life events and changing 'parental leave' to 'maternity leave.	S1	S1-10 - Social protection	34.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome the move to NMIG in relation to the percentage of employees who have taken leave for family reason.	S1	S1-14 - Work-life balance metrics	42.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcom the reduction of non-employee reporting (all disclosures about non-employees were deleted except for the total number) due to data limitations.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We welcome the changes. It would be helpful to clarify whether fines, penalties and compensation for damages that are recognised during the current reporting year but relate to incidents disclosed under 46(a)(b) in the previous reporting year(s) also fall under 46c.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (c)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We do not support the removal of the "severity" concept from ESRS S1-16 § 46b). The previous focus on severe human rights incidents provided a clear and operational threshold for reporting, which enabled consistent and justifiable disclosures—such as the exclusion of non-severe cases from our 2024 reporting. Eliminating this threshold introduces ambiguity and would require us to define our own criteria for inclusion, particularly in areas like occupational safety or freedom of association. This increases complexity and audit effort while undermining comparability. For example, we are not classifying occupational safety issues as human rights violations under the LkSG framework, given our robust governance and preventive measures. We believe that fair and decision-useful reporting requires clear boundaries, and the removal of the severity filter undermines this principle.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	PwC International Limited	Auditor	United Kingdom			I agree	There are currently two different definitions of work-related accidents—one definition in ESRS S1 AR 27 and a separate definition in Annex II. We recommend the definition in ESRS S1 AR 27 is retained. In addition, the phrase 'work-related accidents' should be removed from ESRS S1 paragraph 40(e) because it is duplicative with the work-related injuries and work-related ill-health already included in ESRS S1 paragraph 40(e).	S1	S1-1 - Policies related to Own workforce	40.
Excels	PwC International Limited	Auditor	United Kingdom			I agree	ESRS S1 paragraph 44(a) and 44(b) refer to pay and remuneration, respectively. For pay there is no AR, but there is a definition in the glossary; ESRS S1 AR 36 lists components of remuneration. We believe the use of these two different terms and lack of clear definition may create confusion. We recommend that either the term 'pay' or 'remuneration' be used for both metrics and one definition is provided. ESRS S1 AR 36 on remuneration includes the "total fair value of all annual long-term incentives". In practice, there have been several questions related to these calculations and whether these amounts provide material information. There are questions in practice about whether this relates to the fair value at the reporting date, the fair value at the recognition date, or the fair value required by the accounting standards.	S1	S1-1 - Policies related to Own workforce	44.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S1 Own workforce when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	S1	S1 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary duplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	S1	S1 - Objective	5.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The statement about value chain workers does not belong to S1. The paragraph should be moved to S2.	S1	S1 - Objective	9.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The statement does not belong here and is inconsistent to all other topical standards. The paragraph should be deleted.	S1	S1 - Interaction with other ESRS	10.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The move of former §19./20. to ESRS 2 and the pooling of human rights policy commitments for all four social stakeholder groups make sense.	S1	S1-1 - Policies related to Own workforce	11.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	S1-1 paragraph 12 requires an undertaking to state whether its policies in relation to its own workforce explicitly address trafficking in human beings, forced labour or compulsory labour and child labour issues. This is usually related to overarching human rights policy and should be consolidated with ESRS 2 General Disclosure Requirement for policies GDR-P paragraph 35.	S1	S1-1 - Policies related to Own workforce	12.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The rewording of former paragraph 23 is clearer (safeguarding the health and safety / preventing occupational risk) and the moving of former paragraph 24 to NMIG is appreciated. However, we would appreciate more guidance on when the disclosure under paragraph 13 of S1-1 is required. In the NMIG's "Mapping of sub-topics to disclosures in topical standards", S1-1 has been mapped to 'any sub-topic' under all the S standards (S1, S2, S3 and S4). However, ESRS S1-1 paragraph 13 is specifically related to policies for safeguarding the health and safety of one's own workforce, and hence does not seem to be related to e.g. subtopics under S3 Affected communities. In general, despite the non-mandatory status, some guidance provided in the NMIG may cause more confusion than clarify for preparers. In view of the above example, we would appreciate EFRAG provide more clarifications on the use of the mapping provided in NMIG, and more broadly on circumstances where preparers have challenges applying the guidance in the NMIG.	S1	S1-1 - Policies related to Own workforce	13.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The amendment and consolidation of former §26. makes sense.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The move of former §27. to NMIG is appreciated.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The amendment and consolidation of former 32 (a) make sense.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We would like EFRAG to clarify how the tensions between actions and other business pressures should be disclosed.	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The amendment and consolidation make sense.	S1	S1-3 - Actions and Resources related to Own workforce	19.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	This is redundant to GDR-A. Delete.	S1	S1-3 - Actions and Resources related to Own workforce	AR 6
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	To align with the simplification approach, we suggest reformulating as follows: "if the undertaking engaged directly with its own workforce or workers' representatives for the purpose of target-setting and/or tracking performance against those targets, it shall disclose this fact when disclosing in accordance with [Draft] Amended ESRS 2 GDR-T". If not, we would like EFRAG to clarify on how the amendment results in simplification.	S1	S1-4 - Targets related to Own Workforce	21.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	ESRS S1 AR 8 does not seem to be methodological guidance or a presentation option, it reads more as optional guidance better suited for placement in NMIG. ARs should be easily applied to DRs in actual reporting.	S1	S1-4 - Targets related to Own Workforce	AR 8
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The removal of gender for non-guaranteed is a simplification.	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The removal of number of employees who have left is a simplification.	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We suggest to either: (1) maintain the previous formulation letting the undertaking decide which denominator to use or (2) require reference to the number of total employees as calculated for par. 23(a).	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes have enhanced clarity.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes have enhanced clarity.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The presentation of these percentages should also follow criteria based on occupational relevance.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	How would the percentage of representation be calculated if not divided by the total employee population (global)?	S1	S1-7 - Collective bargaining coverage and social dialogue	28. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The presentation of these percentages should also follow criteria based on occupational relevance.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The removal of age is a simplification.	S1	S1-8 - Diversity metrics	30.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We do not understand maintaining "unemployment" as the major life event. This is only covered by public programmes (so consistent it is for all companies in a same country), and it is complex for companies to collect related data. If we have to disclose the list of countries where employees lack protections for one or more major life event, it would be interesting to know for which of the four major life events the protection is not in place.	S1	S1-10 - Social protection	34.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We would like EFRAG to clarify why paternity leave was removed.	S1	S1-10 - Social protection	34. (d)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	As a starting point, we question the decision-usefulness of this information in the market and suggest potentially removing this datapoint from the S1 standard. The amendment that limits reporting to data that can be "lawfully collected" is sensible and addresses privacy constraints across jurisdictions. However, legal regimes often restrict not only collection but also the disclosure of sensitive data. To avoid creating pressure to publish data that cannot be released under local law, even if collected internally, the constraint should extend to lawful disclosure. Amend AR 23 to: "This DR requires the undertaking to report only data that can be lawfully collected and lawfully disclosed."	S1	S1-11 - Persons with disabilities	36.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The removal of gender is a simplification.	S1	S1-12 - Training and skills development metrics	38. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The removal of gender is a simplification.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The amended defintion of recordable work-related accidents in the glossary is not really clear. The first sentence makes it seem like the ill health is not necessarily work-related.	S1	S1-13 - Health and Safety metrics	39.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We suggest to align this DR with the new DR S1-6, meaning the disclosure of data regarding non-employees should be required only if such categories are material.	S1	S1-13 - Health and Safety metrics	40.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We would like EFRAG to clarify on how the amendment results in simplification.	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes have enhanced clarity.	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	AR 30 defines "days lost" on a calendar-day basis (including weekends and public holidays), which overstates time lost for five-day workers and reduces comparability with entities that measure only scheduled workdays. While EFRAG has improved the metric elsewhere (e.g., removing days lost to fatalities), the weekend counting issue remains unaddressed. Revise AR 30 to require scheduled working days as the basis and require the inclusion of weekends/holidays only if they form part of the individual's contracted schedule.	S1	S1-13 - Health and Safety metrics	AR 30
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The removal of gender is a simplification.	S1	S1-14 - Work-life balance metrics	41.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The removal of entitlement breakdown / gender is a simplification.	S1	S1-14 - Work-life balance metrics	42.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We agree with the changes.	S1	S1-14 - Work-life balance metrics	AR 31
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Paragraph 43 now refers to "the global … gap," which creates confusion. The goal remains to understand the gap in pay between women and men and Set 1 already required an unadjusted (aggregate) gender pay gap; adding "global" could lead to this requirement being misinterpreted. Edit paragraph 43: "to allow an understanding of any gap in pay between women and men among the undertaking's employees, and to provide insight into remuneration inequality." Keep the calculation text unchanged and place optional contextual disaggregation (e.g., by category or country) in NMIG.	S1	S1-15 - Remuneration metrics	43.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The definitions from the ESRS glossary and/or application requirements in relation to pay and annual total remuneration should be streamlined to avoid generating confusion in the identifcation of remuneration items to be considered. In particular: - the concept of pay includes basic salary and any other form of remueneration (including variable components) just like the definition of total annual remuneration - it is not clear why annual total remuneration is defined both in the application requirement and the glossary	S1	S1-15 - Remuneration metrics	AR 36
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	While we appreciate the addition of the definition for "Human rights incidents", the international frameworks referenced offers broad guidance and there is a lack of harmonized interpretation which could bring implementation challenges. We would like to understand what the new term "human rights incidents" covers and to have more clarity on the information that we will need to gather (in comparison with the number of the complaints previously) because this change to "incidents" from "complaints" and the removal of "severe" are not clear enough to understand what kind of data should be disclosed. The new ARs define the scope of "human rights incidents," introduce "substantiated" criteria (including types of proceedings) and add methodology and connectivity expectations. While clarifying, this package increases burden and could create an implicit expectation to explain omissions, contrary to the simplification intent, and may not apply evenly across undertakings with very different risk profiles and grievance systems. Move AR 37–AR 41 to NMIG as non-mandatory application guidance. Retain the DR in the Standard narrowly focused on reporting the number of substantiated incidents of discrimination and other human rights incidents and any related material fines, sanctions or compensation (with the 'substantiated' filter preserved).	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The concept of incidents and how to identify them is still unclear. Among Disclosure Requirements, Application Requirements and the Glossary there are several definitions of incidents and confirmed/substantiated incidents. We suggest the best approach would be having specific definitions for each case (e.g. human rights incidents, incidents of corruption and bribery, etc.) and presenting them under the related application requirements. Such definitions would then include detailed explanations of: a) the scope of the matter (e.g. "discrimination at work on the grounds of gender, racial or ethnic origin, nationality, religion or belief, disability, age, sexual orientation, or other relevant forms of discrimination, including harassment"); and b) the type of instances that trigger the reporting of the corresponding metrics (e.g. "judicial and non-judicial proceedings that have been initiated such as cases before domestic courts, mediation, complaints filed with the National Contact Points for OECD Multinational Enterprises"). In our view the best path to support simplification in relation to point (b) above would be to focus on incidents that have been confirmed through a final decision issued by a court of law or relevant authorities.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes have enhanced clarity.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes have enhanced clarity.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	It is not clear how the definition of human rights incidents in the ESRS Glossary is linked with AR 38. Are the examples presented in the AR the only possibile instances of substantiated incidents? If not, how is an undertaking supposed to identify other incidents relevant for this metric?	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Since other labor-related human rights each have different characteristics, child labour, forced labour, and privacy should be addressed separately.	S1	S1 - Objective	4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Comment: When applying the ESRS at the consolidated level—particularly when the ultimate parent company is located outside the EU—collecting gender-related data presents challenges. In certain jurisdictions, legal or cultural norms discourage or prohibit the collection or disclosure of gender identity information. Recommendation: Allow undertakings the flexibility to report the number of employees either by sex or by gender, depending on what is legally permissible in each jurisdiction.	S1	S1-5 - Characteristics of the undertaking's employees	5. (a)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Comment: When applying the ESRS at the consolidated level—particularly when the ultimate parent company is located outside the EU—collecting gender-related data presents challenges. In certain jurisdictions, legal or cultural norms discourage or prohibit the collection or disclosure of gender identity information. Recommendation: Allow undertakings the flexibility to report the number of employees either by sex or by gender, depending on what is legally permissible and culturally appropriate in each jurisdiction.	S1	S1-5 - Characteristics of the undertaking's employees	5. (b)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Comment: When applying the ESRS at the consolidated level—particularly when the ultimate parent company is located outside the EU—difficulty in standardizing the definition of safety and health management systems. Recommendation: Keep flexibility for companies to define their health and management system.	S1	S1-13 - Health and Safety metrics	13.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Original requirement (42): "The undertaking shall disclose the percentage of employees entitled to take family-related leave during the period." Suggested clarification: When applying the ESRS at the consolidated level—particularly where the ultimate parent company is located outside the EU—it is challenging to standardize definitions of family-related leave across jurisdictions. While it is generally feasible to report the percentage of employees who took family-related leave, identifying those merely entitled or who applied for such leave is significantly more complex due to varying local legal frameworks and HR systems. Recommendation: Allow undertakings to define "family-related leave" in accordance with local context and internal policies, and limit the disclosure requirement to the percentage of employees who actually took family-related leave during the reporting period.	S1	S1-14 - Work-life balance metrics	14.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We disagree as now the "tension" description becomes a "shall" criteria (initally, it was a "may" datapoint). The wording "where potentially / significant tension arise" should be added as otherwise it would counteract the intention to simplify the reporting requirements.	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The proposal introduces a new term, 'work-related accident,' which is not defined anywhere in the standard. This fundamental omission immediately introduces significant misleading ambiguity and confusion, leaving its precise meaning open to subjective interpretation by different undertakings and jurisdictions. Suggestion: Amend to: The objective of this DR is to allow an understanding of the coverage, quality and performance of the health and safety management system established to prevent work-related injuries, ill-health and fatalities.	S1	S1-13 - Health and Safety metrics	39.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The current absence of a clear, standardized definition for "work-related ill health" presents a critical vulnerability within the disclosure requirements. Suggestion: Add the comprehensive definition of "work-related ill health" to the annex or guidance notes, as per the previous version: "Work-related ill health can include acute, recurring, and chronic health problems caused or aggravated by work conditions or practices. These include musculoskeletal disorders, skin and respiratory diseases, malignant cancers, diseases caused by physical agents (for example, noise-induced hearing loss, vibration-caused diseases), and mental illnesses (for example, anxiety, post-traumatic stress disorder). For the purpose of the required disclosures, the undertaking shall, at a minimum, include in its disclosure those cases outlined in the ILO List of Occupational Diseases"	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The definition of "recordable work-related accidents" within the EFRAG proposal explicitly encompasses both work-related injury and ill-health. 1)Duplication and Misalignment with Simplification: If "recordable work-related accidents" includes ill-health, and there is also a separate requirement for "recordable work-related ill health" (40. (d)), this creates a direct duplication of reporting requirements. This redundancy contradicts the fundamental objective of simplification and streamlining data collection, leading to unnecessary complexity and potential inconsistencies in reported figures. 2) Data Collection Challenges for Non-Employees (Privacy Concerns): The most critical issue arises from the inclusion of ill-health, particularly for non-employees. While injury data for non-employees working on site is generally accessible (e.g., through incident reports), collecting detailed ill-health data for non-employees is exceptionally difficult, if not impossible, due to stringent data privacy regulations. In most countries, especially within the European Union, policies like GDPR severely restrict an undertaking's access to, and processing of, sensitive medical information for individuals not directly employed by them, adding a challenge that was already limited from 40. (d). Amend to: "the number and rate of recordable work-related injuries.	S1	S1-13 - Health and Safety metrics	40. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	ANNEX II to the [Draft] Amended ESRS Exposure Draft July 2025: This definition, rooted in OSHA criteria, introduces ambiguity through two critical flaws: 1)Loss of Consciousness as a Standalone Criterion The current framework treats all loss of consciousness incidents as recordable, regardless of causation (e.g., workplace hazards like chemical exposure vs. pre-existing conditions like epilepsy). This overinclusiveness distorts workplace safety metrics by conflating occupational and non-occupational factors. Further, severity variations (e.g. brief first-aid cases vs. multi-day absences) are unaddressed, preventing nuanced risk assessment. 2)Undefined "Significant Injury" The term "significant injury" lacks objective parameters, leading to inconsistent interpretation across medical professionals and jurisdictions. For example, a laceration requiring stitches might be deemed "significant" in one context but not another. This subjectivity undermines data harmonization and comparative analysis. Suggestion to delete: Deletion of "loss of consciousness" and "significant injury", remaining "Work-related injury or ill health that results in any of the following: death, days away from work, restricted work or transfer to another job, medical treatment beyond first aid or ill health diagnosed by a physician or other licensed healthcare professional, even if it does not result in death, days away from work, restricted work or job transfer, medical treatment beyond first aid"	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The definition of "recordable work-related accidents" within the EFRAG proposal explicitly encompasses both work-related injury and ill-health, and critically, it also includes fatalities. To emphasize and uphold the clear EFRAG decision regarding the deletion of 'days lost to fatalities' – a decision made due to the inherent lack of a robust and comparable methodology for such calculations – it is fundamental to sharpen the interpretation of this requirement. Therefore, while the term "recordable work-related accident" encompasses fatalities, the calculation of "days away from work" must be understood to apply solely to non-fatal incidents. Suggestion: Amend to: with regard to the undertaking's employees, the number of days away from work related to work-related injuries or work-related ill health	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The inherent diversity in national definitions for "work-related accidents" means that data collected from different countries within the same undertaking will not be directly comparable. This significantly complicates the ability to aggregate global health and safety data consistently, limiting an undertaking's capacity to gain a holistic and accurate view of its performance across all operations, and provide precise and reliable information essential for robust management of health and safety aspects, as expected by financial markets.. Therefore, suggestion of deletion of "work-related accidents, the undertaking shall use the definitions as per the national laws of the countries where the employees are based."	S1	S1-13 - Health and Safety metrics	AR 27
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	More clarity is needed here. What is the largest countries are not within Scope of CSRD reporting (e.g. outside of the EU). Additionally is the breakdown by gender for the entity responsible for filing the sustainability statement or for all employees across all operations, even those outside the EU?	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While the ESRS has stated that the purpose of these included data points is to enhance transparency for investors and stakeholders, it is reasonable that the ESRS should take into account the specific perspective and context that private companies operate in to make appropriate rules for reporting. This is one of those cases, as this data point requires the reporting of business sensitive information held by a privately-held company that is generally otherwise not subject to public disclosure. Further, neither the ISSB IFRS S1/S2 nor the SEC climate disclosure rules require this level of granularity on workforce data. To ensure interoperability, ESRS should align with global standards and avoid imposing unique EU-only burdens. For companies with limited EU operations, this datapoint may not be material to stakeholders or relevant to sustainability impacts, and requiring disclosure would create an undue and inconsistent burden from that presented by other disclosure requirements. The ESRS should allow materiality-based exemptions or simplified reporting for non-EU companies.	S1	S1-5 - Characteristics of the undertaking's employees	22.
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is questionable what added value is provided by this data point vis-a-vis the costs associated with gathering and processing the data, as it provides minimial additional value for investors and stakeholders when the responding entity is a private company. At a minimum, given the variation in sizes in responding companies, the data point should be modified to reflect the share of incidents in relation to the total number of employees rather than as a gross value to make the response comparable between differently sized businesses. Further, given that OSHA (US) and ISO 45001 use specific definitions for "recordable incidents," "lost time," and "fatalities," the definitions included in the ESRS should be aligned whenever possible so as to avoid creating double reporting burdens and inconsistencies for companies already complying with OSHA or ISO frameworks.	S1	S1-13 - Health and Safety metrics	39.
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Given that this data point requires the reporting of business sensitive information held by a privately-held company that is generally otherwise not subject to public disclosure, it appears to undercut ESRS's stated purpose of including these data points in order to enhance transparency for investors and stakeholders. Further, since this disclosure requirement has been included to support the information needs of financial market participants subject to Regulation (EU) 2019/2088, it is not relevant in the context of private companies, and therefore should be excluded or at least caveated to exclude private companies. Further, disclosing the highest-paid individual's remuneration can breach confidentiality and data protection laws, especially in jurisdictions like the US where executive pay disclosure is not mandatory for private companies. For small entities or subsidiaries, this metric could identify individuals, creating GDPR and local privacy compliance issues. Also, neither ISSB IFRS S1/S2 nor SEC climate disclosure rules require this ratio. While GRI 2-21 includes a similar metric, it does not mandate country-level or entity-level disclosure, and it allows flexibility in methodology. ESRS should avoid creating EU-only requirements that undermine interoperability.	S1	S1-15 - Remuneration metrics	44. (b)

Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This data point presents multiple issues: 1- The definition of a grievance can be quite broad and employees are often raising human rights grievances while being performance managed or exited to lift their severance entitlements. Quantifying what amounts to report is very ambiguous and does not adequately capture human rights grievances vs. just severance payments to exit an employee. 2- The requirement for a reconciliation, given the ambiguous and broad nature of financial data requested, opens the door for an unreasonably broad disclosure of financial data from a private company unrelated to human rights violations or work-related incidents. 3- It is possible that data will not be specifically tracked as it relates to compensation for human rights violations or employee grievances. Aggregating that data presents an unduly burdensome reporting obligation with no clear connection to any double materiality obligation .4- Compensation for employee grievances and work-related incidents are typically subject to confidentiality agreements. Public disclosure of this compensation would violate these agreement as well as raise privacy concerns. 5- It would be preferable to set the reporting requirement at a "rate per 100 FTE employees" to align with separate employee incident reporting obligations.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (c)
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The added mandatory requirements (reference to materials impacts, risk and opportunities) could potentially increase the reporting complexity	S1	S1-1 - Policies related to Own workforce	12.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Same as above	S1	S1-1 - Policies related to Own workforce	13.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The amendments to the requirements on how a company engages with its own workforce streamlined the process	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The requirement of disclosing actions to mitigate or remediate material negative impacts on the workforce is now streamlined, but more clarity is needed for the wording "key actions"	S1	S1-3 - Actions and Resources related to Own workforce	19.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The requirement now makes the detail level of information to disclose	S1	S1-3 - Actions and Resources related to Own workforce	AR 8
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Evaluating differently the top management level only creates more disalignment. In the initial ESRS, this requirement was for both top management and employees.	S1	S1-8 - Diversity metrics	29.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The qualifier "severe" in human rights disclosures should be maintained because it provides a clear threshold that focuses reporting on the most significant and material impacts. Removing the concept of severity broadens the scope excessively, obliging companies to report on every minor or hypothetical issue, which dilutes attention from genuinely serious human rights risks and undermines comparability across companies. The concept of severity is well-established in international human rights frameworks such as the UN Guiding Principles and the OECD Guidelines, ensuring alignment with globally recognized due diligence standards. Keeping the severity threshold helps companies prioritize the most critical risks, enhances the usefulness of disclosures for stakeholders, and avoids unnecessary reporting burden on less material issues.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	A clarification of this update would be welcome. Review of S1-23 (a) in conjunction with AR11 suggests that there are two separate metrics. For example: (a) the total number of employees by head count and breakdowns by gender [AR11 - Table 1] and by country for the countries in which the undertaking has 50 or more employees and that are the ten largest countries in terms of employee numbers [AR11 - Table 2]. Is the intent for S1-23(a) to limit the threshold of disclosure to only the countries in which the undertaking has 50 or more employees and that are the ten largest countries in terms of employee numbers? For example, would AR11 - Table 1 be limited to the number of employees for the countries in which the undertaking has 50 or more employees and that are the ten largest countries in terms of employee numbers, or would AR11 - Table 1 be represented of the total number of employees for the undertaking?"	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	A clarification of this data point would be welcome: 1-23. (a) asks for data related to the top 10 countries as far as employment; 1-23 (b) should be limited in the same way or the data will be confusing, and it will create a lot of added work.	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	A clarification of this data point would be welcome: 1-23. (a) asks for data related to the top 10 countries as far as employment; 1-23 (c) should be limited in the same way or the data will be confusing, and it will create a lot of added work.	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	1-23. (d) should be deleted as it is inevitable that financial statements, on a consolidated basis, will be different than our 10 top country headcounts.	S1	S1-5 - Characteristics of the undertaking's employees	23. (d)
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please clarify this data point. 1-25 should be similarly limited to the top 10 countries as far as employment;or the number of non-employees could look a lot larger than employees noted in 1-23(a).	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The revised methodology in ESRS S1 AR 22 introduces a hierarchy for calculating adequate wages outside the EU, drawing on the ILO's 2024 agreement on wage policies. While this alignment with international standards is welcome, concerns remain regarding the risk of underreporting, hierarchy limitations, and lack of disclosure clarity.	S1	S1-9 - Adequate wages	22.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree	S1	S1-13 - Health and Safety metrics	13.

Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	AR 87: agree with the deletion	S1	S1-13 - Health and Safety metrics	13.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	AR 88: agree with the deletion	S1	S1-13 - Health and Safety metrics	13.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR 27 and AR 89: Disagree with the first sentence (a common definition for multinational organisations is needed to have a comparable dataset); and with the following paragraph: term injuries is easier to track as there are different definitions for accidents.	S1	S1-13 - Health and Safety metrics	AR 27
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	General comment: inconsistent use of accidents vs injury, it is not clear what is meant by the use of the term accident.	S1	S1-13 - Health and Safety metrics	13.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree	S1	S1-13 - Health and Safety metrics	AR 29
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree	S1	S1-13 - Health and Safety metrics	AR 30
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	Disagree	S1	S1-13 - Health and Safety metrics	AR 28
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	AR 92: Disagree	S1	S1-13 - Health and Safety metrics	13.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	AR in general: Suggestion: Use and link to GRI 403 Standards to ensure that basic requirements are met.	S1	S1-13 - Health and Safety metrics	13.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	It is strongly recommended that EFRAG allows companies operating in the EU to report pay gaps in accordance with the EU Pay Transparency Directive, as transposed into national legislation. Requiring alternative methodologies, particularly for entities reporting on a consolidated basis, introduces undue complexity, legal uncertainty, and increases the risk of inconsistent or misleading disclosures. Given the significant variation in wage definitions and reporting frameworks across jurisdictions, a uniform approach is neither practical nor appropriate. Alignment with existing legal obligations should be prioritized to ensure clarity, efficiency, and reliability in reporting. Furthermore, to promote regulatory coherence and minimize duplication, EFRAG should explicitly allow the use of CEO pay ratio disclosures already mandated under U.S. SEC requirements. Where the CEO is the highest-paid executive, companies should be permitted to interpret the 'highest-paid individual' in ESRS S1-15 accordingly. This clarification is essential to support interoperability, reduce compliance burden, and enhance comparability across global reporting regimes.	S1	S1-15 - Remuneration metrics	15. (b)
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	See our response to the questionnaire : Companies do not agree with the new definition of the treshold for reporting metrics disaggregated at Country Level	S1	S1-5 - Characteristics of the undertaking's employees	AR 9

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Non-employees are not part of the company's own workforce by principle ; by consequence they are not recorded in the social data information systems of companies : that makes it impossible to disclose information on this category of workers. The notion of "non employees being a key part of the undertaking's business model" will open the door to interpratation and endless discussions with auditors. We continue to ask for deletion of this DR	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	14.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Companies prefer to return to the previously proposed definition of the threshold for all DR. Outside the EEA, companies do not understand what a region is (which countries are included in a region ?) and prefer to report on countries where they have significant employment only.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 16
Excels	Afep	Business association (other than association of financial institution)	France			I agree	The term 'diversity' does not correspond to the indicator, which only measures gender distribution	S1	S1-8 - Diversity metrics	AR 19
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	We still consider it irrelevant and very complicated to publish information outside the EU ; however in the AR 22 we believe outside the EU, it is entirely appropriate to compare the lowest wages in the company with the statutory minimum wage established by legislation or collective bargaining; and where these do not exist, to use the benchmarks developed by the ILO – a tripartite international organisation – on living wage estimates rather than resorting to consultants or private organisations.	S1	S1-9 - Adequate wages	AR 20
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	The two-year review frequency does not depend on companies and should be abolished.	S1	S1-9 - Adequate wages	AR 22
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The number of life events covered remains very broad and should focus only on (i)sickness (ii) employment injury. Other items depend heavily on jurisdictional factors with limited company involvement (e.g., unemployment) or are already covered elsewhere in the standard (e.g., maternity leave overlaps with S1-14). The DR requires disclosure by country, with cumulative consideration of the risks listed: are countries listed rather than risks? If a single risk is not covered, the country is 'disqualified'? This DR shall limit disclosure to significant employment countries, applying the old threshold, and allow for refinement based on the risks covered	S1	S1-10 - Social protection	14.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	This data is very difficult to aggregate at group level. Definitions vary from one country to another. The company cannot collect individual data. The data is aggregated at country level, so it cannot be verified, which will complicate the audit.	S1	S1-11 - Persons with disabilities	AR 23
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	To be relevant this disclosure should be based on the number of employees eligible for training and appraisal interviews, rather than the total number of employees.	S1	S1-12 - Training and skills development metrics	AR 24
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	The amount of information to be disclosed is too detailed and redundant; the number of cases of recordable work related ill health and the number of days lost to work related injuries shall be removed. The publication of all these indicators shall be limited to employees and to countries where the undertaking has a significant workforce.	S1	S1-13 - Health and Safety metrics	AR 26
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	This disclosure will require a lot of work and is of little interest: it merely lists the existence of leave for family reasons, whether provided for by law or by a collective agreement.	S1	S1-14 - Work-life balance metrics	AR 31
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	With regard to remuneration, whether it be the pay gap or the ratio (S1-15), companies question the value of unadjusted indicators that do not provide any useful information and which, if reproduced without contextual explanation, may contribute to damaging their reputation. The adjusted pay gap is the only metric that directly measures compliance with the principle of "equal pay for equal work or work of equal value."	S1	S1-15 - Remuneration metrics	AR 33
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	The same remuneration elements should be provided for both indicators – why is only the ratio (AR36) detailed and not AR 35? The requirements for collecting data on the pay ratio are too burdensome, and we would be in favor of aligning its calculation basis with that of the gender pay gap, which is simpler and more realistic for large global groups.	S1	S1-15 - Remuneration metrics	AR 35
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Interns and work-study students shall be excluded, and only the company's own workforce should be targeted. Benefits in kind will be very difficult to isolate and aggregate.	S1	S1-15 - Remuneration metrics	AR 36
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Our requests for amendments have not been taken into account; the definition of incident of discrimination is still too broad. It shall be limited to proven and dealt with incidents, i.e. those that have resulted in a final court decision.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 37
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Regarding penalties: what period should be taken into account? There is inevitably a time lag between the incident and any penalty. A financial materiality threshold should be introduced	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 41
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Point (d) should be clarified, in particular what this means in practice and whether the reference to 23 (a) relates to the total number of employees or whether a geographical split should be considered.	S1	S1-5 - Characteristics of the undertaking's employees	23. (d)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	Additional flexbility should be provided by allowing companies to breakdown the data at the most appropriate level from the perspective of the company itself, i.e. its mode of operations, considering the unique and specific circumstances by each company (e.g., disaggregate the information per country, market, region or group of countries).	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	The focus of the requirements is on transparency about the volume of concerns being raised within an organization, rather than only reporting incidents where wrongdoing was ultimately proven. This approach allows stakeholders insight into the extent of workplace issues being surfaced, which is valuable information for assessing organizational culture and management effectiveness. We suggest deleting the AR and maintaining the requirement (DR 46(a)) to report the total number of discrimination and harassment incidents that were raised during the reporting period, regardless of whether subsequent investigations confirmed, substantiated or dismissed those allegations.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	(Part 1): The definition and handling of "non-employees" is a significant challenge and not precise enough. The definitions are not workable and does not capture the development in the labour market (including discussion on whether it's labour or a service that is being delivered) The reliance on the suppliers NACE-code is not practical as this is not something that is logged in the ERP-systems and often quite arbitrary and linked to the historic establishment of the business. Two identical suppliers can belong to different NACE-codes, and hence their services would be accounted for differently. Most ERP-systems does not capture the numbers, partly because defining and gathering the data is very difficult. There may exist "proxies", like "# of deliveries" or similar accounting trails, but they are not standardised or uniform. We believe the definition should exclude all individuals already counted as "employees", even though some of these are technically "non-employees" but are handled as employees for practical reasons. This will ensure consistency to the financial statements.	S1	S1 - Objective	7.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	(Part 2): We believe that "Non-employees" can never be regarded as part of an entity's own workforce from a financial or strategic perspective. From an operational and workforce planning perspective, it makes sense to include the non-employees. The premise for reporting is a clear distinction between the two and ensure consistency in the Annuel Report i.e. financial FTE is based on "people" who are in an employment relationship with the undertaking only and does not include non-employees. We believe the only solution is to delete ESRS S1, paragraph 25, (disclose the number of non-employees) and instead put more emphasis on the narratives as we suggest in the comments to ESRS S1, paragraph 24. This also makes sense as to consistency to the other elements in S1, where employee statistics are only required for employees.	S1	S1 - Objective	7.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	The definition of "self-employed" is extremely difficult to navigate in practise. There are so many borderline definitions between being "self-employed" or "employed" and whether the work performed is in reality a delivery of service. We also believe that the current change in the dynamics of the labour market - for instance the shift in marketing from formal agencies to broader use of influencers – is making the traditional definitions very difficult to navigate. If removing the requirement in ESRS S1, paragraph -25, and place more emphasis on the narrative part as well as clearly outlining the materiality element, then we may be able to work with the current definition. If ESRS S1, paragraph 25, is retained, then a much more narrow and precise definition of ESRS S1, paragraph -8, needs to be developed.	S1	S1 - Objective	8.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree The amendment made is not just clarifying timeframe. An important word 'whether' is proposed deleted. As some entities might not engage directly with its own workforce or worker's representatives, whether can't be deleted as it is difficult to disclose on a SHALL, if the DR does not apply. In ESRS-S1-15a, the amendment made is not just editorial. Applicable needs to stay in the sentence. Similar in ESRS-S1-15b "applicable" is proposed deleted. Applicable needs to stay in the sentence.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree We believe additional reporting obligations have been added with the following addition: "In particular, it shall state whether it has grievance mechanism3. It shall also explain how it assesses the effectiveness of these channels." We believe this is added as it was not previously a "shall" requirement and should consequentially be removed as a "shall" requirement.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	16.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We suggest deleting ESRS-S1-19 We believe the content of this DR is already covered by ESRS-S1-18 The content in 19a could be part of the NMIG-document, but we suggest to delete 19 as it from our perspective only add complexity thereby increasing the reporting obligations and compliance without adding essential reporting requirements not already covered by ESRS-S1-18 – if material.	S1	S1-3 - Actions and Resources related to Own workforce	19.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We suggest deleting ESRS-S1-21 We believe the content of this DR is already covered by ESRS-S1-20 as well as the other requirements around stakeholder engagement. The content in 21 could be part of the NMBIGNBMIGNMIGNMIGNMIG-document, but we suggest deleting this as an DR as it from our perspective only add complexity.	S1	S1-4 - Targets related to Own Workforce	21.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	Please refer to our answer for Q27 in part 2. In addition to this we note that the requirement in ESRS-S1-27c refers to regions when being outside the EEA, which for annual reporting context makes more sense than individual countries. We believe this needs to be harmonised – referring to regions – or similar relevant aggregation for the reporting entity.	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree We do not agree with the first sentence in the AR "The undertaking shall present the requested disclosures either in a narrative format or in the following tabular formats…" We agree that the information can be provided both in a narrative way as well as in a tabular format, but we do not agree with mandating the specific tabular format no limiting the use of other presentation formats, like graphs. We believe the tabular format should be only an example, located in the NMIG.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree We do not agree with the first sentence in the AR "The undertaking shall present the requested disclosures either in a narrative format or in the following tabular formats…" We agree that the information can be provided both in a narrative way as well as in a tabular format, but we do not agree with mandating the specific tabular format no limiting the use of other presentation formats, like graphs. We believe the tabular format should be only an example, located in the NMIG.	S1	S1-5 - Characteristics of the undertaking's employees	AR 12

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree We believe the first sentence of AR 14 needs to be included directly in the DR to avoid misunderstanding as it is a very important materiality filer. More emphasis should be placed on the narrative element, including the description about the critical/key parts of the business model/business functions that are performed by non-employees. This description will naturally depend on the facts and circumstances of the individual reporting entity, but would naturally touch on the types of services/functions performed. The description could also cover for instance coverage of H&S-policies etc..	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We believe the requirement to disclose the total number of non-employees should be deleted. As stated in our comments to ESRS S1, paragraph 7, we believe the requirement to disclose a number should be removed. We believe that the narrative elements in ESES-S1-24 should provide the relevant information needed, but we could encourage the inclusion of relevant proxies to support/quantify the explanations (for instance # of deliveries or percentage of deliveries). If retained, the materiality threshold in AR 14 needs to included. Furthermore, "non-employees" reported as part of "employees" in the financial statements (see our comment on ESRS-S1-7) should be excluded.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree We believe the reference should be to ESRS-S1-24, not 25. We further believe that the AR should be more neutral in the language as it focusses primarily on the potential, negative impacts while disregarding for instance flexibility. The AR should cover our comments on ESRS S1, paragraph 24.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree Please refer to our answer for Q27 in part 2 – opposing the change in 27b as it refers to "top ten". In addition to this we note that the requirement in ESRS-S1-27c refers to regions when being outside the EEA, which for annual reporting context makes more sense than individual countries. We believe this needs to be harmonised – referring to regions – or similar relevant aggregation for the reporting entity	S1	S1-7 - Collective bargaining coverage and social dialogue	27.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree We do not agree with the first sentence in the AR "The undertaking shall present the requested disclosures either in a narrative format or following the table below ..." We agree that the information can be provided both in a narrative way as well as in a tabular format, but we do not agree with mandating the specific tabular format no limiting the use of other presentation formats, like graphs. We believe the tabular format should be only an example, located in the NMIG.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	Regarding ESRS S1, paragraph 38b, we suggest that EFRAG carefully reconsiders the need for this, and if so, then how this can be measured in practice and become "decision useful" The average number of training hours per employee is very difficult to calculate in practice for a modern workplace. We are concerned about whether this could be anything other than an estimate, as training in a modern workplace consist of 1) formal training, 2) informal training, 3) on the job training, 4) coaching & mentoring, 5) microlearning and 6) social & collaborative learning. Of which 5 out of 6 is not necessarily recorded, and the last (formal training), the hours are most often not recorded. Strong definitions as to expectations to what is included and how entities are expected to do complete reporting is needed in order to make the DR decision useful.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree We note that the inconsistency between 44 (a) and 44 (b) is not proposed amended. We also understand that the current definitions originate from other EU-regulation as they are PAI-indicators. We propose that EFRAG secures consistency between the calculation of gender pay gap (average pay level) and total remuneration ratio (median annual). Our preference is to use average for both calculations, following how financial reporting would normally deal with assessing aggregated impact and budgeting. In achieving the consistency, we believe this also needs to be accompanied by a suggestion to the EU-Commission on how to ensure consistency with the other EU-legislation, based on the EFRAG proposal achieving this consistency. It is important that the inconsistency is amended both in the EFRAG disclosures as well as the corresponding legislations in order to ensure the infrastructure of information remains in place.	S1	S1-15 - Remuneration metrics	44.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree ESRS S1, paragraph 46a, refers to "own workforce", which includes "non-employees". In most instances, It does not make sense, that an entity is made responsible for disclosing non-employee incidents of discrimination, as these would be registered with the legal structure for that non-employee and not with the entity. This also impacts 46b+c, as the entity would not be the receiver of such fines. In most of these situations, "non-employees" are more aligned with the generics of "workers in the value chain" and not aligned with own employees.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The revised ESRS S1 does not take into account the possibility of joint operations where one party is responsible for the health & safety of the people. For example, in Oil & Gas a joint operation may be created with one party being the 'operator', with the operator taking ownership of the health & safety of employees and applying its own H&S policies and methods. ESRS E1 includes the idea of operational control, however it is not clear how this concept could in general apply to joint operations.	S1	S1 - Objective	7.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The requirement is not clear - what does not apply if a sub-topic is material? How do the two requirements work together (if the topic is material and specific sub-topics also material)? NB also the note on p10 NMIG on own workforce/human rights which is not understandable but is important guidance that clearly relates to S1:3.	S1	S1 - Objective	3.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	It is not clear how AR1 relates to paragraph 11. Paragraph 11 makes no mention of communication of policies. AR1 is repurposed from Set 1 AR 14 which is clearer in setting out communication of policy as an additional consideration for the disclosure ('The undertaking may provide an illustration of the types of communication of its policies to those individuals, group of individuals or entities for whom they are relevant...'). The revised text does not make sense - communication of the policy is clearly a different disclosure. It might be useful to users, but it should not be stated as a consideration for paragraph 11 - if disclosure of communication is needed to fulfil the DR then this shoud be specified in the DR.	S1	S1-1 - Policies related to Own workforce	AR 1
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to AR 2- AR 5 The content is useful but it is all 'may' guidance. Consider whether it is all needed in the standard or some or all could be moved to NMIG if it is not mandatory.	S1	S1-1 - Policies related to Own workforce	AR 2
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We understand from practice that the removed AR6-AR10 were very helpful and valuable pieces of guidance in helping to provide undertakings with examples of how to think about the impacts on their own workforce and interaction with other concepts such as strategy, just transition, climate change etc. AR 83-AR88 are also useful on how to look at classification of injuries/ill-health. We suggest adding these to the NMIG as non-mandatory considerations.	S1	S1-3 - Actions and Resources related to Own workforce	AR 6
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The undertaking's method for compiling employee data (for example, at the end of the reporting year or average) may provide contextual information.' Is this truly a 'may' or does this need to be a 'shall' requirement?	S1	S1-5 - Characteristics of the undertaking's employees	AR 10
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The amended wording states ': for the purpose of target setting and /or tracking performance against those targets'. This does not seem to cover the same requirement as in the current S1:47 which states directly that tracking of the undertaking's performance shall be disclosed. The amended wording doesn't specify that tracking performance needs to be disclosed as it is simply phrased as a purpose of target setting.	S1	S1-4 - Targets related to Own Workforce	21.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Existing ESRS S1:24 on policies related to discrimintation has been deleted and moved to NMIG without explanation as to why. Policies relating to discrimination could be important in this context. There do not seem to be any other requirements which cover this instead in the amended ESRS S1.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	24.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The undertaking shall disclose the total number of non-employees in the undertaking's own workforce': it should be clarified whether the data should be provided as headcount or FTE (as for S1-6).	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Not needed - ESRS 1 already sets out the principle.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 15
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	As drafted this paragraph requires the use of a highly significant judgement for both the entity and the auditor as to determine whether there is a lack of social protection. In addition restricting disclosures to instances of lack of social protection is in practice a 'net' approach in assessing the materiality of information which is not consistent with the overall approach set out in ESRS 1. Should EFRAG not change this proposal, it is necessary to provide an auditable framework that defines social protection - and the lack of - for example by reference to an international framework such as ILO. We suggest retaining the reference to 'parental leave,' or replacing it with 'family-related leave', as defined in the glossary to include paternity leave, parental leave, and carers' leave.	S1	S1-10 - Social protection	34.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Editorial: "(AR 76 amended) In accordance with GDR-T paragraph 41(a), ..." Should it not be GDR-M?	S1	S1-11 - Persons with disabilities	AR 23
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to: 46(a)(b) and AR 38 (See also separate entry on current/prior year and substantiated instances). 'Incidents referred to in paragraph 46(a)(b) include the number of substantiated instances of: ...' What is the definition of 'substantiated instances' in the ESRS? It is currently not defined. The Basis for Conclusions explains that 'substantiated instances' imply the need for incidents to be supported by verifiable and objective evidence. This appears to conflict with 46 (a) and (b), which refer to 'judicial and non-judicial proceedings that have been initiated' and 'incidents registered'. We recommend a definition or example of substantiated instance is provided (if a matter has been logged, is that an indication of being substantiated, or does it relate to the initiation of formal proceedings etc?).	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to: 46(a)(b) AR 38 Linked to our separate comment on 'substantiated instances': ESRS S1: 46(a) refers to 'initiated" which we assume means that it can be an initial claim rather than being a ruling that concludes on the validity of claims. What happens if the reported incident eventually comes out as being not an incident - for example, a court ruling in the current reporting period for an incident arising in the prior year, which is now concluded to be non-substantiated, should an undertaking include this in the 2025 number as a negative or restate the 2024 numbers as at that time it was considered substantiated? Does the number of incidents refer to all incidents registered (i.e., irrespective of categorisation as unsubstantiated, partially substantiated, or substantiated), or only substantiated incidents? EFRAG Q&A ID 550 – 'Disclosure of discrimination/harassment incidents found inconclusive' clarified that the requirement refers to 'registered' incidents, i.e., incidents registered, irrespective of categorisation as unsubstantiated, partially substantiated, or substantiated. However, this referenced AR103, which is deleted in the revised ESRS. AR38 says that 'incidents referred to in paragraphs 46(a)(b) include the number substantiated incidents'. The word 'include' may not be sufficiently prescriptive to state that 46(a) only requires substantiated incidents.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Also reference to: AR38 (AR103 deleted) Consideration should be given to aligning the 2023/2772/EU Annex II definition of 'Incident' and 'Work-related incident' so that both or neither refer to 'registered'. Currently, the Annex II 'Incident' definition refers to 'registered', whereas 'Work-related incident' makes no reference to 'registered'.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG We understand this paragraph to mean that a reporting requirement is being introduced regardless of the materiality analysis. The Undertaking should only be required to disclose information if the relevant topics have been identified as material. In addition, these reporting requirements should be included in the disclosure requirements themselves and not in the objective.	S1	S1 - Objective	3.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG An undertaking's own workforce includes (i) people who are in an employment relationship with the undertaking ('employees') and (ii) people who, for the purposes of ESRS reporting, are called non-employeesin the undertaking's own workforce. The latter comprise people with contracts with the undertaking to supply labour ('self-employed people'). Contractors should not be included in the reporting requirements for metrics in ESRS S1, as they are not employees and the reporting undertaking has less or no influence over the ESRS S1 reporting topics with regard to contractors. Since most of the metrics in ESRS S1 are aimed at 'employees', this approach should be maintained. The few metrics that are aimed at 'non-employees' appear to be appropriate. Nevertheless, the definition of 'non-employees' should be further refined to enable a clear distinction to be made between 'employees' and 'workers in the value chain'.	S1	S1 - Objective	8.
Excels	DRSC	(National) standard setter	Germany			I disagree	The added value of this requirement is not apparent, as the information in the sustainability report should be consistent anyway. Either the exact interaction referred to should be clarified, or this paragraph should be deleted.	S1	S1 - Interaction with other ESRS	10.
Excels	DRSC	(National) standard setter	Germany			I disagree	NMIG 3 for para. 11 Communication channels were removed from MDR-Ps, why bringing them up here introducing additional requirements (even as "possible elements")? If the guidelines on how to disclose information on policies are not streamlined in ESRS 2, this will lead to different way of presentation across the standards. Possible solution: streamline in ESRS 2 or eliminate completely.	S1	S1-1 - Policies related to Own workforce	11.
Excels	DRSC	(National) standard setter	Germany			I disagree	NMIG xyz for para. xyz The NMIG could include a statement that policies could address the core principles of the International Labour Organisation.	S1	S1 - Interaction with other ESRS	11.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG The Undertaking should only be required to disclose information about policies if the topics listed here have been identified as material. Suggestion: Remove "explicitly express" from this paragraph.	S1	S1-1 - Policies related to Own workforce	12.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORAL There is an inconsistency between the Log of Amendments and the exposure draft. The Log of Amendments refers to 'child labour issues', while the exposure draft only refers to 'child labour'.	S1	S1-1 - Policies related to Own workforce	12.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG The Undertaking should only be required to disclose information about policies if the topics listed here have been identified as material. It should therefore be made clearer that only material disclosures are required. Currently, the paragraph could be interpreted to mean that such information must always be disclosed.	S1	S1-1 - Policies related to Own workforce	13.
Excels	DRSC	(National) standard setter	Germany			I disagree	ESRS S1.19a is a duplication of ESRS S1.18. This may simply be a clarification regarding "key actions" in relation to "material negative impacts".	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	Duplicate to ESRS 2 GDR-T or GDR-M.	S1	S1-3 - Actions and Resources related to Own workforce	19. (b)
Excels	DRSC	(National) standard setter	Germany			I disagree	Suggestion: replace with "confirmed incidents of non-respect of adequate wages".	S1	S1-9 - Adequate wages	32.
Excels	DRSC	(National) standard setter	Germany			I disagree	It is recommended that AR 22(b)(i) employ the term 'collective agreement' rather than 'collective bargaining agreement', in order to ensure consistency with Article 3(4) of Directive (EU) 2022/2041.	S1	S1-9 - Adequate wages	AR 22
Excels	DRSC	(National) standard setter	Germany			I disagree	This disclosure requirement is subject to the new transitional provisions of the delegated act on the quick fix (C(2025) 4812 final). As there is limited experience with these disclosure requirements in relation to metrics, the related disclosures should not be required until a comprehensive field test has been conducted. The field test should be intended in particular to determine what information is useful to users of the information. Information that relates to compliance with legal requirements appears to be of little value to users of the information. PATs should still be reported, if the topic is material.	S1	S1-10 - Social protection	34.
Excels	DRSC	(National) standard setter	Germany			I disagree	A country-specific overview should not be required. Qualitative information on the countries in which social protection is provided beyond the statutory requirements is preferable to a country-specific overview. PATs should still be reported, if the topic is material. If a country-specific overview is required, the EU Commission or EFRAG should issue an overview of social protection worldwide so that individual undertakings do not have to prepare such an overview themselves.	S1	S1-10 - Social protection	34.
Excels	DRSC	(National) standard setter	Germany			I disagree	This disclosure requirement is subject to the new transitional provisions of the delegated act on the quick fix (C(2025) 4812 final). As there is limited experience with these disclosure requirements in relation to metrics, the related disclosures should not be required until a comprehensive field test has been conducted. Voluntary reporting should be possible. The field test should be intended in particular to determine what information is useful to users of the information. PATs should still be reported, if the topic is material.	S1	S1-11 - Persons with disabilities	36.
Excels	DRSC	(National) standard setter	Germany			I disagree	Better than "regular performance and career development reviews" would be "formalized performance and career development reviews".	S1	S1-12 - Training and skills development metrics	38. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG This disclosure requirement distinguishes between work-related a) injuries, b) accidents, c) ill health and d) fatalities. However, much of the information requested is difficult or impossible to collect. Work-related ill health could, for example, only become apparent decades after the end of employment, or the proportion of work contributing to the illness is uncertain, which is why the reporting undertaking has no knowledge of such circumstances. Furthermore, due to data protection regulations, reporting entities do not know whether an employee is absent due to a) injury or b) ill health.Therefore, only information on a) injuries, b) accidents, c) ill health and d) fatalities that are 'subject to other legal recording and reporting requirements' should be reported.	S1	S1-13 - Health and Safety metrics	40.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	This DR contains the term "recordable" in various passages. There is also a new entry in the glossary for "recordable work-related accidents". However, there is no adequate definition of what is meant by the term "recordable". "Recordable" generally covers all possible circumstances, as they can all be documented. However, it should only refer to circumstances that are "subject to recording". The new glossary term "recordable work-related accidents include both work-related injury or ill health that results in any of the following ...". At the same time, ED S1-13(40)(e) stipulates: "The undertaking shall disclose the following information ...: with regard to the undertaking's employees, the number of days lost to work-related injuries, recordable work-related accidents and work-related ill health." However, if reportable work-related accidents are understood to encompass both work-related injuries and work-related ill health, then the number of days lost to work-related injuries and to work-related ill health should, in principle, add up to the total number of days lost to work-related accidents. To avoid inconsistent reporting, the standard should clarify this relationship explicitly.	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	DRSC	(National) standard setter	Germany			I disagree	This disclosure requirement is subject to the new transitional provisions of the delegated act on the quick fix (C(2025) 4812 final). As there is limited experience with these disclosure requirements in relation to metrics, the related disclosures should not be required until a comprehensive field test has been conducted. The field test should be intended in particular to determine what information is useful to users of the information. Information that relates to compliance with legal requirements appears to be of little value to users of the information. PATs should still be reported, if the topic is material.	S1	S1-14 - Work-life balance metrics	42.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Suggestion: Insert "reporting" before "period" to be consistent with other requirements	S1	S1-14 - Work-life balance metrics	42.
Excels	DRSC	(National) standard setter	Germany			I disagree	Undertakings should have the option of using the median or the average for the calculation. Using the average for the calculation would simplify data collection.	S1	S1-15 - Remuneration metrics	44. (b)
Excels	DRSC	(National) standard setter	Germany			I disagree	"Substantiated incidents" should already be mentioned in the paragraphs and not only in the Application Requirements.	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	DRSC	(National) standard setter	Germany			I disagree	In ESRS Set 1, depending on the standard "incidents" meant different things. If it is about the complaints filed through channels it should state that/ if it is about actual confirmed incidents, it should also state that. Only confirmed incidents should have to be reported.	S1	S1-16 - Incidents of discrimination and other human rights incidents	45.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG Previously (ESRS S1.104), the focus was only on "severe human rights incidents". Indicator No. 14 in table III of annex I to Delegated Regulation (EU) 2022/12888 also refers to "severe human rights issues and incidents". In order to ensure consistency between the SFDR and the ESRS, the word "severe" should be reinserted. With regard to the determination of "severe" human rights impacts, the definition of the United Nations Guiding Principles on Business and Human Rights should be adopted.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We would like to point out that the newly introduced definition of "non-employees" based on national legislation (par.8 and AR 9) will result in additional complexity for multinational undertakings, who may have adopted a different approach (e.g., Group-level definition) in their reporting. We suggest aligning all S1 provisions with the approach of AR 23 for para. 36 (disability), that allows flexibility to undertakings on the definition to adopt (national legislation or Group-level.	S1	S1-1 - Policies related to Own workforce	8
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if policies do not explicitly address trafficking in human beings, forced labour or compulsory labour and child labour.	S1	S1-1 - Policies related to Own workforce	12
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if it has not a policy or management system for safeguarding the health and safety.	S1	S1-1 - Policies related to Own workforce	13
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The paragraph does not require to report key actions taken, planned or underway to cause positive impacts and to manage risks and opportunities. It should also require these actions because this would be critical for undertakings that did not identify material negative impacts.	S1	S1-3 - Actions and Resources related to Own workforce	19(a)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	Change in definition/threshold of significant headcount for the metrics regarding characteristics of the undertaking's employees, collective bargaining coverage and social dialogue in the European Economic Area (S1-5 and S1-7 of Amended ESRS S1) leads to additional effort as it triggers changes in methodology and additional disclosure requirements. In particular, with respect to S1-5 and S1-7 this additional effort to collect the relevant data is considerable.	S1	S1-5 - Characteristics of the undertaking's employees	23(a)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	This paragraph should clearly state how the denominator of employee turnover is calculated. As stated, it can be interpreted that the denominator can consider only employees who leave voluntarily, only employees who leave due to dismissal and retirement or only employees who leave due to death in service. For better understanding the "or" conjunction should be replaced by the "and" conjunction.	S1	S1-5 - Characteristics of the undertaking's employees	AR 15 for 23(c)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only explanations if employees are not paid an adequate wage.	S1	S1-9 - Adequate wages	32
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only explanations if not all employees are covered by social protection against loss of income due to major life events.	S1	S1-10 - Social protection	33
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	As this data is only allowed to be collected in a limited number of EU countries the percentage will not provide meaningful and complete information. Additionally, the DR requires the undertaking to only report data that can be lawfully collected. Since there are significant limitations to collect this data (e.g. GDPR), we suggest this to be deleted.	S1	S1-11 - Persons with disabilities	36
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	It does not take into consideration that companies may be subject to high turnover rates during the year which may show an inaccurate measure of this metric. In this way, the denominator should consider the number of employees that were subject to performance and career development reviews during the year and that did not leave the company before the career development review was conducted. It may be the case that employees need to be hired for a minimum of days to be subject to the development reviews.	S1	S1-12 - Training and skills development metrics	38(a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Ill-health data is only allowed to be collected in a limited number of EU countries; hence the percentage will not provide meaningful and complete information. Therefore, we suggest deleting. Additionally, the requirement to disclose the percentage of people in its own workforce who are covered by the undertaking's health and safety management system should be only if less than 100% of the workforce is covered in order to provide a more meaningful disclosure and reduce boiler plate texts.	S1	S1-13 - Health and Safety metrics	40
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The newly introduced definition of "work-related accidents" based on national legislation (par.8 and AR 9) will result in additional complexity for multinational undertakings, who may have adopted a different approach (e.g., Group-level definition) in their reporting. We suggest aligning all S1 provisions with the approach of AR 23 for para. 36 (disability), that allows flexibility to undertakings on the definition to adopt (national legislation or Group-level).	S1	S1-13 - Health and Safety metrics	AR 27 for 40 (c)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The requirement to disclose the percentage of employees entitled to family related leave should be only if less than 100% of the workforce is entitled, in order to provide a more meaningful disclosure and reduce boiler plate texts.	S1	S1-14 - Work-life balance metrics	42
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We would like to refer you to Directive (EU) 2023/970, which provides exactly this information, and suggest therefore a deletion of the data point. If this is not possible, we would at least propose a simplification of the data point since calculating the median is disproportionately burdensome. We would recommend the following: "The undertaking shall disclose the percentage gap in pay between its female and male employees and the ratio between the average remuneration of its executive members of its administrative and management bodies and the average remuneration of its employees (excluding the before mentioned)."	S1	S1-15 - Remuneration metrics	44(b)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The amended wording replaces "number of severe human rights [incidents/issues]" with "number of human rights [incidents/issues]." This broadens the scope from substantiated, high-impact cases to potentially all recorded incidents, regardless of severity. It also risks undermining alignment with SFDR PAI Indicator #14, which refers to "identified cases of severe human rights issues and incidents". We recommend reintroducing the qualifier "severe" to ensure conceptual clarity and consistency.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46(b)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The option to report figures adjusted for purchasing power differences has been removed. The deletion of voluntary data points was cited as the reason. However, we believe that this was not a data point, but rather a disclosure option. This option was particularly useful for corporate groups operating in countries with different purchasing power. We recommend deleting the entire data point. But if this is not the case this option should definitely be given to international groups.	S1	S1-16 - Incidents of discrimination and other human rights incidents	Former para 99
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We would like to point out that the newly introduced definition of "non-employees" based on national legislation (par.8 and AR 9) will result in additional complexity for multinational undertakings, who may have adopted a different approach (e.g., Group-level definition) in their reporting. We suggest aligning all S1 provisions with the approach of AR 23 for para. 36 (disability), that allows flexibility to undertakings on the definition to adopt (national legislation or Group-level.	S1	S1-1 - Policies related to Own workforce	8
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if policies do not explicitly address trafficking in human beings, forced labour or compulsory labour and child labour.	S1	S1-1 - Policies related to Own workforce	12
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if it has not a policy or management system for safeguarding the health and safety.	S1	S1-1 - Policies related to Own workforce	13
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The paragraph does not require to report key actions taken, planned or underway to cause positive impacts and to manage risks and opportunities. It should also require these actions because this would be critical for undertakings that did not identify material negative impacts.	S1	S1-3 - Actions and Resources related to Own workforce	19(a)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	Change in definition/threshold of significant headcount for the metrics regarding characteristics of the undertaking's employees, collective bargaining coverage and social dialogue in the European Economic Area (S1-5 and S1-7 of Amended ESRS S1) leads to additional effort as it triggers changes in methodology and additional disclosure requirements. In particular, with respect to S1-5 and S1-7 this additional effort to collect the relevant data is considerable.	S1	S1-5 - Characteristics of the undertaking's employees	23(a)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	This paragraph should clearly state how the denominator of employee turnover is calculated. As stated, it can be interpreted that the denominator can consider only employees who leave voluntarily, only employees who leave due to dismissal and retirement or only employees who leave due to death in service. For better understanding the "or" conjunction should be replaced by the "and" conjunction.	S1	S1-5 - Characteristics of the undertaking's employees	AR 15 for 23(c)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only explanations if employees are not paid an adequate wage.	S1	S1-9 - Adequate wages	32
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only explanations if not all employees are covered by social protection against loss of income due to major life events.	S1	S1-10 - Social protection	33
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	As this data is only allowed to be collected in a limited number of EU countries the percentage will not provide meaningful and complete information. Additionally, the DR requires the undertaking to only report data that can be lawfully collected. Since there are significant limitations to collect this data (e.g. GDPR), we suggest this to be deleted.	S1	S1-11 - Persons with disabilities	36
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	It does not take into consideration that companies may be subject to high turnover rates during the year which may show an inaccurate measure of this metric. In this way, the denominator should consider the number of employees that were subject to performance and career development reviews during the year and that did not leave the company before the career development review was conducted. It may be the case that employees need to be hired for a minimum of days to be subject to the development reviews.	S1	S1-12 - Training and skills development metrics	38(a)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Ill-health data is only allowed to be collected in a limited number of EU countries; hence the percentage will not provide meaningful and complete information. Therefore, we suggest deleting. Additionally, the requirement to disclose the percentage of people in its own workforce who are covered by the undertaking's health and safety management system should be only if less than 100% of the workforce is covered in order to provide a more meaningful disclosure and reduce boiler plate texts.	S1	S1-13 - Health and Safety metrics	40

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The newly introduced definition of "work-related accidents" based on national legislation (par.8 and AR 9) will result in additional complexity for multinational undertakings, who may have adopted a different approach (e.g., Group-level definition) in their reporting. We suggest aligning all S1 provisions with the approach of AR 23 for para. 36 (disability), that allows flexibility to undertakings on the definition to adopt (national legislation or Group-level).	S1	S1-13 - Health and Safety metrics	AR 27 for 40 (c)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The requirement to disclose the percentage of employees entitled to family related leave should be only if less than 100% of the workforce is entitled, in order to provide a more meaningful disclosure and reduce boiler plate texts.	S1	S1-14 - Work-life balance metrics	42
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We would like to refer you to Directive (EU) 2023/970, which provides exactly this information, and suggest therefore a deletion of the data point. If this is not possible, we would at least propose a simplification of the data point since calculating the median is disproportionately burdensome. We would recommend the following: "The undertaking shall disclose the percentage gap in pay between its female and male employees and the ratio between the average remuneration of its executive members of its administrative and management bodies and the average remuneration of its employees (excluding the before mentioned)."	S1	S1-15 - Remuneration metrics	44(b)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The amended wording replaces "number of severe human rights [incidents/issues]" with "number of human rights [incidents/issues]." This broadens the scope from substantiated, high-impact cases to potentially all recorded incidents, regardless of severity. It also risks undermining alignment with SFDR PAI Indicator #14, which refers to "identified cases of severe human rights issues and incidents". We recommend reintroducing the qualifier "severe" to ensure conceptual clarity and consistency.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46(b)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The option to report figures adjusted for purchasing power differences has been removed. The deletion of voluntary data points was cited as the reason. However, we believe that this was not a data point, but rather a disclosure option. This option was particularly useful for corporate groups operating in countries with different purchasing power. We recommend deleting the entire data point. But if this is not the case this option should definitely be given to international groups.	S1	S1-16 - Incidents of discrimination and other human rights incidents	Former para 99
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Reference to S1 §3: Logic for this new paragraph is not understandable. This is counter-intuitive to the double materiality analysis that should make sure to only report on material sub-topics and map the material topics to the respective (sub-)disclosure requirements. It would only make sense to move S1-5,-6,-16 to ESRS 2 General disclosures where general DRs that are always relevant, are stated. In general, S1-16 overall should also be mapped to specific sub-topics (discrimination/harassment and child/forced labour and the reporting should be then based on materiality.	S1	S1 - Own workforce	3.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Reference to S1 §4a-f: Very confusing why previous sub-sub-topics are sometimes moved to extra sub-topics and sometimes in brackets. This will lead to discussions on which level materiality is going to be defined, whether to use topics in front or in the brackets. Materiality analysis needs to be fully and new implemented due to this change. Only reasonable approach: Leave out sub-topics in general and just list the previous sub-sub-topics one after each other. Furthermore, a proper mapping won't be possible like this!	S1	S1 - Own workforce	4.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Move this to ESRS 2, this is related to the general statement with regards to the human rights policy.	S1	S1-1 - Policies related to Own workforce	12.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Either move this to ESRS 2 GDR-P, as it is a general disclosure no matter if the sub-topic "Health&Safety" is material, or delete it and only state a health & safety policy if health&safety is material for this company. This again does not follow the overall systematic.	S1	S1-1 - Policies related to Own workforce	13.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The requirement is not fully clear. It would make sense to move this disclosure requirement to ESRS 2 as it related to the human rights policy and how the company works with it and how the HR policy is being trated within the company with regards to stakeholders.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The requirement to state actions is clear but what is meant with the term resources (personnel, money, time...)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S1	S1-3 - Actions and Resources related to Own workforce	18.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Please note that the possibility to report in FTE is only sated under 23(b), not 23(a). This could lead to confusion. Put the remark whether to report in head count or FTE under 23. in general or only focus on headcount.	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Great improvement that the number alone has been deleted which is less meaningful than the rate.	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Reporting on "non-guaranteed hours employees" should be deleted overall. No information materiality (see benchmaking of already existing ESRS reports, amount of NGHE was below 1%).	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)iii.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure of countries in EEA and their collective bargaining coverage is fine, but stating how many different bargaining contracts there are is not a valuable information. Left alone that due to different countries and sometime different segments within a company, there are always more than one. And knowing how much does not really represent anything. Percentage per country should be sufficient!	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Region is not really defined. This could lead to different approaches in reporting. Why not use countries as in 27b or continents as defined by UN?	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Definition required what "loss of income" means: Is a one-off payment sufficient or does social protection only mean that there is a monthly payment covering an adequate amount?	S1	S1-10 - Social protection	33.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	More clear to only refer to maternity leave. Open question: the basis to calculate the coverage is then only all female employees? Which would be different basis than calculating the coverage for the other life events.	S1	S1-10 - Social protection	34. (d)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Reduction is perceived very well.	S1	S1-5 - Characteristics of the undertaking's employees	38. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Reduction is perceived very well.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please delete the part "c) the number...". It does not make sense to report on sheer numbers. Rate alone is sufficient transparency and more relative. Same change has been made for attrtion rate under Amended S1-5.	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Please note that from a definition perspective, every injury includes an accident. Especially work-related. It does not make sense to separate work-related accidents and work-related injuries. An accident always includes an injury and vice-versa. Please only write "work-related accident" and ill-health! This will also be more relatable to S1 - 40. (b) and (c).	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended that these metrics should be voluntary and only necessary if the sub-topics of discrimination and human rights incidents are material. The scope of mandatory metrics need to be clarified so that there is no variation in interpretation between undertakings.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended that these metrics should be voluntary and only necessary if the sub-topics of discrimination and human rights incidents are material. The scope of mandatory metrics need to be clarified so that there is no variation in interpretation between undertakings.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Table 2: Make sure to combine the requirement of former ESRS 2, paragraph 40(a)iii in the table. Both geographical areas as well as countries can be combined in this table. In general, mix-up of FTE and headcount again that is not made clear in S1-5.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Table 3: The table in this way does not allow multi-year reporting. Please see table in the BMW Group report 2024 for better reporting that allows pre-year comparisons. In general, mix-up of headcount and FTE that is not made clear throughout S1-5!	S1	S1-5 - Characteristics of the undertaking's employees	AR 12
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Table is fine, just the mix-up of region and country is difficult. No clear definition on what a region is. Continents as per UN definition could be used instead of region to make it more comparable. Or for non-EEA, also use country and the threshold. Could be more of use for the reader.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Correction: MDR-T --> GDR-T	S1	S1-11 - Persons with disabilities	23.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please add: "However, the undertaking can use its own definition for accident. In this case it shall disclose that fact."	S1	S1-13 - Health and Safety metrics	AR 27
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Since a work-related accident inherently involves an injury, distinguishing fatalities by injury and accident in this context is redundant. All accidents are already injuries, so the differentiation does not make sense. Better keep wording from previous standard but just delete fatalities.	S1	S1-13 - Health and Safety metrics	AR 28
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please exclude "number". Rate is sufficient for transparency and more valuable to reader and it is relatable.	S1	S1-13 - Health and Safety metrics	AR 28
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please add to the first part: "and where an official investigation has show that the case of work-related ill health is causally linked to the company's working conditions and requirements."	S1	S1-13 - Health and Safety metrics	AR 29
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	This AR is not required if it is already stated in GDR-M.	S1	S1-15 - Remuneration metrics	AR 34
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	This is a non-understandable AR. Why is S1-15 the only metric where you indicate how many previous years need to be reported? This is usually standardized within the integrated reports (usually 5-6 years, depending on when the reporting on this metric started). This AR should be deleted and the company should decide on how many years are reported and harmonize this themselves or include it in CSRD overall.	S1	S1-15 - Remuneration metrics	AR 35
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This should also be the definition of gross pay as stated in amended ESRS S1 paragraph 44(b) for the gender pay gap. And it should also be the reference on how to calculate the CEO remuneration. Still not enough clarification between remuneration and pay. Too many different definitions and non-alignment with EU Pay Transparency Act, where salary components are not clarified.	S1	S1-15 - Remuneration metrics	AR 36. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The life areas of social security are not clear after discussion with several experts worldwide: Most of the time, the topic acquired disability is secured via the health insurance. So the five areas are not separate, rather then intertwined, at least for reason 1 and 3.	S1	S1-10 - Social protection	34. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Double reporting required due to EU Pay Transparency Act and ESRS. No clear alignment between the two regulations can lead two different approaches in reporting Gender Pay Gap. Trust in reporting will be lost as differences need to be explained to audience.	S1	S1-15 - Remuneration metrics	AR 36. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	There is no impact on the KPI data collection or methodology; the change only concerns the presentation	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	There is no impact on the KPI data collection or methodology; the change only concerns the presentation	S1	S1-7 - Collective bargaining coverage and social dialogue	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Inserting the concept of materiality assessment for non employee	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	No further definition on Non employees which could clarify and standardize the approach cross companies	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The previous standard version allowed for a simpler approach, such as benchmarking against a fair or living wage—including using providers like the Fair Wage Network. Given our global footprint, the new proposed approach would introduce more complexity and leave room for subjective interpretation across countries. For example, it would require determining whether a minimum wage is “adequate,” identifying which institutes are mandated by public authorities, and assessing alignment with ILO principles, all of which can vary and be challenging to standardize.	S1	S1-9 - Adequate wages	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Clarification on the limitation of reporting scope due to privacy regulation. However no detail overview of the countries privacy regulation to support the assessment.	S1	S1-11 - Persons with disabilities	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Inclusion a reference that persons of disabilities definition may be different per country regulation	S1	S1-11 - Persons with disabilities	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Clarifying that cases reported are only substantiated cases	S1	S1-16 - Incidents of discrimination and other human rights incidents	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Remuneration ratio not change to average (still median	S1	S1-15 - Remuneration metrics	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Comment relates to the overall 'objective' of S1, article 3: it mentions that if own workforce is material - all metrics from S1-5 / S1-16 need to be disclosed (of course mindful of phase in). Which was not addressed as such in the 2023 ESRS and not in line with the ID 177 EFRAG guidance as published that links the sub(sub) topic to the metrics to be disclosed.	S1	S1-1 - Policies related to Own workforce	11.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Revisions remove complaints and potentially oversimplify incidents of discrimination and human rights incidents. All social standard (i.e., S1-S4) requirements for human rights incidents have removed the term "severe" and in doing so significantly broadened the scope of reporting on this metric.	S1	Metrics - Incidents	46(a)-(c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Conflicting definitions and guidance regarding "incident": Definition of incident in glossary does not refer to "substantiated". The metric for incidents of discrimination requires incidents to be counted and these should be substantiated incidents. AR38 refers to substantiated incidents. The definition of what needs to be counted should be in one place. Or, similar to the new definition of "confirmed human rights incidents", please introduce a definition of "confirmed disrimination incidents" which is what the metric should be measuring. Use of the word "incident" and its definition needs to be cleaned up as currently extremely burdensome to follow what is required.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Material sub topics: Only required to report on material sub topics apart from S1-5 and S1-16. How have these been selected as “non negotiables”? Requirement is not clear and purpose of doing materiality assessment seems redundant if topics are selected to be reported notwithstanding materiality.	S1	S1 - Objective	3.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Para 7-9: These terms should be clearly defined such that all the additional guidance is not necessary. If guidance still considered necessary, should either be in definitions section or stay as Objective AR.	S1	S1 - Objective	7.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Rationale states this is proposed to be moved from S2 AR3 but it is only partial and now inconsistent with the same guidance now moved to S2 Objective.	S1	S1 - Objective	9.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Existing AR6-8 Cobtains helpful examples which are now proposed to be deleted. Should be moved to NM disclosure guidance. Useful in absence of clear definitions.	S1	S1-3 - Actions and Resources related to Own workforce	18.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Existing AR25a – is a “may” proposed to become mandatory. Explanation just says moved. It has added to the disclosure requirements, not simplified.	S1	S1-2 - Engagement with own workforce and workers’ representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Still not clear and poorly worded, including circular references.	S1	S1-2 - Engagement with own workforce and workers’ representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	AR 5
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Existing AR31 - Rationale states that it is proposed to be removed from mandatory content, but it is a “may” requirement – not mandatory.	S1	S1-2 - Engagement with own workforce and workers’ representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Unclear distinction between para 16 and 19b regarding effectiveness of channels and actions for remedy – expect there is a large overlap. Additionally, regarding requirements for effectiveness, whilst some detail is proposed to be deleted, appear to be proposed to be in both S1-2 and S1-3 – complicated to follow. Recommend combining S1-2 and S1-3 with one clear set of disclosure requirements.	S1	S1-3 - Actions and Resources related to Own workforce	19.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	New disclosure requirement to present actions in a way that shows interaction between different topics. The requirement is vague - what is expected to be disclosed “in a way that…” – reporters can select "any way" to show this. Assurers also have no clear basis. Further, it is not clear what impacts on own workforce arise from transition to green economy – what are the impacts identified by EFRAG? This AR has removed some much needed examples and detail in such a vague and unclear disclosure requirement.	S1	S1-3 - Actions and Resources related to Own workforce	AR 7
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Erroneous bracket	S1	S1-5 - Characteristics of the undertaking’s employees	AR 9

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Deletion of requirement to show non guaranteed hours headcount by gender is welcomed. But not clear on rationale for why this has been deleted but not other detailed breakdowns. How are EFRAG decisions made regarding usefulness of information - how are non guaranteed hours deemed not significant enough to do by gender but other categories are?	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Deleted useful guidance on non guaranteed hours. Would put in NM guidance at least.	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	AR60 Rationale states that this is a removal of a voluntary data point. But it becomes a "shall" data point in the absence of data. Rationale doesn't make sense.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Would expect this to be addressed as part of DMA. Is it duplicate?	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Relates to EEA but other disclosures on adequate wage changed to EU. Can disclosures relate to either EEA or EU and can definition or list of countries please be provided for each.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Reduction in DR relating to retirement - no explanation given as to why retirement de-prioritised as a major life event.	S1	S1-10 - Social protection	34.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	In the absence of a clear definition (definition in glossary is extremely vague), the deleted guidance was helpful to use as a definition for what was being reported and made the disclosure more meaningful. Suggest to provide clearer definition (use previous AR75).	S1	S1-10 - Social protection	34.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	"The DR about persons with disabilities requires the undertaking to only report data that can be lawfully collected". This does not need clarifying. Standard setter shouldn't be needing to defend the disclosure requirements as only relating to lawful information. Or to imply that reporters may collect data unlawfully. Also, the clarifications only provide clarification on the actual issue itself that reporters previously fed back on – that, due to such data collection difficulties and limitations, the numbers reported will be incomplete and not meaningful. Given lack of consistency in definitions, will also not be comparable. Instead of merely clarifying the actual issue, standard setter should be seeking solutions to the reporting issue.	S1	S1-11 - Persons with disabilities	AR 23
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Disagree with metric since lack of clear definitions, or inconsistent definitions, and data collection limitations and challenges will not result in meaningful quality disclosures, and potentially lead to damaging misinterpretations.	S1	S1-11 - Persons with disabilities	35.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Disagree with metrics: Meaningless information for readers e.g. how does a company get assessed based on number of training hours. Training encompasses all forms of training e.g. on the job, making external content available etc hence definition is not capturing full value of training that can be done nowadays with change to agile and global working with technology advancements.	S1	S1-12 - Training and skills development metrics	38.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Proposal to clarify that accidents include ill health. Unilever disagrees with this definition, where we consider accidents to result in injuries. Ill-health can occur over a period of time hence is not in line with definition of accident.	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	AR83-88, 92: Deletion of useful guidance in the absence of clear definitions which are subject to judgement. Suggest moving to NMIG.	S1	S1-13 - Health and Safety metrics	40.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Addition of definitional requirement should go into glossary and definition of recordable work related accident.	S1	S1-13 - Health and Safety metrics	AR 27
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	A new definition of human rights incident has been added, yet, guidance on "human rights incident" and "incident" are provided separately – very confusing – just use one definition.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 37
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Incidents is a defined term. Very confusing to add another layer of definition in particular disclosure requirement.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 38
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	New requirement. Not clear what is meant by providing the methodology to compile the data. Not a simplification to add a new unclear requirement.	S1	S1-16 - Incidents of discrimination and other human rights incidents	AR 39
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Paragraph 19 singles out disclosure of key actions to manage only material negative impacts. however the immeditately preceeding paragraph, DR 18, requires disclosure in accordance with GDR -A which requires disclosure of key actions in relation to ALL material impacts, risks and opportunities. Further, old para S1-4 DR 38. (c) relating to the dsiclosure of key actions in relation to positive impacts has been deleted from mandatory and moved to NMIG. Is the intention of the EFRAG, only keep the disclosures key actions in relation to Own Workforce material negative impacts as a manadatory DR and ALL key actions in relation to material positive impacts, risks and oppotunities as voluntary? We request clarifictions on this topic.	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We would like to ask for more clarification. The note that is added below Table 1 in the revised ESRS states: Template for presenting information on employee head count by gender, suggests that the "Other" gender category needs to follow legal registrations and when this is not allowed to indicate 'Not applicable" . However, AR12 Table 3 note "Gender as specified by the employees themselves" suggest a self ID source is to be used. Resulting in two different sources of this attribute, and table 1 and table 3 gender totals would differ. We don't believe this is the intention of the EFRAG and clarification is necessary, Legal Registration would be prefered as this is a readily available source. This will also impact other metrics by gender attribute, S1-12 Training and skills development and S1-15 gender pay gap	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This feedback relates to paragraph ESRS S1 - 23. (a) and ESRS S1 - 27. (b) and ESRS S1 - 28. (a) . There is a change in threshold of "significant employment country" from at least 10% of total employees to > ten largest countries. This would increase reporting disclosures for most companies and is not aligned to clarification and simplication objective. While its understood that this more applicable to "companies whose workforce is distributed over many countries." this is not applicable to companies not fitting this description. Suggest to maintaining the current threshold and this could be applied voluntarily where relevant.	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We have noticed that there has been a change in the calculation (the denominator). Currently the selection of the denominator is open to companies, but the revision stipulates "average employee headcount" this will result in comparative figures not being comparable after revision. Suggest to revert back to original requirement.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This feedback relates to paragraph. Disclosure of Collective bargaining coverage outside EEA. Threshold of "at least 10%" removed from the Table 1 (AR70 amended). This essentially increases the reporting requirements, suggest to maintain the current.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The revision imposes an additional burden to companies to assess whether the minimum wages as published by local authorities, does in fact takes into account ILO Minimum Wage Fixing Convention No. 131. This is not a readily available benchmark. We are in favor of the strengthening of the adequate wage benchmark however this burden should not fall completely on companies and suggest EFRAG provides a yearly overview of the wage benchmark to be used by companies for CSRD reporting. Further, we do not agree 'adequate wage' methodologies to diverge in respect to EU verses non-EU. Suggest a clear alignment across CSRD , CSDDD and ILO definitions of 'adequate wage', single methodology globally. Both CSDDD and the ILO refer to living wage. Moreover, companies' stakeholders have expectations regarding "living wage" rather than "minimum wage". We recognize it may be difficult for other smaller-scale companies to afford this reporting as obtaining credible 'living wage' benchmark, again we believe a yearly overview published by EFRAG would truly drive significant relief for all companies while still meeting the core objectives. Additionally, this would make reporting across companies more consistent and comparable.	S1	S1-9 - Adequate wages	AR 22
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	In paragraph ESRS S1 - 40 guidance on "work-related" removed and replaced with local national laws which can differ across countries - giving rise to inconsistent reporting. For example certain commute travel is treated differently. We suggest to use recognised international standards such as OSHA. This is what most global companies adopt to ensure consistent reporting. Further it would take significant time and cost to revert to national law definitions. Additionally would make prior period reported metrics incomparable.	S1	S1-13 - Health and Safety metrics	40.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Paragraph ESRS S1 - AR 29 which is related to Guidance on "work-related" and ESRS S1 AR 86 on mental - ill-health cases has been removed. Related to this, AR 93 (mental ill-health) has been amended. This guidance narrowed the scope of reporting to mental ill-health cases "supported by an opinion from a licensed healthcare professional with appropriate training and experience; and if such opinion states that the illness is work-related." This guidance was crucial as it unburdens companies (which would usually lack the internal resources and competence to investigate each mental ill-health case to conclude the root cause is infact work related. Mental ill-health cases are typically difficult to narrow down root cause). Suggest to retain guidance since without this guidance and together with the amended AR93 companies are required to reported on ill-health cases they are informed on by affected persons and internally determine "work relatedness" and "recordability" which is far more difficult than assessing work-related injuries. Further, in order for companies to determine work relatedness - this would result in collection the data that is subject to legal restriction in most countries making this information inconsistent from country to country.	S1	S1-13 - Health and Safety metrics	AR 29
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Paragraph ESRS S1 - AR 27. The text has been changed from "Guidance on computing the rate of work-related injuries" to a broader guidance "computing the rate of work-related accidents" - This amendement brings into scope accidents relating to both injuries and ill-health - increasing the scope from 'injuries' only to 'accidents' (which includes both injuries and ill-health). The current guidance has been applied by companies and it would take time (and costs) to implement this increase in scope. Additionally, this would make prior period reported metrics incomparable.	S1	S1-13 - Health and Safety metrics	AR 27
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We request clarity on this paragraph since the scope to report days lost to 'work-related injuries' and 'recordable work-related accidents' are stipulated separately. However, the EU definition of Recordable work-related accidents is the same as the OHSA definition and links to anything more severe than a first aid incident. Therefore, "work-related injuries" resulting in days away, meet the definition of "recordable" and so will be naturally in-scope when reporting "recordable work related inccidents". Include these definition in two seperate places, results in unclarity and possibly double counting.	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The CSRD disclosure requirements currently group discrimination and harassment under a single category. However, these are distinct risks with different definitions, root causes, and mitigation measures. The ILO also have separate conventions to define them - Convention 111 (Discrimination (Employment and Occupation) Convention, 1958) and Convention 190 (Violence and Harassment Convention, 2019). In practice, many companies, including ASML, segregate discrimination and harassment in their grievance mechanisms with different mitigation measures. Combining them in reporting may lead to risks overlooking harassment cases not linked to discrimination, and misalignment with how organizations address these risks internally. To improve clarity and accuracy in reporting, we recommend that CSRD separate discrimination and harassment in its disclosure requirements, especially for reporting incidents.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	General suggestion on the ED: Streamline wording issues and redundancies, as several sections still contain unclear or awkward wording, as well as unnecessary repetition (e.g., duplication of GDR content) Review the structure and placement of AR to distinguish: (i) what belongs in the glossary (e.g., definition of non-employees, third-party mechanisms), (ii) what is essential and should remain in the AR, and (iii) what should be deleted or moved to the NMIG (e.g., explanatory content on international texts)	S1	S1 - Objective	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Remove the requirement to systematically apply S1-6 and S1-16 whenever the own workforce is material, as DR should be subject to materiality of subtopics and information, notably in a context where the materiality principle is being reinforced. While S1-5 may reasonably be considered material whenever S1 is material, the materiality of S1-6 should not be imposed, as companies may legitimately consider non-employees immaterial.	S1	S1 - Objective	3.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Duplicates with ESRS 2: Remove the details on ESRS 2 provisions as it duplicates ESRS 2 content (§31)	S1	S1 - Objective	5. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Non-employees: Move the details on the definition of non-employees either to the AR or Glossary not overburden the main body with extensive definition that relates only to limited number of data points, and improve the definition	S1	S1 - Objective	6.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Just transition: If this section is retained, add the interaction with environmental topics ("just transition") as an interaction with other standards	S1	S1 - Interaction with other ESRS	10.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	This item on health and safety coverage should be rather disclosed through the following metric: "the percentage of people in its own workforce who are covered by the undertaking's health and safety management system based on legal requirements and/or recognised standards or guidelines"	S1	S1-1 - Policies related to Own workforce	13.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Contextual information: Delete AR on contextual information, as it duplicates the content of ESRS 2 GDR-M Headcount methodology: Clarify in AR that that the annual average of monthly headcount during the reporting period is more appropriate than the year-end headcount, as it better represents the workforce over time; and mention in AR that FTE may be more suited for seasonal activities	S1	S1-5 - Characteristics of the undertaking's employees	AR 10
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	The breakdown by gender for permanent/temporary employees is overly granular as this DP is already disclosed at consolidated level (total number of employees, with breakdown by gender) and lacks relevance.	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	ESRS S1- 23 (f): Require disclosure of "total number of employees who have left the undertaking during reporting period" in addition to "rate of employee turnover," as users prioritise absolute figures and information is calculated for the rate	S1	S1-5 - Characteristics of the undertaking's employees	23. (d)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	The disclosure requirement should include the distribution of employees by age group (under 30, 30-50, over 50). Users mentioned interest in insights on youth employment, senior employment, and overall workforce age structure management.	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Clarify the definition (§7 & 8 and AR14)	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Estimated number of non employees: Suggestion to replace "the total number of non-employees" by "an estimated number of non-employees when they represent a significant proportion of the own workforce and their role" in §25 instead of AR 15	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Move adequate wage from mandatory to voluntary Alternatively, see ANC proposal in the consultation questionnaire PART 2	S1	S1-9 - Adequate wages	32.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	The number of life events covered remains very broad (4 life events) and should focus only on 2 such as (i) unemployment and (ii) retirement. Other items depend heavily on jurisdictional factors or are already covered elsewhere in the standard (e.g., maternity leave overlaps with S1-14).	S1	S1-10 - Social protection	34.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Gender pay gap: replace by a breakdown of gender pay gap by employee category and at country or geographical levels, as it is the main driver of the pay gap, consequently both preparers and users stress that it is necessary to ensure the relevance of the metric disclosed.	S1	S1-15 - Remuneration metrics	44. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete AR on contextual information as it duplicates the content of ESRS 2 GDR-M	S1	S1-15 - Remuneration metrics	AR 34
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete AR on comparative information, as it duplicates the content of ESRS 2 GDR-M; historical data will be accessible anyway.	S1	S1-15 - Remuneration metrics	AR 35
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	The inconsistent scope for health and safety metrics, which alternates between 'employees', 'non employees' and 'workers on site', creates confusion and hinders comparability. We propose streamlining these datapoints to mandate reporting only for a company's employees (with the exception for fatalities of on site workers). Including non-employees is problematic as companies lack the direct operational control and access required to collect reliable and verifiable data from third-party entities, making disclosure on them optional and based on materiality is a more practical approach.	S1	S1-13 - Health and Safety metrics	40.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Positive impacts have unfortunately disappeared from the ED. In the current version of the ESRS, they were explicitly covered under §36 ('to achieve positive material impacts'). We recommend that such a formulation be reintroduced to ensure that the Standards capture not only the mitigation of negative impacts but also the pursuit of positive contributions	S1	S1-9 - Adequate wages	19.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	It would be advisable to reinstate in AR7 the condition currently set out in AR43 ('if the undertaking has taken measures to mitigate negative impacts on its own workforce that arise from the transition to a greener, climate-neutral economy').	S1	S1-3 - Actions and Resources related to Own workforce	AR 7
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Clarify the definition (§7 & 8 and AR14). In addition, the example in AR14 is not needed and the following part should be deleted, as it provides limited additional inputs compared to "when non-employees are a key part of the undertaking's business model": delete "for example when they are used to provide flexible labour or when they are used in key processes"	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	AR 14
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	We recommend excluding interns and apprentices from point (a), as well as removing in-kind benefits from point (b.iii), given the excessive complexity their inclusion would entail.	S1	S1-15 - Remuneration metrics	AR 36
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Glossary should include a definition for "management system" which has been added in S1-1.13.	S1	S1-1 - Policies related to Own workforce	13.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	ED AR 13 should refer to 23f rather than 23c. End of fixed-term contracts (i.e. contractually agreed end date) is not listed in AR 13 for paragraph -23f.)). This is a common and material reason for exit, especially in sectors with high use of fixed-term contracts. Its exclusion may lead to inconsistent reporting and underestimation of turnover rates. Additionally, the term "average employee headcount" should be clarified to explicitly include permanent employees, temporary employees, and non-guaranteed hours workers in line with S1-6 § 23(b) i) ii) iii). Without this clarification, undertakings may apply inconsistent definitions, undermining comparability across reports. Proposed rewording : "For the employee turnover calculation, the undertaking shall divide the number of employees who leave voluntarily, due to dismissal, retirement, death in service, or end of contract, by the average employee headcount. In line with S1-5 §23a and b, the average employee headcount includes all type of employees. We also recommend EFRAG clarifies in the AR that populations retained for numerator and denominator of the turnover ratio should be consistent.	S1	S1-5 - Characteristics of the undertaking's employees	AR 13
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Paragraph 25 states : "The undertaking shall disclose the total number of non-employees in the undertaking's own workforce." Guidance in NMIG could mention that methodologies used to determine number of employes for S1-6 are aligned with those used to determine S1-5 metrics, as far as possible.	S1	S1-6 - Characteristics of non-employees in the undertaking's own workforce	25.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	AR 20 for paragraph 32 says "If all employees are paid an adequate wage, stating this is sufficient to fulfil this requirement and no further information is needed." This wording from set 1 leads undertakings to only state that their employes were paid an adequate wage without disclosing any methodology elements and especially which applicable references have been taken in account. «no further information is needed from AR» should be replaced by «the undertaking shall disclose the methodology used in assessing paying adequate wage, in accordance with GDR-M from ESRS 2»	S1	S1-9 - Adequate wages	AR 20
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	AR 22 for paragraph 32 shares new methodology to determine ESRS S1-9 §32 datapoint. In addition to our comments in Part 2, we suggest EFRAG to provide some tools to assist preparers in assessing adequacy of wages. For non-EU countries, we recommend EFRAG clarifies: - where the undertaking shall find the list of countries where wage has been set according to ILO wage setting principles (e.g. provide confirmation if the list in the following link corresponds to the list of countries having ratified C131 - Minimum Wage Fixing Convention, 1970 : https://normlex.ilo.org/dyn/nrmlx_en/f?p=NORMLEXPUB:11300:0::NO::P11300_INSTRUMENT_ID:312276) - where the undertaking shall find the list of institutions, mandated by the public authorities of the country where the workers are based, having estimated local wage according to ILO wage setting principles - where the undertaking can find a tool allowing to assess local wage according to ILO wage setting principles. For EU countries, we recommend EFRAG checks that adequate minimum wages will be available in all EU Member states at the date of the first application of the new set of ESRS, which implies that the Directive (EU) 2022/2041 of the European Parliament has been locally transposed as well as the corresponding adequate minimum wage has locally been enacted.	S1	S1-9 - Adequate wages	AR 22
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We recommend EFRAG defines "covered by social protection against loss of income" and clarify whether it corresponds to a certain level of protection or threshold to define (which, for example, could be linked to a living wage).	S1	S1-10 - Social protection	33.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	We recommend EFRAG define "Lack of social protection". Does it refer to full absence of coverage or to insufficient coverage based on duration or remuneration thresholds? Absence of definition will create various interpretations and impair comparison. The standard should clarify whether it is required to disclose whether the company has not identified any country where employees lack those protections for the listed major life events. Regarding the datapoint ESRS S1-10 34c), we recommend EFRAG confirms that the scope of the datapoint is the social protection for any case of acquired disability, including those not resulting from work.	S1	S1-10 - Social protection	34.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We acknowledge the clarification in AR27 on work-related accidents related to the systematic reference to the national laws where the employees are based. However, national laws might not be explicit on whether commuting accidents are work-related accidents. We suggest clarifying that based on ESRS 2 §41-a, undertakings should indicate whether commuting accidents have been included or excluded from the metric based on local laws, or on other basis if local law is silent.	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	This DP implies situation where undertakings would report the same percentage of employees entitled to take family leave during the period even if the rights granted to employees in relation to these family leaves are different for example in terms of remuneration or duration. For example, in one case the employee might remain fully remunerated during leave and entitled to a substantial leave period, whereas in another case, the employee is not entitled to any remuneration during the leave and the leave duration is limited e.g. few days. We suggest EFRAG to clarify in AR whether there are specific conditions or thresholds regarding duration as well as remuneration when reporting family-related leave, or whether any type of family-leave is de facto covered by this disclosure irrespective of the underlying conditions.	S1	S1-14 - Work-life balance metrics	42.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	AR 33 for paragraph 44 (a) should clarify whether gross hourly pay should be computed on the basis of worked hours or on the basis of hours including absence time. Taking into account number of worked hours will increase individual hourly pay. Taking into account absence time would reflect cases where remuneration is lower during the absence period.	S1	S1-15 - Remuneration metrics	AR 33
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	List of remuneration elements from AR 33 for paragraph 44 (a) for gender pay gap and AR 36 for paragraph 44(b) for annual total remuneration ratio should be reconciled and consistent, with clear statement that both metrics should have the same components of remunerations. If that is not the intent, we urge EFRAG to clearly identify in AR 33 which remuneration elements listed in AR 36 are included or excluded for gender pay gap determination, considering the very broad definitions of "pay" and "annual total remuneration" in the glossary. There is still a misalignment between the list of elements in AR 36 and the definition of "Annual total remuneration" regarding change in pension value (included in the latter but not the former). AR36 should be adjusted to align. We ask also guidance on how to consider elements such as pensions, long terms incentives and whether social contributions paid by employers are considered benefits-in-kind in both remuneration metrics.	S1	S1-15 - Remuneration metrics	AR 36
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Several metrics in ESRS S1 are based on a formula including the number of employees as denominator: -"average employee head count" for "employee turnover calculation" in AR 13 for para 23c) -"number of employees for "percentage of employees covered by collective bargaining agreements" covered by AR 16 for para 27a) -"number of employees" for "the percentage of employees covered by workers' representatives" covered by AR 18 for para. 28a) -« employee headcount figures from DR ESRS S1-5 » for the "Calculation performance review » covered by AR 24 for para. 38(a) -"head count figures for total employment reported in DR ESRS S1-5 » for "the average number of training hours" covered by AR 25 for para 38b) As different wordings are used for those metrics, we recommend EFRAG clarify whether the same information is expected to be used as denominator for all metrics and consequently align wording as well as the specific reference to S1-5 datapoint(s).	S1	S1-5 - Characteristics of the undertaking's employees	AR 16
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	It's unclear what would count as training as per EFRAG as all guidance is in NMIG . EFRAG should bring back in the core standard the wording in the NMIG which includes a "must" and therefore belongs to the requirements: "To be counted as training under paragraph 38(b), there must be a connection between the training activity and the maintenance, or improvement, of an employee's professional skills. The ultimate goal is professional growth, maintaining employability, technical skills development training or management and leadership development training. »	S1	S1-12 - Training and skills development metrics	38.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	NMIG 30 for § 38 states "the undertaking might consider excluding inactive employees from the denominators in the calculations. In this case, it might state this fact and how many employees were counted as inactive. It might consider disclosing the definition used for inactive employees in its calculations." This seems to indicate that inactive employees should be included in the DP in § 38 but that companies might also decide to exclude them. We suggest EFRAG to clarify in AR what should be the treatment of inactive employees and what inactive means. The core standard does not mention "active" nor "inactive employees", and there is no definition of inactive employees (definition deleted from V1.6).	S1	S1-12 - Training and skills development metrics	38.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We noticed that "Appendix A List of datapoints in cross-cutting and topical standards that derive from other EU legislation" of ESRS 2 has been updated ("ESRS S1-16 Excessive CEO pay ratio paragraph 97 (b) » has been replaced by "ESRS S1-15 Annual total remuneration ratio ») in order to reflect ESRS S1 requirements. We recommend EFRAG confirms that disclosing ESRS S1-15.44b) metric is sufficient to comply with Indicator number 8 Table #3 of Annex I needed for financial market participants subject to Regulation (EU) 2019/2088.We also recommend EFRAG to clarify whether the « highest paid individual » shall be an employee of the undertaking or any person of the undertaking organization including the CEO or a member of administrative, management and supervisory bodies of the undertaking who are not systematically employees. There can be situations where a part of the management (eg CFO,…) are employees of an undertaking (A) but allocated to a undertaking (B), their costs being reinvoiced by A to B. We recommend Efrag clarify whether these individuals shall be considered for the identification of the highest paid individual of the second undertaking (B), as the undertaking (B) pays the undertaking (A) and not directly the individual.	S1	S1-15 - Remuneration metrics	44. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Reference to S1 §3: Logic for this new paragraph is not understandable. This is counter-intuitive to the double materiality analysis that should make sure to only report on material sub-topics and map the material topics to the respective (sub-)disclosure requirements. It would only make sense to move S1-5,-6,-16 to ESRS 2 General disclosures where general DRs that are always relevant, are stated. In general, S1-16 overall should also be mapped to specific sub-topics (discrimination/harassment and child/forced labour and the reporting should be then based on materiality.	S1	S1 - Own workforce	3.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Reference to S1 §4a-f: Very confusing why previous sub-sub-topics are sometimes moved to extra sub-topics and sometimes in brackets. This will lead to discussions on which level materiality is going to be defined, whether to use topics in front or in the brackets. Materiality analysis needs to be fully and new implemented due to this change. Only reasonable approach: Leave out sub-topics in general and just list the previous sub-sub-topics one after each other. Furthermore, a proper mapping won't be possible like this!	S1	S1 - Own workforce	4.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Move this to ESRS 2, this is related to the general statement with regards to the human rights policy.	S1	S1-1 - Policies related to Own workforce	12.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Either move this to ESRS 2 GDR-P, as it is a general disclosure no matter if the sub-topic "Health&Safety" is material, or delete it and only state a health & safety policy if health&safety is material for this company. This again does not follow the overall systematic.	S1	S1-1 - Policies related to Own workforce	13.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The requirement is not fully clear. It would make sense to move this disclosure requirement to ESRS 2 as it related to the human rights policy and how the company works with it and how the HR policy is being trated within the company with regards to stakeholders.	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The requirement to state actions is clear but what is meant with the term resources (personnel, money, time...)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S1	S1-3 - Actions and Resources related to Own workforce	18.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Please note that the possibility to report in FTE is only sated under 23(b), not 23(a). This could lead to confusion. Put the remark whether to report in head count or FTE under 23. in general or only focus on headcount.	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Great improvement that the number alone has been deleted which is less meaningful than the rate.	S1	S1-5 - Characteristics of the undertaking's employees	23. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Reporting on "non-guaranteed hours employees" should be deleted overall. No information materiality (see benchmaking of already existing ESRS reports, amount of NGHE was below 1%).	S1	S1-5 - Characteristics of the undertaking's employees	23. (b)iii.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Disclosure of countries in EEA and their collective bargaining coverage is fine, but stating how many different bargaining contracts there are is not a valuable information. Left alone that due to different countries and sometime different segments within a company, there are always more than one. And knowing how much does not really represent anything. Percentage per country should be sufficient!	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Region is not really defined. This could lead to different approaches in reporting. Why not use countries as in 27b or continents as defined by UN?	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Definition required what "loss of income" means: Is a one-off payment sufficient or does social protection only mean that there is a monthly payment covering an adequate amount?	S1	S1-10 - Social protection	33.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	More clear to only refer to maternity leave. Open question: the basis to calculate the coverage is then only all female employees? Which would be different basis than calculating the coverage for the other life events.	S1	S1-10 - Social protection	34. (d)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Reduction is perceived very well.	S1	S1-12 - Training and skills development metrics	38. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Reduction is perceived very well.	S1	S1-12 - Training and skills development metrics	38. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Please delete the part "c) the number...". It does not make sense to report on sheer numbers. Rate alone is sufficient transparency and more relative. Same change has been made for attrtion rate under Amended S1-5.	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Please note that from a definition perspective, every injury includes an accident. Especially work-related. It does not make sense to separate work-related accidents and work-related injuries. An accident always includes an injury and vice-versa. Please only write "work-related accident" and ill-health! This will also be more relatable to S1 - 40. (b) and (c).	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Fine.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Fine.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Table 2: Make sure to combine the requirement of former ESRS 2, paragraph 40(a)iii in the table. Both geographical areas as well as countries can be combined in this table. In general, mix-up of FTE and headcount again that is not made clear in S1-5.	S1	S1-5 - Characteristics of the undertaking's employees	AR 11
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Table 3: The table in this way does not allow multi-year reporting. Please see table in the BMW Group report 2024 for better reporting that allows pre-year comparisons. In general, mix-up of headcount and FTE that is not made clear throughout S1-5!	S1	S1-5 - Characteristics of the undertaking's employees	AR 12
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Table is fine, just the mix-up of region and country is difficult. No clear definition on what a region is. Continents as per UN definition could be used instead of region to make it more comparable. Or for non-EEA, also use country and the threshold. Could be more of use for the reader.	S1	S1-7 - Collective bargaining coverage and social dialogue	AR 17
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Correction: MDR-T --> GDR-T	S1	S1-11 - Persons with disabilities	23.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Please add: "However, the undertaking can use its own definition for accident. In this case it shall disclose that fact."	S1	S1-13 - Health and Safety metrics	AR 27
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Since a work-related accident inherently involves an injury, distinguishing fatalities by injury and accident in this context is redundant. All accidents are already injuries, so the differentiation does not make sense. Better keep wording from previous standard but just delete fatalities.	S1	S1-13 - Health and Safety metrics	AR 28
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Please exclude "number". Rate is sufficient for transparency and more valuable to reader and it is relatable.	S1	S1-13 - Health and Safety metrics	AR 28
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Please add to the first part: "and where an official investigation has show that the case of work-related ill health is causally linked to the company's working conditions and requirements."	S1	S1-13 - Health and Safety metrics	AR 29
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This AR is not required if it is already stated in GDR-M.	S1	S1-15 - Remuneration metrics	AR 34

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This is a non-understandable AR. Why is S1-15 the only metric where you indicate how many previous years need to be reported? This is usually standardized within the integrated reports (usually 5-6 years, depending on when the reporting on this metric started). This AR should be deleted and the company should decide on how many years are reported and harmonize this themselves or include it in CSRD overall.	S1	S1-15 - Remuneration metrics	AR 35
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	This should also be the definition of gross pay as stated in amended ESRS S1 paragraph 44(b) for the gender pay gap. And it should also be the reference on how to calculate the CEO remuneration. Still not enough clarification between remuneration and pay. Too many different definitions and non-alignment with EU Pay Transparency Act, where salary components are not clarified.	S1	S1-15 - Remuneration metrics	AR 36. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The life areas of social security are not clear after discussion with several experts worldwide: Most of the time, the topic acquired disability is secured via the health insurance. So the five areas are not separate, rather then intertwined, at least for reason 1 and 3.	S1	S1-10 - Social protection	34. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Double reporting required due to EU Pay Transparency Act and ESRS. No clear alignment between the two regulations can lead two different approaches in reporting Gender Pay Gap. Trust in reporting will be lost as differences need to be explained to audience.	S1	S1-15 - Remuneration metrics	AR 36. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The statement does not belong here and is inconsistent to all other topical standards. The paragraph should be deleted.	S1	S1 - Interaction with other ESRS	10.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	(19 a) "including the approach in situations where tensions arise between such actions and other business pressures" - voluntary DP in original ESRS. Making voluntary DP mandatory goes against aim of simplification. Initial disclosure requirement S1-4 paragraph 41 is sufficient " whether and how it ensures that its own practices do not cause or contribute to material negative impacts on own workforce".	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	More clarity is needed here. What is the largest countries are not within Scope of CSRD reporting (e.g. outside of the EU). Additionally is the breakdown by gender for the entity responsible for filing the sustainability statement or for all employees across all operations, even those outside the EU?	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	While the ESRS has stated that the purpose of these included data points is to enhance transparency for investors and stakeholders, it is reasonable that the ESRS should take into account the specific perspective and context that private companies operate in to make appropriate rules for reporting. This is one of those cases, as this data point requires the reporting of business sensitive information held by a privately-held company that is generally otherwise not subject to public disclosure. To the extent reporting remains required of private companies, it would seem reasonable for these data points to be amended to only include required gender break downs in countries where the number of employees passed a certain threshold. Further, neither the ISSB IFRS S1/S2 nor the SEC climate disclosure rules require this level of granularity on workforce data. To ensure interoperability, ESRS should align with global standards and avoid imposing unique EU-only burdens. For companies with limited EU operations, this datapoint may not be material to stakeholders or relevant to sustainability impacts, and requiring disclosure would create an undue and inconsistent burden from that presented by other disclosure requirements. The ESRS should allow materiality-based exemptions or simplified reporting for non-EU companies.	S1	S1-5 - Characteristics of the undertaking's employees	23. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	there is a significant reporting burden that comes with reporting on Paragraph 23(d) and (e): Temporary employees and breakdown by gender, and non-guaranteed hours employees.	S1	S1-5 - Characteristics of the undertaking's employees	25.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				Under S1-7 on collective bargaining, we recommend clarification that only national and sectorial CBAs should be in scope for the required metrics. These CBAs cover the widest set of topics and help companies to align with industry best practices. Including local level CBAs in scope should be optional and can be burdensome for companies.	S1	S1-7 - Collective bargaining coverage and social dialogue	
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ESRS S1 - 27 (b) : (Column B appears to be referring to ESRS E5). More clarify is needed here. If the ten largest countries by employee count are all outside the EEA, does the undertaking still need to report the percentage of EEA employees covered by a collective bargaining agreements?	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ESRS S1 - 28 (a) : (Column B appears to be referring to ESRS E5). More clarify is needed here. If the ten largest countries by employee count are all outside the EEA, does the undertaking still need to report the percentage of EEA employees covered by a workers representatives? Additionally, this disclosure feels repetitive to the above mentioned disclosure	S1	S1-7 - Collective bargaining coverage and social dialogue	28. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ESRS S1 - 38 : (Column B appears to be referring to ESRS E5). Recommend making this a "may disclose" metric as collecting data on employees with disabilities is challenging and can be not feasible due to local regulations. Due to the inherent challenges of employees being remiss to disclose if they have a disability, the data reported is likely not a true represenation of an undertakings workforce and will not be decision useful	S1	S1-11 - Persons with disabilities	38.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Question the decision-usefulness of this information in the market and suggest potentially removing this datapoint from the S1 standard.	S1	S1-11 - Persons with disabilities	36.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	NOTE - COLUMN SHOULD READ 'ESRS S1 - 38' - Question the decision-usefulness of this information in the market and suggest potentially removing this datapoint from the S1 standard.	S1	S1-12 - Training and skills development metrics	10.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	It is questionable what added value is provided by this data point vis-a-vis the costs associated with gathering and processing the data, as it provides minimial additional value for investors and stakeholders when the responding entity is a private company. At a minimum, given the variation in sizes in responding companies, the data point should be modified to reflect the share of incidents in relation to the total number of employees rather than as a gross value to make the response comparable between differently sized businesses. Further, given that OSHA (US) and ISO 45001 use specific definitions for "recordable incidents," "lost time," and "fatalities," the definitions included in the ESRS should be aligned whenever possible so as to avoid creating double reporting burdens and inconsistencies for companies already complying with OSHA or ISO frameworks.	S1	S1-13 - Health and Safety metrics	39.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				S1-15 Remuneration - Overall, there should be alignment with EU Pay Directive and individual country directives, and U.S. SEC requirements. Adding another pay gap is not only complex, but makes messaging to employees challenging to explain what the difference in each of these pay gaps are The definition of employee should also be harmonized as the in scope population changes amongst these different reporting obligations.	S1	S1-15 - Remuneration metrics	
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Delete subparagraph (b)(iii)	S1	S1-15 - Remuneration metrics	AR 36
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Given that this data point requires the reporting of business sensitive information held by a privately-held company that is generally otherwise not subject to public disclosure, it appears to undercut ESRS's stated purpose of including these data points in order to enhance transparency for investors and stakeholders. Further, since this disclosure requirement has been included to support the information needs of financial market participants subject to Regulation (EU) 2019/2088, it is not relevant in the context of private companies, and therefore should be excluded or at least caveated to exclude private companies. Further, disclosing the highest-paid individual's remuneration can breach confidentiality and data protection laws, especially in jurisdictions like the US where executive pay disclosure is not mandatory for private companies. For small entities or subsidiaries, this metric could identify individuals, creating GDPR and local privacy compliance issues. Also, neither ISSB IFRS S1/S2 nor SEC climate disclosure rules require this ratio. While GRI 2-21 includes a similar metric, it does not mandate country-level or entity-level disclosure, and it allows flexibility in methodology. ESRS should avoid creating EU-only requirements that undermine interoperability.	S1	S1-15 - Remuneration metrics	44. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended that these metrics should be voluntary and only necessary if the sub-topics of discrimination and human rights incidents are material. The scope of mandatory metrics need to be clarified so that there is no variation in interpretation between undertakings.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	This data point presents multiple issues: 1- The definition of a grievance can be quite broad and employees are often raising human rights grievances while being performance managed or exited to lift their severance entitlements. Quantifying what amounts to report is very ambiguous and does not adequately capture human rights grievances vs. just severance payments to exit an employee. 2- The requirement for a reconciliation, given the ambiguous and broad nature of financial data requested, opens the door for an unreasonably broad disclosure of financial data from a private company unrelated to human rights violations or work-related incidents. 3- It is possible that data will not be specifically tracked as it relates to compensation for human rights violations or employee grievances. Aggregating that data presents an unduly burdensome reporting obligation with no clear connection to any double materiality obligation .4- Compensation for employee grievances and work-related incidents are typically subject to confidentiality agreements. Public disclosure of this compensation would violate these agreement as well as raise privacy concerns. 5- It would be preferable to set the reporting requirement at a "rate per 100 FTE employees" to align with separate employee incident reporting obligations.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (c)
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The added mandatory requirements (reference to materials impacts, risk and opportunities) could potentially increase the reporting complexity	S1	S1-1 - Policies related to Own workforce	12.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Same as above	S1	S1-1 - Policies related to Own workforce	13.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	The amendments to the requirements on how a company engages with its own workforce streamlined the process	S1	S1-2 - Engagement with own workforce and workers' representatives, existence of channels for own workers to raise concerns or needs and approaches to remedy	15.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The requirement of disclosing actions to mitigate or remediate material negative impacts on the workforce is now streamlined, but more clarity is needed for the wording "key actions"	S1	S1-3 - Actions and Resources related to Own workforce	19.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	The requirement now makes the detail level of information to disclose	S1	S1-3 - Actions and Resources related to Own workforce	AR 8
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Evaluating differently the top management level only creates more disalignment. In the initial ESRS, this requirement was for both top management and employees.	S1	S1-8 - Diversity metrics	29.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The qualifier "severe" in human rights disclosures should be maintained because it provides a clear threshold that focuses reporting on the most significant and material impacts. Removing the concept of severity broadens the scope excessively, obliging companies to report on every minor or hypothetical issue, which dilutes attention from genuinely serious human rights risks and undermines comparability across companies. The concept of severity is well-established in international human rights frameworks such as the UN Guiding Principles and the OECD Guidelines, ensuring alignment with globally recognized due diligence standards. Keeping the severity threshold helps companies prioritize the most critical risks, enhances the usefulness of disclosures for stakeholders, and avoids unnecessary reporting burden on less material issues.	S1	S1-16 - Incidents of discrimination and other human rights incidents	46. (b)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				Under S1-7 on collective bargaining, we recommend clarification that only national and sectorial CBAs should be in scope for the required metrics. These CBAs cover the widest set of topics and help companies to align with industry best practices. Including local level CBAs in scope should be optional and can be burdensome for companies.	S1	S1-7 - Collective bargaining coverage and social dialogue	
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				S1-15 Remuneration - Overall, there should be alignment with EU Pay Directive and individual country directives, and U.S. SEC requirements. Adding another pay gap is not only complex, but makes messaging to employees challenging to explain what the difference in each of these pay gaps are The definition of employee should also be harmonized as the in scope population changes amongst these different reporting obligations.	S1	S1-15 - Remuneration metrics	

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Since other labor-related human rights each have different characteristics, child labour, forced labour, and privacy should be addressed separately.	S1	S1 - Objective	4.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	We disagree as now the "tension" description becomes a "shall" criteria (initally, it was a "may" datapoint). The wording "where potentially / significant tension arise" should be added as otherwise it would counteract the intention to simplify the reporting requirements.	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The proposal introduces a new term, 'work-related accident,' which is not defined anywhere in the standard. This fundamental omission immediately introduces significant misleading ambiguity and confusion, leaving its precise meaning open to subjective interpretation by different undertakings and jurisdictions. Suggestion: Amend to: The objective of this DR is to allow an understanding of the coverage, quality and performance of the health and safety management system established to prevent work-related injuries, ill-health and fatalities.	S1	S1-13 - Health and Safety metrics	39.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The current absence of a clear, standardized definition for "work-related ill health" presents a critical vulnerability within the disclosure requirements. Suggestion: Add the comprehensive definition of "work-related ill health" to the annex or guidance notes, as per the previous version: "Work-related ill health can include acute, recurring, and chronic health problems caused or aggravated by work conditions or practices. These include musculoskeletal disorders, skin and respiratory diseases, malignant cancers, diseases caused by physical agents (for example, noise-induced hearing loss, vibration-caused diseases), and mental illnesses (for example, anxiety, post-traumatic stress disorder). For the purpose of the required disclosures, the undertaking shall, at a minimum, include in its disclosure those cases outlined in the ILO List of Occupational Diseases"	S1	S1-13 - Health and Safety metrics	40. (b)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The definition of "recordable work-related accidents" within the EFRAG proposal explicitly encompasses both work-related injury and ill-health. 1)Duplication and Misalignment with Simplification: If "recordable work-related accidents" includes ill-health, and there is also a separate requirement for "recordable work-related ill health" (40. (d)), this creates a direct duplication of reporting requirements. This redundancy contradicts the fundamental objective of simplification and streamlining data collection, leading to unnecessary complexity and potential inconsistencies in reported figures. 2) Data Collection Challenges for Non-Employees (Privacy Concerns): The most critical issue arises from the inclusion of ill-health, particularly for non-employees. While injury data for non-employees working on site is generally accessible (e.g., through incident reports), collecting detailed ill-health data for non-employees is exceptionally difficult, if not impossible, due to stringent data privacy regulations. In most countries, especially within the European Union, policies like GDPR severely restrict an undertaking's access to, and processing of, sensitive medical information for individuals not directly employed by them, adding a challenge that was already limited from 40. (d). Amend to: "the number and rate of recordable work-related injuries.	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	ANNEX II to the [Draft] Amended ESRS Exposure Draft July 2025: This definition, rooted in OSHA criteria, introduces ambiguity through two critical flaws: 1)Loss of Consciousness as a Standalone Criterion The current framework treats all loss of consciousness incidents as recordable, regardless of causation (e.g., workplace hazards like chemical exposure vs. pre-existing conditions like epilepsy). This overinclusiveness distorts workplace safety metrics by conflating occupational and non-occupational factors. Further, severity variations (e.g. brief first-aid cases vs. multi-day absences) are unaddressed, preventing nuanced risk assessment. 2)Undefined "Significant Injury" The term "significant injury" lacks objective parameters, leading to inconsistent interpretation across medical professionals and jurisdictions. For example, a laceration requiring stitches might be deemed "significant" in one context but not another. This subjectivity undermines data harmonization and comparative analysis. Suggestion to delete: Deletion of "loss of consciousness" and "significant injury", remaining "Work-related injury or ill health that results in any of the following: death, days away from work, restricted work or transfer to another job, medical treatment beyond first aid or ill health diagnosed by a physician or other licensed healthcare professional, even if it does not result in death, days away from work, restricted work or job transfer, medical treatment beyond first aid"	S1	S1-13 - Health and Safety metrics	40. (c)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The definition of "recordable work-related accidents" within the EFRAG proposal explicitly encompasses both work-related injury and ill-health, and critically, it also includes fatalities. To emphasize and uphold the clear EFRAG decision regarding the deletion of 'days lost to fatalities' – a decision made due to the inherent lack of a robust and comparable methodology for such calculations – it is fundamental to sharpen the interpretation of this requirement. Therefore, while the term "recordable work-related accident" encompasses fatalities, the calculation of "days away from work" must be understood to apply solely to non-fatal incidents. Suggestion: Amend to: with regard to the undertaking's employees, the number of days away from work related to work-related injuries or work-related ill health	S1	S1-13 - Health and Safety metrics	40. (e)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The inherent diversity in national definitions for "work-related accidents" means that data collected from different countries within the same undertaking will not be directly comparable. This significantly complicates the ability to aggregate global health and safety data consistently, limiting an undertaking's capacity to gain a holistic and accurate view of its performance across all operations, and provide precise and reliable information essential for robust management of health and safety aspects, as expected by financial markets.. Therefore, suggestion of deletion of "work-related accidents, the undertaking shall use the definitions as per the national laws of the countries where the employees are based."	S1	S1-13 - Health and Safety metrics	AR 27
Excels	Polish Chamber of Chemical Industry	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The requirement to disclose the annual ratio of the highest paid individual to the median remuneration of employees lacks clarity. It is not clear whether "highest paid individual" refers to an employee or to any person within the undertaking's own workforce. Published reports show inconsistent reporting practices. This should be clarified to ensure comparability.	S1	S1-15 - Remuneration metrics	44. (b)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	§a) This new formulation does not simplify but complexify our reporting, we would suggest to come back to previous formulation	S1	S1-5 - Characteristics of the undertaking's employees	23.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The publication of all these indicators shall be limited to employees. The mention to "other workers" should be deleted. Indeed the latency between occupational exposure, the onset of the disease, and death makes it impossible to identify deaths due to occupational diseases among subcontractors' employees, as these usually occur several years after the work was performed.	S1	S1-13 - Health and Safety metrics	AR 26
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	This indicator shall be deleted, it does not provide useful information	S1	S1-15 - Remuneration metrics	44. (b)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	Outside the EEA, the notion often does not exist and is therefore impossible to collect. Therefore this paragraph could be deleted.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	UNESPA (Spanish Association of Insurers and Reinsurers)	Association of financial institutions	Spain			I disagree	S1-3 §19(a) (Previously §S1-4 38(a)) does not require to report key actions taken, planned or underway to cause positive impacts and to manage risks and opportunities. It should also require these actions because this would be critical for undertakings that did not identify material negative impacts.	S1	S1-3 - Actions and Resources related to Own workforce	19. (a)
Excels	UNESPA (Spanish Association of Insurers and Reinsurers)	Association of financial institutions	Spain			I disagree	S1-5 §23(f) (previously S1-6 §50(c)) should clearly state how the denominator of employee turnover is calculated. As stated, it can be interpreted that the denominator can consider only employees who leave voluntarily, only employees who leave due to dismissal and retirement or only employees who leave due to death in service. For better understanding the "or" conjunction should be replaced by the "and" conjunction.	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	ASD					I disagree	All reporting obligations under S2 are qualitative and not quantitative, therefore inconsistent across companies and industries given their subjectivity in interpretation. The Exposure Draft recognises the issue, yet it does not appear to solve it.	S2	S2 - Objective	1.
Excels	ASD					I partially agree and partially disagree	The standard was simplified, but we still suggest to provide further guidance on how to directly engage workers in value chain, or to eliminate this data point	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	13.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	A boolean DP (whether) will complicate the structure of a generic GDR-P. Suggestion: create a separate datapoint in S2-1: "It shall state whether policies cover specific groups of value chain workers (e.g. particular age groups or workers in a particular factory or country) or all value chain workers." Or, create an AR to specify content (without a boolean).	S2	S2-1 - Policies related to value chain workers	10.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	This DP would likely be overlapping with the generic GDR-A content. Transforming it to a AR would allow to include the content in the GDR-A. "The undertaking shall describe key actions taken, planned or underway, to prevent, mitigate and remediate material negative impacts on value chain workers, including its approach in situations where tensions arise between such actions and other business pressures (for example, in procurement or sales)."	S2	S2-3 - Actions and resources related to value chain workers	18. (a)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Should be labelled 16a	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Should be labelled 16b	S2	S2-3 - Actions and resources related to value chain workers	18.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	This DP would likely be overlapping with the generic GDR-A content. Transforming it to a AR would allow to include the content in the GDR-A. "The undertaking shall describe key actions taken, planned or underway to prevent, mitigate and remediate material negative impacts on affected communities, including its approach in situations where tensions arise between such actions and other business pressures (e.g. its practices in relation to planning and land acquisition or exploitation and financing raw materials)."	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	Chamber of Labour, Austria	Trade union	Austria				The BAK argues that some important nuances are lost as a result of the proposed simplifications: For example, it makes sense to design whistleblowing mechanisms and complaint channels differently, depending on whether they are designed for employees in the value chain, local communities or consumers. These are instruments that must be designed as effectively as possible in the interests of the employees, the other affected parties, but also the companies, because they enable information to be passed on quickly to the company and remedial action can be taken.	S2		
Excels	Chamber of Labour, Austria	Trade union	Austria				The reporting obligations on the systematics of negative impacts and risks are to be partially abolished, this is to be criticized. For example, the elimination of reporting obligations on problems faced by employees in the supply chain that are related to the company's strategy or business model (formerly in ESRS SBM-3, 10 and 11). In addition, reporting obligations are sometimes simplified to such an extent that relevant parts are omitted or the original meaning is no longer recognizable, such as:	S2		
Excels	Chamber of Labour, Austria	Trade union	Austria				1. Formerly ESRS SBM-3, 12 is to be moved to the NMIG. The elimination of reporting obligations on specific impacts on specific groups would lead to a deterioration in the understanding of impacts and should therefore be maintained. 2. The negative reporting obligation regarding information about employees in the supply chain is to be abolished (formerly S2-2, 24.), this is to be criticized, reference is made to the above remarks on negative reporting obligations. 3. Former S2-3, 27.c and d should be retained, as it is essential for the question of the existence of opportunities to communicate problems of workers in the supply chain to the company, how and in what form these opportunities exist and to what extent the company itself contributes to them. 4. Formerly S2-4, 36., a restriction is inserted according to which the reporting obligation should only exist "subject to the relevant privacy regulation". This unclear wording should be deleted, as data protection provisions must be observed and applied anyway, but the insertion of this exception unnecessarily restricts the reporting obligation.	S2		

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Information on the grievance mechnism should be removed from S2-2, as this is addressed in the G-standard. Alternatively, it should be noted in the DR that a reference to the Governance information is sufficient, if there is no separate channel for value chain workers.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Leverage effects should be eliminated due to weak market position in several sectors	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It is recommended that policy disclosures be kept general and allow companies to indicate sub-groups if applicable (remove examples).	S2	S2-1 - Policies related to value chain workers	10.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It is recommended not to have this level of granularity to call out marginalized groups	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-4 - Targets related to value chain workers	21.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-4 - Targets related to value chain workers	AR8
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It is recommended to add clarification that when disclosing policies, companies don't need to point out individual components of the policy to different groups	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	For social standards the removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	- has a new metric been introduced here?, previously only "severe incidents" were mentioned; also in indicator 14 in Table 3 in Annex I Delegated Regulation (EU) 2022/1288 - Question: does this data point correspond to the old data point in ESRS S2.36? "The undertaking shall also disclose whether severe human rights issues and incidents connected to its upstream and downstream value chain have been reported and, if applicable, disclose these."	S2	S2-3 - Actions and resources related to value chain workers	19
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	4a: secure employment is defined quite unspecific/ misleading	S2	S2 - Objective	4.
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I disagree	The depth of workers in the value chain should be limited to Tier 1 suppliers. Under (b) It is unreasonable to expect disclosure on working conditions of downstream entities. These are entirely beyond our control, and in our case would include customer and customer working conditions. Under (d), whilst commodities workers are important, the relationship, and even traceability of commodities extracting workers and a product used by a company is very tenuous -e.g. steel used in equipment purchased - whilst the grade of steel is part of the equipment specification, it will be . almost impossible for the company to identify. the ultimate source (mine) and influence conditions of the workers in that undertaking	S2	S2-3 - Actions and resources related to value chain workers	8.
Excels	Materiality	Consultant (including software vendor)	Poland			I partially agree and partially disagree	It might be benefitial (either in the Application Requirements or the glossary) to clarify the distinction between a definition of: a. a company policy, which sets its commitments regarding its behaviour towards workers in the value chain and b. a supplier code of conduct, which sets expectations for suppliers regarding the treatment of their employees. From our experience working with companies, the distintion is not always clear.	S2	S2-1 - Policies related to value chain workers	10.
Excels	Materiality	Consultant (including software vendor)	Poland			I partially agree and partially disagree	Until now, companies' disclosures in this chapter have focused on engagement with the employers of workers in the value chain, rather than directly with the workers themselves. Their perspectives are rarely collected to inform eg. materiality assessments or identify negative impacts. Very few companies conduct second+ tier audits or implement (anonymous) worker voice surveys to gather feedback. ESRS could clarify whether the engagement should focus on the supplier (employer) or the supplier's workers, whose voices are intended to be heard.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	13.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Similar to comment for ESRS 1 Appendix A: the social susubtopics in parenthesis are not exhaustive of the sub-topic title/ human rights instruments mentioned in CSRD. Hence all parentheses should start with 'including'.	S2	S2 - Objective	4.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Former disclosure of whether and how it is ensured that own practices do not cause or contribute to material negative impacts on workers in the value chain has been deleted and should be reinstated. Key part of UNGPs/OECD Guidelines and key issue in what is driving impacts at supplier levels. 'The undertaking shall disclose whether and how it takes action to avoid causing or contributing to material negative impacts on value chain workers through its own practices, including, where relevant, in relation to procurement, sales and data use. This may include disclosing what approach is taken when tensions arise between the prevention or mitigation of material negative impacts and other business pressures.'	S2	S2-3 - Actions and resources related to value chain workers	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	The disclosure requirement should be expanded to also include metrics in addition to target, to ensure metrics are captured at topical level for S2,S3,S4. Inspiration can be taken from E4-5 including para 21: 'In addition to paragraph 20 and in accordance with [Draft] Amended ESRS 2 GDR-M, the undertaking shall report metrics related to its material impacts on biodiversity and ecosystems.'	S2	S2-4 - Targets related to value chain workers	20.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	Centralizing in ESRS 2 avoids redundancies and ensures consistency in presenting policies and commitments. Moving transversal content facilitates comparability across reports. However, it requires clarity to avoid reducing the visibility of value chain workers' specific aspects.	S2	S2-1 - Policies related to value chain workers	10.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	Merging S2-2 and S2-3 into a single disclosure reduces duplication and administrative burden while improving clarity. The streamlined structure ensures coherence between engagement processes, grievance mechanisms, and remediation. This consolidation supports more effective reporting.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	13.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new format makes the disclosure more concise and easier to understand, while avoiding overlaps with ESRS 2. Moving duplicated elements to GDR-A improves consistency across standards. The focus on key actions, mitigation, remediation, and resources ensures clarity.	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The simplification reduces redundancy and creates a clearer link with ESRS 2 GDR-T, improving coherence. Keeping targets at S2-4 while the process is covered in GDR-T ensures consistency and avoids duplication.	S2	S2-4 - Targets related to value chain workers	20.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I partially agree and partially disagree	Suggestion/question: Since this information is central and overarching, why is it not integrated as AR in ESRS 1 chapter 3.1. ?	S2	S2 - Objective	3.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Essential, given the potential dilemma that value chain workers are "between different undertaking's reportings" and therefore reporting on it is challenging but crucial in a global economy.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I partially agree and partially disagree	Suggestion: Include "missing information" from NMIG 6 for para. 15 that might be crucial: "b) Are the channels known and accessible to the concerned stakeholder group?". E.g. by including: "They include grievance mechanisms, hotlines, trade unions, works councils, dialogue processes, as well as, under certain circumstances, whistleblowing mechanisms." It must be stated how the undertaking guarantees that the specific channels/mechanisms are known and accessible to the concerned stakeholder (group)." By adding this, NMIG 6 for para. 15 and a missing part can be accommodated.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	AR 3
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Now uses UNGP-terminology (Causation, contribution or direct linkage to impacts as well as prevent, mitigate or remediate impacts). Helpful to align with other reporting requirements/frameworks like LkSG	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Original ESRS, ESRS 2 paragrapg 65 f states: if relevant, whether and how the undertaking makes the policy available to potentially affected stakeholders, and stakeholders who need to help implement it. Revised ESRS S2 AR 1 is making this dislcosure as "example of policy apects to disclose", which might create differnent interpretation even within one report. Suggested to either remove this DP or move back to ESRS 2 with amended wording.	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Word "Severe" has been removed from the disclosure of "human rights incidents", while reference to SFDR PAI indicator remained, where disclosure of "severe human rights incidents" remained, this creates inconsistency. Suggested to add "severe" back to the DR. In addition, definition of "severe" should be provided in alignment with internationally recognized standards.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Consolidation exercise limits duplication of datapoints to consider during preparation; allows having overarching disclosure and refer to this disclosure in topical chapters	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We propose retaining former S2 27 (d) on how the undertaking involves stakeholders in ensuring the effectiveness of their grievance mechanisms, in line with GRI 2-25-e.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	For the purpose of simplification, data points on the availability of channels such as grievance mechanisms from S1, S2, S3 and S4 could be consolidated into one data point covering all categories of stakeholders and moved to ESRS 2. This would be equivalent to the consolidation done for the data point on the human rights policy commitment. This would also increase alignment with GRI 2-25. In addition, the data point could be further aligned verbatim with GRI 2-25-b and e, for greater clarity and interoperability.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	For the purpose of simplification, data points on the general approach to and processes for providing or contributing to remedy from S1, S2, S3 and S4 could be consolidated into one data point covering all categories of stakeholders and moved to ESRS 2. This would be equivalent to the consolidation done for the data point on the human rights policy commitment. This would also increase alignment with GRI 2-25. In addition, the data point could be further aligned verbatim with GRI 2-25-c, for greater clarity and interoperability.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	16.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining remedy actions (former S2 para 32(b)) as a stand-alone data point, in line with GRI 3-3-d-ii. Having a standalone data point ensures that this information is not overlooked and it is easily identifiable by users and stakeholders.	S2	S2-3 - Actions and resources related to value chain workers	18. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Insert “and grievance mechanisms” after “policies” in the first sentence. REASON: For companies’ grievance mechanism, outreach (the process of informing potential claimants of the existence of grievance mechanisms and how to access them) is key. see: https://wrap.warwick.ac.uk/id/eprint/185392/. This supports S2 DR 15 and is an alternative to our suggested change to it.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	AR 1
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Insert “communicates their existence to potential claimants” at the end of the last sentence. REASON: For companies’ grievance mechanism, outreach (the process of informing potential claimants of the existence of grievance mechanisms and how to access them) is key. See our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf and draft paper https://warwick.ac.uk/fac/soc/law/research/centres/chrp/publications/corporate_disclosure_and_mhrdd_june_2026_ext.pdf. This is an alternative to our suggested change to S2 AR 1 for DR 10.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Add a new paragraph: “In accordance with ESRS 2 GDR-A key actions describe all actual remedies provided for negative human rights impacts.” REASON: Specific remedy disclosures are essential to the usefulness of disclosures on human rights actions. see our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf and draft paper https://warwick.ac.uk/fac/soc/law/research/centres/chrp/publications/corporate_disclosure_and_mhrdd_june_2026_ext.pdf.	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Add a new AR: “The disclosure will include the number, type (by human right negatively impacted) and outcome of the human rights claims.” REASON: These are essential metrics needed to make these disclosures useful for relevant audiences. see https://wrap.warwick.ac.uk/id/eprint/185392/ and https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and referenced citations. This is similar to the use of S1 DR 46.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	the removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency.. The disclosure requirement related to human rights incidents should be revised to limit reporting exclusively to the number of incidents in all social standards. Providing detailed information on each case may lead to legal and operational complexities. A more focused approach on quantitative information would ensure proportionality and safeguard sensitive information, while still maintaining transparency.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Very confusing why previous sub-sub-topics are sometimes moved to extra points and sometimes in brackets. This will lead to huge discussions on which level materiality is going to be defined, whether to use topics in front or in the brackets. Materiality analysis needs to be fully and new implemented due to this change. Only resonable approach: Leave out sub-topics in general and just list the previous sub-sub-topics one after each other. Furthermore, a proper mapping won't be possible like this!! We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one.	S2	S2 - Workers in the value chain	4
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Reduction in granularity is received very well.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	The level of detail for previous no. 28 (assessment of value chain workers' awareness and trust) got reduced and is well perceived.	S2	S2-3 - Actions and resources related to value chain workers	15.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	What is meant with resources (personnel, money, time…)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can “KEY” actions be identified? Delete the word “key”.	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Delete the word "key". Moreover, The request is not clear; referring to 'procurement or sales' does not help interpret the data point	S2	S2-3 - Actions and resources related to value chain workers	18. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It would be useful to specify how this can be aligned with the scope of the Corporate Sustainability Due Diligence Directive (CSDDD), in order to ensure consistency between reporting obligations and due diligence requirements across regulatory frameworks.	S2	S2 - Objective	7.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The requirement to assess the effectiveness of actions across all social standards should be removed. Effectiveness is a complex concept that varies significantly depending on the nature of the action, and in any case, it does not allow for meaningful comparability—neither across actions nor between companies. Maintaining this requirement may lead to inconsistent interpretations and reporting practices.	S2	S2-3 - Actions and resources related to value chain workers	18. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Stakeholder engagement is unnegotiably relevant for conducting effective human rights due diligence and is explicit in CSDDD. However, neither international standards not CSDDD require specifically for stakeholders to participate in metrics or target-setting. This Standard should not create more burden or requirements but rather align with due diligence obligations and best practices.	S2	S2-4 - Targets related to value chain workers	21.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The request is not clear .	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The definition of "migrant worker" needs to be clarified, as it often varies across contexts and legal frameworks. Understanding the condition of migrant workers within global value chains remains particularly challenging, especially given the complexity of multinational operations across diverse regions, labor markets, and regulatory environments. The suggestion is to reintroduce "Where applicable" as per former 23.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This is not a simplification therefore we suggest to eliminate the brackets or insert "or" - NEW	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	It is unclear why the interactions with other Standards are limited to S1 and therefore exclude S3 and S4 while the 4 social standards are connected in the Set 1. For instance, the general approach to providing remedies and/or grievance mechanisms is equally relevant to own workforce, value chain workers, consumers and affected communities. We recommend clarifying these interactions and extending them to these two standards to reflect this broader applicability (cf. related comment on S3 §7 and S4 §8).	S2	S2 - Interaction with other ESRS	9.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend slightly revising the wording of this AR, as the phrasing of amended AR 16 was, in our view, clearer. One example of possible redrafting is: "Among the policy aspects that can be disclosed, the undertaking can provide an illustration of the types of communication of its policies to those individuals, group of individuals or entities for whom they are relevant, either because they are expected to implement them (for example, the undertaking's employees, contractors and suppliers), or because they have a direct interest in their implementation (for example, own workers and investors)." In the current writing, starting with the term "channels" may be misleading, as it overlaps with the terminology used in DR S2-2.	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Insert "and grievance mechanisms" after "policies" in the first sentence. REASON: For companies' grievance mechanism, outreach (the process of informing potential claimants of the existence of grievance mechanisms and how to access them) is key. see: https://wrap.warwick.ac.uk/id/eprint/185392/. This supports S2 DR 15 and is an alternative to our suggested change to it.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	AR 1
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Insert "communicates their existence to potential claimants" at the end of the last sentence. REASON: For companies' grievance mechanism, outreach (the process of informing potential claimants of the existence of grievance mechanisms and how to access them) is key. See our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf CITE DISCLOSURE PAPER. This is an alternative to our suggested change to S2 AR 1 for DR 10.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Add a new paragraph: "In accordance with ESRS 2 GDR-A key actions describe all actual remedies provided for negative human rights impacts." REASON: Specific remedy disclosures are essential to the usefulness of disclosures on human rights actions. see our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf CITE DISCLOSRUE PAPER.	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Add a new AR: "The disclosure will include the number, type (by human right negatively impacted) and outcome of the human rights claims." REASON: These are essential metrics needed to make these disclosures useful for relevant audiences. see https://wrap.warwick.ac.uk/id/eprint/185392/ and https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and referenced citations. This is similar to the use of S1 DR 46.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We propose that high risk sectors for human rights and labour right violations should disclose processes and targets to manage material impacts, risks and opportunities related to value chain workers. If targets do not exist, companies need to explain why.	S2	S2-4 - Targets related to value chain workers	5.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	"Subject to the relevant privacy regulation" - This is ambiguous, and requires clarification about whether this statement refers to local privacy regulations or GDPR etc.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Since sub-sub topics were eliminated, it is not clear why they are still indicated in brackets of sub-topics and what is expected to be disclosed. We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one.	S2	S2 - Objective	4.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	The request is not clear.	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	The definition of "migrant worker" needs to be clarified, as it often varies across contexts and legal frameworks. Understanding the condition of migrant workers within global value chains remains particularly challenging, especially given the complexity of multinational operations across diverse regions, labor markets, and regulatory environments. The suggestion is to reintroduce "Where applicable" as per former 23.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14. (a)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	The request is not clear; referring to 'procurement or sales' does not help interpret the data point.	S2	S2-3 - Actions and resources related to value chain workers	18. (a)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency	S2	S2-3 - Actions and resources related to value chain workers	19.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This is not a simplification therefore we suggest to eliminate the brackets or insert "or".	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Inconsistency of severe: The "severe" qualifier here has been kept for human rights issues and incidents connected to workers in the value chain. This is inconsistent with S1 and S3. We support having the word "significant" as this is an important connection to risk based HRDD. Keeping "severe" is important for the ESRS to remain in line with the principle of risk-based due diligence as outlined in the UNGPs. Inconsistency of "issues and incidents" : Why does S2 use the teminology "issues and incidents" here where in S1 and S3 it's just HR incidents? We support using the term "incidents" and not "issues"	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The currently applicable version (ESRS S2 paragraph 21) specifies that disclosures on engagement with value chain workers refer to material impacts on them. In the proposed draft ESRS S2 paragraph 13, this clarification has been removed. In addition, the proposed draft ESRS S2 paragraph 14 refers to actual and potential impacts on value chain workers, without specifying that this only concerns material impacts. This raises the question of whether section S2-2 is intended to address value chain workers engagement more generally, without reference to material impacts. If the intention is to preserve the current meaning, in our view this should be explicitly clarified, confirming that engagement relates specifically to material impacts.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Draft AR 2 states that the engagement with value chain workers can take different forms, such as information. Whereas, Annex II Acronyms and Glossary of Terms defines stakeholder engagement as an ongoing process of interaction and dialogue between the undertaking and its stakeholders that enables the undertaking to hear, understand and respond to their interests and concerns. It is recommended to harmonise these formulations so that the concept of engagement is applied consistently across the standard.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	AR 2
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	In our view, companies should disclose the processes through which they support or require the availability of the channels available to value chain workers to bring their concerns or needs. This helps show whether such mechanisms exist only formally or are genuinely accessible and used, and allows stakeholders to better assess the effectiveness of a company's due diligence and ethical practices across the value chain.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	why par b) is not included under working conditions?	S2	S2 - Objective	4. (b)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It seems metrics are not required within the framework of this standard. Should it be deleted?	S2	S2 - Objective	5.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	To be added: "Or for those who may encounter risks and opportunities"	S2	S2 - Objective	7.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We would suggest to add something like, Even if certain labour-related human rights sub-topics—in particular, child labour and forced labour- and human trafficking are considered non-material in the double materiality assessment, the company should still state whether its workforce policies specifically address these issues.	S2	S2-1 - Policies related to value chain workers	11.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	par 18 a and b are referred to negative impacts. should not be actions for positive impacts reported? I suggest to add something like, "beside the reported requirements, as described in ESRS 2 GDR-A, in particular for material negative impacts, the undertaking shall also....	S2	S2-3 - Actions and resources related to value chain workers	18.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Should this be considered a metric?	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We would suggest to clarify this point, as it may cause confusion with what should be considered under the G1 (management of suppliers)	S2	S2-3 - Actions and resources related to value chain workers	AR 7
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	to be added: if the undertaking has not adopted engagement actions with workers in the value chain or its representatives for the purpose of target-setting and/or tracking performance against those targets, it shall disclose this fact	S2	S2-4 - Targets related to value chain workers	21.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The draft proposes an amendment to consolidate DR SX-2 and SX-3 from Standards S1 to S4 into a single DR SX-2, in view of the interconnection between the three elements engagement, channels for raising concerns, and remediation. As a result, the numbering of all DRs in Standards S1 to S4 would shift by minus one. This would entail significant effort for renumbering across all external and internal documentation and publications. A reduction of this administrative burden would therefore be desirable.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	13.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	§24 was deleted to avoid the burden of a negative statement. However, if there is no engagement as required by §14, a negative statement will still be necessary. Otherwise, the "shall" in §14 will simply be ignored.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	§27(deleted).c is particularly relevant. Simply providing a channel as required by §15 is not sufficient, and deleting certain "side" information such as that in former §27 could likely result in a risk of "social washing."	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Privacy regulation concerns leading to non-disclosure of severe human rights incidents are questionable if no alternative requirement is provided.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Rather lightweight, and the scope pursued by including those ARs is not clear.	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Rather lightweight, and the scope pursued by including those ARs is not clear.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	AR 2
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S2 Workers in the Value Chain, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S2 Workers in the Value Chain, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	S2	ESRS S2 - Objective	1.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	S2	ESRS S2 - Objective	5.
Excels	Allianz SE	Insurance	Germany			I disagree	Reinsert the example of franchisees in the mentioned examples on the objective of ESRS S2 (Objective of Amended ESRS S2 Workers in the value chain point 8)	S2		
Excels	Allianz SE	Insurance	Germany			I disagree	Do not add an additional disclosure requirement by adding "In particular, it shall state whether it has a grievance mechanism . It shall also explain how it assesses the effectiveness of these channels."	S2	S2-3 - Actions and resources related to value chain workers	15.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	deletion of "severe" leads to difference to SFDR requirement and should therefore be changed again and "severe" should be added, otherwise, extended reporting burden	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	S2	S2-4 - Targets related to value chain workers	20.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It should also include at least reference to ESRS S4 Consumers and end-users, as workers in the value chain may be end-users of IT systems provided by the undertaking.	S2	S2 - Objective	9.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"directly their attention" should be replaced with "directly its attention"	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Whole phrase "human rights incidents" should be in bold as it is a separate defined term.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The reference list of regulations should be aligned with the list in ESRS S1 as many workers in the value chain are employed in the EU.	S2	S2 - Objective	2.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The second paragraph should include a reference to workers' representatives: "If the undertaking has policies for protecting individuals that use these channels against retaliation, including workers' representatives, and they are disclosed in [Draft] Amended ESRS G1-1, the undertaking may refer to that disclosure."	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	AR 4
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It might be benefitial (either in the Application Requirements or the glossary) to clarify the distinction between a definition of: a. a company policy, which sets its commitments regarding its behaviour towards workers in the value chain and b. a supplier code of conduct, which sets expectations for suppliers regarding the treatment of their employees. From our experience working with companies, the distintion is not always clear.	S2	S2-1 - Policies related to value chain workers	10.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Until now, companies' disclosures in this chapter have focused on engagement with the employers of workers in the value chain, rather than directly with the workers themselves. Their perspectives are rarely collected to inform eg. materiality assessments or identify negative impacts. Very few companies conduct second+ tier audits or implement (anonymous) worker voice surveys to gather feedback. ESRS could clarify whether the engagement should focus on the supplier (employer) or the supplier's workers, whose voices are intended to be heard.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	13.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Key topics like adequate wage, harrassment, and persons with a disability are lacking	S2	S2-1 - Policies related to value chain workers	11.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	For reporting on workers in the value chain, the same approach should apply as for reporting on own employees. This means not only the policy principles, but also the statistics. More specifically, for points 14 through 16: please apply the same requirements as for reporting on own employees.	S2	S2-1 - Policies related to value chain workers	14.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	FGAs are normally strictly confidential. A general disclosure on the presence of GFAs is possible, but specifics are impossible, especially for companies with tens of thousands of suppliers	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I disagree	Engagement with stakeholders, especially value chain workers, it something that many undertakings can experience as something complex. By removing several of the listed means of engagement (following the phrase "this shall include..."), the requirement loses important contextual clarity. Instead of removing these elements, it might be more helpful to revise the wording to "this can include...". This would preserve the informative value of the listed approaches without making them mandatory, giving undertakings clearer guidance on how engagement can be conducted and how it may inform decision-making.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The former paragraph 27(d) appears to have been partially moved to paragraph 15. However, the reference to the monitoring and tracking of complaints has been removed. Monitoring and tracking are key components of an effective grievance mechanism.	S2	S2-3 - Actions and resources related to value chain workers	15.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Depending on ESRS S1 and as noted in ESRS S2.9 different legal systems may hamper comparability for S1 and S2	S2	S2-1 - Policies related to value chain workers	
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The DASB sees this DR as an example of a neccesity to disclose targets without a requirement to disclose the related current metric (actual). The DASB questions the informational value of such a disclosure requirement	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	20.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It no longer refers only to "severe human rights issues and incidents" but to "human rights incidents" in general. The term "severe" should be reintroduced here. In the Log of Amendments, "severe" is still included in the text.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	19.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	More guidance is necessary for this DR. As it currently stands, it is not clear to us what the objective here is. Experience shows companies tend to resort to boilerplate disclosures here, such as repetition of UNGPs (e.g. if we cause, we provide remedy, if we contribute, we participate in providing remedy) which is of little benefit to users.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	16.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Suggest replacing "as part of its" with "at different stages of" --> how it engages, at different stages of its ongoing due diligence process, directly with value chain workers... Stakeholder engagement has a role at various stages of the due diligence process and if information is provided "in bulk" it does not provide a full picture.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	We do not fully understand this AR. In particular the concept of "harms identified" (vs. actual impacts) is unclear, and as such we suggest further editing this AR for clarity / understandability.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	AR 5
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The caveat "subject to privacy regulations" should be moved to apply to disclosure of details of reported human rights incidents only, not the full DR. The other caveat "if applicable" should be removed fully. If incidents have been reported, the fact that such reporting has been done should always be disclosed. The company could also then provide their response to such reports.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Companies should also be required to disclose, whether they have assessed their own involvement to the impacts and what the conclusion of such assessments are. As noted in the related AR, actions that companies are expected to take differ depending on their involvement (cause, contribute, linked to) to the impact. The only way for users to assess whether companies actions are appropriate and adequate is for them to be transparent about their level of involvement.	S2	S2-3 - Actions and resources related to value chain workers	18.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	It is not clear how this AR related to para. 10.	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Since sub-sub topics were eliminated, it is not clear why they are still indicated in brackets of sub-topics and what is expected to be disclosed. We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one	S2	S2 - Objective	4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Remove. Value chain workers should be limited to Tier 1/direct business relationships vs indirect business relationships. This is not incompatible with value chain language in the CSRD which refers to the undertaking's value chain as "its own operations, its products and services, its business relationships and its supply chains." Undertakings should spend their efforts and resources on direct business relationships where they have more influence and/or control. Furthermore, examples should be included in the NMIG.	S2	S2 - Objective	8. (d)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	In some industries there is no possibility ot have direct engagement with VCWs, this should be amended to allow the engagement be done via proxy / representatives.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The definition of "migrant worker" needs to be clarified, as it often varies across contexts and legal frameworks. Understanding the condition of migrant workers within global value chains remains particularly challenging, especially given the complexity of multinational operations across diverse regions, labor markets, and regulatory environments. The suggestion is to reintroduce "Where applicable" as per former 23	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Remove or clarify what is meant by "other outcomes that the undertaking has reached with workers' representatives."	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	It is not a practice in our industry to extend the grievance mechanism to VCWs, should be ammended for the Whistleblowing mechanism or other similar channels available for VCWs.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Shall be updated according to previous one.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	AR 4
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	(a) This is an excessive requirement, if the whistleblowing mechanism of the undertaking is used it will be done by default, if not, then the supplier whistleblowing mechanism shall be used. (b) The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency.It is of utmost importance to clarify if incidents are referred basically to social aspects (child labor, restrictions, overtime not recognized or not compensated or if they are referred also to security aspects and healty environment)	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The distinction between "causation" and "direct linkage" is not clear, as both appear to describe direct causes of impacts. Regarding the sentence "The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts," it is also not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kinds of impact to be disclosed separately. This is not a simplification, therefore we suggest to eliminate the brackets or insert "or."	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Actions are already addressed through IRO, and requiring an additional cross-reference to topics adds unnecessary duplication. Furthermore, the statement "This applies to measures taken to mitigate negative impacts on its own workforce that arise from the transition to a greener, climate-neutral economy" should be removed, as this may not be relevant or material for all undertakings and its objective is unclear.	S2	S2-3 - Actions and resources related to value chain workers	AR 7
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	S2	S2-4 - Targets related to value chain workers	4.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Potential mistake: The paragraph does no longer refer only to "severe human rights issues and incidents" but to "human rights incidents" in general. The term "severe" should be therefore reintroduced, since it is still included in the log of amendments.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	19.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Information on the grievance mechnism should be removed from S2-2, as this is addressed in the G-standard. Alternatively, it should be noted in the DR that a reference to the Governance information is sufficient, if there is no separate channel for value chain workers.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	minor changes, now related to GDR-P (ESRS2)	S2	S2-1 - Policies related to value chain workers	10.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards poses significant challenges. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and faithful representation.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Leverage effects should be eliminated due to weak market position in several sectors	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	Extremely demanding	S2	S2-3 - Actions and resources related to value chain workers	AR 7
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	Requirements according to GDR-T challenging	S2	S2-4 - Targets related to value chain workers	20.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	Requirements according to GDR-T challenging	S2	S2-4 - Targets related to value chain workers	21.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	noted	S2	S2-4 - Targets related to value chain workers	AR8
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Agree with the changes whereby no ESRS 2 specifications for SBM in the topical standards. Reduce repetition.	S2	S2 - Interaction with other ESRS	9.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	The disclosures related to ESRS 2 General disclosures SBM-3 were deleted completely from ESRS S2 Workers in the value chain. The potential information loss of this change would be that disclosures about material impacts, risks and opportunities become more generic and have less information about specific stakeholder groups as specifications about the level of granularity of the materiality assessment have been deleted.	S2	S2 - Objective	1.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	With the removal of this requirement, it is conceivable that certain effects (e.g. customers refusing to buy the undertaking's products because of negative impacts of the undertaking on the workers in the value chain) will not be sufficiently taken into account.	S2	S2 - Objective	3.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I disagree	By deleting the old S2-2 §24 companies might lack the amibition to adopt a general process to engage with workers in the value chain.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	3.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I disagree	The deletion of the old S2-3 AR39 could lead companies to neglect or discontinue initiatives that contribute to mitigating significant adverse impacts (e.g., programs to promote financial literacy among female employees, which have led to more women being promoted and fewer reports of sexual harassment in the workplace).	S2	S2-3 - Actions and resources related to value chain workers	3.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to describe workforce policies and specify coverage for "specific groups" is overly granular, lacks a clear legal basis in the CSRD, and creates unnecessary reporting complexity. The CSRD only requires information "necessary to understand the undertaking's impacts on sustainability matters." The level of detail demanded here—especially the breakdown by sub-groups—exceeds the directive's intent and imposes a disproportionate burden on companies, particularly those with complex or international structures. This requirement is also redundant with disclosures already required under ESRS 2, leading to double reporting and further increasing complexity. To ensure legal certainty, proportionality, and practical feasibility, the obligation to specify coverage by "specific groups" should be deleted.	S2	S2-1 - Policies related to value chain workers	10.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	Disclosure of policies on trafficking, forced or compulsory labour, and child labour should only be required if these topics are material, as per the CSRD's materiality principle. Mandating disclosure regardless of materiality is disproportionate (Art. 5(4) TEU) and exceeds the CSRD's intent. The "explicit address" requirement should be deleted, as the CSRD does not require policies to use specific wording. This change would ensure legal certainty, reduce unnecessary reporting burden, and align with the principle of proportionality.	S2	S2-1 - Policies related to value chain workers	11.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to disclose channels and grievance mechanisms is redundant, as grievance mechanisms are already addressed in the Governance standard (G-standard). Duplicating this requirement increases the reporting burden and risks inconsistent reporting. The obligation to explain the effectiveness of these channels is vague and impractical, especially for large or global undertakings. To ensure clarity, comparability, and proportionality (Art. 5(4) TEU), this requirement should be deleted or streamlined.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	To ensure consistency between the SFDR and the ESRS, the term "severe" should be reintroduced. The meaning of "incidents" varies across standards; if the intention is to report complaints filed through specific channels, this should be explicitly stated. If the requirement concerns actual, confirmed incidents, this must also be clearly indicated. Only confirmed incidents should be subject to reporting. The term "substantiated" should be included directly in the Disclosure Requirement, not only in the Application Requirements, to provide legal clarity and prevent over-reporting of unverified cases. Beyond that we suggest that this should be a voluntary information.	S2	S2-3 - Actions and resources related to value chain workers	19.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This Application Requirement introduces the concept of using "leverage," which is legally problematic and practically unfeasible. Leverage effects should be excluded, as companies in many sectors lack sufficient market power to influence business partners or supply chains effectively. The expectation that a company must use commercial "leverage" over its business partners is an exaggerated and normative standard of conduct not mandated by the CSRD. This requirement interferes with the right to entrepreneurial independence and freedom of contract, representing a significant legal overreach. The term "leverage" itself is vague and undefined, which will inevitably lead to inconsistent application and legal uncertainty for both preparers and auditors. To ensure the standards remain grounded in law and practical application, the reference to using "leverage" must be deleted. The focus should be on actions within a company's direct sphere of control and influence.	S2	S2-3 - Actions and resources related to value chain workers	AR 6
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph is structurally redundant and substantively problematic. It creates unnecessary complexity by placing a target-setting requirement in a topical standard that is governed entirely by the general standard, ESRS 2 GDR-T. This cross-reference is flawed: The requirement forces the disclosure of specific targets related to value chain workers that often constitute strategic business secrets.	S2	S2-4 - Targets related to value chain workers	20.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph is structurally redundant and substantively problematic. It creates unnecessary complexity by placing a target-setting requirement in a topical standard that is governed entirely by the general standard, ESRS 2 GDR-T. This cross-reference is challenging.	S2	S2-4 - Targets related to value chain workers	21.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	While the revised DR S2-2 covers the existence and effectiveness of grievance mechanisms, it no longer includes a requirement to disclose whether value chain workers are aware of and able to access these channels. Accessibility and awareness are critical for the practical functioning of such mechanisms, particularly for vulnerable workers. Their absence from the mandatory disclosure limits the information's usefulness for assessing the undertaking's responsibility and due diligence in practice. A specific disclosure on this aspect should be reinstated.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15.
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest to remove this AR, considering that the information has been already deleted from GDR-P.	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the existing para. 32(c) to provide a more comprehensive overview that also includes actions relating to positive impacts, and not only those linked to negative impacts	S2	S2-3 - Actions and resources related to value chain workers	18.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the existing para. 34 to provide a more comprehensive overview that also includes actions related to risks and opportunities, and not only those related to impacts	S2	S2-3 - Actions and resources related to value chain workers	18.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We have identified an inconsistency between the description of human rights incidents/impacts reported in S1 and the reference to severe human rights issues in S2-3, which are no longer described.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	A potential concern is that the reduction in narrative disclosure could reduce the quality and effectiveness of our due diligence processes, especially in sensitive areas within Human Rights. This would then misalign with efforts to improve the robustness of human rights risk management across the industry and through other regulatory pressure.	S2	S2 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Across sustainability, but especially true for human rights, there is a heavy weighting of qualitative indicators that can be used to evidence metrics, actions etc. However, as more thought is still needed around how to use these as effectiveness measure, some further guidance at this stage around how effectiveness can be evidenced.	S2	S2 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S2 Workers in the Value Chain when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	S2	S2 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary duplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	S2	S2 - Objective	5.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Generally there may be a discrepancy with how a company defines "own workforce" as described in ESRS 1, with the definition of "own workforce" regularly referred to in S2. Given the definition of "own workforce" in the ESRS standard is very narrow, they may be considered as "value chain workers" falling under the ESRS S2 but also as part of "own workforce" as considered by the company in its policies described in ESRS S1.	S2	S2 - Objective	7.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The concept of incidents and how to identify them is still unclear. Among Disclosure Requirements, Application Requirements and the Glossary there are several definitions of incidents and confirmed/substantiated incidents. We suggest the best approach would be having specific definitions for each case (e.g. human rights incidents, incidents of corruption and bribery, etc.) and presenting them under the related application requirements. Such definitions would then include detailed explanations of: a) the scope of the matter (e.g. "discrimination at work on the grounds of gender, racial or ethnic origin, nationality, religion or belief, disability, age, sexual orientation, or other relevant forms of discrimination, including harassment"); and b) the type of instances that trigger the reporting of the corresponding metrics (e.g. "judicial and non-judicial proceedings that have been initiated such as cases before domestic courts, mediation, complaints filed with the National Contact Points for OECD Multinational Enterprises"). In our view the best path to support simplification in relation to point (b) above would be to focus on incidents that have been confirmed through a final decision issued by a court of law or relevant authorities.	S2	S2-3 - Actions and resources related to value chain workers	19.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	To align with the simplification approach, we suggest reformulating as follows: "if the undertaking engaged directly with workers in the value chain, their legitimate representatives, or with credible proxies that have insight into their situation for the purpose of target-setting and/or tracking performance against those targets, it shall disclose this fact when disclosing in accordance with [Draft] Amended ESRS 2 GDR-T"	S2	S2-4 - Targets related to value chain workers	21.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Since other labor-related human rights each have different characteristics, child labour, forced labour, and privacy should be addressed separately, while water and sanitation could be incorporated under health and safety.	S2	S2 - Objective	4. (f)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is expected to add specific examples and descriptions regarding " workers for a 'downstream' entity" for more clarification.	S2	S2 - Objective	8. (b)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards poses significant challenges. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and faithful representation.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While several changes were aimed at enhancing interoperability with IFRS S1 and S2, some simplification measures may unintentionally reduce consistency with ISSB standards. Positive developments include that ESRS now explicitly adopts a fair presentation framework, aligning with IFRS S1 principles; GHG emissions boundary in ESRS E1 has been revised to match the financial control approach used in the GHG Protocol and IFRS; References to IFRS industry-based guidance and GRI Sector Standards are now permanent, supporting comparability in the absence of ESRS sector standards; Reliefs such as "undue cost or effort" and scenario-based estimates are now embedded, mirroring IFRS S1 provisions. At the same time, some concerns remain. For instance, some reliefs go beyond IFRS S1/S2, such as broader exclusions for data quality and joint operations, which may reduce comparability; the removal of certain mandatory datapoints aligned with ISSB standards could weaken the interoperability baseline; ESRS still lacks consistent treatment of judgement and uncertainty disclosures, which are more explicitly addressed in IFRS S1 (e.g. paragraph 74).	S2	S2 - Interaction with other ESRS	1.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	There is an inconsistency between the description of human rights incidents/impacts reported in S1 and the reference to severe human rights issues in S2-3, which are no longer described.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	DRSC	(National) standard setter	Germany			I disagree	The added value of this requirement is not apparent, as the information in the sustainability report should be consistent anyway. Either the exact interaction referred to should be clarified, or this paragraph should be deleted.	S2	S2 - Interaction with other ESRS	9.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	NMIG 1 for para. 10 Communication channels were removed from MDR-Ps, why bringing them up here introducing additional requirements (even as "possible elements")? If the guidelines on how to disclose information on policies are not streamlined in ESRS 2, this will lead to different way of presentation across the standards. Possible solution: streamline in ESRS 2 or eliminate completely.	S2	S2-1 - Policies related to value chain workers	10.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	NMIG 2 for para. 12 The NMIG contain terms that are not defined. For example, in NMIG 2 for para. 12 on the Amended ESRS S2, the terms "precarious work" and "informal workers" are used without being sufficiently defined. Terms that are only used within the NMIG should also be defined there.	S2	S2-1 - Policies related to value chain workers	12.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG Previously (ESRS S2.36), the focus was only on "severe human rights issues". Indicator No. 14 in table III of annex I to Delegated Regulation (EU) 2022/12888 also refers to "severe human rights issues and incidents". In order to ensure consistency between the SFDR and the ESRS, the word "severe" should be reinserted. With regard to the determination of "severe" human rights impacts, the definition of the United Nations Guiding Principles on Business and Human Rights should be adopted.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if Policies do not address trafficking in human beings	S2	S2-1 - Policies related to value chain workers	11
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if there is no supplier code of conduct	S2	S2-1 - Policies related to value chain workers	12
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if there is no grievance mechanism	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	15
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if human rights incidents have been reported. Additionally, the amended wording replaces "number of severe human rights [incidents/issues]" with "number of human rights [incidents/issues]." This broadens the scope from substantiated, high-impact cases to potentially all recorded incidents, regardless of severity. It also risks undermining alignment with SFDR PAI Indicator #14, which refers to "identified cases of severe human rights issues and incidents". We recommend reintroducing the qualifier "severe" to ensure conceptual clarity and consistency.	S2	S2-3 - Actions and resources related to value chain workers	19
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Very confusing why previous sub-sub-topics are sometimes moved to extra points and sometimes in brackets. This will lead to huge discussions on which level materiality is going to be defined, whether to use topics in front or in the brackets. Materiality analysis needs to be fully and new implemented due to this change. Only resonable approach: Leave out sub-topics in general and just list the previous sub-sub-topics one after each other. Furthermore, a proper mapping won't be possible like this!!	S2	S2 - Workers in the value chain	4

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Reduction in granularity is received very well.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	The level of detail for previous no. 28 (assessment of value chain workers' awareness and trust) got reduced and is well perceived.	S2	S2-3 - Actions and resources related to value chain workers	15.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The requirement to state actions is clear but what is meant with the term resources (personnel, money, time…)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	How can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S2	S2-3 - Actions and resources related to value chain workers	18. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended that policy disclosures be kept general and allow companies to indicate sub-groups if applicable (remove examples).	S2	S2-1 - Policies related to value chain workers	10.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended not to have this level of granularity to call out marginalized groups	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-4 - Targets related to value chain workers	21.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-4 - Targets related to value chain workers	AR8
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to add clarification that when disclosing policies, companies don't need to point out individual components of the policy to different groups	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	ESRS 2 par 8 provides examples of who could fall within in the scope for this standard. Under d it states: "workers deeper in the supply chain who are extracting commodities that are then processed into components that go in the undertaking's products." We'd like to understand how /whether would impact this requirement, since Omnibus aims to limit the value chain scope (to tier 1, and in some exceptions further down the value chain). Please explain how/if this aligns with Omnibus.	S2	General disclosures	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The role of business in the context of human rights is not to 'align or comply' but instead to have processes in place to manage its risk on human rights adverse impacts and environmental adverse impacts. Amend to: The objective of this Standard is to specify an understanding of the processes an undertaking has in place to manage its risk on human rights adverse impacts and environmental adverse impacts.	S2	Objectives	2
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Propose removing reference to work-life balance as this should be an own workforce concept only	S2	S2 - Objective	4. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Propose removing specific reference to disabilities as this is only one protected characteristic and keeping the definition of diversity and inclusion wider	S2	S2 - Objective	4. (e)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	View is more prominence should be given to forced labour and child labour to better align to SFDR requirements	S2	S2 - Objective	4. (f)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Examples are quite basic and immaterial examples that should be replaced with more sophisticated examples basis Wave 1 definitions of value chain	S2	S2 - Objective	8.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Propose to remove data point unless required under SFDR	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Unclear why disclosures relating to positive impacts, risks and opportunities have been removed. As per ESRS2, if a material IRO has been identified then GDR-A should be followed but then removing the requirement from S2 and only retaining explicit reference to negative impacts creates confusion	S2	S2-3 - Actions and resources related to value chain workers	18.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Although we are fully aligned to keep reporting of severe human rights incidents as part of the SFDR requirements, it is unclear why these requirements have not been grouped under one section to clarify all Human rights requirements in one place. In addition, it is unclear if general non complinaces with the UNGP has been deliberately removed or if this is an oversight. Further, a clearer definition of what should be considered as a severe human rights incident must be provided to allow comparability	S2	S2-3 - Actions and resources related to value chain workers	19.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note that a previously voluntary paragraph using "may disclose" has now been converted into an application requirement, suggesting a more mandatory tone through the phrase "examples of policy aspects to disclose." While we appreciate the intent to enhance clarity and consistency in disclosures, we are concerned that this shift may inadvertently reduce flexibility for entities to tailor their reporting to material topics and organizational context. We propose that this paragraph be repositioned as non-mandatory implementation guidance, rather than an application requirement. This would preserve the original intent of encouraging transparency without imposing prescriptive disclosure expectations that may not be relevant or material for all entities.	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Consolidate ESRS on value chain stakeholders to streamline standardisation, reduce redundancy in data points, and shorten the disclosure requirements, while allowing flexibility in presentation to enable preparers to adapt based on their specific circumstances (value chain workers typically managed by procurement, affected communities by legal teams, and consumers/end-users by sales)	S2	S2 - Objective	1.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete the datapoint on whether the undertaking has a supplier code of conduct due to its lack of usefulness. This aspect is already covered under disclosures on policies, actions, and targets, and users generally do not consider it particularly useful.	S2	S2-1 - Policies related to value chain workers	12.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Reframe the datapoints on the process for engaging with workers in the value chain and how the perspectives of workers in the value chain inform the undertaking's decisions or activities in connection with ESRS 2 SBM-2, while highlighting key information (material IROs); current drfating is too granular in §14a and b. Proposed wording: "In addition to the general information disclosed under ESRS 2 SBM-2 on interests and views of stakeholders, the undertaking shall provide information on the type of value chain workers subject to material impacts, the nature of these impacts (i.e., whether they are widespread and systemic, or related to individual incidents), and whether and how the interests and views of these stakeholders inform its decisions or activities aimed at managing the related material topics/sub-topics."	S2	S2-1 - Policies related to value chain workers	14.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	When the undertaking has severe human rights incidents, replace "if applicable, disclose these" (overly granular) with "including, where applicable, a description of affected value chain workers"	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Very confusing why previous sub-sub-topics are sometimes moved to extra points and sometimes in brackets. This will lead to huge discussions on which level materiality is going to be defined, whether to use topics in front or in the brackets. Materiality analysis needs to be fully and new implemented due to this change. Only resonable approach: Leave out sub-topics in general and just list the previous sub-sub-topics one after each other. Furthermore, a proper mapping won't be possible like this!!	S2	S2 - Workers in the value chain	4
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Reduction in granularity is received very well.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	The level of detail for previous no. 28 (assessment of value chain workers' awareness and trust) got reduced and is well perceived.	S2	S2-3 - Actions and resources related to value chain workers	15.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The requirement to state actions is clear but what is meant with the term resources (personnel, money, time...)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	How can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S2	S2-3 - Actions and resources related to value chain workers	18. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended that policy disclosures be kept general and allow companies to indicate sub-groups if applicable (remove examples).	S2	S2-1 - Policies related to value chain workers	10.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	AR 1 for para. 10 provides clarity on examples of policy aspects to disclose. We would welcome a list of policy aspects that shall be disclosed as this would facilitate comparability across resporting companies. Clarity is needed if the policies should be publicly available.	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended not to have this level of granularity to call out marginalized groups	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-2 - Engagement with value chain workers, existence of channels for value chain workers to raise concerns or needs and approaches to remedy.	14.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 7 for para. 18 Allow companies flexibility on level of depth of this disclosure	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Paragraph 19 should provide a clear definition on 'human rights incidents' and explain the level/depth of disclosure needed.	S2	S2-3 - Actions and resources related to value chain workers	19.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-4 - Targets related to value chain workers	21.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to add a phrase about "good faith efforts" to work with credible proxies/proper representation as representation is not always clear.	S2	S2-4 - Targets related to value chain workers	AR8
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended to add clarification that when disclosing policies, companies don't need to point out individual components of the policy to different groups	S2	S2-1 - Policies related to value chain workers	AR 1
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				AR 7 for para. 18 Allow companies flexibility on level of depth of this disclosure	S2	S2-3 - Actions and resources related to value chain workers	17.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Since other labor-related human rights each have different characteristics, child labour, forced labour, and privacy should be addressed separately, while water and sanitation could be incorporated under health and safety.	S2	S2 - Objective	4. (f)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is expected to add specific examples and descriptions regarding " workers for a 'downstream' entity" for more clarification.	S2	S2 - Objective	8. (b)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards poses significant challenges. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and faithful representation.	S2	S2-3 - Actions and resources related to value chain workers	19.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	§a) This new formulation does not simplify but complexify our reporting, we would suggest to come back to previous formulation	S1	S1-5 - Characteristics of the undertaking's employees	23.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The publication of all these indicators shall be limited to employees. The mention to "other workers" should be deleted. Indeed the latency between occupational exposure, the onset of the disease, and death makes it impossible to identify deaths due to occupational diseases among subcontractors' employees, as these usually occur several years after the work was performed.	S1	S1-13 - Health and Safety metrics	AR 26
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	This indicator shall be deleted, it does not provide useful information	S1	S1-15 - Remuneration metrics	44. (b)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	Outside the EEA, the notion often does not exist and is therefore impossible to collect. Therefore this paragraph could be deleted.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	ASD					I partially agree and partially disagree	Allow to consider information related to affected communities as classified or sensitive information, therefore allow to apply ESRS 1 section 7.8 ("The undertaking is not required to disclose classified information or sensitive information, even if such information is considered material"), whilst maintaining the expectation to policies, processes and actions in relation to downstream due diligence.	S3	S3-1 - Policies related to affected communities	1.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	A boolean DP (whether) will complicate the structure of a generic GDR-P. Suggestion: create a separate datapoint in S3-1: "It shall state whether policies cover specific affected communities (e.g. a community of indigenous people or a community living around its site) or all affected communities." Or, create an AR to specify content (without a boolean).	S3	S3-1 - Policies related to affected communities	8.
Excels	Chamber of Labour, Austria	Trade union	Austria				The BAK argues that some important nuances are lost as a result of the proposed simplifications: For example, it makes sense to design whistleblowing mechanisms and complaint channels differently, depending on whether they are designed for employees in the value chain, local communities or consumers. These are instruments that must be designed as effectively as possible in the interests of the employees, the other affected parties, but also the companies, because they enable information to be passed on quickly to the company and remedial action can be taken.	S3		
Excels	Chamber of Labour, Austria	Trade union	Austria				The deletion of information on types of "affected communities" is problematic because a more detailed definition is now missing. More detailed information on the "type of impacts" has also been deleted: specifically, whether they are widespread/systemic in contexts in which the company operates or whether they are isolated incidents. Some parts have been moved to ESRS 2 – here there could be a risk that the specific focus on the "affected communities" will be lost due to the shift to the general ESRS 2, e.g. reporting obligations in the area of human rights, which were originally part of ESRS S3-1 (16th), have now been moved to ESRS 2 (GDR-P) and weakened in terms of content.	S3		
Excels	Chamber of Labour, Austria	Trade union	Austria				Furthermore, the BAK is critical of the following changes in concrete terms: 1. Elimination of negative reporting obligations with regard to "Processes for engaging with affected communities about impacts" (formerly S3-2, 24.) and "Process to remediate negative impacts and channels for affected communities to raise concerns" (formerly S3-3, 29.) 2. Formerly S3-3, 19.: "subject to the relevant privacy regulation", companies must report on human rights violations in connection with "affected communities". The restriction could serve as a loophole for companies. 3. Companies are no longer required to disclose whether and to what extent they have taken into account the role of their business model in creating, exacerbating or mitigating material impacts on affected communities, and how the business model could be adapted to address such impacts (formerly ESRS 2 SBM-2, AR 3 and 4) 4. Deletion of the reporting obligation on the extent to which impacts on affected communities may result from the strategy or business model (formerly ESRS 2 SBM-3, AR 5) 5. Examples of special characteristics of affected communities that the company could take into account (formerly ESRS 2 SBM-3, AR 7)	S3		

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Information on the grievance mechnism should be removed from S3-2, as this is addressed in the G-standard. Alternatively, it should be noted in the DR that a reference to the Governance information is sufficient, if there is no separate channel for affected communities.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	11.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-4 - Targets related to affected communities	19.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-4 - Targets related to affected communities	AR 10
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Similar to comment for ESRS 1 Appendix A: the social susubtopics in parenthesis are not exhaustive of the sub-topic title/ human rights instruments mentioned in CSRD. Hence all parentheses should start with 'including'.	S3	S3 - Objective	4.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Former disclosure of whether and how it is ensured that own practices do not cause or contribute to material negative impacts on workers in the value chain has been deleted and should be reinstated. Key part of UNGPs/OECD Guidelines and key issue in what is driving impacts at supplier levels. 'The undertaking shall disclose whether and how it takes action to avoid causing or contributing to material negative impacts on affected communities through its own practices, including, where relevant, in relation to planning, land acquisition and exploitation, finance, extraction or production of raw materials, use of natural resources, and management of environmental impacts. This may include disclosing what approach is taken when tensions arise between the prevention or mitigation of material negative impacts and other business pressures.'	S3	S3-3 - Actions and resources related to affected communities	16.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	The disclosure requirement should be expanded to also include metrics in addition to target, to ensure metrics are captured at topical level for S2,S3,S4. Inspiration can be taken from E4-5 including para 21: 'In addition to paragraph 20 and in accordance with [Draft] Amended ESRS 2 GDR-M, the undertaking shall report metrics related to its material impacts on biodiversity and ecosystems.'	S3	S3-4 - Targets related to affected communities	18.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The consolidation under ESRS 2 GDR-P streamlines disclosures and removes unnecessary repetition.	S3	S3-1 - Policies related to affected communities	8.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	Merging S3-2 and S3-3 reduces complexity and avoids overlapping requirements, while keeping the focus on key processes, channels, and remediation.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	10.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new S3-3 improves clarity by focusing on key actions and mitigation measures while reducing reporting complexity.	S3	S3-3 - Actions and resources related to affected communities	15.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new S3-4 simplifies reporting by focusing on the existence, nature, and management of community-related targets. Aligning with ESRS 2 GDR-T ensures consistency across disclosures.	S3	S3-4 - Targets related to affected communities	AR 10
Excels	GKK Partners	Consultant (including software vendor)	Germany			I partially agree and partially disagree	Agree with current part-content. Suggestion to add, via additional AR, the (also in NMIG) importance of "accessibilty". Via: AR 2: "Accessibility of information is an important aspect of how the undertaking communicates its policies towards affected communities. This could include translating websites or documents, using pictures or graphics in addition to text. When disclosing on paragraph 8, if and when adopted, reflecting their specific content, the undertaking should specify concrete exam- ples of communication channels (e.g.: flyers, newsletters, dedicated websites, social media or face-to-face interactions). This include information on how the undertaking ensures that those channcels are known and accessible to the sepcific affected community." A reference to AR 5 for para. 13 might be added.	S3	S3-1 - Policies related to affected communities	AR 1
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We propose retaining former S3 27 (d) on how the undertaking involves stakeholders in ensuring the effectiveness of their grievance mechanisms, in line with GRI 2-25-e.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	For the purpose of simplification, data points on the availability of channels such as grievance mechanisms from S1, S2, S3 and S4 could be consolidated into one data point covering all categories of stakeholders and moved to ESRS 2. This would be equivalent to the consolidation done for the data point on the human rights policy commitment. This would also increase alignment with GRI 2-25. In addition, the data point could be further aligned verbatim with GRI 2-25-b and e, for greater clarity and interoperability.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	For the purpose of simplification, data points on the general approach to and processes for providing or contributing to remedy from S1, S2, S3 and S4 could be consolidated into one data point covering all categories of stakeholders and moved to ESRS 2. This would be equivalent to the consolidation done for the data point on the human rights policy commitment. This would also increase alignment with GRI 2-25. In addition, the data point could be further aligned verbatim with GRI 2-25-c, for greater clarity and interoperability.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining remedy actions (former S3 para 32(b)) as a stand-alone data point, in line with GRI Standard 3-3-d-ii. Having a standalone data point ensures that this information is not overlooked and it is easily identifiable by users and stakeholders.	S3	S3-3 - Actions and resources related to affected communities	16. (a)
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Insert as a new second sentence "If the undertaking contends that FPIC has been granted, it shall describe the activity consented to." REASON: It is important to make it clear when a company claims that it has obtained FPIC so that the community and interested parties can appropriately respond.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	12.
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Insert after "mechanism" at the end of the second sentence "and how it communicates the existence and form of access that mechanism to the affected communities." REASON: For companies' grievance mechanism, outreach (the process of informing potential claimants of the existence of grievance mechanisms and how to access them) is key. see https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and references cited.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Add a new AR: "In accordance with ESRS 2 GDR-A key actions describe all Add a new AR: "In accordance with ESRS 2 GDR-A key actions describe all actual remedies provided for negative human rights impacts." REASON: Specific remedy disclosures are essential to the usefulness of disclosures on human rights actions. see our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf and draft paper https://warwick.ac.uk/fac/soc/law/research/centres/chrp/publications/corporate_disclosure_and_mhrdd_june_2026_ext.pdf.	S3	S3-3 - Actions and resources related to affected communities	17.
Excels	NomoGaia	NGO	United States			I partially agree and partially disagree	Add a new AR: "The disclosure will include the number, type (by human rights negatively impacted) and outcome of the human rights claim." REASON: These are essential metrics needed to make these disclosures useful for relevant audiences. see https://wrap.warwick.ac.uk/id/eprint/185392/ and https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and references cited. This is similar to the use of S1 DR 46.	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	the removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	the clarification should be made more clear; e.g., if a sub-sub-topic (e.g., land-related impacts) is material, shall we really report the whole sub-topic (communities' economic, social and cultural rights)? In our opinion paragraph 3 should be called "When a sub-sub-topic (mentioned in parentheses) is material, the undertaking shall report only this sub-sub-topic, not the entire sub-topic." Moreover, why is the sub-sub-topic "adequate housing and food" merged? If we don´t have an IRO on food, we can´t report on that	S3	S3-1 - Policies related to affected communities	3.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	What is meant with resources (personnel, money, time…)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Delete the word "key".	S3	S3-3 - Actions and resources related to affected communities	15.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Delete the word "key".	S3	S3-3 - Actions and resources related to affected communities	16. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The content covered in para. 9 is already covered in para. 8. Therefore para. 9 should be removed to avoid repetition.	S3	S3-1 - Policies related to affected communities	9.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please see comment for ESRS S2 para. 18 (b)	S3	S3-3 - Actions and resources related to affected communities	18.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please see comment for ESRS S1 para. 21 (there is a mistake in the excel file and this comment si applicable for ESRS S3 - 21.)	S3	S3-4 - Targets related to affected communities	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Since sub-sub topics were eliminated, it is not clear why they are still indicated in brackets of sub-topics and what is expected to be disclosed. We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one.	S3	S3 - Objective	4.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This is not a simplification therefore we suggest to eliminate the brackets or insert "or".	S3	S3-3 - Actions and resources related to affected communities	AR 7
Excels	UNICEF	NGO	United States			I partially agree and partially disagree	Children (all persons under the age of 18) account for almost one-third of the world's population and so are always part of communities affected by business operations. UNICEF welcomes the references to the UNGPs, OECD Guidelines, and the UN Declaration on the Rights of Indigenous People; however, we believe that the UN Convention on the Rights of the Child should be added. Further, for consistency with ESRS S1 and ESRS S2, the European Convention on Human Rights, the European Social Charter, and the Charter of Fundamental Rights of the EU could also be added. This is supported by Recital 49 of the CSRD, which references a more complete range of international human rights instruments relevant for ESRS S3.	S3	S3 - Objective	2.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UNICEF	NGO	United States			I disagree	The removal of the term "for example" from the list of economic, social, cultural, civil, and political rights of relevance to ESRS S3 is highly problematic and contradicts one of the core tenets of human rights-based approaches. For example, Principle 18 of the UNGPs states that companies "should include all internationally recognized human rights as a reference point, since enterprises may potentially impact virtually any of these rights." By removing the term "for example", ESRS 3 becomes a narrower list of sub-topics, creating the risk that companies will use this list as an exhaustive checklist, rather than considering the full range of economic, social, cultural, civil, and political rights relevant to affected communities. There are many examples, but the rule of law (UDHR 6–11), education (UDHR 16), and culture (UDHR 27) are all human rights that companies may impact in affected communities. Referencing all potentially relevant human rights, not just a subset, is significant in the context of emphasizing a "fair presentation framework" and entity-specific disclosures, as it provides the full range of potential impacts for companies to consider.	S3	S3 - Objective	4.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	It is unclear why the interactions are limited to S1 and S2, excluding ESRS S4 while the 4 social standards are connected in the Set 1. For instance, the general approach to providing remedies and/or grievance mechanisms is equally relevant to own workforce, consumers, value chain workers, and affected communities. We recommend clarifying these interactions and extending them to ESRS S4 to reflect this broader applicability.	S3	S3 - Interaction with other ESRS	7.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend slightly revising the wording of this AR, as the phrasing of amended AR 11 was, in our view, clear. One example of possible redrafting is: "Among the policy aspects that can be disclosed, the undertaking can provide an illustration of the types of communication of its policies to those individuals, group of individuals or entities for whom they are relevant, either because they are expected to implement them (for example, the undertaking's employees, contractors and suppliers), or because they have a direct interest in their implementation (for example, own workers and investors)." In the current writing, starting with the term "channels" may be misleading, as it overlaps with the terminology used in DR S3-2.	S3	S3-1 - Policies related to affected communities	AR 1
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We invite EFRAG to revise the numbering (typo to be corrected). §17 and §18 should indeed be renumbered as §16(a) and §16(b), in line with the approach applied in DR S2-3 and S4-3 of EDs ESRS S2 and S4.	S3	S3-3 - Actions and resources related to affected communities	17.
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Insert as a new second sentence "If the undertaking contends that FPIC has been granted, it shall describe the activity consented to." REASON: It is important to make it clear when a company claims that it has obtained FPIC so that the community and interested parties can appropriately respond.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	12.
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Insert after "mechanism" at the end of the second sentence "and how it communicates the existence and form of access that mechanism to the affected communities." REASON: For companies' grievance mechanism, outreach (the process of informing potential claimants of the existence of grievance mechanisms and how to access them) is key. see https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and references cited.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Add a new AR: "In accordance with ESRS 2 GDR-A key actions describe all Add a new AR: "In accordance with ESRS 2 GDR-A key actions describe all actual remedies provided for negative human rights impacts." REASON: Specific remedy disclosures are essential to the usefulness of disclosures on human rights actions. see our Report at https://nomogaia.org/wp-content/uploads/2025/09/Disclosure-Report-1.pdf CITE DISCLOSRUE PAPER.	S3	S3-3 - Actions and resources related to affected communities	17.
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Add a new AR: "The disclosure will include the number, type (by human rights negatively impacted) and outcome of the human rights claim." REASON: These are essential metrics needed to make these disclosures useful for relevant audiences. see https://wrap.warwick.ac.uk/id/eprint/185392/ and https://warwick.ac.uk/fac/soc/law/research/centres/chrp/governance/hrandbusiness/empiricalresearch/msigrievancemechanisms/ and references cited. This is similar to the use of S1 DR 46.	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	"Subject to the relevant privacy regulation" - This is ambiguous, and requires clarification about whether this statement refers to local privacy regulations or GDPR etc.	S3	S3-3 - Actions and resources related to affected communities	17.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Assessing the effectiveness of grievance mechanisms or community engagement channels goes beyond reasonable due diligence expectations and is hardly measurable. Disclosure should focus on the existence, accessibility, and design of such processes, not on their effectiveness assessment.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	10.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The consolidation of engagement, grievance channels, and remedy into one disclosure requirement simplifies the architecture but reduces clarity. The different dimensions should remain more clearly separated or at least sub-structured to avoid confusion and to align with UNGP sequencing.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	11.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The deletion of the negative disclosure datapoint (requirement to state explicitly when no engagement or grievance channels exist) reduces transparency. Users may no longer know whether absence of disclosure means absence of mechanisms. A minimum negative disclosure requirement should be retained.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	24

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The removal of datapoints on positive impacts (e.g., capacity-building for local livelihoods) narrows the focus almost exclusively to risks and negative impacts. Positive contributions should also be disclosed to ensure a balanced view.	S3	S3-3 - Actions and resources related to affected communities	16.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	While we support the removal of the word "severe" for alignment with SFDR, the current reliance only on "materiality of information" risks creating uncertainty for preparers. We propose clarifying that materiality assessments of human rights incidents should be guided by the UN Guiding Principles on Business and Human Rights, giving particular consideration to incidents with severe consequences (in terms of scale, scope and remediability).	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Since sub-sub topics were eliminated, it is not clear why they are still indicated in brackets of sub-topics and what is expected to be disclosed. We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one.	S3	S3 - Objective	4.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This is not a simplification therefore we suggest to eliminate the brackets or insert "or".	S3	S3-3 - Actions and resources related to affected communities	AR 7
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Inconsistency of "severe": the classifier "severe" has been removed for human rights incidents connected with s3-affected communities. This signficiantly broadens the scope of what a company may be expected to disclose as a human rights impact. Potentially in the pursuit of simplification, this has signficantly increased the reporting scope by removing an imporant classifyer. This would thus become a very different datapoint than what wave 1 companies reported on for FY2024. In accordance with the concept of risk-based due diligence, Equinor believes in including a risk-classifier word ("severe") regarding disclosures on human rights incidents. Otherwise, the scope is too large. There should, additionally, be consistency in including the "severe" classifier across S1, S2 and S3 (this is not the case in the current draft standard).	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Inconsistent reference to human rights instruments across social chapters: The social objectives text (S1 objective (para 2), S2 objectivee (para 2), and S3 objective (para 2)) are not consistent in which specific international / European HR instruments they make reference to. We suggest to align so as not to communicate that certain conventions only apply to certain stakeholders. Ref. extract from relevant sections below: SEE: S1: "... the extent to which the undertaking aligns or complies with international and European human rights instruments and conven+ons, including the Interna+onal Bill of Human Rights, the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Mul+na+onal Enterprises..." S2: " ...the extent to which the undertaking aligns or complies with interna+onal and European human rights instruments and conventions, including the Interna+onal Bill of Human Rights, the UN Guiding Principles on Business and Human Rights..." S3: "...understanding of the extent to which the undertaking aligns or complies with internaBonal and European human rights instruments and convenBons, including the International Bill of Human Rights, the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for MultinaBonal Enterprises, and the UN Declaration on the Rights of Indigenous People."	S3	S3 - Objective	2.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The currently applicable version (ESRS S3 paragraph 20) specifies that disclosures on engagement with affected communities refer to material impacts on them. In the proposed draft ESRS S3 paragraph 10, this clarification has been removed. In addition, the proposed draft ESRS S3 paragraph 11 refers to actual and potential impacts on the affected communities, without specifying that this only concerns material impacts. This raises the question of whether section S3-2 is intended to address engagement more generally, without reference to material impacts. If the intention is to preserve the current meaning, in our view this should be explicitly clarified, confirming that engagement relates specifically to material impacts.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	11.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Draft AR 2 states that the engagement with affected communities can take different forms, such as information. Whereas, Annex II Acronyms and Glossary of Terms defines stakeholder engagement as an ongoing process of interaction and dialogue between the undertaking and its stakeholders that enables the undertaking to hear, understand and respond to their interests and concerns. It is recommended to harmonise these formulations so that the concept of engagement is applied consistently across the standard.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	AR 2
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	In our view, companies should disclose the processes through which they support the availability of the channels available to affected communities to bring their concerns or needs within their business relationships. This would show whether such mechanisms are effectively implemented in practice rather than existing only formally, and would give stakeholders a clearer picture of the real effectiveness of due diligence and ethical standards across the company's wider network.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It seems GDR-M does not apply to this standard. Should it be mention here then?	S3	S3 - Objective	5.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	To be added "If applicable", since this might not matter to all companies.	S3	S3-1 - Policies related to affected communities	9.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	same comment as per ESRS S1, S2. Since it seems information about channels is important from a social perspective, we would suggest to add this requirement in the ESRS 2 GDR-P	S3	S3-1 - Policies related to affected communities	AR 1
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	I would suggest to add the possibility to bring the S1-2, S2-2 and S3-2 disclosure requirements together, if they are referred to the Speak Up/whistleblowing channel to avoid duplications	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	10.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	what about if the undertaking has not implemented any channel?	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	14.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We suggest that these disclosure requirements undergo a more comprehensive review, so they fully capture all impacts—positive as well as negative—instead of placing particular emphasis on adverse effects.	S3	S3-3 - Actions and resources related to affected communities	17.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We suggest that these disclosure requirements undergo a more comprehensive review, so they fully capture all impacts—positive as well as negative—instead of placing particular emphasis on adverse effects.	S3	S3-3 - Actions and resources related to affected communities	AR 8
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S3 Affected Communities , when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S3 Affected Communities , when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	S3	ESRS S3 - Objective	1.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	S3	ESRS S3 - Objective	5.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The draft provides for an amendment consolidating DR SX-2 and DR SX-3 from Standards S1 to S4 into a single DR SX-2, in view of the interrelation between the three elements engagement, channels for raising concerns, and remediation. This consolidation would result in the renumbering of all DRs in Standards S1 to S4 by minus one. Such renumbering would entail considerable effort for updating all external and internal documentation and publications. A reduction of this administrative burden would therefore be appropriate.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	10.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The list of “marginalised” communities (“for example, women, girls, migrants, people with disabilities”) reflects a certain level of prejudice. It would be better to rephrase this as “potentially vulnerable” and review or remove the examples provided. A clear definition of “vulnerable” is also needed. Furthermore, limiting the scope to the reporting year can obscure long-term relationships. Engagement, decisions, and impacts all develop over a multi-year perspective. While the one-year timeframe is relevant as the reporting focus, it should not serve as a boundary in itself.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	11.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The focus is entirely on negative impacts, without recognizing that many initiatives can generate positive impacts without requiring any remediation effort. Overall, the standard places its emphasis on the negative side rather than on promoting the well-being of communities.	S3	S3-3 - Actions and resources related to affected communities	16.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The limitation due to privacy, without accompanying alternative requirements, is too broad.	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	The previous paragraph ESRS S3.36 requested the disclosure of only "severe human rights issues and incidents". The new paragraph S3.17 extends the scope to the disclosure of "human rights incidents. In order to ensure consistency (e.g. with SFDR), the word "severe" should be reinserted. With regard to the determination of "severe" human rights impacts, the definition of the United Nations Guiding Principles on Business and Human Rights should be adopted.	S3	S3-3 - Actions and resources related to affected communities	17.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	deletion of “severe” leads to difference to SFDR requirement and should therefore be changed again and “severe” should be added, otherwise, extended reporting burden	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	S3	S3-3 - Actions and resources related to affected communities	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	S3	S3-4 - Targets related to affected communities	18.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It should also include at least reference to ESRS S4 Consumers and end-user, as they may be special group of consumers and/or end-users of products or services provided by the undertaking.	S3	S3 - Objective	7.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Whole phrase "human rights incidents" should be in bold as it is a separate defined term.	S3	S3-3 - Actions and resources related to affected communities	AR 9
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"directly their attention" should be replaced with "directly its attention"	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	It is stated that paragraph 1 (a)–(d) has now been consolidated into a single paragraph 1. However, the original sub-paragraphs (a) to (d) provided essential guidance on how an undertaking may report on affected communities—for example, how its activities impact these communities and what actions are being taken in response.The revised paragraph 1 now only refers broadly to material risks and opportunities, which removes valuable context.	S3	S3-1 - Policies related to affected communities	
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Assesses the effectiveness of channels available to affected communities to bring theier concerns or needs directly to their attention and have them adressed is impossible in this context.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It no longer refers only to “severe human rights issues and incidents” but to “human rights incidents” in general. The term “severe” should be reintroduced here. In the Log of Amendments, “severe” is still included in the text.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	19.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	More guidance is necessary for this DR. As it currently stands, it is not clear to us what the objective here is. Experience shows companies tend to resort to boilerplate disclosures here, such as repetition of UNGPs (e.g. if we cause, we provide remedy, if we contribute, we participate in providing remedy) which is of little benefit to users.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	14.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	We do not fully understand this AR. In particular the concept of "harms identified" (vs. actual impacts) is unclear, and as such we suggest further editing this AR for clarity / understandability.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	AR 6
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	If incidents have been reported, the fact that such reporting has been done should always be disclosed. As such, suggest removing the caveat "subjecto to privacy rules" from the beginning of the DR to replace the other caveat, "if applicable" later in the DR.	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	DR 16 is not really a DR and it could be combined with the following two DRs (17 and 18), as is done e.g. in S2. In addtion to key actions taken and how the company tracks their affectiveness, companies should also be required to disclose, whether they have assessed their own involvement to the impacts and what the conclusion of such assessments are. As noted in the related AR, actions that companies are expected to take differ depending on their involvement (cause, contribute, linked to) to the impact. The only way for users to assess whether companies actions are appropriate and adequate is for them to be transparent about their level of involvement.	S3	S3-3 - Actions and resources related to affected communities	16.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	It is not clear how this AR related to para. 8.	S3	S3-1 - Policies related to affected communities	AR 1
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Since sub-sub topics were eliminated, it is not clear why they are still indicated in brackets of sub-topics and what is expected to be disclosed. We recommend deleting them to avoid the risk of auditors requiring individual assessments for each one	S3	S3 - Objective	4.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This is not a simplification therefore we suggest to eliminate the brackets or insert "or"	S3	S3-3 - Actions and resources related to affected communities	AR 7
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	S3	S3-4 - Targets related to affected communities	4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Potential mistake: The paragraph does no longer refer only to "severe human rights issues and incidents" but to "human rights incidents" in general. The term "severe" should be therefore reintroduced, since it is still included in the log of amendments.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	19.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Information on the grievance mechnism should be removed from S3-2, as this is addressed in the G-standard. Alternatively, it should be noted in the DR that a reference to the Governance information is sufficient, if there is no separate channel for affected communities.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Agree with the changes whereby no ESRS 2 specifications for SBM in the topical standards. Reduce repetition.	S3	S3 - Interaction with other ESRS	7.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to describe workforce policies and specify coverage for "specific groups" is overly granular, lacks a clear legal basis in the CSRD, and creates unnecessary reporting complexity. The CSRD only requires information "necessary to understand the undertaking's impacts on sustainability matters." The level of detail demanded here—especially the breakdown by sub-groups—exceeds the directive's intent and imposes a disproportionate burden on companies, particularly those with complex or international structures. This requirement is also redundant with disclosures already required under ESRS 2, leading to double reporting and further increasing complexity. To ensure legal certainty, proportionality, and practical feasibility, the obligation to specify coverage by "specific groups" should be deleted.	S3	S3-1 - Policies related to affected communities	8.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	The requirement to disclose channels and grievance mechanisms is redundant, as grievance mechanisms are already addressed in the Governance standard (G-standard). Duplicating this requirement increases the reporting burden and risks inconsistent reporting. The obligation to explain the effectiveness of these channels is vague and impractical, especially for large or global undertakings. To ensure clarity, comparability, and proportionality (Art. 5(4) TEU), this requirement should be deleted or streamlined.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	10.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This paragraph is structurally redundant and substantively problematic. It creates unnecessary complexity by placing a target-setting requirement in a topical standard that is governed entirely by the general standard, ESRS 2 GDR-T. This cross-reference is flawed: The requirement forces the disclosure of specific targets related to value chain workers that often constitute strategic business secrets.	S3	S3-3 - Actions and resources related to affected communities	15.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	To ensure consistency between the SFDR and the ESRS, the term "severe" should be reintroduced. The meaning of "incidents" varies across standards; if the intention is to report complaints filed through specific channels, this should be explicitly stated. If the requirement concerns actual, confirmed incidents, this must also be clearly indicated. Only confirmed incidents should be subject to reporting. The term "substantiated" should be included directly in the Disclosure Requirement, not only in the Application Requirements, to provide legal clarity and prevent over-reporting of unverified cases.	S3	S3-3 - Actions and resources related to affected communities	AR 9
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	While engagement with affected communities can provide valuable qualitative insights, this requirement lacks clear boundaries and practical guidance. The expectation to engage with "legitimate representatives or credible proxies" is vague and may be unworkable in practice, especially for companies operating in diverse or international contexts where identifying such representatives is complex and sometimes legally sensitive. Moreover, the effectiveness of management actions should be assessed based on objective, material outcomes rather than subjective feedback alone. Over-reliance on engagement as a performance metric risks inconsistent reporting and may not reflect actual improvements in managing negative impacts. The standard should clarify the criteria for identifying legitimate representatives and credible proxies, and emphasise that engagement is only one of several tools for evaluating effectiveness. Objective, material indicators should remain the primary basis for performance assessment, with engagement results used as supplementary context.	S3	S3-4 - Targets related to affected communities	AR 10
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	While this paragraph addresses the existence and effectiveness of grievance mechanisms, it omits the requirement to disclose whether affected communities are aware of, can access, and trust these mechanisms. These are critical effectiveness criteria under UNGP Principle 31. Without such information, it is impossible to assess whether the mechanisms are truly functional, especially in contexts with power asymmetries, low literacy, or limited digital access. Reinserting a disclosure requirement on accessibility, awareness, and trust would enhance both transparency and practical accountability.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest to remove this AR, considering that the information has been already deleted from GDR-P.	S3	S3-1 - Policies related to affected communities	AR 1
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the existing para. 32(c) to provide a more comprehensive overview that also includes actions relating to positive impacts, and not only those linked to negative impacts	S3	S3-3 - Actions and resources related to affected communities	16.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the existing para. 34 to provide a more comprehensive overview that also includes actions related to risks and opportunities, and not only those related to impacts	S3	S3-3 - Actions and resources related to affected communities	16.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Further clarity on the expectations around remediation obligations which vary under the UNGPs (based on the type of connection i.e. cause, contribute, directly linked) would be beneficial.	S3	S3 - Objective	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S3 Affected Communities when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	S3	S3 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary dupplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	S3	S3 - Objective	5.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	One of the positive outcomes is that the UNGP's effectiveness criteria is now better embedded into the reporting requirements of grievance mechanisms.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The concept of incidents and how to identify them is still unclear. Among Disclosure Requirements, Application Requirements and the Glossary there are several definitions of incidents and confirmed/substantiated incidents. We suggest the best approach would be having specific definitions for each case (e.g. human rights incidents, incidents of corruption and bribery, etc.) and presenting them under the related application requirements. Such definitions would then include detailed explanations of: a) the scope of the matter (e.g. "discrimination at work on the grounds of gender, racial or ethnic origin, nationality, religion or belief, disability, age, sexual orientation, or other relevant forms of discrimination, including harassment"); and b) the type of instances that trigger the reporting of the corresponding metrics (e.g. "judicial and non-judicial proceedings that have been initiated such as cases before domestic courts, mediation, complaints filed with the National Contact Points for OECD Multinational Enterprises"). In our view the best path to support simplification in relation to point (b) above would be to focus on incidents that have been confirmed through a final decision issued by a court of law or relevant authorities.	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	To align with the simplification approach, we suggest reformulating as follows: "if the undertaking engaged directly with affected communities, their legitimate representatives, or with credible proxies that have insight into their situation for the purpose of target-setting and/or tracking performance against those targets, it shall disclose this fact when disclosing in accordance with [Draft] Amended ESRS 2 GDR-T"	S3	S3-4 - Targets related to affected communities	21.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The FPIC principles encompass situations requiring good faith consultations with the objective of achieving consent of indigenous people and situations requiring their consent. Therefore, we suggest replacing "their right to" with "the principle of" before the wording "free, prior and informed consent ('FPIC')" in the text. FPIC is not a one-size-fits-all concept. Its interpretation varies across jurisdictions, and its implementation must reflect both international norms and domestic legal contexts.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	12.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Here, a uniform assessment of the effectiveness of the channels available to affected communities might be difficult since these processes often dependepen on specific circumstances.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	This paragraph mixes up two separate fact situations and international norms: a consultation obligation regarding corporate activities affecting the lands or territories of communities (Art. 32 UNDRIP), and the relocation of communities, requiring their consent (Art. 16 ILO Convention 169; Art. 10 UNDRIP).	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	AR 3
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Considering any legal disputes related to land rights and to the free, prior and informed consent (FPIC) of indigenous peoples when determining human rights incidents can be burdensome.	S3	S3-3 - Actions and resources related to affected communities	AR 9
Excels	DRSC	(National) standard setter	Germany			I disagree	The added value of this requirement is not apparent, as the information in the sustainability report should be consistent anyway. Either the exact interaction referred to should be clarified, or this paragraph should be deleted.	S3	S3 - Interaction with other ESRS	7.
Excels	DRSC	(National) standard setter	Germany			I disagree	NMIG 1 for para. 8 Communication channels were removed from MDR-Ps, why bringing them up here introducing additional requirements (even as "possible elements")? If the guidelines on how to disclose information on policies are not streamlined in ESRS 2, this will lead to different way of presentation across the standards. Possible solution: streamline in ESRS 2 or eliminate completely.	S3	S3-1 - Policies related to affected communities	8.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG Previously (ESRS S3.36), the focus was only on "severe human rights incidents". Indicator No. 14 in table III of annex I to Delegated Regulation (EU) 2022/12888 also refers to "severe human rights issues and incidents". In order to ensure consistency between the SFDR and the ESRS, the word "severe" should be reinserted. With regard to the determination of "severe" human rights impacts, the definition of the United Nations Guiding Principles on Business and Human Rights should be adopted.	S3	S3-3 - Actions and resources related to affected communities	19.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if there is no grievance mechanism	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The amended wording replaces "number of severe human rights [incidents/issues]" with "number of human rights [incidents/issues]." This broadens the scope from substantiated, high-impact cases to potentially all recorded incidents, regardless of severity. It also risks undermining alignment with SFDR PAI Indicator #14, which refers to "identified cases of severe human rights issues and incidents". We recommend reintroducing the qualifier "severe" to ensure conceptual clarity and consistency. ESRS S2, S3 and S4 are not classified as metric-containing standards (ESRS 2 AR 37). However, the phrase "disclose these" in DR S3-3 § 19 implies quantitative disclosure, creating confusion about whether these should be treated as metrics and how they fit into the overall metrics and targets framework.	S3	S3-3 - Actions and resources related to affected communities	19
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The clarification should be made more clear; e.g., if a sub-sub-topic (e.g., land-related impacts) is material, shall we really report the whole sub-topic (communities´ economic, social and cultural rights)? In our opinion paragraph 3 should be called "When a sub-sub-topic (mentioned in parentheses) is material, the undertaking shall report only this sub-sub-topic, not the entire sub-topic."	S3	S3-1 - Policies related to affected communities	3.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Why is the sub-sub-topic "adequate housing and food" merged? If we don´t have an IRO on food, we can´t report on that	S3	S3-1 - Policies related to affected communities	3.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The requirement to state actions is clear but what is meant with the term resources (personnel, money, time…)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S3	S3-3 - Actions and resources related to affected communities	15.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	How can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S3	S3-3 - Actions and resources related to affected communities	16. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	11.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-4 - Targets related to affected communities	19.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-4 - Targets related to affected communities	AR 10
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Inconsistent with other Social ESRS, as it states, "shall be consistent with" instead of "shall be read in conjunction with".	S3	Interactions with other ESRS	7
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	It is unclear why AR8 only covers some of the requirements originally under para 9b and whether omission of other requirements such as the consideration of systemic / widespread risks and incidents are deliberate or an oversight. These are also not covered within ESRS2.	S3	S3-3 - Actions and resources related to affected communities	AR 8
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Unclear why disclosures relating to positive impacts, risks and opportunities have been removed. As per ESRS2, if a material IRO has been identified then GDR-A should be followed but then removing the requirement from S3 and only retaining explicit reference to negative impacts creates confusion	S3	S3-3 - Actions and resources related to affected communities	16.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Although we are fully aligned to keep reporting of severe human rights incidents as part of the SFDR requirements, it is unclear why these requirements have not been grouped under one section to clarify all Human rights requirements in one place. In addition, it is unclear if general non complinaces with the UNGP has been deliberately removed or if this is an oversight. Further, a clearer definition of what should be considered as a severe human rights incident must be provided to allow comparability e.g. does AR9 include all the incidents that should be reported or is this just an example	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We ask for clarity related to paragraph 17, which singles out disclosure of key actions to manage only material negative impacts. however the immeditately preceeding paragraph, DR 15, requires disclosure in accordance with GDR-A which requires disclosure of key actions in relation to all material impacts, risks and opportunities. Furthermore, the old paragraph S3-4 DR 32. (c) relating to the dsiclosure of key actions in relation to positive impacts has been deleted from mandatory and moved to NMIG. Is it the intention of the EFRAG to only keep the disclosures of key actions in relation to material negative impacts related to Affected Communities as a manadatory DR and all key actions in relation to material positive impacts, risks and oppotunities as voluntary?	S3	S3-3 - Actions and resources related to affected communities	17.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Consolidate the data point on particular policy provisions on preventing and addressing impacts on indigenous peoples with the general description of policies (§8-9) to streamline reporting	S3	S3-1 - Policies related to affected communities	9.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Move the data point (§12) on the consideration of the rights of indigenous peoples in the stakeholder engagement approach to AR, as indigenous peoples are one category of affected communities	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	12.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Reframe the datapoints on the process for engaging with affected communities and how the perspectives of affected communities inform the undertaking's decisions or activities in connection with ESRS 2 SBM-2, while highlighting key information (material IROs); current drafting is overly granular. Proposed wording: "In addition to the general information disclosed under ESRS 2 SBM-2 on interests and views of stakeholders, the undertaking shall provide information on the type of value chain workers, affected communities, consumers and end users subject to material impacts, the nature of these impacts (i.e., whether they are widespread and systemic, or related to individual incidents), and whether and how the interests and views of these stakeholders inform its decisions or activities aimed at managing the related material topics/sub-topics."	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	12.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	When the undertaking has severe human rights incidents, replace "if applicable, disclose these" (overly granular) with "including, where applicable, a description of affected communities"	S3	S3-3 - Actions and resources related to affected communities	19.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	In reference to §21, delete the datapoint on whether and how the undertaking engages directly with affected communities when disclosing in accordance with ESRS 2 GDR-T as it is already adressed in S3-2	S3	S3-4 - Targets related to affected communities	19.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The clarification should be made more clear; e.g., if a sub-sub-topic (e.g., land-related impacts) is material, shall we really report the whole sub-topic (communities´ economic, social and cultural rights)? In our opinion paragraph 3 should be called "When a sub-sub-topic (mentioned in parentheses) is material, the undertaking shall report only this sub-sub-topic, not the entire sub-topic."	S3	S3-1 - Policies related to affected communities	3.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Why is the sub-sub-topic "adequate housing and food" merged? If we don´t have an IRO on food, we can´t report on that	S3	S3-1 - Policies related to affected communities	3.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The requirement to state actions is clear but what is meant with the term resources (personnel, money, time...)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S3	S3-3 - Actions and resources related to affected communities	15.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	How can "KEY" actions be identified? Either delete the word "key" or mention in the glossary: "The company may defined themselves the thresholds for key actions." OR "Key actions are those most relevant for strategy and business modell and are at the heart of the company." for example.	S3	S3-3 - Actions and resources related to affected communities	16. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	.	S3	S3-1 - Policies related to affected communities	8.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	11.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				(This relates to the whole S3, but S3-2 is most directly relevant) — there should be an expectation that communications/engagements with affected communities are conducted in relevant local languages, where applicable.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-4 - Targets related to affected communities	19.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Recommend add "with affected communities, or good faith effort to engage with their legitimate representatives, or with credible proxies" as this is not always clear.	S3	S3-4 - Targets related to affected communities	AR 10
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	- First, the FPIC principles encompass situations requiring good faith consultations with the objective of achieving consent of indigenous people and situations requiring their consent. Therefore, we suggest replacing "their right to" with "the principle of" before the wording "free, prior and informed consent ('FPIC')" in the text. FPIC is not a one-size-fits-all concept. Its interpretation varies across jurisdictions, and its implementation must reflect both international norms and domestic legal contexts. - Second, point (iii) mentions "legislative or administrative measures that affect them", which gives to this DR a stricter formulation than art. 6 ILO 169 ("may directly affect"); art. 19 UNDRIP ("may affect"). Companies cannot be expected to consult communities about all government measures that might potentially affect them (e.g., taxes).	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	12.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Here, a uniform assessment of the effectiveness of the channels available to affected communities might be difficult since these processes often dependepen on specific circumstances.	S3	S3-3 - Actions and resources related to affected communities	13.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				(This relates to the whole S3, but S3-2 is most directly relevant) — there should be an expectation that communications/engagements with affected communities are conducted in relevant local languages, where applicable.	S3	S3-2 - Engagement with affected communities, existence of channels for affected communities to raise concerns or needs and approaches to remedy	13.
Excels	Polish Chamber of Chemical Industry	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The requirement to disclose the annual ratio of the highest paid individual to the median remuneration of employees lacks clarity. It is not clear whether "highest paid individual" refers to an employee or to any person within the undertaking's own workforce. Published reports show inconsistent reporting practices. This should be clarified to ensure comparability.	S1	S1-15 - Remuneration metrics	44. (b)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	§a) This new formulation does not simplify but complexify our reporting, we would suggest to come back to previous formulation	S1	S1-5 - Characteristics of the undertaking's employees	23.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The publication of all these indicators shall be limited to employees. The mention to "other workers" should be deleted. Indeed the latency between occupational exposure, the onset of the disease, and death makes it impossible to identify deaths due to occupational diseases among subcontractors' employees, as these usually occur several years after the work was performed.	S1	S1-13 - Health and Safety metrics	AR 26
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	This indicator shall be deleted, it does not provide useful information	S1	S1-15 - Remuneration metrics	44. (b)
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I disagree	Outside the EEA, the notion often does not exist and is therefore impossible to collect. Therefore this paragraph could be deleted.	S1	S1-7 - Collective bargaining coverage and social dialogue	27. (c)
Excels	ASD					I partially agree and partially disagree	Allow to consider information about downstream value chain as classified or sensitive information, therefore allow to apply ESRS 1 section 7.8 ("The undertaking is not required to disclose classified information or sensitive information, even if such information is considered material"), whilst maintaining the expectation to conduct reasonable downstream due diligence as practically feasible.	S4	S4-1 - Policies related to consumers and end-users	1.
Excels	ASD					I partially agree and partially disagree	We call to delete S4-2_01 because it is redundant	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	2.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	A boolean DP (whether) will complicate the structure of a generic GDR-P. Suggestion: create a separate datapoint in S4-1:"It shall state whether policies cover specific groups (for example, particular age groups) or all consumers and/or end-users." Or, create an AR to specify content (without a boolean).	S4	S4-1 - Policies related to consumers and end-users	9.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	14a) This DP would likely be overlapping with the generic GDR-A content. Transforming it to a AR would allow to include the content in the GDR-A. "The undertaking shall describe key actions taken, planned or underway to prevent, mitigate and remediate material negative impacts on consumers and/or end-users, including its approach in situations where tensions arise between such actions and other business pressures (for example, practices related to marketing, sales and data use)."	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	Chamber of Labour, Austria	Trade union	Austria				The BAK argues that some important nuances are lost as a result of the proposed simplifications: For example, it makes sense to design whistleblowing mechanisms and complaint channels differently, depending on whether they are designed for employees in the value chain, local communities or consumers. These are instruments that must be designed as effectively as possible in the interests of the employees, the other affected parties, but also the companies, because they enable information to be passed on quickly to the company and remedial action can be taken.	S4		
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Information on the grievance mechnism should be removed from S4-2, as this is addressed in the G-standard. Alternatively, it should be noted in the DR that a reference to the Governance information is sufficient, if there is no separate channel for end-users.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It is recommended not to have this level of granularity to call out marginalized groups	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	11.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	We have concerns about disclosing our feedback loop from customers because sometimes it can involve ongoing litigations.	S4	S4-3 - Actions and resources related to consumers and end-users	16.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We agree with the first part (how the company engage with customers and how their perspectives inform company's decision or activities to manage impacts) but we disagree with the second part (how the company gains insights into the perspectives of consumers) as we consider this information does not add any value to the reporting. We propose to delete this second part.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	11.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We consider additional clarification is required about the type of channels to be disclosed and the information to be reported about each of them. For a big company with B2B and B2C customers as ours, the number and varierty of channels is significantly high and it would require considerable effort.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We consider it would not be necesary the whistleblowing channels to be reported here in order to avoid repetitiveness as they are already covered in ESRS G1.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	AR 3
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We consider the application of the "effectiveness criteria for non-judicial grievance mechanisms" as laid out in the UN Guiding Principles on Business and Human Rights is not possible to all the channels. For example, not possible for the conventional commercial channels (e.g. hotline). So we require additional clarification about how to assess the efectiveness of all the channels reported.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	AR 4

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We consider reporting resources about key actions to manage material IROs could be against competition when tackling consumer topics, so we propose to delete this part.	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We think the numeration of the Amendments document is wrong from number 14 onwords as there are two number 14. Please, review and renumerate it again correctly in order to avoid confusion (from 15 to 18)	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We agree with the first part (key actions taken, planned or underway to prevent, mitigate and remediate material negative impacts on consumers and/or end-users) but we disagree with the second part (including its approach in situations where tensions arise between such actions and other business pressures) as we consider this information does not add any value to the reporting.	S4	S4-3 - Actions and resources related to consumers and end-users	15. (a)
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We propose this DR to be deleted as we consider it is not reasonable nor feasible for the company to track and assesse the effectiveness of these actions and initiatives in delivering outcomes for consumers and/or end-users.	S4	S4-3 - Actions and resources related to consumers and end-users	15. (b)
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	For social standards, the removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency. Additionally, we consider the last part of the DR ("and, if applicable, disclose these") should be deleted.	S4	S4-3 - Actions and resources related to consumers and end-users	16.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We propose this DR to be deleted as we consider it should not be necessary to disclose how the company engage with customer to set targets. The way in which the objective is defined does not add any value. Whether or not there is a direct relationship with customers in the definition of objectives does not mean that a company is doing better or worse, nor is it relevant for comparing companies. The only important thing is whether or not there is an objective.	S4	S4-4 - Targets related to consumers and end-users	18.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Similar to comment for ESRS 1 Appendix A: the social susubtopics in parenthesis are not exhaustive of the sub-topic title/ human rights instruments mentioned in CSRD. Hence all parentheses should start with 'including'.	S4	S4 - Objective	4.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Former disclosure of whether and how it is ensured that own practices do not cause or contribute to material negative impacts on workers in the value chain has been deleted and should be reinstated. Key part of UNGPs/OECD Guidelines and key issue in what is driving impacts with business partners. 'The undertaking shall disclose whether and how it takes action to avoid causing or contributing to material negative impacts on consumers and/or end-users through its own practices, including, where relevant, in relation to marketing, sales and data use. This may include disclosing what approach is taken when tensions arise between the prevention or mitigation of material negative impacts and other business pressures.'	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	The disclosure requirement should be expanded to also include metrics in addition to target, to ensure metrics are captured at topical level for S2,S3,S4. Inspiration can be taken from E4-5 including para 21: 'In addition to paragraph 20 and in accordance with [Draft] Amended ESRS 2 GDR-M, the undertaking shall report metrics related to its material impacts on biodiversity and ecosystems.'	S4	S4-4 - Targets related to consumers and end-users	17.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new S4-1 is more concise, focusing on the existence and scope of consumer-related policies. Moving detailed commitments and human rights alignment to ESRS 2 reduces redundancy.	S4	S4-1 - Policies related to consumers and end-users	9.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	Combining engagement processes, grievance channels, and remediation avoids duplication and simplifies the disclosure. Moving frequency and type of engagement to NMIG reduces excessive detail.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	10.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new S4-3 focuses on key actions and resources for managing IROs, improving clarity. Referring to ESRS 2 GDR-T/GDR-M for effectiveness assessment avoids duplication.	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The revised S4-4 prioritizes disclosure of target definition, performance monitoring, and stakeholder engagement, simplifying reporting. Removing detailed and speculative explanations about lessons learned or improvements reduces burden. Aligning with ESRS 2 GDR-T ensures consistency across disclosures.	S4	S4-4 - Targets related to consumers and end-users	16.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We propose retaining former S4 25 (d) on how the undertaking involves stakeholders in ensuring the effectiveness of their grievance mechanisms, in line with GRI 2-25-e.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	For the purpose of simplification, data points on the availability of channels such as grievance mechanisms from S1, S2, S3 and S4 could be consolidated into one data point covering all categories of stakeholders and moved to ESRS 2. This would be equivalent to the consolidation done for the data point on the human rights policy commitment. This would also increase alignment with GRI 2-25. In addition, the data point could be further aligned verbatim with GRI 2-25-b and e, for greater clarity and interoperability.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	For the purpose of simplification, data points on the general approach to and processes for providing or contributing to remedy from S1, S2, S3 and S4 could be consolidated into one data point covering all categories of stakeholders and moved to ESRS 2. This would be equivalent to the consolidation done for the data point on the human rights policy commitment. This would also increase alignment with GRI 2-25. In addition, the data point could be further aligned verbatim with GRI 2-25-c, for greater clarity and interoperability.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	13.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend retaining remedy actions (former S4 para 31(b)) as a stand-alone data point, in line with GRI Standard 3-3-d-ii. Having a standalone data point ensures that this information is not overlooked and it is easily identifiable by users and stakeholders.	S4	S4-3 - Actions and resources related to consumers and end-users	15. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	the removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency.	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Very confusing why previous sub-sub-topics are sometimes moved to extra points and sometimes in brackets. This will lead to huge discussions on which level materiality is going to be defined, whether to use topics in front or in the brackets. Materiality analysis needs to be fully and new implemented due to this change. Only resonable approach: Leave out sub-topics in general and just list the previous sub-sub-topics one after each other. Furthermore, a proper mapping won't be possible like this!!	S4	S4 - Consumers and end-users	4
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Good change from "Access to (quality) information" to "Access to information" --> more streamlined and clear.	S4	S4 - Consumers and end-users	4.(a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	I understand the requirement to state actions but what is meant with resources (personnel, money, time...)? Definition not clear enough. Maybe keep focus only on key actions related to material topics. Furthermore, how can "KEY" actions be identified? Delete the word "key".	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Delete the word "key".	S4	S4-3 - Actions and resources related to consumers and end-users	15. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Move to ESRS 2 like all other human rights related topics.	S4	S4-3 - Actions and resources related to consumers and end-users	16.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The sentence seems off: "..., or because they have a direct interest in their implementation are examples of policy aspects to disclose.". What does that mean? Very complex phrasing. Maybe two sentences?	S4	S4-1 - Policies related to consumers and end-users	AR 1
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please see comment for ESRS S1 para. 21	S4	S4-4 - Targets related to consumers and end-users	17.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please consider to include this indication only in a general section instead of in each topical standard, because it could be misleading. The same comment is applicable to all S standards.	S4	S4 - Objective	6.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Are commercial-related claims (and the related communication channels implemented with this purpose) raised from customers in the scope of this DR? Or other information are expected to be reported? Please consider to better detail this request for what concerns consumers and end-users.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This seems not to be a simplification therefore we suggesto to eliminate the brackets or insert "or".	S4	S4-3 - Actions and resources related to consumers and end-users	AR 6
Excels	UNICEF	NGO	United States			I partially agree and partially disagree	It is unclear why this paragraph of ESRS S4 does not reference international human rights instruments in the same way that similar paragraphs do in ESRS S1, S2, and S3. Children are significant consumers and end-users of company products and services, and are especially vulnerable to adverse impacts; therefore, the UN Convention on the Rights of the Child should be referenced. However, consistent with Recital 49 of the CSRD, UNICEF believes the International Bill of Human Rights and other core UN human rights conventions also should be referenced.	S4	S4 - Objective	2.
Excels	UNICEF	NGO	United States			I disagree	The removal of the term "for example" from the list of economic, social, cultural, civil, and political rights of relevance to ESRS S4 is highly problematic and contradicts one of the core tenets of human rights-based approaches. For example, Principle 18 of the UNGPs states that companies "should include all internationally recognized human rights as a reference point, since enterprises may potentially impact virtually any of these rights." By removing the term "for example", ESRS S4 becomes a narrower list of sub-topics, creating the risk that companies will use this list as an exhaustive checklist, rather than considering the full range of economic, social, cultural, civil, and political rights relevant to consumers and end-users. There are many examples, but education (UDHR 16), peaceful assembly (UDHR 20), and culture (UDHR 27) are all human rights of relevant to consumers and end-users. Referencing all potentially relevant human rights, not just a subset, is significant in the context of emphasizing a "fair presentation framework" and entity-specific disclosures, as it provides the full range of potential impacts for companies to consider.	S4	S4 - Objective	4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UNICEF	NGO	United States			I disagree	UNICEF disagrees with the text of ESRS S4 - 7 stating that the unlawful use or misuse of a company's products and services by consumers and/or end-users should be excluded from this standard. There are many scenarios where unlawful use and misuse are material impacts (e.g., the use of tech-based products to facilitate online child sexual exploitation and abuse), making paragraph is very confusing for companies using the materiality filter. Removing this paragrpah would simplify ESRS S4 for preparers. Companies are already publicly addressing the issue of illegal use, and for many tech companies, this will be one of their most material impacts; it is also covered by a variety of EU laws with reporting requirements, such as the EU Digital Services Act. For these reasons, we do not believe it should be left out of a sustainability statement. While the risk of unlawful use or misuse may exist across different sectors, we believe this is especially important for companies operating in the digital environment, and these impacts will no longer be captured by sector-specific standards.	S4	S4 - Objective	7.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	It is unclear why the interactions are limited to S1 while the 4 social standards are connected in the Set 1. For instance, the general approach to providing remedies and/or grievance mechanisms is equally relevant to own workforce, consumers, value chain workers, and affected communities. We recommend clarifying these interactions and extending them to ESRS S2 and S3 to reflect this broader applicability (cf. related comment on S2 § 3 and S3 §7).	S4	S4 - Interaction with other ESRS	8.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend slightly revising the wording of this AR, as the phrasing of amended AR 13 was, in our view, clearer. One example of possible redrafting is: "Among the policy aspects that can be disclosed, the undertaking can provide an illustration of the types of communication of its policies to those individuals, group of individuals or entities for whom they are relevant, either because they are expected to implement them (for example, the undertaking's employees, contractors and suppliers), or because they have a direct interest in their implementation (for example, own workers and investors)."	S4	S4-1 - Policies related to consumers and end-users	AR 1
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	In the exposure drafts, § 14 is assigned twice to two separate datapoints (former § 30 and former § 31). This inconsistency in § numbering continues throughout ESRS S4 and shall be corrected.	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	"Subject to the relevant privacy regulation" - This is ambiguous, and requires clarification about whether this statement refers to local privacy regulations or GDPR etc.	S4	S4-3 - Actions and resources related to consumers and end-users	16.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Since sub-sub topics were eliminated, it is not clear what is expected to be disclosed about the list of sub-sub topic, now indicated in parenthesis of sub-topics. For example, for ESRS S4: (a) information-related impacts for consumers and/or end-users (privacy, access to information, freedom of expression);	S4	S4 - Objective	4.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Please consider to include this indication only in a general section instead of in each topical standard, because it could be misleading. The same comment is applicable to all S standards.	S4	S4 - Objective	6.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Are commercial-related claims (and the related communication channels implemented with this purpose) raised from customers in the scope of this DR? Or other information are expected to be reported? Please consider to better detail this request for what concerns consumers and end-users	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This seems not to be a simplification therefore we suggesto to eliminate the brackets or insert "or".	S4	S4-3 - Actions and resources related to consumers and end-users	AR 6
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency.	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The currently applicable version (ESRS S4 paragraph 19) specifies that disclosures on engagement with consumers and end-users refer to material impacts on them. In the proposed draft ESRS S4 paragraph 10, this clarification has been removed. In addition, the proposed draft ESRS S4 paragraph 11 refers to actual and potential impacts on consumers and/or end-user, without specifying that this only concerns material impacts. This raises the question of whether section S4-2 is intended to address engagement more generally, without reference to material impacts. If the intention is to preserve the current meaning, in our view this should be explicitly clarified, confirming that engagement relates specifically to material impacts.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	11.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Draft AR 2 states that the engagement with consumers and end-users can take different forms, such as information. Whereas, Annex II Acronyms and Glossary of Terms defines stakeholder engagement as an ongoing process of interaction and dialogue between the undertaking and its stakeholders that enables the undertaking to hear, understand and respond to their interests and concerns. It is recommended to harmonise these formulations so that the concept of engagement is applied consistently across the standard.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	AR 2

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	In our view, companies should disclose the processes through which they support or require the availability of the channels available to consumers and/or end-users to bring their concerns or needs within their business relationships. This would demonstrate whether such mechanisms are applied in practice or remain only formal, and it would allow stakeholders to better assess the effectiveness of due diligence and ethical practices across the company's broader network.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	it is important to clarify whether and how the ESRS S4 standard applies to B2B companies. In this regard, it would be helpful for the ESRS to provide clear guidance and examples for B2B companies, acknowledging that their "customers" are often other companies. The ESRS should offer straightforward guidance and examples specifically for B2B companies, recognizing that their customers are usually other businesses. To give a complete and accurate overview, ESRS should also let B2B companies report on their impacts, risks, and opportunities related to these business customers, as well as how they address them.	S4	S4 - Objective	1.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It seems GDR-M does not apply to this standard. Should it be mention here then?	S4	S4 - Objective	5.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It seems GDR-M does not apply to this standard. Should it be mention here then?	S4	S4 - Objective	5. (b)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We suggest that these disclosure requirements undergo a more comprehensive review, so they fully capture all impacts—positive as well as negative—instead of placing particular emphasis on adverse effects.	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	in relation to topics such as privacy, It would be useful to let companies share their entire privacy strategy at once, instead of splitting the information by different affected stakeholder groups (S1-own workforce, S2-workers in the value chain, S4-end users and consumers). This approach would make it easier for companies to describe their overall privacy policies, actions, and targets, and to show how well they are performing on privacy matters.	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S4 Consumers and end-users, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S4 Consumers and end-users, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	S4	S4 - Objective	1.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	S4	S4 - Objective	5.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The draft provides for an amendment consolidating DR SX-2 and DR SX-3 from Standards S1 to S4 into a single DR SX-2, in view of the interrelation between the three elements engagement, channels for raising concerns, and remediation. This consolidation would result in the renumbering of all DRs in Standards S1 to S4 by minus one. Such renumbering would entail considerable effort for updating all external and internal documentation and publications. A reduction of this administrative burden would therefore be appropriate.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	10.
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	The previous paragraph ESRS S4.35 requested the disclosure of only "severe human rights issues and incidents". The new paragraph S4.16 extends the scope to the disclosure of "human rights incidents. In order to ensure consistency (e.g. with SFDR), the word "severe" should be reinserted. With regard to the determination of "severe" human rights impacts, the definition of the United Nations Guiding Principles on Business and Human Rights should be adopted.	S4	S4-3 - Actions and resources related to consumers and end-users	16.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	deletion of "severe" leads to difference to SFDR requirement and should therefore be changed again and "severe" should be added, otherwise, extended reporting burden	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It should also include at least reference to ESRS S2 Workers in the value chain, as they may be end-users of IT systems provided by the undertaking. Also AR 1 for para. 9 refers to suppliers and contactors.	S4	S4 - Objective	8.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	S4	S4-3 - Actions and resources related to consumers and end-users	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Whole phrase "human rights incidents" should be in bold as it is a separate defined term.	S4	S4-3 - Actions and resources related to consumers and end-users	16.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	S4	S4-4 - Targets related to consumers and end-users	17.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"directly their attention" should be replaced with "directly its attention"	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Reference (old paragraph 17) to the following should still be included: The undertaking shall disclose whether and how its policies with regard to consumers and/or end-users are aligned with internationally recognised instruments relevant to consumers and/or end-users, including United Nations (UN) Guiding Principles on Business and Human Rights.	S4	S4-1 - Policies related to consumers and end-users	9.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	There is no clear definition provided of consumers and end-users.	S4	S4-1 - Policies related to consumers and end-users	9.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Reference (old paragraph 23) to the following should still be included: The undertaking shall describe the processes it has in place to provide for or cooperate in the remediation of negative impacts on consumers and end-users that the undertaking is connected with, as well as channels available to consumers and end-users to raise concerns and have them addressed.	S4	S4-3 - Actions and resources related to consumers and end-users	13.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Since sub-sub topics were eliminated, it is not clear what is expected to be disclosed about the list of sub-sub topic, now indicated in parenthesis of sub-topics. For example, for ESRS S4: (a) information-related impacts for consumers and/or end-users (privacy, access to information, freedom of expression);	S4	S4 - Objective	4.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please consider to include this indication only in a general section instead of in each topical standard, because it could be misleading. The same comment is applicable to all S standards.	S4	S4 - Objective	6.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Are commercial-related claims (and the related communication channels implemented with this purpose) raised from customers in the scope of this DR? Or other information are expected to be reported? Please consider to better detail this request for what concerns consumers and end-users	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Regarding " The actions taken by the undertaking differ depending on its connection to the impact (causation, contribution, direct linkage), and how it has identified the actions as appropriate for addressing material impacts" it is not clear what the undertaking is expected to report on. Shall the distinction between causation, contribution and direct linkage be reported separately? In the previous version of ESRS the request was "whether the undertaking causes or contributes to a material impact" with "or" that was reflecting an alternative approach rather than the simplified requirement which seems to require three kind of impact to be disclosed separately. This seems not to be a simplification therefore we suggesto to eliminate the brackets or insert "or".	S4	S4-3 - Actions and resources related to consumers and end-users	AR 6
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The removal of the term "severe" from the disclosure requirements for human rights incidents across all social standards is particularly concerning. Without a clear limitation to the most serious cases, companies may be required to report even minor or less relevant incidents. This broad scope risks undermining the materiality of disclosures and contradicts the objective of simplification. Maintaining a focus on severe human rights incidents is essential to ensure that reporting remains meaningful, proportionate, and aligned with the principles of relevance and efficiency.	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	S4	S4-4 - Targets related to consumers and end-users	4.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Information on the grievance mechnism should be removed from S4-2, as this is addressed in the G-standard. Alternatively, it should be noted in the DR that a reference to the Governance information is sufficient, if there is no separate channel for end-users.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This requirement is overly broad and lacks a clear legal basis in the CSRD, which focuses on customer relationships under governance factors, rather than as a social standard. The expectation to describe policies for all consumers and end-users, including specific groups, risks imposing disproportionate administrative burdens, particularly for companies operating in diverse markets and sectors. Many aspects of consumer and product safety are already strictly regulated by national and EU law, rendering additional reporting redundant and of limited added value. Furthermore, the definition of “consumers and end-users” is vague and may lead to inconsistent reporting. The requirement does not sufficiently account for sector-specific differences or the practical limitations companies face in monitoring and managing impacts across all consumer groups. The standard should be limited to material, sector-relevant impacts and aligned with existing legal obligations. Reporting should focus on genuinely material risks and avoid duplicating information already required by law.	S4	S4-1 - Policies related to consumers and end-users	9.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This requirement is overly broad and lacks practical feasibility. The expectation to describe engagement approaches and grievance mechanisms for all consumers and end-users, across potentially global and highly diverse markets, imposes a disproportionate administrative burden — especially for with indirect or limited contact with end-users. Many aspects of consumer protection, complaint handling, and product safety are already strictly regulated by national and EU law, making additional reporting redundant and of limited added value. Furthermore, the definition of "channels" and "remedy" is vague, and the requirement does not sufficiently account for the practical limitations companies face in monitoring and managing concerns across all consumer groups.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	10.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This requirement is overly broad and lacks practical feasibility. Expecting companies to describe all actions taken, planned, or underway to prevent, mitigate, and remediate material negative impacts on consumers and end-users — along with approaches for balancing these actions against business pressures — imposes a disproportionate administrative burden, especially for companies operating in diverse and global markets. Many aspects of consumer protection, marketing, and data use are already strictly regulated by national and EU law, making additional reporting redundant and of limited added value. Furthermore, the requirement to track and assess the effectiveness of these actions is vague and does not sufficiently account for sector-specific differences or the practical limitations companies face in monitoring and managing impacts across all consumer groups. The option to omit this disclosure if referenced elsewhere adds complexity and risks inconsistent reporting.	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	Confederation of German Employers Associations (BDA)	Business association (other than association of financial institution)	Germany			I disagree	This requirement is overly broad and lacks practical clarity. Expecting companies to disclose whether and how they have engaged directly with consumers, end-users, their "legitimate representatives," or "credible proxies" for target-setting and performance tracking is vague and difficult to operationalize — especially for companies with indirect or large-scale consumer relationships. The terms "legitimate representatives" and "credible proxies" are undefined, risking inconsistent interpretation and reporting across sectors and markets. Moreover, the feasibility and relevance of such engagement will vary greatly depending on the business model and sector. For many companies, direct engagement with end-users is not practical or meaningful, and may not yield reliable input for target-setting or performance assessment. The standard should clarify the criteria for identifying legitimate representatives and credible proxies, and limit the requirement to cases where such engagement is both material and feasible. Reporting should focus on objective, material indicators, with engagement results used as supplementary context only where appropriate.	S4	S4-4 - Targets related to consumers and end-users	17.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	Draft excludes "unlawful use or misuse" of products. But it does not define where misuse still implies company responsibility (e.g. foreseeable misuse). This creates loopholes. The exclusion is too broad. To close the loophole, the standard should clarify that if misuse is reasonably foreseeable and preventable through product design, labeling, education, or controls, then it still falls under company responsibility.	S4	S4 - Objective	7.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	The revised drafting convention counts "shall disclose" datapoints in main body and places methodology in ARs (which are still mandatory methodological guidance but not counted as datapoints). This distinction is subtle and could cause inconsistent recording of required datapoints and confusion for assurance scope (what counts as a disclosure datapoint vs methodology).	S4	S4-1 - Policies related to consumers and end-users	AR 1
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	Para 11 requires explanation of how perspectives of vulnerable groups were gained and mentions "credible proxies". There is no definition of what counts as a credible proxy, how representativeness is assessed, or how consent/protection of vulnerable respondents is ensured. Auditors will need records demonstrating representativeness and methodology; these are not specified.	S4	S4-1 - Policies related to consumers and end-users	11.
Excels	BDO Poland	Auditor	Poland			I disagree	AR3 lists types of channels and states whistleblowing mechanisms are included "under certain circumstances" — that wording is ambiguous and could lead to inconsistent inclusion/exclusion of whistleblowing data in consumer reporting. Auditors will need to see policy decisions on inclusion; the standard doesn't require explaining that decision.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	AR 3
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Why is it an AR and not included directly as a paragraph about channels of communication	S4	S4-1 - Policies related to consumers and end-users	AR 1
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We agree to merge S4-2 and S4-3. But in pararaph 11 there are a lot of information together. We think it would be clearer to separate the different DP. As example : the part on vulnerable poeple.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	11.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We think it would be better to separate the point on the effectiveness of theses channels as it is another DP	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Not clear concerning the part on policies for protecting individuals. Is it a DP ? If yes, it would be better to put it directly as a paragraph	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	AR 4
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The first part of the paragraph is coved by GDR-A ? Better to mention it. Or to present it like for targets "when disclosing in accrodance with GDR-T..."	S4	S4-3 - Actions and resources related to consumers and end-users	15. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I disagree	Need to be clarified.	S4	S4-3 - Actions and resources related to consumers and end-users	AR 6
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Good simplification but we could still better articulate the GDR and the addtionnal DP in the DR. In eahc paragraph the good wording would be "in addition to the information required by GDR-P ou GRDA-A...". Moreover we think AR should not include additional DP. If it is a DP it should be put in a paragraph of the DR. It is well done in ESRS G1	S4	S4 - Interaction with other ESRS	5.
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest to remove this AR, considering that the information has been already deleted from GDR-P.	S4	S4-1 - Policies related to consumers and end-users	AR 1
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the existing para. 31(c) to provide a more comprehensive overview that also includes actions relating to positive impacts, and not only those linked to negative impacts	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the existing para. 33 to provide a more comprehensive overview that also includes actions related to risks and opportunities, and not only those related to impacts	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS S4 Consumers and end-users when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	S4	S4 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	ESRS S4 is about consumers/end-users where sustainability impacts arise (e.g., health/safety, access, discrimination). Privacy/data protection risks are managed as part of enterprise operational risk, compliance and ICT/cybersecurity, with established controls, metrics and incident reporting. Treating them as "sustainability" topics blurs scopes and dilutes ESRS' focus. Adding "privacy" to S4 triggers duplicate narratives and assurance across two regimes (operational risk reporting and ESRS), without improving decision-useful sustainability information. Recommendation: Delete all remaining references to "privacy" from ESRS S4 and the cross-cutting list in ESRS 1, because privacy and data protection are already governed and reported as operational/ICT risks under existing legal and risk frameworks. ESRS should not present these matters as sustainability-related.	S4	S4 - Interaction with other ESRS	4. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary duplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	S4	S4 - Objective	5.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We would like EFRAG to clarify whether the scope of S4 is restricted only to private individuals or does it also include institutional clients/corporates.	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	10.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The concept of incidents and how to identify them is still unclear. Among Disclosure Requirements, Application Requirements and the Glossary there are several definitions of incidents and confirmed/substantiated incidents. We suggest the best approach would be having specific definitions for each case (e.g. human rights incidents, incidents of corruption and bribery, etc.) and presenting them under the related application requirements. Such definitions would then include detailed explanations of: a) the scope of the matter (e.g. "discrimination at work on the grounds of gender, racial or ethnic origin, nationality, religion or belief, disability, age, sexual orientation, or other relevant forms of discrimination, including harassment"); and b) the type of instances that trigger the reporting of the corresponding metrics (e.g. "judicial and non-judicial proceedings that have been initiated such as cases before domestic courts, mediation, complaints filed with the National Contact Points for OECD Multinational Enterprises"). In our view the best path to support simplification in relation to point (b) above would be to focus on incidents that have been confirmed through a final decision issued by a court of law or relevant authorities.	S4	S4-3 - Actions and resources related to consumers and end-users	16.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	To align with the simplification approach, we suggest reformulating as follows: "if the undertaking engaged directly with consumers and/or end-users, their legitimate representatives, or with credible proxies that have insight into their situation for the purpose of target-setting and/or tracking performance against those targets, it shall disclose this fact when disclosing in accordance with [Draft] Amended ESRS 2 GDR-T"	S4	S4-4 - Targets related to consumers and end-users	18.
Excels	DRSC	(National) standard setter	Germany			I disagree	The added value of this requirement is not apparent, as the information in the sustainability report should be consistent anyway. Either the exact interaction referred to should be clarified, or this paragraph should be deleted.	S4	S4 - Interaction with other ESRS	8.
Excels	DRSC	(National) standard setter	Germany			I disagree	NMIG 1 for para. 9 Communication channels were removed from MDR-Ps, why bringing them up here introducing additional requirements (even as "possible elements")? If the guidelines on how to disclose information on policies are not streamlined in ESRS 2, this will lead to different way of presentation across the standards. Possible solution: streamline in ESRS 2 or eliminate completely.	S4	S4-1 - Policies related to consumers and end-users	9.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL The listing in paragraph 14 appears twice.	S4	S4-3 - Actions and resources related to consumers and end-users	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG Previously (ESRS S4.35), the focus was only on "severe human rights issues". Indicator No. 14 in table III of annex I to Delegated Regulation (EU) 2022/12888 also refers to "severe human rights issues and incidents". In order to ensure consistency between the SFDR and the ESRS, the word "severe" should be reinserted. With regard to the determination of "severe" human rights impacts, the definition of the United Nations Guiding Principles on Business and Human Rights should be adopted.	S4	S4-3 - Actions and resources related to consumers and end-users	15.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if there is no grievance mechanism	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	It does not require to report key actions taken, planned or underway to cause positive impacts and to manage risks and opportunities. It should also require these actions because this would be critical for undertakings that did not identify material negative impacts.	S4	S4-3 - Actions and resources related to consumers and end-users	14(a)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if human rights incidents have been reported. Additionally, the amended wording replaces "number of severe human rights [incidents/issues]" with "number of human rights [incidents/issues]." This broadens the scope from substantiated, high-impact cases to potentially all recorded incidents, regardless of severity. It also risks undermining alignment with SFDR PAI Indicator #14, which refers to "identified cases of severe human rights issues and incidents". We recommend reintroducing the qualifier "severe" to ensure conceptual clarity and consistency.	S4	S4-3 - Actions and resources related to consumers and end-users	15
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to limit boiler plate texts and increase the relevance and readability of the disclosure, we suggest requiring only disclosures if there is no grievance mechanism	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	12
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	It does not require to report key actions taken, planned or underway to cause positive impacts and to manage risks and opportunities. It should also require these actions because this would be critical for undertakings that did not identify material negative impacts.	S4	S4-3 - Actions and resources related to consumers and end-users	14(a)

Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is recommended not to have this level of granularity to call out marginalized groups	S4	S4-2 - Engagement with consumers and end-users, existence of channels for consumers and end-users to raise concerns or needs and approaches to remedy	11.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				Recommend adding flexibility for how companies do this	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We have concerns about disclosing our feedback loop from customers because sometimes it can involve ongoing litigations.	S4	S4-3 - Actions and resources related to consumers and end-users	16.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				Recommend adding flexibility for how companies do this	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	UNESPA (Spanish Association of Insurers and Reinsurers)	Association of financial institutions	Spain			I disagree	S4-3 §14(a) (Previously §S4-4 31(a)) does not require to report key actions taken, planned or underway to cause positive impacts and to manage risks and opportunities. It should also require these actions because this would be critical for undertakings that did not identify material negative impacts.	S4	S4-3 - Actions and resources related to consumers and end-users	14.
Excels	ASD					I agree	These disclosure requirements have been consolidated: DR on the undertaking's overall approach to prevent, detect, investigate and respond to corruption and bribery incidents; DR on training activities within the undertaking about business conduct. Therefore, we welcome EFRAG proposed changes	G1	G1-2 - Actions related to business conduct	10.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Include in (current 2c GDR-A): "training activities within the undertaking on business conduct, including the target audience, frequency and depth of coverage. This shall include the functions and/or roles within the undertaking that are most at risk in respect of corruption and bribery, the percentage of functions and/or roles most at risk within the undertaking in respect of corruption and bribery, as well as..." This information is not related to Policies. It's a bit odd to see it here, especially since it's the point (c) and not (b) following circumstances for not having anti-corruption and anti-bribery policies.	G1	G1-1 - Policies related to business conduct	8. (c)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	The number sequence starts over at 1 in GDR-A, which seems to be a mistake (should be 9?).	G1	G1-2 - Actions related to business conduct	9.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Suggested inclusion to support coherence (see related feedback above): "This shall include the functions and/or roles within the undertaking that are most at risk in respect of corruption and bribery, the percentage of functions and/or roles most at risk within the undertaking in respect of corruption and bribery, as well as..." There seem to be a mistake in the paragraph numbers, this one reads 2c and not 10c in the PDF document.	G1	G1-2 - Actions related to business conduct	10. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	Disclosures (including the associated ARs) on corporate culture according to Set 1 DA should continue to apply so that stakeholders can get a transparent picture of corporate culture.	G1	G1-1 - Policies related to business conduct	1.
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	The provision "the circumstance when where it has no policies on anticorruption or anti-bribery consistent with the United Nations Convention against Corruption1" should be supplemented by "it shall state this and whether it has plans to implement them and the timetable for implementation". This information was included in Set 1. Since the topic of anti-corruption is important, the BAK believes that it is essential that information on the plans and timetable for the implementation of the policies should continue to be included in the report.	G1	G1-1 - Policies related to business conduct	8. (a)
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	From the BAK's point of view, the registration of the company in the EU Transparency Register or an equivalent register in another EU country is a mandatory disclosure, as it is also relevant information for other stakeholders (e.g. banks).	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Business sensitive information: Some datapoints lead to the reporting of sensitive/unfavourable information , e.g. disclosures of the undertaking on its risk assessments to identify corruption and bribery (G1-3; AR5) during ongoing investigations.	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs; Legal concerns (Collection of information for this datapoint requires a lot of effort and raises legal concerns especially related to in-direct financial contributions outside of the EU).	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Redundancy or contradictions with other DRs/DPs; Concerns about usefulness/interpretation (1. Information already disclosed in EU Transparency Register as well as in national Transparency Registers (e.g. Germany, USA) and therefore considered redundant. 2. A prioritization of "main topics in lobbying activities" could imply that political activities in one country could be more important or "material" than in another leading to misunderstandings with external stakeholders).	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Data not currently available; Concerns on data reliability (Not consistent with the information provided in the financial statements which does not cover the entire perimeter.)	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Data not currently available; Concerns on data reliability (Not consistent with the information provided in the financial statements which does not cover the entire perimeter.)	G1	G1-6 - Metrics in relation to payment practices	20. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Only the policies for the complaints procedure are adressed in G1-1. In order to bundle the requirements on the complaints procedure, it would be advisable to bundle this reporting requirement together with the reporting requirements of ESRS S1-2, S2-2, S2-3 and S2-4 on the complaints procedure in a separate chapter. This would support the opportunitie to refer to the descriptions under G1 in the S chapters.	G1	G1-1 - Policies related to business conduct	8. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The metrics relating to anti-corruption and anti-bribery are comprehensible and ok. When summarizing the sub-sub-topics in the ESRS 1 standard, anti-corruption and anti-bribery, animal welfare and complaints procedures were combined in one Sub-Topic. It is unclear why the topics of animal welfare and complaints procedures no longer appear separately in standard G1. This is an inconsistency between the topic overview in ESRS 1 and the G1 standard that should be rectified (see also comment on ESRS G1 - 8)	G1	G1-4 - Metrics related to Incidents of corruption or bribery	12.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	12.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA.	G1	G1-5 - Metrics related to political influence and lobbying activities	15.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA.	G1	G1-6 - Metrics in relation to payment practices	19.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	It is recommended to maintain as a voluntary disclosure to avoid unintended legal and agency implications. Requiring legal violation disclosure imposes a new, potentially serious obligation in Europe where no affirmative duty currently exists.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Against simplification. Former AR2 was a may DP and now is mandatory. The rationale of replacing the 2 deleted DPs about the management of relationships with suppliers is not valid because the info required is completely different.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Against simplification. May DP moved to mandatory. We already disclose the number of convictions and amount of fines.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of G1-1 simplifies the requirement by retaining only the minimum mandatory elements, removing the obligation to disclose whistleblowing mechanisms, internal training, and the company's approach to corporate culture. This simplification reduces the depth of disclosure on ethical practices and organisational integrity, which may limit the perception of a company's ethical maturity. However, it may ease initial reporting, especially for companies still structuring their conduct policies. Voluntary disclosures could help bridge this gap.	G1	G1-1 - Policies related to business conduct	7.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of G1-2 retains the essential elements on ethical management and supplier relations, while presenting a more streamlined structure focused on concrete actions. It also consolidates information requirements previously covered under G1-3 "Prevention and Detection of Corruption and Bribery". The exclusion of details on specific policies, such as late payment prevention or separation of investigative functions, may reduce disclosure depth. However, the emphasis on training and ESG integration in the supply chain strengthens the link between business conduct and sustainability, especially for companies with complex value chains.	G1	G1-2 - Actions related to business conduct	10.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	We agree that companies are now required to disclose business conduct targets using the common target reporting model defined in ESRS 2 GDR-T. This includes: • Objectives to improve or maintain ethical practices and business behaviour; • Associated indicators and timelines, where applicable. The introduction of mandatory business conduct targets is a step forward in accountability and transparency. However, since reporting follows a cross-cutting model (GDR-T), there is a risk that targets may become generic or lack ambition. It is essential to ensure that these targets are clear, relevant, and aligned with the company's material risks and impacts.	G1	G1-3 - Targets related to business conduct	11.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version significantly reduces the depth of required information, shifting from a detailed, multifaceted approach to a focus on two main indicators: convictions and confirmed incidents. While this simplification may ease reporting and reduce administrative burden, it limits transparency on how companies respond to specific cases. In high-risk sectors, the omission of additional data may undermine stakeholder trust and credibility. Optional disclosures could help maintain confidence.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	12.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version reduces the level of detail required, removing the obligation to disclose internal responsible parties, transparency platform registrations, and estimates of in-kind contributions. The focus is now on aggregate values and stated lobbying positions. This simplification facilitates reporting but may limit visibility into oversight mechanisms and institutional transparency, particularly in contexts where political influence is sensitive. Encouraging voluntary disclosures could help mitigate this risk.	G1	G1-5 - Metrics related to political influence and lobbying activities	15.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version removes the obligation to report average payment times and the methodology used, focusing only on standard terms and pending legal proceedings. While this reduces reporting burden, it may hinder the assessment of real impacts on SMEs, especially in sectors where payment delays can have critical consequences. Including optional indicators on payment performance could help maintain transparency and support fair business practices.	G1	G1-6 - Metrics in relation to payment practices	19.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Simplified and user-oriented with "total monetary value".	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	we object the change of the DP for confirmed incidents of corruption (paragraph 14) from may to shall.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Amended G1 requires reporting information on the protection of whistleblowers (paragraph 8(b)) but lacks a requirement to report on the whistleblowing mechanisms themselves. We propose reinstating former G1 10(a), for alignment with GRI 2-26-a-ii.	G1	G1-1 - Policies related to business conduct	8. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	G1 AR3 should clarify whether 'actors in its upstream and downstream value chain' include also non-employees in the undertaking's own workforce. It is important that incidents involving non-employees are also captured by this DR.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The title of G1-1 should be corrected from 'Business Conduct' to 'Corporate Culture' to accurately reflect its content. It is crucial to structure the ESRS so the materiality assessment can be applied at the subtopic level; otherwise, it forces disclosure on potentially non-material issues. We propose rewording this section to allow for a separate materiality assessment for each individual subtopic. Please also assure that the following datapoints are clearly marked per topic, so that the materiality can be utilised.	G1	G1-1 - Policies related to business conduct	7.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Datapoint 10c on corruption should be grouped with other related disclosures, not absorbed into the general G1 section. This structural change is essential to allow the materiality assessment to function as a proper filter at the subtopic level and to avoid potential conflicts with auditors over the scope of G1 disclosures. In general, Disclosure Requirement G1-2 combines several thematic areas, not all of which relate directly to the reporting of actions. For instance, information concerning suppliers or processes for handling incidents related to corruption and bribery aligns more closely with the management approach than with the implementation of specific actions. Unlike other standards, where the disclosure of actions remains open and flexible, G1-2 predefines the content to be reported. While this is not necessarily problematic, it may appear somewhat inconsistent in comparison with the structure of other standards.	G1	G1-2 - Actions related to business conduct	10.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is still not clear what is intended for "comparable position". The Standard should give clear guidance in order not to over report on comparable positions, as not ll the positions held in public administration have the same relevance (e.g. if someone was in the board of statutory auditors of an hospital is not probably a relevant information). Furthermore, a clarification of what is included in the definition of "public administration" is critical. Moreover on Datapoint 10c on corruption should be grouped with other related disclosures, not absorbed into the general G1 section. This structural change is essential to allow the materiality assessment to function as a proper filter at the subtopic level and to avoid potential conflicts with auditors over the scope of G1 disclosures.	G1	G1-5 - Metrics related to political influence and lobbying activities	10.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The input refers to G1-2 Paragraph 2 (c): Consolidation of different training purposes and activities could be challenging with view to the IRO mapping process, as it fails to clearly indicate which sub-topic G1-2 Paragraph 2 (c) relates to. Therefore, a more distinct division into the sub-topics is necessary. Especially, the disclosure requirement regarding the procurement team should be separated as it refers to the topic management of relationships with suppliers. The new wording regarding the members of the administrative, management and supervisory bodies is not clear. Recommendation: Revert to the previous text and include 'the extent to which training is given to'. Alternatively, it should be emphasized that external training is also meant in order to prevent potential conflicts of interest.	G1	G1-2 - Actions related to business conduct	7.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The input refers to G1-3 Paragraph 6: A disclosure requirement regarding the number and nature of confirmed incidents of corruption and bribery is misleading and should be deleted. A high number of incidents seems negative but might also reflect an effective compliance management system with investigation measures in place. In addition, the disclosure requirement contradicts 1. the principle of the presumption of innocence and 2. the principle under German law that offenses do not regularly have to be reported to the authorities, but it is the company's responsibility to adequately address compliance violations within the company.	G1	G1-3 - Targets related to business conduct	7.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The input refers to G1-5, AR 7 and 8 for para 16: Regarding political contributions further differentiation and explanation is needed (the purpose of a contribution as main criteria): Financial or in-kind contributions to external organizations (e.g. lobbyists, charities, think tanks or trade associations) or non-consolidated companies should only be considered, if granted with the purpose of passing it on to a relevant recipient like political parties, their elected representatives or persons seeking political office.	G1	G1-5 - Metrics related to political influence and lobbying activities	AR 7
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The scope of the required training-related disclosures has been increased. Previously, reporting was limited to training activities on corruption and bribery. The current scope now covers broader 'business conduct' topics. It is recommended to revert to the original scope, as the expanded requirement may lead to inconsistencies and disproportionate reporting efforts, without necessarily enhancing the relevance or comparability of the information disclosed.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We reccommend to limit the disclosure for individual case of corruption to the top management and not to "all individuals", which could be interpreted in a much broader sense. Additionally This adds an additional disclosure requirements for preparers. We believe that the principle of not increasing reporting requirements should be applied consistently. Even if the datapoint itselbf is not technically complex, the change in status to mandatory will require additional interpretation, internal coordination, and alignment with auditors—especially during first-time implementation. This effort should not be underestimated. From our point of view the ESRS revision should refrain from posing any additional effort to preparers.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The requirement to report on "standard payment terms" and supplier categorization presents significant practical challenges. The metric lacks clarity in international contexts and provides limited value for understanding supplier relationships. Tracking supplier categories by size would require substantial system changes, while reporting legal proceedings related to late payments without context offers little decision-useful information, especially since material cases are already covered in legal risk reporting. These requirements create unnecessary administrative burden without adding meaningful value to sustainability reporting. We suggest to limit this disclosure to the most relevant countries .	G1	G1-6 - Metrics in relation to payment practices	12.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This application requirements is not clearly defined and prone to diverse interpretation, e.g.: - "shall consider": does this mean that incidents in the upstream/downstream value chain are to be disclosed? - what is meant by "direct involvement"? - does the reporting include information about the "actors"? It is unclear to which paragraphs the AR refers to (also AR 4-6). Paragraphs 13/14 do no longer exist in the amended ESRS. Update of references/paragraphs needed.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Considering the EFRAG Explanations January - May 2024 (final version,page 95), the following issues are identified: 1. It focuses solely on first-instance convictions of natural persons, including non-final decisions, leading to a lack of transparency and contradictions with the ECRIS, which only records final convictions. 2.The CSRD approach lacks transparency by mixing final and non-final convictions. A final conviction has more significance than a non-final decision. 3.Th approach fails to distinguish between the severity of convictions of board members versus employees, and it does not consider cases where the company itself is sanctioned for corruption or bribery, either through criminal proceedings or administrative fines. Relevant national registers for legal entities are disregarded by the CSRD as well. Cases where a company is sanctioned for corruption or bribery are important, as they indicate systemic issues rather than individual excesses. 4.Additionally, the reliance on information from accused individuals creates reliability issues, as court proceedings often occur years after the offense, and the employees may no longer be with the company. 5.The focus on payable fines for convictions of natural persons overlooks prison sentences (and their suspension if applicable), which are indicators of the severity of the crime.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	5. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	By deleting "for financai or in kind political contributions", the requirements seem to suggest that the total monetary calue of financial and in-kind political contributions for "political influence" needs to be disclosed. This in turn would increase the reporting burden for companies as it widens the defition of the metrics to be reported to general political influence , while at the same time being open for interpretation. Generally, the collection of information for this datapoint requires a lot of effort and raises legal concerns especially related to in-direct financial contributions outside of the EU, which is why we would suggest to limit the scope from "global! to "EU and Member States" or delete the datapoint. Alternatively, further clarification on the scope needed.	G1	G1-5 - Metrics related to political influence and lobbying activities	8.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Suggestion to delete this datapoint as information already disclosed in EU Transparency Register as well as in national Transparency Registers (e.g. Germany, USA) and therefore considered redundant. Additionally, a prioritization of “main topics in lobbying activities” could imply that political activities in one country could be more important or “material” than in another leading to misunderstandings with external stakeholders.	G1	G1-5 - Metrics related to political influence and lobbying activities	9.
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Remove datapoint or make voluntary - Information gathering for payment practices is connected to high efforts due to unclear methodologies and burdensome data collection. Results will not be comparable. Effort of calculation exceeds the value of information, especially for big groups with de-centralized payment practices.	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The definition of "legal proceedings" remains unclear, especially in its interpretation under national law. A clearer concretisation of this term should be in our view accompanied by the inclusion of a well-defined materiality threshold, ideally based on the financial volume of a specific outstanding payment. In our view, this would significantly reduce the reporting burdens.	G1	G1-6 - Metrics in relation to payment practices	20. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend providing a definition of "political influence" in the ESRS glossary to ensure shared understanding and comparability in reporting.	G1	G1 - Objective	4. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend providing a definition of "unfair payment practices" in the ESRS glossary to ensure shared understanding and comparability in reporting.	G1	G1 - Objective	4. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We welcome the inclusion in NMIG 3 of an illustrative table to present the information on training activities. It could however be specified that the presentation of a separate "executives" category in this table is voluntary.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	If the mandatory nature of the DP related to confirmed incidents of corruption or bribery is confirmed, we recommend providing concrete examples of underlying situations, beyond the definition given in the ESRS glossary, which could be presented in NMIG.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We welcome the inclusion of new definition of "corruption or bribery convictions" which would ensure consistency and comparability across undertakings. Nonetheless we recommend clarifying who does "an individual" refer to in such definition (e.g. the undertaking's legal representative or any employee).	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We welcome the inclusion in NMIG 6 of an illustration to present the information on standard payment terms. The following clarifications could, however, be provided: (i) an indication that the breakdown provided by main category of suppliers is mandatory while the breakdown by region is voluntary, (ii) an indication on the fact that the "non-SMEs" category could need to be further disaggregated, depending on the undertaking's specific fact and circumstances and (iii) a reference to a specific number of days in the table instead of the references to "number of days in accordance with current EU regulation" and "number of days depending on legal requirements or specific contractual agreements" (these considerations may be maintained in a footnote).	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend relying on EFRAG clarifications brought by ID 419 to specify what "currently outstanding legal proceedings" refer to (i.e. "legal proceedings that have not been legally resolved at year-end").	G1	G1-6 - Metrics in relation to payment practices	20. (b)
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We propose to keep policies with respect to animal welfare in place.	G1	G1-1 - Policies related to business conduct	1.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Yes, we advocate for transparency on exposure to controversial weapons. As a values-based financial institution, we believe that sustainability reporting must reflect not only environmental and social impacts but also ethical governance practices. ESRS G1-1, which addresses policies related to business conduct, is the appropriate location for disclosures on exposure to controversial weapons, given its alignment with SFDR PAI indicators and its relevance to anti-corruption and ethical standards. Our position is grounded in stakeholder expectations and the need for clarity on how financial institutions manage reputational and ethical risks. Transparency on exposure whether direct or indirect is essential for enabling informed decision-making by clients, investors, and civil society. It also supports alignment with international norms, such as the UN Convention against Corruption and the Treaty on the Prohibition of Nuclear Weapons. We recommend that ESRS G1-1 explicitly include a datapoint requiring disclosure of policies and screening mechanisms related to controversial weapons. This would ensure consistency with SFDR and reinforce the ESRS framework's credibility.	G1	G1-1 - Policies related to business conduct	1.
Excels	Transparency International UK	NGO	United Kingdom			I agree	Amending Disclosure Requirement 2c (in the adopted ESRS G1 Business conduct 2023), now Disclosure Requirement 4c in the exposure draft, to streamline wording to "political influence and lobbying activities" is a positive change, as it clarifies the focus of the disclosure requirement. Recommendation: Retain wording as included in the amended exposure draft.	G1	G1 - Objective	4. (c)
Excels	Transparency International UK	NGO	United Kingdom			I disagree	Deleting "how it fosters its corporate culture" from Disclosure Requirement 7 in the Exposure Draft 2025 (removes the only Diclosure Requirement on "corporate culture" despite this being an ESRS G1 sub-topic (see "Objective" paragraph 2). Stakeholders need to know how companies foster good corporate culture, which underpins responsible business conduct. Recommendation: (1) retain the original wording in Disclosure Requirement 7 (in the aopted ESRS G Business condcut 2023) and (2) clarify in ESRS 2 how reporting companies should disclose information on material topics or sub-topics where there is not a specific policy in place.	G1	G1-1 - Policies related to business conduct	7.
Excels	Transparency International UK	NGO	United Kingdom			I disagree	We understand the rationale for deleting Disclosure Requirement 9 (in the adopted ESRS G1 Business conduct 2023). We do not believe Disclosure Requirement 7 in the Exposure Draft 2025, sufficiently covers this information. In our experience, companies are unlikely to have a specific company policy on "company culture" and therefore may not be prompted to disclose material information if referring to ESRS GDR-P alone. Recommendation: (1) retain the original wording in Disclosure Requirement 9 (in the aopted ESRS G Business condcut 2023)	G1	G1-1 - Policies related to business conduct	7.
Excels	Transparency International UK	NGO	United Kingdom			I disagree	Amending Disclosure Requirement 8a in the Exposure Draft 2025 to remove the reference to "whether it has plans to implement them and the timetable for implementation" is concerning because stakeholders need to understand a company's timetable for implementing critical company policies where not in place. Recommendation: (1) retain the original wording in Disclosure Requirement 10 b (in the adopted ESRS G1 Business conduct 2023) (2) and/or amend ESRS 2 para. 30 (62 amended) to require companies to disclose the timeline for implementation where they do not have the policy in place.	G1	G1-1 - Policies related to business conduct	8. (a)
Excels	Transparency International UK	NGO	United Kingdom			I disagree	The protection of whistleblowers is a G1 Business conduct sub-topic and, therefore, ESRS 2 GDR-PAT disclosures apply. Given the sub-topic's importance, we are, however, concerned that deleting the Disclosure Requirement 10c i. (in the adopted ESRS G1 Business conduct 2023) (whether the company provides training whistleblower reporting channels and to staff receiving reports) and 10 c ii. in the adopted ESRS G1 Business conduct 2023 (measures to protect workers against retaliation) means that companies may omit to report material information. Transparency International's research shows that 19 EU countries do not comply fully with the EU Whistleblower Protection Directive (link https://www.transparency.org/en/publications/how-well-do-eu-countries-protect-whistleblowers-speakup) and, therefore, specific DRs on companies' actions to operationalise their whistleblowing channel and protect whistleblowers from retaliation are critical to ensure companies are supporting and encouraging workers to raise concerns. Recommendation: (1) retain the orginal wording in Disclosure Requirement 10 (c) i. and ii. (in the adopted ESRS G1 Business conduct 2023), and/or (2) include ARs that set out what companies should disclose on whistleblowing channels and whistleblower protection from retaliation.	G1	G1-1 - Policies related to business conduct	8. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Transparency International UK	NGO	United Kingdom			I disagree	Amending Disclosure Requirement 8b in the Exposure Draft 2025 to remove the reference to "whether it has plans to implement them and the timetable for implementation" is concerning because it is unclear whether this information would be required through GDR-PAT as the company does not already have a policy in place. Stakeholders need to understand a company's timetable for implementing critical company policies if they are not already in place. Protecting whistleblowers is critical for encouraging workers and third parties to raise concerns. Recommendation: (1) retain orignial Disclosure Requirement 10 d)(in the adopted ESRS G1 Business Conduct 2023) (2) and/or amend ESRS 2 paragraph 30. (62 amended) to require companies to disclose the timeline for implementation where they do not have a policy in place.	G1	G1-1 - Policies related to business conduct	8. (b)
Excels	Transparency International UK	NGO	United Kingdom			I disagree	We acknowledge that EFRAG have kept the protection of whistleblowers as part of the sub-topics in G1 Business conduct, and because of this, the ESRS 2 GDR-PAT applies, which we welcome. However, the deletion of 10 e (in the adopted ESRS G1 Business conduct 2023) removes the requirement for companies to disclose whether the company has the procedures in place to investigate incidents and whistleblower reports promptly, independently, and objectively. This aspect may be overlooked by reporting companies without a specific reference in the topic disclosures. Stakeholders need to know that companies have the appropriate procedures in place to act on whistleblower reports to ensure both internal and external trust in the company. Recommendation: (1) retain orignal Disclosure Requirement 10 e) wording (in the adopted ESRS G1 Business conduct 2023), or (2) include ARs that set out what companies should disclose on their procedures for investigating reports by whistleblowers promptly, independently and objectively.	G1	G1-1 - Policies related to business conduct	8. (b)
Excels	Transparency International UK	NGO	United Kingdom			I disagree	Deleting Diclosure Requirement 18 b (in the adopted ESRS G1 Business conduct 2023) on whether the reporting company separates investigators or the investigating committee from management during investigations would remove material information on the company's anti-corruption and anti-bribery iROs. The independence of investigators from the team under investigation is crucial for ensuring an impartial investigation and to remove conflicts of interest. Recommendation: 1) retain Disclosure Requirement 18 (b) wording (in the adopted ESRS G1 Business conduct), or (2) include ARs that set out what companies disclose in reference to anti-corruption and anti-bribery investigations.	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	Transparency International UK	NGO	United Kingdom			I disagree	Deleting Disclosure Requirement 18 c (in the adopted ESRS G1 Business conduct 2023), means the company may omit explaining how it ensures findings from investigations, and outcomes, are reported upwards to senior leadership, which is essential if findings are to be acted upon and inform remediation. Recommendation: 1) retain Disclosure Requirement 18 (c) (in the adopted ESRS G1 Business conduct) wording, or (2) include ARs that set out what companies should disclose in reference to the procedures for reporting the outcomes of investigations.	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	Transparency International UK	NGO	United Kingdom			I disagree	Deleting Disclosure Requirement 19 (in the adopted ESRS G1 Business conduct 2023)removes the requirement to disclose plans to adopt procedures to prevent, detect, and address allegations or incidents of corruption and bribery. It is unclear how the ESRS 2 GDR-PAT architecture applies where there is no policy and/or procedure in place. Recommendation: Amend ESRS 2 paragraph 30. (62 amended) to require companies to disclose their plans and timeline for implementing policies or procedures where these are not in place.	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	Transparency International UK	NGO	United Kingdom			I disagree	Amending Disclosure Requirement 20 (in the adopted ESRS G1 Business conduct 2023) from a mandatory to voluntary disclosure (to be included in the Non-Mandatory Illustrative Guidance) weakens this Disclosure Requirement.. Stakeholders need to know that companies are communicating their policy commitments in an accessible way and to check that commitments are understood. Recommendation: (1) retain orinigal wording from Disclosure Requirement 20 (in the adopted ESRS G1 Business conduct 2023), or (2) include ARs that reference what companies should disclose in reference to the communication of anti-bribery and anti-corruption policies.	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	Transparency International UK	NGO	United Kingdom			I agree	We welcome the move to make new Disclosure Requirement 10 c mandatory and the recognition of the importance of training for high-risk teams, such as procurement. Sales and business development teams are all higher risk Recommendation: Retain wording as included in the amended Exposure Draft 2025 in new Disclosure Requirement 10 c.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Transparency International UK	NGO	United Kingdom			I agree	We welcome the amendment to make the new Disclosure Requirement 14 mandatory and appreciate that EFRAG recognised the gap that would have resulted from deleting DR 22. Without this change, there would have been no mandatory Disclosure Requirements on confirmed incidents. It is essential that at least one DR addresses confirmed incidents. Recommendation: Retain wording included in the amended Exposure Draft 2025 in new DR 14.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Transparency International UK	NGO	United Kingdom			I disagree	We are concerned that moving Disclosure Requirement 25 b), 25c) and 25 d) (in the adopted ESRS G1 Business conduct 2023) to the NMIG may lead to these Disclosure Requirements being overlooked. Stakeholders need to have transparency on the action taken by companies on corruption incidents. While we recognise that these Disclosure Requirements were voluntary in ESRS G1 Business conduct, as Disclosure Requirement 25 (a) (in the adopted ESRS G1 Business condcut 2023) now Dirclosure requirement 14 has been moved to mandatory content in the amended Exposure Draft 2025, we see this as an opportunity to consider moving Disclosure Requirements 25 b), 25 c), and 25 d) (in the adopted ESRS G 1 Business conduct 2023) to mandatory. Recommendation: (1) Review Disclosure Requirements 25 (b), 25 (c), and 25 (d) and consider including in mandatory content. (2) and/or include application requirements for amended DR 14 to include information relating to corrective actions.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Transparency International UK	NGO	United Kingdom			I agree	We welcome the amendment to Disclosure Requirement 16 as it has provided clarity to the diclosure by create a disctinction between DPs for political influence and lobbying actitivtes.	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	Transparency International UK	NGO	United Kingdom			I agree	We welcome the amendment to Disclosure Requirement 17 as it has provided clarity to the diclosure by create a disctinction between DPs for political influence and lobbying actitivtes.	G1	G1-5 - Metrics related to political influence and lobbying activities	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Transparency International UK	NGO	United Kingdom			I disagree	We think that deleting Disclosure Requirement 10 d) (in the adopted ESRS G1 Business conduct)will make it more difficult to easily cross-reference information included in the relevant transparency registers. We do not believe this would be onerous information to disclose. Recommendation: 1) retain original wording in the adopted ESRS G1 Business conduct 2023 wording, 2) and/or include information previously included in an application requirement for new DR 17.	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	From a G1-perspective, summing up former G1-2, G1-3, and partially G1-4 under new G1-2 seems to reduce datapoints while rather mixing up different contents under one datapoint. This might impede clarity, readability, and comparability of ESRS reports.	G1	G1-2 - Actions related to business conduct	10.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	"Standard payment terms" do not exist in an international context; "category of suppliers" is not defined since it can not be defined across companies; hence, the data point should be deleted	G1	G1-6 - Metrics in relation to payment practices	12.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend that EFRAG provide a definition of political influence, by leveraging on the definition of direct/indirect political contributions given in ARs 7 and 8, to ensure clear distinction with lobbying activities.	G1	G1 - Objective	4. (b)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend that EFRAG provide a definition of unfair payment practices, this concept being newly introduced in the ED.	G1	G1 - Objective	4. (c)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend that EFRAG provide a definition of "management of relationships with suppliers" which is a large concept. Related NMIG could be supplemented with practical examples such as (i) implementation of a department dedicated to purchases and supplier relationships or (ii) inclusion of policies in clauses of contracts signed with suppliers, in order to enlarge their scope to value chain, with clear references to the information included in the sustainability statement on the related policies.	G1	G1-2 - Actions related to business conduct	10. (a)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend that EFRAG provide a definition of "depth of coverage" and clarifies whether it relates to percentage of trained people or it refers to the level of training (e.g. basic, advanced or expert). Besides, as training activities on business conduct cover very large set of trainings, clarifying the nature of the training activities covered by this DP could be useful. We recommend also that EFRAG clarify whether this DP requires to disclose the percentage of members of the administrative, management and supervisory board who received business conduct training. Finally and with respect to NMIG 3 that provides an illustration for disclosing information on training activities, we encourage specifying that the presentation of a separate "executives" category within this illustrative table is voluntary.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We suggest that EFRAG provide concrete examples of "confirmed incidents" of corruption or bribery, beyond the definition given in the ESRS glossary, to facilitate the identification by the undertaking of the relevant underlying situations. These examples could be included in NMIG in order not to burden the standard. We recommend also that EFRAG transfer NMIG's following precision into § 14 of the standard: "This includes cases that were initiated in previous years where the outcome was only established in the current reporting period.". At this stage, the wording of this § allows not to report such cases, even though they were also not disclosed the year they were initiated. Such cases could therefore never be reported by an undertaking in its sustainability statement.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend that EFRAG clarify the scope of people directly involved in incidents of corruption or bribery to be considered as AR 3 refers to "employees" while NMIG 4 refers to "own workers" (i.e. including non-employees).	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We recommend that EFRAG clarify who does "an individual" refer to in the definition of "corruption or bribery convictions" (e.g. the undertaking's legal representative or any employee directly involved as specified in AR 3). Besides, there is a discrepancy in AR 4 between the wording included in ESRS G1 ED and the wording included in ESRS G1 log of amendments. The wording included in log of amendments includes the following content which is not in the ED: "In this context, final decisions include all the decisions in the reporting year while awaiting the outcome of a possible appeal. The reporting undertaking may provide additional information if an appeal is considered, has been lodged or was successful." This clarification is key to know how to consider the situations where an appeal is pending when reporting under § 13 and/or § 14 of ESRS G1. We thereof recommend adding such clarification in AR 4.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The new definition of fines provided in AR 5 limits the information to be disclosed to the fines "paid to a public treasury". We recommend that EFRAG clarifies whether fines that comply with the applicable definition but which are paid to other bodies shall be considered in reporting under § 13.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 5
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend that EFRAG provide a definition of "entrusted power" which is mentioned in corruption definition that is included in the ESRS glossary. Besides and considering the fact that the definition of corruption includes fraud incidents, we recommend that EFRAG provide illustration of frauds that correspond to corruption incidents and clarify whether the two following situations are in scope of § 13: -accounting manipulation -environmental pollution incident with corruption of agent involved in the investigation	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 6
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Former AR 14 "In meeting the requirement in paragraph 29(c) the undertaking shall consider the alignment between its public statements on its material impacts, risks and opportunities and its lobbying activities" has been moved to NMIG. This AR was considered useful as reconciling double materiality assessment with lobbying activities of the undertaking. Therefore, we recommend EFRAG transfer this guidance to the standard. Besides, we note that former § 29d) related to registration in the EU Transparency Register or in an equivalent transparency register in a Member State has been removed from the standard even if the related information was not complex to provide. Similarly, existence of a Public Affairs department withing the organization is one example of information on lobbying activities that has been disclosed in 2024 ESRS sustainability statements. Therefore, we recommend that EFRAG include in NMIG in relation to § 17 examples of information to provide regarding lobbying activities such as (i) registration in the EU Transparency Register or in an equivalent transparency register in a Member State or (ii) existence of a Public Affairs department.	G1	G1-5 - Metrics related to political influence and lobbying activities	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend that EFRAG clarifies whether the undertaking is required to report information related to SMEs under this § even if SMEs transactions are not material compared to the total transactions made with suppliers . We also recommend that EFRAG define "SME". We also recommend that EFRAG clarify how the percentage of payment aligned with standard terms shall be computed i.e.: -on the basis of the number of invoices or the total amount of invoices; -on the basis of the payments made during the reporting period even if the invoice was received or dated during a previous reporting period. With respect to the illustration given in NMIG 6, we recommend specifying that the breakdown provided by main category of suppliers is mandatory while the breakdown by region is voluntary and that the undertaking could consider further disaggregating the "non-SMEs" category depending on its specific facts and circumstances. We finally recommend replacing in the table the references to "number of days in accordance with…" or "number of days depending on…" by a given illustrative number of days (this may be specified in a footnote to explain how the figure has been calculated).	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend that EFRAG clarify whether investigations of government authorities on the undertaking's payment practices are to be considered as "legal proceedings currently outstanding for late payments". Clarifications brought by ID 419 could be usefully added to specify what "currently outstanding legal proceedings" refer to (i.e. "legal proceedings that have not been legally resolved at year-end") and whether proceedings initiated and closed during the reporting period shall also be considered.	G1	G1-6 - Metrics in relation to payment practices	20. (b)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	We reccommend to limit the disclosure for individual case of corruption to the top management and not to "all individuals", which could be interpreted in a much broader sense.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	It is still not clear what is intended for "comparable position". The Standard should give clear guidance in order not to over report on comparable positions, as not ll the positions held in public administration have the same relevance (e.g. if someone was in the board of statutory auditors of an hospital is not probably a relevant information). Furthermore, a clarification of what is included in the definition of "public administration" is critical. The concept of lobbyng shouldi be better clarified	G1	G1-5 - Metrics related to political influence and lobbying activities	10.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	It is still very difficult to calculate the percentage of payment practices aligned with the payment standard terms, especially for companies operating in several different countries. We suggest to limit this disclosure to the most relevant countries.	G1	G1-6 - Metrics in relation to payment practices	12.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	While we support transparency on anti-corruption performance, we remain concerned that obliging disclosure of "confirmed incidents" may lead to: •Risk self-incrimination – Requiring publication of internally confirmed violations that have not been tested by a court could place companies in a problematic position, threatening the important and fundamental protection against self-incrimination. •Undermine the presumption of innocence – An internal conclusion is not equivalent to a court conviction, and disclosure could prejudice ongoing or potential cases. •Create uneven or misleading data – Firms with robust internal controls may appear to have "more incidents" simply because they detect and investigate them thoroughly, not because they have higher exposure to corruption or bribery risks. This is highly-sensitive, context-dependent (Comparing "total number" across firms can be misleading without normalization), and difficult to standardize, which undermines its reliability and comparability, and hence not value adding information to the external stakeholder. Given these issues, our preference remains to retain paragraph 14 as a voluntary disclosure. If it is kept as mandatory, If retained as mandatory, we recommend narrowing its scope to avoid an obligation to also report the type of corruption and bribery where the company does not risk legal liability.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The draft paragraph 10(a) refers to actions taken in relation to relationships with suppliers. However, the draft paragraph appears to suggest that even if another sub-topic (different from management of relationships with suppliers, including (unfair) payment practices) is identified as material, it would still have to be disclosed. In our view, this requires clarification. A clear distinction should be made between the different material sub-topics under ESRS G1 and the corresponding datapoints in G1-2. For example, this could be further specified in the section Mapping of sub-topics to disclosures in topical standards.	G1	G1-2 - Actions related to business conduct	10. (a)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The draft paragraph 10(b) refers to actions taken in relation to corruption and bribery. However, the draft paragraph appears to suggest that even if another sub-topic (different from corporate culture which includes anti-corruption and bribery) is identified as material, it would still have to be disclosed. In our view, this requires clarification. A clear distinction should be made between the different material sub-topics under ESRS G1 and the corresponding datapoints in G1-2. For example, this could be further specified in the Mapping of sub-topics to disclosures in topical standards.	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The draft paragraph 10(c) refers to training activities on business conduct. The subsequent part of this paragraph concerns disclosure of whether the procurement team is involved in training related to its engagement with suppliers for the improvement of their sustainability performance. The whole paragraph as currently drafted seems to imply that even if another sub-topic (different from the management of relationships with suppliers, including (unfair) payment practices) is identified as material, it would nevertheless have to be disclosed. In our view, this requires clarification. A clear distinction should be made between the different material sub-topics under ESRS G1 and the corresponding datapoints in G1-2. For example, this could be further specified in the Mapping of sub-topics to disclosures in topical standards.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	should fair competition be added here, as an important part of corporarte culture?	G1	G1 - Objective	4. (a)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	The management of relationships with suppliers and (unfair) payment should be recognized as different sub-topics. They may or not be always interrelated. IROs could be linked to the management of relationships with suppliers, (unfair) payments practices, or both. It should be helpful to clarify this point: b) the management of relationships with suppliers; (unfair) payments;	G1	G1 - Objective	4. (b)

Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	should this requirement be included under a "Policy" related requirement? Additionally, should this apply depending on the results of the materiality assessment? (whether or not corruption and bribery result material). Finally, we would also suggest to clarify "the functions and/or roles and/or units/departments	G1	G1-1 - Policies related to business conduct	8. (c)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	To be considered the possibility to refer to units/departments	G1	G1-1 - Policies related to business conduct	AR 2
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We recommend incorporating these requirements into the standards, along with the engagement disclosure requirements (S1, S2, S3, S4), so that organizations can present their approach in a comprehensive and integrated manner. Additionally, it could cause confusion as in ESRS S1, S2, S3, S4 the following is mentioned: If the undertaking has policies for protecting individuals that use these channels against retaliation and they are disclosed in [Draft] Amended ESRS G1-1, it may refer to that disclosure. Nevertheless, apparently this is not mentioned in this standard (G1).	G1	G1-2 - Actions related to business conduct	9.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Please add "where applicable, depending on the DMA results"	G1	G1-2 - Actions related to business conduct	10.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Proposal: (21(a) amended) training activities within the undertaking , including the target audience, frequency and depth of coverage: i. on business conduct ii. on anti-corruption and anti-bribery ii. whether the procurement team is involved in training related to its engagement with suppliers for the improvement of their sustainability performance. The following to be moved to metrics: This shall include the (former 21(b) amended and former 21(c)) percentage of functions and/or roles most at risk within the undertaking in respect of corruption and bribery, as well as members of the administrative, management and supervisory board.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	I would suggest to move here reporting requirements in relation to: - the number and percentage of employee trainned (including business conduct, anti-corruption and anti-bribery training, procurement, etc) - percentage of functions and/or roles and/or departments/units most at risks.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	i would suggest to align this disclosure requirements with the ones requested by GRI 205-4 . Total number and nature of confirmed incidents of corruption. b. Total number of confirmed incidents in which employees were dismissed or disciplined for corruption. c. Total number of confirmed incidents when contracts with business partners were terminated or not renewed due to violations related to corruption. d. Public legal cases regarding corruption brought against the organization or its employees during the reporting period and the outcomes of such cases.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	13.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Why this DP is considered as a metric?we would suggest to move it	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Why this DP is considered as a metric? we would suggest to move it	G1	G1-5 - Metrics related to political influence and lobbying activities	18.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS G1 Business Conduct, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS G1 Business Conduct, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	G1	G1 - Objective	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	G1	G1 - Objective	5.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Why is "(unfair)" placed in brackets? Depending on the intended meaning, either remove the brackets or delete "(unfair)" entirely.	G1	G1 - Objective	4. (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Paragraphs counting is flawed Starting with DR G1-2 the numbering of paragraphs starts with 1 again instead of continuing the count of the paragraph which should read 9 and then the numbering should be continued	G1	G1 - Objective	2.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Why is this paragraph needed? Is this not sufficiently covered in ESRS 2, Paragraph 30? Since former S1- to S4 requirements were moved into the new ESRS 2, Paragraph 35 the question arises if for ESRS G1, Paragraph the same logic should apply. Either way, the approach should be consistent across ESRS	G1	G1-1 - Policies related to business conduct	8.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Paragraph 2 (c), last sentence related to DR G1-2, which should actually read 10 (c) The whole approach to supply chain management requires reconsideration. On the one hand, supply chain components are inherent in each of the E, S and G standards, whereas ESRS G1 seems to suggest that this is a component of G. It could also be argued that it is most appropriate to reflect supply chain management in the section on General information because the supply chain is often managed across E, S and G in which case it would be most appropriate to reflect this in the General information section. If fair presentation should be the overarching principle, it should be considered if the last sentence in Paragraph 2(c) actually should belong here	G1	G1-2 - Actions related to business conduct	2.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	It is proposed that the data point "(10(c) continued) It shall also disclose whether the procurement team is involved in training related to its engagement with suppliers for the improvement of their sustainability performance," currently a voluntary data point in the Annex, be amended to become a mandatory disclosure in order to replace the two deleted data points relating to supplier relationships. For reasons of consistency, it would appear appropriate to establish a separate metrics section on supplier management. Furthermore, additional background information would be desirable as to why the substantively new topic of training in supplier engagement is to be included.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Why is the addition during the reporting period needed? Is it not clear from ESRS 2 that all disclosures made refer to the reporting period? Please check all ESRS in this respect	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 1
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Change back to "may" instead of "shall" for the number of confirmed incidents of corruption or bribery.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	There is an inconsistency between Paragraph 11 and 12. If the objective is to understand late payments to SMEs as indicated in Paragraph the disclosure requirements in Paragraph 12 do not achieve this objective.	G1	G1-6 - Metrics in relation to payment practices	12.
Excels	Allianz SE	Insurance	Germany			I disagree	Strongly disagree; this is an additional mandatory disclosure requirement and not a simplification	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Allianz SE	Insurance	Germany			I disagree	The definitions do not match and shed more confusion then they would help	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	Keep the term 'in brief' as it prevents unlimited elaboration. Removing it could lead to unnecessary discussions with the auditors	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	It is not clear whether you are looking for the percentage of the roles most at risk who conduct training - or the percentage of empoyees overall who are at risk of corruption and bribery. We have assumed the first because its under training, but it is not clear.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Reference to ESRS 2 should be 29 to 32, instead of 29 to 31.	G1	G1 - Objective	5.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"Metrics" should be put in bold.	G1	G1 - Objective	5. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Bold should be removed from "protection of whistle-blowers" as it is not defined in annex 2.	G1	G1-1 - Policies related to business conduct	8. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It is not enough to state that the undertaking is subject to legal requirements. The undertaking should state if it have implemented those legal requirements.	G1	G1 - Interaction with other ESRS	AR 1
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Bold should be removed from "animal welfare" as it is not defined in annex 2.	G1	G1 - Objective	4. (a)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	G1	G1-3 - Targets related to business conduct	11.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	G1	G1-2 - Actions related to business conduct	9.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The current wording may imit disclosures to convictions only in the EU. The following sentence should be added "The above considerations should be applied, with due consideration of differences, with respect to convictions issued outside of the EU."	G1	G1-4 - Metrics related to incidents of corruption or bribery	AR 4
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Bold should be put on "material impacts, risks [] oportunities".	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The percentage should be clarified to ensure more comparable reporting. The percentage should relate to both value and number of payments aligned with these standard terms. The sentence should be rephrased as following: "a description of the undertaking's standard payment terms in number of days by main category of suppliers, including SME's, and the percentage of its payments aligned with these standard terms by value and number of payments; and"	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	We do understand the wish for an example, however we believe it would be more consistent to place this example in the NMIG than part of the ESRS	G1	G1-1 - Policies related to business conduct	AR 2
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	DASB supports the adjustments to increase interoperability with SFDR. Focus on alignment SFDR will we needed in future since SFDR will also be adjusted - how to make sure consistency remains in the future. Suggestion to add an evaluation clause or direct link to SFDR	G1	G1-1 - Policies related to business conduct	8. (a)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The adjusted sentence is hard to read. Suggestion to use an alternative formulation, for example splitting 10a in two sentences since it contains two requirements	G1	G1-2 - Actions related to business conduct	10. (a)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The adjusted sentence is an improvement, however we suggest to rephrase the sentence by changing "any" into "the" in the phrase: "[..] which includes any actions taken to address breaches in procedures and standards of anti-corruption and anti-bribery."	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	DASB supports the adjustments to increase interoperability with SFDR. Focus on alignment SFDR will we needed in future since SFDR will also be adjusted - how to make sure consistency remains in the future. Suggestion to add an evaluation clause or direct link to SFDR	G1	G1-1 - Policies related to business conduct	8. (b)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	DASB supports the adjustments to increase interoperability with SFDR. Focus on alignment SFDR will we needed in future since SFDR will also be adjusted - how to make sure consistency remains in the future. Suggestion to add an evaluation clause or direct link to SFDR	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Functions and or roles depends on the way the undertaking defines it. Stimulates entity specific reporting but simultaneously hampers comparability. Furthermore, we question the informative value of the disclosure and see a risk for boiler plate language.	G1	G1-1 - Policies related to business conduct	8. (c)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The DASB notes that G1.12 under b is an existing requirement inrespect of legal proceedings for late payments, however the DASB expects an SME to experience a high threshold to start such legal proceedings. Additionally, this focus on legal proceedings outstanding, information about legal proceedings in this respect concluded during the year might be a valuable	G1	G1-1 - Policies related to business conduct	12.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Business conduct should not include aspects of animal welfare, especially because there are no other DR's in regards to animal welfare.	G1	G1-1 - Policies related to business conduct	7.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be stated that it is ok, if processes to respond to allegations or incidents should only be descibed once for all kind of incidents e.g. human rights, discrimination, corruption & bribery. Furthermore metrics for all kind of incidents should also stated only once in a clearly arranged way.	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be added, that a reference to the EU transparency register or national transparency register is sufficient to fulfill this DR, if the data is available in the register. (16. & 17.)	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	There is no common definition for main category. Please delete the term main category and add options for the undertaking for differentiation of categories, countries, or other criteria	G1	G1-6 - Metrics in relation to payment practices	20.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	The wording of the objective of G1-6 is not reflected in the corresponding requirements.	G1	G1-6 - Metrics in relation to payment practices	19.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	If these specific categories of delivery files are requested, we cannot provide any information. Our suppliers are not sorted into categories in any way. If these specific supplier categories are required, we are unable to provide any information. Our suppliers are not sorted into categories in any way. Furthermore, we are unable to determine whether a supplier is an SME, as no data is available for this purpose. The question also remains as to which definition of SME should be used here. The terms and conditions are very often specified by our suppliers or agreed upon individually, even though a few K+S subsidiaries have their own payment terms. -> In the case of individual agreements, there is therefore an automatic deviation from the standard – what significance does the file then still have?	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	The derivation of the sample is omitted (former ESRS-G1.33d). Accordingly, we would have to say whether ALL suppliers are complying with the payment terms. However, this is not possible because not all companies are managed in SAP and not all companies have their own defined payment terms – this would require time-consuming manual queries! Determining the key figure thus becomes highly complex and even more time-consuming than before.	G1	G1-6 - Metrics in relation to payment practices	

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	While it is understandable why EFRAG wishes to focus on SMEs, it unfortunately does not match business reality. Companies do not tier their suppliers based on their size. Therefore it is impossible to extract such detailed information without undue cost or effort, such as surveying all suppliers on their size and adding new elements to currently operating supplier management systems. We believe that information on payment practices applied to all suppliers, without prejudice, would be sufficient to meet the goal of fair presentation of weather the issuer follows best practices in that respect. Therefore, keeping the division between all suppliers and SMEs as a requirement goes against the goal of simplification and avoiding undue cost or effort in the process of sustainability reporting.	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We recommend to limit the disclosure for individual case of corruption to the top management and not to all individuals, which could be interpreted in a much broader sense.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is still not clear what is intended for "comparable position". The Standard should give clear guidance in order not to over report on comparable positions, as not all the positions held in public administration have the same relevance (e.g. if someone was in the board of statutory auditors of an hospital is not probably a relevant information). Furthermore, a clarification of what is included in the definition of "public administration" is critical.	G1	G1-5 - Metrics related to political influence and lobbying activities	10.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is still very difficult to calculate the percentage of payment practices aligned with the payment standard terms, especially for companies operating in several different countries. We suggest to limit this disclosure to the most relevant countries.	G1	G1-6 - Metrics in relation to payment practices	12.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Refered to comment onn §2c - these requirements are excessive, it shall be up to undertaker to choose the functions / roles at high risk and do the training accordingly.	G1	G1-2 - Actions related to business conduct	7.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The requirement could ask either the persentage or the number as the exact percentage of employees trained is difficoult to disclose, due to the natural turnover of staff/roles	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Wrong reference	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Wrong reference	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Wrong reference	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 5
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Wrong reference	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 6
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The requirements to explain the topics discussed is excessive, a company may have hundred of such meeting per year.	G1	G1-5 - Metrics related to political influence and lobbying activities	9.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Wrong reference	G1	G1-5 - Metrics related to political influence and lobbying activities	AR 7
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Wrong reference	G1	G1-5 - Metrics related to political influence and lobbying activities	AR 8
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Wrong reference	G1	G1-5 - Metrics related to political influence and lobbying activities	AR 9
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	The information required in [DRAFT] ESRS G1-5 on political influence and lobbying activities is redundant with other EU transparency requirements. Companies should be allowed to reference the EU transparency register or any other relevant national registers for the purpose of this disclosure.	G1	G1-5 - Metrics related to political influence and lobbying activities	5.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	G1 definitions, and specifically the one for "Corruption and bribery convictions" are not aligned with United Nations Convention against Corruption or with the OECD, adding new definitions or making references to regional (ECRIS) (instead of global) references. Where available, widely accepted global frameworks should be the basis for definitions (e.g. the UN Convention or OECD).	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Missing detail on internal viewing policies such as company employment terms and conditions. These are important and fundamental when doing investigations.	G1	G1-1 - Policies related to business conduct	1.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	"Confirmed incidents" should refer to proven cases after internal investigation, simple alerts should not be disclosued.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Only the policies for the complaints procedure are adressed in G1-1. In order to bundle the requirements on the complaints procedure, it would be advisable to bundle this reporting requirement together with the reporting requirements of ESRS S1-2, S2-2, S2-3 and S2-4 on the complaints procedure in a separate chapter. This would support the opportunitie to refer to the descriptions under G1 in the S chapters.	G1	G1-1 - Policies related to business conduct	8. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The metrics relating to anti-corruption and anti-bribery are comprehensible and ok. When summarizing the sub-sub-topics in the ESRS 1 standard, anti-corruption and anti-bribery, animal welfare and complaints procedures were combined in one Sub-Topic. It is unclear why the topics of animal welfare and complaints procedures no longer appear separately in standard G1. This is an inconsistency between the topic overview in ESRS 1 and the G1 standard that should be rectified (see also comment on ESRS G1 - 8)	G1	G1-4 - Metrics related to Incidents of corruption or bribery	12.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA. The requirement to report on "standard payment terms" and supplier categorization presents significant practical challenges. The metric lacks clarity in international contexts and provides limited value for understanding supplier relationships. Tracking supplier categories by size would require substantial system changes, while reporting legal proceedings related to late payments without context offers little decision-useful information, especially since material cases are already covered in legal risk reporting. These requirements create unnecessary administrative burden without adding meaningful value to sustainability reporting.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	12.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA.	G1	G1-5 - Metrics related to political influence and lobbying activities	15.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It should be made clearer that only those metrics are to be reported for sub-topics that have been assessed as essential in the context of the DMA.	G1	G1-6 - Metrics in relation to payment practices	19.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	It is unclear to which paragraphs the AR refers to (also AR 4-6). Paragraphs 13/14 do no longer exist in the amended ESRS. Update of references/paragraphs needed.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Considering the EFRAG Explanations January - May 2024 (final version,page 95), the following issues are identified: 1. It focuses solely on first-instance convictions of natural persons, including non-final decisions, leading to a lack of transparency and contradictions with the ECRIS, which only records final convictions. 2.The CSRD approach lacks transparency by mixing final and non-final convictions. A final conviction has more significance than a non-final decision. 3.Th approach fails to distinguish between the severity of convictions of board members versus employees, and it does not consider cases where the company itself is sanctioned for corruption or bribery, either through criminal proceedings or administrative fines. Relevant national registers for legal entities are disregarded by the CSRD as well. Cases where a company is sanctioned for corruption or bribery are important, as they indicate systemic issues rather than individual excesses. 4.Additionally, the reliance on information from accused individuals creates reliability issues, as court proceedings often occur years after the offense, and the employees may no longer be with the company. 5.The focus on payable fines for convictions of natural persons overlooks prison sentences (and their suspension if applicable), which are indicators of the severity of the crime.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	5. (a)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Suggestion to delete this datapoint as information already disclosed in EU Transparency Register as well as in national Transparency Registers (e.g. Germany, USA) and therefore considered redundant. Additionally, a prioritization of "main topics in lobbying activities" could imply that political activities in one country could be more important or "material" than in another leading to misunderstandings with external stakeholders.	G1	G1-5 - Metrics related to political influence and lobbying activities	9.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	Unclear what is meant by standard payment terms (and that it isn't the average time to pay). Why was the example taken out from the application requirements? That was helpful	G1	G1-6 - Metrics in relation to payment practices	12.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	In addition to the elements listed under ESRS 2 GDR-P, business conduct policies should disclose topic-specific features—for instance, whether whistleblower systems accept reports from external stakeholders, how whistleblowers are protected, and whether policy effectiveness is regularly assessed. These dimensions are critical for understanding governance in practice and avoiding reporting gaps.	G1	G1-1 - Policies related to business conduct	10.
Excels	BDO Poland	Auditor	Poland			I agree	It is positive that key policy areas such as anti-corruption and whistleblower protection are explicitly singled out for disclosure. This supports consistency with EU regulatory frameworks (e.g. SFDR) and addresses areas of high stakeholder concern. No changes needed.	G1	G1-1 - Policies related to business conduct	8. (a)
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	The requirement lacks clarity on the scope of "business conduct policies". Without further guidance, undertakings may omit key policies due to unawareness or intentional exclusion. Including a non-exhaustive list of typical business conduct policy areas would support more complete and comparable disclosures.	G1	G1-1 - Policies related to business conduct	7.
Excels	BDO Poland	Auditor	Poland			I agree	Including a dedicated disclosure requirement for targets within ESRS G1 is strongly supported. This ensures alignment with the overall ESRS architecture and improves consistency between G, E, and S topics. No changes needed.	G1	G1-3 - Targets related to business conduct	11.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	The current drafting allows undertakings to declare zero political contributions without substantiating how this conclusion was reached. Requiring a short description of the methodology in case of no identified contributions (e.g. data sources, internal controls, scope of review) would enhance reliability. This ensures disclosures reflect actual due diligence and minimize underreporting.	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Lots of DP merge into this paragraph. Ok for the DP but the presentatin is not so clear. Better to put differetn bullet points with the DP.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I agree	Number of confirmed incidents of corruption mandatory	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	The consolidation of subtopics is not always effective. Excessive aggregation may dilute relevant aspects. For instance, for credit institutions it seems reasonable to address the topic of "corruption and bribery" separately, rather than combining it with less related issues such as whistleblowing or animal welfare. The draft foresees a consolidation of sub- and sub-sub-topics at the sub-topic level, with sub-sub-topics being removed. This has implications for the materiality assessment, particularly in relation to governance. The topic 'corruption and bribery' is now subsumed under 'corporate culture', together with whistleblower protection and animal welfare. As a result, the term 'corporate culture' is given a deviating definition, and the topic of 'corruption and bribery'—which is often assessed as material and clearly defined—loses significance. A clearer definition of 'corporate culture' as well as a separate consideration of 'corruption and bribery' as its own sub-topic would appear appropriate to ensure a clear delineation of topics for the materiality assessment.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	12.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I agree	(Former G1-1 Disclosure Requirement related to ESRS 2 GOV-1 – The role of the administrative, management and supervisory bodies) - It is good that it is handled in ESRS 2 GOV1 instead of seperated reporting in each topical standard.	G1	G1-1 - Policies related to business conduct	6.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I partially agree and partially disagree	Great modification to only disclose discrepencies, but which specific chapter and/or articles in UN Convention against Corruption are applicable to a company? Please specify. Otherwise it is hard to compare against. Is it Article 12?	G1	G1-1 - Policies related to business conduct	8.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to restore the existing para. 33(a) related to the average time to pay an invoice because this data is used to respond to subsequent requests (see current para. 20(a)). We therefore believe that it would not be an excessive effort for users to report it.	G1	G1-6 - Metrics in relation to payment practices	20.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This adds an additional disclosure requirements for preparers. We believe that the principle of not increasing reporting requirements should be applied consistently. Even if the datapoint itselbf is not technically complex, the change in status to mandatory will require additional interpretation, internal coordination, and alignment with auditors—especially during first-time implementation. This effort should not be underestimated. From our point of view the ESRS revision should refrain from posing any additional effort to preparers.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This application requirements is not clearly defined and prone to diverse interpretation, e.g.: - "shall consider": does this mean that incidents in the upstream/downstream value chain are to be disclosed? - what is meant by "direct involvement"? - does the reporting include information about the "actors"?	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent with Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS G1 Business Conduct when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	G1	G1 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Why is (unfair) put in brackets? Depending on what the intention was, either delete the brackets or delete the (unfair) in its entirety.	G1	G1 - Objective	4. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary dupplication. Paragraph 5 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	G1	G1 - Objective	5.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Why is this paragraph needed? Is this not sufficiently covered in ESRS 2, Paragraph 30? Since former S1- to S4 requirements were moved into the new ESRS 2, Paragraph 35 the question arises if for ESRS G1, Paragraph the same logic should apply. Either way, the approach should be consistent across ESRS.	G1	G1-1 - Policies related to business conduct	8.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Starting with DR G1-2, the numbering of paragraphs starts with 1 again instead of continuing the paragraph count of the paragraph. This paragraph should read as 9 and then the numbering should be continued.	G1	G1-2 - Actions related to business conduct	9.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Part 1 of feedback on G1-2, paragraph 10(c): The whole approach to supply chain management requires reconsideration. On the one hand, supply chain components are inherent in each of the E, S and G standards, whereas ESRS G1 seems to suggest that this is a component of G. It could also be argued that it is most appropriate to reflect supply chain management in the section on general information because the supply chain is often managed across E, S and G in which case it would be most appropriate to reflect this in the general information section. If fair presentation should be the overarching principle, it should be considered if the last sentence in Paragraph 10(c) actually should belong here. We also believe that changing this from voluntary to mandatory represents an arbitrary extension of reporting and is not sufficiently justified. [Feedback on this paragraph is continued below. The below entry should be read after this entry.]	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Part 2 of feedback on G1-2, paragraph 10(c): If left unamended, we would appreciate more guidance on when the disclosure of 'whether the procurement team is involved in training related to its engagement with suppliers for the improvement of their sustainability performance' within paragraph 10(c) is required, whether it is required when the sub-topic "Management of relationships with suppliers" is deemed material and/or the other sub-topics under G1 are deemed material. In the NMIG's "Mapping of sub-topics to disclosures in topical standards", G1-2 has been mapped to all three sub-topics under G1, however it does not seem all datapoints within G1-2 are related to all the sub-topics under G1. In general, despite the non-mandatory status, some guidance provided in the NMIG may cause more confusion than clarify for preparers. In view of the above example, we would appreciate the provision of more clarifications on the use of the mapping provided in NMIG, and more broadly on circumstances where preparers have challenges applying the guidance in the NMIG.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Why is the addition during the reporting period needed? Is it not clear from ESRS 2 that all disclosures made refer to the reporting period? Please check all ESRS in this respect.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	12.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Why is the addition during the reporting period needed? Is it not clear from ESRS 2 that all disclosures made refer to the reporting period? Please check all ESRS in this respect.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	13.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	It is still not clear whether the number of convictions for violation of anti-corruption and anti- bribery laws applies only to the legal entity , or whether it should also include employees and members of the 'administrative, management and supervisory bodies' (AMSB) of the entity. It should be clarified that this applies to legal entities and not individual persons.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	13.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	In relation to the new G1-6 paragraph 13, we suggest to split the two requirements (i.e. number of convictions and total amount of fines) into different paragraphs for better clarity, given that the scopes of such metrics are indeed different.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	13.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Why is the addition during the reporting period needed? Is it not clear from ESRS 2 that all disclosures made refer to the reporting period? Please check all ESRS in this respect. See also our response to question 23.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Response to Part 2 Q23 (1): AFME strongly opposes this additional mandatory datapoint. There is not sufficient justification for adding this quantitative disclosure requirement as it does not align with the simplification principles set out by the Commission for the revision of ESRS. Members have previously raised concerns about the application of definition of "confirmed" incidents and the challenges with applying the Glossary definitions on a global scale, where ESRS definitions may deviate from individual jurisdictional definitions. The new ARs 4-6 do not provide the flexibility required for reporters operating globally. Preparers should not be mandated to disclose information which poses a legal risk to the institution – this should align with reliefs available in the context of financial reporting. [the response is continued in another field]	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Response to Part 2 Q23 (2): The proposed mandatory disclosure of the number and nature of "confirmed" incidents of corruption and bribery would potentially impair an undertaking and its parent company's legal strategy/defence and risk mitigation. Determinations as to whether or not a legal violation has occurred, and the appropriate enforcement response, are generally discretionary decisions by competent authorities. The proposed disclosure may be interpreted by authorities in and outside Europe as an admission of violation by the undertaking or its parent company, regardless of specific facts and circumstances (e.g., materiality and nature of identified misconduct). This may bias an investigation and enforcement response. Such information is also highly sensitive and complex to report in a public document. Broad sharing of sensitive information could be detrimental for various reasons (e.g. potential breach of confidentiality obligations as regards certain transactions). It is to be stressed though that, for the sake of transparency, the corresponding information is already shared with a restricted list of stakeholders (Board of Directors, auditors and certain supervisory authorities). Consequently, the disclosure requirement can result in undue harm and legal risk to the undertaking and its parent company. Internal investigations by the undertaking, even if substantiated, should not be reportable.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	It should be clarified that this refers only to employees who are active in the reporting period.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	AR 4 aligns its interpretation of "final decision" with the concept of a "conviction" under the European Criminal Courts Records Informatin System (ECRIS). In Regulation EU 2019/816 (ECRIS-TCN), the concept of a conviction is defined as a definitive resolution where no appeal is possible. The log of amendments (referring to AR 4) states the following: "In this context, final decisions include all the decisions in the reporting year while awaiting the outcome of a possible appeal. The reporting undertaking may provide additional information if an appeal is considered, has been lodged or was successful". The log of amendments, therefore, introduces a discrepency. It is essential that, to avoid any misinterpretation, the concept of conviction in AR 4 for paragraph 13 refers to final decisions not subject to appeals, and therefore paragraph added in the Log of Amendments is deleted and not added to any subseqent Q&A as it is incorrect pursuant to Regulation ECRIS.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The application requirements should specify that reporting on G1-4 should focus on convictions to legal entities, not to individual persons.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Regarding AR 5 for p. 13, in order to keep coherence with the definition of "conviction" under the European Crimal Courts Records Infomation System, fines to be reported should be those that are definitive (i.e. not subject to appeal judicially). This would be also consistent with the concept of "fair presentation" pursued by the new ESRS.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 5
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The requirements of G1-5 should be clarified to affirm that the disclosure is associated with the EU and its member states in recognition of the fact that not all jurisdictions have regulatory structures akin to the EU Transparency Register and substantial investment would be required for firms to collect, track and report information from third parties. They also go beyond current EU Transparency Register requirements. In particular, we thought the prior paragraph 29(b)(i) should have been modified to drop the reference to "indirectly" which arguably could be seen to cover payments to trade organizations that may engage with political officials either through conferences/lunches or through direct contributions. Such activity may have little connection to material ESG issues (e.g. meeting to discuss rules for participating in local check clearing market), and the EU would still have the benefit of the EU registrations and disclosures for EU-related activity under the existing EU Transparency Register. The exposure draft does not clarify this, and we ask that this is considered further.	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	It is unclear to which paragraphs the AR refers to (also AR 4-6). Paragraphs 13/14 do no longer exist in the amended ESRS. Update of references/paragraphs needed.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Considering the EFRAG Explanations January - May 2024 (final version,page 95), the following issues are identified: 1. It focuses solely on first-instance convictions of natural persons, including non-final decisions, leading to a lack of transparency and contradictions with the ECRIS, which only records final convictions. 2.The CSRD approach lacks transparency by mixing final and non-final convictions. A final conviction has more significance than a non-final decision. 3.Th approach fails to distinguish between the severity of convictions of board members versus employees, and it does not consider cases where the company itself is sanctioned for corruption or bribery, either through criminal proceedings or administrative fines. Relevant national registers for legal entities are disregarded by the CSRD as well. Cases where a company is sanctioned for corruption or bribery are important, as they indicate systemic issues rather than individual excesses. 4.Additionally, the reliance on information from accused individuals creates reliability issues, as court proceedings often occur years after the offense, and the employees may no longer be with the company. 5.The focus on payable fines for convictions of natural persons overlooks prison sentences (and their suspension if applicable), which are indicators of the severity of the crime.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	5. (a)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	By deleting "for financai or in kind political contributions", the requirements seem to suggest that the total monetary calue of financial and in-kind political contributions for "political influence" needs to be disclosed. This in turn would increase the reporting burden for companies as it widens the defition of the metrics to be reported to general political influence , while at the same time being open for interpretation. Generally, the collection of information for this datapoint requires a lot of effort and raises legal concerns especially related to in-direct financial contributions outside of the EU, which is why we would suggest to limit the scope from "global! to "EU and Member States" or delete the datapoint. Alternatively, further clarification on the scope needed.	G1	G1-5 - Metrics related to political influence and lobbying activities	8.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Suggestion to delete this datapoint as information already disclosed in EU Transparency Register as well as in national Transparency Registers (e.g. Germany, USA) and therefore considered redundant. Additionally, a prioritization of “main topics in lobbying activities” could imply that political activities in one country could be more important or “material” than in another leading to misunderstandings with external stakeholders.	G1	G1-5 - Metrics related to political influence and lobbying activities	9.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The requirement to report on "standard payment terms" and supplier categorization presents significant practical challenges. The metric lacks clarity in international contexts and provides limited value for understanding supplier relationships. Tracking supplier categories by size would require substantial system changes, while reporting legal proceedings related to late payments without context offers little decision-useful information, especially since material cases are already covered in legal risk reporting. These requirements create unnecessary administrative burden without adding meaningful value to sustainability reporting.	G1	G1-6 - Metrics in relation to payment practices	12.
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The requirements of G1-5 should be clarified to affirm that the disclosure is associated with the EU and its member states in recognition of the fact that not all jurisdictions have regulatory structures akin to the EU Transparency Register and substantial investment would be required for firms to collect, track and report information from third parties that may be required given broad definitions. They also go beyond current EU Transparency Register requirements. In particular, we thought the prior paragraph 29(b)(i) should have been modified to drop the reference to “indirectly” which arguably could be seen to cover payments to trade organizations that may engage with political officials either through conferences/lunches or through direct contributions. Such activity may have little connection to material ESG issues (e.g. meeting to discuss rules for participating in local check clearing market), and the EU would still have the benefit of the EU registrations and disclosures for EU-related activity under the existing EU Transparency Register. The exposure draft does not clarify this, and we ask that this is considered further.	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I disagree	Since, as noted in G1-4, this disclosure requirement has been included to support the information needs of financial market participants subject to Regulation (EU) 2019/2088, it is not directly applicable in the context of private companies, and therefore should be excluded or at least caveated to exclude private companies. [Please note we wished to select 'I partially agree and partially disagree' in our response, but were unable to do so]	G1	G1-4 - Metrics related to Incidents of corruption or bribery	13.
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I disagree	Reporting of this information is already required in (most) EU constituencies, and this datapoint includes requirements that are not only redundant, but that also exceed the scope of existing EU legislation, introducing new obligations not required under the Transparency Register framework. [Please note we wished to select 'I partially agree and partially disagree' in our response, but were unable to do so]	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I disagree	For privately and in particularly family-held company this could include sensitive information. While the ESRS has stated that the purpose of these included data points is to enhance transparency for investors and stakeholders, it is reasonable that the ESRS should take into account the specific perspective and context that private companies operate in to make appropriate rules for reporting that that may be distinct from those applicable to publicly listed companies. This is another one of those cases, as this data point requires the reporting of business sensitive information held by a privately-held company that is generally otherwise not subject to public disclosure. Further, this requirement improperly limits flexibility. The IFRS allows for principles-based disclosures, while ESRS imposes structured datapoints, which may not suit all governance models (especially US-based or family-owned firms). Instead, companies should be able to screen applicable categories for materiality and to limit disclosures to material items. [Please note we wished to select 'I partially agree and partially disagree' in our response, but were unable to do so]	G1	G1-5 - Metrics related to political influence and lobbying activities	18.
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	If companies are required to disclose specific payment amounts to individual associations, there is a risk that conclusions relevant to competition could be drawn from this. There are very different models for calculating membership fees in the association landscape, for example based on total payroll or company turnover. Disclosing specific contribution amounts to individual organisations could enable competitors who are members of the same association to derive sensitive information about other companies. We therefore propose that only the type of recipient should be disclosed, but not specific organisations or contribution amounts.	G1	G1-5 - Metrics related to political influence and lobbying activities	16.

Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	In the mining industry, supplier-related data is mostly uncategorized in the way requested. Suppliers are mainly managed individually, and payment conditions are negotiated on a case-by-case basis. Applying this categorisation will increase complexity in reporting	G1	G1-6 - Metrics in relation to payment practices	20.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	Strong opposition is expressed to converting G1-4 25(a) from a voluntary to a mandatory datapoint under G1-14. EFRAG's rationale, an exception justified by the absence of other metrics on corruption and bribery, is insufficient and inconsistent with its mandate to simplify and reduce reporting burdens. This change represents a significant shift in scope and expectations. EFRAG has not provided a compelling reason, and elevating this datapoint without compelling justification undermines the credibility of the standard-setting process and imposes undue burden. The EU Commission's clear instruction to EFRAG, repeatedly emphasized, is that voluntary datapoints should not become mandatory without overwhelming justification. The claim that "no other metrics exist" does not meet that threshold.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	Strong opposition is expressed to the conversion of G1-2 AR (b) from a voluntary to a new mandatory datapoint under G1-4 10(c). EFRAG's rationale, that this change replaces two deleted datapoints on supplier relationship management and was deemed "more meaningful", is insufficient and inconsistent with its stated mandate to simplify and reduce reporting burdens. This change introduces a significant shift in scope without compelling justification. EFRAG has consistently stated that voluntary datapoints should only be made mandatory under exceptional circumstances. The assertion of increased relevance is subjective and does not sufficiently account for the diversity of supplier governance models or the potential for immaterial disclosures. EFRAG must adhere to its principles of proportionality and materiality. Elevating this datapoint to mandatory status without overwhelming justification undermines the credibility of the standard-setting process. We urge EFRAG to retain the datapoint as voluntary.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	10. (c)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Paragraph 9 sets the objective of G1-2 very clearly.	G1	G1-2 - Actions related to business conduct	9.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	This amendment meets the purpose of having the information requirement set out. However, we suggest adapting the text to emphasise alignment with applicable legislation, rather, without obliging companies to disclose potentially sensitive information. for example, the clause can be formulated as follows: 10. In addition to the information required by ESRS 2 GDR-1, the undertaking shall disclose: a) information about the management of its relationships with its suppliers, if the undertaking takes into account social and environmental criteria for the selection of its suppliers based on the applicable legal requirements.	G1	G1-2 - Actions related to business conduct	10. (a)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	These paragraphs were unnecessarily complicating the disclosures. Nokia welcomes the simplification.	G1	G1-2 - Actions related to business conduct	13.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	The meaning of "confirmed incident" should be revised as indicated in a prior comment. Additionally, we do not support the addition of this new mandatory disclosure requirement and respectfully request that it be adapted as follows: "The undertaking may disclose the total number and nature of confirmed incidents of corruption or bribery that occurred during the reporting period".	G1	G1-2 - Actions related to business conduct	14.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	While the distinction between DPs political influence and lobbying activities is welcome, the definition of what exactly constitutes "political influence" needs to be added to the glossary of terms, especially given the distinction between "financial and in-kind political contributions".	G1	G1-2 - Actions related to business conduct	16.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We recommend that EFRAG provide a definition of unfair payment practices, this concept being newly introduced in the ED.	G1	G1 - Objective	4. (c)
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We recommend that EFRAG clarify the scope of people directly involved in incidents of corruption or bribery to be considered as AR 3 refers to 'employees' while NMIG 4 refers to 'own workers' (i.e., including non-employees).	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The new definition of fines provided in AR 5 limits the information to be disclosed to the fines 'paid to a public treasury'. We recommend that EFRAG clarifies whether fines that comply with the applicable definition but which are paid to other bodies shall be considered in reporting under ESRS G1:13.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We recommend that EFRAG clarify whether investigations of government authorities on the undertaking's payment practices are to be considered as 'legal proceedings currently outstanding for late payments'. Clarifications brought by ID 419 could be usefully added to specify what 'currently outstanding legal proceedings' refer to (i.e. 'legal proceedings that have not been legally resolved at year-end') and whether proceedings initiated and closed during the reporting period shall also be considered.	G1	G1-6 - Metrics in relation to payment practices	20.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL "(unfair) payment practices" - not clear whether this is asking undertakings to report on unfair payment practices or both, fair and unfair practices; log of amendment states that the amendment by "(unfair)" was intended to align with CSRD, but CSRD (recital (50)) does not use brackets and is therefore clear in the sense that it refers to "unfair payment practices" only; par 4(b) should be aligned (i.e. remove brackets)	G1	G1 - Objective	4. (b)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	On paras 8(a) and 8(b) "the circumstances when it has no policies on ..." The change in the wording does not add to the clarification. The earlier version: "When it has no policies... it shall state and whether it has plans to implement" is perceived as clearer. The wording in ESRS G1 amend raises the question as to whether there is an expectation of a different disclosure now. The intention is that undertakings disclose when they do not have that policiy. However, now it could be read as if the circumstances of that are asked to be disclosed. Suggestion: keep current wording.	G1	G1-1 - Policies related to business conduct	8. (a)
Excels	DRSC	(National) standard setter	Germany			I agree	generally agree that streamlining two DP into one new DR; here: 10(c) includes new DR, but that DR (procurement team involved in training) included to replace / streamline two other data points on management of relationship with suppliers	G1	G1-1 - Policies related to business conduct	10. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I agree	from may to shall (exception) as there would be no other remaining metrics on corruption and bribery	G1	G1-4 - Metrics related to Incidents of corruption or bribery	4.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	On para 7 et seq. According to the log of amendments the changes in G1 amend par. 7 et seq are meant to clearer distinguish between political influence and lobbying activities by differentiating between the two. However, this seems difficult to establish in G1-5. For example, par 7 states that the objective is - among other - to provide "types ... of lobbying activities" when in fact par 8 asks of different types of "political influence". Lobbying activities (par 9) are not differentiated by type, but by main topics etc. Therefore, it does not seem to clarify any differences between the two (especially since lobbying activities are (correctly) still explained as being included in "political influence" activities (par 7).	G1	G1-5 - Metrics related to political influence and lobbying activities	7.
Excels	DRSC	(National) standard setter	Germany			I disagree	Question 32) in the questionnaire, the log of amendments to G1 and BC (p. 66) refer to simplifications in G1-6. However, the amended requirements regarding "payment practices" are still questionable. While the objective of G1-6 is theoretically understandable (to have visibility regarding how undertakings engage with and support SMEs - Questionnaire, p. 23) this objective does not seem achievabel in practice. The objective of G1-6 states that the disclosure is to provide an understanding of the contractual payment terms ... especially with regard to late payments to SMEs. However, this objective cannot be met with the disclosure requirements in the paragraph that follows. On a minor note, par 12 does not provide for a disclosure regarding "late payments to SMEs" so this information cannot be derived from par. 12. In addition, par 12 remains unclear about how the disclosures are supposed to provide information on the payment practices in relation to SMEs; e.g. (a) requires information on payment terms / percentage aligned with these terms "including SMEs" - would this require a disclosure separately for SMEs or one total disclosure including the number of days for SMEs? [continues in box below]	G1	G1-6 - Metrics in relation to payment practices	11.
Excels	DRSC	(National) standard setter	Germany			I disagree	[continued from box above] Apart from the wording of the DR which does not reflect the objective of G1-6 we got the feedback that there are several issues with this DR: First of all, there often is no "standard payment term" per category of suppliers. More importantly, "SMEs" do not represent one "category of suppliers". To separate SMEs from other suppliers would often not be possible for undertakings as they do not usually categorise their suppliers by size and therefore usually do not have the information on which supplier is an SMEs (also questionable which definition to apply here). As mentioned above, companies have reported back that they do not have "standard payment terms", but that the terms are very different across suppliers (also depending on the request of suppliers as payment terms are often prescribed by the supplier). As a result, there is no "standard payment terms" in regards to SMEs that could be reported. Overall, while G1 par 33(a) (current ESRS Set 1) has been deleted the general issue regarding "payment practices" in general and with regard to SMEs in particular remain.	G1	G1-6 - Metrics in relation to payment practices	11.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	While consolidating previous scattered datapoints on training into a single provision is understandable, the proposed approach introduces ambiguities. The current wording largely retains original phrasing, resulting in multiple distinctive datapoints in section 10c: general business conduct training (formerly 10g); percentage of high-risk functions/roles trained on corruption and bribery (formerly 21b); board members trained (formerly 21b); and members of the "procurement team" trained. Except for general training, it is unclear whether data should cover these groups regarding business conduct or anti-corruption specifically. Moreover, if these requirements are combined into one larger datapoint, undertakings that previously deemed DR G1-2 on supplier relationships non-material may be unsure whether reporting becomes mandatory under the proposed ED. The term "procurement team" also lacks clarity. We recommend designing training datapoints with clear requirements and ensuring disclosure scope aligns with materiality principles, particularly regarding supplier relationships. Additionally, the percentage of high-risk functions/roles trained provides limited value, as definitions vary across companies, reducing comparability. The first part of §10(c) already offers a sufficient overview of relevant training measures.	G1	G1-2 - Actions related to business conduct	10 c)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	ESRS G1 §18 It is unclear what "lobbying activities" refers to, considering that there is no harmonized regulation across Europe that defines it. Therefore, we suggest amending the definition in the glossary as such: Activities carried out with the objective of influencing the formulation or implementation of policy or legislation, or the decision-making processes of governments, governmental institutions, regulators, European Union institutions, bodies, offices and agencies or standard setters. Such activities include (non-exhaustive list): i.organising or participating in meetings, conferences, events; ii.contributing to/participating in public consultations, hearings or other similar initiatives; iii.organising communication campaigns, platforms, networks, grassroots initiatives; iv.preparing/commissioning policy and position papers, opinion polls, surveys, open letters, research work as per the activities covered by transparency register rules. Activities carried out by, among others, business associations in the exercise of their constitutional functions shall not be considered lobbying activities	G1	G1-5 - Metrics related to political influence and lobbying activities	17
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	It is unclear what "regulators" refers to. Therefore, we would suggest a modification: "The disclosure shall also include information about the appointment of any members of the administrative, management and supervisory bodies who held a comparable political position in public administration (including regulators) in the 2 years preceding such appointment in the current reporting period."	G1	G1-5 - Metrics related to political influence and lobbying activities	18

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The input refers to G1-2 Paragraph 2 (c): Consolidation of different training purposes and activities could be challenging with view to the IRO mapping process, as it fails to clearly indicate which sub-topic G1-2 Paragraph 2 (c) relates to. Therefore, a more distinct division into the sub-topics is necessary. Especially, the disclosure requirement regarding the procurement team should be separated as it refers to the topic management of relationships with suppliers. The new wording regarding the members of the administrative, management and supervisory bodies is not clear. Recommendation: Revert to the previous text and include 'the extent to which training is given to'. Alternatively, it should be emphasized that external training is also meant in order to prevent potential conflicts of interest.	G1	G1-2 - Actions related to business conduct	7.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The input refers to G1-3 Paragraph 6: A disclosure requirement regarding the number and nature of confirmed incidents of corruption and bribery is misleading and should be deleted. A high number of incidents seems negative but might also reflect an effective compliance management system with investigation measures in place. In addition, the disclosure requirement contradicts 1. the principle of the presumption of innocence and 2. the principle under German law that offenses do not regularly have to be reported to the authorities, but it is the company's responsibility to adequately address compliance violations within the company. There is no unified scope or definition of the term „corruption incidents", neither in the affected jurisdictions and their criminal codes, nor within the undertakings reporting this KPI. For example: does corruption only mean corruption in the public or also in the private sector? Are cases of conflicts of interests covered? Are only incidents covered with confirmed violations of criminal law or also of a violation against internal rules only? What does "confirmed" mean: indictment by a prosecutor; internally proven; internal assessment that violation is highly probable or only more likely than not? These different assessment methods will lead to confusing reported data.	G1	G1-3 - Targets related to business conduct	7.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The input refers to G1-5, AR 7 and 8 for para 16: Regarding political contributions further differentiation and explanation is needed (the purpose of a contribution as main criteria): Financial or in-kind contributions to external organizations (e.g. lobbyists, charities, think tanks or trade associations) or non-consolidated companies should only be considered, if granted with the purpose of passing it on to a relevant recipient like political parties, their elected representatives or persons seeking political office.	G1	G1-5 - Metrics related to political influence and lobbying activities	AR 7
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	This application requirements is not clearly defined and prone to diverse interpretation, e.g.: - "shall consider": does this mean that incidents in the upstream/downstream value chain are to be disclosed? - what is meant by "direct involvement"? - does the reporting include information about the "actors"?	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	This adds an additional disclosure requirements for preparers. We believe that the principle of not increasing reporting requirements should be applied consistently. Even if the datapoint itselbf is not technically complex, the change in status to mandatory will require additional interpretation, internal coordination, and alignment with auditors—especially during first-time implementation. This effort should not be underestimated. From our point of view the ESRS revision should refrain from posing any additional effort to preparers.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended to have a disclosure focus on robust risk mitigation policies, processes, and identification of at-risk roles, not percentages. While clarifying low-risk roles, this overlooks the dynamic nature of global corporations, making a precise percentage of at-risk functions unfeasible.	G1	G1-3 - Targets related to business conduct	10.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Overall, the structure of G1 chapter is now consistent with other topical chapters, by introducing 'PAT' (Policies, Actions, Targets). This is helpful and adds to the logic order, also of sustainability statements.	G1		
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	We welcome the inclusion of examples for 'functions and/or roles most at risk'.	G1	G1-2 - Actions related to business conduct	AR 2
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	This paragraph introduces a mandatory disclosure 'whether the procurement team is involved in training related to its engagement with suppliers for the improvement of their sustainability performance'. The datapoint is combining very different areas, under Business Conduct header. While understanding these points all relate to training, it is not a helpful structure to combine unrelated areas and have different datapoints 'hidden' in one DR.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The paragraph mentions 'the undertaking shall disclose (..) training activities (..). This shall include the percentage of functions and/or roles most at risk within the undertaking in respect of corruption and bribery (..)' The disclosure requirement is unclear, what is meant with 'the percentage'? Does it refer to the percentage of functions or roles, out of the total of functions or roles within the company, that are at risk? Or the percentage training completion by this group, which is not what it says?	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	We welcome the inclusion of guidance for 'Convictions', adding to consistency in reporting.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	We welcome the inclusion of guidance for 'Fines', adding to consistency in reporting.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 5
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	We welcome the explicit reference to the ESRS definition of 'Corruption' and 'Bribery', adding to consistency in reporting.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 6
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This datapoint has been made mandatory under the ESRS revisions, which is contrary to the general principle of simplifying the ESRSs.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	AR 7 and AR 8 include definitions for the terms used in paragraph 16. This is an example of where definitions are included in the AR, while other definitions (in this case, lobbying activities) are covered in Annex II. This inconsistency is confusing when applying.	G1	G1-5 - Metrics related to political influence and lobbying activities	AR 9
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Please see response in PART 2 template	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Comment applies to the overall objective of G1 - article 3. It explicitely states that the undertaking only to disclose on the subtopics that are material - like in all other ESRSs except S1. This should be applied to S1 as well.	G1	G1-1 - Policies related to business conduct	7.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Remove reference to payment practices which is not a sustainability topic and does not add decision useful information for readers of the Sustainability Statement	G1	G1 - Objective	4. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The PAT structure does not make sense for some of the G1 - Business Conduct topics, which should be included by all companies as mandatory e.g. Codes of Conduct / Supplier Conduct. Further this now creates significant diversion from other regulation where companies are required to provide more extensive disclosures on business conduct, policies, speak up processes, how business conduct matters are investigated therefore synergies between the Sustainability Statement and other sections of the Annual Report have been lost. Removal of requirements around Speak Up / non retaliation also lead to additional effort being required in Social Dislosures to report on channels / remedy which were cross referenced to G1 by many companies. In addition, it is unclear why reporters have been asked to continue to include information if ABC or whistleblowing policies not in place but no longer a mandate to explicitly say these policies are in place through GDRs.	G1	G1-1 - Policies related to business conduct	7.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This requirement should be made 'where relevant' as many companies will have a company wide approach to corruption and bribery.	G1	G1-1 - Policies related to business conduct	8. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The PAT structure does not make sense for some of the G1 - Business Conduct topics, which should be included by all companies as mandatory. Actions in relation to business conduct etc are likely to be BAU and part of policies therefore unlikely to be able to meet GDRs, however will still be recognised as material as it only takes one issue to potentially become material from a reputational perspective. Ok for other topics such as Animal Welfare.	G1	G1-2 - Actions related to business conduct	9.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Aligned to retain this requirement but similar requirements need to be kept in policies section to allow for a coherent narrative. Fundamentally EFRAG need to rethink G1 structure and whether some elements need to be retained in addition to PAT GDRs	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Depth of coverage' needs to be removed or better defined. Requirements relating to functions / roles most at risk should be made 'where relevant' as many companies will have a company wide approach to corruption and bribery .	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Disagree with making requirements relating to procurement team involvement in training mandatory. The more relevant data points are to understand how policies are embedded into the value chain and how this is monitored. Also not considering that other teams may be involved in training.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The PAT structure does not make sense for some of the G1 - Business Conduct topics, which should be included by all companies as mandatory. In addition, businesses are unlikely to have public targets in these areas nd will be promoting a zero tolerance policy therefore do not feel this is relevant.	G1	G1-3 - Targets related to business conduct	11.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Metrics related to payment practices should be removed as it is not a sustainability topic and does not add decision useful information for readers of the Sustainability Statement. Significant issues would either be reported through the financial statements or other external sources.	G1	G1-6 - Metrics in relation to payment practices	19.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Definition amended with the deletion of "An incident of corruption or bribery that has been found to be substantiated". This should stay in as such incidents can only be reported once substantiated and confirmed. If not retain, this creates inconsistencies in definition and use of the word "incident" between S and G topical standards and metrics (see further comments in S1)	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 6
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Regarding paragraph 10(c) 'percentage of functions at risk', we noticed a change from 'percentage of functions at risk covered by training'; the log of amendments clarifies that not all roles within a function may be at risk. While we support reporting the percentage of at-risk functions and administrative, management and supervisory board members covered by training, identifying specific roles within those functions and determining the % of functions at risk in an organization as a datapoint separate from training coverage reduces comparability due to differing role structures and risk assessments, and increases reporting burden without a clear benefit. Noting from the NMIG, this is not the intention of this paragraph, however may be interpreted this way given the current phrasing.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note that examples have been added to AR 2 for paragraph 8(c), clarifying that functions or roles most at risk may include those operating in high-risk countries or interacting with public authorities. While we understand the intent, this addition introduces ambiguity and could lead to unintended consequences, such as EU companies being perceived as singling out foreign governments. In practice, such interactions are already captured through disclosing the functions at risk (e.g. procurement). Under the fair presentation framework introduced in the revised ESRS 1, companies may feel compelled to disclose on these examples where material, which could increase the risk of double counting and create unnecessary complexity including around (legal) sensitivities. We therefore recommend retaining the original phrasing. We propose that this paragraph be repositioned as non-mandatory implementation guidance, rather than an application requirement. This would preserve the original intent of encouraging transparency without imposing prescriptive disclosure expectations that may not be relevant or material for all entities.	G1	G1-2 - Actions related to business conduct	AR 2
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Clarify in the guidance how UN Convention against Corruption interacts with national laws, such as Sapin II in France	G1	G1-1 - Policies related to business conduct	8. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete datapoint on confirmed incidents. Mandatory reporting would pose risks to European companies' competitiveness. It could conflict with the right against self-incrimination guaranteed by the European Convention on Human Rights and expose EU companies to investigations by third-country authorities, such as the US Department of Justice, benefiting non-EU competitors not subject to similar obligations. In the joint statement on a US-EU framework for reciprocal, fair, and balanced trade, the EU is called upon to ensure that the CSRD and CSDDD do not impose undue restrictions on transatlantic trade. Introducing mandatory reporting of confirmed incidents risks creating an unlevel playing field, as US companies may be exempted from comparable constraints. Moreover, reporting confirmed incidents is not a reliable indicator of anti-corruption policy effectiveness. A low number of incidents could reflect strong preventive measures, while a high number may indicate a trusted reporting system, particularly through whistleblowing channels. A simple numerical count or brief description of an incident's "nature" cannot capture its context, resolution, or remedial actions.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete the data point on the appointment of governance body members who held a comparable position in public administration within the past two years, as it is less relevant than disclosure on financial and in-kind political contributions, and poses implementation challenges	G1	G1-5 - Metrics related to political influence and lobbying activities	18.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Maintain a requirement on the management of relationships with suppliers, as these data points are seen as crucial by users to approximate key exposures, assess supplier concentration risks, monitor supply chain resilience, and inform risk management practices Proposed wording: "The undertaking shall provide information about the management of its relationships with its suppliers and its impacts on its supply chain, including: a) a general description of tier 1 suppliers, including, where possible without undue cost or effort, the estimated number of tier 1 suppliers, and, on a voluntary basis, the estimated number of strategic suppliers among them; and b) the percentage of tier 1 suppliers audited and/or evaluated in number and by purchasing amount."	G1	G1-2 - Actions related to business conduct	10. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	ANC suggests retaining datapoints on the management of relationships with suppliers (previously addressed under G1-2 and now deleted) as a higher priority compared to the datapoint on the training of procurement teams. These datapoints are particularly important for users to approximate key exposures, assess supplier concentration risks, monitor supply chain resilience, and inform risk management practices. Suggested wording: "The undertaking shall provide information about the management of its relationships with its suppliers and its impacts on its supply chain, including: a) a general description of tier 1 suppliers, including, where possible without undue cost or effort, the estimated number of tier 1 suppliers, and, on a voluntary basis, the estimated number of strategic suppliers among them; and b) the percentage of tier 1 suppliers audited and/or evaluated in number and by purchasing amount." If training for procurement teams is maintained as a datapoint without more information required on policies and actions related to the management of supplier relationships, it may be more appropriate to place it under (d) rather than (c), in order to clearly distinguish supplier relationship management from topics related to functions exposed to corruption risk.	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	ANC strongly rejects changing datapoints on confirmed incidents from "may" to "shall," as they are highly sensitive and of limited relevance. Mandatory reporting would pose risks to European companies' competitiveness. It could conflict with the right against self-incrimination guaranteed by the European Convention on Human Rights and expose EU companies to investigations by third-country authorities, such as the US Department of Justice, benefiting non-EU competitors not subject to similar obligations. In the joint statement on a US-EU framework for reciprocal, fair, and balanced trade, the EU is called upon to ensure that the CSRD and CSDDD do not impose undue restrictions on transatlantic trade. Introducing mandatory reporting of confirmed incidents risks creating an unlevel playing field, as US companies may be exempted from comparable constraints. Moreover, reporting confirmed incidents is not a reliable metric of anti-corruption policy effectiveness. A low number of incidents could reflect strong preventive measures, while a high number may indicate a trusted reporting system, particularly through whistleblowing channels. A simple numerical count or brief description of an incident's "nature" cannot capture its context, resolution, or remedial actions.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	"Political influence" appears in bold in ED G1 § 4 c) however this concept is not defined in the ED Glossary. We recommend EFRAG provides a definition of this concept. The segregation between "political influence" and "lobbying activities" in the list of ESRS G1 sub-topics (§ 4) intends to show that they are different concepts. However, the objective of DR G1-5 of the ED suggests that "lobbying activities" are included in "political influence" ("provide an understanding of the undertaking's activities and commitments related to exerting its political influence with political contributions, including the types and purpose of lobbying activities"). This aligns with Q&A EFRAG ID 510 which defines lobbying activities as "influencing politics, political decisions, laws and regulations". We recommend that EFRAG provides a definition of "political influence", clarifying whether "political influence" covers both "political contribution" and "lobbying activities" and whether payments made for lobbying activities are included in political contributions.	G1	G1 - Objective	4. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I agree	Amended list of ESRS G1 sub-topics now includes "(unfair) payment practices". We recommend that EFRAG provides a definition for "unfair" payment practices.	G1	G1 - Objective	4. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I agree	ESRS G1 § 10 a) requires disclosing "information about the management of relationships with suppliers". As this datapoint is a datapoint of the "DR G1-2 – Actions related to business conduct", we recommend EFRAG clarifies whether the "information" relates specifically to "actions" or intend to cover other concepts to be disclosed such as governance structures (oversight of supplier relationships), strategic approach and policies (driving the actions). We also recommend EFRAG sharing in NMIG examples of types of actions which could be disclosed in respect of "management of relationships with suppliers" based on already observed practices. Those examples could include : setting an organization dedicated to purchases and supplier relationships with management involvement, or alignment of policies in place within the undertaking and policies included in contractual clauses signed with suppliers to show consistency of policies application all along the undertaking value chain, with references to the parts of the sustainability statements already describing those policies.	G1	G1-2 - Actions related to business conduct	10. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I agree	The definition of "incidents" has been revised in the glossary and now includes : "These include judicial and non-judicial proceedings that have been initiated". We recommend EFRAG to add a definition for "proceedings" as well as examples of "non-judicial proceedings".	G1	G1-2 - Actions related to business conduct	10. (b)
Excels	Ernst & Young	Auditor	United Kingdom			I agree	ESRS G1 § 10 c) requires to disclose "depth of coverage" of "training activities within the undertaking on business conduct". "Depth of coverage" is not defined by the standard or glossary. G1-2 NMIG 3 for para. 10(c) presents an illustrative table including a "Training coverage" section referring to the percentage of trained people and a "Topics covered" section. We recommend the AR to clarify whether "depth of coverage" refers to percentage of trained people AND topics covered during the reporting period or whether "depth of coverage" shall be defined by the undertaking and could refer for example to the level of training (e.g. basic, advanced or expert)	G1	G1-2 - Actions related to business conduct	10. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I agree	Corruption definition included in the ESRS Glossary is very large and we recommend further clarifications by providing : - a definition of "entrusted power" - illustration of incidents that correspond to incidents of corruption or bribery and clarify whether the two following situations are in scope of ESRS G1-4 DR: - accounting manipulation - environmental pollution incident with corruption of agent involved in the investigation.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	12.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We recommend that EFRAG clarify which population is in scope for each datapoint related to G1-4 DR, as there are contradicting elements in the related AR and in NMIG : AR 3 for para 13 and 14 refers to incidents "where the undertaking or its employees are directly involved". AR 4 for para 13 refers to "an individual". Lastly, NMIG 4 4 for para. 14 refers to "own workers". Own workers include employees and non-employees. An individual can be an employee, a non-employee, a worker in the value chain, a member of administrative, management and supervisory board who is an individual within the undertaking organization but not an employee.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	In the document "Log of amendments ESRS G1 Business Conduct July 2025", AR 4 paragraph for para 13 includes the following wording : "In this context, final decisions include all the decisions in the reporting year while awaiting the outcome of a possible appeal. The reporting undertaking may provide additional information if an appeal is considered, has been lodged or was successful." This wording is not included in AR4 of the ESRS G1 standard ED. We recommend that EFRAG adds this wording in ESRS G1 - AR 4 of the standard considering this clarification is key to determine G1-4 metrics in case of a situation where an appeal is pending.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 4
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We acknowledge EFRAG's effort to clarify convictions and fines. We note that EFRAG has specified the scope of fines to those "paid to a public treasury" : it should be clarified if it was the intent to deliberately limit the scope, i.e. the public treasury must be the direct recipient of the payment. This could exclude relevant information as in some countries local fines may be paid to other bodies (independent public authorities which are not the public treasury), or proceedings could lead to payment to third parties or foreign authorities.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 5
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Scope of ESRS G1 § 14 covers incidents "that occurred during the reporting period". G1-4 NMIG 4 for para. 14 suggests including in corruption and bribery cases the "cases that were initiated in previous years where the outcome was only established in the current reporting period." We recommend that EFRAG transfers this NMIG 4 into an AR related to DR G1-4 as this clarification is key to ensure the information is comparable across undertakings (material incidents which were substantiated during the reporting period but occurred before the reporting period should be covered by the sustainability statement).	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	G1-5 NMIG 5 for para. 17 suggests to check the alignment between an undertaking's public statements on its material IRO and its lobbying activities. This was previously included in ESRS G1 AR 14 (Set 1). We recommend EFRAG retains this aspect into an AR related to G1-5 § 17 as it is necessary to ensure consistency and transparency on whether the lobbying activities are supportive, contradictory or neutral to the company's sustainability commitments. We also recommend that EFRAG adds into NMIG examples of ways to conduct lobbying activities based on 2024 observed disclosures such as implementation of a Public Affairs department or registration in transparency register.	G1	G1-5 - Metrics related to political influence and lobbying activities	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We recommend that EFRAG defines "SME" or clarify that it should align with the criteria set in the accounting directive. G1-6 § 20 a) requires description of payment terms by main category of suppliers, including SMEs. It is unclear whether SME information is required irrespective of the materiality of this supplier category from the perspective of the undertaking. This is considering the CSRD objective (protection of SMEs), the DR objective (understanding payment terms "especially with regard to late payments to SMEs") and the requirement itself. Transactions with SMEs may not be material from the perspective of the undertaking. If the intention is to address sspecific users' needs, we recommend to clearly state it in a standalone requirement for SME specific payment practice – distinct from other suppliers. We recommend EFRAG clarifies in AR whether the percentage of payment aligned with standard terms shall be computed based on: - the number or the amount of invoices, - the payments including or excluding reverse factoring transactions, - the population of all payments made during the reporting period including invoices received or dated in a different reporting period. We also recommend adding in NMIG 6 illustrative figures in the "Standard payment terms (days)" column.	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The input refers to G1-2 Paragraph 2 (c): Consolidation of different training purposes and activities could be challenging with view to the IRO mapping process, as it fails to clearly indicate which sub-topic G1-2 Paragraph 2 (c) relates to. Therefore, a more distinct division into the sub-topics is necessary. Especially, the disclosure requirement regarding the procurement team should be separated as it refers to the topic management of relationships with suppliers. The new wording regarding the members of the administrative, management and supervisory bodies is not clear. Recommendation: Revert to the previous text and include 'the extent to which training is given to'. Alternatively, it should be emphasized that external training is also meant in order to prevent potential conflicts of interest.	G1	G1-2 - Actions related to business conduct	7.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The input refers to G1-3 Paragraph 6: A disclosure requirement regarding the number and nature of confirmed incidents of corruption and bribery is misleading and should be deleted. A high number of incidents seems negative but might also reflect an effective compliance management system with investigation measures in place. In addition, the disclosure requirement contradicts 1. the principle of the presumption of innocence and 2. the principle under German law that offenses do not regularly have to be reported to the authorities, but it is the company's responsibility to adequately address compliance violations within the company. There is no unified scope or definition of the term „corruption incidents", neither in the affected jurisdictions and their criminal codes, nor within the undertakings reporting this KPI. For example: does corruption only mean corruption in the public or also in the private sector? Are cases of conflicts of interests covered? Are only incidents covered with confirmed violations of criminal law or also of a violation against internal rules only? What does "confirmed" mean: indictment by a prosecutor; internally proven; internal assessment that violation is highly probable or only more likely than not? These different assessment methods will lead to confusing reported data.	G1	G1-3 - Targets related to business conduct	7.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The input refers to G1-5, AR 7 and 8 for para 16: Regarding political contributions further differentiation and explanation is needed (the purpose of a contribution as main criteria): Financial or in-kind contributions to external organizations (e.g. lobbyists, charities, think tanks or trade associations) or non-consolidated companies should only be considered, if granted with the purpose of passing it on to a relevant recipient like political parties, their elected representatives or persons seeking political office.	G1	G1-5 - Metrics related to political influence and lobbying activities	AR 7
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	The requirements of G1-5 should be clarified to affirm that the disclosure is associated with the EU and its member states in recognition of the fact that not all jurisdictions have regulatory structures akin to the EU Transparency Register and substantial investment would be required for firms to collect, track and report information from third parties that may be required given broad definitions. They also go beyond current EU Transparency Register requirements. In particular, we thought the prior paragraph 29(b)(i) should have been modified to drop the reference to "indirectly" which arguably could be seen to cover payments to trade organizations that may engage with political officials either through conferences/lunches or through direct contributions. Such activity may have little connection to material ESG issues (e.g. meeting to discuss rules for participating in local check clearing market), and the EU would still have the benefit of the EU registrations and disclosures for EU-related activity under the existing EU Transparency Register. The exposure draft does not clarify this, and we ask that this is considered further.	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Since, as noted in G1-4, this disclosure requirement has been included to support the information needs of financial market participants subject to Regulation (EU) 2019/2088, it is not directly applicable in the context of private companies, and therefore should be excluded or at least caveated to exclude private companies.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	13.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended to maintain as a voluntary disclosure to avoid unintended legal and agency implications. Requiring legal violation disclosure imposes a new, potentially serious obligation in Europe where no affirmative duty currently exists.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Reporting of this information is already required in (most) EU constituencies, and this datapoint includes requirements that are not only redundant, but that also exceed the scope of existing EU legislation, introducing new obligations not required under the Transparency Register framework.	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	For privately and in particularly family-held company this could include sensitive information and even information relating to minors in certain circumstances. While the ESRS has stated that the purpose of these included data points is to enhance transparency for investors and stakeholders, it is reasonable that the ESRS should take into account the specific perspective and context that private companies operate in to make appropriate rules for reporting that that may be distinct from those applicable to publicly listed companies. This is another one of those cases, as this data point requires the reporting of business sensitive information held by a privately-held company that is generally otherwise not subject to public disclosure. Further, this requirement improperly limits flexibility. The IFRS allows for principles-based disclosures, while ESRS imposes structured datapoints, which may not suit all governance models (especially US-based or family-owned firms). Instead, companies should be able to screen applicable categories for materiality and to limit disclosures to material items.	G1	G1-5 - Metrics related to political influence and lobbying activities	18.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended to have a disclosure focus on robust risk mitigation policies, processes, and identification of at-risk roles, not percentages. While clarifying low-risk roles, this overlooks the dynamic nature of global corporations, making a precise percentage of at-risk functions unfeasible.	G1	G1-3 - Targets related to business conduct	10. (c)
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	If these specific categories of delivery files are requested, we cannot provide any information. Mining suppliers are not sorted into categories in any way. If these specific supplier categories are required,it is not possible to provide any information - and often it is not feasible to determine whether a supplier is an SME, as no data is available for this purpose. The terms and conditions are very often specified by our suppliers or agreed upon individually -> In the case of individual agreements, there is therefore an automatic deviation from the standard.	G1	G1-6 - Metrics in relation to payment practices	20.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The wording of the objective of G1-6 is not reflected in the corresponding requirements.	G1	G1-6 - Metrics in relation to payment practices	19.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Accordingly, we would have to say whether ALL suppliers are complying with the payment terms. However, this is not possible because not all companies are managed in SAP and not all companies have their own defined payment terms – this would require time-consuming manual queries	G1	G1-6 - Metrics in relation to payment practices	20. (a)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	It is unclear to which paragraphs the AR refers to (also AR 4-6). Paragraphs 13/14 do no longer exist in the amended ESRS. Update of references/paragraphs needed.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	AR 3
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Considering the EFRAG Explanations January - May 2024 (final version,page 95), the following issues are identified: 1. It focuses solely on first-instance convictions of natural persons, including non-final decisions, leading to a lack of transparency and contradictions with the ECRIS, which only records final convictions. 2.The CSRD approach lacks transparency by mixing final and non-final convictions. A final conviction has more significance than a non-final decision. 3.Th approach fails to distinguish between the severity of convictions of board members versus employees, and it does not consider cases where the company itself is sanctioned for corruption or bribery, either through criminal proceedings or administrative fines. Relevant national registers for legal entities are disregarded by the CSRD as well. Cases where a company is sanctioned for corruption or bribery are important, as they indicate systemic issues rather than individual excesses. 4.Additionally, the reliance on information from accused individuals creates reliability issues, as court proceedings often occur years after the offense, and the employees may no longer be with the company. 5.The focus on payable fines for convictions of natural persons overlooks prison sentences (and their suspension if applicable), which are indicators of the severity of the crime.	G1	G1-4 - Metrics related to Incidents of corruption or bribery	5. (a)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	By deleting "for financai or in kind political contributions", the requirements seem to suggest that the total monetary calue of financial and in-kind political contributions for "political influence" needs to be disclosed. This in turn would increase the reporting burden for companies as it widens the defition of the metrics to be reported to general political influence , while at the same time being open for interpretation. Generally, the collection of information for this datapoint requires a lot of effort and raises legal concerns especially related to in-direct financial contributions outside of the EU, which is why we would suggest to limit the scope from "global! to "EU and Member States" or delete the datapoint. Alternatively, further clarification on the scope needed.	G1	G1-5 - Metrics related to political influence and lobbying activities	8.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Suggestion to delete this datapoint as information already disclosed in EU Transparency Register as well as in national Transparency Registers (e.g. Germany, USA) and therefore considered redundant. Additionally, a prioritization of "main topics in lobbying activities" could imply that political activities in one country could be more important or "material" than in another leading to misunderstandings with external stakeholders.	G1	G1-5 - Metrics related to political influence and lobbying activities	9.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The requirement to report on "standard payment terms" and supplier categorization presents significant practical challenges. The metric lacks clarity in international contexts and provides limited value for understanding supplier relationships. Tracking supplier categories by size would require substantial system changes, while reporting legal proceedings related to late payments without context offers little decision-useful information, especially since material cases are already covered in legal risk reporting. These requirements create unnecessary administrative burden without adding meaningful value to sustainability reporting.	G1	G1-6 - Metrics in relation to payment practices	12.
Excels	Polish Chamber of Chemical Industry	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The concept of a "function exposed to corruption" is not defined. In practice, companies often state that they do not identify such functions, leading to a lack of disclosures. More detailed guidance is needed to ensure meaningful and comparable reporting.	G1	G1 - Interaction with other ESRS	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UNESPA (Spanish Association of Insurers and Reinsurers)	Association of financial institutions	Spain			I disagree	It is necessary to clarify that business associations, when exercising their constitutional functions, shall not be regarded as engaging in lobbying activities. Therefore, in the interest of legal certainty, we would suggest incorporating the following final sentence at the end of the definition of lobbying activities, specifically in the 'Glossary' section: "Activities carried out with the objective of influencing the formulation or implementation of policy or legislation, or the decision-making processes of governments, governmental institutions, regulators, European Union institutions, bodies, offices and agencies or standard setters. Such activities include (non-exhaustive list): i. organising or participating in meetings, conferences, events; ii. contributing to/participating in public consultations, hearings or other similar initiatives; iii. organising communication campaigns, platforms, networks, grassroots initiatives; iv. preparing/commissioning policy and position papers, opinion polls, surveys, open letters, research work as per the activities covered by transparency register rules. Activities carried out by, among others, business associations in the exercise of their constitutional functions shall not be considered lobbying activities."	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	UNESPA (Spanish Association of Insurers and Reinsurers)	Association of financial institutions	Spain			I disagree	It is also recommended that the Spanish translation of 'lobbying activities', currently rendered as 'grupos de presión', be changed to 'grupos de interés', in accordance with recent national regulatory developments	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Reclaim Finance	NGO	France			I disagree	Paragraph 17 states that: "The undertaking shall briefly disclose, for lobbying activities, the main topics covered by these activities and its main positions on these, including explanations on how this interacts with its material impacts, risks and opportunities identified in its materiality assessment (See [Draft] Amended ESRS 2 IRO-2)." While this is fully relevant, it is stricking to see that no direct link is made between the lobbying activities and the climate transition plan in E1-1. Disclosures on assumptions regarding the transition plans are also required, and yet entities would not provide information on how this is reflected in their own advocacy and lobbying activities. For consistency, we therefore recommend the Efrag to require entities to report on how their lobbying activities are compatible and contribute to the achievement of their climate transition plan (in G1-5 or in E1-1).	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Reclaim Finance	NGO	France			I partially agree and partially disagree	The monetary amounts devoted to political activities beyond "political contributions" (for example through spending on a public policy department, hiring private lobbyists, organizing events..) should also be disclosed.	G1	G1-5 - Metrics related to political influence and lobbying activities	16.
Excels	Reclaim Finance	NGO	France			I disagree	The current wording do not cover the lobbying activities carried out through representative organizations. Yet we know that the bulk of lobbying activities go through these bodies and can have large consequences on policies. We would therefore recommend the mandatory disclosure of elements on how the activities of these organization is coherent with the ones of the entity and its own targets and plans.	G1	G1-5 - Metrics related to political influence and lobbying activities	17.
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: The objective of sustainability reporting prepared in accordance with the ESRS is to present fairly (see Chapter 2) the undertaking's material impacts on people and environment, as well as the material sustainability risks and opportunities (collectively referred to as 'impacts, risks and opportunities') in relation to environmental, social and governance topics. Reporting under these two perspectives constitutes the double materiality principle. An ESRS sustainability statement covers governance, strategy, policies, actions, targets and metrics for topics related to material impacts, risks and opportunities. PROPOSED: The objective of sustainability reporting prepared in accordance with the ESRS is to assist informative decision making by external and internal stakeholders of the reporting entity through establishing structural approach to fairly disclose information related to undertakings impacts, risks and opportunities on people and environment. An ESRS sustainability statement covers governance, strategy, policies, actions, targets and metrics for topics related to material impacts, risks and opportunities.	ESRS1		3
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: The undertaking shall update the conclusions of the materiality assessments conducted in the previous reporting periods to take into account changed circumstances and/or assumptions. Because of changes in its individual circumstances or in the external environment, some types of information included in its ESRS sustainability statement for prior periods might no longer be material; conversely, some types of information not previously disclosed might become material. PROPOSED: The undertaking shall review its DMA on annual basis and adjust it if needed by considering significant/critical changes in the internal and external environment. Following this regular monitoring the information presented in a Sustainability statement from previous period may be no longer material and/or new material information may be disclosed.	ESRS1		29
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: The impact materiality assessment corresponds to the identification of information that relates to the undertaking's material actual or potential, positive or negative impacts on people or the environment over the short, medium or long term. Impacts include those connected with its own operations, products, or services, including through business relationships in its upstream and downstream value chain. Business relationships are not limited to direct contractual relationships. PROPOSED: The impact materiality assessment includes established processes for identification, analyses, assessment and monitoring of undertakings social and environmental impacts covering its own operations and its value chain. Undertaking`s risk management system shall be able to identify and assess such impacts as they may be linked to significant operational, strategic, compliance and financial risks and/or opportunities. For the purpose of sustainability reporting the impacts are grouped in potential/actual negative and potential/actual positive.	ESRS1		30
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: ..... If the undertaking has taken remediation actions during the reporting period to address actual negative impacts, these actions shall not be considered when assessing the materiality of the impact. Where the impact is deemed material based on this assessment, the undertaking shall disclose the remediation actions undertaken and their expected or actual outcomes. PROPOSED: Actions taken during the reporting year to remediate material impact shall be reported, including their expected or actual outcomes.	ESRS1		34

Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: For actual negative impacts, materiality shall be based on the severity of the impact. For potential negative impacts, it shall be based on a combination of the severity and likelihood of the impact. Severity shall be based on the following factors: the scale, scope and irremediable character of the impact. In the case of a potential negative human rights impact, the severity of the impact takes precedence over its likelihood. PROPOSED: The assessment of impacts considers several factors as follows: a) for actual negative impact – scale and irremediable character of the impact (severity); b) for potential negative impact – severity and likelihood; c) for actual positive impact – scale; d) for potential positive impact – scale and likelihood.	ESRS1		31
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: The following are two examples of impacts that are connected with the undertaking: ..... PROPOSED: The following are two examples of impacts that relate to the undertakings value chain:	ESRS1		AR 6
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: The severity is assessed based on a combination of its factors, i.e. scale, scope and irremediable character. The undertaking shall also take into account the practical considerations mentioned in AR 18(b): (a)scale: how serious the negative impact is or how beneficial the positive impact is for people or the environment; (b) scope: how widespread the negative or positive impacts are. In the case of environmental impacts, the scope may be understood as the extent of environmental damage or a geographical perimeter. In the case of impacts on people, the scope may be understood as the number of people adversely affected; and c) irremediable character: whether and to what extent the negative impacts could be remediated, i.e. restoring the environment or affected people to their prior state. The severity is assessed based on a combination of its factors, i.e. scale and irremediable character. The undertaking shall also take into account the practical considerations mentioned in AR 18(b): (a) scale: Answers one or more of the following questions: how serious the negative impact is; how beneficial the positive impact is for people or the environment; how widespread the negative or positive impacts are. In the case of environmental impacts, the scale may be understood as the extent of environmental damage or a geographical perimeter. In the case of impacts on people, the scope may be understood as the number of people adversely affected; and (b) irremediable character: Answers the following questions: whether and to what extent the negative impacts could be remediated, i.e. restoring the environment or affected people to their prior state.	ESRS1		AR 7
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: (53) In such situations, the undertaking (Chapter 9.2 applies): (a) discloses under the other topic the negative material impacts or material risks together with the actions that cause them, with a cross-reference to the related topic; and (b) provides a description of how the material negative impacts or material risks are addressed under the topic to which they relate. PROPOSED: Not clear. This should be subject to undertaking`s own preferences under which topic to present the relevant information as long as there is a proper references.	ESRS1		44
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: The information reported about policies, actions, and targets shall include upstream and/or downstream value chain information only when (and to the extent that) those policies, actions and targets address material impacts, risks and opportunities in the value chain. With reference to metrics, in many cases, in particular for environmental topics for which proxies are available, the undertaking may be able to comply with the reporting requirements by using an estimate without collecting data from the actors in its upstream and downstream value chain, especially from SMEs, such as, for instance, when calculating its greenhouse gas ('GHG') Scope 3 emissions (see Chapters 7.2, 7.3 and 7.4). PROPOSED: The reported Policies, actions and targets shall include upstream and/or downstream value chain information only when (and to the extent that) the value chain is within their scope.	ESRS1		67
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				General comments: Actual negative impacts table 1)the title of column 1 to be "Material impacts" 2)the question "How to assess" from column 2 and 3 to be deleted as the information provided do not answer the question	ESRS1		APPENDIX C
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				Potential impacts table: 1)the title of column 1 to be changed to " Material potential impacts where:" 2)the question "How to assess" from column 2 and 3 to be deleted as the information provided do not answer the question 3)C1,R1 to add at the end: in the reporting year; 4)Please clarify the text in C1,R2 and R4 as currently it is not clear what is the difference between those two cases; 5)In my opinion the material potential impacts should be reported in all casas no matter whether it is remediated or not, otherwise the readers of the report will be not able to follow up the status of the impacts reported during the years. In addition, in most of the cases companies have significant inherent risks (such as potential incidents/accidents) that may lead to material impacts (such as dead, other serious injuries, environmental contamination and etc.). Usually such risks have a permanent character and cannot disappear for the next reporting periods. The undertakings should be able to report what kind of internal controls (policies, procedures, instructions and other actions) are in place in order to manage those significant inherent risks and respectively their potential impacts.	ESRS1		APPENDIX C
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: The undertaking shall state that the general requirements of ESRS 1 have been applied for the preparation of its sustainability statement with an indication either (i) that none of the provisions listed in ESRS 2 paragraph 5 apply, or (ii) of which of the provisions listed in ESRS 2 paragraph 5 have been applied, leading to the disclosure of information required in the relevant paragraphs of ESRS 1: PROPOSED: .... In ESRS 2 paragraph 4	ESRS2		5
Excels	Ascendia EOOD	Consultant (including software vendor)	Bulgaria				ACTUAL: When reporting on policies, actions and targets, the undertaking shall report relevant information, avoiding information that is boilerplate, and therefore not relevant for users for example when policies and actions have been implemented to comply with law and regulation, or when the necessary information is already provided in accordance with [Draft] Amended ESRS 2 SBM-1. PROPOSED: ..... have been implemented to comply solely with low and regulations....." Pls. take into account that companies have many HSE policies and actions relevant to this reporting but in the mean time required by low.	ESRS2		AR 28
