Survey	EARTH PBC	Consultant (including software vendor)	United States	11.	Clarifications and simplification of the Double Materiality Assessment (DMA) (ESRS 1 Chapter 3) and materiality of information as the basis for sustainability reportingRationale for the changes The Amendments have clarified the requirements in ESRS 1 Chapter 3 about materiality of information and simplified the DMA process. They are described in Lever 1 of simplification in the Basis for Conclusions (see BfC Chapter 4). Link here to access the Log of Amendments, ESRS 1, Chapter 3 if you would like to review the detailed Amendments and their rationale. The Explanatory Memorandum (EM) which accompanies the EC Omnibus proposals (page 5) identified the following objective for this lever: "[the simplification] will provide clearer instructions on how to apply the materiality principle, to ensure that undertakings only report material information and to reduce the risk that assurance service providers inadvertently encourage undertakings to report information that is not necessary or dedicate excessive resources to the materiality assessment process".Description of the changes To meet this objective, EFRAG has introduced the following changes which aim to strike a balance between simplification and the necessary robustness of the Double Materiality Assessment (DMA): A new section presenting practical considerations for the DMA has been drafted, including the option of implementing either a bottom-up or top-down approach (Chapter 3.6 of ESRS 1) More prominence has been given to materiality of information as a general filter and all the requirements are subject to it. The relationship of impacts, risks and opportunities, and topics to be reported has been clarified (ESRS 1, paragraph 2 and 22) It has been explicitly allowed to include information about non-material topics (ESRS 1, paragraph 108) if they are presented in a way that avoids obscuring material information Emphasis is put on ESRS being a fair presentation framework, to reinforce the effectiveness of the materiality principle and avoid excessive documentation effort due to a compliance and checklist approach to the list of datapoints (DP); an explicit statement of compliance with ESRS is included in (ESRS 1, Chapter 2) To avoid excessive detail in reported information, it has been clarified that all the disclosures can be produced either at topical level or at impacts, risks and opportunities (IRO) level, depending on the nature of the IROs and on how they are managed The list of topics in AR 16 (now Appendix A) has been streamlined by eliminating the most detailed sub-sub-topic level and has now an illustrative only and non-mandatory status. More emphasis has been put on the aggregation and disaggregation criteria for reporting information at the right level. Explanations have been provided with respect to the consideration of sites for the DMA and reported information, so as to avoid long lists of sites being included in the sustainability statement. Please do not comment here in "Gross versus Net" as it is covered by the next question.Question If you intend to provide feedback also on Part 3 of this questionnaire (at level of DR or paragraph), please note that by answering this question, you will not be allowed to include comments on Chapter 3 of ESRS 1 in Part 3, to avoid duplication of input. Your comments on Chapter 3 can only be provided here. Do you agree that the proposed amendments have sufficiently simplified the DMA process, reinforced the information materiality filter and have succeeded in striking an acceptable balance between simplification and robustness of the DMA? Do you agree that the wording of Chapter 3 of ESRS 1 is sufficiently simplified?	I partially agree and partially disagree	The top-down approach (ESRS 1, Chapter 3.6) represents meaningful progress. However, the amendments miss a transformative opportunity: smartphone proliferation is eliminating the fundamental barrier to accurate materiality assessment in complex value chains. Frontline workers—farmers, fishers, factory employees—are coming online globally. This enables forward-facing brands to build direct digital links with workers, bypassing intermediaries who have historically controlled information flows. The materiality paradox: Companies must assess whether forced labor or environmental destruction is material in their supply chains, yet lack reliable data to make this determination. Annual audits capture snapshots. Suppliers control audit access. Workers fear retaliation. The smartphone solution: Direct worker reporting via smartphone with GPS-tagged evidence provides the real-time data companies need for defensible materiality assessments. A CPG company recently told us they couldn't determine if forced labor was material in their palm oil supply chain until workers could report directly, bypassing plantation management. Recommendation: EFRAG should explicitly recognize that technology-enabled continuous monitoring is simplification infrastructure, not additional burden. When brands establish direct digital connections with frontline workers, they gain actual evidence for materiality assessment while reducing audit costs. This serves CSDD, EUDR, and Modern Slavery Act requirements simultaneously. The real simplification comes from better evidence systems enabling accurate materiality conclusions, not from reducing disclosure standards while leaving companies blind to their value chain realities.			

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Survey	EARTH PBC	Consultant (including software vendor)	United States	12.	New guidance in ESRS 1 on how to consider remediation, mitigation and prevention actions in assessing materiality of negative impactsRationale for the changes To address a frequent implementation question and an area of divergence in practice, new guidance has been introduced (ESRS 1 paragraphs 34 to 36 and Appendix C; Basis for Conclusions (BfC) Chapter 8) on how to consider implemented remediation, mitigation and prevention actions in the DMA (the so called "gross versus net" issue). The EFRAG SRB has prioritised the guidance on impacts, as in financial materiality there is already reporting experience which can be leveraged.Description of the changes Appendix C, which has the same authority as other parts of the Standard, illustrates how to perform the assessment, i.e. before or after the actions that have been taken and have reduced the severity of the impact. The new guidance specifies how to treat actions in DMA differentiating 'actual' from 'potential' impacts. It also differentiates the current reporting period from the future reporting periods (the latter is relevant as impacts of previous years that are material are also to be reported in the current period). For impacts that are assessed as material, the respective actions are reported (which also include policies implemented through actions). Actual impacts are assessed for materiality before the remediation actions in the reporting period when they occur, while in future periods they are not reported if fully remediated. For potential impacts, when the undertaking must maintain significant ongoing actions to contain severity and/or likelihood below the materiality level, the impact is assessed before the actions are reported. This provision has been introduced to deal with cases such as health and safety negative impacts in highly regulated industries.Key discussion points at EFRAG SRB level Some of the EFRAG SRB members consider the added guidelines excessively complex. The approach to disregard implemented actions when assessing materiality of potential impacts, if there are significant ongoing actions, has been the source of split views in the EFRAG SRB. The members that supported the inclusion of this provision considered that it would be inappropriate to conclude that due to the high level of prevention and mitigation standards in a sector, a given topic is not reported. On the contrary, other members think that this gross approach to potential impacts will result in excessive reporting.Question If you intend to provide feedback also on Part 3 of this questionnaire, please note that by answering this question, you will not be allowed to include comments on Paragraphs 34 to 36 and Appendix C of ESRS 1, in Part 3 to avoid duplication of input. Your comments on Paragraphs 34 to 36 and Appendix C of ESRS 1 can only be provided here. Do you agree that the new guidelines clarify how to consider remediation, mitigation and prevention implemented actions in the DMA, contributing to more relevant and comparable reporting?	I agree	We strongly support assessing potential impacts before mitigation actions when "significant ongoing actions" are needed (ESRS 1, paragraphs 34-36, Appendix C). This provision is essential and should be strengthened. Real-world evidence: P&I insurance clubs now require our monitoring as insurance conditions because their claims data revealed systematic worker welfare violations on vessels with certified safety management systems. Certifications reflected prevention policies on paper, not actual conditions at sea. If the fishing industry could claim "not material" due to extensive regulations, these violations would remain invisible. The compliance burden argument is backwards. Smartphone proliferation enables fishers, farmers, and factory workers to document reality in real time. When forward-facing brands build direct digital links with frontline workers: Disclosure becomes straightforward: "Here's our continuous data showing prevention works" Audit costs decrease dramatically compared to periodic verification Legal risk reduces through evidence-based materiality assessment Stakeholder trust increases from transparent, verifiable claims Companies resisting gross assessment are arguing "don't make us prove our prevention works." This increases compliance burden through stakeholder skepticism, higher audit intensity, and legal exposure when violations emerge despite net assessments. Recommendation: Strengthen Appendix C to explicitly state that continuous monitoring via direct worker reporting provides efficient gross assessment. Technology enabling brands to connect directly with frontline workers reduces compliance burden by providing real evidence of prevention effectiveness. The goal is accurate reporting backed by verifiable data, not excessive reporting based on assumptions. Earth PBC is a San Francisco-based Public Benefit Corporation that develops community-driven transparency technology, combining smartphone-based worker reporting with satellite verification (in partnership with Planet Labs PBC) across the forestry, fisheries, agriculture, and manufacturing sectors globally.			
Survey	EARTH PBC	Consultant (including software vendor)	United States	18.	Relief for lack of data quality on metrics (ESRS 1 paragraph 92) Amended ESRS have introduced the 'undue cost or effort' relief for all the elements of the reporting, from the identification of material IROs to the calculation of metrics (paragraph 89 of ESRS 1), in line with IFRS S1 and S2, extending it to all metrics. In addition, paragraph 92 of ESRS 1 has introduced a provision applicable both to metrics in own operations and in upstream and downstream value chain. This allows an undertaking to report metrics with a partial scope of calculation, when there are no reliable direct or estimated data to be used in the calculation. This relief does not exempt an undertaking from providing a disclosure, but it allows to disclose a calculation that includes only a partial scope. When using this relief, the undertaking shall disclose actions undertaken to improve the coverage of its calculation in next periods. This transparency is expected to provide sufficient incentive to improve the data quality and achieve a more complete scope in the calculation of the metrics. Accordingly, no time limit is included for the use of the relief. On this point, some EFRAG SRB members, while supporting the relief, considered it essential to include a time limit. If you intend to provide feedback also on Part 3 of this questionnaire, please note that by answering this question, you will not be allowed to include comments on paragraph 92 of ESRS 1 in Part 3 to avoid duplication of input. Your comments on paragraph 92 of ESRS 1 can only be provided here. Do you agree that the proposed relief for lack of data quality on metrics strikes an acceptable balance between providing the necessary flexibility for preparers and avoiding undue loss of information?	I partially agree and partially disagree	The relief for partial scope calculation when reliable data is unavailable (ESRS 1, paragraph 92) addresses a real problem, but the solution misses the fundamental issue: value chain data gaps exist because companies lack direct connections to frontline operations. Traditional supply chain monitoring relies on intermediaries—suppliers, subcontractors, agents—who control information flows. These intermediaries have incentives to filter or manipulate data. The result: companies genuinely cannot obtain reliable metrics for Scope 3 emissions, labor conditions, or environmental impacts. Smartphone proliferation is eliminating this structural barrier. Frontline workers—fishers documenting catch locations, farmers tracking harvest activities, factory employees reporting working hours—can now report directly to forward-facing brands via smartphone with GPS-tagged evidence. This bypasses information gatekeepers entirely. Real-world validation: P&I insurance clubs now require continuous monitoring as insurance conditions because traditional audit data proved unreliable. Direct worker reporting provides the data quality that periodic supplier questionnaires cannot deliver. The relief without time limit concern: Some EFRAG SRB members rightly worry that unlimited relief removes incentive to improve data quality. However, this assumes data quality improvement requires extensive effort. When brands establish direct digital links with frontline workers, data quality improvements happen rapidly and cost-effectively. Recommendation: EFRAG should clarify that paragraph 92 relief is intended for genuine data unavailability, not avoidable gaps. Explicitly state that technology-enabled continuous monitoring via direct worker connections represents reasonable effort to improve data quality. Companies should not claim "undue cost" for implementing smartphone-based reporting systems that cost less than traditional audit programs while delivering superior data quality. The relief should encourage rather than delay adoption of direct monitoring capabilities.			
Survey	EARTH PBC	Consultant (including software vendor)	United States	29.	SFDR and other EU datapoints in Appendix B of Amended ESRS 2 The Omnibus proposals have not changed the general objective of supporting the creation of the data infrastructure necessary for implementing the Sustainable Finance Disclosure Regulation (SFDR). Input from investors confirms the need to implement the correct flow of information from their investee. However evidence also suggests some of the Principal Adverse Indicators (PAI) are not considered relevant in practice. As part of the systematic review of the datapoints for their reduction, EFRAG has assessed the relevance of the SFDR PAIs, as well as the level of coverage of them resulting from the general datapoint reduction. Appendix 4 of the Basis for Conclusions (BfC) illustrates how the EU datapoints in Appendix B of ESRS 2 (now Appendix A of Amended ESRS 2) have been modified. The key changes for Environmental standards (ESRS E1-E5) are : (a) 8 SFDR PAI sensitive DPs have been deleted but they were either overlapping with other DPs or can be derived from other information (E1-5, para.38, 40-43; E1-6 para44, 53-55; E3-1, para 14; E3-4, para 29; E5-5 para 37 (d) and 39); (b) 1 SFDR PAI sensitive DPs in Appendix B (indicator number 12 Table #2 of Annex) was removed, following EFRAG's approach of reducing the content provisions related to PAT under topical standards. This refers to the topic of marine resources, which is not in scope of ESRS E3. The key changes for Social standards (ESRS S1-S4) are: (a) this was a consolidation exercise. Firstly, for the policies related to human rights and for the alignment with UNGP and OECD MNE Guidelines (two SFDR PAI number 9 Table #3 and Indicator number 11 Table #1 of Annex 1), eight datapoints from the four Social standards have been merged into a "human rights policy" in ESRS 2 GDPR-P, for the four affected stakeholder groups. Secondly, the indicator in relation to severe human rights cases (SFDR PAI number 14 of Table #3 and number 10 of Table #1 of Annex 1) have been merged into one and it is maintained across the four Social standards. (b) a small number of amendments on the scope has taken place for SFDR PAI Indicator 3 of Table #3 in relation to days lost. Fatalities (ESRS S1-13) has been deleted from its scope. The scope of revised human rights incidents datapoint (ESRS S1-16, S2-3, S3-3, S4-3) is now clarified. There were no changes in the ESRS G1. In conclusion, despite the general significant reduction in DPs, the coverage of SFDR PAI has been only marginally reduced and thanks to a limited number of amendments, the relevance of the corresponding information is increased. Do you agree with the way the SFDR PAI have been incorporated in the Amended ESRS? You are invited to explain the reason why you agree or disagree and to provide your suggestions for improvements or alternative simplification proposals, if any.	I agree	The streamlined approach to SFDR Principal Adverse Indicators (PAI) in Appendix A maintains necessary investor information while reducing preparer burden. However, implementation success depends on addressing the fundamental data collection challenge. The investor information gap: Asset managers tell us they need reliable PAI data but their investee companies cannot provide it. The problem is not reporting requirements—it's the absence of reliable primary data from complex value chains. Companies lack direct visibility into forced labor indicators, environmental impacts, or governance practices deep in their supply chains. Smartphone proliferation solves this systematically. When forward-facing brands build direct digital connections with frontline workers via smartphone: For Social PAIs: Workers document violations of UNGC principles, human rights incidents, gender pay gaps, and workplace accidents in real time with GPS-tagged evidence—exactly the indicators investors need (PAI 10, 11, 14 from Table 1 and Table 3). For Environmental PAIs: Fishers report IUU fishing activities, farmers document deforestation incidents, and workers track emissions from operations—providing the granular data for PAI 12, 13, 15. For Governance PAIs: Direct worker reporting reveals where policies exist on paper but violations occur in practice—the critical distinction investors need to assess actual ESG performance versus claimed performance. Real-world validation: Financial sector clients (P&I insurance clubs) now require our monitoring because it generates reliable PAI data their risk models depend on. Traditional supplier questionnaires and periodic audits could not deliver this data quality. Recommendation: EFRAG should explicitly acknowledge that technology-enabled continuous monitoring via direct worker connections is the practical pathway to reliable SFDR data generation. This serves both preparer efficiency (one monitoring system serves multiple regulatory requirements) and investor information needs (reliable primary data versus estimated or supplier-reported data).			

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Survey	Malta Institute of Accountants	Auditor	Malta	11.	Clarifications and simplification of the Double Materiality Assessment (DMA) (ESRS 1 Chapter 3) and materiality of information as the basis for sustainability reportingRationale for the changes The Amendments have clarified the requirements in ESRS 1 Chapter 3 about materiality of information and simplified the DMA process. They are described in Lever 1 of simplification in the Basis for Conclusions (see BfC Chapter 4). Link here to access the Log of Amendments, ESRS 1, Chapter 3 if you would like to review the detailed Amendments and their rationale. The Explanatory Memorandum (EM) which accompanies the EC Omnibus proposals (page 5) identified the following objective for this lever: "[the simplification] will provide clearer instructions on how to apply the materiality principle, to ensure that undertakings only report material information and to reduce the risk that assurance service providers inadvertently encourage undertakings to report information that is not necessary or dedicate excessive resources to the materiality assessment process".Description of the changes To meet this objective, EFRAG has introduced the following changes which aim to strike a balance between simplification and the necessary robustness of the Double Materiality Assessment (DMA): A new section presenting practical considerations for the DMA has been drafted, including the option of implementing either a bottom-up or top-down approach (Chapter 3.6 of ESRS 1) More prominence has been given to materiality of information as a general filter and all the requirements are subject to it. The relationship of impacts, risks and opportunities, and topics to be reported has been clarified (ESRS 1, paragraph 2 and 22) It has been explicitly allowed to include information about non-material topics (ESRS 1, paragraph 108) if they are presented in a way that avoids obscuring material information Emphasis is put on ESRS being a fair presentation framework, to reinforce the effectiveness of the materiality principle and avoid excessive documentation effort due to a compliance and checklist approach to the list of datapoints (DP); an explicit statement of compliance with ESRS is included in (ESRS 1, Chapter 2) To avoid excessive detail in reported information, it has been clarified that all the disclosures can be produced either at topical level or at impacts, risks and opportunities (IRO) level, depending on the nature of the IROs and on how they are managed The list of topics in AR 16 (now Appendix A) has been streamlined by eliminating the most detailed sub-sub-topic level and has now an illustrative only and non-mandatory status. More emphasis has been put on the aggregation and disaggregation criteria for reporting information at the right level. Explanations have been provided with respect to the consideration of sites for the DMA and reported information, so as to avoid long lists of sites being included in the sustainability statement. Please do not comment here in "Gross versus Net" as it is covered by the next question.Question If you intend to provide feedback also on Part 3 of this questionnaire (at level of DR or paragraph), please note that by answering this question, you will not be allowed to include comments on Chapter 3 of ESRS 1 in Part 3, to avoid duplication of input. Your comments on Chapter 3 can only be provided here. Do you agree that the proposed amendments have sufficiently simplified the DMA process, reinforced the information materiality filter and have succeeded in striking an acceptable balance between simplification and robustness of the DMA? Do you agree that the wording of Chapter 3 of ESRS 1 is sufficiently simplified?	I partially agree and partially disagree	We agree with the proposal that the material information should be the main aspect of the report, however, we are of the opinion that there should not be the obligation for the provision of non-material information. We would appreciate if in the text it is clearly stated as to why certain information should be reported.			
Survey	Malta Institute of Accountants	Auditor	Malta	12.	New guidance in ESRS 1 on how to consider remediation, mitigation and prevention actions in assessing materiality of negative impactsRationale for the changes To address a frequent implementation question and an area of divergence in practice, new guidance has been introduced (ESRS 1 paragraphs 34 to 36 and Appendix C; Basis for Conclusions (BfC) Chapter 8) on how to consider implemented remediation, mitigation and prevention actions in the DMA (the so called "gross versus net" issue). The EFRAG SRB has prioritised the guidance on impacts, as in financial materiality there is already reporting experience which can be leveraged.Description of the changes Appendix C, which has the same authority as other parts of the Standard, illustrates how to perform the assessment, i.e. before or after the actions that have been taken and have reduced the severity of the impact. The new guidance specifies how to treat actions in DMA differentiating 'actual' from 'potential' impacts. It also differentiates the current reporting period from the future reporting periods (the latter is relevant as impacts of previous years that are material are also to be reported in the current period). For impacts that are assessed as material, the respective actions are reported (which also include policies implemented through actions). Actual impacts are assessed for materiality before the remediation actions in the reporting period when they occur, while in future periods they are not reported if fully remediated. For potential impacts, when the undertaking must maintain significant ongoing actions to contain severity and/or likelihood below the materiality level, the impact is assessed before the actions are reported. This provision has been introduced to deal with cases such as health and safety negative impacts in highly regulated industries.Key discussion points at EFRAG SRB level Some of the EFRAG SRB members consider the added guidelines excessively complex. The approach to disregard implemented actions when assessing materiality of potential impacts, if there are significant ongoing actions, has been the source of split views in the EFRAG SRB. The members that supported the inclusion of this provision considered that it would be inappropriate to conclude that due to the high level of prevention and mitigation standards in a sector, a given topic is not reported. On the contrary, other members think that this gross approach to potential impacts will result in excessive reporting.Question If you intend to provide feedback also on Part 3 of this questionnaire, please note that by answering this question, you will not be allowed to include comments on Paragraphs 34 to 36 and Appendix C of ESRS 1, in Part 3 to avoid duplication of input. Your comments on Paragraphs 34 to 36 and Appendix C of ESRS 1 can only be provided here. Do you agree that the new guidelines clarify how to consider remediation, mitigation and prevention implemented actions in the DMA, contributing to more relevant and comparable reporting?	I partially agree and partially disagree	Clarification on the distinction between the positive impacts and the actions is ideal. Guidance as to whether risk and opportunities would apply, and guidance for risk and opportunities as a whole would be appreciated.			
Survey	Malta Institute of Accountants	Auditor	Malta	13.	Improved readability, conciseness and connectivity of ESRS Sustainability StatementsRationale for the changes Starting with the input gathered from the first-time adopters, EFRAG has introduced several changes to support the production of more readable and concise sustainability statements, that are better connected with corporate reporting as a whole. This corresponds to Lever 2 of simplification in the Basis for Conclusions (BfC) (Chapter 4).Description of the changes EFRAG has clarified the flexibility that preparers have in preparing their statements. The Amendments describe the possibility of including an 'executive summary' at the beginning of the sustainability statement and have put greater emphasis on the use of appendices to separate more detailed information from key messages. The amendments have also clarified the concept of 'connected information', discouraging fragmentation and/or repetition of information (ESRS 1, Chapter 8).Question Do you agree that these proposed Amendments, when combined with the other changes in the Amended ESRS, provide an appropriate level of flexibility to support more relevant and concise reporting, as well as to promote better connectivity with corporate reporting as a whole?	I partially agree and partially disagree	Guidance on how to prepare an Executive Summary, Appendices and sections with information material only to certain users, including how to ensure fair presentation (of IROs) and avoid greenwashing, would be ideal. With regards to the Appendices, ideally we are provided with guidance as to what information should be placed in the main body, and what information may be provided in the Appendices.			
Survey	Malta Institute of Accountants	Auditor	Malta	14.	Restructuring of the architecture and interaction between ESRS 2 and Topical Standards Rationale for the changes The Amendments have restructured the architecture of ESRS, focusing on the interaction of ESRS 2 and topical standards. They have also modified the standard-setting approach for policies, actions and targets (PAT) to adopt a more principles-based and less prescriptive approach. These Amendments are described as Lever 3 in the Basis for Conclusions (BfC) (Chapter 4). The Explanatory Memorandum (page 5) identified the following objective for this lever: simplify the structure and presentation of the Standards. Description of the changes To achieve this objective, EFRAG has implemented the following changes, which aim to strike an appropriate balance between (a) prescriptiveness of the requirements and preparation effort and (b) the users' need for relevant, faithful and comparable information: Minimum Disclosure Requirements in ESRS 2 (renamed "General Disclosure Requirements") have been simplified but retained as 'shall' disclose. A drastic reduction of 'shall' datapoints PAT has been achieved, sometimes reformulating them as Application Requirements ('ARs') to support more consistent application. Topical specifications to GOV, SBM and IRO (Appendix C of ESRS 2) have been deleted, with a few exceptions maintained as separate Disclosure Requirements in topical standards (e.g. resilience in ESRS E1). The requirement to disclose PAT for material IROs if adopted is maintained. But the requirement to disclose whether the undertaking plans to implement a PAT for material topics and timeline has been eliminated. The indication of which material topics are not covered by PAT is maintained. The amendments have improved the connectivity between the disclosure of PAT and the description of IROs (now in ESRS IRO 2) to which they relate. They have also improved the ability to disclose information at a higher aggregation level than the material IROs, if this reflects the way IROs are managed. Question Do you agree that these proposed amendments strike an appropriate balance between (1) prescriptiveness of the requirements and preparation effort from the one hand, and (2) need for relevant and comparable information from the other?	I agree				
Survey	Malta Institute of Accountants	Auditor	Malta	15.	Improved understandability, clarity and accessibility of the StandardsRationale for the changes The Amendments have reorganised the content of the requirements, clearly separating the mandatory from the non-mandatory ones, and eliminating the "may" disclose provisions, which proved to be problematic to understand. These Amendments are described as Lever 4 in the Basis for Conclusions (BfC) (Chapter 4). The Explanatory Memorandum (page 5) identified the following objective for this lever: simplify the structure and presentation of the Standards. Description of the changes To achieve this objective, EFRAG has implemented the following changes: "May disclose" datapoints have been all eliminated. All the "shall disclose" datapoints are now in the main body of the standard (no more datapoints in AR) and mandatory application requirements are relocated below the DR to which they belong (and below each Chapter in ESRS 1), covering 'how to disclose' guidelines. Language of the Standards has been improved for understandability, conciseness and consistency of ESRS. Question Please focus your considerations only on the mandatory content of the Exposure Drafts. The following question covers the Non-mandatory Illustrative Guidance ('NMIG'). If you intend also to provide feedback on Part 3, when providing your comments, please refrain from duplicating the comments that you will provide at Standard or DR level. Do you agree that these proposed amendments achieve the desired level of clarity and accessibility?	I agree				
Survey	Malta Institute of Accountants	Auditor	Malta	16.	All:16. Usefulness and status of "Non-Mandatory Illustrative Guidance" (NMIG) As a result of the simplification process, part of the mandatory content in the 2023 Delegated Act has been moved to "Non-Mandatory Illustrative Guidance" (NMIG). NMIG does not address all the existing implementation questions on each standard. It simply gathers the content that: a) was in the Delegated Act b) is now deleted; and c) contributes to the overall datapoints reduction. It contains 'how to report' guidelines (methodology) and examples of possible items to cover when disclosing in accordance with a mandatory datapoint, mainly for narrative PAT disclosures. Its content should not be understood as a list of items of information requiring justification when not reported, consistent with the fact that the previous datapoints are deleted. The legal status of the NMIG will be considered by the European Commission (EC) in due course. However, EFRAG recommends that the EC not include this content in the Delegated Act. On the one hand, NMIG contains helpful support material that may reduce the implementation questions. On the other hand, it could trigger additional efforts of analysis and/or have an ambiguous role as possible additional disclosure with entity-specific relevance if issued within the Delegated Act. You are invited to provide your comments on the purpose of NMIG, if any. You can access the NMIG at this link. Please select the NMIG you would like to comment on from the list below:	ESRS1; ESRS2; E1; E2; E3; E4; E5; S1; S2; S3; S4; G1	We are in agreement with EFRAG, and do not think that this is included in the Delegated Act – rather, it should be finalised at a later stage to ensure that the guidance is as comprehensive as possible and takes into account all the feedback received.			

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Survey	Malta Institute of Accountants	Auditor	Malta	17.	Burden reliefs and other suggested clarificationsRationale for the changes The Amendments introduced several horizontal reliefs (i.e. applicable across different requirements) that were suggested in the input gathered from preparers. They are expected to contribute substantially to the reduction in the overall reporting efforts, beyond the datapoints reduction. These Amendments are described as Lever 5 in the Basis for Conclusions (BfC) (Chapter 4). The Explanatory Memorandum did not explicitly mention the reliefs, but the letter of the EC dated 5 May 2025 recommended including those foreseen in the ISSB's IFRS sustainability disclosure standards (IFRS S1 and S2). The Explanatory Memorandum nevertheless included the following objective (page 5): [the simplification] will also make any other modifications that may be considered necessary, considering the experience of the first application of ESRS. The revision will clarify provisions that are deemed unclear. It will improve consistency with other pieces of EU legislation. Description of the changes EFRAG has implemented the following changes: The relief "undue cost or effort" has been introduced, including for the calculation of metrics. A relief for lack of data quality has been introduced for metrics (ESRS 1 Paragraph 91), allowing to report a partial scope and disclosing actions to improve the coverage in future periods. The systematic preference for direct data as input to the calculation of value chain metrics has been removed and undertakings may use direct data or estimates depending on practicability and reliability (ESRS 1, Paragraph 91). Undertakings may exclude from the calculation of metrics their activities that are not a significant driver of IROs (ESRS 1, Paragraph 90) and may exclude joint operations on which they do not have operational control when calculating environmental metrics other than climate (ESRS 1, paragraph 60). Disclosure about resilience is now limited to risks only and limited to qualitative information only (ESRS 2, Paragraph 24 and ESRS E1, Paragraph 21). When disclosing financial effects, the information on investments and plans is now limited to those that are already announced (ESRS 2, AR 16 Paragraph 23(b)). A new relief for acquisitions (disposals) of subsidiaries has been introduced (ESRS 1 Chapter 5.4) allowing to include (exclude) the subsidiary starting from the subsequent (from the beginning of the) period. From October 2024 to February 2025, several implementation issues were identified in the EFRAG ESRS Appendix dedicated to the Q&A implementation platform (Chapter of Basis for Conclusions (BfC)). These issues have now been addressed by clarifying the corresponding provisions. Following the EC representatives' recommendation, EFRAG did not include additional relief for commercial sensitive information, pending the changes of level 1 regulation, where this issue is being considered.Question EFRAG considered how to improve consistency with other pieces of regulation. Considering what can be achieved in these Amendments (as opposed to what requires modification by the other regulation) EFRAG gave priority to the SFDR regulation. Please refer to question 28 if you intend to comment on this aspect. Other selected changes to enhance consistency are described in the Log of Amendments for each standard. Please note that some of the reliefs described above go beyond the ones in IFRS S1 and S2 described in question 21 below. As interoperability with IFRS S1 and S2 is specifically addressed in question 21 should be commented upon there. Please also refrain here from comments on the options proposed for quantitative financial effects, as question 17 is specifically dealing with them. Do you agree that these proposed Amendments provide sufficient relief and strike an acceptable balance between (a) responding to the stakeholders' demands for burden reliefs and (b) preserving the transparency needed to achieve the objectives of the EU Green Deal, as well as interoperability with the ISSB's IFRS S1 and S2?	I partially agree and partially disagree	We are in agreement with the majority of the reliefs which have been introduced, particularly relief 7. Agreed with flexibility for preparers due to undue cost and effort.			
Survey	Malta Institute of Accountants	Auditor	Malta	18.	Relief for lack of data quality on metrics (ESRS 1 paragraph 92) Amended ESRS have introduced the 'undue cost or effort' relief for all the elements of the reporting, from the identification of material IROs to the calculation of metrics (paragraph 89 of ESRS 1), in line with IFRS S1 and S2, extending it to all metrics. In addition, paragraph 92 of ESRS 1 has introduced a provision applicable both to metrics in own operations and in upstream and downstream value chain. This allows an undertaking to report metrics with a partial scope of calculation, when there are no reliable direct or estimated data to be used in the calculation. This relief does not exempt an undertaking from providing a disclosure, but it allows to disclose a calculation that includes only a partial scope. When using this relief, the undertaking shall disclose actions undertaken to improve the coverage of its calculation in next periods. This transparency is expected to provide sufficient incentive to improve the data quality and achieve a more complete scope in the calculation of the metrics. Accordingly, no time limit is included for the use of the relief. On this point, some EFRAG SRB members, while supporting the relief, considered it essential to include a time limit. If you intend to provide feedback also on Part 3 of this questionnaire, please note that by answering this question, you will not be allowed to include comments on paragraph 92 of ESRS 1 in Part 3 to avoid duplication of input. Your comments on paragraph 92 of ESRS 1 can only be provided here. Do you agree that the proposed relief for lack of data quality on metrics strikes an acceptable balance between providing the necessary flexibility for preparers and avoiding undue loss of information?	I would like to skip this question and provide my feedback in Part 3	The exception may result in less useful data for the users. Ideally, companies are required to explain why they cannot provide certain data, along with the plan to be able to provide such data in the future. Not introducing a time limit could result in prolonged limited reporting.			
Survey	Malta Institute of Accountants	Auditor	Malta	19.	Relief for anticipated financial effectsRationale for the changes Preparers' feedback to the public call for input indicated that disclosing quantitative information for financial effects is particularly challenging. This includes issues of lack of mature methodologies and being commercially sensitive (refer to Basis for Conclusions (BfC) Chapter 7). Suggested solutions included the IFRS corresponding relief (IFRS S1 paragraph 37), the deletion of the requirement to report quantitative information, or to report them only on a voluntary basis. The EFRAG SRB is specifically seeking input that would support the determination of the most appropriate relief.Description of the changes The Amended ESRS currently includes two possible options, which would apply to all topics, including climate (DR E1-11): a) Option 1 requires an undertaking to disclose both qualitative and quantitative information but allows omission of quantitative information under certain conditions. Option 1 is substantially aligned with the IFRS relief, despite the fact that it includes some differences compared to it: under Option 1, as in the IFRS relief, the undertaking need not provide quantitative information when it is not able to measure separately the financial effect of a specific topic (or IRO) or when the level of uncertainty is so high that the resulting information would not be useful. Differently from the IFRS relief, Option 1 specifies that the undertaking may use the relief when there is no reasonable and supportable information derived from its business plans to be used as input in the calculation of anticipated long-term financial effects. Different from the IFRS relief, the undertaking cannot omit quantitative information when it does not have the skills, capabilities or resources to provide that quantitative information, as this part of the relief was considered not compatible with the entities that are expected to be in scope of the Amended ESRS. b) Option 2 limits the requirement to qualitative information only, and leaves companies to choose to report quantitative information on a voluntary basis, without having to meet any conditions. This option is not aligned with the treatment in IFRS S1 and S2. Some of the EFRAG SRB members noted that Option 2 would result in undue loss of information important for investors and would fail to provide the correct incentive to build more mature methodologies and reporting practices. Other members, on the contrary, supported the inclusion of Option 2.Question If you intend to provide feedback also on Part 3 of this questionnaire, please note that by answering this question, you will not be allowed to include comments on paragraph 23 of ESRS 2 in Part 3 to avoid duplication of input. Your comments on that paragraph can only be provided here. Please select from the alternatives below the one that represents your view:	I agree with Option 1				
Survey	Malta Institute of Accountants	Auditor	Malta	22.	Reduction in the number of mandatory and voluntary datapoints The Amendments have realised a substantial reduction in the number of mandatory (-57%) and voluntary (-100%) datapoints, described in the Basis for Conclusions (BfC), Appendix 3. The Explanatory Memorandum (page 6) specified that "the revision of the Delegated Act will substantially reduce the number of mandatory ESRS datapoints by (i) removing those deemed least important for general purpose sustainability reporting, (ii) prioritising quantitative datapoints over narrative text and (iii) further distinguishing between mandatory and voluntary datapoints, without undermining interoperability with global reporting standards and without prejudice to the materiality assessment of each undertaking." To achieve this objective, EFRAG undertook a systematic review of the datapoints, to eliminate the least relevant, i.e. those that are not strictly necessary to meet the disclosure objectives. Most of the deleted datapoints stem from the narrative PAT disclosures, where a less prescriptive and more principles-based approach has been implemented. Therefore, most of the deletions refer to narrative datapoints. In the context of such a systematic review, merging two distinct datapoints was not considered as a reduction. Do you agree that the proposed reduction in "shall disclose" datapoints (under materiality) strike an acceptable balance between burden reduction and preserving the information that is necessary to fulfil the objectives of the EU Green Deal?	I agree				
Survey	Malta Institute of Accountants	Auditor	Malta	25.	Emphasis on ESRS being a "fair presentation" reporting framework The Amendments clarify that ESRS is a fair presentation reporting framework, as it is for IFRS S1 and S2, with the expectation that this will support a more effective functioning of the materiality filter and reduce the check list mentality associated to the adoption of a compliance approach. Adopting fair presentation is expected to support a reduction in the unnecessary reported information and of the documentation needed to show that omitted datapoints are not material. The majority of the EFRAG SRB members consider that ESRS was already conceived as a fair presentation framework and interpret the CSRD as requiring it. A minority of the EFRAG SRB members think that the CSRD does not require fair presentation. They think that adopting fair presentation is not a simplification, due to the difficulty of exercising judgement of what is needed to fulfil the requirement, in particular for impact materiality where there are less established reporting practice. They think that the Amendments may result in increased legal risks and audit costs. Do you agree that explicitly requiring to adopt fair presentation in preparing ESRS sustainability statements will support a more effective functioning of the materiality filter, therefore enabling more relevant reporting and reducing the risk of excessive reported information?	I partially agree and partially disagree	Prior to requiring this, it would be ideal to ensure there is further guidance on how to correctly apply the principles of fair presentation.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	11.	Clarifications and simplification of the Double Materiality Assessment (DMA) (ESRS 1 Chapter 3) and materiality of information as the basis for sustainability reportingRationale for the changes The Amendments have clarified the requirements in ESRS 1 Chapter 3 about materiality of information and simplified the DMA process. They are described in Lever 1 of simplification in the Basis for Conclusions (see BfC Chapter 4). Link here to access the Log of Amendments, ESRS 1, Chapter 3 if you would like to review the detailed Amendments and their rationale. The Explanatory Memorandum (EM) which accompanies the EC Omnibus proposals (page 5) identified the following objective for this lever: "[the simplification] will provide clearer instructions on how to apply the materiality principle, to ensure that undertakings only report material information and to reduce the risk that assurance service providers inadvertently encourage undertakings to report information that is not necessary or dedicate excessive resources to the materiality assessment process".Description of the changes To meet this objective, EFRAG has introduced the following changes which aim to strike a balance between simplification and the necessary robustness of the Double Materiality Assessment (DMA): A new section presenting practical considerations for the DMA has been drafted, including the option of implementing either a bottom-up or top-down approach (Chapter 3.6 of ESRS 1) More prominence has been given to materiality of information as a general filter and all the requirements are subject to it. The relationship of impacts, risks and opportunities, and topics to be reported has been clarified (ESRS 1, paragraph 2 and 22) It has been explicitly allowed to include information about non-material topics (ESRS 1, paragraph 108) if they are presented in a way that avoids obscuring material information Emphasis is put on ESRS being a fair presentation framework, to reinforce the effectiveness of the materiality principle and avoid excessive documentation effort due to a compliance and checklist approach to the list of datapoints (DP); an explicit statement of compliance with ESRS is included in (ESRS 1, Chapter 2) To avoid excessive detail in reported information, it has been clarified that all the disclosures can be produced either at topical level or at impacts, risks and opportunities (IRO) level, depending on the nature of the IROs and on how they are managed The list of topics in AR 16 (now Appendix A) has been streamlined by eliminating the most detailed sub-sub-topic level and has now an illustrative only and non-mandatory status. More emphasis has been put on the aggregation and disaggregation criteria for reporting information at the right level. Explanations have been provided with respect to the consideration of sites for the DMA and reported information, so as to avoid long lists of sites being included in the sustainability statement. Please do not comment here in "Gross versus Net" as it is covered by the next question.Question If you intend to provide feedback also on Part 3 of this questionnaire (at level of DR or paragraph), please note that by answering this question, you will not be allowed to include comments on Chapter 3 of ESRS 1 in Part 3, to avoid duplication of input. Your comments on Chapter 3 can only be provided here. Do you agree that the proposed amendments have sufficiently simplified the DMA process, reinforced the information materiality filter and have succeeded in striking an acceptable balance between simplification and robustness of the DMA? Do you agree that the wording of Chapter 3 of ESRS 1 is sufficiently simplified?	I disagree	1.ESMA disagrees with the proposed amendment to the notion of materiality of information. Due to conceptual and drafting issues which are further explained in paragraphs 3-8 of ESMA's detailed response, the proposed amendment is unlikely to lead to simplification in practice, and it will undermine the disclosure of relevant information. ESMA also cautions against the inclusion of a new definition of "general-purpose sustainability reporting" in the way it has been proposed in the ED and without sufficient explanations as to what this notion is meant to achieve in practice. This latter aspect is further addressed in par. 9 of ESMA's detailed response.

Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	12.	New guidance in ESRS 1 on how to consider remediation, mitigation and prevention actions in assessing materiality of negative impactsRationale for the changes To address a frequent implementation question and an area of divergence in practice, new guidance has been introduced (ESRS 1 paragraphs 34 to 36 and Appendix C; Basis for Conclusions (BfC) Chapter 8) on how to consider implemented remediation, mitigation and prevention actions in the DMA (the so called "gross versus net" issue). The EFRAG SRB has prioritised the guidance on impacts, as in financial materiality there is already reporting experience which can be leveraged.Description of the changes Appendix C, which has the same authority as other parts of the Standard, illustrates how to perform the assessment, i.e. before or after the actions that have been taken and have reduced the severity of the impact. The new guidance specifies how to treat actions in DMA differentiating 'actual' from 'potential' impacts. It also differentiates the current reporting period from the future reporting periods (the latter is relevant as impacts of previous years that are material are also to be reported in the current period). For impacts that are assessed as material, the respective actions are reported (which also include policies implemented through actions). Actual impacts are assessed for materiality before the remediation actions in the reporting period when they occur, while in future periods they are not reported if fully remediated. For potential impacts, when the undertaking must maintain significant ongoing actions to contain severity and/or likelihood below the materiality level, the impact is assessed before the actions are reported. This provision has been introduced to deal with cases such as health and safety negative impacts in highly regulated industries.Key discussion points at EFRAG SRB level Some of the EFRAG SRB members consider the added guidelines excessively complex. The approach to disregard implemented actions when assessing materiality of potential impacts, if there are significant ongoing actions, has been the source of split views in the EFRAG SRB. The members that supported the inclusion of this provision considered that it would be inappropriate to conclude that due to the high level of prevention and mitigation standards in a sector, a given topic is not reported. On the contrary, other members think that this gross approach to potential impacts will result in excessive reporting.Question If you intend to provide feedback also on Part 3 of this questionnaire, please note that by answering this question, you will not be allowed to include comments on Paragraphs 34 to 36 and Appendix C of ESRS 1, in Part 3 to avoid duplication of input. Your comments on Paragraphs 34 to 36 and Appendix C of ESRS 1 can only be provided here. Do you agree that the new guidelines clarify how to consider remediation, mitigation and prevention implemented actions in the DMA, contributing to more relevant and comparable reporting?	I disagree	10.ESMA disagrees with the draft guidance provided in the proposed Amended ESRS 1 and the related appendix. ESMA believes that EFRAG should be clear in setting a core principle based on the gross approach and deal with any exceptions, application aspects, through specific guidance. As currently drafted, the guidance is too complex, which questions its value as part of the simplification exercise and may lead to confusion and unintended consequences as, for example, it remains unclear in which cases chronic impacts will be assessed as material even though they benefit from mitigation measures that reduce such impacts within an acceptable range. ESMA also stresses that the proposed guidance should take into account the implications of potentially significantly changing the required assessment methodology considering the efforts put in place by issuers who have conducted their double materiality assessment for the first reporting period. ESMA's detailed comments are available in its detailed response (paras 11-14).			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	13.	Improved readability, conciseness and connectivity of ESRS Sustainability StatementsRationale for the changes Starting with the input gathered from the first-time adopters, EFRAG has introduced several changes to support the production of more readable and concise sustainability statements, that are better connected with corporate reporting as a whole. This corresponds to Lever 2 of simplification in the Basis for Conclusions (BfC) (Chapter 4).Description of the changes EFRAG has clarified the flexibility that preparers have in preparing their statements. The Amendments describe the possibility of including an 'executive summary' at the beginning of the sustainability statement and have put greater emphasis on the use of appendices to separate more detailed information from key messages. The amendments have also clarified the concept of 'connected information', discouraging fragmentation and/or repetition of information (ESRS 1, Chapter 8).Question Do you agree that these proposed Amendments, when combined with the other changes in the Amended ESRS, provide an appropriate level of flexibility to support more relevant and concise reporting, as well as to promote better connectivity with corporate reporting as a whole?	I partially agree and partially disagree	15.ESMA partially agrees and partially disagrees with the proposed amendments, we provide detailed comments in relation to the presentation and structure of the sustainability statement in paras. 17-20 of ESMA's detailed response. 16.ESMA notes that one of the areas flagged by stakeholders with regards to the complexity in the application of ESRS related to the seemingly unnecessary granularity required by the standards in some areas of the reporting on sustainability information. Particularly, a wide divergence could be observed with regards to the level of disclosures provided by undertakings between some undertakings focusing on a granular list of IROs throughout the sustainability statement and others remaining at a higher level of aggregation, i.e. topic/sub-sub-topic level or sustainability matter. ESMA notes that the ESRS should be clear throughout the text that, in line with the CSRD, the information provided needs to enable an understanding of the IROs linked to sustainability matters and how an undertaking manages them. The preparation of the information should pursue and not compromise this ultimate objective. This does not mean the presentation of the information in the sustainability statement should necessarily be as granular as each individual IRO. The ESRS should therefore provide clear guidance both at horizontal level as well as, where necessary, at disclosure requirement-level as to how companies shall apply the aggregation and disaggregation principle in a way that balances conciseness and understandability with users' ability to understand the IROs and how undertakings manage them. See also the responses to questions 15 and 33 on this issue.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	15.	Improved understandability, clarity and accessibility of the StandardsRationale for the changes The Amendments have reorganised the content of the requirements, clearly separating the mandatory from the non-mandatory ones, and eliminating the "may" disclose provisions, which proved to be problematic to understand. These Amendments are described as Lever 4 in the Basis for Conclusions (BfC) (Chapter 4). The Explanatory Memorandum (page 5) identified the following objective for this lever: simplify the structure and presentation of the Standards. Description of the changes To achieve this objective, EFRAG has implemented the following changes: "May disclose" datapoints have been all eliminated. All the "shall disclose" datapoints are now in the main body of the standard (no more datapoints in AR) and mandatory application requirements are relocated below the DR to which they belong (and below each Chapter in ESRS 1), covering 'how to disclose' guidelines. Language of the Standards has been improved for understandability, conciseness and consistency of ESRS. Question Please focus your considerations only on the mandatory content of the Exposure Drafts. The following question covers the Non-mandatory Illustrative Guidance ('NMIG'). If you intend also to provide feedback on Part 3, when providing your comments, please refrain from duplicating the comments that you will provide at Standard or DR level. Do you agree that these proposed amendments achieve the desired level of clarity and accessibility?	I partially agree and partially disagree	21.ESMA partially agrees and partially disagrees with some of the proposed amendments aiming at improving the understandability, clarity and accessibility of the ESRS. ESMA generally supports the increased clarity between mandatory and non-mandatory requirements and the removal of most of the "may" requirements. These steps contribute to improving the overall usability of the ESRS. However, we have also identified some practical issues relating to the clarity/understandability of the proposed amendments. These issues are further explained in our detailed response (paras 22-40) and relate to: the use of the terms "shall consider", the use of reminders in topical standards relating to cross-cutting principles set out in ESRS 1, the proposed location of Application Requirements, aspects relating to the ease of navigation across the standards, clarity on the articulation between IROs and topics/sub-topics in ESRS 1 and ESRS 2 and the clarity of ESRS 1 requirements relating to group reporting vs. subsidiary reporting.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	16.	All:16. Usefulness and status of "Non-Mandatory Illustrative Guidance" (NMIG) As a result of the simplification process, part of the mandatory content in the 2023 Delegated Act has been moved to "Non-Mandatory Illustrative Guidance" (NMIG). NMIG does not address all the existing implementation questions on each standard. It simply gathers the content that: a) was in the Delegated Act b) is now deleted; and c) contributes to the overall datapoints reduction. It contains 'how to report' guidelines (methodology) and examples of possible items to cover when disclosing in accordance with a mandatory datapoint, mainly for narrative PAT disclosures. Its content should not be understood as a list of items of information requiring justification when not reported, consistent with the fact that the previous datapoints are deleted. The legal status of the NMIG will be considered by the European Commission (EC) in due course. However, EFRAG recommends that the EC not include this content in the Delegated Act. On the one hand, NMIG contains helpful support material that may reduce the implementation questions. On the other hand, it could trigger additional efforts of analysis and/or have an ambiguous role as possible additional disclosure with entity-specific relevance if issued within the Delegated Act. You are invited to provide your comments on the purpose of NMIG, if any. You can access the NMIG at this link. Please select the NMIG you would like to comment on from the list below:	ESRS1; ESRS2; E1; E2; E3; E4; E5; S1; S2; S3; S4; G1	41.ESMA partially agrees and partially disagrees with the purpose of the NMIG as, on the one hand, it has the potential to convey helpful material, but it also contains text that may be more suitable for the body of the ESRS. ESMA notes that the practical relevance of this accompanying material should not be underestimated. Corporate reporting requirements are living systems which are based on a core set of strictly mandatory requirements often accompanied by guidance materials which crystallise the experience arising from the application of the core principles-based requirements. As such, the NMIG will be a critical element of the consistent application of the requirements and this fact should be clearly acknowledged by EFRAG. 42.ESMA notes that, in some cases, the draft NMIG provides clarifications on the reading of certain ESRS and points at methodologies. These indications seem quite critical and not suitable for merely optional material. The test that the NMIG's content should pass to conclude that it should not be included in the body of the ESRS is understanding whether an undertaking can still produce disclosures that are compliant with the ESRS requirements, including the qualitative characteristics of information (and fair presentation), should that undertaking decide to ignore or apply inconsistent methodologies than those set out in the NMIG. 43.In this respect, ESMA has identified cases in the NMIG which relate to content that does not seem to pass the above-mentioned test and which should therefore be included in the body of the ESRS. For example, guidance on group reporting and subsidiary-level IROs (NMIG for ESRS 1 Par. 5 for para. 52), on the treatment of leased assets (NMIG for ESRS 1 par. NMIG 7 for para. 71) or on the different types of impacts (NMIG for ESRS 2 par. NMIG 12 para 28(a)).

Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	17.	Burden reliefs and other suggested clarificationsRationale for the changes The Amendments introduced several horizontal reliefs (i.e. applicable across different requirements) that were suggested in the input gathered from preparers. They are expected to contribute substantially to the reduction in the overall reporting efforts, beyond the datapoints reduction. These Amendments are described as Lever 5 in the Basis for Conclusions (BfC) (Chapter 4). The Explanatory Memorandum did not explicitly mention the reliefs, but the letter of the EC dated 5 May 2025 recommended including those foreseen in the ISSB's IFRS sustainability disclosure standards (IFRS S1 and S2). The Explanatory Memorandum nevertheless included the following objective (page 5): [the simplification] will also make any other modifications that may be considered necessary, considering the experience of the first application of ESRS. The revision will clarify provisions that are deemed unclear. It will improve consistency with other pieces of EU legislation. Description of the changes EFRAG has implemented the following changes: The relief "undue cost or effort" has been introduced, including for the calculation of metrics. A relief for lack of data quality has been introduced for metrics (ESRS 1 Paragraph 91), allowing to report a partial scope and disclosing actions to improve the coverage in future periods. The systematic preference for direct data as input to the calculation of value chain metrics has been removed and undertakings may use direct data or estimates depending on practicability and reliability (ESRS 1, Paragraph 91). Undertakings may exclude from the calculation of metrics their activities that are not a significant driver of IROs (ESRS 1, Paragraph 90) and may exclude joint operations on which they do not have operational control when calculating environmental metrics other than climate (ESRS 1, paragraph 60). Disclosure about resilience is now limited to risks only and limited to qualitative information only (ESRS 2, Paragraph 24 and ESRS E1, Paragraph 21). When disclosing financial effects, the information on investments and plans is now limited to those that are already announced (ESRS 2, AR 16 Paragraph 23(b)). A new relief for acquisitions (disposals) of subsidiaries has been introduced (ESRS 1 Chapter 5.4) allowing to include (exclude) the subsidiary starting from the subsequent (from the beginning of the) period. From October 2024 to February 2025, several implementation issues were identified in the EFRAG ESRS Appendix dedicated to the Q&A implementation platform (Chapter of Basis for Conclusions (BfC)). These issues have now been addressed by clarifying the corresponding provisions. Following the EC representatives' recommendation, EFRAG did not include additional relief for commercial sensitive information, pending the changes of level 1 regulation, where this issue is being considered.Question EFRAG considered how to improve consistency with other pieces of regulation. Considering what can be achieved in these Amendments (as opposed to what requires modification by the other regulation) EFRAG gave priority to the SFDR regulation. Please refer to question 28 if you intend to comment on this aspect. Other selected changes to enhance consistency are described in the Log of Amendments for each standard. Please note that some of the reliefs described above go beyond the ones in IFRS S1 and S2 described in question 21 below. As interoperability with IFRS S1 and S2 is specifically addressed in question 21 should be commented upon there. Please also refrain here from comments on the options proposed for quantitative financial effects, as question 17 is specifically dealing with them. Do you agree that these proposed Amendments provide sufficient relief and strike an acceptable balance between (a) responding to the stakeholders' demands for burden reliefs and (b) preserving the transparency needed to achieve the objectives of the EU Green Deal, as well as interoperability with the ISSB's IFRS S1 and S2?	I disagree	44.ESMA disagrees with the proposed reliefs as currently drafted as they are unlimited in time, affect own operations and do not encourage the improvement of disclosures over time. ESMA sets out arguments supporting its position and proposes possible ways to improve the proposed reliefs in its detailed response (paras. 45-53). ESMA also stands ready to discuss with EFRAG possible additional reliefs which may address burden reduction concerns while preserving investor protection and supporting the improvement of data quality and disclosure quality in the medium term.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	18.	Relief for lack of data quality on metrics (ESRS 1 paragraph 92) Amended ESRS have introduced the 'undue cost or effort' relief for all the elements of the reporting, from the identification of material IROs to the calculation of metrics (paragraph 89 of ESRS 1), in line with IFRS S1 and S2, extending it to all metrics. In addition, paragraph 92 of ESRS 1 has introduced a provision applicable both to metrics in own operations and in upstream and downstream value chain. This allows an undertaking to report metrics with a partial scope of calculation, when there are no reliable direct or estimated data to be used in the calculation. This relief does not exempt an undertaking from providing a disclosure, but it allows to disclose a calculation that includes only a partial scope. When using this relief, the undertaking shall disclose actions undertaken to improve the coverage of its calculation in next periods. This transparency is expected to provide sufficient incentive to improve the data quality and achieve a more complete scope in the calculation of the metrics. Accordingly, no time limit is included for the use of the relief. On this point, some EFRAG SRB members, while supporting the relief, considered it essential to include a time limit. If you intend to provide feedback also on Part 3 of this questionnaire, please note that by answering this question, you will not be allowed to include comments on paragraph 92 of ESRS 1 in Part 3 to avoid duplication of input. Your comments on paragraph 92 of ESRS 1 can only be provided here. Do you agree that the proposed relief for lack of data quality on metrics strikes an acceptable balance between providing the necessary flexibility for preparers and avoiding undue loss of information?	I disagree	54.ESMA disagrees with the relief in par. 92 of the proposed Amended ESRS 1. This relief would exclude joint operations for which the undertaking has no operational control from the calculation of metrics required by ESRS standards E2, E3, E4 and E5. ESMA notes that should an undertaking be exposed or give rise to material IROs through joint operations over which it has no operational control, the application of this relief should result in the sustainability statement not providing material information and a fair presentation. This would also create a disconnect compared to the reporting boundary for financial reporting. Furthermore, also in this case, this reliefs risks providing incentives for structuring opportunities. ESMA therefore does not support this proposed relief and rather suggests that EFRAG considers providing a phase-in period for undertakings to establish the necessary data collection mechanisms to enable it within a given period of time to be able to collect the necessary information.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	19.	Relief for anticipated financial effectsRationale for the changes Preparers' feedback to the public call for input indicated that disclosing quantitative information for financial effects is particularly challenging. This includes issues of lack of mature methodologies and being commercially sensitive (refer to Basis for Conclusions (BfC) Chapter 7). Suggested solutions included the IFRS corresponding relief (IFRS S1 paragraph 37), the deletion of the requirement to report quantitative information, or to report them only on a voluntary basis. The EFRAG SRB is specifically seeking input that would support the determination of the most appropriate relief.Description of the changes The Amended ESRS currently includes two possible options, which would apply to all topics, including climate (DR E1-11): a) Option 1 requires an undertaking to disclose both qualitative and quantitative information but allows omission of quantitative information under certain conditions. Option 1 is substantially aligned with the IFRS relief, despite the fact that it includes some differences compared to it: under Option 1, as in the IFRS relief, the undertaking need not provide quantitative information when it is not able to measure separately the financial effect of a specific topic (or IRO) or when the level of uncertainty is so high that the resulting information would not be useful. Differently from the IFRS relief, Option 1 specifies that the undertaking may use the relief when there is no reasonable and supportable information derived from its business plans to be used as input in the calculation of anticipated long-term financial effects. Different from the IFRS relief, the undertaking cannot omit quantitative information when it does not have the skills, capabilities or resources to provide that quantitative information, as this part of the relief was considered not compatible with the entities that are expected to be in scope of the Amended ESRS. b) Option 2 limits the requirement to qualitative information only, and leaves companies to choose to report quantitative information on a voluntary basis, without having to meet any conditions. This option is not aligned with the treatment in IFRS S1 and S2. Some of the EFRAG SRB members noted that Option 2 would result in undue loss of information important for investors and would fail to provide the correct incentive to build more mature methodologies and reporting practices. Other members, on the contrary, supported the inclusion of Option 2.Question If you intend to provide feedback also on Part 3 of this questionnaire, please note that by answering this question, you will not be allowed to include comments on paragraph 23 of ESRS 2 in Part 3 to avoid duplication of input. Your comments on that paragraph can only be provided here. Please select from the alternatives below the one that represents your view:	I agree with Option 1	55.ESMA agrees with the first option for the enhancement of the disclosures on anticipated financial effects (i.e. disclosure of quantitative information unless specific conditions are met) due to the critical importance that information on anticipated financial effects plays in decision making by investors. ESMA also notes that Option 2 would be contrary to the need – as per the Commission's mandate to EFRAG – to enhance rather than undermine the interoperability with international standards, most notably in this case the ISSB standards. ESMA notes that some of the aspects in the definition of the reliefs under Option 1 raise doubts, notably the reference to a high level of measurement uncertainty as a factor preventing an estimate from providing a faithful representation, as long as the nature of the uncertainty, the expected range, and the methodology used are disclosed. It could be argued that this provision is inconsistent with par. AR 30 of the proposed Amended ESRS 1 whereas it is stated that "a high level of measurement uncertainty would not prevent" an assumption or estimate from providing useful information or meeting the qualitative characteristics of information. ESMA acknowledges that such provision in the ED mirrors the ISSB's IFRS S1 relief, however it recommends that if such relief is ultimately retained, EFRAG provides some guidance or examples on what should be considered a 'high' level of measurement uncertainty. We provide additional comments in our reply in par. 56.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	21.	Enhanced interoperability with the ISSB's standards IFRS S1 and S2Rationale for the changes EFRAG has implemented several changes to enhance the level of interoperability with the ISSB's standards IFRS S1 and S2. These amendments are described in Lever 6 of simplification in the Basis for Conclusions (BfC) (see Appendix 6). At the same time, however, the Amendments implemented for simplification reasons affect the level of interoperability with IFRS S1 and S2, as resulting from the joint EFRAG IFRS interoperability guidelines (May 2024). For example, reliefs beyond those in IFRS S1 and S2, described above, negatively affect interoperability. One of the Explanatory Memorandum (page 5) objectives is to further enhance the already very high degree of interoperability with global sustainability reporting standards. EFRAG prioritised the interoperability with IFRS S1 and S2, following the majority input gathered in the public call for input and outreach.Description of the changes To achieve this objective, EFRAG implemented the following changes, which aim to achieve a higher level of interoperability while being compatible with the objectives of the Amendments. In line with IFRS S1, emphasis has been put on ESRS being a fair presentation framework; materiality of information is now as general filter for the reported information. To remove one of the main interoperability differences, the ESRS E1 GHG emission boundary has been replaced by the financial consolidation approach (ESRS E1 AR19), aligned with the financial control approach in the GHG protocol, while a separate disclosure based on operational control is now required (and aligned with the corresponding disclosure in the GHG protocol) only for entities with more complex ownership structures (ESRS E1, AR 20). The IFRS reliefs (undue cost or effort, disclosure of ranges for quantitative financial effects) have been implemented, with the exception of the one on omitting commercially sensitive information about opportunities (pending the outcome of Level 1 discussions), the one allowing to omit Scope 3 GHG emissions when impracticable and the one allowing to omit quantitative financial effects when the undertaking does not have the necessary skills (please note that the relief on anticipated financial effects is treated in question 20). The implementation of reliefs that go beyond the ones in IFRS S1 and S2 results in new interoperability differences (see question 16). Language for requirements that are common to ESRS and IFRS S1 and S2 has been aligned whenever possible with the one in IFRS S1 and S2, in ESRS 1, 2 and E1. The reference to SASB Standards and IFRS Industry-based Guidance as a source of possible ("may consider") disclosure when reporting entity-specific sector information is now a permanent feature (before it was temporary, i.e. until the issuance of ESRS sector standards). The datapoint reduction resulted in the elimination of 7 "shall" datapoints aligned with ISSB standards described in Basis for Conclusions (BfC) (Chapter4). Several changes have been introduced to further advance interoperability in ESRS E1 (Basis for Conclusions (BfC), Chapter 4). Question Do you agree that these proposed Amendments achieve an appropriate balance between increasing interoperability and meeting the simplification objectives?	I disagree	57.ESMA disagrees that the proposed amendments achieve an appropriate balance between increasing interoperability and meeting the simplification objectives. While the ED increased interoperability with IFRS S-standards in some respects, ESMA believes that the areas of possible departure from the ISSB standards are so severe that they would undermine the overall interoperability for reasons that are unrelated to the specificities of EU policy objectives and which are likely to result in additional costs for undertakings. We provide additional comments in our reply in paras. 58-60.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	22.	Reduction in the number of mandatory and voluntary datapoints The Amendments have realised a substantial reduction in the number of mandatory (-57%) and voluntary (-100%) datapoints, described in the Basis for Conclusions (BfC), Appendix 3. The Explanatory Memorandum (page 6) specified that "the revision of the Delegated Act will substantially reduce the number of mandatory ESRS datapoints by (i) removing those deemed least important for general purpose sustainability reporting, (ii) prioritising quantitative datapoints over narrative text and (iii) further distinguishing between mandatory and voluntary datapoints, without undermining interoperability with global reporting standards and without prejudice to the materiality assessment of each undertaking." To achieve this objective, EFRAG undertook a systematic review of the datapoints, to eliminate the least relevant, i.e. those that are not strictly necessary to meet the disclosure objectives. Most of the deleted datapoints stem from the narrative PAT disclosures, where a less prescriptive and more principles-based approach has been implemented. Therefore, most of the deletions refer to narrative datapoints. In the context of such a systematic review, merging two distinct datapoints was not considered as a reduction. Do you agree that the proposed reduction in "shall disclose" datapoints (under materiality) strike an acceptable balance between burden reduction and preserving the information that is necessary to fulfil the objectives of the EU Green Deal?	I believe some of the deleted content should be maintained (please specify in the comments by indicating the relevant paragraph in the standard)				
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	22.ESRS2	Comments on deleted datapoints in ESRS 2	I believe some of the deleted content should be maintained (please specify in the comments by indicating the relevant paragraph in the standard)	This question was selected by mistake but it is not possible to de-select it, so please disregard the response to this question.

Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	25.	Emphasis on ESRS being a "fair presentation" reporting framework The Amendments clarify that ESRS is a fair presentation reporting framework, as it is for IFRS S1 and S2, with the expectation that this will support a more effective functioning of the materiality filter and reduce the check list mentality associated to the adoption of a compliance approach. Adopting fair presentation is expected to support a reduction in the unnecessary reported information and of the documentation needed to show that omitted datapoints are not material. The majority of the EFRAG SRB members consider that ESRS was already conceived as a fair presentation framework and interpret the CSRD as requiring it. A minority of the EFRAG SRB members think that the CSRD does not require fair presentation. They think that adopting fair presentation is not a simplification, due to the difficulty of exercising judgement of what is needed to fulfil the requirement, in particular for impact materiality where there are less established reporting practice. They think that the Amendments may result in increased legal risks and audit costs. Do you agree that explicitly requiring to adopt fair presentation in preparing ESRS sustainability statements will support a more effective functioning of the materiality filter, therefore enabling more relevant reporting and reducing the risk of excessive reported information?	I agree	61.ESMA agrees with the proposed inclusion of the fair presentation principle but recommends that EFRAG considers supporting the application of this principle during a transitional period to cater for any application issues that may arise, especially in connection with the impact materiality assessment. ESMA's detailed response (paras. 62-70) provide the specific arguments underlying ESMA's position and its proposed approach.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	26.	Exception for Financial Institutions' Absolute climate reduction Targets One of the implementation challenges noted by financial institutions relates to the requirement in ESRS E1 paragraph 26(a). This requires, when the undertaking has adopted GHG emissions intensity targets in conjunction with AR12 ("when only setting intensity targets"), to disclose also the associated absolute values" (refer also to Basis for Conclusions (BfC) Chapter 8). EFRAG SRB and SR TEG discussed whether an exception would be needed for insurance, banking and asset management sectors, but they decided that it would be appropriate to receive specific feedback before concluding. Those that support the exception argue that this information is not useful. They think that while for fossil fuel sectors gradual de-commissioning is foreseen, emphasising the role of absolute targets for lenders and investors in all sectors would provide the wrong incentive, as high-emission sectors are those in need of transition financing. They also consider that estimating the absolute targets would require multiple assumptions (such as about the composition of the portfolios, the production capacity, the market shares and the level of emission intensity), making results unreliable and thus not leading to meaningful disclosures. Those who oppose this exception note that complex estimates are common to all sectors. They also note also that both the information types of intensity and absolute targets are needed for a proper understanding of the undertaking's progress on climate and banks are no exception in this case. Intensity targets, while capturing efficiency, may mask rising emission levels. Absolute targets capture the total impact but fail to take into account the effect of business growth. They finally note that an exception only for financial institutions would result in an unlevel playing position for the other sectors.	I disagree that financial institutions should be exempted from disclosing climate absolute GHG emission values targets when they have only set intensity targets	71.ESMA disagrees that financial institutions (insurance, banking and asset management sectors) should be exempted from disclosing climate absolute GHG emission values targets when they have only set intensity targets. 72.Regarding the argument that high emission sectors are in need of transition financing, ESMA's view is that absolute values would not be disclosed in isolation but together with the intensity targets the financial institution has set, leaving full possibility to explain its strategy and demonstrate how it steers its portfolio towards the actors of the real economy having made credible commitments. 73.Regarding the multiple assumptions and high uncertainty attached to translating intensity targets into absolute values, ESMA acknowledges that the financial data necessary for financial institutions to calculate their share of emissions may evolve in ways that are unrelated to the GHG emissions of their counterparties, and that projecting multiple financial ratios is a challenge, especially for banks. It can be argued however that such projections are at the core of their overall risk management processes.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	29.	SFDR and other EU datapoints in Appendix B of Amended ESRS 2 The Omnibus proposals have not changed the general objective of supporting the creation of the data infrastructure necessary for implementing the Sustainable Finance Disclosure Regulation (SFDR). Input from investors confirms the need to implement the correct flow of information from their investee. However evidence also suggests some of the Principal Adverse Indicators (PAI) are not considered relevant in practice. As part of the systematic review of the datapoints for their reduction, EFRAG has assessed the relevance of the SFDR PAIs, as well as the level of coverage of them resulting from the general datapoint reduction. Appendix 4 of the Basis for Conclusions (BfC) illustrates how the EU datapoints in Appendix B of ESRS 2 (now Appendix A of Amended ESRS 2) have been modified. The key changes for Environmental standards (ESRS E1-E5) are : (a) 8 SFDR PAI sensitive DPs have been deleted but they were either overlapping with other DPs or can be derived from other information (E1-5, para.38, 40-43; E1-6 para44, 53-55; E3-1, para 14; E3-4, para 29; E5-5 para 37 (d) and 39); (b) 1 SFDR PAI sensitive DPs in Appendix B (indicator number 12 Table #2 of Annex) was removed, following EFRAG's approach of reducing the content provisions related to PAT under topical standards. This refers to the topic of marine resources, which is not in scope of ESRS E3. The key changes for Social standards (ESRS S1-S4) are: (a) this was a consolidation exercise. Firstly, for the policies related to human rights and for the alignment with UNGP and OECD MNE Guidelines (two SFDR PAI number 9 Table #3 and Indicator number 11 Table #1 of Annex 1), eight datapoints from the four Social standards have been merged into a "human rights policy" in ESRS 2 GDPR-P, for the four affected stakeholder groups. Secondly, the indicator in relation to severe human rights cases (SFDR PAI number 14 of Table #3 and number 10 of Table #1 of Annex 1) have been merged into one and it is maintained across the four Social standards. (b) a small number of amendments on the scope has taken place for SFDR PAI Indicator 3 of Table #3 in relation to days lost. Fatalities (ESRS S1-13) has been deleted from its scope. The scope of revised human rights incidents datapoint (ESRS S1-16, S2-3, S3-3, S4-3) is now clarified. There were no changes in the ESRS G1. In conclusion, despite the general significant reduction in DPs, the coverage of SFDR PAI has been only marginally reduced and thanks to a limited number of amendments, the relevance of the corresponding information is increased. Do you agree with the way the SFDR PAI have been incorporated in the Amended ESRS? You are invited to explain the reason why you agree or disagree and to provide your suggestions for improvements or alternative simplification proposals, if any.	I partially agree and partially disagree	74.ESMA partially agrees and partially disagrees with the proposed amendments to datapoints in ESRS related to EU legislation. ESMA, in particular, has assessed the datapoints relating to the SFDR PAI and the indicators relating to the Benchmark Regulation (BMR). In general, we found that most of the proposed amendments preserve the data collected to fulfil SFDR PAI and BMR indicators, however it can be noted that in some cases the burden is shifted from undertakings to users of the information who will then have to compute some of the KPIs or retrieve them based on other datapoints or in other cases the level of detail on the disclosures is reduced. 75.One notable exception to this overall prudent approach that EFRAG has taken is the proposed amendment to the transition plan disclosures in ESRS E1-1 to no longer include a datapoint about whether the undertaking is excluded from Paris-aligned Benchmarks (PABs). In the Basis for Conclusions to the ED, EFRAG provides a somewhat contradictory explanation for this deletion indicating that issuers found it difficult to produce this information, but that users can retrieve it elsewhere from published information of the issuer. ESMA disagrees with the conclusion that individual issuers do not have all the information necessary to conclude whether or not they meet the exclusion criteria from PABs and that, on the contrary, users of the sustainability statement would be in a position to make this assessment. In addition, ESMA notes that this datapoint is currently required in the Commission recommendation on the VSME (disclosure requirement C8). Consequently, it seems incoherent to not require large companies in the ESRS to provide this information, while SMEs would be required to do so, if they use the VSME standard. ESMA therefore recommends that EFRAG carefully assesses whether to retain this datapoint.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	33.ESRS1.	ESRS 1:33. Overall feedback per standard The 12 ESRS Standards have been simplified. The Glossary (Annex II to the 2023 ESRS Delegated Act) has been amended to reflect the changes in the Standards. This includes the reduction of datapoints, the clarification of several provisions that created implementation issues, the enhancement of readability and streamlining of their structure and content. Amendments to the 12 Standards have been designed and implemented to achieve a substantial reduction in reporting efforts, while maintaining the core content that is needed to meet the objectives of the European Green Deal. Please note the following requirements that were not changed in the Amended ESRS as recommended by the EC representatives, as they are subject to ongoing developments on level 1 regulation: 1. Definition of value chain for financial institutions (ESRS 1); 2. Exemption from consolidating subsidiaries by undertakings that are financial holdings (ESRS 1); 3. Relief for omission of confidential/sensitive information (ESRS 1); 4. Phasing-in provisions (ESRS 1); 5. Clarify the meaning of '"compatibility with 1.5 degrees'" for the Transition Plans disclosure (ESRS E1). In this question you are allowed to provide your overall opinion on the level of simplifications achieved per each standard. You can choose to reply to one or more of the Standards. If you intend to comment also at level of single DR in Part 3 of this questionnaire, you are kindly invited not to repeat the same content twice (here and in Part 3). You can access the Exposure Drafts of the Revised ESRS and the amended Glossary at this link. In case you would like to see the rationale behind the amendments, you can access the Log of Amendments and the markup of the Annex II (Glossary) at this link.Do you agree that the proposed Amended ESRS strikes an appropriate balance between the need for significant simplification and meeting the core objectives of the European Green Deal?	I partially agree and partially disagree	76.ESMA partially agrees and partially disagrees that the proposed revisions to ESRS 1 strike the right balance between the need for significant simplification and meeting the core objectives of the EU Green Deal. Throughout our response in specific questions, we have indicated areas of the standard that would require further attention, in addition to those comments we also provide some additional critical comments at disclosure requirement or paragraph level, which will be reflected in the Section 3 of the EFRAG questionnaire. 77.Regarding transition plans, ESMA suggests to include in ESRS 1 clarifications on the concept of transition plan as it is used in the ESRS (E1 and E4), including a definition, a clarification of the differences between a transition plan and an action plan, an explanation of how the related disclosures fit into the logic of the overarching structure of the ESRS (description of the IROs and of how they are managed through policies, actions and targets) and elements regarding the minimum level of information expected (acknowledging that this will depend on the maturity of the topic covered). 78.In this respect, ESMA cautions against the inclusion of ambiguous wording to the effect that undertakings would not be required to "disclose all internal information used to manage the transition plan" (AR 2 of proposed Amended ESRS E1). The reporting standards should be more specific as to what information is not expected to be provided. ESMA also questions the limitations introduced in par. 12 of Amended ESRS E4 ("when it has in place and has made public a biodiversity and ecosystems transition plan"). While agreeing that the level of details in the disclosures should be lower for biodiversity, owing to the lower level of maturity for this topic, the circumstances for making the disclosure should not be different.

I partially agree and partially disagree	82.Appendix A of ESRS 1: ESMA suggests to specifically address marine resources in one of the opening paragraphs of Appendix A. ESMA concurs with the ED's approach to clarify the topical scope of E3 as covering water (including marine water) only, also noting that the objectives of E2, E3, E4 and E5 all include references to the specific aspects of the marine environment the respective topic covers. This approach sustains a clearer structure and reduces duplication of disclosures. As the CSRD however explicitly includes marine resources in the environmental factors to be covered by the ESRS (Article 29b par. 2 a), an explanation of how the different related aspects are covered in the environmental standards would be relevant. 83.In addition, analysis of the 2025 reporting exercise showed that cybersecurity was often included in the sustainability statements as an entity-specific topic. ESMA suggests that the opportunity to include cybersecurity as a specific sub-topic to G1 in Appendix A of ESRS 1 could be explored. As explained in par. 461 of the Basis for Conclusions to the ED, cybersecurity is not addressed by the CSRD, nevertheless the inclusion of this sub-topic in the ESRS would not seem inconsistent with the CSRD requirements. In addition, or as an alternative, guidance on how cybersecurity, or more broadly, data and use of AI issues should be reported in the existing framework (also noting the S4 subtopic on privacy) could be included in NMIG to foster common reporting practice and increase comparability.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	33.E_5.	ESRS E5:33. Overall feedback per standard The 12 ESRS Standards have been simplified. The Glossary (Annex II to the 2023 ESRS Delegated Act) has been amended to reflect the changes in the Standards. This includes the reduction of datapoints, the clarification of several provisions that created implementation issues, the enhancement of readability and streamlining of their structure and content. I partially agree and partially disagree	115.ESMA partially agrees and partially disagrees that the proposed revisions to ESRS S1 strike the right balance between the need for significant simplification and meeting the core objectives of the EU Green Deal. ESMA observes that EFRAG has significantly simplified the topical social standards by trimming down the narrative disclosures, reducing the scope of application of disclosure requirements, merging disclosure requirements / data points and cutting back the application requirements. The topical social standards that remain still appear to address the social and human rights factors which are required by CSRD Article 29b(2)(b). We provide some critical comments at disclosure requirement or paragraph level below. These comments will be reflected in the Section 3 of the EFRAG questionnaire. 121.S1 and S2: Lastly as regards the topical social standards, ESMA suggests it would be beneficial to clarify how to treat franchisees, i.e., whether they are captured under S1 as non-employees or under S2 as workers in the value chain.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	33.G_1.	ESRS G1:33. Overall feedback per standard The 12 ESRS Standards have been simplified. The Glossary (Annex II to the 2023 ESRS Delegated Act) has been amended to reflect the changes in the Standards. This includes the reduction of datapoints, the clarification of several provisions that created implementation issues, the enhancement of readability and streamlining of their structure and content. Amendments to the 12 Standards have been designed and implemented to achieve a substantial reduction in reporting efforts, while maintaining the core content that is needed to meet the objectives of the European Green Deal. I partially agree and partially disagree	122.ESMA partially agrees and partially disagrees that the proposed revisions to ESRS G1 strike the right balance between the need for significant simplification and meeting the core objectives of the EU Green Deal. ESMA welcomes the clear structure for Policies, Actions and Targets which has been introduced in G1, similar to the one observed in other topical standards. However, ESMA would like to flag that par. 6 of the amended ESRS G1 requires disclosing the number and nature of confirmed incidents of corruption or bribery that occurred during the year (in addition to the number of convictions required under par. 5). ESMA suggests clarifying the definition of a "confirmed incident" in the glossary as the interpretation of this term may otherwise vary from one company to another making the information difficult to compare. Should this concept remain vague, divergence in practice may be so significant to suggest that this datapoint should not be required until its disclosure can lead to comparable information.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	34.	Any other comments Please provide here any other comments on the 12 EDs or on the Glossary		82.Appendix A of ESRS 1: ESMA suggests to specifically address marine resources in one of the opening paragraphs of Appendix A. ESMA concurs with the ED's approach to clarify the topical scope of E3 as covering water (including marine water) only, also noting that the objectives of E2, E3, E4 and E5 all include references to the specific aspects of the marine environment the respective topic covers. This approach sustains a clearer structure and reduces duplication of disclosures. As the CSRD however explicitly includes marine resources in the environmental factors to be covered by the ESRS (Article 29b par. 2 a), an explanation of how the different related aspects are covered in the environmental standards would be relevant. 83.In addition, analysis of the 2025 reporting exercise showed that cybersecurity was often included in the sustainability statements as an entity-specific topic. ESMA suggests that the opportunity to include cybersecurity as a specific sub-topic to G1 in Appendix A of ESRS 1 could be explored. As explained in par. 461 of the Basis for Conclusions to the ED, cybersecurity is not addressed by the CSRD, nevertheless the inclusion of this sub-topic in the ESRS would not seem inconsistent with the CSRD requirements. In addition, or as an alternative, guidance on how cybersecurity, or more broadly, data and use of AI issues should be reported in the existing framework (also noting the S4 subtopic on privacy) could be included in NMIG to foster common reporting practice and increase comparability.			
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	35.ESRS2_BP-1.	Do you agree with the amendments of this chapter?	I partially agree and partially disagree	85.BP-1: The obligation to provide the list of exempted subsidiaries covered in the consolidated statement has been removed from the standard. As this is a requirement from the CSRD, as well as relevant information for investors, ESMA recommends this datapoint to be re-instated.	ESRS2	BP-1 - Basis for the preparation of the sustainability statement	
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	35.ESRS2_IRO-1.	Do you agree with the amendments of this chapter?	I partially agree and partially disagree	86.BP-2 and IRO-1: In line with the other instances where more flexibility on presentation was introduced in the revised ESRS, ESMA suggests allowing disclosure in the relevant topical sections, rather than in the General information section for the relevant BP-2 and IRO-1 datapoints. Such increased flexibility should be accompanied with the same requirement used elsewhere to disclose a summary statement in ESRS 2.	ESRS2	IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	35.ESRS2_IRO-2.	Do you agree with the amendments of this chapter?	I partially agree and partially disagree	94.There is inherent flexibility in the materiality assessment process on the granularity and the setting of thresholds and ESMA sees the resulting granularity of IROs as a matter of practice which will most likely converge in the medium term. Having an additional flexibility on the description of the IROs risks undermining the transparency of the materiality assessment process and could lead to inconsistencies with the objective of sustainability reporting as expressed in ESRS 1 par. 6 "to present fairly the undertaking's material impacts on people and environment, as well as the material sustainability risks and opportunities". As a consequence, ESMA recommends having clear limitations to the level of aggregation allowed in par. 28 related disclosures." "95.In addition, considering the increased flexibilities in grouping of IROs and presentation, ESMA thinks that the IROs should be clearly disclosed as related to one or several ESRS sub-topics, where relevant, or topics or signposted as related to entity-specific disclosures as part of their description. This could be part of the table proposed in AR 25. ESMA would be in favour of this table being a mandatory requirement rather than a voluntary one. See also the responses to questions 13 and 15 on this issue." "96.IRO-2 par. 28 e: Regarding the table of EU datapoints, an option to refer to the datapoint as "non applicable" in addition to "non material" could be introduced, as it would fit better with some of the disclosures (e.g., SBM-1 par 17 c) and was used by some Wave 1 undertakings in their 2025 disclosures. The circumstances in which these different notions should be used could be clarified in an Application Requirement.	ESRS2	IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	35.ESRS2_GDR-PAMT.	Do you agree with the amendments of this chapter?	I partially agree and partially disagree	101.Finally, ESMA stresses the fact that the disclosures on policies, actions, targets and metrics should enable users of the sustainability statements to understand whether and, if so, how IROs were managed and any associated targets/metrics and which actions have been taken, planned (or not taken) and their effectiveness to address the pre-defined policy objectives. Whenever an undertaking has only partially addressed one or more of these information elements, the user of the sustainability statement should be able to understand this fact and be able to determine how well the material IROs are being managed by the undertaking. ESMA therefore recommends that the general requirements proposed in paragraphs 29-32 are clarified in this spirit to specify that the objective of policies, actions, targets and metrics remains to shed light on the material IROs and their management and that this objective can be fulfilled based on the aggregation and disaggregation requirements in ESRS 1.	ESRS2	General Disclosure Requirements for Policies, Actions, Metrics and Targets	
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	35.E1-6.	Do you agree with the amendments of this chapter?	I partially agree and partially disagree	109.E1-6: ESMA notes the point made in the Basis for Conclusions (par. 255) regarding the increased flexibility in reporting targets, that may result in less comparability and information of users (see also our comments in Question 33 in relation to ESRS 1). ESMA is concerned that when put together, these flexibilities (removing the requirement to disclose a target for 2030, the normalising of baseline values and the requirement to update the base year every 5 years after 2030) will make it more difficult for users, including investors, to compare or aggregate the targets, could increase greenwashing and more generally question the overall consistency with the Green Deal objectives. 110.Regarding decarbonisation levers, the overall quantitative contributions are no longer required to be disclosed and only appear as a voluntary presentation provision (AR14). ESMA thinks it is key for the credibility of the transition plans to keep a mandatory disclosure of these quantitative contributions, which could be included in E1-1 par. 14 a.	E1	Disclosure Requirement E1-6 - Targets related to climate change	
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	35.E1-8.	Do you agree with the amendments of this chapter?	I partially agree and partially disagree	111.E1-8: Regarding the disclosure of GHG emissions in E1-8, ESMA welcomes the exclusion of scope 3 emissions from the relief on metrics introduced in ESRS 1. ESMA would favour keeping the use of the table in AR 27 as mandatory rather than voluntary, as tables generally increase comparability.	E1	Disclosure Requirement E1-8 - Gross Scopes 1, 2, 3 emissions	
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	35.E1-9.	Do you agree with the amendments of this chapter?	I partially agree and partially disagree	112.E1-9: ESMA's view is that the concept of GHG neutrality claim (par. 37) should be defined in the Glossary, where it should be specified that the concept covers all types of claims, including neutrality targets. 113.ESMA also regrets the removal of all reference to net-zero targets from the standard. Such targets are widely used by issuers in some constituencies where supervisors could note improved disclosures and reduced instances of greenwashing in the 2025 sustainability statements. While ESMA agrees that a specific disclosure on how residual emissions will be addressed poses reporting challenges and should be removed at this stage, the concept of net-zero target itself should be defined and disclosure, where applicable, re-introduced, for instance through broadening par. 37. The definition of net-zero targets should clarify that all types of removals (removals in the value chain, as well as carbon credits of the removal type) are allowed for the neutralisation of residual emissions step.	E1	Disclosure Requirement E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	
Survey	European Securities and Markets Authority (ESMA)	European supervisory authority	France	35.S1-8.	Do you agree with the amendments of this chapter?	I partially agree and partially disagree	119.S1-8: ESMA believes the deletion of the age distribution of a company's employees is problematic as this is an important information for investors. ESMA therefore encourages EFRAG to reinsert age distribution in S1-8. ESMA also recommends that when an undertaking decides to depart from the definition of 'top management' provided in the ESRS, it shall also disclose that definition.	S1	Disclosure Requirement S1-8 - Diversity metrics	
Excels	ASD					I partially agree and partially disagree	Revised CSRD is inconsistent with proposal of revised CS3D, which limits value chain to Tier 1. Guidance on risk-based approach, to ensure that efforts are focused on most severe risks, should be developed in consultation with the industry and be consistent with CS3D obligations. Anyway, proposed wording relating to the key reliefs such as the request to provide "reasonable and supportable information that is available without undue cost or effort" could be used in the context of the supply chain and shows some progress. It could nonetheless be further improved, for instance maybe by taking into account the capacity of companies to influence (or not) their suppliers when it comes to sustainability matters and related information gathering. This could duly supplement the notion of "undue cost or effort".	ESRS1	ESRS 1 - Objective	1.
Excels	ASD					I partially agree and partially disagree	We understand that "relief for omission of confidential/sensitive information" is not addressed in the EFRAG's proposal as it is under discussion for possible ammendments in the level 1 legistation (Content Directive). However, consistency between the potential new provisions of the Content Directive and the revised ESRS need to be secured. We consider that, although there is a very restrictive relief related to commercial position, its implementation depends on Member States. This clearly makes complex and prevents consistency across Member States, and therefore companies. For Defence, note that the Commission Notice ref C(2025) 3800/3 paragraph 3.2.5. adresses the issue, including a mention of auditors. However, this Notice - part of the Defence Readiness Omnibus - is not a legislation and its wording remains subject to interpretation by auditors.	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	98.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ASD					I agree	We called to make exemptions possible for small subisdiaries from the scope of reporting (in consistency with current First Simplification Omnibus proposal, which exempts from CSRD reporting undertakings with less than 1,000 employees). Therefore, we welcome EFRAG proposed change.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	ASD					I partially agree and partially disagree	For negative impacts, the new proposed approach as outlined in paragraphs 34 and 35 of ESRS 1 seems more balanced, provides more flexibility and explains how and when companies can consider their mitigation and prevention measures when assessing the materiality/severity of a negative impact (potential), but definitions and harmonisation of wording are needed. However: 1. The tables in Annex C do not clearly illustrate the EFRAG simplifications induced in paragraphs 34 and 35 (tables to be removed or at least moved to the non-mandatory illustrative guidance). 2. QC 8 (addressing gross/net concepts) remains in revised ESRS, and creates a lot of confusion. It is the only occurrence of gross vs net and must be removed. 3. Positive impacts are addressed in paragraph 36, but principles to follow are not clear, especially when compared to paragraphs 34 and 35 related to negative impacts. Wording related to positive impact must be improved accordingly.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	ASD					I partially agree and partially disagree	Positive move towards simplifiation, though this section remains quite complicated and long. Therefore, further streamline and simplify double materiality process to make it easier to comply with, and easier to audit. To this end, develop dialogue with industry and auditors.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	24.
Excels	ASD					I disagree	Make clear that undertakings' specific characteristics shall prevail on sectoral trend with respect to double materiality assessment.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	24.
Excels	ASD					I partially agree and partially disagree	Changes are considered as rather positive, especially regarding the use of appendixes. However, paragraph 105 still imposes a structure in 4 parts, which does not allow reporting of entity specific disclosures in a specific part (not alongside environment, social or governance) for entity specific topics which are not related to E, S or G. An example is sovereignty, which is a prerequisite to all ESG goals and should be presented separately and not only at the level of an appendix to one of the three pillars.	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	105.
Excels	ASD					I disagree	The limited possibility of using incorporation by reference causes a further burden on the financial statements, which complexity already increased compared to the previous years, due to the large number of datapoints in the ESRS. Remove the strict criteria (envisaged by ESRS 1 - paragraph 9.3 - datapoint 118) that documents need to comply with, in order to be eligible for "incorporation by reference" of information. This to avoid duplication of information published by companies, and to reduce the page numbers of Annual Reports.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	118.
Excels	ASD					I disagree	Replace the "first 3 years" by "3 years after the first year of mandatory reporting for wave 2 and wave 3 undertakings" to ensure a level playing field.	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	122.
Excels	ASD					I partially agree and partially disagree	We welcome the benefits of the Quick Fix Directive that provided wave 1 companies some relief linked to the phased in requirements. However, the additional timing granted to wave 2 and wave 3 companies still penalise wave 1 reporters. If such phased in requirements do not seem indispensable for the next reporting exercises, they should just be removed, also to ensure a level playing field.	ESRS1	ESRS 1 - 10.3 Transitional provision: List of Disclosure Requirements that are phased in	127.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Should paragraph 19 refer to paragraph 18 or specifically to 18a? On the one hand we have "Fair presentation" and on the other "Faithful representation" (a prerequisite). But what does achieving "Faithful presentation" mean? It seems to be a mix of the two? Should it read "19. To achieve fair presentation,..."?	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	This part should be in a separate AR as it does not address aggregation as such: "Information may also be obscured as a result of material information being hidden by immaterial information." Perhaps it could be connected to the new para. 108?	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 25
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	S1/S2: The topic "Water and sanitation" should also be applicable S1 not only S2. As a company needs to make sure employees (for example female employees during their period) have access to water and sanitation, this topic should also apply to S1 and not only to S2. We recently had a case in Stockholm Sweden where a company providing cosmetic services in a shopping mall - at a stand in the middle of the mall - did not allow for employees leaving the stand unattended, and as they worked alone for long periods of time they could therefor not go to the bathroom at the other end of the mall.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	9.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	G1: Merge protection of whistle-blowers into anti-corruption and bribery, but keep separate from Culture as they cover legal requirements and not set of values and beliefs expressing goals. G1: Keep Animal welfare a separate topic, as it is not only a bout values and beliefs expressing goals but about protecting living creatures. The topic is especially important for agriculture, food and lether industries, and influences consumer choices (and even more so with vegan consumers). (Corporate culture expresses goals through values and beliefs. It guides the undertaking's activities through shared assumptions and group norms such as values or mission statements or a code of conduct.) Even though a code of conduct can include many different topics, including diversity, tolerance, etc, legal requirements and protection of living creatures go beyond norms and shared assumptions expressed in a mission statement or code of conduct.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	9.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Where is it explained that metrics can be either quantitative or qualitative? Targets can be either quantitative or qualitative, but metrics? Mapping of sub-topics to disclosures in topical standards For metrics, which can be either quantitative or qualitative, there is no systematic 'one-to-one' relationship between sub-topics (as captured by ESRS 1 Appendix A) and a topical Disclosure Requirement except for the majority of the ESRS S1 metrics.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	50.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Suggested wording: "Information shall be presented either for groups of negative impacts, positive impacts, risks or opportunities levels, or at individual negative impact, positive impact, risk or opportunity level, depending on what provides the most relevant information, such as reflecting their nature or the way they are managed (refer to the general requirement on level of disaggregation in Chapter 3.7)."	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	The rational to promot a reporting more close to the management view does not ensure progress on CSRD (29): "The fitness check on corporate reporting shows that those two perspectives are often not well understood or applied. It is therefore necessary to clarify that undertakings should consider each materiality perspective in its own right". By merging and presenting information regarding IROs on topical level - and thereby mixing negative and positive impacts, risks and opportunities - the presentation of information specificially related to one of the two perspectives can be aggregated, netted and obscured. The suggested wording is intended to emphasize that aggregation is only allowed by type of IRO family, to avoid netted outcomes. Also, the rationale for para. 66 is "Clarify that materiality is assessed at IRO level". It is then logical that all IROs cannot be merged into reporting on topic level only. And in para. 113 it is stated that "the undertaking shall make explicit which policies, actions and targets relate to which material impacts, risks, or opportunities, in accordance with paragraph 22". It's not possible to map PATs to "which material" IROs, if they are all aggregated and presented only at topic level.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Should this sentence not read: "The results of the undertaking's mitigation or remediation actions on negative impacts caused by or contributed to by the undertaking, and its compliance with law and regulation, are not positive impacts." With current wording I understand that negative impacts are caused by compliance with law and regulation...	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	In the table for potential impacts, in the last square first row, the word "risk" is used. This could be confusing since it is already difficult for many to understand the difference between risk and impact.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	The reference to "when the remediation became effective" and to "significant ongoing mitigation" will likely spark discussions with auditors on when to consider remediation effective (in the sense successful) and when to consider mitigation significant. Guidance would be helpful on this. The meaning of "supportable evidence" could also be explained, and clarifications added that the evidence does not refer to the existence of actions taken but to the fact that they have actually reduced the impact (what type of evidence could be put forward to support reduction?). (I also think guidance for net/gross risk assessment would be helpful. I only agree partially with the rationale "This has been done with a focus on impacts, in consideration that in financial materiality companies in general have already the experience of financial reporting which they can leverage. "Many companies are still beginners when it comes to risk assessment and we get as many questions for risks as for impacts.)	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	In IG1 FAQ 23 it is written: As a general principle, environmental impacts are considered before any mitigating actions in the materiality assessment. This is linked to the objective of providing information on the management of impacts by the undertaking over time. Are the new instructions mainly aimed at S and G impacts?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	This new principle of "fair presentation" is generally welcomed. However, it must not lead to the omission of important topics that are necessary for complete, meaningful, comparable and auditable sustainability reporting under this guise.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	This regime is extremely important for assessing the materiality of impacts.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	This rule is extremely important for assessing the materiality of the impacts, in particular for the positions of employee representatives.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	The new optional simplifications also increase the risk of possible misuse by companies that classify information as non-material and thus simply do not report on risk areas of their company. The BAK is particularly concerned about proposed simplifications in the collection of data in the General Requirements (Chapter 7.4 Reliefs for metrics): There is to be a new simplification if companies state that they cannot collect reliable data. In such a case – which is to be applied to one's own activities and the value chain – it should be possible to report key figures that cover only part of the covered area and for an indefinite period of time. This blanket simplification can easily be abused and can potentially lead to significant loss of information. At the very least, however, the application of such a facilitation must be limited until better and complete data can be collected.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	An important objective of sustainability reporting is the integration with financial reporting. In the new paragraph 114, unfortunately, the relevant specification has been changed from "shall" to "may". For the BAK, this new regulation thwarts the achievement of the target. Financial and sustainability reporting are only coordinated if the sustainability issues and financial aspects must be clearly disclosed in the report.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	114.
Excels	Chamber of Labour, Austria	Trade union	Austria			NMIG	General information on Non mandatory illustrated Guidance (NMIG) Unfortunately, the present draft provides that the mandatory guidelines have been downgraded to "no longer mandatory". In the view of the BAK, this is also associated with a significant deterioration in sustainability reporting. In addition, it is questionable what effect EFRAG's interpretative guidelines, which are declared non-binding, will have in practice. It can be assumed that they will have a certain binding effect. However, in such important areas of the European economy, this is viewed critically. Direct publications by the European institutions, specifically by the Commission, would be preferable. This would also better support companies in reporting.	ESRS1	Non-mandatory Illustrative Guidance (NMIG)	NMIG
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Overall, the summary of the sub-sub-topics at sub-topic level is welcomed. However, the addition in brackets and the naming of several topics indirectly maintains this fine distinction. The sub-topics should therefore be simplified	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	9.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	To support implementation, the sub-topics should be reflected in the respective topical reporting standards (e.g. in the respective headings for metrics) so that it can be identified more precisely which reporting requirements contribute to which sub-topic in order to be able to exclude non-essential topics more reliably. Alternatively, there should be a table showing which DRs relate to which sub-topic.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	50. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The presentation gives the impression that the entire topic standard is to be reported when the topic (through at least one sub-topic) is material. This should be clarified at sub-topic level.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	A reference to the undue cost of effort would be useful to avoid giving the impression that engagement with affected stakeholders is mandatory to conduct materiality assessment. The description should be aligned with ESRS 1 -5.2.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	33.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Overall, the inclusion of the supply chain should be simplified and eliminated as far as possible. It should be made clear that the company reports on its own targets, actions, policies and metrics. The supply chain is only taken into account to the extent that the company has, for example, targets / measures for sustainable procurement and sustainable use of products. It should not be necessary to collect data from suppliers and/or customers for the purposes of the company's own sustainability reporting.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Data points for which phase-ins are planned should be omitted entirely or become voluntary.	ESRS1	ESRS 1 - 10.3 Transitional provision: List of Disclosure Requirements that are phased in	127.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The terms short-term, medium-term and long-term should be clearly defined. It remains unclear how to deal with impacts that exist throughout the entire duration of business activities but do not have long-term consequences in themselves, such as continuous water consumption.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	30.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	The materiality analysis should be limited to direct business relationships. Global supply chains are very complex, and only a few companies can influence or oversee the entire supply chain. -> Deletion	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	30.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Within the framework of the double materiality analysis, a comprehensible and well-founded argument should suffice to substantiate the assessment of materiality. Formal evidence should not be mandatory. Since the analysis must be regularly reviewed and updated, a high level of documentation would not be practicable for companies in the long term.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	useful approach, as it allows other obligations to be covered by the CSRD report (e.g. EMAS environmental statement). However, companies should also be able to include additional information in the report in order to fulfil other purposes if necessary (e.g. as evidence for portals such as EcoVadis).	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	107.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Expand the concept of decision usefulness described in a) to all users or define the objective for users under b) identical to a) (-->decision usefulness)	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Not having to compulsory follow a specific listt—which is sometimes unclear and includes topics unrelated to our sector—is great. However, although the list is not exhaustive, its application will depend on the DPs of the standards; therefore, in order to exclude some of the topics required in the DPs, it will be necessary to analyze the IROs at the sub-subtopic level. In practice, this will allow us to maintain the ability to select relevant topics and thus identify which DPs apply and which do not. In any case, it would be a good idea to develop an illustrative list of topics and DPs that are related to them.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	AR 16
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	The scope of the value chain activities included in the CSRD impact materiality assessment and the scope of the "chain of activities" subject to due diligence obligations under CSDDD should be aligned. The differences in the activities covered by CSDDD and CSRD creates unnecessary, duplicative, and burdensome variations in the process for identifying and assessing a company's sustainability impacts for reporting versus due diligence purposes. Similarly, the definition of "business partner" and "business relationship" should be the same for both CSRD reporting and CSDDD due diligence purposes. This paragraph should be revised to explicitly state that material impacts are impacts that an undertaking causes, contributes to, and/or is directly linked to, consistent with the U.N. Guiding Principles on Business & Human Rights (UNGPs). This language from the UNGPs is referenced in other parts of the Amended ESRS (e.g., ESRS S1 - 3, AR 6). The language should also be included in the description of the DMA process in order to more clearly delineate the boundaries of an undertaking's assessment of impacts, risks, and opportunities.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It should be clarified that the list of referenced types of information is non-exhaustive. This may result in only this type of documentation being accepted as evidence.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	27.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I agree	We agree but If the main objective is that the users of general purpose sustainability statements is to understand the undertaking's material impacts, risks and opportunities and how it identifies and manages them, it would be very grateful a rule for reporting these IROs. Currently each company reports in its own way.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	21. (b)
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	A single sub-topic may include different IROs if they belong to distinct sub-subtopics. According to AR 21, when an IRO refers to a specific topic, the company is only required to report material information related to that sub-topic. However, this wording could lead auditors to interpret that if a sub-topic is considered material due to an IRO previously linked to a sub-subtopic, then all data points (DPs) associated with that sub-topic should be reported	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	22.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	There is confusion between mitigation measures and remediation measures. In addition, further confusion arises when considering how to handle subsequent years. Additionally, there is still no clear framework for accurately assessing severity. This lack of consistency can result in the same impact being deemed highly significant by one company and barely relevant by another, even when both operate in the same country and the analysis focuses solely on gross impact. Additionally, Given that "remediation" is defined as including actions that "counteract" (i.e., mitigate) a negative impact, the third sentence should be amended to clarify that remediation actions are not considered in relation to actual negative impacts only to the extent that they occur after the impact occurs. In the fourth sentence, remediation actions should only be required to be disclosed if material.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We do not agree with this approach. It is impossible to calculate probability without considering existing mitigation measures, as these can reduce severity to the point where a potential impact is no longer material. The guidance refers to assessing the potential impact before mitigation, not just evaluating severity. When applying probability, potential impacts can become non-significant. It is unclear how a gross impact is applied to a potential impact when probability—which necessarily includes mitigation measures—must be considered. Under this premise, all negative impacts would need to be reported in the first year, which lacks practical sense. Moreover, conceptually, if potential impacts must be assessed without considering prevention measures, it no longer makes sense to carry out individual company-level assessments. In practice, the result would be identical for any telco, without reflecting differences in how each one manages these issues. In such a case, a sector-wide assessment would suffice, which would go against the CSRD's objective: ensuring comparability between companies, which is precisely what investors seek. Additionally, this approach would lead to too many topics being considered material, significantly increasing the reporting burden. Furthermore, there is no definition of what constitutes significant mitigation measures (financial resources, difficulty, human resources, etc.).	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It is unclear what is meant by "reasonable and supportable information" and how can we provide evidence of it.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	60.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It is unclear what you mean by use reasonable and supportable evidence. Unless "reasonable and supportable evidence" is intended to mean something different, should conform to "reasonable and supportable information." The paragraph should also clarify that the relevant "reasonable and supportable" evidence or information is such that is "available to the undertaking at the reporting date without undue cost or effort." Should clarify, similar to paragraph 35, that when evaluating risks, undertakings can take account of existing mitigation and prevention actions.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Given that it is not clear what "significant" means in relation to remediation actions, this AR should be revised to provide that remediation actions only need to be disclosed if they are material.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 13
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	The requirements to follow a list—which is sometimes unclear and includes topics unrelated to our sector—are reduced. Although the list is not exhaustive, its application will depend on the DPs of the standards; therefore, in order to exclude some of the topics required in the DPs, it will be necessary to analyze the IROs at the sub-subtopic level. In practice, this will allow us to maintain the ability to select relevant topics and thus identify which DPs apply and which do not. OK, but we would need an illustrative list of topics and DPs.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	AR 16
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Clear differentiation (and definition - see Annex II) between remediation, mitigation, and prevention is lacking	ESRS1	ESRS 1 - Objective	34.
Excels	BDEW	Other - please specify (required)	Germany			I disagree	The time at which to conduct DMA is not clearly defined. Similar to IG 3, which states, "the undertaking is supposed to determine [material IROs] at each reporting date", ESRS 2.0 refer to the IFRS, which also state, "materiality judgments at each reporting date". Experience has shown that the materiality assessment must be conducted before the reporting year to prepare the sustainability statement.	ESRS1	ESRS 1 - Objective	87. (a)
Excels	BDEW	Other - please specify (required)	Germany			I agree	agreement (while par. 14 explains the therm "shall")	ESRS1	REVISED STRUCTURE AND DRAFTING CONVENTIONS	overall
Excels	BDEW	Other - please specify (required)	Germany			I agree	- contradicts par 8, because it says that "IRO management (i.e. policies and actions)" whereas par 8 says: " (1) ... IRO management, and (2) policies, actions, targets and metrics" - the latter implies that there is a difference between IRO management and P/O; where in fact "IRO management" is (i.e.) policies and actions.	ESRS1		AR 1 for para 11
Excels	BDEW	Other - please specify (required)	Germany			I agree	- Why is it necessary to refer to "performance metrics" in (a) - it seems to rather be an AR on general aspects to consider for "metrics" in general (why specify in (a) that it is "performance metrics"? - (b) seems to match the qualitative characteristic requirements in general - needed? - What does AR3 generally add - compared to already existing requirements re/ QC?	ESRS1		AR 2 for para 11
Excels	BDEW	Other - please specify (required)	Germany			I agree	To discuss: is explanation on understanding of "shall consider" helpful? Or clarification needed or deletion of "shall consider"?	ESRS1		par 15
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	agreement to include explicit reference to fair presentation	ESRS1	Chapter 2 Fair presentation and QC	
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	BDEW is fine with current definition, more precision helpful.	ESRS1		par 16 ff
Excels	BDEW	Other - please specify (required)	Germany			I disagree	BDEW would appreciate a scope limited to users of the statement for decision purposes (ISSB), but understands, that CSRD targets a broader stakeholder group. - par 21 (b) widens the scope of information that needs to be reported on due to general reference to information being "necessary for users of general purpose sustainability statements to understand..."	ESRS1	Ch. 3 Double materiality	par 21
Excels	BDEW	Other - please specify (required)	Germany			I agree	See comment above. The "group of data users" would mainly be investors, while a descriptive text for "society" would look completely different in terms of "decision usefulness". To be more specific, it would make sense to describe stakeholder groups (without allocating responsibility to a reporting company to judge what detail of reporting might be necessary for various group of users" > we consider this approach be covered by "fair representation")	ESRS1		AR 3 fro para 21

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	BDEW agrees, but understands this is just referencing to other wordings in other standards and frameworks. Reference to "most significant impacts" helpful? Or distracting (due to additional / new wording)?	ESRS1		AR 4 for para 21
Excels	BDEW	Other - please specify (required)	Germany			I agree		ESRS1		par 22
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	Suggestion to re-draft current wording, as the ESRS logics are generally based on impacts, risks and opportunities (no separation between I vs RO)	ESRS1		par 26
Excels	BDEW	Other - please specify (required)	Germany			does par 27 reflect the "usual internal and external sources"? ; necessary to include a "such as"?	BDEW agrees	ESRS1		par 27
Excels	BDEW	Other - please specify (required)	Germany			- There seems to be the need to clarify that this update is needed annually - it currently does not say that (intentionally?)	BDEW agrees	ESRS1		par 29
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	"Affected stakeholders" - do we need to clarify that (although performing a thourough assessment), there might be affected stakeholders, a reporting company might not be aware of (e.g. by them not reaching out to the reporting company)? - impact as general starting point for IRO DMA - "although there may also be material RO that are not related to undertaking's impacts" - is this sufficiently clear regarding Impacts vs. RO?	ESRS1	Affected stakeholders	par 33
Excels	BDEW	Other - please specify (required)	Germany			I disagree	This is a decisive point! Consistency between appendix and this main DRs needs to be improved especially with regards to "implemented mitigation measures" and resulting RESIDUAL impacts and the need to report or derive a materiality!! Clear reference to appendix C needs to be included here. Appendix C and the examples are very helpful. The same clarity should be found in par 34 et seq. In general good to include gross-net definitions directly in standard instead of the separte non-binding guidance so far. For company risk management the KontraG-rules should apply. For the assessment of risks, always a net perspective applies taking all implemented mitigation measures into consideration. So consistency for the impacts is appreciated. With the current text in the standard (par 34 et seq) and the appendix not being consistent, misinterpretations or discussions with auditor could result!!	ESRS1	Gross/net	par 34 et seq
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	to discuss: helpful to have examples (even these obvious ones) in the standard or should examples be placed elsewhere?	ESRS1		AR 5 and 6 - Examples for connected impacts
Excels	BDEW	Other - please specify (required)	Germany			I disagree	ESRS 1, AR 11 seems to establish a requirement regarding communication of workers' representatives' opinions - this is indeed (as a requirement to management) part of the CSRD (see recital (52) as well as Art. 19a, 5. / Art. 29a, 6) - however: wondering if this is in line with assumption that ESRS do not dictate behaviour? : Engagement with workers representatives is no change from current regulation, but for all stakeholders, representatives should be explicitely mentioned -> position "representatives" at end of sentence: "the undertaking may also seek direct input into its materiality assessment from affected stakeholders, as well as users of sustainability reporting and other experts or their representatives (such as employee representatives or trade unions)" . Further, the stakeholder interaction should not oblige a "feedback on the undertaking's conclusions" to all stakeholders, but only to workers representatives.	ESRS1		AR 11 for para 33 - workers' representatives
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	Material RO "derive from... impacts, dependencies, other factors"... Still necessary to include "can derive"? Or sufficiently addressed through "other factors"?	ESRS1	Financial materiality assessment	par 40
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	BDEW agrees to need for clarification: "Shall consider ist dependencies ... either in terms of CF or in terms of resources not recognised in f/s" - so far AR 13/14 refer to "changes in capital not recognised in f/s"...	ESRS1		AR 14 for para 41
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	If Internal Control Systems rely on net risks, the current wording would be inconsistent with the gross perspective ESRS is currently based on. BDEW would appreciate the wording in AR15 and prefers a NET consideration.	ESRS1		Ar 16 for para 41
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	reference - among others - to "location" and "site", both are added (also: sector was added), but not supposed to change anything as the current concept included both; however, explanation (table of amendments) talks about "key sites" --> necessary to add? Probably not because the par is referring to "materiality" in the last sentence	ESRS1	3.7 Level of aggregation, disaggregation and group reporting	par 51
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	51 lists "locations, water basin, site, asset... " as though they are all different aspects to consider; in AR 23 "by location" is specified as "by location - such as by site, water basin or local ecosystem", not as though if you differentiate by location, it can be one of the following - why is "location" needed then?	ESRS1		par 51 and AR 23 for par 51
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	References to location, sites, assets etc. should be deleted, since they not only drive granularity but also create additional work in DMA and reporting. Paragraph 53 would be sufficient. The two pragraphs 51 and 52 are to detailed and not required and respective ARs are also not required.	ESRS1		par 51 and 52
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	It seems line para numbering from 54 onwards is wrong (54 should be 59?!?), file "Log of amendments"	ESRS1	4. Due Diligence	par 54
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	Has been a red flag for numerous German constituents; however: seems like a general approach to (very broadly) describe own operations / scope of consolidation; it is meant to address the numerous questions on own operations / scope of consolidation; is "usually" sufficient to capture the differences (e.g. leasing etc.)? sufficiently clear that reporting boundaries include own operations and VC?	ESRS1	5. Reporting undertaking and upstream and downstream value chain	par 59
Excels	BDEW	Other - please specify (required)	Germany			I agree	no hierarchy for determination of metrics in VC (direct from counterparties OR estimates...)	ESRS1		par 62
Excels	BDEW	Other - please specify (required)	Germany			I agree	par 63 seems to be a requirement to the ESRS standardsetting itself ("information required by ESRS ... shall not exceed"... there is nothing the undertaking can do / has to do about it)	ESRS1		par 63

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	We assume it would be a better option for e time horizon definition "according to financial reporting" par 77 (a) now includes a "definition" for "short-term time horizon" being "the length of the periood adopted for its financial statements; apparently this was on Q&A Platform; however: why is this reference to f/s needed? It is the same period that is adopted for the sus statement... so basically it is the reporting period... why not say so? Which other "period adopted for f/s" could there possibly be? Or is this a misunderstanding? Is this referring to Management Report and the "short-term" definition applied there? Also: still the question remains to FA NB whether IFRS alignment (i.e. time horizons being entity specific) should be considered instead of the specific requirements?	ESRS1	6. Reporting period, base year and time horizons	par 77
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	When stating "comparative information... for amounts", does this adress already reported KPIs (then better wording "metrics"?)	ESRS1		par 81
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Include in section 7 or 8 that undertaking can choose the unit (for each metric) as they see fit : Would choosing a unit not contradict "comparative information" (among reporting organizations)?	ESRS1		not yet included (if I read correctly)
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	We generally consider a certain order as useful to data users, "ESG" seems quite common. par 105 is amended a little bit, but the same as before; question to FA nB remains: is there a need to provide a specific order for the information in the sust statement? CSRD does not seem to provide a specific order / required order for the presentation	ESRS1	8. Presentation requirements and structure of the sustainability statement	par. 105
Excels	BDEW	Other - please specify (required)	Germany			I agree	so far FA NB agreed to additional (non-material) information if requested by specific user - this possibility (and criteria, e.g. clearly identified etc.) is explicitly addressed in par 108. Does the FA NB agree with par 108?	ESRS1	additional (non-material) information	par 108
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	Why is a specific AR needed to address that undertaking may present more detailed information on GHG emissions and include in an appendix? Is this meant to be an example for how to deal with additional / more granular information?	ESRS1		AR 36 for para 109
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	"Explain level of consistency" with data / assumptions of f/s is new (intended as a clarification); however, better to ask for explanations of differences in the assumptions as "level of consistency" is a term not used / unclear	ESRS1	9. Connected information and linkages with other parts of corporate reporting	par 116
Excels	BDEW	Other - please specify (required)	Germany			I agree		ESRS1	Appendix A - List of topics	page 26 of ESRS 1
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	Very helpful appendix, but clarity should be increased for cases with "significant ongoing mitigation actions" - reporting only, if there is a residual material impact. This appendix and the text in the standard (par 34 et seq) require more consistency / harmonisation to avoid misinterpretations or discussions with auditor!! see above.	ESRS1	Appendix C - Assessing actual and potential negative impacts for materiality	
Excels	Randstad	Preparer (non-financial preparing a sustainability report)	Netherlands			I partially agree and partially disagree	We suggest adding clarifications: use identical segmentation level which is applicable for the financial statements: sustainability statement shall follow the segmentattion form of the financial statement and avoid country-level reporting.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The sub-sub-topic level has been eliminated; however, no topics have been removed, they have only been restructured. According to Annex A of ESRS1, which replaces the AR 16 list, the formerly stand-alone sub-sub-topics "adequate wages," "work-life balance," "working time," "secure employment," and "social protection" now fall under the sub-topic "working conditions." Does this mean that if the sub-topic "working conditions" is material, all these topics automatically become material, or is it still possible that, when the sub-topic "working conditions" is material, only some of the aforementioned (formerly sub-sub-topic) themes are material and therefore reportable? AR 21 states that if a material IRO (Impact, Risk, or Opportunity) exists, the company is (only) required to report the material information related to that sub-topic and that could be just one or all.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 21
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	It is unclear what is meant by "appropriate qualitative and/or quantitative thresholds" in practice. How should companies determine what qualifies as "appropriate," and what evidence is required to support such thresholds? Allowing multiple thresholds across topics risks adding complexity to the materiality process and makes it more difficult to ensure consistency, comparability, and auditability. Each threshold would need to be well-justified, transparently applied, and aligned across both impact and financial materiality. Clearer guidance would therefore be valuable - for example, whether thresholds should align with existing risk frameworks, and what type of threshold is expected for each topic (e.g., quantitative for climate, such as Scope 3 categories representing more than 10% of total GHG emissions; and qualitative for workforce, such as any instance of forced labor regardless of scale). If multiple approaches are allowed, please clarify that there is flexibility for companies.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	28.
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	Generally, the top-down approach resonates by BSR members. However, it remains unclear how companies should balance the flexibility to prioritize well-established issues with the need to systematically surface less obvious, but potentially material, IROs. When a topic is identified as material, but no IRO assessment is conducted, it seems that post-DMA, the company still needs to identify/disclose material IROs. Therefore it makes sense to include the IRO identification (even if it is quick) in the DMA, also for material topics. Guidance on what this looks like in practice would be useful.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 5
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	We agree with the proposed criteria for assessing impacts; however, it is unclear how these criteria should be calculated or weighted to enable comparability across companies. While overly prescriptive detail may not be necessary, a consistent methodology or scoring scale would help ensure more comparable outcomes. For instance, should criteria be assigned numerical values and then averaged, multiplied, or otherwise combined?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	BSR	Business association (other than association of financial institution)	United States			I disagree	This paragraph adds complexity to the impact materiality assessment by requiring companies to identify when mitigation measures were implemented and to evaluate their effectiveness over defined time frames. While the intent is understood, this substantially increases the data companies must collect and analyze. It also suggests that the assessment should be conducted on a net basis, though this expectation is not clearly defined.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BSR	Business association (other than association of financial institution)	United States			I disagree	It is unclear what qualifies as "supportable evidence." As with paragraph 34, this requirement adds complexity to the impact materiality assessment by obliging companies to identify when mitigation measures were implemented and evaluate their effectiveness over defined time frames. While the intent is understood, it significantly increases the information companies must collect and analyze. It also implies that the assessment should be conducted on a net basis, though this is not clearly defined. Clearer guidance on what constitutes "supportable evidence," as well as how to treat impacts that require ongoing controls, would make this requirement more practical and consistent across companies. In addition, clarification is needed on the apparent conflict between Appendix C and paragraph 35, as Appendix C requires disclosure of material potential negative impacts at the gross level in the period of occurrence.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	BSR	Business association (other than association of financial institution)	United States			I disagree	This paragraph indicates that any single impact criterion can render a negative impact severe, suggesting that one criterion may outweigh the others. However, this appears to conflict with paragraph 31, which states that materiality should be determined by severity and likelihood, with severity assessed through scale, scope, and irremediable character. It remains unclear whether all criteria should be scored and averaged, or if a single criterion can override the rest.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 8
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	This paragraph indicates that any single impact criterion can render a negative impact severe, suggesting that one criterion may outweigh the others. However, this appears to conflict with paragraph 31, which states that materiality should be determined by severity and likelihood, with severity assessed through scale, scope, and irremediable character. It remains unclear whether all criteria should be scored and averaged, or if a single criterion can override the rest.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	This paragraph states that risks and opportunities should be assessed over the short, medium, and long term. Clarification is needed on the appropriate scope of this assessment -should companies focus on the time horizon in which the risk or opportunity is most likely to materialize, or evaluate it across all time horizons? And what if a company aligns financial materiality with its risk register, which often does not go beyond 2 years or so?	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 15
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	This paragraph suggests that companies can - or should - fully align with existing enterprise risk management frameworks, thereby using them to determine whether a gross or net assessment is appropriate. To avoid underreporting, clearer guidance is needed on when to apply gross versus net risk assessments, how companies should explain their approach, and what level of evidence is required to demonstrate control effectiveness.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 16
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I disagree	Reporting on material topics not covered by the ESRS is defined as mandatory (shall) – whilst reporting of additional issues may be beneficial, it should not be mandatory	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I disagree	Whilst companies routinely benchmark their performance against peer companies, it is not reasonable to make this a mandatory requirement for the reporter. Full information is unlikely to be available in the public domain prior to the reporting period. Whilst CSRD reporting would provide a good source of information, company comparisons should be down to users of the data, not mandatory for reporters – this is the role of ratings agencies, investors, regulators, not the companies themselves	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I disagree	The extend and depth of indirect business relationships should be clearly defined, and be voluntary reporting. Making this a mandatory requirement without defining the extent leads to ambiguity. Whilst there are clear indirect relationships with customer service providers, class, flag etc, and suppliers, having this mandatory AND open ended is unreasonable	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	5.
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	The Society respectfully requests EFRAG clarify and revise three aspects of its proposed approach to (1) permit companies to consider the effect of all mitigation and prevention actions taken during a reporting year when assessing the materiality of potential negative impacts for that same reporting year; (2) permit companies to take mitigation and prevention actions that require significant ongoing efforts into account when assessing materiality; and (3) to avoid any ambiguity, expressly permit consideration of mitigating and preventative actions when assessing financial materiality. In that the word limits in this survey tool (Parts 2 and 3) won't accommodate our full response to this question, we detailed these points in our concurrently submitted comment letter to EFRAG.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I disagree	Eliminate the standard governing this disclosure requirement so as to align the materiality assessment process for human rights impacts with that of other sustainability topics or consider alternative text as previously explained and proposed in our May 2025 letter. This requirement is difficult to implement in practice and unclear, leading companies and assurance providers to take different approaches and impairing disclosure comparability. Almost every sustainability topic arguably can have human rights impacts. Companies have taken different approaches to giving precedence to impact over likelihood, in some cases focusing only on magnitude and in others overweighting magnitude. If retained, it should be clarified to clearly provide that companies may take their individual circumstances into account and determine the appropriate approach to applying the requirement. Companies should have flexibility to determine that they won't apply the requirement when evaluating IROs that do not principally concern human rights or will take likelihood into account with a reduced weighting when evaluating impacts determined to principally concern human rights. Further allow reporting discretion as set forth in our concurrently submitted comment letter.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I disagree	Eliminate entity-specific disclosure requirements. This disclosure would require companies to expend substantial effort and costs to identify matters for which entity-specific disclosures may be required, expand a double materiality assessment to address those topics, prepare disclosures in the absence of any standards, and work with assurance providers to confirm both that no additional entity-specific disclosures are required and that any included are adequate. This requirement also leaves significant discretion to assurance providers who, in the absence of defined standards or market practice, may significantly increase the cost of the assurance exercise through the enhanced rigor and scrutiny they may believe is necessary to assess novel entity-specific disclosures. This effort and cost is unlikely to bring a significant benefit to users of sustainability information, as the metrics used by companies may vary (and even where similar metrics are provided, the use of varying calculation methodologies may still limit their comparability). Alternatively, EFRAG should provide that entity-specific disclosures be voluntary, exempt from assurance, or subject to an additional phase-in period so that the most comparable information across entities can be established in the initial reporting years before companies incur costs and efforts to tailor metrics and disclosure on an entity-specific basis.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	The term "supportable" in particular needs to be clarified as it could be otherwise interpreted as requiring a level of validation or the implementation of governance and control processes that would defeat the term's intended purpose of providing relief to undertakings in situations where available data is imperfect (see IFRS FAQs). The use of assumptions and estimates is integral to an undertaking's underlying processes used to identify material IROs, scope its value chain, and otherwise conduct its materiality assessment. Using the term here therefore requires clarification of its meaning as these processes–unlike the quantitative disclosures for which the term was originally employed (i.e., IFRS 9 and 17)--rely heavily on qualitative information, which may be anecdotal or come from third parties or be limited in nature, due to restrictions on obtaining value chain information or the fact that obtaining additional information would entail undue cost or effort. Consequently, assumptions and estimates should be deemed supportable to the extent that they represent the undertaking's good faith analysis of the information available to it as of the reporting date without undue cost or effort. Further, EFRAG should clarify that "reasonable" assumptions and estimates are those which are relevant to the applicable subject matter.	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	AR 30
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	The term "reasonable and supportable," particularly "supportable," needs to be clarified as it could be interpreted as requiring a level of validation or the implementation of governance and control processes that would defeat the term's intended purpose of providing relief to undertakings in situations where the available data is imperfect (see IFRS's Sustainability Reporting Standards FAQs). Since these clauses relate to the inclusion of information in the sustainability statement, "reasonable and supportable information" in this context should mean that the information is relevant and satisfies the fair presentation and qualitative characteristics of information requirements specified in ESRS 1. Such an approach is consistent with the acknowledgement in Section 7.2 of ESRS 1 that disclosed information is subject to the application of judgment, as well as measurement and outcome uncertainty.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (c)
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	The term "reasonable and supportable," particularly "supportable," needs to be clarified as it could be interpreted as requiring a level of validation or the implementation of governance and control processes that would defeat the term's intended purpose of providing relief to undertakings in situations where the available data is imperfect (see IFRS's Sustainability Reporting Standards FAQs). Since these clauses relate to the inclusion of information in the sustainability statement, "reasonable and supportable information" in this context should mean that the information is relevant and satisfies the fair presentation and qualitative characteristics of information requirements specified in ESRS 1. Such an approach is consistent with the acknowledgement in Section 7.2 of ESRS 1 that disclosed information is subject to the application of judgment, as well as measurement and outcome uncertainty.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (d)
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	Requiring the use of "reasonable and supportable information" in relation to the activities specified in clauses (a) and (b) is problematic given that "supportable" can be interpreted as requiring a level of validation or the implementation of control processes that are unlikely to be possible in practice given the nature of the information that is often available to an undertaking in connection with such activities that underlie the materiality assessment process. For example, when an undertaking seeks to identify its material IROs or scope its value chain, it will need to consider information that often is imperfect (e.g., anecdotal, contains assumptions or estimates, is difficult to validate since it comes from third-parties, or is limited given that complete information would require undue cost or effort). In such cases, an undertaking should instead be required to perform the specified activities by considering the relevant information available to it as of the reporting date without undue cost or effort and applying its good faith judgment, which is how undertakings typically make determinations in other business contexts with imperfect or limited information. Further, EFRAG should clarify that "reasonable" means the information is relevant to the applicable subject matter	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (a)
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	Requiring the use of "reasonable and supportable information" in relation to the activities specified in clauses (a) and (b) is problematic given that "supportable" can be interpreted as requiring a level of validation or the implementation of control processes that are unlikely to be possible in practice given the nature of the information that is often available to an undertaking in connection with such activities that underlie the materiality assessment process. For example, it is unclear whether industry experience–which is appropriately often a key input into IRO evaluations–would qualify as "evidence" (as opposed to "information"). These provisions should also clarify that the relevant "reasonable and supportable" evidence or information does not extend beyond that which is "available to the undertaking at the reporting date without undue cost or effort."	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	This provision should clarify that the relevant "reasonable and supportable" information does not extend beyond that which is "available to the undertaking at the reporting date without undue cost or effort."	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	This provision should clarify that the relevant "reasonable and supportable" information does not extend beyond that which is "available to the undertaking at the reporting date without undue cost or effort."	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	60.
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I disagree	To promote interoperability and minimize unnecessary costs and burdens, ESRS should afford companies the flexibility to draw their organizational boundaries using the equity share approach or the financial or operational control approaches as permitted under the GHG Protocol and IFRS S2.EFRAG's proposed revision creates significant misalignment between E1 and key emissions reporting standards and unnecessarily burdens the multitude of companies that use the operational control or equity share approaches for their organizational boundaries and would need to recalculate their emissions solely for the purposes of complying with the CSRD. The GHG Protocol and IFRS S2 provide companies the flexibility to draw their organizational boundaries using the equity share approach or the financial or operational control approaches (see section A.3 of this analysis). Indeed, the GHG Protocol explicitly states that it "makes no recommendation" as to which approach a company should use for voluntary public GHG emissions reporting (see p. 20), and this flexibility should carry over to ESRS GHG emissions reporting given the competing interests that a company may need to consider in selecting its optimal approach (see p. 20-21) and to promote interoperability and associated reduction of compliance costs and burdens.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	To ensure clarity, in our opinion it should be specified that while an undertaking may indicate that it has not yet set specific targets, it should not be allowed to claim that no metrics have been established. The ESRS should explicitly state whether metrics related to material impacts, risks, and opportunities must be identified and disclosed, even if targets have not yet been defined.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	AR 1
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	To align par 27 and par 33 on stakeholders (if engagement with stakeholders is mandatory) I would suggest changing wording in 27 to "shall" in relation to "engagement with affected stakeholders"	ESRS1	ESRS 1 - 3.3 Double materiality assessment	27.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	To align par 27 and par 33 on stakeholders (if engagement with stakeholders is mandatory) I would suggest changing wording in 27 to "shall" in relation to "engagement with affected stakeholders"	ESRS1	ESRS 1 - 3.3 Double materiality assessment	33.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	Here, We would simplify the wording to emphasize that when judging the materiality of actual negative impacts, the undertaking should assess the severity before any mitigation or remediation is applied. Mitigation or prevention measures implemented before the impact occurred can be considered in the severity assessment. However, remediation actions taken after the impact has occurred do not reduce the assessed severity, although they must still be disclosed if the impact is material.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	34.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	Par. 36 of the draft attempts to define what a positive impact is ((…) "if its business activities, products and services mitigate or remediate negative impacts of another party, this is considered a positive impact of the undertaking)". We understand positive impact as value added, and something that helps to better the existing state of things. The example provided (remediating the impact of another party) is helpful and confirms this, but in our opinion it should be elaborated. Is having a supplier code of conduct enough? When does a company truly have a positive impact on eg. climate change? Do negative actions, such as producing emissions, counterbalance positive contributions, such as manufacturing energy-saving solutions? Overall, the definition of positive impact needs more guidance and clarification. This issue is also related to situations where there is no impact (and the lack of its clear definition), e.g., many companies claim that topics such as employing people with disabilities are not relevant to them because they do not hire from these groups.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	36.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	This point lacks sufficient guidance on practical implementation and last year, in our experience, it was overlooked in methodologies of many companies. In practice, companies often set thresholds, typically from 1 to 5, for each parameter and define a cut-off point above which a topic becomes material. For example, if for a given topic the scale and the scope are set at 1, and irremediable character is set at 5, but the cut-off point based on the sum of the three parameters is only higher than 7, the topic would not reach the threshold. Therefore, we believe this point needs additional guidance on how to implement it in practice.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 8
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	In our experience, this sentence has been subject to different interpretations. It is clear that nature is indeed a silent stakeholder, as it cannot speak for itself. However, is it mandatory to consider its needs in the double materiality analysis for example by reviewing scientific reports and research findings? The wording "may be" leaves room for interpretation that it is not, which suggests that further clarification is needed. "May be" should be replaced with "shall be".	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 10

Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Delete 'may be more pragmatic' from the last sentence as this is a value judgement and emphasises one over the other	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	Danish Institute for Human Rights	NGO	Denmark			I agree	support this important chapter	ESRS1	ESRS 1 - 4. Due diligence	54.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	specify metrics where the use of significant driver releif is is not appropriate such as S1 5 and S1-6	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Exclude own operations from this relief	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Appendix A: the social susubtopics in parenthesis are not exhaustive of the sub-topic title/ human rights instruments mentioned in CSRD. Hence the parenthesis should start with 'including'.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	9.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Amend final sentence to make explicit that this is only where the preparer is not involved with the harm to close loophole / prevent abuse.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I agree	This is crucial for understanding impact materiality assessment	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I agree	This is crucial for understanding impact materiality assessment, in particular the point on reporting on the opinion of workers' representatives	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Punto 3 S.r.l. S.B.	Consultant (including software vendor)	Italy			I partially agree and partially disagree	In the Log of Amendments, the note relating to new paragraph 22 of ESRS 1 indicate that it was introduced also to emphasize a specific concept: IROs are material, while topics must be reported if they relate to material IROs (and are not material in themselves). However, in three occasions in the ESRS documents (general and topical), reference is made to “material topics” and not to topics related to material IROs (ESRS S2 AR 27, ESRS E5 para. 15, and ESRS S1 para. 3). Is this a typo? If it is a typo, would it be correct to conduct a top-down materiality analysis (as described in ESRS1 AR17), starting with the topics and considering them material?	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I disagree	Results of the double-materiality-analysis (DMA) should be only depended by the stated criteria of financial- and impact materiality. This concept is seen as an additional layer of complexity, that only dilutes comparability. Unclear "(see paragraph 90)"-referencing. Unclear IFRS S1 has connection to "entity's prospect".	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (a)
Excels	GKK Partners	Consultant (including software vendor)	Germany			I disagree	To link this extented concept also to the metrics, posses risk that metrics are not comparable as outlined before. If the concept and connection to (d) is to be implemented, at least an additional highlighting (e.g. footnote or central table of "affected metrics") should state clarity for the users of sustainability statements.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (d)
Excels	GKK Partners	Consultant (including software vendor)	Germany			I disagree	This would required a structured consideration of the stated factors and "included information". If not accessible for the users, at least the undertaking should provide a clear structure, so that external assurance providers could rather comparatively consider this information.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	88.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I disagree	This assessment is seen to be problematic, for the following reasons: 1) Unclear structure on how to conduct the assessment 2) Inherent conflict of objectives between undertaking and users 3) Time-bounded 4) Who judges the "balanced consideration" between cost or effect	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I partially agree and partially disagree	Connection to value chain and "undue cost or effort" understandable. Unclear: data quality and referencing "only" to ESRS 1 paragraph 92. Suggestion: - if introduced this calls for a clear transparency, and guideance where the undertaking applied that, to ensure the users comparability. - If the undertaking discloses "a calculation that includes only a partial scope" this should be directly highlighed at the specific disclosure point. Otherwise the users might mistake it for a "full disclosure". Moreover, the aspect "data quality" should be described with criteria.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	92.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GKK Partners	Consultant (including software vendor)	Germany			I agree	Good clarification on nature of impacts	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	36.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	- We do not see the benefit of adding the briefing of workers representatives to ESRS (AR 11 for paragraph 33). This is (a) mentioned in the CSRD itself already and (2) no disclosure requirement but a task.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	lack of a definition of fair presentation will likely lead to different interpretations	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	rules of when to include remediation measures for negative impacts is very theoretical and complex to apply in practice.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- Paragraph 59 and 70 contain a list of examples (e.g., assets and liabilities). Explicit mentioning, that this is just an example would be beneficial	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- Paragraph 59 also specifies cases in which financial non-material entities have to be included in the sustainability statement. As it is currently written, the paragraph would require companies to test all entities not consolidated for financial reporting. It would be more efficient if entities first check the entities business model, only in case the business model differs, different IROs can occur, consequently only those entities need to be screened.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- Paragraph 62 allows value chain estimations, we see the need for the clarification, that the phased in criteria to not report on the value chain for the first three years, is not applied here.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	We welcome the introduction of this new provision to clarify that the ESRS do not mandate behavior.	ESRS1	ESRS 1 - Objective	5.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The CSRD (paragraph 9) clearly states that the second group of users of the sustainability statements consists of civil society actors, including non-governmental organizations and social partners, which seek to better hold undertakings to account for their impacts on people and the environment. The ESRS definition of users must reflect this emphasis on civil society actors to ensure that the perspectives of affected stakeholders are not diluted. The ESRS should also recognize the crossover of needs between the two primary groups of users (investors and civil society), in that investors want to better understand the impacts of their investments on people and the environment, as they recognize that these impacts lead to risks to the organization over time.	ESRS1	ESRS 1 - Objective	4.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The definition of 'potential impacts' in Annex II could be further aligned with GRI's definition for clarity and simplification purposes: "potential impacts are those that could occur but have not yet occurred".	ESRS1	ESRS 1 - 1.2 Drafting conventions	12. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	The wording of this paragraph suggests that the scope of sustainability-related risks and opportunities has been broadened to include all "financial risks and opportunities" whereas the focus of the ESRS is on sustainability matters.	ESRS1	ESRS 1 - 1.2 Drafting conventions	12. (b)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	The notion of 'fair presentation' being satisfied by simply applying the ESRS (in ESRS 1, para 17) is inconsistent with company law in the EU and the directors still need to make a judgement as to whether the statement achieves fair presentation. IAS 1 has 'true and fair' override where merely applying the standards would not lead to fair presentation.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	17.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	While it is positive that the ESRS apply a principles-based approach, reflecting principles from financial reporting should be carefully considered to ensure they do not undermine double materiality, and are appropriately used in the context of the impact dimension of the CSRD. Directly importing financial concepts without proper adaptation can shift attention away from the assessment of impacts, undermining double materiality reporting. For example, the qualitative characteristic of relevance, as defined in the IFRS Conceptual Framework, emphasizes confirmatory and predictive value, which while appropriate for assessing future cash flows, is not directly applicable to evaluating an organization's impacts.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	18.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	This paragraph should refer to 'faithful representation' not 'faithful presentation'.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	We support the explicit recognition that a 'double materiality' assessment begins with impacts. We share the understanding that impacts are the necessary first step for a comprehensive understanding of risks and opportunities.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	26.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	We welcome the introduction of this new provision to clarify the review of materiality assessments.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	It is confusing to introduce the notion of 'identification of information' in the impact materiality assessment. The impact materiality assessment should focus on identifying and assessing impacts, in line with the remaining paragraphs of this section (31-36), then followed by the identification of material information to report for those impacts.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	We support the retention of the criteria (severity and likelihood) for assessing impact materiality.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	ESRS 1 paragraph 36 states that "if its business activities, products and services mitigate or remediate negative impacts of another party, this is considered a positive impact of the undertaking." This can lead to incorrectly classifying negative impacts as 'positive' when the organization has contributed to the negative impacts caused by the other party or when it is directly linked to them. Therefore this provision should be clarified by stating that this is only the case when the organization is not connected to or involved with such negative impacts (it has not caused, contributed to nor it is directly linked to them).	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	We support the retention of the steps for assessing impact materiality.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 5

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	It would be helpful to include one example for each type of involvement with negative impacts: impacts that the undertaking has caused, impacts that the undertaking has contributed to, and impacts that are directly linked to the undertaking's operations, products and services by business relationships, consistent with international due diligence instruments.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 6
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend changing 'employees and/or workers' representatives' to 'workers, including employees, and workers' representatives', to make sure that non-employees are also considered.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	This paragraph states that information on ongoing/implemented remediation action for potential negative impacts shall be considered material and reported in accordance with ESRS 2 GDR-A. This implies that, in the absence of this provision, reporting such information could be deemed to be not material, raising the question as to whether entire DRs in ESRS 2 (e.g., on actions) may be able to be omitted based on materiality. We do not believe that entire DRs in ESRS 2 should be able to be omitted on the basis of materiality since they elicit essential information about an undertaking and its approach to material topics.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 13
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Variation is not the only trigger of material differences that require disaggregation. For example, biodiversity impacts are location-specific, requiring a clear understanding of where those impacts occur to effectively assess and manage them.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	51.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The third paragraph should read 'impacts, risks and opportunities that may be material' instead of 'material potential impacts, risks and opportunities'. Both potential and actual impacts need to be considered in the materiality assessment.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	AR 17 states that "Once identified as material, they are aggregated into topic(s) for reporting purposes, unless not appropriate." We deem it important to aggregate impacts into topics for comparability purposes, such as on a sectoral basis. The list of material topics should then be supported with a description of the specific material impacts. We suggest aligning verbatim with GRI 3-2-a and 3-3-a for this purpose.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	This statement seems to suggest that the undertaking may omit entire DRs in ESRS 2 (e.g., IRO 1, IRO 2) on the basis of that information being assessed as not material. We do not believe that entire DRs in ESRS 2 should be able to be omitted on the basis of materiality since they elicit essential information about an undertaking and its approach to material topics. We believe the DRs in ESRS 2 should be required of all undertakings, and only material information should be reported for each of those DRs.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 20
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The definition of business relationships should be clearly stated in the body of ESRS 1 and the examples in paragraph 68 should be extended to include other business relationships, to avoid misinterpretation that business relationships are limited to investments.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend avoiding the use of 'directly connected' to avoid confusion with 'directly linked'. Whether a lessor has contributed to or is directly linked to the impacts of the leased asset is dependent on the specific circumstances.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We have had discussions with our auditors about the definition of 'comparable' data. In finance, there is a difference between published and restated data. For the sustainability statements, in order to keep the workload management, we suggest that the norms clearly state that the undertaking can report "published" n-1 data. This would provide clarity and avoid the potential question of auditors to restate the n-1 data for all metrics.	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Typo in sentence, need to add 'reasonable effect' after 'every'	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Can it be clarified if this is also applicable for mergers?	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Table of Content: Appendix C should be before Appendix B since "assessing impacts" are part of DMA and thus more related to App. A.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	7.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Why linkage to ESRS 1.21 instead of including the definition of materiality of information as core element of a faithful presentation under ESRS 1.19?	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Option for reporting on IRO level or topical level. However, ESRS 1.AR17 states that the reporting should be done on a topic level while ESRS 1.AR21 permits to report a material IRO on a sub-topic level. Given the general permission and flexibility of a bottom-up approach on IRO Level, the mapping between IROs, topics and disclosure requirements should be flexible in the same way. So far no further guidance is integrated for mapping IROs to DRs (only in the NON-MANDATORY implementation guidance). Thus, complexity for implementation is not decreasing and dependent on companies' auditor alignment the results of DMA will probably be not comparable between companies.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	22.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Why should mitigation measures not be accounted for in the assessment of actual negative impacts that have occurred in previous periods? Some companies might have set up lots of efforts and mitigation measures to reduce impacts in the past, resulting in no material impacts for the company in the current period. Why should a company report on an impact that it has managed well on a company level, maybe for several years? This would not represent material information anymore for their stakeholders. Example: water pollution on the own activity level. Companies faced water pollution some decades ago; however, due to successful mitigation measures in the past, this impact has not existed in their own operations level since decades. Moreover, please consider the deletion of the rephrasing of the following: "Where the impact is deemed material based on this assessment, the undertaking shall disclose the remediation actions undertaken and their expected or actual outcomes. " The wording indicates a disclosure requirement of remediation actions on the level of each material impact.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Who and how should define "significant ongoing mitigation and /or prevention actions"? This will lead to discretionary rules since a common framework/benchmark for "significant" actions is missing and is very specific for each company and sector. The way of operationalisation is unclear. e.g. a mitigation measure that equals current legal requirements would lead to ongoing reporting about this specific impact while a company fulfils all legal requirements that are stipulated to avoid this negative impact.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The way of operationalization is totally unclear. The risk for incomparable results of DMAs related to different companies still remain. Furthermore, all measures that are decided and implemented in a company during the reporting period should be included in the assessment of an impact. Similiar to financial reporting, a provision has also to be evaluated including counter measures that influence the provision at the end of a reporting period.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 9
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ESRS 1.45-47 could be more linked to ESRS 1.87-89. Firstly, the requirements are a bit doubled regarding undue cost and efforts principle. Secondly, examples are given under ESRS 1.47 but under ESRS 1.89 there is only a general explanation without reference to ESRS 1.47. These sections could be more coherent.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	See remarks related to ESRS 1.22	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 21
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	This amended requirement will help for faithful presentation and comparable information to stakeholders generated by the reporting of different reporting undertakings.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	This new requirements will increase the faithful presentation and comparable information. However, the NMIG 7 is not referenced under ESRS 5.3 and no further specification is given as AR.xx. It could worthwhile to have more practical hints for implementation.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In this context, a reference to ESRS 1.87 could be integrated to avoid discussions about the term "impracticable".	ESRS1	ESRS 1 - 7.1 Presenting comparative information	82.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While we support the general relief for metrics related to ESRS E2 to E5 in case of a joint operation, it remains unclear in which case a parent company may not have (partially) operational control over a joint arrangement although it should have financial control (otherwise this would not represent a joint operation). In addtion, the relief could be also extended to ESRS Sx and G1 since the data gathering for metrics related to these standards may also be burdensome and complicated within a joint operation. We would recommend further specification.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We can follow the approach under ESRS 1.94. Nevertheless we would recommend to integrate ESRS 1.94 with ESRS 1.81-84, e.g. as "changes related to sustainability information and presenting comparative information". Both requirements describes the process for comparative figures and other sustainability information.	ESRS1	ESRS 1 - 7.6 Changes in the preparation or presentation of sustainability information	94.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We support the explanation about the reporting on material opportunities. We would highly recommend to precise that this requirement only affects "material" opportunities. So far this term is missing in ESRS 1.102 and in the sub-headline "Reporting on opportunities".	ESRS1	ESRS 1 - 7.9 Reporting on opportunities	102.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We highly support this increasing flexibility for additional disclosures that are not related to material IROs but relevant information items for specific stakeholder needs. However it could be worthwhile to align the requirements with ESRS 1.107 (b). Otherwise we would expect different levels of qualitative characteristics of information within the sustainability statement.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The wording of this AR should be revised to adopt a more flexible approach when introducing examples, avoiding prescriptive language that may limit interpretation or implementation. Parts of the AR that do not add any further value to the reporting requirements should be deleted.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Despite it is voluntary (may), the requirement to include a summary of the report should be removed and not prescribed by the standards. As it would result in duplicated information and unnecessarily increase the length of the report.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	109.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This datapoint, among others, demands an overly detailed level of interconnection between impact, risk and opportunity disclosures (IROs), policies, actions, and targets. We believe this granularity is unnecessary and may complicate the reporting process without adding proportional value. A more practical approach would be to establish correlations at the topic level only, without requiring the inclusion of empty content or endless cross-references for each individual policy, action, and target.	ESRS1	ESRS 1 - 9.1 Connected information	113.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We strongly advocate for the possibility of referencing documents that form part of the management report, even if they are subject to a different level of assurance. This flexibility is essential to ensure coherence and efficiency in reporting. For example, the Annual Corporate Governance Report and the Annual Directors' Remuneration Report contain relevant and complementary information that should not be duplicated within the ESRS disclosures. Enabling cross-references to these documents would significantly reduce redundancy, avoid unnecessary extension of the report, and mitigate the risk of inconsistencies arising from repeated content. We consider this approach both practical and aligned with the principles of proportionality and relevance.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	118. (d)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	ESRS 1.AR 26 in reference to ESRS 1 3.7 may result in a high number of new datapoints depending on its interpretation by auditors. EFRAG should clearly state that the disaggregation of data is voluntary ("may...") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload and unjustified burdens for the disclosing company (information may not be available or only with high effort) - NEW	ESRS1	ESRS 1 - 4. Due diligence	AR 26
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	It is utmost important to clarify that the materiality assessment shall not be reperformed every year in case no significant changes in the assumptions/circumstances occurred. The way it is written could lead to confusion and it seems anyway the undertaking shall reperform the assessment every year.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This requirement is not a relief but constitues a behavioural obligation, which contradicts Paragraph 5 stating that "the ESRS do not mandate behavior but set Disclosure Requirements[...]". Secondly, it is inconsistent with the possibility of investments or divestments being part of the business strategy to achieve the target. It should therefore be deleted and the initial paragraph 85 should be reintegrated: "Sometimes, it is impracticable to adjust comparative information for one or more prior periods to achieve comparability with the current period. For example, data might not have been collected in the prior period(s) in a way that allows either retrospective application of a new definition of a metric or target, or retrospective restatement to correct a prior period error, and it may be impracticable to recreate the information (see ESRS 2 BP-2). When it is impracticable to adjust comparative information for one or more prior periods, the undertaking shall disclose this fact."	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Defining the long-term horizon as >5years, without limiting it to a certain number of years (e.g. >5-10 years) makes it very challenging to evaluate and estimate the severity and likelihood of Impacts, Risks and Opportunites. Due to the volatile nature of different factors that influence these IROs it is often very challenging to estimate the severity & likelihood of an impact, if the time period has an open end. We therfore recommend to limit the long-term horizon, e.g. to >5-10 years in order to generate meaningful outcomes.	ESRS1	ESRS 1 - 6.2 Time horizon: definition of short-, medium- and long-term for reporting purposes	78.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Please add "opportunities" after "[...] of risks [...]" -> "[...] materiality assessment of risks and opportunities."	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 16
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ESRS 1.AR 26 in reference to ESRS 1 3.7 may result in a high number of new datapoints depending on its interpretation by auditors. EFRAG should clearly state that the disaggregation of data is voluntary ("may...") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload and unjustified burdens for the disclosing company (information may not be available or only with high effort). ESRS 1.51 stipulated different level for aggregation and "other appropriate level". The segment approach (which is based on a management approach under IFRS) could be highly relevant category for aggregation and should be added as an explicit category.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This requirement might be very complex as the undertaking has to agree with the external auditor which are these significant event, considering this entity is a new acquisition and we don't even know it. Moreover, it is not clear why to report on "significant events" in relation to the "Subsidiary's or business's exposure to material IROs". In our opinion, significant events should only be considered in case that they might affect the overall evaluation of material IROs on group level. Suggestion to either delete or further clarify paragraph.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	73.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please change the phrase "[...]over the short, medium or long term" to "[...] over the short, medium and/or long term" in order to make more clear, that impacts cannot only occurr, e.g. EITHER in the short OR in the medium/long term, but that impacts can occurr over several time horizons, e.g. over the short, medium, AND long-term. Moreover, please amend and specifiy as follows: "The time horizon is intended to classify both when a material impact/effect occurs (or is expected to occur) and how long the effect is expected to last. If it can be assumed that the impact will decrease or disappear completely in a future time horizon (e.g. due to the implementation of certain actions/policies) and this impact therefore falls below the materiality threshold in the assessment, then the respective time horizon does not apply. Only the period in which the impact is assessed as material must be declared externally."	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While the sentence "ARs also include text where the term 'shall consider' is used to indicate issues, resources or methodologies that the undertaking is expected to take into account or to use in the preparation of a given disclosure. " tries to specify the use of "shall consider", it is a contradiction to para. 5 where it states that "The ESRS do not mandate behaviour [...]". A "if applicable" should therefore be added. Additionally, "shall consider" is not consistently applied as sometimes only "shall" is used (eg. ESRS E1 Ar 4 and 5).	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	15.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	It remains unclear who "primary users", "users of general purpose sustainability statements" refer to and at what point an information is considered "necessary". The proposed wordings risks an expansion of the information provided by companies as sustainability information might be interesting for a very broad group of users. "Decision-usefulness" should be key for sustainability information as well.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The examples are not very helpful as these are rather obvious connections. However, the supply chains of mulitnational companies are much more complex. Including examples should not be part of the disclosure requirements but could be part of the NMIG and should be deleted here.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 6
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The Appendix C should be deleted as it rather adds complexity to the topic and might require additional documentation effort as part of the audit procedures.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 9

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The part"Under the CSRD, the management of the undertaking shall inform the workers' representatives at the appropriate level and discuss with them the relevant information and the means of obtaining and verifying sustainability information. The workers' representatives' opinion shall be communicated, where applicable, to the relevant administrative, management or supervisory bodies." should be deleted. This is part of level 1 legislation. Additionally, it seems to indicate behavioural obligations going against para. 5.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 11
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Reasonable and supportable information is subject to the interpretation of auditors. A clear definition is missing otherwise it undermines the level playing field and will be applied unevenly.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	88.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	A "balanced consideration of the costs and efforts" is subject to companies and auditors interpretation. If at all, the relief might be helpful for wave 2 companies but at what point is a multinational company able to use this argumentation?	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	UNICEF	NGO	United States			I agree	UNICEF welcomes the requirement to provide entity-specific disclosures on material topics that an ESRS does not cover. UNICEF seeks decision-useful material disclosures on the impacts companies have on child rights, and these are often specific to a particular company or sector and therefore not included in the ESRS. Given that EFRAG will no longer create sector-specific standards, we encourage a strong emphasis on the importance of entity-specific material disclosures in EFRAG's communications and a clear direction that companies should not take the ESRS as an exhaustive checklist. It is important to note that children are still not commonly considered as a stakeholder by business in their reporting, with only 13% of large companies reporting that they identify, consult or engage with children as a stakeholder group in a recent UNICEF study (Corporate Reporting on Children's Rights, 2025).	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	UNICEF	NGO	United States			I partially agree and partially disagree	UNICEF welcomes the reference to "available best practices and/or available frameworks and reporting standards" in the context of entity-specific and sector-specific disclosures. We encourage EFRAG to broaden the examples beyond GRI/IFRS to include other credible disclosure guidance published by multi-lateral and multi-stakeholder organizations. For example, companies can improve the quality of their child rights impact disclosures by using UNICEF's guidance briefs for "Children as stakeholders at heightened risk of adverse impacts", "Children's Rights and Double Materiality" , and "Reporting on children's rights under the social standards" , as well as UNICEF's "Disclosure Recommendations for Corporate Reporting on child rights impacts in relation to the digital environment". These resources and frameworks have all been created to be interoperable with ESRS; referencing their availability and increasing their profile will help ensure that companies make entity-specific and sector-specific disclosures about material impacts on children. See: https://www.unicef.org/reports/unpacking-childrens-rights-under-european-sustainability-reporting-standards and https://www.unicef.org/childrightsandbusiness/workstreams/responsible-technology/reporting	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	UNICEF	NGO	United States			I partially agree and partially disagree	While the substance of ESRS 1 hasn't changed (i.e., that the results of human rights due diligence should inform the materiality assessment), UNICEF believes that the prior ESRS was clearer in this regard than the exposure draft. UNICEF recommends that EFRAG revert to its original text ("The materiality assessment of a negative impact is informed by the due diligence process defined in the international instruments of the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinational Enterprises."). This clarity will be especially important in the context of emphasizing a "fair presentation framework" and entity-specific disclosures.	ESRS1	ESRS 1 - 4. Due diligence	54.
Excels	UNICEF	NGO	United States			I agree	UNICEF welcomes the option for companies to "use appendices or separate sub-parts in its sustainability statement." Decision-useful disclosures about impacts on child rights may require the inclusion of detailed, nuanced, and complex information, especially for experts, and this might be facilitated by the option to refer to appendices with more information.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	110.
Excels	UNICEF	NGO	United States			I agree	UNICEF welcomes the emphasis that the results of engagement with affected stakeholders as part of its due diligence process to identify, assess, and address adverse impacts provide critical input to a materiality assessment, without necessarily putting in place a separate engagement process for the materiality assessment. Children are essential stakeholders for companies to consider in a materiality process, but gathering the insights, interests, and views should be undertaken with due care, and it may not always be appropriate to engage with children directly as part of a materiality assessment. For this reason, the flexibility to incorporate the results of engagement undertaken during due diligence, rather than being constrained by a narrow materiality process, is welcome.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	33.
Excels	UNICEF	NGO	United States			I partially agree and partially disagree	UNICEF welcomes the emphasis on "persons in vulnerable situations" in the context of stakeholder engagement to inform the impact materiality assessment. However, we believe it is essential to specifically reference children as a stakeholder category in the materiality assessment, considering (1) the increased emphasis on the materiality of information as an overarching filter for report content and (2) the importance of entity-specific information related to child rights (see our response to ESRS 1-10). While children as a stakeholder category are mentioned elsewhere (e.g., S3-2 and S4-2), we think that effectively addressing impacts on children also necessitates explicitly referencing children as a stakeholder in ESRS 1 for the overall impact materiality assessment.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UNICEF	NGO	United States			I disagree	The removal of the term "for example" from the list of economic, social, cultural, civil, and political rights of relevance to ESRS S3 and ESRS S4 in Appendix A - List of Topics is highly problematic and contradicts one of the core tenets of human rights-based approaches. For example, Principle 18 of the UNGPs states that companies "should include all internationally recognized human rights as a reference point, since enterprises may potentially impact virtually any of these rights." By removing the term "for example", these parts of Appendix A become a narrower list of sub-topics, creating the risk that companies will use this list as an exhaustive checklist, rather than considering the full range of economic, social, cultural, civil, and political rights relevant to consumers and end-users. There are many examples, but education (UDHR 16), peaceful assembly (UDHR 20), and culture (UDHR 27) are all human rights of relevant to consumers and end-users. Referencing all potentially relevant human rights, not just a subset, is significant in the context of emphasizing a "fair presentation framework" and entity-specific disclosures, as it provides the full range of potential impacts for companies to consider.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We suggest complementing Appendix A with respect to the sub-topics related to ESRS E5 as follows, consistently with § 4 of the topical standard: "Resource inflows (including mineral and biotic marine resources)".	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	9.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We suggest complementing the last sentence ("such as…") with situations that could lead to provide entity-specific disclosures by referring to the inclusion of upstream and downstream value chain data when disclosing on metrics, consistently with AR 28.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	See our comments to question 25 in Part 2 of EFRAG's survey. § 16 indicates that fair presentation requires disclosure of "relevant information that meets the conditions in paragraph 21" which refers to the materiality of information. We believe this wording is inconsistent with QC 4 according to which materiality is an entity-specific aspect of relevance. Overall, we recommend that EFRAG align ESRS 1 with IFRS S1 wording to enhance interoperability between both reporting frameworks.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	Should the fair presentation principle be confirmed in the revised Set of ESRS, we encourage EFRAG to provide guidance on how to deal with situations where the Set 1 has been considered as a compliance framework: how to deal with any changes in the information that is presented with respect to comparative information?	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	In connection with the comment made on line 5, we recommend that EFRAG restructure § 19 to better articulate it with § 16 as the beginning of the sentence overlaps with § 16.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We believe that the term "usually" used in the first sentence of § 59 should be further explained / justified as it could lead to different interpretations of what own operations cover, therefore leading to divergence in pratice. Besides, we suggest clarifying which "assets and liabilities" recognized in the balance sheet have to be considered as own operations since some assets and liabilities may be considered to be related to the downstream value chain in the financial sector. We also suggest adding explanations regarding "income and expenses" since, as with assets and liabilities, the current wording may not be sufficiently clear to conclude if the underlying activity is part of the own operations or of the downstream / upstream value chain, particularly in the service industry.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	It should also be clarified that joint operations accounted for in accordance with IFRS 11 and that joint ventures accounted for in accordance with proportionate consolidation under local GAAP are part of an entity's own operations. This being said, the treatment of joint operations under social standards should be further clarified.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend replacing "relevant EU law and regulation" with "voluntary reporting standard to be adopted by the Commission by means of a delegated act" to align the reference to the value chain cap with what is presented in the Recommendation issued by the European Commission end of July 2025 on a voluntary sustainability reporting standard for SMEs (cf. Recital 14 according to which the value chain cap "would be defined by the voluntary reporting standard for use by undertakings with up to 1000 employees, to be adopted by the Commission by means of a delegated act and based on the VSME standard developed by EFRAG.").	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	Proposed § 65 indicates that the DMA regarding the upstream/downstream value chain may be conducted without direct information from counterparts. While this is not as such contradictory with § 62 given the flexibility introduced by this § which removes the previous "two-steps approach" under former § 69 (i.e. first try to collect direct data with reasonable effort, then estimate), we suggest EFRAG refine the wording to better align it with § 62 (or refer to this §) which states that in the identification of material IROs in the upstream/dowstream value chain, the undertaking may use information collected directly from counterparties in the upstream/downstream value chain, or estimates, depending on practicability and reliability considerations relating to the necessary input.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	65.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	The sentence "With reference to metrics, in many cases (…) the undertaking may be able to comply with the reporting requirements by using an estimate without collecting data from the actors in its upstream and downstream value chain" should be redrafted (or even deleted ?) to be consistent with the fact that new § 62 allows for the use of information collected directly from counterparties in the upstream and downstream value chain or estimates, depending on practicability and reliability considerations related to the necessary input, for the reporting on all metrics. Current wording seems to implicity refer to a "two-steps approach" (first try to collect direct data with reasonable effort, then estimate) for certain metrics, whereas it no longer exists considering the amendments proposed to former § 69.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	67.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We regret EFRAG has not provided guidance to address the specificities of the definition of the value chain for the financial sector. We would indeed have welcome clarifications on the scope of the downstream value chain for financial institutions.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We note that former § 67 under ESRS 1 has been modified so that it now no longer covers joint ventures that are proportionally consolidated (as it is the case, for example, in the consolidated financial statements under French or Spanish GAAPs). Based on this redrafting and on the definition of own operations provided under § 59, we understand that such joint ventures are part of the own operations, but we recommend that EFRAG further clarify this. This clarification would also be helpful for joint operations that are accounted for using a similar method under IFRS 11, consistently with the clarifications made by EFRAG in IG 2.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	69.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We strongly recommend that EFRAG provide illustrations in the MNIG, in particular with respect to the reporting of GHG emissions under ESRS E1, to further explain: "This means that the undertaking considers both its relationship as investor and its supply/customer relationship in calculating the relevant metrics, while avoiding double counting."	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	69.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend clarifying that the exception provided for leases is applicable to all DRs in the topical standards and to the reporting of GHG emissions in ESRS E1 in particular, as this implies a difference with the GHG Protocol on which ESRS E1 is based upon (when the financial control approach is applied).	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We note the "disconnection" that the relief introduces with the financial reporting perimeter but also acknowledge the difficulties in preparing sustainability information with respect to disposals / acquisitions which occur in the course of the reporting period. With respect to disposals, we recommend clarifying that residual risks may still be identied at group level, after control has been lost, therefore possibly affecting the outcome of the DMA of the group. Besides, considering this relief, we believe it is important EFRAG clarify what are the consequences on the presentation of comparative information when an acquisition is included in the sustainability statement for the first time (i.e. in the reporting period that follows the reporting period when the acquisition has taken place). Shall prior year figures be restated taking into account the acquired company from the date of acquisition? What contextual information shall be provided when the acquired company is included in the sustainability statement for the first time?	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	Contextual information will be key to users to understand the consequences of major acquisitions / disposals when the relief is applied. We recommend adding a distinct datapoint to require at least a brief description of the business model of the acquired entity and of the expected additional material sustainability topics/sub-topics in relation to the acquired company (if any), together with key metrics (such as the number of employees).	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	73.
Excels	Forvis Mazars Group	Auditor	Belgium			I disagree	We strongly recommend deleting this § given that joint operations require, overall, further investigation from EFRAG. Besides, the concept of operational control on which this § relies on still lacks clarity in the ESRS. Finally, the way the relief is drafted seems to imply that the additive approach is still required in the revised ESRS, which is not the case based on the proposed ESRS E1 (and no other standard refers to operational control in the proposed revised set of ESRS).	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	The draft revised ESRS 1 still requires to restate comparatives when the undertaking has identified new information relating to the estimated figures disclosed in the preceding period and the new information provides evidence of circumstances that existed in that period. The revised standard further precises that this a "change in estimate". Since the preparation of the sustainability statement implies to use estimates frequently, requiring systematic restatement when changes arise is in our view not relevant, in particular for the financial sector that prepares its sustainability information based on prior year figures provided by the non-financial sector. We therefore encourage EFRAG to refine § 94(b) to better define situations where restating comparative figures is mandatory and to clarify that the filter of materiality also applies to this information. Finally, we also recommend specifying that comparatives shall not be restated as a result of acquisitions/disposals when the relief for acquisitions and disposals proposed under § 72 has not been applied in the reporting period when the undertaking acquires a subsidiary/business or loses control over a subsidiary/business.	ESRS1	ESRS 1 - 7.6 Changes in the preparation or presentation of sustainability information	94. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I disagree	As new reliefs have been introduced with respect to the preparation of value chain information (see in particular para 87 (c) on "undue cost or effort"), we believe there is no need to keep such transitional provision.	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	123. (a)
Excels	Forvis Mazars Group	Auditor	Belgium			I disagree	Regarding EU Taxonomy disclosures, former § 113 in ESRS 1 indicated that "These disclosures are not subject to the provisions of ESRS, with the exception of this paragraph and the first sentence of paragraph 115 of this standard." We note that such sentence has been deleted in the revised ESRS 1 therefore questionning whether the presentation of EU taxonomy disclosures are still to be dealt with regardless of the principles governing the presentation of ESRS disclosures on material IROs listed in ESRS 1. It is critical to clarify whether ESRS general principles (e.g. fair presentation, the materiality filter, the "undue cost or effort" general relief, etc.) apply to EU Taxonomy information or not. Given that EU Taxonomy disclosures are covered by specific regulations / FAQs and due process, we believe it is important that the sentence quoted above be kept in the revised version of ESRS 1 to avoid misinterpretations. This beig said, and as indicated under question 34, we encourage the EC to align ESRS and EU Taxonomy reporting frameworks as much as possible in particular with respect to reliefs granted to companies.	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	106.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	§ 110 seems to implicitly indicate that using appendices or separate sub-parts in the sustainability statement does not make any difference and it is therefore equivalent to use either of the two presentation options. As indicated under Part 2 of this survey, we believe that a reader might interpret that information presented in a dedicated appendix is less important than that presented in the main body of the statement. We therefore encourage EFRAG to make a clearer distinction between the two presentation options, and to clarify the situations in which it would be appropriate to use appendices so as not to obscure material information.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	110.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	AR 36 is wrongly referenced to § 109 whereas it relates to § 110.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	AR 36
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	AR 37 is wrongly referenced to § 109 whereas it relates to § 110.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	AR 37
Excels	Bundesverband Deutscher Leasing-Unternehmen e. V..	Association of financial institutions	Germany			I agree	We very welcome this clarification.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	Triodos Bank N.V.	Bank	Netherlands			I agree	For simple understanding of relation between IROs and topics, require a simple mapping table once per topic: list the material IROs driving the topic, or (if reporting at IRO level) the topic each IRO rolls into.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Please clarify whether entity-specific impacts can be reported under the ESRS topics, or whether they automatically form their own topic. Also more guidance or requirements of how to align the ESRS reporting with the undertaking's own impact reporting topics. I.e. 5 transition themes vs. ESRS topics	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	23.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	For transparency, suggest to add that undertakings shall disclose what triggered changes in the results of the materiality assessment from previous periods (acquisitions, regulatory changes, etc.)	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	29.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Agree with it in the materiality assessment, this requirement should also apply to the reporting of various impacts (either in this requirement or under the reporting requirements).	ESRS1	ESRS 1 - 3.3 Double materiality assessment	36.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	This paragraph contradicts the general paragraph regarding the stakeholder engagement (33), Suggest for financial undertakings to require engagement on topics where there have been negative impact breaching laws and regulations aligning with paragraph 33.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 11
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Add suggestion that undertakings clarify when qualitative information was used and when quantitative information was used. If no information available, provide an explanation. For financial institutions specify if they are compliant with IFRS S2. Clearer guidance from EFRAG on how the ESRS comply to the IFRS S2 and increase alignment is needed.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 19
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Include that undertakings must report in their sustainability statements topics that do not have any policies, actions, targets or metrics. For clearer comparison across organisations.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 20
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	Add that if there are negative material impacts recognised with one of the undertaking's stakeholders during the due diligence process, that engagement actions are required to be formulated.	ESRS1	ESRS 1 - 4. Due diligence	56.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Suggestion to add: The undertaking shall disclose (i) the rationale for the chosen value-chain boundary, (ii) the coverage of value-chain information per material topic, and (iii) a brief data-quality grading (e.g., direct data, modelled, proxy, spend-based) for key metrics and comparability across undertakings.	ESRS1	ESRS 1 - 4. Due diligence	60.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Where due-diligence processes inform the assessment, the undertaking shall summarise which steps (stakeholder engagement, identification, action, tracking) informed the value-chain scoping and prioritisation.	ESRS1	ESRS 1 - 4. Due diligence	61.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Propose to add a second sentence: If the value-chain cap constrained information requests, the undertaking shall (i) state this explicitly, (ii) indicate the affected topics/tiers, and (iii) describe alternative approaches used (e.g., sector averages) and residual limitations.	ESRS1	ESRS 1 - 4. Due diligence	63.
Excels	Triodos Bank N.V.	Bank	Netherlands			I partially agree and partially disagree	Suggest to add: where policies/actions/targets do not extend into the value chain for a material IRO, the undertaking shall state this plainly and explain constraints and intended forms of leverage (e.g., codes, contract clauses, engagement, industry initiatives) and time-bound plans to extend coverage.	ESRS1	ESRS 1 - 4. Due diligence	67.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We strongly advocate for a 'net' approach in the DMA and advise against the proposed 'gross' basis for potential impacts. The fundamental purpose of sustainability reporting under CSRD is to provide stakeholders with decision-useful information on an undertaking's actual material IROs. Assessing potential negative impacts before considering significant, ongoing mitigation and prevention actions - the 'gross' approach - fundamentally misrepresents this reality. This method forces companies to report on theoretical, pre-control scenarios, making the reporting exercise academical and unpractical for day-to-day application. This approach will inevitably lead to excessive reporting on well-managed topics, particularly in highly regulated industries. For example, a company with robust, industry-leading safety protocols would still have to report on health and safety as if these controls didn't exist. This buries the truly material, residual (net) risks in a sea of hypothetical information, undermining the goal of providing clear and concise insights to stakeholders. The objective is to report on the most important impacts that remain after effective controls are taken into account. To ensure CSRD reporting remains relevant, practical, and truly informative, materiality must be determined on a net basis. This provides a true and fair view of the undertaking's most significant sustainability matters.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	3.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	We support allowing a' top-down' approach as an option, which we think will simplify the DMA process as it is more in line with how the business is managed. We support the guidance provided in ESRS 1, section 3.5. We believe that in most cases all material IROs will be identified also using a 'top-down' approach. However, we think it would be useful to have some non-mandatory guidance on expected IROs for different industries to avoid overlooking material IRO/(sub-)topics.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	28.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	Regarding the materiality assessment of the upstream and downstream value chain, it should be clarified that the phrase "may be conducted without direct information from counterparts" does not imply that existing information can be disregarded. It could be clarified that any relevant data already available must still be taken into account.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	65.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	The current wording allows for potentially indefinite exclusions of metric data from metric calculations without requiring a mechanism to ensure progressive inclusion and improvement of the quality of the metric data, should the metric data become significant to the metric in the future reporting periods. This wording appears to be overly permissive.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	The current wording allows for potentially indefinite exclusions of metric data from metric calculations without requiring a mechanism to ensure progressive inclusion and improvement of the quality of the metric data, should the metric data become significant to the metric in the future reporting periods. This wording appears to be overly permissive.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	AR 21 states 'When a material impact, risk or opportunity relates to a particular sub-topic, the undertaking needs only to report the material information related to that sub-topic within the relevant topical standard.' This wording would benefit from clarification as the above wording can be interpreted such as reporting is required for all DR related to a material sub-topic, which includes also those which includes those IROs which are not material.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 21
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	We strongly recommend maintaining a double materiality approach – without this, many significant impacts and risks on nature will not be required to be reported, which will reduce the benefit from implementation of ESRS reporting.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Add to the application requirements an explanation that "users of general purpose sustainability statements" include "the undertaking's investors, business partners, trade unions and social partners, civil society and non-governmental organisations, governments, analysts and academics". Without this clarification, the term "users of general purpose sustainability statements" could be interpreted by some companies in a narrower sense, and used to justify exclusions of information that falls under double materiality.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21. (a)
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Allowing companies to merge topics within the reports makes sense. Recommend adding a requirement to reference relevant topics and disclosures. This could be similar to the information presentation guidance in the GRI Standards.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Definition of financial materiality is included. Propose to add definition of impact materiality, which is aligned with GRI, i.e. "The organisation prioritises reporting on those topics that represent its most significant impacts on the economy, environment and people, including impacts on their human rights." see GRI 1.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	25.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Recommend more clearly aligning the wording to the definition of impact materiality in GRI Standards.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	Definition of affected stakeholders - important to keep this point	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	This is helpful and agree with both cases that these are connected with the reporting company. In (b), recommend defining these in more general terms, as explaining this through examples only may lead to some companies claiming that the example does not apply in their case.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 6
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	In addition to "affected communities" add "individuals and groups whose human rights have been affected". As in some cases, persons are not negatively affected themselves but their human rights are affected.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	The requirement to reported expected outcomes from mitigation measures is helpful to avoid sustainability report users assuming that negative impacts have been fully mitigated when the mitigation measures redress issues only partially.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	Agree with the proposed definition of positive impacts. Agree with the decision to not include philanthropic impacts.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	UNEP-WCMC	NGO	United Kingdom			I disagree	Strongly recommend clarifying in the second sentence that information available "without undue cost and effort" includes new information that companies may need to collect to strengthen their understanding and management of impacts, risks and opportunities, which can be obtained with proportionate investment and effort. The current wording of the sentence implies information available "without undue cost and effort" is only the information that companies are already collecting. It is important to revise this to ensure ESRS drive improvements in how impacts, risks and opportunities are assessed and reported over time. IFRS definition of "undue cost and effort" also acknowledges that new information obtained in ways where cost and efforts of the company are balanced out by the benefits of improved information, is still considered as obtained "without undue cost and effort". Given ESRS double materiality approach, the benefit of obtaining new information should be considered as benefit to company as well as people and nature.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Agree with the option of using bottom-up or top-down approach. Recommend asking companies to specify what approach was followed, as this will support the report users in understanding of limitations and assurance.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Agree on the use of reported data or estimates. Recommend adding the provision that companies should specify what approach was used.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	Companies should be encouraged to improve understanding of their upstream and downstream value chain, as for many, that is where the most significant biodiversity impacts, risks and opportunities are found.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	UNEP-WCMC	NGO	United Kingdom			I disagree	This AR could be interpreted as contradicting earlier provisions, which specify that companies should report on their value chain impacts, risks and opportunities. Strongly recommend adding a clarification that companies should still report on their value chain impacts, risks and opportunities, even where the specific metrics in topical ESRS are not available, i.e. by using qualitative descriptions. This may require going beyond the minimum requirement of EU law and regulation.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	We welcome the specification that "balanced effort" is based on costs and efforts for the undertaking and the benefits of the resulting information for all users, i.e., also users of sustainability reporting, like civil society and local communities. This is in line with the ESRS' double materiality approach, which is critical to driving change to more sustainable business action.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	Consolidating information improves readability and comprehensibility. It also allows for streamlining (more compact presentation) of the necessary information in the report. However, in our view, some simplifications will result in a loss of comparability and consistency between companies and their reports. In our interpretation, an imbalance will arise if companies decide for themselves in future whether to report at IRO level or topic level, as disclosure at IRO level would reveal more information than at topic level. Some companies could take this as an opportunity to report at the topic level.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	Depending on the type of stakeholder different views prevail regarding the assessment of the gross-versus-net-perspective on potential negative impacts. We welcome the differentiation between "gross-versus-net"-impacts. However, the dis-closure of impacts regarding "significant ongoing mitigation and/or prevention ac-tions" requires a more nuanced description. We expect diverse interpretations of the term "significant" and potential loss of material information. While illustrations are provided, companies will need to exercise careful judgment, which could lead to incon-sistencies. We suggest providing a decision tree/flowchart in addition to the explana-tion and providing concrete evaluation examples. Additionally, we suggest a better alignment between Appendix C and the main text. The incorporation of the ISSB TIG-approach might be useful to ensure no material in-formation is omitted for net-considerations. From preparers' perspective, a gross approach would lead to disclosures including hy-pothetical risks which are already effectively managed and therefore inflated disclosures and obscure truly material issues. Furthermore, Appendix C brings complexity into the DMA process. Therefore, the IRO-assessment should be done on net-basis and Appen-dix C removed. From auditors' perspective, the new guidelines provide clearer instructions for the in-corporation of remediation, mitigation, and prevention actions into the DMA. This con-tributes to more relevant and comparable reporting across entities.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	The guidance in paragraph 48 (a) is clear; however, the description of the approach in AR 17 is confusing with regard to the methodology for the materiality assessment. It states that the undertaking may assess, on the basis of topics, whether reporting on a given topic is required. Only thereafter are the corresponding IROs to be identified, which must then be reported on. We view this approach critically, as it could lead to a premature exclusion process on the part of undertakings, whereby areas are excluded at the topic level before a more in-depth analysis has been carried out on the basis of the IROs (which then, by applying defined thresholds, determine whether an IRO leads to a material topic or sub-topic). It is understandable that certain topic areas can be excluded at the outset where there are genuinely no points of contact. However, once the undertaking does have points of contact, the assessment of materiality should not be made at the topic level, but rather at the IRO level, in order to avoid overlooking material IROs. This process of reflection is a strength of the materiality assessment from which undertakings can derive significant benefit.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	48. (a)
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	Further specification would be beneficial, as according to prior practice the threshold was determined based on the individual assessments of scale, scope, and, where applicable, irremediability. Under the proposed approach, the methodology would effectively change, as the severity could be established based on any one of these three dimensions alone. The weighting of likelihood, however, would continue to remain at the discretion of the undertaking.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We recommend expanding ESRS 1.50b for all 6 capitals according to IR Frame-work: financial, manufactured, intellectual, human, social and relationship, natural.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	50. (b)
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We recommend specifying that due-diligence procedures serve to inform the assessment of potential material impacts but do not, by themselves, predetermine materiality outcomes.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	58.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	Previously 1.62 and 1.63 have been amended but do still not clarify the appropriate treatment of leased assets. We recommend amending it accordingly. To make it clear for the preparer, clarification needs to be streamlined with E1 requirements as well (i.e. former ESRS E1-6).	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	58.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	Previously 1.62 and 1.63 have been amended but do still not clarify the appropriate treatment of leased assets. We recommend amending it accordingly. To make it clear for the preparer, clarification needs to be streamlined with E1 requirements as well (i.e. former ESRS E1-6).	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	60.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	ESRS 1.81 currently requires an annual reassessment of materiality for all quantitative metrics, regardless of whether there have been any changes in material topics. We recommend either removing this requirement or clarifying that reassessment should only be conducted when there are material changes.	ESRS1	ESRS 1 - 7.1 Presenting comparative information	81.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We miss clear guidance regarding the handling for DMA and the presentation of changes in the scope of consolidation (comparative information, targets ...) not only for the first but following years; 84b only stipulates guidance for the first year.	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	The simplification efforts concerning the double materiality analysis process (DMA-process) strike a balance between simplification and robustness. The increased practice-oriented structure and process descriptions included within chapter 3 concerning the DMA-process is appreciated. In particular, the newly introduced illustrative list of internal and external sources of evidence of information that an undertaking might refer to in the process of its materiality assessment (e.g., external ratings and risk management processes) provides valuable guidance for practitioners. However, while flexibility is beneficial, determining which sources are "sufficient" for a robust materiality conclusion could be subject to interpretation. Companies might need to ensure that their selected sources are comprehensive enough to avoid overlooking material impacts, risks, or opportunities (IROs), and that the evidence gathered is of sufficient quality and reliability. EFRAG could, hence, include via a separate application requirement, examples of what is deemed as "sufficient" – in particular against the background of the newly introduced "undue cost and effort" approach.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Anthesis Group	Consultant (including software vendor)	United Kingdom			I disagree	It may create more work to include remediation actions as part of assessing severity for actual negative impacts. Along with identifying and scoring impacts, companies would need to also provide a list of actions in place to mitigate those actions including dates of when those actions were initiated. This feels like it would create extra work to provide this and apply to scoring.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Henkel partially agrees that the proposed amendments improve interoperability and support simplification objectives, particularly through the emphasis on fair presentation and materiality; however, we see room for improvement in clarifying the fair presentation principle and refining the definition of materiality (e.g. users) to avoid overly broad or unclear disclosure requirements. Otherwise it may lead to too much interpretation and discussions with auditors.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Henkel supports the deletion of the sub-sub-topics in Appendix A. However, especially for S- and G-standards, the former sub-sub-topics are now being listed in brackets. It remains unclear how this list should be treated: just examplary or binding? We propose to treat them as examplary and hence, to start the lists in brackets with an "e.g.".	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	AR 17
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Any evaluation of potential negative impacts must be done taking into consideration ongoing mitigation and prevention actions which are considered as "standard" for a specific industry or sector. Otherwise topics undertakings would need to report on topics which in reality are not material.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Financial risks related to employee benefit funds (defined benefit plans) are reported as part of risk management. Any other ESG related risks are hard to quantify due to constant changes in investments. Moreover, the sentence is hard to understand and leaves room for interpretation. We suggest to delete the requirement for non-financial undertakings as the information has no decision making value to stakeholders.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Kirchhoff Consult	Consultant (including software vendor)	Germany			I disagree	It is completely impractical to link every single policy, action and target verbally to at least one IRO. Often, this link is already apparent from the context of the information contained. There are various companies that have identified 100-200 IROs as material. This paragraph therefore leads to a situation that can only make auditors happy. We propose that the data point should be amended to stipulate that the IRO reference must be clear, but does not need to be explicitly mentioned again.	ESRS1	ESRS 1 - 9. Connected information and linkages with other parts of corporate reporting	113.
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	Paragraph 21 states that material impacts are the same as "principal" impacts. Then there is a similar sentence about thresholds: 'Some existing standards and frameworks use the term "most significant impacts" when referring to the threshold used to identify the impacts that are described in ESRS as "material impacts".' Since this sentence is about impacts, we can interpret the other "existing standards and frameworks" as referring to GRI rather than to IFRS. Indeed, GRI 3 does define "material" as "most significant". I conclude that ESRS 1 appears to be calling for disclosures about the most significant impacts rather than about all significant impacts. Incidentally, it is not useful to put words in inverted commas without explaining which document they are quoting from. [continued below.]	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	It is useful here to compare the words "material" and "significant" which are used extensively in all the sets of standards. In IFRS, "material" is a technical term, defined in relation to the effects of information on economic decisions. By contrast, "significant" is not a technical term, being used to describe events or changes. An event might be small (e.g. the theft of 0.5% of a company's assets by its finance director) but still be relevant for investors' decisions, not least when voting on board appointments. [continued below.]	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	Many disclosures under IFRS do not involve numbers. However, when expressing materiality in terms of percentages, some auditors refer to 5% of profit. By contrast, "significant", when defined numerically in IAS 28, means a 20% threshold. Thus, "material" appears to mean something smaller than "significant" when numbers are involved. It would be perverse if this did not also apply for non-numerical disclosures under IFRS. [continued below.]	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	So, under IFRS, small things and perhaps things that are not "significant" can still be material and therefore require disclosure. By contrast, GRI and then ESRS state the opposite: only the "most significant" impacts are material and therefore require disclosure. This implies that an entity should rank its impacts under the separate themes of environment, human rights and so on, which is what GRI 3 requires (in its Section 2.2). The ranking might help to operationalise the concept. However, should the entity then disclose its two largest impacts per theme, its six largest impacts or some other number of them? [continued below.]	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	A contrast can be made to the procedure for financial materiality. Even the largest impact in a particular theme might still not be financially material, because it is not expected to affect the decisions of primary users. Alternatively, the ten largest impacts might all be financially material. That is, financial materiality does not require the ranking of impacts. The entity should disclose the ones that it expects to affect the decisions of primary users, which might be no impacts or might be very many.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Royal Hollway University of London	Academia	United Kingdom			I disagree	In conclusion, I cannot tell from the words in this ESRS how much to disclose. Especially as the purpose of the reporting is not clear.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	The purpose of impact reporting is not explained here or in para. 16. The absence of a purpose makes it hard for preparers, auditors and regulators to know what is material.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	20.
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	IG 1 (para. 140) claims that ESRS 1's financial materiality is aligned with that of IFRS S1 (and therefore with IAS 1). However, this seems to be contradicted because ESRS also states that its financial materiality is "an expansion of the scope of materiality" used when preparing financial statements (para. 38) because it includes risks and opportunities of relationships beyond the consolidated statements. This is confusing because IFRS financial materiality does include the effects of such external forces on the entity if they would affect primary users' decisions.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	38.
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	IAS 1 (para. 30A) states that an entity "shall not reduce understandability …". This is a clearer instruction than ESRS's reference to "obscuring" (in para. 37 or 21). I would copy IAS 1 here.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	37.
Excels	Royal Hollway University of London	Academia	United Kingdom			I partially agree and partially disagree	There is no clear guidance in ESRS to match that in IFRS S1 that distant impacts are less likely to be material. ESRS 1 (e.g. para. 32) does require assessment of materiality to include the "likelihood" of impacts. However, likelihood and time-distance are different issues (though sometimes connected), and they are mentioned separately in S1. Under IFRS, a time-distant outflow or impact is still discounted even if it is highly likely.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	32.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I agree	There is a typo "The undertaking shall make every dt to ensure..."	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	AR 35 should deleted. New provisions of CSRD amended will be transposed in national legislation. AR 35 is not useful and cannot require additional disclosure.	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	AR 35
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Para. 40 seems to introduce some form of unnecessary guidance rather a disclosure requirement, considering in particular indent c). It should be deleted.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	40.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The last sentence of AR 22 is confusing considering new flexibility given to preparers to determine the appropriate level of aggregation/disaggregation. "not obscuring" is a principle included in the definition of materiality. No need to repeat it here.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The second part of para. 116 ("to support the understanding…") introduces a new requirement that is not clear (what is the level of consistency ?). This provision should be deleted.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	ETUC	Trade union	Belgium			I agree	This is crucial for understanding impact materiality assessment	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	ETUC	Trade union	Belgium			I agree	This is crucial for understanding impact materiality assessment, in particular the point on reporting on the opinion of workers' representatives	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	Comment related to Appendix A: In the subtopics listed for ESRS E4 the expression in brackets "(terrestrial and marine habitat change, invasive species)" should be deleted, as this list is not consistent with the five drivers mentioned in E4 and recommended by IPBES.	ESRS1	ESRS 1 - Objective	9.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Comment related to Appendix A: To provide preparers with more certainty which topics need to be assessed and to increase the comparability of materiality assessments and reported information, the list of sustainability topics in Appendix A (former AR 16) should be a mandatory starting point instead of non-binding guidance. The second part of the first sentence introducing Appendix A ("and provides non-binding guidance to support the application of provisions in this Standard.") should be deleted. Paragraphs 9 and 23 of ESRS 1 should explicitly state that it is expected from undertakings to consider the list in Appendix A when conducting the materiality assessment.	ESRS1	ESRS 1 - Objective	9.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Para. 27 lists usual internal and external sources of evidence and information that the undertaking may use in conducting a materiality assessment. Environmental managementsystems (e.g. ISO 14001 or EMAS) provide a useful basis for conducting the impact materiality assessment for environmental topics and should therefore be explictly listed here.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	27.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Glossary: The definition of "actual impacts" should not only those that have already occured but also those that are currently occuring. Change definition to: "Impacts that have already occured in the reporting period or in prior years or those that are currently occuring in the repporting period."	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Feedback submitted as part of the online questionnaire.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	30.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Para. 47 lists information sources that are deemed to be available without undue cost and effort. This list should not be exhaustive. Change second sentence to: "At a minimum, information…is considered available to undertaking without undue cost and effort"	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Feedback submitted as part of the online questionnaire.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I agree	An important part of EFRAG's mandate to revise the ESRS is to increase consistency with other pieces of EU legislation. For this reason, we urge EFRAG to maintain the possibility to incorporate information by reference from EMAS environmental statements (Regulation (EU) No. 1221/2009). ESRS 1 para. 119 should clarify that, in line with the FAQ issued by the European Commission in August 2024 (para. 71), that the validation of environmental information provided by EMAS Environmental Verifies can be considered to be at least at the same level of assurance as the CSRD limited assurance requirement.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	119.
Excels	FBF	Association of financial institutions	France				Positive impacts should emerge from the business model of the undertaking (goods and services only), but they should not depend on the concept of "philanthropy" in order to be disclosed. A member from the French Banking Federation suggests that it should be allowed to highlight sponsoring actions as part of the unique engagement of the undertaking beyond its own business model. Therefore, it should be allowed to consider sponsoring from the double-materiality assessment to the disclosure of information."	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	36.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	§ 59 currently indicates that: "In the case of group reporting, the reporting undertaking usually considers as part of its own operations (…)." We believe that the term "usually" should be further explained / justified as it opens the door to very different interpretations of what own operations cover, therefore leading to divergence in practice and lengthy debates between preparers and auditors.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	With respect to the first sentence of this paragraph, we suggest adding explanations regarding "assets and liabilities" recognized in the balance sheet. For example, those recognized in accordance with IFRS 9 or a similar standard might not be considered as own operations but as value chain (consistently with the financial statements). We also note that activities of the reporting undertaking may be conducted under various schemes without having recognized any asset. We therefore recommend that EFRAG provide NMIG to consider various situations such as service concession arrangements, operation and maintenance contracts, etc. We also suggest adding explanations regarding "income and expenses" as this indication seems not sufficient, particularly in the service industry, to conclude if the activity is related to the own operations of a group or to its value chain.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We recommend clarifying that the removal of the systematic preference for direct data in calculating value chain metrics does not mean undertakings are exempt from reporting altogether when direct data is unavailable. Companies should still be expected to report by make estimates using available information. This ensures that metrics remain meaningful and comparable, even when obtaining direct data is not practicable.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The reference to the value chain cap needs to be more specific than a reference to "the relevant EU law and regulation" and aligned with the Recommendation issued by the European Commission on 30th July 2025 on a voluntary sustainability reporting standard for small and medium-sized undertakings. The latter includes a reference, in Recital 14, that the value chain cap "would be defined by the voluntary reporting standard for use by undertakings with up to 1000 employees, to be adopted by the Commission by means of a delegated act and based on the VSME standard developed by EFRAG." We therefore suggest replacing "relevant EU law and regulation" with "voluntary reporting standard to be adopted by the Commission by means of a delegated act".	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The absence of specifications regarding the treatment of the value chain for the financial sector will lead to inherent difficulties for auditors. Further clarification and specifications will be needed to address this question notably regarding the considerations or not of "investee companies in case of management on behalf of third parties" (off-balance sheet assets).	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We note that former § 67 under ESRS 1 has been modified so that it now covers only joint ventures that are accounted for under the equity method. It therefore no longer covers joint ventures that are proportionally consolidated (as it is the case in France under local GAAP). Based on the definition of own operations provided under § 59, we understand that joint ventures which are proportionally consolidated are own operations. New § 69 therefore seems to have been redrafted consistently with this definition. We recommend EFRAG further clarify in ESRS 1 that joint ventures accounted for under the proportionate consolidation method are own operations. Considering joint operations (which is an IFRS concept) that are accounted for using a similar method, clarifying that JOs are also own operations under ESRS would be helpful as well (consistently with the clarification in IG 2).	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	69.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We believe it is necessary to clarify that the exception provided for leases is applicable to all the disclosure requirements in the topical Standards and to the reporting of GHG emissions in ESRS E1 in particular, as this is a difference with the GHG Protocol on which ESRS E1 builds (when the financial control approach is used).	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The question of long-term employee benefit funds needs to be refined and clarified. In most cases, it is employees that own the shares of the fund and there is nothing on the undertaking's balance sheet. Moreover, the undertaking does not choose the investments of the fund. Therefore, those assets should not be considered as business relationships of the undertaking. Regarding accounting practices, in cases when the undertaking holds the shares of the fund (such shares being accounted for in its balance sheet), these assets should be classified as non-controlled investments (according to IFRS 9 for example) and those assets will be considered as value chain. Several fact patterns exist in practice, with distinct accounting implications. It is to date unclear what fact pattern EFRAG is considering through this paragraph. We would therefore request EFRAG to pursue this clarification.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	EFRAG should clarify under § 72 that there might still be remaining material IROs related to a disposed entity (e.g. past pollution event with remaining risks for the entity that disposed of the subsidiary).	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	EFRAG should clarify under § 73 what is meant by "major" acquisitions (disposals) as this notion is not defined in the ESRS. Should EFRAG want to consider only a subset of transactions, we recommend aligning with the wording used in the current IASB's project on business combinations where additional disclosures would be required only for "strategic" business combinations. This concept should therefore be clearly defined in the glossary of terms.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	73.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We recommend that EFRAG add under § 73 a data point to briefly describe the business model of the acquired entity highlighting, for example, key financials indicators (e.g. the number of employees) and obviously material sustainability topics/sub-topics related to this entity. The objective is to provide a general indication of the outcome of the acquisition even if the DMA has not yet been performed.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	73.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We recommend clarifying that, under § 90, the analysis of "non-materiality" could be conducted at a more granular level than at "activity" level (e.g. at subsidiary or site level), in consistency also with AR 24 which refers to "subsidiaries or activities", and that excluding from the calculation of metrics several activities (or subsidiaries, sites, etc.) that are not a significant driver of IROs should not lead, on an aggregated basis, to exclude overall a material contribution to a given metric.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I disagree	We strongly recommend deleting § 92 as the treatment of joint operations is complex and requires further investigation from EFRAG. Besides, this paragraph builds on the concept of operational control which still lacks clarity in the proposed revised set of ESRS.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The revised Standard would still require that comparatives be restated when the undertaking has identified new information relating to the estimated figures disclosed in the preceding period and the new information provides evidence of circumstances that existed in that period. This represents a difference with IFRS S1 which considers restating comparatives only when material prior period errors have been identified. Since the use of estimates is frequent, we believe it is not relevant to require systematic restatement when changes arise. In particular, the financial sector prepares its sustainability information based on prior year figures provided by the non-financial sector. Restating comparatives extensively and very frequently would oblige the financial sector to consider the restatements of the non-financial sector. We recommend differentiating between changes in estimates and changes in methodologies. Like in the financial statements, changes in estimates should not lead to restatements. Conversely, a change in methodologies should lead to such restatement when it has a significant impact on the comparative metric, to ensure consistency. We also recommend providing guidance on how to differentiate between a change in methodology / estimate and clarifying that comparatives shall not be restated as a result of acquisitions / disposals.	ESRS1	ESRS 1 - 7.6 Changes in the preparation or presentation of sustainability information	94.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I disagree	We note that in the course of the streamlining of ESRS 1, an important sentence under previous paragraph 113 has been deleted: "These disclosures are not subject to the provisions of ESRS, with the exception of this paragraph and the first sentence of paragraph 115 of this standard." This sentence was key to explicit that ESRS requirements (notably the principle of materiality of information) do not apply to EU Taxonomy disclosures, such disclosures being covered by specific regulations and FAQs issued by the EC, which may contradict some ESRS principles or reliefs (e.g. the proposed relief on acquisitions / disposals in ESRS 1 contradicts FAQ 152 of the EC published in March 2025). We note that having deleted this sentence from ESRS 1 will inevitably raise many questions in practice on whether ESRS 1 general principles such as fair presentation, the reliefs granted, etc. also apply to the EU Taxonomy information. We therefore believe that it is of the utmost importance to keep this sentence in the revised ESRS 1.	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	106.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	ESRS 1.AR 26 in reference to ESRS 1 3.7 may result in a high number of new datapoints depending on its interpretation by auditors. EFRAG should clearly state that the disaggregation of data is voluntary ("may...") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload and unjustified burdens for the disclosing company (information may not be available or only with high effort).	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	This requirement might be very complex as the undertaking has to agree with the external auditor which are these significant event, considering this entity is a new acquisition and we don't even know it.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	73.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	We support fair presentation. Please consider guardrails to avoid subjective overreach and ensure auditability. Clarify the interaction with materiality and the scope of permissible management judgement. This will reduce legal uncertainty and support robust assurance. processes.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	ANSWER PROVIDED IN PART 2	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	34.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	ANSWER PROVIDED IN PART 2	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	35.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Par. 30 and AR 5. Equinor supports a DMA approach. We welcome the proposed simplifications to the DMA process, including the top-down approach and the ability to derive materiality conclusions based on business model, peer analysis, and other relevant factors. This represents a positive shift away from the overly prescriptive and compliance-driven requirements of the current ESRS, which made the DMA process unnecessarily resource-intensive.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	AR 5
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	AR 17 for para. 31 Support for explaining what is scope in terms of environmental impact - "the scope may be understood as the extent of environmental damage or a geographical perimeter."	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Para. 45 We support increased flexibility in the materiality assessment of the broader value chain. To further enhance legal clarity and operational feasibility, we recommend that the standard explicitly state that the materiality assessment of value chain impacts should be risk-based. This would ensure a proportionate approach, focusing efforts on areas where impacts, risks, and opportunities are most likely to arise, and is consistent with international due diligence frameworks. The following para. 46 ("The undertaking is not required to assess every possible impact, risk and opportunity across all areas of its operations and upstream and downstream value chains to identify the topics to be reported." would then be redundant.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	45. (a)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Para. 47and 48 (including AR17, 18, 19) Equinor supports the relief on undue cost and effort in the DMA.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	47.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Para. 72 Equinor supports introduced flexibility regarding treatment of acquisitons and disposals in the year when they occur.	ESRS1	ESRS 1 - 5. Reporting undertaking and value chain	72.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Para 87-89. We support the new relief on using available information available without undue cost or effort.	ESRS1	ESRS 1 - 7. Preparation and presentation of sustainability information	87.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Para. 91 Equinor supports a relief for allowing disclosure of only part of the scope for the corresponding metric of an IRO when the metric can currently only be partially estimated.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	ANSWER PROVIDED IN PART 2	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Sub-chapter 8.2 and 8.3 (para. 106-110) Equinor welcomes the opportunity for flexibility in including additional disclosures stemming from other legislation which requires the undertaking to disclose sustainability information, additional disclosures that do not relate to a topic, the EU Taxonomy, executive summary and including detailed informaton about the calculation of its reported GHG emissions in appendices.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	106.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Equinor supports the relief allowing exclusion of certain activities based on materiality if they are not expected to impair the relevance or faithful representation of the reported information.	ESRS1	ESRS 1 - 7. Preparation and presentation of sustainability information	90.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Equinor supports the opportunity to refer to other parts of the reports instead of having to repeat contents several places in the report.	ESRS1	ESRS 1 - 9.1 Connected information	112.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Para. 113 The current wording seems too prescriptive. While the objective of ensuring clear linkage between material impacts, risks and opportunities and the related policies, actions and targets is understandable, the concern is that the requirement, as drafted, risks being interpreted too narrowly. It could be read as requiring IROs and policies/actions/targets to be presented together, rather than allowing preparers to structure disclosures flexibly and simply provide explicit cross-references. This may reduce flexibility without adding real value to users. I suggest clarifying that explicit cross-referencing or mapping is an acceptable means of compliance.	ESRS1	ESRS 1 - 9.1 Connected information	113.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	To avoid duplication of financial information from financial statements in the sustainability statement Equinor supports the opportunit to cross-reference to the financial statements for financial disclosures.	ESRS1	ESRS 1 - 9.1 Connected information	114.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Note: This comment is to Appendix A, but appendicies were not listed in drop down menu. It is referred directly in ESRS1 para. 9 While we support removal of examaples from sub-sub-topic level, we still belive that the proposed division of biodiversity and ecosystem topics in Appendix A to ESRS 1 for E4 Biodiversity and Ecosystems - separating drivers of change, state of species, ecosystem condition, and ecosystem services - creates challenges for materiality assessment and reporting. While the first element concerns the causes of biodiversity loss, the others reflect its consequences, effectively requiring undertakings to assess both sides of the same issue. Boundaries between species state and ecosystem condition are often unclear, and ecosystem services depend on both, making separate disclosures potentially redundant. This structure complicates double-materiality assessments by forcing preparers to evaluate pressures and outcomes simultaneously, increasing the risk of double counting, omissions, and inconsistent prioritisation. It also blurs accountability in reporting and hampers the development of a clear, decision-useful sustainability narrative. Although inspired by scientific "pressure–state–impact" models, the approach is difficult to operationalise in corporate reporting, and the challenges observed in the 2023 standard remain in the 2025 draft.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	9.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	The aggregation/disaggregation requirements contradicts an information materiality approach and could result in reporting non-material information (thus obscuring the truly material information). We propose that undertakings have the flexibility to define the correct level of disaggregation.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	UGT-ESPAÑA	Trade union	Spain			I agree	This is crucial for understanding impact materiality assessment	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	UGT-ESPAÑA	Trade union	Spain			I agree	This is crucial for understanding impact materiality assessment, in particular the point on reporting on the opinion of workers' representatives	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree Non-financial users should be limited to business partners, trade unions, social partners and NGO's representing interest common to society	ESRS1	ESRS 1 - Objective	4.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	The section on entity-specific information is not clearly delimited, only entity-specific information that is necessary for decision-making and understanding by the primary user groups, based on clear criteria for what to consider for users' decision-making and understanding (see comment to ESRS1-21), shall be included. Entity-specific disclosures should be limited to potential new sub-topics or additional disclosures on defined ESRS topics/sub-topics	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree To illustrate our comments in part 2, we suggest replacing para. 11 with the following: "While the standards will generally, provide a complete set of decision-useful information for the primary user groups, additional entity-specific information will usually only be relevant when the reporting entity needs to provide information on specific sub-topics beyond the requirements in the AR. If relevant, when developing its entity-specific disclosures, the undertaking shall consider without undue cost and effort comparability over time and with other undertakings that operate in the same sector(s)." In addition, we highlight, that it is important to delete the refence to IFRS industry-based guidance and GRI Sector Standards, as the paragraph would otherwise indirectly require compliance with those. We suggest addressing this I basis for conclusion or the NMIG instead.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree It should be added and made absolutely clear that the AR's do not add extra datapoints.	ESRS1	ESRS 1 - 1.2 Drafting conventions	15.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree It should be clarified that considerations on capital providers' decision-making shall focus on information essential to protect and evaluate prospects of their assets, while strategic or ethical preferences of investors in their decision-making need not be considered, e.g. an investor's zero-tolerance on certain ESG-matters. A criterion should emphasize that understanding is about getting a general impression of a subtopic and the related IRO and should be no more than what can be considered necessary by the undertaking to initiate a qualified dialogue. The level of aggregation and disaggregation shall be proportionate to the degree of severity of impacts.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree The text is an explanation of the term "general purpose" and should therefore be moved to definitions.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 3
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree The text concerning the different terms should be clearer on the fact that "material impacts", "principal impact" and "most significant impacts" are synonyms, hence the second para just creates confusion and should be deleted or rewritten. We suggest that the following part should be deleted: "…Some existing standards and frameworks also use the term 'most significant impacts' when referring to the threshold used to identify the impacts that are described in the ESRS as 'material impacts'".	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 4
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	ESRS1, paragraph 26, has the characteristics of being a guide and should therefore be moved to non-binding guidance. Using the terms "in general" and "may" underline the fact that the text is guidance. ESRS1, paragraphs 40+41, is sufficient in covering the topic.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	26.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	The AR contains two examples, which should be moved to non-binding guidance.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 6
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree It should be clarified that the results 'may' provide a critical input. 'Will' should therefore be changed to 'may'. We suggest amending the text to: (Change marked with capital letters) "If the undertaking engages with affected stakeholders as part of its due diligence process to identify, assess and address negative impacts, the results of this engagement MAY provide a critical input to its materiality assessment, without necessarily putting in place a separate engagement process for the materiality assessment…"	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree Guidance is needed as to what 'evidence' can encompass, i.e. on the level of certainty, when assessing severity levels and likelihoods of impacts, and the magnitude and likelihood of risks and opportunities. Also necessary to explain the reason for using different wording in ESRS 1, paragraphs 45b and 47, i.e. reasonable and supportable evidence/information.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (a)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree Guidance is needed as to what 'evidence' can encompass, i.e. on the level of certainty, when assessing severity levels and likelihoods of impacts, and the magnitude and likelihood of risks and opportunities. Also necessary to explain the reason for using different wording in ESRS 1, paragraphs 45b and 47, i.e. reasonable and supportable evidence/information.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree In our opinion the top-down and bottom-up approach should have equal footing and that the reporting entity can choose which of these between them without having do document that the result of the one not-used would not have been different from the method used as this would in reality require entities to apply both methods. Therefore, it should be added in the last sentence that ", although documentation is not required". In addition, EFRAG should add to the Basis for Conclusion that the two methods are deemed to result in the same outcome.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree AR27 should be moved to sub-chapter 6.1 as an AR to paragraph 74.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	AR 27
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree AR 28 is difficult to understand. Is it a relief option ('do not require') or a requirement to exclude ('limited to own operations') up-/downstream data from mentioned DRs?	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree Risks and opportunities in associates and joint ventures should not be automatically determined based on the supply/customer relationship but need to take into consideration the extent to which financial effects of risks and opportunities can or will be transferred to the undertaking. Goods may be traded at prices quoted in an active market, e.g. oil or crops, in which case financial effects related to IROs in the associate or joint venture will be carried by the owners in proportion to their equity share, i.e. not transferrable through a price adjustment on the goods.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	69.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree Risks and opportunities associated with leased assets should reflect the contractual terms, i.e. the extent to which financial effects can or will be transferred from the lessor (asset owner) to the lessee. The agreed lease payment may be fixed, only adjusted by inflation, or driven by market price of similar assets, which in combination with a short lease term or cancellation rights, can influence the extent to which financial effects, related to impacts from the leased asset, will be transferred to the lessee.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree ESRS1-71 should be more clearly demarcated to assets in defined benefit plans, as an undertaking has no relationship to pension assets in defined contribution plans	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree The standard should specify, that entities do not need to change the base line, i.e. the comparable numbers provided for the base year, when it in future years change the accounting policies for metrics. This might be practically impossible without applying hindsight. Applying new accounting policies prospectively should be stated. Retrospective application should be possible on a voluntary basis.	ESRS1	ESRS 1 - 6.1 Reporting period and base year	76.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree It creates confusion that paragraph 86 and AR32 are not aligned with the relief for quantifying anticipated financial effects.	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	86.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree In ESRS 1, paragraph 89, it must be acknowledged that there will be cases where data will not be available. It should be clarified that 'undue cost or effort' shall not be misused to omit material information. Different views can be expected on what undue cost or effort is, why more clarity is needed to prevent misuse.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree The requirement in ESRS 1, paragraph 108b – requiring the non-material information to provide a faithful representation – should be deleted. The key element is in ESRS 1, paragraph 108a (non-obscuring) and any information will anyhow have to meet the qualitative characteristics as outlined in ESRS 1, paragraph 107.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108. (b)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree The AR has the characteristics of being a guide and should therefore be moved to non-binding guidance. Using the terms "may" underline the fact that the text is guidance.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	AR 36
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I agree	While we agree with the transitional provision whereby comparable information is not required for the first year of preparation of the sustainability statement, we suggest to add – or make it clear – that this also apply in the first year of adopting the amended ESRS standards if/where the amended standard change definitions or disclosure requirements compared to those set by the standards in Set 1.	ESRS1	ESRS 1 - 10.2 Transitional provision related to Section 7.1 Presenting comparative information	126.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Sub-subtopics have been removed and instead transferred into brackets under the respective subtopics. It is unclear how this restructuring should be understood in the context of performing the double materiality assessment, and how auditors are expected to verify such an assessment. Clarification would be needed to ensure consistent application and assurance. If we have three issues in brackets and one of them is material in the DMA process, should the entity report only that one – the material one – or all three? In our opinion, Table AR 16 has not been simplified, but made even more complicated.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	9.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	It is unclear how to interpret the difference in wording. Under the "Business conduct" topic, the subtopic is described as "Corporate culture (including anti-corruption and bribery, protection of whistle-blowers and animal welfare)," whereas for social topics (ESRS S1–S4), the parentheses do not start with the word "including." It is therefore uncertain whether subtopics introduced with "including" are meant to be illustrative (non-exhaustive), while those without "including" should be understood as exhaustive. Clarification is needed, as this distinction may affect how undertakings perform the double materiality assessment and how auditors verify it.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	9.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	The use of the same word "subject" in different meanings, where the meaning is interpreted by the ESRS user based on the type of highlighting used in the text (bold + italics) or without any highlighting, greatly complicates and hinders work with standards. We have not encountered such a construction in other standards before. We recommend using two separate words to distinguish between the different meanings and applications of sustainable development.	ESRS1	ESRS 1 - Objective	2.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Given the European Commission's withdrawal from the preparation of sectoral standards, the provision in point 11, which reads "may use available best practices and/or available frameworks or reporting standards, such as IFRS industry-based guidance and GRI Sector Standards," means that many entities will not use alternative sectoral standards. Thus, sustainable development reporting will not be reported to a greater extent than the basic ESRS. We recommend changing the word "may" to "shall."	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	In many Application Requirements (AR), the word "may" is still used (e.g., ESRS 2 AR19, AR24, AR25). This is inconsistent with the provisions of paragraph 15 of ESRS1. It is unclear whether ARs using the word "may" are mandatory for reporting by the entity/application by the entity or voluntary. This contradicts the general assumption that there are no voluntary disclosure points in ESRS. We recommend replacing the word "may" with "shall consider."	ESRS1	ESRS 1 - 1.2 Drafting conventions	15.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	In the sentence: 'the undertaking may use in conducting a materiality assessment:' the word 'may' is used. In our opinion, this construction will result in the listed sources being used selectively, while dialogue with stakeholders is a mandatory element of the DMA process, which derives from the due diligence process. We recommend a different sentence construction, indicating that the listed sources constitute a mandatory but not exhaustive list for use in the DMA process.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	27.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	We welcome the harmonization of the approach to determining the materiality of impacts, with or without the inclusion of mitigation measures. This is extremely important, as each entity approaches this differently (there are no relevant provisions in the current wording of the ESRS). We take a negative view of the proposal in the simplified ESRS. It is necessary to reach a uniform agreement on how to consider corrective actions taken in previous years. Point 34 of ESRS 1 of the simplified ESRS indicates that they should be taken into account when determining material issues in the DMA (applies to actual impacts). This contradicts the EFRAG guidelines of May 2024 (Question ID 350 – Gross risk), in which the guidance for companies was that actions taken in previous years should not be taken into account (gross risk): The assessment of material climate-related impacts, risks, and opportunities is performed looking at the gross risk, i.e., before any mitigating actions. Therefore, it is necessary to define a uniform approach to both impacts and risks, with a possible division into actual and potential impacts. The current proposal is very complicated and will be difficult to apply.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The phrase "if the undertaking needs to maintain significant ongoing mitigation" is ambiguous and will be interpreted differently by different entities. It is a judgment call by the entity's management—very difficult for an auditor to verify and immeasurable. We recommend changing the wording of the point and standardizing it without separating it into significant mitigation or prevention actions and not significant mitigation or prevention actions.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	The definition of what constitutes a positive impact is material. We take a negative view of EFRAG's attempt to define what constitutes a positive impact. The description refers only to environmental issues and is difficult to transfer to the social or governance areas. We believe that the definition should be included in the glossary (Annex II), and examples of positive impacts should be provided for each ESRS topic (as AR). Otherwise, we will continue to see reporting of positive impacts on health and safety while fatal accidents occur in the organization.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	Very important information on what dialogue with a silent interested party entails has been removed. I view this change negatively. The alternative dialogue methods described in IG1 DMA (point 206) are very important and should be transferred to AR in ESRS 1.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Very important information on how to identify material entities in the value chain that may be a source of material impacts, risks, and opportunities should be transferred from IG2 VC (point 28) to ESRS 1 as a supplement to the AR for this point. Many entities are not familiar with and do not apply the IG guidelines, considering them to be non-binding. However, the ESRS in its current wording leaves many ambiguities that have been clarified in the IG.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	64.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Please note that it has not been possible to include the entire DMA in ESRS 1 without referring to thematic ESRSs. The scenario analyses, necessary for climate risk analysis, are included in ESRS E1 and also apply to the DMA process. We recommend referring to ESRS E1 (DR E1-2) in order to fully demonstrate what analyses should be performed in the DMA process.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 15
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	We take a negative view of the transfer of the list of physical and transformational risks for ESRS E1 (Climate Change) to NMIG. We take a negative view of the removal of the list of physical and transformational risks relating to other thematic environmental ESRSs from both ESRS and NMIG. We believe that these risk lists should constitute AR for mandatory analysis by the organization. In our opinion, not having a reference point (such as the aforementioned risk lists) is a hindrance rather than a simplification for the organization. In the first version of ESRS, entities knew what they had to analyze.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 15
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	We welcome the clarification contained in AR 18 (a) regarding time horizons. We view the information contained in (b). We believe it is necessary to supplement when it is not necessary to analyze all parameters of the severity of the impact (in which situations) and to refer to scientific consensus. This should be done in the same way as in IG 1 DMA. Otherwise, entities will abandon the assessment based on severity parameters and rely on unverified assumptions (the judgment of the entity's manager). This will cause difficulties during verification by the auditor.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	The absence of the word "governance" when referring to impacts could cause confusion	ESRS1	ESRS 1 - Objective	3.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	What about employees, non-employees, workers in the value chain, end users/consumers, customers? Perhaps "affected stakeholders" could be mentioned here as wel	ESRS1	ESRS 1 - Objective	4. (b)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Minor comment. I would suggest to slightly change the para, The ESRS 1 General requirments sets out general requirements for the basis of the preparation of a sustainability statement. It also sets out general requirements for identification of the undertaking's material impacts, risks and opportunities, as well as for preparing and presenting information about the topics related to them.	ESRS1	ESRS 1 - Objective	6.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Reference to ARs to be deleted according to the standars new version and presentation	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	7.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We would suggest to change this as follow: Amended ESRS 2 General disclosures establishes Disclosure Requirements (DRs) on the information that the undertaking shall provide at a general level across all material sustainability topics on the reporting areas governance, strategy, impact, risk and opportunity management, and for topics related to material impacts, risks and opportunities on policies, actions, targets and metrics. Additionally, should be reported financial effects for entity specific related matters? in this case, should this be specified?	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	8.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Just to bear in mind, in case you consider it appropriate, topical ESRS can include specific requirements that complement the general level Disclosure Requirements of ESRS 2.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	9.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	In this case, the AR 1 introduces shall reporting requirements while par 11 introduces "may/voluntary" disclosure requirements. To avoid confusion, I would suggest to change the order by including in pag 11 mandatory requirements and AR voluntary ones, as follows: 11. When developing its entity-specific disclosures, the undertaking shall consider comparability over time and with other undertakings that operate in the same sector(s). The undertaking shall ensure they meet the qualitative characteristics of information as set out in Chapter 2; and include material information related to the reporting areas of governance, strategy, impact, risk and opportunity management (i.e. policies and actions), and metrics and targets (see [Draft] Amended ESRS 2 - GDR -P, GDR-A, GDR-M, GDR-T). AR 1 for para 11: For this purpose, it may use available best practices and/or available frameworks or reporting standards, such as IFRS industry-based guidance and GRI Sector Standards. AR 2 for para 11:	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	It could be useful to specify if the GDR-P, GDR-A, GDR-M, GDR-T shall be used to report about entity specifics material IROs.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	AR 1
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	To compensate the differences between par a) and b), while explaining impacts, risks and opportunities, we would suggest to: i) amplify the description of impacts in paragraph a) or ii) simplify the description of risks and opportunities in paragraph b)	ESRS1	ESRS 1 - 1.2 Drafting conventions	12. (a)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	As may disclosures are still included, we would suggest to mantain the following: may disclose' – indicates voluntary disclosure to encourage good practice.	ESRS1	ESRS 1 - 1.2 Drafting conventions	14.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	For clarification purposes, we would suggest to add: The information shall be presented either at topical level or at impacts, risks and opportunities level, depending on what provides the most relevant information, "when the related identified material IROs are managed in the same way (i.e. same policies, actions, metrics and targets)	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We would suggest to delete this paragraph, as it seems redundant	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	23.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We would suggest to use the word "and", not "including". connected with its own operations, products, or services, AND through business relationships in its upstream and downstream value chain. Business relationships are not limited to direct contractual relationships.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	30.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Should a reference to the due diligence be reincorporate? At least, from a voluntary perspective: When available, the materiality assessment of a negative impact may be informed by the due diligence process defined in the international instruments of the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinational Enterprises.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Due diligence is mentioned here but not previously (para 31). Pls, consider the comment above	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	33.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Actual impacts are already mentioned in par 31. we would suggest to move the clarification related to actual impacts (those that ocurred during the reporting year or in prior years) above	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	This approach introduces important additional burdens as undertakings shall go through the different actions, classify them as prevention, mitigation, remediation, etc actions, and after that, evaluate the severity. These efforts seems to be even worst when we move through par 35 as it seems we also need to differentiate between ongoing actions	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	The new version of standars seems to have a predominant negative approach. Positive impacts are less represented. We would suggest to consider and incorporate the following :"Nevertheless, organizations can create positive impacts by carrying out initiatives that extend well beyond what is required by law and regulation."	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Does this interpretation mean that positive impacts linked only to the undertaking own activities, not influencing on third parties, should not be considered as such? For instance, what about that are linked to the social dimension? We strongly recommend to avoid this negative approach	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	To ensure alignment and consistency with para above, AR9 (b)should be also included "and their related actions...."	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 5
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Considering the example proposed in AR12(a), does it mean that it shall be demonstrated that even though the undertaking uses cobalt in its product, they are not mined by using children labour?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 6
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Why the word "grave"has been replaced by "serious"?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 7
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Should "workers in the value chain" be included?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Please ensure that the mention to "workers representative" is adapted and clarified for multinational organizations with a large number of legal entities. Specifically, it is important to specify which legal entity is responsible for involving workers' representatives to fulfill reporting obligations.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Does it mean that policies should also be identified while carrying out the DMA? This will include additional reporting requirements within the process	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 12

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	A mention to ESRS 2 para 30 should be also included to cover also the possibility of not having actions in place/ planned (62 amended) If the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 13
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We would suggest to include a mention to current events in the last sentence as follow: risks and opportunities may derive from past, current or future events.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	39.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	A mention to the reputational, operational and legal effects of the risks could be incorporated, as they could also have financial effects. For instance: (51) The materiality of risks and opportunities is assessed based on a combination of the likelihood of occurrence and the potential magnitude of the financial effects. Reputational, operational and legal effects may be considered as they use to have financial effects	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	42.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	What about the positive approach? it could be the case in which positive impacts or opportunities are generated as well. Should them be mentioned/included?	ESRS1	ESRS 1 - 3.4 Material impacts or risks arising from actions to address other topics	43.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	This approach appears to be at odds with the new standard proposal, especially in light of the approaches to prevention, mitigation, and remediation actions.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	46.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	This approach could add subjectivity to the process. Additionally, it could make more difficult to implement an homogeneous and coherent assessment among undertakings	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Please clarify the concept of "entity-specific basis"	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	49.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	When an IRO originates from a specific sector, subsidiary, country, location, or similar subdivision, it should be possible to report on how that IRO is managed within that particular context, rather than being required to describe how the undertaking manages the IRO across the entire organization.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	24.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	We would suggest to join this para 65 to para 62, as their content is quite similar	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	65.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Clarification included in para 68 should be moved to para above, when business relationships are mentioned first time	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	this should be aligned with the provisions established for rfinancial statements. if not, inconsistencies could raise	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	The following could be impracticable "it shall also disclose comparative information for narrative disclosures". We would suggest to include the following optio: "a reference to the previous sustainability statements could be made "	ESRS1	ESRS 1 - 7.1 Presenting comparative information	81.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	A mention to the uncertainty linked to risks and opportunities should be also included	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	86.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We are not sure how this (Reasonable and supportable information includes information about past events, current conditions and forecasts of future conditions) could be consistent with "without undue cost of effort"	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	88.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	In line 5, we would suggest to include "if any" as follows; the undertaking shall disclose the actions it has taken, if any, to increase…	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	In line 7, "shall also assess" should be replaced by "may also assess"	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Bear in mind that strategies are updated from time to time. In the framework of new strategies in place, target could be replaced. Consequently, consistency could not always be guaranteed. These circumstances should be also considered	ESRS1	ESRS 1 - 7.6 Changes in the preparation or presentation of sustainability information	94.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	The following sentence should be removed as it is not fully aligned with paragraphs above: "corresponding to intellectual property, know-how or the results of innovation"	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	100.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I agree	Minor typo: The undertaking shall make every dt to ensure that	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.

Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	In line 5, a reference to administrative, management and supervisory bodies' delegated bodies should be incorporated, as follows: the members of the administrative, management and supervisory bodies or their delegated bodies. Additionally, the following sentence should be removed "acting within the competences assigned to them by national law and having collective responsibility for that opinion, the"	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	AR 35
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Why only GHG emissions have been mentioned and not others?	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	AR 36
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain				Appendix A ; Consumers and end users - it is important to clarify whether and how the ESRS S4 standard applies to B2B companies. In this regard, it would be helpful for the ESRS to provide clear guidance and examples for B2B companies, acknowledging that their "customers" are often other companies. The ESRS should offer straightforward guidance and examples specifically for B2B companies, recognizing that their customers are usually other businesses. To give a complete and accurate overview, ESRS should also let B2B companies report on their impacts, risks, and opportunities related to these business customers, as well as how they address them.	ESRS1		
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Redundant information. Suggestion: (11) If the undertaking concludes that a topic related to one or more material sustainability-related impacts, risks or opportunities is not covered, or not covered with sufficient granularity by an ESRS, it shall provide additional entity-specific disclosures on that topic. This may be the case due to sectorial specificities and/or other facts and circumstances relevant to the undertaking itself. Depending on the undertaking's facts and circumstances, there may be topics other than those covered in ESRS topical requirements that the undertaking shall cover, following its materiality assessment, such as where its business model and strategy are associated with material impacts, risks and opportunities that do not correspond to the ESRS topics.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Is this paragraph needed? The concept that disclosures must be specific to the undertaking and not boilerplate is covered in Appendix B, QC 17. Suggestion: It appears reasonable to delete this paragraph.	ESRS1	ESRS 1 - 7.9 Reporting on opportunities	102.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The provision shall either be deleted or rephrased to ensure that the structure of the Sustainability Statement is consistent with the principle of fair presentation and permits the undertaking to present a clear and comprehensive account of its material sustainability-related impacts, risks, and opportunities, together with the measures by which these are managed.	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	105.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The disclosure of information pursuant to Regulation (EU) 2020/852 is governed by other legislative acts. Accordingly, the wording "include them in its sustainability statement" should be amended to "it may," in order to reflect the optional nature of such inclusion.	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	106.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The underlying rationale of the NMIG is understood. However, its implementation and integration into the sustainability report are not clearly described. Binding references to the NMIG or to other non-binding frameworks are considered burdensome, unnecessary, and superfluous, as they would unduly increase the length of the report. No obligation should be implied with respect to the implementation of non-binding guidance.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	107. (a)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: If data and assumptions used in preparing the sustainability statement shall be consistent to the ones used in preparing the financial statements, there is no point in explaining the level of consistency. Suggestion: Amend as follows: Data and assumptions used in preparing the sustainability statements shall be consistent to the extent possible with the corresponding data and assumptions used in preparing the financial statements; to support the understanding of significant data and assumptions, the undertaking shall explain the level of consistency.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The formulation "shall disclose" may give rise to misunderstandings, as information is not necessarily available for all data points. In the relevant standards, the disclosure obligation is frequently qualified by the principle that the absence of data does not require separate reporting. In accompanying comments or explanations, this is typically justified by the objective of simplification, thereby avoiding the need for "nil reports." This approach, however, stands in some tension with the literal interpretation of "shall disclose." It therefore appears appropriate to clarify in §14 that the absence of a data point does not in itself trigger a disclosure obligation, and that disclosure is required only where the relevant information is in fact available.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	14.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The use of the formulation "shall consider" is commonly explained as "must take into account," while in other instances the wording "may be provided" is used. This inconsistency remains confusing. Pursuant to paragraph 15, certain presentation options are set out in the Application Requirements (AR). It is important that each such option is expressly identified as optional and does not give rise to the impression of being mandatory in all cases. With respect to the formulation "shall consider," it should further be clarified that the outcome of such consideration may also be that no reporting requirement arises.	ESRS1	ESRS 1 - 1.2 Drafting conventions	15.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	In ESRS 1, paragraph 21(b), the wording "necessary for users ... to understand" introduces a new and unclear standard. The wording of 21(b) is broadly framed and not further defined, which may significantly expand the scope of reporting.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The provision appears excessively complex, as evidenced by the fact that the amendment note is longer than paragraph 22 itself.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	It provides clarification on entity-specific topics and refers to AR 21, which, however, addresses subtopics within a standard rather than entity-specific IROs. It is therefore suggested that AR 21 be formulated more broadly in order to adequately cover entity-specific IROs, which may reasonably be understood as falling within the scope of a given standard.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	23.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The paragraph should explain or provide an example of a sustainability-related risk that is not related to an undertaking's negative impact respectively a sustainability-related opportunity that is not related to an undertaking's sustainability-related positive impact.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	26.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: This statement is inconsistent to the reporting areas mentioned in other sections of ESRS 1 and ESRS 2 and should be made consistent across all ESRS: An ESRS sustainability statement covers governance, strategy, policies, actions, targets and metrics for topics related to material impacts, risks and opportunities. Suggestion: An ESRS sustainability statement covers the reporting areas of governance, strategy, impact, risk and opportunity management (i.e., policies, actions), targets and metrics for topics related to material sustainability-related impacts, risks and opportunities.	ESRS1	ESRS 1 - Objective	3.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The draft paragraphs do not seem to sufficiently address the challenge that materialized when looking at 2024 Sustainability Statements, i.e., the large diversity in practice whether an impact is positive or negative (even if the gross approach was applied). Suggestion: Provide additional guidance that makes the distinction between positive and negative impacts much more pronounced so that the concept is applied consistently by all undertakings. (Applys to points 30-36)	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	See related comment on paragraph 21(b); a consistency check is required.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	37.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: This pronouncement is misleading in light of the clarification that the scope of consolidation for the sustainability statement is the same as for financial statement. The financial materiality of a topic is not constrained to topics that are within the control of the undertaking but includes information on material risks and opportunities attributable to business relationships beyond the scope of consolidation used in the preparation of financial statements. Suggestion: Consider amending as follows: The financial materiality of a topic is not constrained to topics that are within the control of the undertaking but includes information on material risks and opportunities attributable to business relationships beyond the scope of consolidation used in the preparation of financial statements material risks and opportunities in the undertaking's own operations and includes information on material risk and opportunities attributable to business relationships in the upstream and downstream value chain.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	38.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Delete the second sentence because it is not needed if it is stated beforehand that civil society, etc. are other users Suggestion: Civil society, non-governmental organisations and trade unions as users are proxies for affected stakeholders	ESRS1	ESRS 1 - Objective	4. (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: What is the difference between (b) dependencies and (c) other factors? Are exposures to climate hazards not in essence a result of the dependency on natural resources in a certain condition? Are changes in regulation not actually a dependency on complying with regulations? Suggestion: Either provide a definition of other factors, not restricting it to examples or consider deleting (c) in case it is concluded that these are actually a facet of (b)	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	40.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	It does not provide a clear clarification of the meaning of "undue cost or effort" in the comment recorded in the log of amendments.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	46.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The concept of "undue effort" should mean activities beyond regular business processes. However, since sustainability due diligence is itself defined as part of those processes, the notion becomes circular. For example, §47 states: "To identify material impacts, risks and opportunities, the undertaking shall […] use information prepared […] in conducting its sustainability due diligence […]". This reference does not clarify what constitutes undue effort; instead, it reinforces the loop. In practice, external auditors often suggest that due diligence should also cover indirect value chain relationships. If not, companies must document that a reasonable effort was made. This could imply gathering data from suppliers of suppliers or financed counterparts. Proof might simply be showing outreach attempts (e.g., email requests), but what counts as sufficient evidence remains highly debatable. §47 provides no guidance here. A clearer approach would be to explicitly state that tier 2+ relationships in the value chain must be considered in AR5.(a) and AR5.(b), while direct outreach to such entities is optional unless required by law. This clarification should be added in a new paragraph, and §47 should avoid referencing due diligence in defining undue effort.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The newly adopted chapter on the DMA provides additional information that supports an understanding of both the process and the meaning of the standard. However, the possibilities for substantive simplification in financial institutions must be regarded as limited. Given the thematic breadth, which is heavily dependent on the respective portfolio, a blanket exclusion of individual subject areas in advance can hardly be considered reliable. Consequently, an increased need for coordination with the auditor is to be expected. The extent of the documentation required for a clear categorization as material or immaterial will become apparent in practice.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	48.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	When the undertaking is reporting at a consolidated level, it shall perform its assessment of material impacts, risks and opportunities for the PERSPECTIVE OF THE entire consolidated group ACCORDING TO FINANCIAL STATEMENT regardless of its group's legal structure. It shall ensure that all CONSOLIDATED subsidiaries are covered in a way that allows for the unbiased identification of material impacts, risks and opportunities at group level.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	53.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	According to ESRS 1 paragraph 58, the consolidation perimeter shall correspond to the consolidation perimeter applied in the financial statements. However, ESRS 1 paragraph 59 requires that the consolidation perimeter for the sustainability statement be reviewed annually. The review of each non-consolidated subsidiary at every reporting date does not lead to simplification. For the sake of comparability, disclosures relating to "own operations" should not extend beyond the group of entities that are financially consolidated. A non-consolidated subsidiary may only be considered as part of the value chain. We therefore propose to delete the last half-sentence of the paragraph: "unless there are specific facts and circumstances that expose the group to material impacts, risks and opportunities arising from such subsidiary" and to delete the word "usually" in paragraph 59.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Paragraphs 60–73 serve as guidance for value chain. However, this guidance, in particular with regard to the treatment of joint ventures, associates and special purpose vehicles (SPVs), does not provide sufficient clarity.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	61.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The definition of undue effort remains unclear, leading to unnecessary discussions with external auditors.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	60.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The amendment is a welcome improvement, yet it does not address the core issue. The wording that information "may" be based on estimates or directly collected raises a critical ambiguity: does it also imply that no information at all could be acceptable? Even when estimates are used, they must remain verifiable; thus, the problem is not removed but merely shifted. Moreover, grouping data for due diligence with data for metrics is problematic. Due diligence may reasonably rely on management's experience and judgment, while metrics must rest on concrete evidence, even if estimated. Combining these two types of information blurs their distinct purposes and audiences, creating confusion rather than clarity.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Requires clarification because it is not understandable what this is meant to tell.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The reference to "only the inclusion of material upstream and downstream value chain information" remains problematic, as the definition of materiality itself is unclear. We explicitly welcome the specification in ESRS 1-64 regarding which actors within the value chain must be included. This is an important foundation for consistent and transparent sustainability reporting. However, for financial institutions, further clarification is needed. In particular, it should be made clear that the value chain does not extend to the activities of financed or insured clients, unless the institution itself bears ownership risks and opportunities. Such a clarification would significantly facilitate the delineation of responsibilities. We therefore propose a new paragraph in section 5.3 (para. 72): "Financial institutions are not required to evaluate the full value chain "	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	64.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Seems to be redundant to Paragraph 62. Please check what can be merged or if something should be deleted in either of the paragraphs.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	65.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Seems to be redundant to Paragraph 62, 65 and 67 when talking about estimates and proxies	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	67.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The term business relationships already showed up various times beforehand and now it is defined out of a sudden with respect to the specific facet of associates or joint ventures. Suggestion: Provide an all-encompassing definition in the glossary and then paragraph 68 can be deleted.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	In principle, we agree with the position set out in ESRS 1 paragraph 70, according to which the impacts, risks and opportunities arising from the use of a leased asset exist irrespective of whether the asset is legally owned by the undertaking or leased. The lessee causes and contributes to the impact of the leased asset and must therefore report on such impacts in the course of its own operations during the lease term (e.g., Scope 1 and 2 emissions). However, we wish to point out that, in our view, the perspective of the lessor and the act of leasing itself has thus far been insufficiently addressed in this paragraph. In practice, the distinction between leasing and rental is often blurred, particularly in the case of operating leases with short durations or limited control. We therefore recommend that the lessor's perspective be explicitly incorporated into ESRS 1 paragraph 70, in order to ensure consistent and transparent reporting across the entire value chain.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The clarification is welcome. However, it remains unclear whether the reference applies only to pension funds directly owned by the company, or also to those owned by beneficiaries but consolidated within the company's accounts. The treatment of trust structures requires particular attention. In cases where administration is carried out by the company, but ownership and decision-making rights lie entirely with the beneficiaries, the company has no influence over investment or management choices. In such circumstances, these funds are more appropriately assimilated to the private property of employees rather than to the company's own operations or supply chain. Therefore, it would not be appropriate to consider such trust-based pension assets as part of the company's value chain. The same reasoning applies to their treatment in GHG calculations. Unless the company has decision-making power or bears risks related to ownership, these structures should not be included in the company's GHG boundary. A clarification on this point would help avoid inconsistent reporting and unnecessary discussions with auditors.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Inconsistent wording in comparison to other paragraphs within ESRS overall. Amended ESRS 2 General disclosures establishes Disclosure Requirements (DRs) on the information that the undertaking shall provide for topics related to material impacts, risks and opportunities on the reporting areas of (i) governance, strategy, impact, risk and opportunity management, as well as (ii) policies, actions, targets and metrics. Suggestion: Amended ESRS 2 General disclosures establishes Disclosure Requirements (DRs) on the information that the undertaking shall provide for topics related to material sustainability-related impacts, risks and opportunities on the reporting areas of (i) governance, (ii) strategy, (iii) impact, risk and opportunity management (i.e., policies, actions), as well as (ii) policies, actions, targets and metrics.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	8.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	This disclosure should be required only where data for the prior period has not been reported. Where prior-period data has been reported, it must be presumed to be comparable. If such data has not been reported, this is evidently due to the absence of comparable information. Accordingly, the purpose of paragraph 82 is unclear. If the intention is to require disclosure in cases where data is not comparable, such disclosure should be subject to a materiality threshold. A comparability deviation of 5–10% may still be acceptable for certain metrics.	ESRS1	ESRS 1 - 7.1 Presenting comparative information	82.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The current drafting leaves too much uncertainty. For example, a company with a particularly efficient cost–income ratio could argue that any expenditure above zero, such as the purchase of external datasets, constitutes an undue cost. Without further guidance, such interpretations risk undermining comparability across the industry. Additional clarification is therefore necessary to ensure consistent application and to prevent overly subjective thresholds of what qualifies as undue cost.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	By consolidating sub-topics and sub-sub-topics at the sub-topic level, the sub-sub-topics are effectively eliminated. In particular with regard to governance, this has implications for the materiality assessment. It should be permissible for the undertaking to determine an appropriate level of aggregation on an individual basis.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	9.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: How was the conclusion derived that the data for E1-6 can be derived without undue cost and effort? Since the whole topic about undue cost and effort is addressed in general in the previous section 7.3 it appears to make sense to delete Paragraph 91. Suggestion: Consider deleting.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Paragraph 99 remains insufficiently delineated in scope. Within the financial industry, certain information may not qualify as intellectual property but nevertheless possesses material value and justifies non-disclosure. During the first CSRD reporting cycle, discussions with auditors revealed divergent interpretations of what constitutes sensitive information that may be legitimately withheld. A particular concern arises in relation to targets: groups may refrain from publishing local targets in order to preserve flexibility for reallocation. Such information is of value, though not within the meaning of paragraphs 99(a) or 99(b), and therefore is not clearly protected under the current provisions of ESRS 1. Consequently, the decision not to disclose such targets or metrics is left subject to auditor interpretation. In this context, it would be preferable to require undertakings that withhold available targets or metrics to provide an explicit explanation. The scope of confidentiality should not be restricted solely to trade secrets but should also extend to other forms of sensitive information where disclosure would be inappropriate.	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	98.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Redundant information that is sufficiently covered in ESRS 1 re/ qualitative characteristics and in ERSS 2 re/reporting areas. This applies to all sustainability-related disclosures. Suggestion: Delete AR 1 for para. 11 in its entirety.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	AR 1

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The definition of "common categories of affected stakeholders" in AR 10, employees and/or workers' representatives, suppliers, consumers or end-users, affected communities, persons in vulnerable situations, and nature, raises two concerns. First, previously identified relevant stakeholders do not necessarily fit into these categories, which restricts flexibility. An "other" category or clarification that additional categories are permissible would therefore be appropriate. Second, the term "persons in vulnerable situations" is not defined and requires further explanation. In addition, AR 10 and AR 11 are inconsistent. AR 10 includes workers' representatives within the list of affected stakeholders, whereas AR 11 distinguishes between affected stakeholders and their representatives. To resolve this, two options exist: Option 1: Amend AR 10 only, leaving AR 11 unchanged. Option 2: Amend both AR 10 and AR 11, clarifying that affected stakeholders may be represented by intermediaries. For example: AR 10: "…affected communities and persons in vulnerable situations and/or their representatives." AR 11, sentence 2: "However, the undertaking may also seek direct input into its materiality assessment from affected stakeholders or their representatives (such as employee representatives or trade unions)."	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The statements have nothing to do with the materiality assessment but relate to Governance procedures. It is crucial that these sentences are deleted here. Suggestion: Delete paragraph AR 11.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	This can be made clearer. A policy prescribes certain behaviour or actions, and therefore the policy itself can be considered an "action". In this case, it is unnecessary to describe the expected actions under a policy twice, both in GDR P and in GDR A. In this context, references to actions taken shall also be understood to cover aspects of the corresponding implemented policies, since policies are realized through actions; therefore, it is suggested to delete paragraph AR 12.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 12
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	According to AR 14 of ESRS 1, paragraph 41, resources outside the balance sheet must also be taken into account when determining financial effects. This is methodologically complex and may entail considerable analytical effort, particularly in identifying such resources.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 14
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	AR15 highlight, once again, how problematic is the definition of anticipated financial effects. It is written "[…]its contribution to financial effects in the short,[…] scenarios/forecasts that are deemed likely to materialise[…] do not yet lead to the recognition of assets/liabilities, or income/expenses" The combination – exemplificative- shown above is particularly critical in the boundary with financial accounting and potentially leading to minimal/no disclosure or litgation risks.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 15
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The optional use of the top-down process for the materiality assessment is, in principle, to be welcomed. However, in the absence of illustrative guidance as to when a topic may be excluded in advance as immaterial through the application of the top-down approach, both preparers and auditors are faced with challenges. A clarification or the inclusion of examples in the NMIG would therefore be helpful.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The provisions do not specify when the use of quantitative information is required. While it is positive that the materiality assessment process may be adapted to individual circumstances, examples in the NMIG would provide greater clarity as to when quantification is appropriate and when it is not. The formulation "a qualitative analysis may be sufficient" appears too weak and stands in contrast to the requirement for reliable information. It would be more appropriate either to permit a clear top-down decision by management or to state explicitly that, for example, a competitive benchmarking exercise based on published sustainability reports constitutes an acceptable form of qualitative analysis.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The statement is wrong. Example S1-13 §40.(b).i clearly specifies that death cases must be reported when they occur on the undertaking's premises and involve workers. Furthermore, it would be reasonable to make explicit that metrics for company-specific topics may also include the value chain, provided these aspects are considered material. In addition, references to undue effort and similar considerations should be addressed to ensure clarity and proper application.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Second sentence in AR 4 for para. 21 is misleading and should be deleted Suggestion: Delete paragraph AR 4.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 4
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	This example is extreme and raises uncertainties. A "breach of agreed standards" does not necessarily constitute a violation of law. "Agreed" may refer to loan conditions set by a financial institution, yet where such standards go beyond legal requirements, a breach does not automatically amount to a negative impact. In the case described, the loan is granted in compliance with the law, environmental regulations apply and, by assumption, are not violated. It is also evident that any loan to a company with environmental impacts will inherently create impacts along the value chain. A breach related to a single loan does not in itself render a matter material, unless the loan is particularly significant for the overall portfolio. The example is flawed because it does not consider any materiality threshold of the loan, it assumes that contracts can enforce standards whereas they can only create incentives, and it disregards the constant shift between potential and actual impacts within a portfolio, which cannot be implemented at scale as suggested. Overall, the examples do not contribute any new perspective to the disclosure requirements, therefore it is proposed to move AR 6 for paragraph 30 into the NMIG.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 6

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Seems that the company is now free to choose whether to report at the IRO level or simply just report at the topic level. If this is the case, what's the point of drilling down to the IRO level for all material topics? I might want to be more conservative and just disclose the topic that was material without necessarily detailing all the IROs that made the topic material. This also contradicts the IRO disclosures which require a disclosure of the descriptions of the IRO. If I choose to report at topic level, and not IRO, do I ignore the IRO level disclosure from ESRS 2? I guess this is what they mean by applying the materiality filter to ESRS 2 as well unless my interpretation is incorrect?	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I agree	If this reads in the way I'm interpretting it, companies are not expected to report on every single IRO that results from the DMA in order to report on that topic, selecting a few IRO would be sufficient. Further clarity would be required.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	46.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Unclear on simplification. If you start at compiling evidence for 'obviously material topics' you can stop there and conclude that the topic is material and then do a more comprenhensive assessment at IRO for topics that are less obvious but you also still need to go back to the topics you originally flagged as 'obviously material' to then identify the material IROs (which is what the last sentence of then AR states), however, ESRS 1-22 seems to provide the flexibility to report either topic or IRO level. They seem to be contradicting themselves. If we want to save time and cut time resources, IRO level reporting shouldn't be necessary for 'obviously material topics'.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It's now been stated that the materiality filter can be applied to ESRS 2 (see email - log of amendments) but it says the sustainability statement shall include general material information in accordance with ESRS 2. Is it mandatory or not? There are contradicting statments in both documents and here as well. I would find it hard to check the materiality of certain disclosures in ESRS 2, not clear to me how this could be done. If ESRS 2 disclosures have already been cut down significantly and were mandatory before, applying the materiality filter to these would undermine the usability of sustainability statements and there would be no bare minimum comparable information across all companies.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	49.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Goes with above, fundamental in nature, therefore, don't apply the materiality filter to these as they form part of critical information and outline the requirements for policies, actions, metrics and targets	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	20.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I agree		ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I agree		ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 23
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I agree		ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 24
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I agree		ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I agree		ESRS1	ESRS 1 - 7. Preparation and presentation of sustainability information	84. (b)
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	typo in sentence	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I disagree	In my opinion, not material information should not be in the sustainability statements. If the emphasis is on providing information relevant to the users of sustainability statements (users of general purpose financial reporting and other users of sustainability statements) adding not material information would obscure/distract these users from obtaining material information easily and reliably. Ultimately these additional stakeholders requesting this type of information might benefit from having this information reported in a medium that is more appropriate for them (not in the management report for example). That being said, I wouldn't use this clause, so if others feel strongly about keeping this provision with guidance in that's fine but I think we're deviating from the purpose of these statements which is clear material information only.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I agree		ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	109.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Allianz SE	Insurance	Germany			I disagree	We welcome the clarification that the ESRS are designed and already included a fair presentation principle which is being achieved by complying with the ESRS. However, discussions about the draft ED indicate that the proposed wording could lead to unintended consequences, misinterpretations and finally, new complexity which would contradict the intended goal of Omnibus. The current ESRS are generally perceived by auditors as a compliance framework. Auditors generally recognize that fair presentation frameworks involve more than mere compliance and often include additional requirements. The issue is the auditor's understanding of a 'framework': If the revised ESRS determine a fair presentation framework – in contrast to the current ESRS – this would very likely not result in a significant reduction of the reporting burden as intended by EFRAG. Auditors understand that omitting information under a fair presentation framework would require additional efforts for both preparers and auditors, which is clearly not intended by EFRAG. Therefore, the wording around fair presentation and EFRAG's intention behind it, which we fully support, should be further clarified. We deem such clarification necessary in in the legal wording of the standard itself the basis for conclusion, and as well as in existing FAQs relating to the concept of fair presentation. The wording should explicitly outline that fair presentation is embedded into the standards as a principle, not a framework. Fair presentation (in the meaning of the ESRS) might require both, omitting requirements due to the outcome of the double materiality analysis or applying the materiality of information filter, or adding e.g. entity-specific information in order to properly reflect the business model of the reporting undertaking. It should become clear that fair presentation will be achieved by complying with the ESRS and it is intended to simplify reporting and not add burden.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	Allianz SE	Insurance	Germany			I disagree	We welcome that the concept of information materiality has been strengthened. However, in its renewed form, we deem it still not sufficient to allow for a more principles-based view and application of the ESRS and creates interoperability issues with IFRS. Particularly, paragraph 21 (b) implements practical challenges. First, it is almost impossible to prove what kind of information 'is necessary' for users, as necessity generally is a subjective criterion. Some users may deem very detailed and highly granular information as necessary to understand the undertaking's impacts, risks, and opportunities and how it identifies and manages them, while other users may find overly detailed information to obscure relevant facts, therefore deeming it 'necessary' to provide crisp and to-the-point disclosures without granular details. The 'necessary' evidence will therefore prove impossible to justify in practice towards auditors. Second, the sub-paragraph (b) also introduces differences to IFRS, which complicates interoperability. We therefore suggest deleting paragraph 21 (b) and keeping only 21 (a). Alternatively, we suggest to amend the wording as follows. 21(b) - It could reasonably be expected to be necessary for users of general purpose sustainability statements to understand the undertaking's material impacts, risks, and opportunities and how it identifies and manages them.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21. (b)
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	We appreciate the inclusion of the term "usually" in paragraph 65, as it acknowledges exceptions to the general rule that the financial consolidation scope aligns with the own operations of the reporting undertaking. Additionally, we express our gratitude to EFRAG for incorporating paragraph 70 on leased assets, which highlights one of these exceptions. To enhance clarity and prevent misinterpretations, we propose two minor amendments: 1) Clarify that the exceptions mentioned in paragraph 70 are not exhaustive. We recommend adding the phrase "leased assets and other fully consolidated investments in real assets held solely for investment purposes" to paragraph 70. Alternatively, this addition could be included in the recitals to prevent the misunderstanding that paragraph 70 offers a comprehensive list. 2) Emphasize that the principle introduced in paragraph 70 is a universal principle applicable across all topical standards. In particular, it should be explicitly stated that the lessor should report emissions from leased assets as Scope 3 emissions, while the lessee reports these emissions as Scope 1 and 2.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	Allianz SE	Insurance	Germany			I disagree	The new guidelines introduce three additional assessment layers for the assessment of actual and potential impacts – (1) the need to perform an effectiveness test of actions, (2) the requirement to distinguish between significant ongoing vs. temporary actions, and (3) the necessary differentiation in the assessment and disclosures between current and future reporting years – all of which were not present in the set 1 ESRS. We expect a significant increase in reporting burden through these additional layers, as they require supportable evidence and will be subject to high auditor scrutiny. This would particularly penalize wave 1 companies that have already implemented a sophisticated and comprehensive materiality assessment process, methodology, and governance setup. As such, the introduction of the new guidelines is clearly against the European Commission mandate of simplification. Our suggestion is to completely remove the new guidelines on gross vs. net, i.e. paragraphs 34/35 and Appendix C of ESRS 1, and give the market practice time to evolve, which by itself will address currently existing divergence in practice. Regarding paragraph 36 and the clarification of positive impacts, we agree with the addition, as it provides helpful guidance on the matter of understanding positive impacts.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Allianz SE	Insurance	Germany			I disagree	The relief introduced through paragraph 91 of ESRS (note that paragraph 91 addresses the relief, not paragraph 92, which refers to the exclusion of joint operations over which the reporting undertaking does not have operational control) is per definition not applicable to GHG emissions. However, GHG emissions accounting and calculation is the one metric area generally most subject to high measurement uncertainties, often unavailable and unreliable direct or estimated data, and high cost and effort requirements. In the way paragraph 91 is phrased, the relief for metrics would not be possible for GHG emissions – as such full coverage would be required, irrespective of cost and effort considerations or the reliability of estimates. Regulation should emphasize accuracy and reliability of reported data, ensuring that the mandatory use of estimates is limited to where it enables enhancing the understanding of the company's activities. Paragraph 91 creates a misguiding incentive for GHG emissions to achieve 100% data coverage with very low-quality estimates, rather than prioritizing high-quality, verified data for management purposes, such as target setting. Using sector averages for low-quality data areas is simple, but investors need to differentiate companies to identify risks and opportunities. As such, we fully support the relief concept of paragraph 91 and strongly call for removing the exclusion of this concept for GHG emissions. -Paragraph 91 specifies that in certain cases the respective metric can only be "partially estimated". There might however also be cases where the metric cannot be estimated or needs to be estimated entirely, if no real data is currently available. We therefore suggest to rephrase the wording to "(…), but the corresponding metric can currently only be entirely, partially, or not estimated at all."	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	deletion of sector-specific guidance (IFRS, GRI) in order to avoid mandatory sector-specific disclosures	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	11.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	additional guidance necessary for what is a limited further assessment, how should such topic and impact relations be reported and documented?	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	48.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	additional guidance regarding gross/net necessary (contradiction between and Appendix C – also actions after occurrence of impact possible)	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	additional guidance necessary regarding operational control (are all other entities with operational control included?)	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	deletion of machine-readability necessary	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	104.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	stand-alone readability should be deleted, furthermore, we recommend to allow additional references on documents without the same digital requirements, e.g. the remuneration report in order to avoid duplications and redundancies	ESRS1	ESRS 1 - 9.3 Incorporation by reference	120.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	There needs to be a timeframne, but a reasonable timeframe to improve data quality - maybe 5 years.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	RELATED TO APPENDIX - COULD NOT CHOOSE APPENDIX IN EXCEL TEMPLATE: ESRS 1, Appendix B, QC8: Our auditors used this as an argument that gross should be applied across DMA and disclosures. Because it mentions net and gross. Suggest amendment to make it clearer.	ESRS1	ESRS 1 - Objective	1.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	It is unclear whether other elements not mentioned here may go into appendices. For example, we would like to put the statement on sustainability due diligence into an appendix, but it is unclear whether it is allowed according to para 110b or wheter this DP refers only to additional tables and mappings.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	110.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Strong wording should be added against inclusion of unnecessary infromation in the sustainability statements to avoid lenghty and ambiguous disclosures: "The undertaking shall not provide information that is unnecessary to achieve faithful presentation." Alternatively, an additional AR should be added.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"Impact" in the last sentence should not be in bold.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"Actual" should be in bold as "actual impact" is defined term.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 5
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"Positive impacts" should not be in bold.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 7
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"Actual" should be in bold as "actual impact" is defined term.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 9
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	"Impacts, risks and oportunities" should be put in bold in the first sentence and not in the part under letter (a). It should be clarified that once impacts, risks or opportunities are identified as material all time horizons should be analyzed for the purposes of drafting the sustainability statements.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"risk" in the first line should be put in bold.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22

It is difficult to understand a difference between letter (b) and (c).	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (c)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	This should only be possible to an extent where insignificant drivers of IROs from various activities in aggregation may be significant.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	This should be possible, unless the undertaking reports on metrics in its value chain.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"every dt to ensure" should be amedned (into "every effort to ensure"?)	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	This provision may be treated as a gate for disclosure of immaterial information. Therfore any such addtional information should begin with "Information not resulting from materiality assessment".	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108. (a)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"and" at the end of the sentence should be deleted as it suggests cumulatitive condition with letter (b).	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	110. (a)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	"location" should not be in bold as it refers to different concept.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	112.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Paragraph 91 should apply in this case too.	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	123. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	This should not apply to own operations.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	To ensure clarity, in our opinion it should be specified that while an undertaking may indicate that it has not yet set specific targets, it should not be allowed to claim that no metrics have been established. The ESRS should explicitly state whether metrics related to material impacts, risks, and opportunities must be identified and disclosed, even if targets have not yet been defined.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	AR 1
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	To align par 27 and par 33 on stakeholders (if engagement with stakeholders is mandatory) I would suggest changing wording in 27 to "shall" in relation to "engagement with affected stakeholders"	ESRS1	ESRS 1 - 3.3 Double materiality assessment	27.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	To align par 27 and par 33 on stakeholders (if engagement with stakeholders is mandatory) I would suggest changing wording in 27 to "shall" in relation to "engagement with affected stakeholders"	ESRS1	ESRS 1 - 3.3 Double materiality assessment	33.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	We would simplify the wording to emphasize that when judging the materiality of actual negative impacts, the undertaking should assess the severity before any mitigation or remediation is applied. Mitigation or prevention measures implemented before the impact occurred can be considered in the severity assessment. However, remediation actions taken after the impact has occurred do not reduce the assessed severity, although they must still be disclosed if the impact is material.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	34.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Par. 36 of the draft attempts to define what a positive impact is ((...) "if its business activities, products and services mitigate or remediate negative impacts of another party, this is considered a positive impact of the undertaking)". We understand positive impact as value added, and something that helps to better the existing state of things. The example provided (remediating the impact of another party) is helpful and confirms this, but in our opinion it should be elaborated. Is having a supplier code of conduct enough? When does a company truly have a positive impact on eg. climate change? Do negative actions, such as producing emissions, counterbalance positive contributions, such as manufacturing energy-saving solutions? Overall, the definition of positive impact needs more guidance and clarification. This issue is also related to situations where there is no impact (and the lack of its clear definition), e.g., many companies claim that topics such as employing people with disabilities are not relevant to them because they do not hire from these groups. In our opinion, this is a negative impact, as the company is not creating an inclusive space for these groups, yet in the cases I have come across, this topic has almost always been assessed as 'not material.'	ESRS1	ESRS 1 - 3.3 Double materiality assessment	36.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	This point lacks sufficient guidance on practical implementation and last year, in our experience, it was overlooked in methodologies of many companies. In practice, companies often set thresholds, typically from 1 to 5, for each parameter and define a cut-off point above which a topic becomes material. For example, if for a given topic the scale and the scope are set at 1, and irremediable character is set at 5, but the cut-off point based on the sum of the three parameters is only higher than 7, the topic would not reach the threshold. Therefore, we believe this point needs additional guidance on how to implement it in practice.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	In our experience, this sentence has been subject to different interpretations. It is clear that nature is indeed a silent stakeholder, as it cannot speak for itself. However, is it mandatory to consider its needs in the double materiality analysis for example by reviewing scientific reports and research findings? The wording “may be” leaves room for interpretation that it is not, which suggests that further clarification is needed.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 10
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	The wording “The undertaking is not required to assess every possible impact, risk and opportunity” is very broad and creates a risk of misuse. Companies could interpret it as a possibility to simply declare certain topics “not material” without conducting a meaningful assessment or without providing supporting evidence to auditors. This undermines the integrity of the double materiality process, as it opens the door to excluding difficult topics.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	46.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	The provision allowing companies to conclude on the materiality of topics or sub-topics based solely on their business model, value chain, peer analysis, and strategic priorities is risks creating inconsistent practices. The ESRS should clarify where thresholds are expected to be set.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 18
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	The provision allowing companies to conclude on the materiality of topics or sub-topics based solely on their business model, value chain, peer analysis, and strategic priorities is risks creating inconsistent practices. The ESRS should clarify where thresholds are expected to be set.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 19
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Using the top-down approach, it is impossible to identify significant impacts, risks and opportunities of a company-specific that do not belong to any of the topics	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 16
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Unclear which entities to include and how to treat them: should companies treat employee pensions funds in which they have no stakes as suppliers? Such approach includes in the scope of companies' operations matters that are beyond their operations, since the relation is established between employees and the 3rd party, omitting the company alltogether.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	What is specifically expected under the "level of consistency" mentioned here: "to support the understanding of significant data and assumptions, the undertaking shall explain the level of consistency."?	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	In ESRS 1 paragraph 4 the users of general purpose sustainability statements are divided between primary users of general purpose financial reporting and other users of general purpose sustainability statements. Creating this division between users from a financial background and other primary users with different objectives is logical and helps interoperability. However, the description of the users of general purpose sustainabiltiy statements as "other users" implies that they are less important than the "primary" users of financial statements. We suggest to change the wording of paragraph 4b to primary users of general purpose sustainability statements.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	7.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	strange to have the ability to exclude joint operations for which the company does not have operational control. These are assets/operations where a) the company has joint control and b) direct access to the benefits and obligations of such activities; if any exemption would be needed would expect “undue cost and effort”.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	DASB advises to add this information to the application requirements in analogy to the conceptual framework of financial reporting: The objective of general purpose sustainability reporting is to provide information on the material impacts, risks and opportunities related to sustainability matters that is useful to primary users in making decisions based on the material impacts risks and opportunities related to sustainability matters. The decisions described involve decisions about: : (a) buying, selling or holding equity and debt instruments; (b) providing or settling loans and other forms of credit; or (c) exercising rights to vote on, or otherwise influence, management’s actions that affect the entity’s material impacts, risks and opportunities regarding sustainability matters; (d) buying products from or selling products to the company, (e) working for the company as employee or subcontractor, (f) constructive (social) dialogue and engagement with the company on their negative or positive impacts on sustainability matters, (g) advocating for respecting human rights or environmental rights, (h) evaluate the main risks and opportunities due to sustainability matters that the entity is subject to. The aforementioned list is intended most common decisions but is not necessarily exhaustive. The primary users of general purpose financial reporting use sustainability reporting to better understand the risks and opportunities that sustainability issues pose for their investments and the impacts of those investments on people and the environment. The primary users of general purpose sustainability reporting use sustainability reporting to better hold undertakings to account for their impacts on people and the environment. However, general purpose sustainability reports do not and cannot provide all of the information that the primary users may need. Those users need to consider pertinent information from other sources as well. Individual primary users have different, and possibly conflicting, information needs and desires.The entity may therefor focus on common information needs. However, focusing on common information needs does not prevent the reporting entity from including additional information that is most useful to a particular subset of primary users.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	A distinction is made between the materiality of information for primary users of general purpose financial reports and users of general purpose sustainabilty statements. In this distinction, primary users of general purpose financial reports use sustainabitliy information to make decisions based on these reports, and users of general purpose sustainablity reports only use sustainabitliy information to understand the undertaking's IRO's. This distinction is not true and leads to an unequal distinction between users of financial reports and sustainability statements. DASB believes that users of general purpose financial reports also use information on the undertaking's IRO's and users of general purpose sustainability statements also use sustainbility information for decision making. We suggest to use only primary users under 21 a) en 21b) instead of a distinction between primary users of general purpose financial reporting and general purpose sustainability statements.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	79.Par. 10 of ESRS 1: The first part of the amended notion of entity-specific disclosures in par. 10 of ESRS 1 refers to the need for an undertaking to provide additional disclosures when "a topic related to one or more material" IROs is not covered sufficiently or with sufficient granularity by an ESRS. This proposed change does not seem to fit well, as an undertaking shall limit the entity-specific disclosures to cases where one or more material IROs are not properly or fully depicted by applying an ESRS rather than referring generically to topic which may be perceived as requiring an undertaking to address a sustainability topic in its entirety rather than the specific concerned IROs. ESMA therefore recommends retaining the wording of ESRS Set 1. 80.This requirement should also be complemented by a clarification that, where due to the specificities of the undertaking's business, it is necessary to extend the information required by ESRS beyond the undertaking's own operations, this additional information is required as an entity-specific integration, for example for mandatory ESRS metrics. This clarification may be relevant for financial institutions.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	10.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	81.Par. 18 of ESRS 1: This paragraph defines fair presentation based on the qualitative characteristics of information. However, another key element of a fair presentation framework is the mandatory integration of entity-specific information when this is necessary to provide material information. The revised ESRS 1 should reflect this fact.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	18.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Differentiation between "(i) governance, strategy, impact, risk and opportunity management" and "(ii) policies, actions, targets and metrics" is an unnecessary complicated concept.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	8.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	a mandatory reference to best practice or other reporting frameworks due to the absense of sector specific standards is not practicable to all industries and needs to be assessed on an individual basis.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Differentiation between "(i) governance, strategy, impact, risk and opportunity management" and "(ii) policies, actions, targets and metrics" is an unnecessary complicated concept.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	8.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Define faithful represenation. Too vague. Leads to too much interprestation and is not auditable.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Disaggregation on the level of "water basin" is far to much detail and does not fit in the concept of integrating financial and sustainability reporting	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	51.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Delete - not a a pragmatical disaggregation level	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	AR 23
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Contradictive messages in Pt 34 and 35. This will lead to multiple interpretations and will not be practicable.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	There appears to be an inconsistency between paragraph 35 of the Draft Amended ESRS 1 and the corresponding potential impacts table in Annex C. Paragraph 35 states that, when supportable evidence exists, mitigation or prevention actions is considered in assessing the materiality of potential impacts, with an exception only if significant ongoing actions are required to contain severity or likelihood below the materiality threshold. However, the Annex C table does not reflect this possibility at all and presents the assessment logic as if mitigation or prevention actions are not taken into account, which could lead to misinterpretation and inconsistent application of the standard.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	DELETE. By narrowing positive impacts down to business activities, products and services only, this would lead to an additional restriction for determining positive impacts (which is already hard to achieve).	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	CLARIFY. The described gross approach could lead to the assumption that (ongoing/existing) mitigation measures e.g. establishes safety management systems taken in the reporting year to minimize negative impacts must not be considered. This would lead to an increase of reported severe risks without an actual increase of risks and would thus lead to a false interpretation by main users of the report.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	With the removal of sub-sub-topics from Appendix A of ESRS 1, we seek clarification on how. in particular, top-down materiality assessment should be applied in such cases. For example, if a specific impact, risk, or opportunity that was previously captured under a sub-sub-topic (e.g., under ESRS S1) is now found to be material, should this lead to a disclosure at the sub-topic level (e.g., "Working conditions")? In other words, where the materiality of a sub-topic is determined based primarily on the materiality of one of its former sub-sub-topics, is it now expected that reporting should occur on the broader sub-topic level? Clarity on this point would help ensure that disclosures remain relevant and decision-useful, without introducing disproportionate reporting burdens. - CHANGE. Attaching the deleted sub-sub-topics in brackets after the sub-topics will effectively increase the reporting burden as it still necessitates considering all these in the DMA but makes it harder to apply materiality to exclude information	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 17
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Undue Costs need to be specified and defined	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	DELETE. Currently, the external auditor does not validate each specific scoring of the DMA. The newly added requirement would increase the burden for external assurance by factor 4 - at least.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Disaggregation will lead to too much detail level and will increase reporting workload	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	DELETE. This could require a proof of non-materiality at subsidiary level and vice versa lead to a significant increase of reporting burden by introducing another disaggregation level for metrics.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	AR 24
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	DELETE. Site- or even water basin/local ecosystem-based reporting does nnot make sense at all and would lead to a tremendous increase of reporting burden without adding additional value for main users of reports.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	AR 23
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	DELETE. Site- or even water basin/local ecosystem-based reporting does nnot make sense at all and would lead to a tremendous increase of reporting burden without adding additional value for main users of reports.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	AR 22
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	It is very complex to analyse impacts, risks and opportunities for funds due to constant changes. Funds should be obliged to disclose their sustainabilty impacts, risks and opportunities	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	IRO-mapping to specific policies, actions, targets is far too much detailed - and ESRS 2.0 offers to stay on topical level. topical level shall be mentioned	ESRS1	ESRS 1 - 9. Connected information and linkages with other parts of corporate reporting	113.
Excels	SZEF	Trade union	Hungary			I agree	This is crucial for understanding impact materiality assessment	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	SZEF	Trade union	Hungary			I agree	This is crucial for understanding impact materiality assessment, in particular the point on reporting on the opinion of workers' representatives	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Finnwatch ry	NGO	Finland			I agree	Agree with the addition of fair presentation as an overarching principle and including qualitative characteristics of information more prominently in the standard. Our experience supports the view that currently the information provided is in some cases of little benefit for users, and giving qualitative characteristics of information stronger prominence could potentially address this shortcoming.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	18.
Excels	Finnwatch ry	NGO	Finland			I disagree	We find it problematic that companies are given freedom to choose whether they report on topical level or at IRO level. The level of topics is too general to give a proper clarity and focus on the IRO level should be required.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Disagree with the inclusion of suppliers as "affected stakeholders". Whereas some suppliers, such as own-account workers, may be affected stakeholders, most suppliers are companies (including large companies) who are not similarly rights-holders (individuals or groups) as other affected stakeholders are. When they are included in the definition, it may give an impression to companies that it is sufficient to engage with their supplier companies for materiality assessments instead of e.g. suppliers' workers.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	10.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Arguably, the most significant use of judgment is during the double materiality assessment and as such, companies should be specifically required to disclose their use of judgement when assessing whether certain topics are material or not material for them, at least if they decide that certain topics that are typically material for other companies in the same sector are not material to them.	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	85. (a)
Excels	Finnwatch ry	NGO	Finland			I disagree	We urge caution in introducing a relief on the basis of "undue cost and effort". Generally, sustainability should not come second to companies' cost and effort. This relief also gives companies a lot of discretion on information sources.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87.
Excels	Finnwatch ry	NGO	Finland			I disagree	This is difficult to understand and should be edited for clarity. We would strongly oppose any relief which would allow companies to only consider part of their value chain on the grounds of "undue cost and effort". This kind of approach would be against international business and human rights standards such as UNGPs and OECD Guidelines.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (b)
Excels	Finnwatch ry	NGO	Finland			I disagree	This is difficult to understand and should be edited for clarity. We would strongly oppose any relief which would allow companies to only consider part of their value chain on the grounds of "undue cost and effort". This kind of approach would be against international business and human rights standards such as UNGPs and OECD Guidelines.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (c)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	It should be required that the disclosure requirement codes are always used in the text to indicate where the relevant information is being reported.	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	104. (a)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	Comment related to Appendix A: In the subtopics listed for ESRS E4 the expression in brackets "(terrestrial and marine habitat change, invasive species)" should be deleted, as this list is not consistent with the five drivers mentioned in E4 and recommended by IPBES.	ESRS1	ESRS 1 - Objective	9.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Comment related to Appendix A: To provide preparers with more certainty which topics need to be assessed and to increase the comparability of materiality assessments and reported information, the list of sustainability topics in Appendix A (former AR 16) should be a mandatory starting point instead of non-binding guidance. The second part of the first sentence introducing Appendix A ("and provides non-binding guidance to support the application of provisions in this Standard.") should be deleted. Paragraphs 9 and 23 of ESRS 1 should explicitly state that it is expected from undertakings to consider the list in Appendix A when conducting the materiality assessment.	ESRS1	ESRS 1 - Objective	9.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Para. 27 lists usual internal and external sources of evidence and information that the undertaking may use in conducting a materiality assessment. Environmental managementsystems (e.g. ISO 14001 or EMAS) provide a useful basis for conducting the impact materiality assessment for environmental topics and should therefore be explictly listed here.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	27.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Glossary: The definition of "actual impacts" should not only those that have already occured but also those that are currently occuring. Change definition to: "Impacts that have already occured in the reporting period or in prior years or those that are currently occuring in the repporting period."	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Feedback submitted as part of the online questionnaire.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	30.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Para. 47 lists information sources that are deemed to be available without undue cost and effort. This list should not be exhaustive. Change second sentence to: "At a minimum, information…is considered available to undertaking without undue cost and effort"	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Feedback submitted as part of the online questionnaire.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I agree	An important part of EFRAG's mandate to revise the ESRS is to increase consistency with other pieces of EU legislation. For this reason, we urge EFRAG to maintain the possibility to incorporate information by reference from EMAS environmental statements (Regulation (EU) No. 1221/2009). ESRS 1 para. 119 should clarify that, in line with the FAQ issued by the European Commission in August 2024 (para. 71), that the validation of environmental information provided by EMAS Environmental Verifies can be considered to be at least at the same level of assurance as the CSRD limited assurance requirement.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	119.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Unclear how to interpret this paragraph in conjunction with proposed in ESRS E1 shift from operational control to financial approach. We believe that the operational control criterium should be maintained, as it will allow clear interpretation of business relationships, i.e. all entities out of operational control should be included in the value chain.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	This paragraph in conjunction with proposed paragraph 92 entail lack of consistency between metrics. We believe that the operational control criterium should be consistent across all material topics, as it will allow clear interpretation of business relationships, i.e. all entities out of operational control should be included in the value chain.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	69.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Unclear which entities to include and how to treat them: should companies treat employee pensions funds in which they have no stakes as suppliers? Such approach includes in the scope of companies' operations matters that are beyond their operations, since the relation is established between employees and the 3rd party, omitting the company alltogether.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	This paragraph in conjunction with proposed paragraph 69 entail lack of consistency between metrics. We believe that the operational control criterium should be consistent across all material topics, as it will allow clear interpretation of business relationships, i.e. all entities out of operational control should be included in the value chain.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	92.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Sensitive information are not limited to know-how, intellectual property and results of innovation. Current proposal only addresses a selected list of types of information, unjustifiably limiting the sensitive information relief. In the context of extensive obligations on disclosing financial data and risk-related information, either this paragraph should be re-worked to include all sensitive information, which if revealed would hinder the issuer's commercial or negotiation position, or all wuantitative datapoints on anticipated financial effects and risks should be voluntary.	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	98.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Introducing a dependency on national authorities' and their decision to include the relief related to ongoing negotiations up to them. This too will make consolidation even more complicated and result in additional burden stemming only from this process, which goes against the goal set out by the Commission.	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	AR 35
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Regarding the Net/gross approach, it is stated and defined for assessing impacts, but not clear in relation to risks and opportunities. We believe that a consistent approach should be clearly applied to all IROs to avoid unnecessary differences in interpretation and discussions during attestation.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	24.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The word "manage" related to IROs is not precise and therefore unclear.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	21. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	What is expected in terms of disclosure with regards to "dependencies" and the financial effects, especially those which are not recognised in the financial statements? Does the financial materiality apply to these financial effects?	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	14.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Please be more specific on the "reasonable and supportable evidence to estimate the levels of severity and likelihood of impacts and the likelihood and magnitude of financial effects of risks and opportunities"	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	45. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Please be more specific on this statement "a limited further assessment may be sufficient"	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	48. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	How do we have to interpret "the undertaking shall use reasonable and supportable information available at the reporting date without undue cost or effort"?	ESRS1	ESRS 1 - 7. Preparation and presentation of sustainability information	87.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	How do we have to interpret " The assessment of what constitutes undue cost or effort depends on the undertaking's specific circumstances and requires a balanced consideration of the costs and efforts for the undertaking and the benefits of the resulting information for users" ?	ESRS1	ESRS 1 - 7. Preparation and presentation of sustainability information	89.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	What is specifically expected under the "level of consistency" mentioned here: "to support the understanding of significant data and assumptions, the undertaking shall explain the level of consistency."?	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	"presented at the end of each chapter" - not correct as this moved inside text	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	7.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	It is utmost important to clarify that the materiality assessment shall not be reperformed every year in case no significant changes in the assumptions/circumstances occurred. The way it is written could lead to confusion and it seems anyway the undertaking shall reperform the assessment every year. We recommend to align the formulation with the IG1 Materiality Assessment paragraphs 170 & 171 (frequence of DMA update) to highlight the need to refresh the DMA exercise only if there are material changes in the undertaking's organisational or operational structure, or material changes have occurred in external factors that could generate new or modify existing IROs, or affect the relevance of specific disclosures	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Remove "Business relationships are not limited to direct contractural relationships." and all references through out the ESRS to indirect business relationships. Leave value chain at direct suppliers, customers, and business relationships. This is not incompatible with the CSRD which refers to the undertaking's value chain as "its own operations, its products and services, its business relationships and its supply chains." Undertakings should spend their efforts and resources on direct business relationships where they have more influence and/or control.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This further complicates the analysis, as the impacts would need to be assessed primarily for materiality (§31-32), and secondarily based on net versus gross effects.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This further complicates the analysis, as the impacts would need to be assessed primarily for materiality (§31-32), and secondarily based on net versus gross effects.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This further complicates the analysis, as the impacts would need to be assessed primarily for materiality (§31-32), and secondarily based on net versus gross effects.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This further complicates the analysis, as the impacts would need to be assessed primarily for materiality (§31-32), and secondarily based on net versus gross effects.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 9
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The last phrase where the "workers' representatives opinion shall be communicated, where applicable..." is open for interpretation on where it is applciable and where not.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Financial materiality is asked to be assessed from "user" perspective who is not part of the stakeholders participating in the assessment overall (ie assessment is done by the affected stakeholders)	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	37.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Not clear what "unless not appropriate" means in the 3rd paragrpah, how do we judge / evaluate it?	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I agree	Documenting the two approaches gives flexibility and allows to avoid complexity	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	48.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	If peer analysis is used, further investigation is necessary to include or exclude a topic from the sustainability statement as an undertaking should only report on impacts, risks and opportunities related to its own business model and strategy.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	48. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	ESRS 1.AR 26 in reference to ESRS 1 3.7 may result in a high number of new datapoints depending on its interpretation by auditors. EFRAG should clearly state that the disaggregation of data is voluntary ("may...") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload and unjustified burdens for the disclosing company (information may not be available or only with high effort)	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The term "significant" in the first phrase is not defined, creating uncertainty about when disaggregation is required. In addition, AR24 is overly prescriptive: requiring disaggregated metrics could lead to excessively long reports that obscure relevant information, particularly for undertakings with many sites and varying material impacts, risks or opportunities. We recommend removing AR24 and replacing it with a requirement for qualitative information, which would ensure clarity without imposing disproportionate reporting burdens.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 24
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Down to which level shall the investigation be done?	ESRS1	ESRS 1 - 4. Due diligence	54.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Last part of the paragraph refers to §31 (that addresses the materiality of impacts) when the current § talks about IROs in general, might be missing or wrong reference - makes a bit of a confusion.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	64.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The sustainability information is consolidated based on the financial consolidation, this § brings further confusion in this statement as it takes about potential minority shares that are not financial consolidated but would have to be considered in sustainability data as part of "business relationship".	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Remove DR. Long-term employee benefit funds are typically diversified and the undertaking has no influence or leverage over these companies.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This requirement might be very complex as the undertaking has to agree with the external auditor which are these significant event, considering this entity is a new acquisition and we don't even know it	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	73.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The application of the term "significant" is not clear	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The application of the term "significant" is not clear	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	85. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This paragraph requires adjusting the base year of the target following a major acquisition or disposal. Firstly, this constitutes a behavioral requirement, which contradicts Paragraph 5 stating that "the ESRS do not mandate behavior but set Disclosure Requirements[...]". Secondly, it is inconsistent with the possibility of investments or divestments being part of the business strategy to achieve the target	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (c)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Not clear what the AR requirements are, looks more like a term that should be defined in the Glossary rather than an AR.	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	AR 29
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This § makes a confusion with Appendix B where the characteristics of the information are already defined. We do not think an additional information like in §88 is required on top of Appendix B.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	88.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	"(b) could reasonably be expected to have been obtained....", we suggest that the previous used term "without undue cost of effort" to be used in here instead of reasonable.	ESRS1	ESRS 1 - 7.7 Reporting errors in prior periods	AR 33
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Not clear what "dt" means in the first line. In the old text §108 had a "reasonable" term there, we suggest that the previous used term "without undue cost of effort" to be used in here instead of reasonable (if this is the case).	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The application of the term "significant" is not clear (3rd line)	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Not clear what "digitalisation requirements" refers to, no requirements to the main Sustainability statement can be found in ESRS 1	ESRS1	ESRS 1 - 9.3 Incorporation by reference	118. (e)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	We suggest that the previous used term "without undue cost of effort" to be inserted in here.	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	122.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This creates a disparity between companies reporting in different waves of CSRD reporting.	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	123.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Not clear how this is aligned with EU Concil compromise on "Stop the clock" where the phase-in process is setup for Wave 1 companies differently. We believe it shall be aligned.	ESRS1	ESRS 1 - 10.3 Transitional provision: List of Disclosure Requirements that are phased in	127.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The mandatory use of estimates should be limited to the most relevant disclosure requirements, given their lack of reliability. For the remaining ones, companies should be able to provide qualitative data and an explanation of the difficulties to obtain the requested information instead.	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	AR 30
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The paragraph relating to incorporation by reference provides unclear indications and limits the possibility of using this tool. This provision should be simplified to enhance its usability, perhaps also providing the possibility of reporting the most detailed information on the company website.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	1.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	The consideration of mitigation activities for actual negative impacts, should follow the same conditions as for potential negative impacts, i.e. 1) when supportable evidence exists of effectiveness of mitigation/preventitive actions and 2) allowance to not consider the actions to maintain ongoing actions to contain severity and likelihood of impact	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	There appears to be an inconsistency between paragraph 35 of the Draft Amended ESRS 1 and the corresponding potential impacts table in Annex C. Paragraph 35 states that, when supportable evidence exists, mitigation or prevention actions is considered in assessing the materiality of potential impacts, with an exception only if significant ongoing actions are required to contain severity or likelihood below the materiality threshold. However, the Annex C table does not reflect this possibility at all and presents the assessment logic as if mitigation or prevention actions are not taken into account, which could lead to misinterpretation and inconsistent application of the standard.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	This could require a proof of non-materiality at subsidiary level and vice versa lead to a significant increase of reporting burden by introducing another disaggregation level for metrics. This datapoint should streamlined or deleted.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	AR 24
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	It requires adjusting the base year of the target following a major acquisition or disposal. Acquisitions or divestments might be part of the business strategy to achieve the target, so the base year should not be changed. Some companies, by nature, need to undergo transformation in order to decarbonize. For them, divestments serve as a strategic lever: on one hand, they help reduce emissions, and on the other, they provide financial capacity to undertake the necessary investments. Adjusting the baseline year would mean losing this lever. Additionally, this is a behavioral requirement, which contradicts ESRS 1/Para 5 about not mandating behavior.	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Overall, the summary of the sub-sub-topics at sub-topic level is welcomed. However, the addition in brackets and the naming of several topics indirectly maintains this fine distinction. The sub-topics should therefore be simplified	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	9.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	To support implementation, the sub-topics should be reflected in the respective topical reporting standards (e.g. in the respective headings for metrics) so that it can be identified more precisely which reporting requirements contribute to which sub-topic in order to be able to exclude non-essential topics more reliably. Alternatively, there should be a table showing which DRs relate to which sub-topic.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	50. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The presentation gives the impression that the entire topic standard is to be reported when the topic (through at least one sub-topic) is material. This should be clarified at sub-topic level.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	A reference to the undue cost of effort would be useful to avoid giving the impression that engagement with affected stakeholders is mandatory to conduct materiality assessment. The description should be aligned with ESRS 1 -5.2.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	33.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Overall, the inclusion of the supply chain should be simplified and eliminated as far as possible. It should be made clear that the company reports on its own targets, actions, policies and metrics. The supply chain is only taken into account to the extent that the company has, for example, targets / measures for sustainable procurement and sustainable use of products. It should not be necessary to collect data from suppliers and/or customers for the purposes of the company's own sustainability reporting.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Data points for which phase-ins are planned should be omitted entirely or become voluntary.	ESRS1	ESRS 1 - 10.3 Transitional provision: List of Disclosure Requirements that are phased in	127.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	reasonable	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	36.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	A top-down approach makes sense, especially for companies that have structured their risk management in this way in order to exploit synergies	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 5
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The terms short-term, medium-term and long-term should be clearly defined. It remains unclear how to deal with impacts that exist throughout the entire duration of business activities but do not have long-term consequences in themselves, such as continuous water consumption.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	30.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The materiality analysis should be limited to direct business relationships. Global supply chains are very complex, and only a few companies can influence or oversee the entire supply chain. -> Deletion	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	30.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	Appropriate: Focus on areas of the value chain that the company can genuinely influence/that are influenced by the company.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (a)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Within the framework of the double materiality analysis, a comprehensible and well-founded argument should suffice to substantiate the assessment of materiality. Formal evidence should not be mandatory. Since the analysis must be regularly reviewed and updated, a high level of documentation would not be practicable for companies in the long term.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	simplifies the scope of the analysis	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	46.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	simplification	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (a)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	simplification	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I agree	Estimates are essential when it comes to environmental issues, as concrete data is in many cases unavailable	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	67.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	useful approach, as it allows other obligations to be covered by the CSRD report (e.g. EMAS environmental statement). However, companies should also be able to include additional information in the report in order to fulfil other purposes if necessary (e.g. as evidence for portals such as EcoVadis).	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	107.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	While the sentence "ARs also include text where the term 'shall consider' is used to indicate issues, resources or methodologies that the undertaking is expected to take into account or to use in the preparation of a given disclosure. " tries to specify the use of "shall consider", it is a contradiction ot para. 5 where it states that "The ESRS do not mandate behaviour [...]". A "if applicable" should therfore be added. Additionally, "shall consider" is not consistently applied as sometimes only "shall" is used (eg. ESRS E1 Ar 4 and 5).	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	15.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	It remains unclear who "primary users", "users of general purpose sustainability statements" refer to and at what point an information is considered "necessary". The proposed wordings risks an expansion of the information provided by companies as sustainability information might be interesting for a very broad group of users. "Decision-usefulness" should be key for sustainability information as well.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	"Where the impact is deemed material based on this assessment, the undertaking shall disclose the remediation actions undertaken and their expected or actual outcomes. " The wording indicates a disclosure requirement of remediation actions on level of each material impact. Deletion or rephrasing should be considered.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	"[...] if the undertaking needs to maintain significant ongoing mitigation and/or prevention actions". It is unclear how "significant ongoing mitigation actions" should be interpreted. Further clarification is needed.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The examples are not very helpful as these are rather obvious connections. However, the supply chains of mulitnational companies are much more complex. Including examples should not be part of the disclosure requirements but could be part of the NMIG and should be deleted here.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 6
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The Appendix C should be deleted as it rather adds complexity to the topic and might require additional documentation effort as part of the audit procedures.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 9
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The part"Under the CSRD, the management of the undertaking shall inform the workers' representatives at the appropriate level and discuss with them the relevant information and the means of obtaining and verifying sustainability information. The workers' representatives' opinion shall be communicated, where applicable, to the relevant administrative, management or supervisory bodies." should be deleted. This is part of level 1 legislation. Additionally, it seems to indicate behavioural obligations going against para. 5.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 11
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Suggestion to delete Application Requirement as it does not add any additional value / insights to the reporting requirements.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	It is unclear what is meant with "signficant events" and what exactly needs to be disclosed. Suggestion to either delete or further clarify paragraph.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	73.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	This requirement is not a relief but constitues a behavioural obligation. it should therefore be deleted and the initial paragraph 85 should be reintegrated: "Sometimes, it is impracticable to adjust comparative information for one or more prior periods to achieve comparability with the current period. For example, data might not have been collected in the prior period(s) in a way that allows either retrospective application of a new definition of a metric or target, or retrospective restatement to correct a prior period error, and it may be impracticable to recreate the information (see ESRS 2 BP-2). When it is impracticable to adjust comparative information for one or more prior periods, the undertaking shall disclose this fact."	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Reasonable and supportable information is subject to the interpretation of auditors. A clear definition is missing otherwise it undermines the level playing field and will be applied unevenly.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	88.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	A "balanced consideration of the costs and efforts" is subject to companies and auditors interpretation. If at all, the relief might be helpful for wave 2 companies but at what point is a multinational company able to use this argumentation? Introducing this concept on a broad scale might also reduce the comparability and availability of sustainabiltiy data.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Reporting only partial scopes without clear guidance risks to reduce the comparabiltiy and availability of sustainability of data.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Providing a lit of references in the sustainability statement should be sufficient. No additional cross-referencing should be needed from other source documents to the sustainability statement. Deletion of requirement.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	118. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Increase from three to five years. Gathering information from upstream and downstream value chain is so complex.	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	123.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Starting from the sixth year of reporting instead of from the fourth year of reporting under ESRS.	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	125.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	The new term 'general purpose' does not add so much clarification to the 'general filter'. Rather it might complicate assessments, if one is to consider more distinguished needs for different categories of users	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Suggest to add clarity that the list is illustrative and not exlusive.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	27.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	This is a better term, perceived to be less demanding, as is commented also by EFRAG.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Statkraft has already provided Feedback on DR 34 & DR 35 & Appendix C as part of the "Gross vs net" fieldtest. We refer to our response to the survey as well as interview with EFRAG on the fieldtest for our more extensive comments	ESRS1	ESRS 1 - 3.3 Double materiality assessment	34.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Statkraft has already provided Feedback on DR 34 & DR 35 & Appendix C as part of the "Gross vs net" fieldtest. We refer to our response to the survey as well as interview with EFRAG on the fieldtest for our more extensive comments	ESRS1	ESRS 1 - 3.3 Double materiality assessment	35.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	No need to add 'boileplate' as a word. But we would be positive that this definition is more clarified	ESRS1	ESRS 1 - 3.3 Double materiality assessment	36.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Statkraft has already provided Feedback on DR 34 & DR 35 & Appendix C as part of the "Gross vs net" fieldtest. We refer to our response to the survey as well as interview with EFRAG on the fieldtest for our more extensive comments	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 9
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	It is it better/ a good change	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	The addition of "undue cost and effort" is a positive development. However, we see a challenge in the fact that fewer companies will fall under the scope of CSRD due to the Omnibus Directive, while at the same time, the value chain reporting requirement remains. This combination may make it significantly harder for companies still within scope of CSRD/ESRS to gather necessary information from their value chain. One possible solution to consider: Entities in scope of CSRD could be exempted from reporting on value chain elements where their suppliers or business partners are not themselves in scope of CSRD. This would create a more proportionate and practical approach, especially in the early years of implementation.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	60.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	The requirements for determining which entities within the Group must be included in sustainability reporting are complex and not fully aligned across the ESRS standards, nor with financial reporting standards. A particularly confusing area relates to investees, such as joint operations, joint ventures, and associates. One of the key challenges is that these entities are often not part of our governing structure, making it difficult to ensure accurate, consistent, and timely data collection. The complexity is further amplified in the case of joint operations, where the standards require recognition based on ownership share. According to the current ESRS requirements, only subsidiaries and joint operations are to be consolidated for social and governance metrics. As a result, entities classified as associates and joint ventures—which are not consolidated in any shareholder's annual report—are excluded from all undertakings' reports. This has significant implications: critical metrics such as Total Recordable Injuries (TRI), fatalities, and other incidents occurring within associates and joint ventures fall outside the reporting scope entirely, and are therefore not reported by any undertaking.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	58.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	In the log of ammendments, reasoning for this paragraph included the following: "Reference to "philanthropy" was considered but discarded. Only impacts that derive from business actvites, products and services qualify as positve impacts to be reported". This is not adequately clarified in the official standard or application requirements. Companies who sponsor and donate to others will likely want to report these as positive impacts. In paragraph 30, non-contractual business relationships are also mentioned and this leaves room for interpretation that could allow for philanthropy to be considered a form of business relationship (if argued that it is a form of partnership, creates reputational benefit or works towards communal goals).	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I disagree	The description in this paragraph makes sense. The table provided in Appendix C is confusing and does not align. In paragraph 35, preventative / mitigation actions that are already implemented can be considered in assessing materiality, the table in appendix C however says that, in the reporting year, the potential impact should be considered before the action has been implemented.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I agree	This is crucial for understanding impact materiality assessment	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I agree	This is crucial for understanding impact materiality assessment, in particular the point on reporting on the opinion of workers' representatives	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	Recognition of existing internal processes: We welcome the clarification that companies may rely on structured stakeholder engagement already conducted (e.g., due diligence), avoiding duplication and reflecting the reality of embedded sustainability processes.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	Flexibility in methodology: We support the option to adopt either a top-down or bottom-up approach, allowing alignment with companies' internal decision-making and governance structures.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	Proportionality and qualitative assessment: We agree that quantitative data or scoring should not always be required, and that qualitative analysis may be sufficient where metrics are difficult to obtain or less appropriate.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	Freedom to choose between gross or net approach: We support the position that undertakings should be free to assess impacts on either a gross or net basis, depending on the maturity of their internal processes (especially Integrated Risk Management), thereby ensuring consistency with financial reporting.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	Need for transparent documentation: Companies should systematically document sources, criteria, and decisions in the materiality process. This improves internal governance and provides external stakeholders (auditors, investors, regulators) with reliable evidence.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	Gross impact evaluation: We disagree with the complexity and ambiguity of the gross impact approach. In practice, assessing real gross impact is extremely difficult or nearly impossible, risks generating confusion, and may penalize companies that have already implemented sustainability principles. It also undermines recognition of actual progress and improvements.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	Separation of normative provisions and practical guidance: We disagree with the separation of standards from their practical implications, as this reduces usability and risks weakening effectiveness. Standards should integrate practical guidance into the core text.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	Ongoing reliance on external guidelines: We disagree with the reliance on external sources without clarity on whether they are prescriptive or supportive. This creates interpretative uncertainty. Essential elements for DMA should be included directly in the standards.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Stakeholder engagement: We agree that existing structured engagement should be recognized, but we believe re-engaging stakeholders should not be required unless inputs are outdated or insufficient. Additional engagement should be encouraged only when strictly necessary.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Financial materiality treatment: We agree that internal risk management processes can inform financial materiality, but the current text does not clearly state that a net approach can be applied. Greater clarity is needed to ensure alignment with existing financial reporting practices.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Consistency and comparability: While we support flexibility, we are concerned that without stronger guiding criteria, companies may apply the DMA too differently, creating risks of inconsistency and arbitrariness. Minimum documentation requirements and clearer rules are needed to mitigate this.	ESRS1	Simplification of the Double Materiality Assessment ('DMA')	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	General objective of the principle: We support the inclusion of the Fair Representation principle as a guiding concept, ensuring sustainability reporting moves beyond technical compliance toward a true, accurate, and meaningful portrayal of impacts, risks, and opportunities.	ESRS1	Principle of Fair Representation	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	Unclear link with materiality: The connection between Fair Representation and double materiality is not clearly defined. It is unclear whether DMA guarantees completeness of information or if it implies a second layer of materiality analysis. This ambiguity risks creating confusion.	ESRS1	Principle of Fair Representation	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	Presumption of fair representation: We disagree with the assumption that applying ESRS automatically results in fair representation. Such an approach weakens the principle's purpose and leaves preparers and assurance providers uncertain about expectations.	ESRS1	Principle of Fair Representation	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	Overly broad scope: If interpreted as requiring disclosure of all information potentially relevant to any stakeholder, the principle would create an open-ended and unrealistic disclosure obligation. This could overwhelm users, reduce focus, and weaken report quality.	ESRS1	Principle of Fair Representation	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	High subjectivity: Without concrete boundaries, companies may interpret Fair Representation inconsistently. This could lead to both selective omissions and overly extensive disclosures, undermining credibility and usefulness of sustainability reports.	ESRS1	Principle of Fair Representation	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	Risk to comparability: Because of subjective interpretations, the principle may reduce comparability across companies, especially in the absence of sector-specific standards, limiting stakeholders' ability to benchmark and assess companies effectively.	ESRS1	Principle of Fair Representation	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Need for clarification within ESRS architecture: While we agree that the principle could play an important role, it requires explicit clarification of its interaction with double materiality, minimum disclosure requirements, and the current lack of sector-specific standards. Without this, it risks inconsistent or even opportunistic application.	ESRS1	Principle of Fair Representation	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	Support for mandatory disclosure reflecting transversal relevance across organizations; promotion of consistency and comparability of sustainability information; contribution to ESRS objectives by driving measurable improvements; encouragement of prompt and effective implementation.	ESRS1	Transformation of six datapoints from "may" to "shall"	3.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	Preference for Option 2, which prioritizes qualitative disclosure while allowing voluntary quantitative reporting; ensures flexibility for companies with diverse maturity and reporting capacity; enhances practical applicability and inclusiveness of ESRS; recognizes challenges in achieving full comparability of quantitative financial impact disclosures; reduces risk of inconsistent, misleading, or overly sensitive information; respects confidentiality while encouraging transparency through qualitative explanations.	ESRS1	Reliefs for Quantitative Information on Anticipated Financial Effects	2.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I agree	recognition that NMIG contains useful annexes for preparing the sustainability report, including mapping of sub-topics to disclosures in topical standards, flowchart for determining disclosures under ESRS, example of ESRS sustainability statement structure, and example of incorporation by reference.	ESRS1	Non-mandatory Illustrative Guidance (NMIG)	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I disagree	NMIG may create interpretative difficulties if drafted unclearly; overly generic or ambiguous formulations risk inconsistent application, divergences between organization and auditor, and increased effort to align interpretations.	ESRS1	Non-mandatory Illustrative Guidance (NMIG)	1.
Excels	Sustainability Makers	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	NMIG is valuable as guidance but should be cA16:D25arefully revised to minimize subjectivity while retaining practical annexes and examples.	ESRS1	Non-mandatory Illustrative Guidance (NMIG)	1.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	MEDEF	Business association (other than association of financial institution)	France			I agree	There is a typo "The undertaking shall make every dt to ensure..."	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	AR 35 should deleted. New provisions of CSRD amended will be transposed in national legislation. AR 35 is not useful and cannot require additional disclosure.	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	AR 35
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Para. 40 seems to introduce some form of unnecessary guidance rather a disclosure requirement, considering in particular indent c). It should be deleted.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	40.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The last sentence of AR 22 is confusing considering new flexibility given to preparers to determine the appropriate level of aggregation/disaggregation. "not obscuring" is a principle included in the definition of materiality. No need to repeat it here.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The second part of para. 116 ("to support the understanding...") introduces a new requirement that is not clear (what is the level of consistency ?). This provision should be deleted.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	This provision is not clear and should be deleted. The term "connected" is not clear and what would be the consequences ? Does the undertaking have to report, for instance, on a non-signficant stake held in a company when the investment decision was not taken by the employees themselves but by an asset manager acting independently ?	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	BDO Poland	Auditor	Poland			I disagree	The introduction of the materiality approach to ESRS 2 will disrupt our reporting process. ESRS 2 was intended to be a minimum requirement for all companies to report the information. Currently, if a company doesn't have something, it simply indicates that it doesn't have it/is not relevant to them. I don't know how a company can assess materiality in ESRS 2.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	29.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	Although this is a new and necessary point, it is still vague enough that it may lead to subjective interpretation.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I agree	Better clarity	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I agree	Update instead of reassess = less burden ; no time limit gives flexibility	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I agree	Input for materiality assessment is clearer	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	33.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Could you precise the last sentance of this paragraph ?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Robustess of the methodology when qualitative scoring instead of quantitative scoring ?	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I disagree	Still need to clarify when metrics should include upstream and downstream value. Consistency with paragraph 123 a	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Even if it is a good thing to define the materiality with a general definition I think it would be fine to add in an AR some practical comments. As example : in old 34b we had the point on the possibility to exclude 1 DP in a DR if the DP was not significant. The appendice E was not so bad and maybe to reput on the simplified way.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	21.
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	The reference to users in relation to the concept of fair presentation is too broad. The sustainability statements shall include material information considering ESRS 1 Paragraph 21 (a) information used for decision making by primary users of financial statements and sustainability statements and (b) information to understand the material IROs for users of sustainability statements. Looking at the definition of users in ANNEX II it is a wide definition, referencing to all type of users. Although it might be expected that stakeholder managements, or at least the insights of stakeholder managements, is embedded in your double materiality assessment considerations, the situation can arise that individual users or user groups are not fully recognized in the information provided in the sustainability statements. E.g., specific users or user groups might have different expectations on what an organisation considers material.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	Please clarify the reference to the calculation of metrics. For some metrics (e.g., environmental metrics), the information is not available for the period consistent with that of its financial statements. It needs to be clarified how the disclosure of this reporting period inconsistency in combination with the GDR-M, can be considered and disclosed.	ESRS1	ESRS 1 - 6.1 Reporting period and base year	74.
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	Considering Paragraph 46, and the top-down approach as referred to in AR 17, please clarify in which circumstances Paragraph 46 would apply.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	24.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	Please clarify the content of Paragraph 46 when adopting the top-down approach. Considering Paragraph 46, and the top-down approach as referred to in AR 17, please clarify in which circumstances Paragraph 46 would apply.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	46.
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I agree	We welcome the clarification that sustainability reporting is based on the consolidated financial statements (financial control approach). Accordingly, the last clause in ESRS 1 para. 59 must be deleted in order to ensure consistency between the financial and non-financial statements.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I disagree	The requirements regarding the possibility of cross-referencing need to be reviewed, as they are currently impracticable.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	118.
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	ESRS 1 Chapter 3 Paragraph AR 11 for Paragraph 33, includes the following sentence: 'Under the CSRD, the management of the undertaking shall inform the workers' representatives at the appropriate level and discuss with them the relevant information and the means of obtaining and verifying sustainability information.' It needs to be clarified what type of information should be discussed with the workers' representatives and what the objective of this Requirement is.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	When the use of quantitative information required is not specified. While it is welcome that the materiality assessment process can be adapted to individual circumstances, the inclusion of examples in the MIG could provide greater clarity as to when quantification is appropriate and when it is not.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	Please clarify how to threat changes due to the updated Appendix A: List of topics. If an organisation originally assessed its double materiality assessment on a sub-sub-topic level rather than a sub-topic level, how should an organisation account for this update, considering the changed Appendix A: List of topics, in light of ESRS 2 Paragraph 26 (h)? E.g., sub-sub-topic land-use change falls under the sub-topic direct impact drivers of biodiversity loss in the original ESRS however, in the amended ESRS only the sub-topic drivers of biodiversity and ecosystem change is identified.	ESRS1	ESRS 1 - Objective	1.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose the following rewording: "Common categories of affected stakeholders may include: employees and/or workers' representatives (if applicable), suppliers, consumers or end-users, affected communities and persons in vulnerable situations."	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose removing: - Letter a): seems inconsistent with par. 30. When not all time horizons are analysed, undertakings should explain how they choose the relevant period - Letter b) seems inconsistent with par. 31. If elements of severity are not analysed separately, this should be disclosed	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	ASSIREVI	Auditor	Italy			I disagree	The paragraph encourages excessive qualitative assessment of IROs reducing quality and weakening DMA improvement incentives, strengthening burdens for auditors since would require additional efforts to assess the sufficiency of the analysis performed by undertakings to reasonably conclude on IROs as material. Therefore, guidance is needed on when qualitative analysis alone is sufficient.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	The relief "use of reasonable and supportable information" is too generic in the context of DMA. It would require further explaination to avoid irrelevant details.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	The relief "use of reasonable and supportable information that is available without undue cost or effort" is too generic in the context of DMA. It would require further explaination to avoid irrelevant details.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	ASSIREVI	Auditor	Italy			I disagree	Appendix A: - We suggest considering "privacy" as a specific unique sub topic within S1 e S2 and to not include it within the sub-topic "other labour-related human rights" as it could not be related to human rights only, resulting therefore limited in its application.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	9.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose the following rewording: "The sustainability statement shall include general information in accordance with [Draft] Amended ESRS 2 and, when necessary, on an entity-specific basis", removing the term "material". The application of DMA to all datapoints of ESRS 2 would be hard to apply considering ESRS 2 sets out general disclosure requirements that apply across sustainability topics and defines the undertakings' reporting process for the ultimate identification of material information to be disclosed.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	49.
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest remove this AR. If foundamental in nature as explained in this paragraph, datapoints in ESRS 2 should not be subject to DMA, considering ESRS 2 sets out general disclosure requirements that apply across sustainability topics and defines the undertakings' reporting process for the ultimate identification of material information to be disclosed.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 20
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest removing ESRS 1 para. 108 The content of non-material information is against the foundational principle of materiality which is the cornerstone of ESRS and corporate reporting as such. Inclusion of non-material information could result in obscuring of material information. In addition, it will even increase burden for undertakings, as bad practices of reporting non-material information will spread across preparers.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	108.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ASSIREVI	Auditor	Italy			I disagree	The paragraph encourages excessive qualitative assessment of IROs reducing quality and weakening DMA improvement incentives, strengthening burdens for auditors since would require additional efforts to assess the sufficiency of the analysis performed by undertakings to reasonably conclude on IROs as material. Therefore, guidance is needed on when qualitative analysis alone is sufficient.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	48.
Excels	ASSIREVI	Auditor	Italy			I disagree	The paragraph encourages excessive qualitative assessment of IROs reducing quality and weakening DMA improvement incentives, strengthening burdens for auditors since would require additional efforts to assess the sufficiency of the analysis performed by undertakings to reasonably conclude on IROs as material. Therefore, guidance is needed on when qualitative analysis alone is sufficient.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We suggest to remove this AR, considering the suggestion removing Appendix C. In caso the Appendix would be amended the AR can remain. Please refer to response to Q 12 for details.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 9
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	Need for clarification in conjuction with Appendix C. Please refer to response to Q 12 for details.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose to remove the following provision: "It may also incorporate information by reference to an executive summary placed outside its sustainability statement, such as in another section of the management report, provided that it meets the conditions for incorporation by reference." The executive summary shall be an integral part of the sustainability statement; it shall support users in navigating within the sustainability statement.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	109.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We suggest including new application requirement in order to have a clear definition and detailed explanation of "undue cost or effort" by introducing practical considerations with specific examples	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	ASSIREVI	Auditor	Italy			I disagree	We disagree with the provision provided in ESRS 1 - 91, which allows the undertakings to use reliable direct or estimated data only for part of the reporting boundary or value chain if material IROs are identified.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose to not modify the existing AR 15, therefore re-integrating from NMIG for ESRS 1 the "NMIG 3 for para. 42 (Identification of risks and opportunities, likelihood and magnitude) " in the main standard.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 15
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose to not modify the existing para. 52 (current para. 43), therefore re-integrating from NMIG for ESRS 1 the "NMIG 4 for para. 43 (Negative impacts or material impacts on other topics) " in the main standard.	ESRS1	ESRS 1 - 3.4 Material impacts or risks arising from actions to address other topics	43.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS 1 the "NMIG 5 for para. 51 (Group and subsidiary level) " in the main standard as a new Application Requirement to ESRS 1 para 51.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS 1 the "NMIG 7 for para. 70 (Leased assets)" in the main standard as a new Application Requirement to ESRS 1 para 70.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS 1 the "NMIG 8 for para. 82 (Impracticability to adjust comparative data) " in the main standard as a new Application Requirement to ESRS 1 para 82.	ESRS1	ESRS 1 - 7.1 Presenting comparative information	82.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS 1 the "NMIG 12 for para. 114 (Direct/indirect connectivity with financial statements and consistency of assumptions)" in the main standard as a new Application Requirement to ESRS 1 para 114.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	114.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS 1 the section "Mapping of sub-topics to disclosures in topical standards" into the Chapter 3.6 of the ESRS 1 within the practical considerations considering that such part provides useful indication to the preparers in linking topic to material information. In addition we noted that in the current "Mapping of sub-topics to disclosures in topical standards" under the topic E1 – Climate Change the sub-topic Climate change adaptation should be added.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	49.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We suggest introducing specific provisions in relation to the timing of the acquisition/disposal (i.e. excluding an acquisition/disposal if occurred during the second half-year while including an acquisition/disposal if occurred during the first half-year).	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest deleting such paragraph as reintroduces the requirement excluded at par. 72.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	73.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We suggest updated the ESRS 1 paragraph 21(b) to include the concept of "decision-usefulness". We believe that the concept of decision usefulness should apply equally to users of both general purpose financial reports and general purpose sustainability statements when determining what information is material.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21. (b)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	ESRS 1 paragraph 36 is missing critical words which impact the meaning of what is not a positive impact . The sentence should be updated as follows, "The results of the undertaking's mitigation or remediation actions on negative impacts caused by or contributed to by the undertaking, and its compliance with law and regulation are not positive impacts"	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	ASSIREVI	Auditor	Italy			I disagree	ESRS 1 AR 13 discusses potential impacts and the disclosure of "ongoing/implemented remediation actions". It is unclear how there could be remediation actions related to an impact that has not occurred.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 13

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	It appears that ESRS 1 paragraph 87 is intended to provide a complete list of the areas where the concept of undue cost or effort can be applied. ESRS 1 paragraph 87, however, does not include 'anticipated financial effects', although application of undue cost or effort to 'anticipated financial effects' is specifically mentioned in ESRS 2 AR 15. We recommend EFRAG update ESRS 1 para 87 to include 'anticipated financial effects'.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	The disclosures required by ESRS 1 paragraph 91 related to the actions an entity has taken to increase the coverage and quality of reporting, the progress made during the reporting period, and the requirement to reassess the if new data or inputs have become available at each reporting date should be moved to ESRS 1 chapter 7.3 Use of reasonable and supportable information that is available without undue or effort. We believe these disclosures should be required when an entity applies the relief to omit a disclosure because reasonable and supportable information is not available without undue cost or effort.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Defining the long-term horizon as >5years, without limiting it to a certain number of years (e.g. >5-10 years) makes it very challenging to evaluate and estimate the severity and likelihood of Impacts, Risks and Opportunites. Due to the volatile nature of different factors that influence these IROs it is often very challenging to estimate the severity & likelihood of an impact, if the time period has an open end. We therfore recommend to limit the long-term horizon, e.g. to >5-10 years in order to generate meaningful outcomes.	ESRS1	ESRS 1 - 6.2 Time horizon: definition of short-, medium- and long-term for reporting purposes	78.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Please change the phrase "[...]over the short, medium or long term" to "[...] over the short, medium and/or long term" in order to make more clear, that impacts cannot only occurr, e.g. EITHER in the short OR in the medium/long term, but that impacts can occurr over several time horizons, e.g. over the short, medium, AND long-term.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Please amend and specifiy as follows: "The time horizon is intended to classify both when a material impact/effect occurs (or is expected to occur) and how long the effect is expected to last. If it can be assumed that the impact will decrease or disappear completely in a future time horizon (e.g. due to the implementation of certain actions/policies) and this impact therefore falls below the materiality threshold in the assessment, then the respective time horizon does not apply. Only the period in which the impact is assessed as material must be declared externally."	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	In order to avoid misinterpretations of what is to be understood by "anticipated financial effects", please add a reference to ESRS 2 Disclosure requirement SBM-3 (paragraph 23.) for the definition of the term.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 15
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Please add "opportunities" after "[...] of risks [...]" -> "[...] materiality assessment of risks and opportunities."	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 16
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	This statement is inconsistent with the reporting areas mentioned in other sections of ESRS 1 and ESRS 2 and should be made consistent across all ESRS: "An ESRS sustainability statement covers governance, strategy, policies, actions, targets and metrics for topics related to material impacts, risks and opportunities." This should be changed to: "An ESRS sustainability statement covers the reporting areas of governance, strategy, impact, risk and opportunity management (i.e., policies, actions), targets and metrics for topics related to material sustainability-related impacts, risks and opportunities."	ESRS1	ESRS 1 - Objective	3.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	This 'new' paragraph refers to useful information. Other paras refer to material information. In order to aid simplification, all references to material/useful should be reviewed and streamlined so that the 'standard' is consistent and clear to all stakeholders.	ESRS1	ESRS 1 - Objective	4.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Delete the second sentence ("Civil society, non-governmental organisations and trade unions as users are proxies for affected stakeholders") because it is not needed if it is stated beforehand that civil society, etc. are other users.	ESRS1	ESRS 1 - Objective	4. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The wording is inconsistent with other parapgraphs in the ESRS. This should be changeed to: "Amended ESRS 2 General disclosures establishes Disclosure Requirements (DRs) on the information that the undertaking shall provide for topics related to material sustainability-related impacts, risks and opportunities on the reporting areas of (i) governance, (ii) strategy, (iii) impact, risk and opportunity management (i.e., policies, actions), as well as (iv) targets and metrics."	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	8.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove the last sentence as this is redundant information and change what is left to: "If the undertaking concludes that a topic related to one or more material sustainability-related impacts, risks or opportunities is not covered, or not covered with sufficient granularity by an ESRS, it shall provide additional entity-specific disclosures on that topic. This may be the case due to sectorial specificities and/or other facts and circumstances relevant to the undertaking itself."	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	To aid simplification, we consider that the provision should be replaced with a requirement to draft the dislcosure in accordance with the new GDRs. Move the last sentence of the DR into NMIG. The blending of "may" and "shall" in this DR is slightly awkward wording in that it merges a compulsory action with voluntary outcome and risks becoming a compliance exercise.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	AR 1 for para. 11 is redundant. So, delete it in its entirety. This information is sufficiently covered in ESRS 1, qualitative characteristics of information, and in ESRS 2, reporting areas.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	AR 1
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	If all terms are defined in the Glossary as explained by Paragraph 13, Paragraph 12 could be deleted. Furthermore, the content in Paragraph 12 does not have anything to do with drafting conventions. The first line e.g. (a) should refer to to the impact assessment, in the same way that (b) refers to the financial materiality assessment	ESRS1	ESRS 1 - 1.2 Drafting conventions	12.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	There are too many concepts at play. Further work needs to be done to simplify the presentation requirements	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The majority of members support the emphasis on fair presentation as an overarching principle, altough additional clarity on the definition is essential. Please see our response to Part 2 Q25.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	18.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We support the extension of the filter of information materiality for all datapoints, including the ESRS 2 datapoints	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The concept of material information should not only apply to primary users, but to all users, and the description of when information is material should be aligned with the one in IFRS S1. If this is amended, it would also be important to make other paragraphs, such as ESRS – 37, consistent.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The second sentence is misleading and should be deleted.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 4
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The paragraph should explain or provide an example of a sustainability-related risk that is not related to an undertaking's negative impact and a sustainability-related opportunity that is not related to an undertaking's sustainability-related positive impact.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	26.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The following is the second part of our response to question 12 in part two of our response: Members have the following specific concerns about the new guidance: 1. Definitional Ambiguity: The framework fails to provide clear criteria for distinguishing "significant ongoing actions" from standard business compliance practices which are consistent with regulation. The framework also fails to clarify the distinction between positive and negative impacts. This ambiguity will lead to inconsistent application across companies and industries, undermining the comparability objective that EFRAG seeks to achieve. Additionally, the supportable evidence requirements introduce definitional ambiguity and increase the reporting disclosure burden while the disclosure of expected effects of remediation actions for potential negative impacts remains highly speculative. It may also lead to long exchanges with auditors.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The following is the third part of our response to question 12 in part two of our response: 2. Implementation Complexity: The scenario-based framework in Appendix C requires companies to navigate multiple assessment pathways for different combinations of impacts, actions and timeframes. Companies must distinguish between: - Actual vs. potential impacts - Actions taken before vs. after impact occurrence - Significant ongoing vs. standard mitigation measures - Current vs. future reporting period treatment Appendix C is also very difficult to follow. It is also important to consider how the "gross vs. net" issue is impacted by other simplifications introduced in the DMA –the practical considerations introduced in Chapter 3.5 provide sufficient guidance on the gross vs. net issue. The ability to use a top-down approach counteracts the need to identify and assess impacts which are not material.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove "workers' representatives" from the list of common categories of affected stakeholders.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Sentences 4 and 5 have nothing to do with the materiality assessment but relate to governance procedures. These should be deleted. Sentence 4 would still need to be clarified. We would suggest explaining more clearly what is meant by "discuss with them the relevant information and the means of obtaining and verifying sustainability information".	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Change the wording to simply reference GDR-A as opposed to descibing what "actions" are. Change to: "In this context the reference to actions taken shall be understood as described in ESRS 2 GDR-A"	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 12
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	This paragraph is misleading given the clarification that the scope of consolidation for a sustainability statement is the same as for a financial statement. Consider amending it to: "The financial materiality of a topic is not constrained to material risks and opportunities in the undertaking's own operations and includes information on material risk and opportunities attributable to business relationships in the upstream and downstream value chain."	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	38.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Provide a definition of "other factors" that is distinct from "dependencies" or consider deleting. The examples of "other factors" listed are just "dependencies".	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	40. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	For existing preparers, it should be clarified what types of disclosures are required when preparers update the DMA in line with the practical considerations introduced in Chapter 3.5. It is helpful that Chapter 3.5 is not designed to trigger a re-assessment of the DMA for existing preparers, but paragraph 45 seems to be in tension with the disclosure requirements under paragraph 28-29.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The amendments help undertakings avoid disproportionate evidence-gathering while still producing meaningful disclosures.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changing of the former AR16 table from mandatory to illustrative provides greater flexibility in the DMA. One member has noted that as a result of the removal of sub-sub-topics, for existing preparers, the DMA methodology may need to be adapted, since materiality can no longer be evaluated at the sub-sub-topic level.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We support the flexibility offered to perform the DMA using either the top-down or bottom-up approach. This clarification enables firms to focus on decision-useful information and reduces the burden of documenting the immateriality of long lists of topics and datapoints.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes made provide helpful clarification that i) there is no need to evaluate all the material impacts, risks and opportunities for each time horizon and ii) for purposes of the impact assessment, there is no need to evaluate every characteristic of severity depending on specific circumstances.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes made provide helpful clarification that a quantitative scoring is not required in all cases.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The last sentence does not fit with the general statement that the scope of consolidation for the Sustainability Statement should be the same as for Financial Statements. Furthermore, the statement gives the impression that a re-assessment of the DMA is necessary. This should be changed to: "If a subsidiary is not included in the scope of the consolidated financial statements because it is not financially material, but the subsidiary exposes the group to material sustainability-related impacts, risks and opportunities which otherwise would not be captured because they are unique to this subsidiary, these material sustainability-related impacts, risks and opportunities must be reported in the Sustainability Statement." Conversely, subsidiaries that are deemed immaterial for the scope of financial statements should be excluded from sustainability reporting without any additional assessment.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The statement is incorrect. Subsidiaries must be included in reporting, but specific provisions apply with respect to how to deal with the situation if the reporting period of a subsidiary deviates from the reporting period of the group. Amend as follows: The undertaking must include subsidiaries with different reporting periods in the consolidated report, by adopting the applicable accounting provisions.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	AR 27
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The newly added paragraph 63 advances regulatory coherence. This provision explicitly adds the "value chain cap" principle, which recognises the limitation to data collection allowed under relevant EU law and regulation and establishes clear boundaries: "the information required by the ESRS to be obtained from undertakings in the upstream and/or downstream value chain shall not exceed the limit set by the relevant EU law and regulation". To achieve optimal international applicability and reduce regulatory fragmentation, this framework (paragraph 63) should be broadened to also encompass global law and regulations. Given due diligence approaches and expectations vary, broadening the paragraph to would give maximum flexibility in a fragmented regulatory environment. This measured approach would balance stakeholder information needs with practical implementation realities, ensuring that sustainability reporting remains both comprehensive and operationally viable across diverse regulatory landscapes. Such an expansion would reduce conflicting obligations that may arise from overlapping international frameworks, enhance cross-border compliance efficiency by recognising diverse regulatory environments, and better support multinational enterprise reporting.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	This seems to be redundant to Paragraph 62. Please check what can be merged or if something should be deleted in either of the paragraphs.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	65.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	This seems to be redundant to Paragraph 62 and 65 when talking about estimates and proxies.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	67.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The term business relationships already showed up various times beforehand and now it is defined all of a sudden with respect to associates or joint ventures. Provide an all-encompassing definition in the glossary and then paragraph 68 can be deleted.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	There should be flexibility for the reporting year for financed emissions to differ. Given the challenges with data collection from thrid parties, it is not operationally possible to report this for the same year.	ESRS1	ESRS 1 - 6.1 Reporting period and base year	74.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We support the changes made as they allow different definitions for time horizons so that they can be consistent with internal processes and provide better information.	ESRS1	ESRS 1 - 6.2 Time horizon: definition of short-, medium- and long-term for reporting purposes	79.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	In ESRS 1, remove disclosures aggregating low-probability, high-impact outcomes. Whilst banks do consider low-probability, high-impact outcomes, mandating firms to disclose such information in every case could lead to misstatements or overstatements. We recommend removing this expectation from ESRS 1 (and any related AR) to protect the reliability of disclosures.	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	AR 32
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Overall comment on metrics: The position regading metrics is unnecessarily complicated. We question what the simplificaiton rationale is for continuing to treat metrics treated diferently from other PATs. If the distincition is maintained between metrics and PATs, it is essential from a simplification perpsecptve that EFRAG provide a flow chart to show how all the concepts/releifs/thresholds regarding metrics fit together in practice. EFRAG have noted in their earlier progress report on implementation that a large group of people across a company are involved in preparing the CSRD disclosures, as such, the provisions need to be readily understandable and accessible to all.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	In ESRS 1-90, preparers should be able to exclude from the calculation of metrics any subsidiaries that are not a significant driver of IROs. The relief proposed in ESRS 1-92 with respect to joint operations should refer to financial control as opposed to operational control.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We recommend re-wording this relief for clarity as follows: §91 "When the undertaking cannot provide (using reliable direct or estimated data) a metric related to a material IRO in its own operations or value chain without incurring undue cost or effort, the undertaking can disclose the metric on a partial reporting boundary or for a subset of the value chain."	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The relief proposed in ESRS 1-92 with respect to joint operations should refer to financial control as opposed to operational control.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We support the changes as they allow for the inclusion of additional information when needed for specific users, e.g., ratings agencies.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	If data and assumptions used in preparing the sustainability statement are to be consistent to the ones used in preparing the financial statements, there is no point in explaining the level of consistency. Amend as follows: Data and assumptions used in preparing the sustainability statements shall be consistent to the extent possible with the corresponding data and assumptions used in preparing the financial statements.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We support the provision inserted to clarify that only the information specifically incorporated by reference is subject to assurance and not the entire referenced document. We propose to evaluate the possibility to introduce further reliefs with respect to some disclosure requirements.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	118.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The new addition is helpful a clarification for preparers in jurisdictions who are dependent on the timely transposition in national law.	ESRS1	ESRS 1 - 10. Transitional provisions	121.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We respectfully request that EFRAG provide a clearer definition or illustrative guidance on what constitutes a "limited further assessment."	ESRS1	ESRS 1 - Objective	48. (b)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Would it be possible for EFRAG to provide a clearer definition or illustrative guidance on what constitutes a "major" acquisition or disposal under paragraph 84(c)? In particular, how should entities justify their decision to update or not update targets in such cases? Without further clarification, the requirement seems to risk contradicting the principles-based methodology by obliging companies to reset targets unnecessarily, without sufficient guidance on what "major" entails.	ESRS1	ESRS 1 - Objective	84. (c)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	While the sentence "ARs also include text where the term 'shall consider' is used to indicate issues, resources or methodologies that the undertaking is expected to take into account or to use in the preparation of a given disclosure. " tries to specify the use of "shall consider", it is a contradiction ot para. 5 where it states that "The ESRS do not mandate behaviour [...]". A "if applicable" should therfore be added. Additionally, "shall consider" is not consistently applied as sometimes only "shall" is used (eg. ESRS E1 Ar 4 and 5).	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	15.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	It remains unclear who "primary users", "users of general purpose sustainability statements" refer to and at what point an information is considered "necessary". The proposed wordings risks an expansion of the information provided by companies as sustainability information might be interesting for a very broad group of users. "Decision-usefulness" should be key for sustainability information as well.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	"Where the impact is deemed material based on this assessment, the undertaking shall disclose the remediation actions undertaken and their expected or actual outcomes. " The wording indicates a disclosure requirement of remediation actions on level of each material impact. Deletion or rephrasing should be considered.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	"[...] if the undertaking needs to maintain significant ongoing mitigation and/or prevention actions". It is unclear how "significant ongoing mitigation actions" should be interpreted. Further clarification is needed.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The examples are not very helpful as these are rather obvious connections. However, the supply chains of mulitnational companies are much more complex. Including examples should not be part of the disclosure requirements but could be part of the NMIG and should be deleted here.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 6

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The Appendix C should be deleted as it rather adds complexity to the topic and might require additional documentation effort as part of the audit procedures.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 9
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The part"Under the CSRD, the management of the undertaking shall inform the workers' representatives at the appropriate level and discuss with them the relevant information and the means of obtaining and verifying sustainability information. The workers' representatives' opinion shall be communicated, where applicable, to the relevant administrative, management or supervisory bodies." should be deleted. This is part of level 1 legislation. Additionally, it seems to indicate behavioural obligations going against para. 5.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 11
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Par. 51/52 and AR 22/23 could be interpreted to require companies to dive even deeper into their materiality assessment than originially and stands in contradiction to 3.3.1 which strengthens the top-down approach. The newly added examples (e.g. water basin, site, asset or other appropriate level) should therefore be removed to avoid ambiguity in the interpretation.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Suggestion to delete Application Requirement as it does not add any additional value / insights to the reporting requirements.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	It is unclear what is meant with "signficant events" and what exactly needs to be disclosed. Suggestion to either delete or further clarify paragraph.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	73.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	This requirement is not a relief but constitues a behavioural obligation. it should therefore be deleted and the initial paragraph 85 should be reintegrated: "Sometimes, it is impracticable to adjust comparative information for one or more prior periods to achieve comparability with the current period. For example, data might not have been collected in the prior period(s) in a way that allows either retrospective application of a new definition of a metric or target, or retrospective restatement to correct a prior period error, and it may be impracticable to recreate the information (see ESRS 2 BP-2). When it is impracticable to adjust comparative information for one or more prior periods, the undertaking shall disclose this fact."	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (c)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Reasonable and supportable information is subject to the interpretation of auditors. A clear definition is missing otherwise it undermines the level playing field and will be applied unevenly.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	88.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	A "balanced consideration of the costs and efforts" is subject to companies and auditors interpretation. If at all, the relief might be helpful for wave 2 companies but at what point is a multinational company able to use this argumentation? Introducing this concept on a broad scale might also reduce the comparability and availability of sustainabiltiy data.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Reporting only partial scopes without clear guidance risks to reduce the comparabiltiy and availability of sustainability of data.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Providing a lit of references in the sustainability statement should be sufficient. No additional cross-referencing should be needed from other source documents to the sustainability statement. Deletion of requirement.	ESRS1	ESRS 1 - 9.3 Incorporation by reference	118. (a)
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I agree	Leaseurope welcomes this clarification. We consider the definition of 'leased asset' should be provided, for example is this based on IFRS 16, and if so it is based on the IFRS 16 lease definition before or after any voluntary use of exemptions (short-term assets, low value assets)? We suggest it should include all leases under IFRS 16 for IFRS users, regardless of whether the preparer has opted to make any voluntary use of exemptions. We shall be pleased to provide a suggested definition.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	This requirement on entity-specific disclosures can bring additional burden on companies	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	10.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is necessary to clarify further the wording "faithful representation"	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	Not mentioning any time limit for the update of the conclusions of the materiality assessment gives companies more flexibility	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	More clarity is needed to avoid contradictions between Paragraphs 34 and 35, specifically, regarding the consideration of remeddiation actions when assessing impact materiality.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In addiiton, requiring the inclusion of mtitigation and prevention actions in the materiality assessment, the process can become more rigid and complex.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The definition of stakeholders looks clearer	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The process to engage with stakeholders in the materiality assessment is more streamlined	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Including information on material risks and opportunities from business relationships beyond the scope of consolidated financial statements is an additional burden	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	38.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	Streamlined and simplified	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	46.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The possibility of using reasonable and supportable information is a positive amendment, but more clarity is needed for "undue cost or effort".	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	Streamlined to avoid unnecessary complexity	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	48.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	Streamlined to avoid unnecessary complexity	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Including disaggregation can increase the reporting burden	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is positive that the assessment of undue cost or effort depends on the company's circumstances. However, a definition of "undue cost or effort" is needed	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	Excluding joint operations helps streamline the calculation scope of environmental metrics	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	Flexibility in where to include information in the sustainability statement reduces burden	ESRS1	ESRS 1 - 9.1 Connected information	112.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The option for companies to cross-reference the financial statements when reporting on monetary amounts is positive	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	114.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The clearer wording is appreciated. However, the practical application of using materiality as a general filter (section 3.1) remains challenging, particularly in light of concerns raised by assurance specialists regarding these amendments.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	20.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Aligns with the undue cost and effort principle.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Afep	Business association (other than association of financial institution)	France			I agree	There is a typo "The undertaking shall make every dt to ensure..."	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	AR 35 should deleted. New provisions of CSRD amended will be transposed in national legislation. AR 35 is not useful and cannot require additional disclosure.	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	AR 35
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Para. 40 seems to introduce some form of unnecessary guidance rather a disclosure requirement, considering in particular indent c). It should be deleted.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	40.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The last sentence of AR 22 is confusing considering new flexibility given to preparers to determine the appropriate level of aggregation/disaggregation. "not obscuring" is a principle included in the definition of materiality. No need to repeat it here.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	The second part of para. 116 ("to support the understanding...") introduces a new requirement that is not clear (what is the level of consistency ?). This provision should be deleted.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	This provision is not clear and should be deleted. The term "connected" is not clear and what would be the consequences ? Does the undertaking have to report, for instance, on a non-signficant stake held in a company when the investment decision was not taken by the employees themselves but by an asset manager acting independently ?	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia supports this clarification.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	Nokia supports the clarification that mitigation and preventive actions taken reduce the severity/likelihood of potential negative impacts. However, the effect of ongoing mitigation and/or prevention actions, such as existing due diligence processes or procedures already in place and continuously followed, should be also considered in assessing the materiality of the impacts (i.e. the severity and likelihood is assessed on net / post-mitigation basis). The same requirements should be added to also apply in assessing risks.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	The concept of "reasonable and supportable evidence" is not clear and should be removed. The level of evidence and documents should not be defined in standards but left to the assessment of undertakings. Nokia sees that defining and requiring "reasonable and supportable evidence" in the standard, could increase the efforts and uncertainty for preparers and assurance providers when determining the sufficient level.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	This requirement is impossible to comply with for large international undertakings (impossibility to assess). It should be deleted. See comment to ESRS 1 - 51.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 24
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	In its current form, this new or amended paragraph would require significant effort and resources, if not impossible, to assess and provide evidence on variations (or lack of variations) for these factors to determine level of aggregation / disaggregation for large, global undertakings. Nokia proposes to amend the wording significantly, either by bringing back the existing requirements or completely removing this paragraph with reference to variations.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	51.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	Nokia welcomes the introduction of the relief "undue cost or effort" and focus on IFRS interoperability (ESRS 1, paragraph 60). However, it is not really clear what "undue cost or effort" means, how it should be computed and how deep in the supply chain the assessment should run. We call for the introduction of practical boundaries for this concept and how to calculate and demonstrate that required efforts and costs have been met to exercise this relief.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	60.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	This is a good clarification. However, estimates should not be required when no sufficient information is available to compute robust estimates.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	Clarity is needed on what could be considered as a boundary for data collection. Nokia calls upon EFRAG to provide a list of relevant EU legislation creating reporting boundaries (GDPR, competition law, rules over trade secrets, etc.) to improve legal certainty for Wave 1 and value chain partners. This value chain cap should be aligned and workable with level 1 changes, foreseeing necessary reliefs.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	This paragraph needs to be simplified: estimates should not be required when no sufficient information is available to compute robust estimates. The metrics related requirement / clarification also seems repetitive with the other paragraphs including information about estimates.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	67.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	The concept of "reasonable and supportable evidence / information" is not clear and should be removed. Estimates should not be required when no sufficient information is available to compute robust estimates.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	The concept of "reasonable and supportable evidence / information" is not clear and should be removed. Estimates should not be required when no sufficient information is available to compute robust estimates.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	88.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	Nokia welcomes the introduction of the relief "undue cost or effort" and focus on IFRS interoperability (ESRS 1, paragraph 60). However, it is not really clear what "undue cost or effort" means, how it should be computed and how deep in the supply chain the assessment should run. We call for the introduction of practical boundaries for this concept and how to calculate and demonstrate that required efforts and costs have been met to exercise this relief. Estimates should not be required when no sufficient information is available to compute robust estimates.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	These reliefs are important and should be extended to full reliefs (not only partial reliefs).	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	These reliefs are important and should be extended to full reliefs (not only partial reliefs).	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	YK comment applicable to all amended ESRS : the distinction between the new Application requirements (AR) and the mandatory requirements is not clear. Elmements in the AR seems to be datapoint in themselves. In addition, in the way it is presented in a table, the AR is highlighted compared to the element in body of the text	ESRS1	ESRS 1 - 1.2 Drafting conventions	15.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	YK Moreover, the fact that non mandatory presentation options are also encapsuled with mandatory requirements is misleading.	ESRS1	ESRS 1 - 1.2 Drafting conventions	15.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I agree	YK the appendix B provides a clear (altough theoretical) definition of fair representation	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	18.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	YK The definition of when information is material is very subjective and whould be amended with a more objective definition relating to the importance of associated impact (actual or potential), risk and opportunity	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	21.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	YK to avoid different interpretations and increased burden for the most strict interpretation, the paragraph should clearly state : no update is required unless there is a change in circumstances, with a revision at least every 5 year.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	Yk the paragraph seems to impose a scoring based on several parameters depending to whether to impact is actual or potential ; severity (scale, scope irremediability of impact), likelihood.. This seems opposed to the aim to simplify the DMA	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	YK the paragrph should be further explicited as regards whether engagement with stakeholders is mandatory or not (and what engagement with stkeholders means)	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	33.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	YK The paragraph explicits that the severity of impact should be evaluated considering the outcomes of mitigation and prevention measures but accounting for the remediation measures already implemented. If remediation should indeed not be accounted in the impact assessment, integrating mitigation in the assessment could be misleading For example, it could mean that for a real estate company that has energy retroffited all its buildings, energy and GHG emission is no longer an issue since the impact has been mitigated, and the company could consider the topic is no longer material. More broadly, any company could state that as long as it has a mature mitigation policy, the impact is no longer material. This seems contrary to the initial objective of sectoral comparability and transparency on the mitigation policy, action and measure.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	YK The paragraph explicits that the severity of impact should be evaluated considering the outcomes of mitigation and prevention measures but accounting for the remediation measures already implemented. If remediation should indeed not be accounted in the impact assessment, integrating mitigation in the assessment could be misleading For example, it could mean that for a real estate company that has energy retroffited all its buildings, energy and GHG emission is no longer an issue since the impact has been mitigated, and the company could consider the topic is no longer material. More broadly, any company could state that as long as it has a mature mitigation policy, the impact is no longer material. This seems contrary to the initial objective of sectoral comparability and transparency on the mitigation policy, action and measure.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I partially agree and partially disagree	Nature may be considered a silent affected stakeholder	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I partially agree and partially disagree	"the management of the undertaking shall inform the worker's representatives at the appropriate level and discuss with them the relevant innformation and the maans of obtaining and verifying sustinability informaition : the workers 'respresentatives ' opinion shall be communicated to the relevant admnistrative management of supervisory bodies" : does it correspond to a change with previous text?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	when ajusting a target after an acquisition or a cession, the text should mentions more boardly adjusting the reference base rather than the base year which may not always change in case of a acquisition of a cession. (a strict interpretation of the initial amended paragraph could result in requiring company to change their base year of their target even for the disposal of a small subisidiary, although only the base reference could have been changed.	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (b)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree Non-financial users should be limited to business partners, trade unions, social partners and NGO's representing interest common to society	ESRS1	ESRS 1 - Objective	4.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	The section on entity-specific information is not clearly delimited, only entity-specific information that is necessary for decision-making and understanding by the primary user groups, based on clear criteria for what to consider for users' decision-making and understanding (see comment to ESRS1-21), shall be included. Entity-specific disclosures should be limited to potential new sub-topics or additional disclosures on defined ESRS topics/sub-topics	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree To illustrate our comments in part 2, we suggest replacing para. 11 with the following: "While the standards will generally, provide a complete set of decision-useful information for the primary user groups, additional entity-specific information will usually only be relevant when the reporting entity needs to provide information on specific sub-topics beyond the requirements in the AR. If relevant, when developing its entity-specific disclosures, the undertaking shall consider without undue cost and effort comparability over time and with other undertakings that operate in the same sector(s)." In addition, we highlight, that it is important to delete the refence to IFRS industry-based guidance and GRI Sector Standards, as the paragraph would otherwise indirectly require compliance with those. We suggest addressing this I basis for conclusion or the NMIG instead.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree It should be added and made absolutely clear that the AR's do not add extra datapoints.	ESRS1	ESRS 1 - 1.2 Drafting conventions	15.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree It should be clarified that materiality should always be assessed in the light of being indispensable and decisions-useful for the primary users. It should be clarified that considerations on capital providers' decision-making shall focus on information essential to protect and evaluate prospects of their assets, while strategic or ethical preferences of investors in their decision-making need not be considered, e.g. an investor's zero-tolerance on certain ESG-matters. A criterion should emphasize that understanding is about getting a general impression of a subtopic and the related IRO and should be no more than what can be considered necessary by the undertaking to initiate a qualified dialogue. The level of aggregation and disaggregation shall be proportionate to the degree of severity of impacts.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree The text is an explanation of the term "general purpose" and should therefore be moved to definitions.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 3
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree The text concerning the different terms should be clearer on the fact that "material impacts", "principal impact" and "most significant impacts" are synonyms, hence the second para just creates confusion and should be deleted or rewritten. We suggest that the following part should be deleted: "…Some existing standards and frameworks also use the term 'most significant impacts' when referring to the threshold used to identify the impacts that are described in the ESRS as 'material impacts'".	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 4

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	ESRS1, paragraph 26, has the characteristics of being a guide and should therefore be moved to non-binding guidance. Using the terms "in general" and "may" underline the fact that the text is guidance. ESRS1, paragraphs 40+41, is sufficient in covering the topic.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	26.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	The AR contains two examples, which should be moved to non-binding guidance.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 6
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree It should be clarified that the results 'may' provide a critical input. 'Will' should therefore be changed to 'may'. We suggest amending the text to: (Change marked with capital letters) "If the undertaking engages with affected stakeholders as part of its due diligence process to identify, assess and address negative impacts, the results of this engagement MAY provide a critical input to its materiality assessment, without necessarily putting in place a separate engagement process for the materiality assessment…"	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We suggest amending the requirements, making it clear that the outset of the materiality assessment of actual impacts should be based on the business as established and as it is operating throughout its normal operating businesses (e.g. including environmental approvals/rights to produce, H&S measures and other procedures and controls in places). We are specifically uncertain about how to assess the severity and likelihood of potential negative impacts, especially those where mitigating actions are ongoing. It is difficult to assess and report on an impact/situation before mitigation actions are taken, when the actions are implemented, crucial for the operation and part of business as usual. Preparers would essentially have to assess a hypothetical situation. Similarly, potential impacts, risks and opportunities should be assessed taking preventive and remediating actions into consideration when such are established and the entity has the ability and intention to activate those if/when relevant (for instance an internal fire brigade or a well-established system to quickly deal with minor oil-spills). Where mitigation has successfully taken place there is no real risk and thus, nothing to report on	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	In addition to the comments provided to paragraph 34, er note that it is impossible to separate the mitigation from "maintained significant ongoing mitigation and/or prevention actions" when these are embedded in the day-to-day operation and needs to be in place for the operation to run, e.g. in the food and beverages, pharmaceutical and similar sectors	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree Guidance is needed as to what 'evidence' can encompass, i.e. on the level of certainty, when assessing severity levels and likelihoods of impacts, and the magnitude and likelihood of risks and opportunities. Also necessary to explain the reason for using different wording in ESRS 1, paragraphs 45b and 47, i.e. reasonable and supportable evidence/information.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (a)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree Guidance is needed as to what 'evidence' can encompass, i.e. on the level of certainty, when assessing severity levels and likelihoods of impacts, and the magnitude and likelihood of risks and opportunities. Also necessary to explain the reason for using different wording in ESRS 1, paragraphs 45b and 47, i.e. reasonable and supportable evidence/information.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree In our opinion the top-down and bottom-up approach should have equal footing and that the reporting entity can choose which of these between them without having do document that the result of the one not-used would not have been different from the method used as this would in reality require entities to apply both methods. Therefore, it should be added in the last sentence that ", although documentation is not required". In addition, EFRAG should add to the Basis for Conclusion that the two methods are deemed to result in the same outcome.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree AR27 should be moved to sub-chapter 6.1 as an AR to paragraph 74.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	AR 27
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree AR 28 is difficult to understand. Is it a relief option ('do not require') or a requirement to exclude ('limited to own operations') up-/downstream data from mentioned DRs?	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree Risks and opportunities in associates and joint ventures should not be automatically determined based on the supply/customer relationship but need to take into consideration the extent to which financial effects of risks and opportunities can or will be transferred to the undertaking. Goods may be traded at prices quoted in an active market, e.g. oil or crops, in which case financial effects related to IROs in the associate or joint venture will be carried by the owners in proportion to their equity share, i.e. not transferrable through a price adjustment on the goods.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	69.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree Risks and opportunities associated with leased assets should reflect the contractual terms, i.e. the extent to which financial effects can or will be transferred from the lessor (asset owner) to the lessee. The agreed lease payment may be fixed, only adjusted by inflation, or driven by market price of similar assets, which in combination with a short lease term or cancellation rights, can influence the extent to which financial effects, related to impacts from the leased asset, will be transferred to the lessee. Specifically – and as an exemption to the general requirements – it should be possible for the entities to apply the definitions in the GHG-protocol when reporting on GHG according to E1.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree ESRS1-71 should be more clearly demarcated to assets in defined benefit plans, as an undertaking has no relationship to pension assets in defined contribution plans	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree The standard should specify, that entities do not need to change the base line, i.e. the comparable numbers provided for the base year, when it in future years change the accounting policies for metrics. This might be practically impossible without applying hindsight. Applying new accounting policies prospectively should be stated. Retrospective application should be possible on a voluntary basis.	ESRS1	ESRS 1 - 6.1 Reporting period and base year	76.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree It creates confusion that paragraph 86 and AR32 are not aligned with the relief for quantifying anticipated financial effects.	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	86.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We are deeply concerned about the requirement to disclose anticipated financial effects. Such information is highly dependent on estimates and a large variety of possible developments and outcome, which cannot be reliably projected and for this reason subject to significant uncertainty. Anticipated financial effects would therefore not provide reliable insights for investors or other users, due to their potential variability. Disclosing premature information on matters that are not yet actively incorporated in the entity's financial planning may involve a measurement uncertainty and thus lead to unprecise or even unreliable information that may not only mislead stakeholders but also expose companies to reputational and legal risks associated with misinterpretation. Furthermore, the Market Abuse Regulation (MAR) would require that the issuer continuously, upon any change discloses updated information to the market, leading to excessive and disproportionate burdens. We suggest removing the requirement on anticipated financial effects and leave regulation on expected financial development of the entity to other EU regulation. If the requirement to disclose anticipated financial effects remains, then Option 2 (qualitative information) is highly recommended	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	86. (a)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree In ESRS 1, paragraph 89, it must be acknowledged that there will be cases where data will not be available. It should be clarified that 'undue cost or effort' shall not be misused to omit material information. Different views can be expected on what undue cost or effort is, why more clarity is needed to prevent misuse.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree The requirement in ESRS 1, paragraph 108b – requiring the non-material information to provide a faithful representation – should be deleted. The key element is in ESRS 1, paragraph 108a (non-obscuring) and any information will anyhow have to meet the qualitative characteristics as outlined in ESRS 1, paragraph 107.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108. (b)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree The AR has the characteristics of being a guide and should therefore be moved to non-binding guidance. Using the terms "may" underline the fact that the text is guidance.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	AR 36
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I agree	While we agree with the transitional provision whereby comparable information is not required for the first year of preparation of the sustainability statement, we suggest to add – or make it clear – that this also apply in the first year of adopting the amended ESRS standards if/where the amended standard change definitions or disclosure requirements compared to those set by the standards in Set 1.	ESRS1	ESRS 1 - 10.2 Transitional provision related to Section 7.1 Presenting comparative information	126.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Suggest switching order of paragraphs to improve readability. "Topic" is defined too early , ie before paragraph 3 which more explicitly relates to the objective of the standard. Suggest moving current paragraph 2 to after current paragraph 4.	ESRS1	ESRS 1 - Objective	2.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to asterisk note after the table in Appendix A: The note on assessment of workers in the value chain reads like AR guidance and should be included in the main body of the standard if it is intended to be binding guidance in an appendix that is otherwise non-binding.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	9.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	First of all, we welcome the permanent reference to available frameworks and/or reporting standards, such as IFRS industry-based guidance and GRI Standards. However, the drafting would be better if it referenced IFRS/SASB/GRI and relevant industry practice as non-mandatory sources of guidance to identify material information, following IFRS S1:58.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	What is meant by 'excessive number' and 'unknowns'? This is not terminology companies are used to.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	AR 2
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Paragraph text should be amended to include 'shall include/shall report/shall describe/shall explain' in addition to 'shall disclose' as all these formulas are used to introduce datapoints (or the approach used throughout the standards should be further streamlined).	ESRS1	ESRS 1 - 1.2 Drafting conventions	14.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Some existing standards' - include an example of which standards follow this approach (eg GRI).	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 4
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Amend drafting: 'Impacts are captured by the impact materiality perspective irrespective of whether or not they are also financially material'.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	25.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to Glossary: Does not reference the concept of material information.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	25.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to Glossary: There is a typo in the definition as the word 'financial' is missing from: ' … two dimensions: impact materiality and financial materiality'.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	25.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	If Appendix C is not deleted: Definition of "significant ongoing mitigation and/or prevention actions" could cause challenging discussions. In practice, in most cases would we expect any actions to be above this threshold and therefore not to be considered in the materiality assessment, if not clearly inconsequental? We believe that in some cases the treatment of the scenarios in the appendix C are inconsistent with our understanding of the ESRS 1 paragraph 34 and 35.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We recommend to clarify the principle to avoid divergence in practice so that it is clear that any policy/action implemented/taken to address the undertaking's own negative impacts should not be considered as a positive impact. In addition, we recommend guidance as to whether actions to remediate negative impacts/risks of the undertaking that are not in compliance with laws or that go beyond compliance with laws would be considered a positive impact.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	If Appendix C is not deleted: AR9 as drafted is a cross-reference to Appendix C - so it is not really an AR. It also refers to an 'overview' but Appendix C is an integral part of the standard. Better cross-referencing from the main requirements of the standard is needed.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 9
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to Appendix C if it is not deleted: On page 32, second row in the middle column 'Assess and report the potential impact before the actions and report actions'. This does not seem to be consistent with ESRS 1.35 in the case of the first and last row : 1:35 states that the effect of the actions shall be considered in the materiality assessment, if there is supportable evidence that mitigation or prevention actions taken reduce the severity and/or likelihood of potential negative impacts.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 9
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We suggest the following change in AR 10 to para. 33 (in bold): Common categories of affected stakeholders are may include: employees and/or workers' representatives (if applicable), suppliers, consumers or end-users, affected communities and persons in vulnerable situations.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Consider if this better belongs with the ESRS 2 GDR-A content as this is what the AR is referring to. Also ESRS 1 AR 13 discusses potential impacts and the disclosure of ongoing/implemented remediation actions'. It is unclear how there could be remediation actions related to an impact that has not occurred.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 13
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to Glossary: Not aligned with the revised wording of the standards - in particular 'material topic' is not used.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	38.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Update 'supportable evidence' in 45(b) to 'supportable information' to align with Section 7.3.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The phrase 'likely to result in material information for all undertakings' seems to be at odds with the overall principal of materiality of information. We think this should be deleted so that the materiality of information principle is consistently applied.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 20
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	AR24 states "Where the undertaking identifies significant differences between material impacts, risks or opportunities at group level and material impacts, risks or opportunities of one or more of its subsidiaries…' – This might imply that a materiality assessment is also required at the level of a sub – but para 53 states that the level of assessment is at group level. We are not clear how ESRS 1:53 and AR24 are meant to interact - it is not clear how 'materiality at group level' and 'material at the subsidiary level but not the group' is meant to be applied in practice, and more importantly where to draw the line. This is inconsistent with the approach in financial reporting where group materiality is assessed at group level. If this is intended as a trade-off for subsidiaries to use an exemption from reporting, it should be made clear (and presumably then should only apply to subsidiaries that otherwise would be in scope of CSRD).	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 24
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	In the case of group reporting, the reporting undertaking usually considers as part of its own operations: the assets and liabilities, income and expense of the parent undertaking and its subsidiaries, located in or outside the EU, as determined in accordance with the applicable accounting requirements." We suggest adding explanations regarding : 1) "assets and liabilities on balance sheet", for example those classified in IFRS 9 or in a similar standard might not be considered as own operations but as value chain (consistently with financial statements) 2) "income and expenses", this seems not sufficient, particularly in the service industry, to conclude if the activity is related to the own operations of a group or its value chain.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Value chain is key in the DMA process. Hence, we agree with the introduction of the definition of business relationship, but recommend the wording should be updated in the glossary as well for 'business relationship'. However, downstream value chains can be very different from one industry to another and further clarification is still needed. For example, it is unclear whether asset under management on behalf of a third party would be considered as a business relationship of the reporting entity (for example whether a the investments held by a fund are business relationships of the fund manager, which often has no shareholding interests in the fund. We also encourage EFRAG to consider the effect of the IFRS S2 revisions in respect of financed emissions currently being finalised by the ISSB The definition of business relationship is welcome, however, for some sectors such as private equity/ third-party asset management sector, It is still unclear what a business relationship is. For example whether a the investments held by a fund are business relationships of the fund manager (which often has no shareholding interests in the fund). This wording should be more aligned with definition of Business relationships in Appendix II to avoid confusion	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Considering long-term employee benefit fund, in most cases, employees own shares in the fund and there is nothing on the undertaking's balance sheet. Moreover, the undertaking does not choose the fund investments. Therefore, those assets should not be considered as business relationship of the undertaking. Regarding accounting practices, in cases when undertaking holds the fund's shares (in its balance sheet), these assets should classified as non controlled investments (IFRS 9 for example) and those assets will be considered as part of the value chain.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We disagree with the way the proposed relief has been introduced at ESRS 1:73. However if the approach is retained, we have the following comments: Relief for acquisitions and disposals 72- Clarify that there might still be remaining IRO related to a disposed entity (e.g., past pollution event with remaining risks for the entity that disposed of the subsidiary). 73 - Major acquisitions should be 'significant acquisitions' 73 - Disclosure of 'significant event' should require a brief description of the business model and key characteristics of the acquired undertaking and high-level sustainability topics related to the entity, to provide a general indication of the effects of the integration even if the DMA has not yet been performed (for example adapting existing ESRS 2:17).	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Guidance would be helpful related to: a) 'may exclude': for metrics associated with own operations, or in total (i.e. also for value chain)? b) 'may exclude ... over which it does not have operational control': If operational control exists, then the joint operation needs to be included in own operations? Is there a general requirement? c) Reference is made to E2-E4. How would joint operations be addressed in the context of S Standards?	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	This disclosure requirement should clearly be included in ESRS 2 eg ESRS 2:5	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Presumably this paragraph has been included to clarify that the reliefs are "consumed" only if there is a (legal) reporting requirement (in line with the respective EFRAG Q&A). However, the way the requirement is phrased, would suggest that transitional provisions could only be applied in mandatory reporting; i.e., undertakings that prepare 'full ESRS' reports on a voluntary basis could not make use of the transitional provisions, which might not be the intended outcome.	ESRS1	ESRS 1 - 10. Transitional provisions	121.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The paragraph erronously refers back to itself	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	124.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL on para 1 to 6 - ESRS consistently use "topic"; it seems sufficient to explain in the glossary that "topic" is also understood as factor (i.e., wording of CSRD); but that reference to a term otherwise not used does not seem to add any information in ESRS 1, par. 2 (suggestion: delete reference to "factor", but include in glossray for understanding) - could add abbreviation to "impact, risks and opportunitites"? (IRO) (par. 3)	ESRS1	ESRS 1 - Objective	1.
Excels	DRSC	(National) standard setter	Germany			I disagree	- the purpose of par 4 is to lay out who the users of general purpose sustainability statements are. The last sentence in par 4(b) does not add to this objective, but explains (insufficiently) "proxies for affected stakeholders". Par 4 is about the users, not the (affected) stakeholders. Also the term "affected stakeholders" is (more appropriately) explained in the Glossary. Therefore, this reference to (some of the) proxies of affected stakeholders should be deleted here.	ESRS1	ESRS 1 - Objective	4.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL - suggestion to align wording from (sometimes used) "topical standards" to generally using "topical ESRS" (e.g. par 7 vs. par 9)	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	7.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Note: DRSC agrees with and supports the concept of "entity-specific disclosure requirment" (see consideration to embedd in other principles of ESRS sustainability reporting, i.e. fair presentation). par 10 could be streamlined as basically first sentence and last sentence both - with different intentions - address the aspect of "topics which are not covered by an ESRS requirement"	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	10.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL - par 8 and par 11 are contradictory: par 11 refers to "IRO management (i.e. policies and actions)" whereas par 8 states " (i) ... IRO management, as well as (ii) policies, actions, targets ..." - the latter (par 8) implies that there is a difference between IRO management on the one side and "policies and actions" on the other side, when in fact "IRO management" is (i.e.) policies and actions. So the wording should be adjusted consistently to depict understanding currently laid out in AR 1 for para 11	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	AR 1
Excels	DRSC	(National) standard setter	Germany			I disagree	- overall: AR 2 seems to provide room for further streamlining as it does not seem to add relevant information for preparing the sustainability statements in accordance with ESRS; AR 2 seems to rather refer to qualitative charcterstics in general which apply to all information in ESRS (not just entity-specific metrics) - a specific AR is not needed for that (e.g. (b)) - in addition: (a) refers to "performance metrics" when AR 2 addresses "metrics" in general (suggestion: delete reference to "performance metrics" and include reference to "metrics" only)	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	AR 2
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	suggestion to include in (a) "as identified through impact materiality assessment" (to align with (b) which refers to "as identified through financial materiality assessment" - or delete that reference in (b) as well)	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	12. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	par 15 includes explanation regarding the term "shall consider" (which is included in AR). DRSC considers this term still too vague as to sufficiently clarify what preparers are asked to do; therefore DRSC has a preference for deletion of this term	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I agree	The DRSC has been in support of including a specific reference to the fair presentation principle early on.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	DRSC	(National) standard setter	Germany			I disagree	Nevertheless, DRSC believes that there are adjustments necessary to the current amendment to the ESRS with regard to fair presentation. Please see our cover letter on the exposure draft for revised ESRS.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG The DRSC supports the added emphasis on the "Materiality of information" filter and agrees that this will be very helpful in effectively supporting the focus on material information in the sustainability statements; nevertheless the DRSC does not agree with the current understanding /wording of the "Materiality of information" in par 21. In the view of the DRSC the concept of the "materiality of information" is clearly and sufficiently described in par 21(a) if this were to include all users. In the view of the DRSC the reporting should have the objective of decision usefulness only; which is a well established concept to address the needs of users and which should - of course - be enhanced to include all users of general purpose sustainability statements (not just users that are interested in the financial impact perspective); The currently used concept of information that is "necessary for users... to understand" the IROs is too vague and does not fulfill the objective of the "materiality of information" concept (which is to provide an additional explicit filter for materiality). [continues in box below]	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	21.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG [continued from box above] Instead it can lead to an expansion of the information that has to be considered material and therefore has to be provided (in order to address various possibly "necessary" information needs); this will extend information towards a "compliance exercise" even more due to the wide scope of any kind of information that any user might find necessary, The DRSC sees the risk of undertakings needing to prove that information is not "necessary for ... understanding" (when exactly is an information "necessary"?) Therefore, the DRSC objects to par 21 (b) and instead suggests to expand the concept of decision usefulness (in (a)) to all users or define the objective for users under (b) identical to (a) (i.e. decision usefulnes), (b) in its current form is seen as loophole to have to include all sorts of (non material) information and should therefore be deleted. Also: see comment on par 37, second sentence - this is a duplication of par 21(a). It is important that this sentence is deleted in par 37 as it could otherwise seem to be referencing to financial materiality.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	21.
Excels	DRSC	(National) standard setter	Germany			I agree	agree with reference to "groups of users" for understanding of general purpose	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	AR 3
Excels	DRSC	(National) standard setter	Germany			I disagree	DRSC does not consider reference to a selected terminology of another standard (here: "most significant impacts") helpful. This coudl raise the question if ESRS should address other terminology. Also, it would make an amendment neceessary in case of changes to other existing standards and frameworks.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	AR 4
Excels	DRSC	(National) standard setter	Germany			I agree	The DRSC agrees with and supports the clarifications regarding interaction between topics to be reported and material IRO. It has asked for such clarifications as the former level at which undertakings seemed to be required to report posed burden and challenges to preparers and other stakeholders. The connection to the level of information either on topic or IRO level depending on what provides most releant information seems to provide an appropriate anchor for the sustainability reporting. The DRSC further supports including the explicit reference to the information "reflecting their nature or the way they are managed" as this is seen as an explicit reference to the management approach.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL "par 10 of this standard" - is there a reference needed to ESRS 2?	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	23.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Note to EFRAG: DRSC agrees that it is important to clarify - throughout the ESRS - that RO can have different origins / other origins than just impacts. While this is addressed here in par. 26 it needs to be clear throughout ESRS. (see par. 40)	ESRS1	ESRS 1 - 3.3 Double materiality assessment	26.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL It is important to add that par 27 does not include a final list, but examples for internal and external sources. Wording should be amended by "such as" or "The following are usual examples of internal and external sources...". Otherwise, par 27 could imply that all these sources have to always be included independed of the specific circumstances of an undertaking. It could also be considered if the wording should be "internal or external sources"	ESRS1	ESRS 1 - 3.3 Double materiality assessment	27.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	REF FLAG [Refers to para 34 et seq] Most importantly, DRSC is very much in favour of the amended ESRS addressing the topic of "gross vs. net" as undertakings have had difficulties understanding the concept of ESRS in this regard. The DRSC also welcomes EFRAG's further efforts on this topic, especially the field tests that are currently conducted. In it's current version, however, ESRS 1 does still not sufficiently clarifiy the expected outcome of the consideration of "gross vs. net" for the undertakings. For example, with regard to potential negative impacts (par. 35) it could be read as either a "net approach" (first sentence) or a "gross approach" (second sentence). ESRS 1 needs to clearly define the underlying concept. This concept needs also to be consistenly applicable throughout the ESRS standards (e.g. what would be the approach to disclosure on anticipated financial effects). [continues in box below]	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG [Refers to para 34 et seq] [continued from box above] But also, there is no consistency between ESRS 1.34-35 and the examples in Appendix C. For example, for potential negative impacts, why would Appendix C need to differentiate between reporting period and future reporting periods. If there are no changes in the underlying assumptions then it should be expected that potential negative impacts are assessed and reported consistenly (as they are always the same potential negative impacts). Overall, Appendix C is not considered helpful in clarifying the principles in par 34 and 35, as many of the DRSC's constituents confirm. While some find examples generally helpful, the DRSC proposes to delete Appendix C to reduce the inconsistencies which decrease the understanding of the general, underlying principles in ESRS 1. Otherwise, the link between DR (par 34 et seq) and the Appendix needs to be clarified and free of inconsistencies.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG [Refers to para 34 et seq] Additionally, the current wording in ESRS 1 is not yet clear enough. The current wording may therefore lead to significant documentation burden and interpretive uncertainty and discussions between individual undertakings and their auditors. Par 34 refers to actual impacts being evaluated after mitigation / prevention measures - however, this wording seems superfluous and obvious, as otherwise it would not be "actual" impacts. Furthermore, in par. 35 the wording is still not very clear as to how to interpret "significant ongoing mitigation action" and this wording would very likely result in different interpretations. In this context it would be helpful to clarify that impacts which are addressed by a policy (establishing structures to exclude this impact for their business model) are not considered to be reportable due to "signficiant ongoing mitigation". This would result in unnesseary complexity and documentation burden.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	DRSC	(National) standard setter	Germany			I disagree	„Where the impact is deemed material based on this assessment, the undertaking shall disclose the remediation actions undertaken and their expected outcomes." This new wording indicates a disclosure requirement on the level of each material impact which would lead to a significant increase in the reporting obligations. Deletion or re-phrasing of the sentence should be considered to ensure that the general section on the methodology of the IRO assessment does not directly contain datapoints for disclosure.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Clarification needed. The described gross approach could lead to the assumption that (ongoing/existing) mitigation measures e.g. established safety management systems which are taken in the reporting year (and recurring in every reporting year) to minimize negative impacts are not to be considered as mitigation measures (as they were "taken.. during the reporting year"). This would lead to an increase of reported severe risks without an actual increase of risks and would thus lead to a false interpretation by main users of the report. It would be more appropriate to refer to actions that have been "initiated" during the reporting period (this would, however, not exclude annual measures, e.g. annual compliance or security training, annual / recurring safety measures)	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	DRSC	(National) standard setter	Germany			I disagree	While the DRSC generally supports helpful examples, the AR should be - just like the DR - kept as straightforward and concise as possible; excluding unnecessary requirements. AR 6 however includes examples that seem to reiterate the concept rather than adding new aspects to connectivity. Since examples do not seem to add to ESRS DR laid out in the ESRS they could be part of the NMIG, but do not need to be part of the ESRS. Otherwise, there is a risk of raising further questions instead of providing clarifications.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 6
Excels	DRSC	(National) standard setter	Germany			I disagree	ESRS 1, AR 11 for para 33, last sentence seems to establish a requirement regarding the communication of workers' representatives' opinions - this is indeed (as a requirement directed at the management) part of the CSRD (see recital (52) as well as Art. 19a, 5. / Art. 29a, 6) - however: this is not a disclosure / reporting requirement for the undertaking and should therefore not be an explicit part of ESRS. It also seems to dictate behaviour rather than prescribe a disclosure requirement.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Para 37, 2nd sentence: This is a duplication of the sentence in par 21(a). It is important that this sentence is deleted here in par 37 as it could otherwise seem to be referencing to financial materiality (because in the current wording of par 21(a) it refers to users of financial reports only).	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	37.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	Note to EFRAG: DRSC agrees that it is important to clarify - throughout the ESRS - that RO can have different origins / other origins than just impacts. While this is addressed here in par. 26 it needs to be clear throughout ESRS.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	40.
Excels	DRSC	(National) standard setter	Germany			I disagree	AR 14 refers to "resources not recognised in the financial statements" ("shall consider its dependencies ... either in terms of CF or in terms of resources not recognised in financial statements") - in current ESRS the current AR 13/14 refer to "changes in capital not recognised in f/s"... In the view of the DRSC it is too difficult to define and determine such resources. Generally the intention seems to be to address future cash flows. The DRSC consideres the reference to CF as sufficient and suggests to delete the reference to "resources not recognised".	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 14
Excels	DRSC	(National) standard setter	Germany			I agree	agree to stronger reference to internal management approach.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 16

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I agree	[refers to para 45 et seq] general agreement to the clarification of the concept of focusing the DMA; avoiding an unnecessary level of detail and easing the use of (non-primary) information / "undue cost or effort" as a relief to gathering information	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (a)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL "use of reasonable and supportabe evidence to estimate the levels of severity and likelihodd of impacts and the likelihood and magnitude of financial effects of RO" -the wording could be (mis)understood to require "evidence" for every specific scoring of the DMA. So far it is not required (and not audited) to provide evidence for every scoring. Furthermore, undertakings do not necessarily have a connection of one specific "evidence" to one specific "IRO".	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	DRSC	(National) standard setter	Germany			I agree	agree to top-down approach to DMA	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	48.
Excels	DRSC	(National) standard setter	Germany			I agree	agree with practical considerations for DMA (i.e., not every time horizon separately, not every characteristic of severity to be assessed separately)	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	DRSC	(National) standard setter	Germany			I agree	qualitative analysis is sufficient for DMA	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Para 49 and 50 do not seem very concise yet and do not seem to fit to the heading of ch. 3.6. The heading suggests that the para will address how information that will have to be reported is to be determined. However, par 49 merely states that the undertaking needs to provide information acc. to ESRS 2 and entity specific information. par 50 adds that (various) topical information is neeeded. The actual information on how to determine the information is provided in the earlier chapter on the DMA. Could be clarified what these paras are meant to add to the ESRS here. From the current wording it seems that they do not add new aspects.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	49.
Excels	DRSC	(National) standard setter	Germany			I disagree	The information of this AR is that the DRs in ESRS 2 (incl. GDR-P, GDR-A, GDR-M and GDR-T) are all fundamental in nature and therefore likely to result in material information for all undertakings. This does not add any new information regarding ESRS 2 (as ESRS 2, especially GDR should be expected to be constructed as to contain fundamental requirements). Unless, there is another meaning intended (i.e., all these information WILL always be material for all undertakings, which would have to be clearly stated in the DRs). However, ESRS 2 is also subject to materiality assessment. Therefore, this AR should be deleted.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 20
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL par 51 references - among others - to "location" and "site", both are added but were not supposed to change the current concept which included both (according to log of amendments); however, the explanation (see log of amendments) refers to "key sites" --> which wording was intended? currently, the last sentence in par 51 refers to the materiality assessment, but "key sites" would be more specific	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL, par 51 in connection with AR 23 for par 51 par 51 lists "locations, water basin, site, asset... " as though they are all different aspects to consider; in AR 23 the term "by location" is specfified as "by location - such as by site, water basin or local ecosystem", as though if you differentiate by location, it can be one of the following - if that is the understanding it seems not necessary to include "location" in the list in par 51.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	DRSC	(National) standard setter	Germany			I disagree	the level of disaggregation for the disclosures (e.g. water basin, site) is too granular. In addition, unclear what is meant by the example "landscape" in this context. Furthermore, this granular approach does not fit with the approach to integrate financial and sustainability reporting as financial reporting does not address this granular level.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	DRSC	(National) standard setter	Germany			I disagree	reporting on site-level / by location is too granular. It addition, AR 23 is unclear as to what undertakings have to disclose (shall consider) and it is expected that AR 23 could introduce a requirement as IROs typically are "highly dependent on local context". It is important that undertakings will always consider the materiality at group level; the materiality is not assessed at such a granular level.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 23
Excels	DRSC	(National) standard setter	Germany			I disagree	AR 24 could be read as suggesting that undertakings disclose a "proof of non-materiality at subsidiay level". This would lead to a significant increase in reporting burden. Reporting undertakings do not necessarily know for which subsidiaries the IROs are not material (the result that an IRO is material at the group level is sufficient for the undertaking to report on it - undertaking would usually not analyse for which subsidiaries the IROs is not material. The general understanding should be that differences across the undertaking which the undertaking detects during the DMA should be reported on. However, undertakings are not required to assess at the level of subsidiaries etc. and will always have the group materiality as the relevant benchmark.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 24

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I agree	[Refers to para 54 et seq] Note: basically unchanged from DA; "mapping" / "description" is moved to NMIG (and - as before - part of ESRS 2, GOV-3, para 13)	ESRS1	ESRS 1 - 4. Due diligence	54.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL The DRSC considers it important to state that own operations "usually" include the assets and liabilities, income and expense of the parent undertaking and its subsidiaries. However, the structure and wording of ESRS 1 ch. 5.1. in connection with ch. 5.3 could imply that the exceptions listed in ch. 5.3 are the only exceptions to "own operations". For the DRSC it is important to clarify that "usually" (in par 59) can refer to other circumstances beyond those addressed in ch. 5.3 (par. 70 and 71).	ESRS1	ESRS 1 - 5. Reporting undertaking and value chain	59.
Excels	DRSC	(National) standard setter	Germany			I disagree	DRSC would like to flag especially par. 59 last sentence which states: "The undertaking may exclude from the sustainability reporting boundary a subsidiary that has been excluded from the scope of the consolidated financial statements due to its non-materiality from a financial perspective, unless there are specific facts and circumstances that expose the group to material impacts, risks and opportunities arising from such subsidiary." The DRSC supports the intention of this par. which is a stronger alignment between financial and sustainability consolidation scope for the identification of the IRO. [continues in box below]	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	DRSC	(National) standard setter	Germany			I disagree	[continued from box above] However, the DRSC believes that there is further clarification needed that the intention of ESRS 1.59 last sentence is that the undertaking needs to consider for inclusion in the sustainability reporting boundary only those non-material subsidiaries for which there is a specific reason to reconsider their materiality assessement for purposes of the sustainability reporting. E.g. there are obvious circumstances such as the number of employees which result in a different materiality assessment. However, the undertaking would not be expected to reassess every non-consolidated subsidiary regarding their (non-)materiality for sustainability. The current wording could suggest that this would be necessary, however, this would not result in a burden reduction. As the current wording can be misunderstood as having to re-assess every non-material subsidiary (in order to come to the conclusion whether there are / are not specific facts and circumstances re/ IROs) a clarification is needed.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL "may" include reads as if this is optional; however, only the relief is optional; wording could be something like: "When consolidating subsidiaries with different reporting periods the undertaking may..." (to clarify need to consolidate)	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	AR 27
Excels	DRSC	(National) standard setter	Germany			I agree	Par 62 lays out that undertakings, "when reporting on metrics that comprise of upstream and downstream value chain information, may use information collected directly from counterparties in the upstream and downstream value chain, or estimates, depending on practicability and reliability considerations related to the necessary input." During the discussion for the revision of the ESRS the DRSC had explicitly asked that ESRS would expand the use of non-primary data, estimates, and other measurment techniques. With this proposal the undertakings can choose to either use direct information or estimates, there is no longer a hierarchy for determining the metrics in the VC. The DRSC believes that this will effectively reduce the reporting burden due to the existing limits of data availability and data quality. In addition, not only will the reporting undertakings benefit from this burden reduction, but also the numerous undertakings (incl.) SMEs along the VC which will often not be subject to the ESRS reporting requirements. This is therefore a very effective measure to reduce a possible trickle-down-effect. Therefore, the DRSC welcomes this amendment.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL "as informed by any DD process in place"; wording difficult (understandable that it is worded this way as to not imply requirement re/ DD), but not necessary; just refer to the paragraphs on the materiality assessment	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	61.
Excels	DRSC	(National) standard setter	Germany			I disagree	Generally support that estimates are permitted, but this paragraph 62 contradicts ESRS 1 par. 122 (transitional provision related to Chapter 5 Value chain) which limits the relief to the first 3 years. Clarify that the general provision in par 62 applies.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	DRSC	(National) standard setter	Germany			I disagree	Par 63 seems to be a requirement to the ESRS standardsetting itself ("information required by ESRS ... shall not exceed"... there is nothing the undertaking can do / has to do about it - it is not a disclosure requirement). Clarification of the intention of par 63 needed.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	DRSC	(National) standard setter	Germany			I agree	this new para better reflects current practice	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	65.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL duplication to par 61--66 before in regard to "not having to collect data from actors in VC, especially SMEs" etc. This could probably be streamlined with other para.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	67.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL "Business relationship" seems like a definition at this point; but this wording is not included in the glossary. Should be included in the glossary and also should be embedded more in the context fo this ch. 5.2 - which specific disclosure requirements does par. 68 refer to? E.g. how is this relevant for par. 62. In short: par. 68 seems a bit random in the middle of ch. 5.2.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	68.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL clarify wording to say that these might be material for some entities, depending on DMA and result for entity-specific topics	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIA Also see remarks above re/ par. 59. DRSC generally agrees to the explanation for these exceptions to determine "own operations" (leasing, longterm employee benefit); however: (1) see connection to par. 59 regarding the broader understanding of own operation "usually" including... (e.g. par 70 not being the only exceptions). Furthermore, consider connection to ESRS E1: While leasing is sufficiently addressed here in par. 70 the DR in ESRS E1 does not include the reference to this exception (but only the reference to financial control concept in GHG) and thereby does not (yet) include this exception in the concept. As a result the current issues for some leasing (e.g. lessor, local GAAP) remain.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	DRSC	(National) standard setter	Germany			I agree	Supporting the relief provision for disposals as it provides more relevant information to the users in relation to the remaining company and its further development.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Throughout ch. 5 the term "reporting boundary" is used several times. However, it is not yet included in the Glossary. Furthermore, there is a need to very clearly state that "reporting boundary" includes own operations and the VC. At some times the wording could imply that the reporting boundary is limited to own operations. Note: Annex II Glossary includes a reference to reporting boundaries only in reference to the GHG emissions; it should generally be defined.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	DRSC	(National) standard setter	Germany			I agree	alignment to IFRS SDS by incorporating a reference to "judgements and uncertainties" (in addtion to ESRS with "estimates and uncertainties"), but only in part (e.g. par 85(b) rightly refers to estimates)	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	85.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL second part of that para needs to be flagged as an example? (i.e. example re/ upstram value (supply) chain)	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	AR 32
Excels	DRSC	(National) standard setter	Germany			I agree	Agree in general to the reliefs for metrics laid out in ch. 7.4.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	DRSC	(National) standard setter	Germany			I disagree	The exception for GHG emissions (ESRS E1-6) from the relief provided for metrics has been highly debated by German constituents as this metric is one (of the few) metrics for which the relief would actually be helpful.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	DRSC	(National) standard setter	Germany			I disagree	One of the concepts of the ESRS-simplification is to clarify that ESRS use the organisational boundaries as defined in ESRS 1 par. 58 and 59 (i.e. the equivalent to the financial control boundary), in particular for ESRS E1. See BfC, par 145 (Note: the reference in par. 145 needs to be corrected to ESRS 1.58, instead of par 60). Par. 92 states that "The undertaking may exclude joint operations over which it does not have operational control from the calculation scope of environmental metrics...". This can be read as the undertaking being allowed to ONLY exclude joint operations over which it has no operational control for the metrics in E2, E3, E4 and E5, BUT (conversely) to have to include all other entities (i.e. joint operations, but also non-consolidated subsidiaries) over which it has operational control. [continues in box below]	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	DRSC	(National) standard setter	Germany			I disagree	[continued from box above] This is clearly not the intention as the fallback concept is the financial control boundary. Therefore, this relief for metrics should clarify that this is an additional "relief for metrics" for this particular scenario for joint operations. In addition, it is questionable, if this underlying concept (financial control = mandatory; operational control = optional) should not be explained as a general concept, rather than having this relief here.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	Agree with content, but wording is somewhat off - does not read well (word missing before (a)?)	ESRS1	ESRS 1 - 7.5. Updating disclosures about events after the end of the reporting period	93.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	Which "that period" is meant here? Reporting period or preceding period?	ESRS1	ESRS 1 - 7.6 Changes in the preparation or presentation of sustainability information	94.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	It seems that the second sentence is not needed. There is typically no comparative amount provided for "periods before the first year of ESRS application" - therefore the relief from error correction for those periods does not seem necessary and rather confusing	ESRS1	ESRS 1 - 7.7 Reporting errors in prior periods	95.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	Why does par 96 refer to "potential errors" are corrected... they can only be corrected if they are "errors" (otherwise it would imply that "potential errors" were corrected - is this the intention?).	ESRS1	ESRS 1 - 7.7 Reporting errors in prior periods	96.
Excels	DRSC	(National) standard setter	Germany			I disagree	Additional para is needed: Section 7 or 8 should include in section on allowing the undertaking to choose the unit (separately for each metric) which the undertaking believes to be most appropriate.	ESRS1	ESRS 1 - 7.7 Reporting errors in prior periods	96.
Excels	DRSC	(National) standard setter	Germany			I disagree	Generally, par 105 is not changed in the amended ESRS. However, the intention of this par. is still questionable. Especially with the current discussion of a more prominent inclusion of the management's view, the business model and the sustainbility statement being more focused on the material information there does not seem to be room left for par 105. There is no need to provide a specific order for the information in the sust statement. The general requirement to include all parts is needed, but the order of (especially) E / S / G does not have to be prescribed by ESRS. CSRD does not provide a specific order requirement for the presentation of ESG.	ESRS1	ESRS 1 - 8. Presentation requirements and structure of the sustainability statement	105.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	[relates to 107 and 108] It should be clarified in the heading and the paragraphs that this is "non-material" information (i.e. has not been identified as material in the undertaking's DMA)	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	107.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL [relates to 107 and 108] Both, additional information according to par 107 (other legislation / other frameworks etc.) and information according to par 108 (needed by a specific user) should be provided under the general concepts of the ESRS (e.g. faithful representation; qualitative characterstics) - why is there a difference between 107 (b) and 108 (b)?	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	107.
Excels	DRSC	(National) standard setter	Germany			I agree	German constituents have advocated for possibility to provide executive summary as it allows an easier access to the information provided.	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	109.
Excels	DRSC	(National) standard setter	Germany			I agree	Agree with differentiation between internal references (within Sustainability Statement) and incorporation by reference (to outside information)	ESRS1	ESRS 1 - 8.3 Options in presenting information across parts of the sustainability statement	AR 37
Excels	DRSC	(National) standard setter	Germany			I agree	[relates to chapter 9.1] agree to presentation of connected information	ESRS1	ESRS 1 - 9. Connected information and linkages with other parts of corporate reporting	111.
Excels	DRSC	(National) standard setter	Germany			I disagree	DRSC believes that the consistency between financial and sustainability statements data and assumptions should be the rule. Therefore, there is no need to "explain level of consistency" with data / assumptions (this term is also not clear / not used; therefore, would also be difficult to define - differences among the understanding of this term are not unlikely). Therefore, par 116 should instead ask for any explanations of any (remaining) differences in the data and assumptions.	ESRS1	ESRS 1 - 9. Connected information and linkages with other parts of corporate reporting	116.
Excels	DRSC	(National) standard setter	Germany			I agree	["agree" related to chapter 9.3] no comment	ESRS1	ESRS 1 - 9. Connected information and linkages with other parts of corporate reporting	117.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL see par. 62: contradicts the relief for data from counterparties (estimates only) in par. 62	ESRS1	ESRS 1 - 10. Transitional provisions	122.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL should read "para 122 and 123" (not "123 and 124");	ESRS1	ESRS 1 - 10. Transitional provisions	124.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL The current wording could be mis-interpreted in a way that the protection of SMEs applies only for the first three years	ESRS1	ESRS 1 - 10. Transitional provisions	124.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The section on entity-specific information is not clearly delimited, only entity-specific information that is necessary for decision-making by the primary users shall be included. If this is not clearly stated, we fear that it could result in information overload and an unnecessarily large burden for companies. To limit entity-specific information better, we suggest adding: "If the undertaking concludes that a topic related with one or more material impacts, risks or opportunities is not covered, or not covered with sufficient granularity by an ESRS and the entity-specific information is necessary for decision-making by the primary users, it shall provide additional entity-specific disclosures on that topic…" In para 11 it should be added that the consideration of comparability should be done without undue cost and effort.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The section on entity-specific information is not clearly delimited, only entity-specific information that is necessary for decision-making by the primary users shall be included. If this is not clearly stated, we fear that it could result in information overload and an unnecessarily large burden for companies. To limit entity-specific information better, we suggest adding: "If the undertaking concludes that a topic related with one or more material impacts, risks or opportunities is not covered, or not covered with sufficient granularity by an ESRS and the entity-specific information is necessary for decision-making by the primary users, it shall provide additional entity-specific disclosures on that topic…" In para 11 it should be added that the consideration of comparability should be done without undue cost and effort.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The chapter conflates 'topics' with 'IROs'. A reporting undertaking may have a single IRO in a broader topical area without the whole topic being material for that undertaking. Conflating both terms can increase reporting effort through additional auditor scrutiny. Therefore, more consistent and clearer segregation between 'topics' and 'IROs' is necessary.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	1.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The text concerning the different terms "material impacts", "principal impact" and "most significant impacts" should be clearer on the fact that are synonyms, hence the second para just creates confusion and should be deleted or rewritten.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 4
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Clarification is necessary that financial materiality arises only from risks and opportunities, not from impact.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	25.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	It should be clarified that undertakings may start their materiality assessment from either impact or financial perspective, depending on existing processes. Using the terms "in general" and "may" underline the fact that the text is guidance and should therefore be moved to non-binding guidance. Para 40 and 41 is sufficient in covering the topic.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	26.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Proposed amendment: ""The undertaking shall update the conclusions of the materiality assessments conducted in the previous reporting periods to take into account any material changes in the undertaking's organisational or operational structure, or material changes in external factors that could generate new or modify existing IRO have occurred. Because of changes in its individual circumstances or in the external environment, some types of information included in its ESRS sustainability statement for prior periods might no longer be material; conversely, some types of information not previously disclosed might become material."	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We suggest that the criteria of scale, scope and irremediability serve as optional tools to assist in identifying material matters. These criteria should not be mandatory, and the use of "may" rather than "shall" would preserve flexibility for undertakings.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We suggest that the criteria of scale, scope and irremediability serve as optional tools to assist in identifying material matters. These criteria should not be mandatory, and the use of "may" rather than "shall" would preserve flexibility for undertakings.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	32.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We recommend revising §34 to better reflect the practical challenges associated with separating the assessment of actual negative impacts before and after mitigation or remediation measures. In practice, this distinction is highly complex and often difficult to operationalize, particularly when impacts evolve over time or when mitigation is embedded in ongoing processes. The current wording may lead to significant documentation burden and interpretive uncertainty, especially in audit contexts.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We welcome the proposed reliefs regarding the double materiality assessment. However, the requirement to report potential impacts subject to "significant ongoing mitigation or prevention efforts" in its current form leaves interpretive uncertainty that may lead to disproportionate complexity in application as well as difficulties in audit contexts. Given that alignment with auditors on materiality assessments has been a key implementation challenge, the ESRS simplifications should explicitly address this issue to achieve meaningful burden reduction.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	EFRAG indicates in the log of amendments for this paragraph that it was intended here to (a.o) define positive impacts: "Reference to "philanthropy" was considered but discarded. Only impacts that derive from business activities, products and services qualify as positive impacts to be reported." However, as this definition has not been included in §36, discussions are expected when reporting positive impacts (should or should we not use the definition contained in the log of amendments?). Furthermore, this definition is not clear: would (voluntary) work for the society organised by the company or societal sponsorship by the company be considered part of business activities or services?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	36.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	It should be clarified if it is sufficient to reference the risk and opportunity report to meet the requirement of addressing materiality beyond consolidation scope, as this report typically also covers business relationships.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	38.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Proposed amendment: "Material risks and opportunities derive, e.g., from the undertaking's: (a) material impacts, as identified through the impact materiality assessment; (b) dependencies on natural, human and social resources; and (c) other factors, such as exposure to climate hazards or changes in regulation that address systemic risks. Entities subject to prudential supervisory regulation can rely on the existing methodologies to assess financial materiality." Additionally, risks management frameworks are already prescribed for insurers by prudential regulation (from EIOPA), that can be used for DMA. Therefore, we propose to add: "Entities subject to prudential supervisory regulation can rely on the existing methodologies to assess financial materiality".	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	40.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The AR should also include opportunities.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	16.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The choice between a top-down and bottom-up approach to MA should not be subject to additional burden such as the requirement that "is expected to lead to the same outcome as the bottom-up approach". This requirement may prompt auditors to request validation of this assumption, potentially undermining the intended simplification and therefore it should be deleted	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	AR 17
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	It should be clarified that specifications described under 3.3.1 are to be read in conjunction with 3.5 to make clear that e.g. paragraph 31 only ap-plies for impacts that the undertaking did not identify as material in the first step.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	1.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Internal expert judgment should be recognized as a valid source of "reasonable and supportable information".	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The wording in AR19 is ambiguous regarding necessary or expected usage of quantitative information or scoring. To ensure clarity and consistent application, we recommend revising the text as follows: "The use of quantitative information or quantitative scoring is not a prerequisite. A qualitative analysis may be sufficient for the undertaking to reasonably conclude that the impacts, risks and opportunities related to a given topic are material or not material."	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Proposed amendment: "Where the undertaking identifies significant differences between material impacts, risks or opportunities at group level and material impacts, risks or opportunities of one or more of its subsidiaries, the undertaking shall provide an adequate description of the impacts, risks and opportunities, as appropriate, of the subsidiary or subsidiaries concerned. Conversely, if a material impact, risk or opportunity determined at group level is not relevant for all subsidiaries or activities in a group, the information can be provided at a disaggregated level reflecting only the activities for which the impact, risk or opportunity is relevant"	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 24
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	We suggest deleting this datapoint to reduce complexity and unnecessary reporting burden.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	53.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Paragraph 58 still directly links due diligence processes to the identification of negative material impacts. This formulation risks suggesting that the existence of due diligence automatically results in material disclosures. We recommend clarifying that due diligence processes inform the assessment of material impacts but do not predetermine materiality outcomes. In addition, although this paragraph has been amended, it still does not clarify the treatment of leased assets. We recommend aligning it with paragraph 70 of ESRS 1 to ensure consistency and prevent over-interpretation in reporting practices.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	58.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We suggest the following rewording: In the case of group reporting, the reporting undertaking usually, as defined by its business model, considers as part of its own operations: the assets and liabilities, income and expense of the parent undertaking and its subsidiaries, located in or outside the EU, as determined in accordance with the applicable accounting requirement. Paragraphs 60 to 73 provide further provisions and exceptions for determining the reporting boundaries of own operations and upstream and downstream value chain. The undertaking may exclude from the sustainability reporting boundary a subsidiary that has been excluded from the scope of the consolidated financial statements due to its non-materiality from a financial perspective, unless there are specific facts and circumstances that expose the group to material impacts, risks and opportunities arising from such subsidiary. The undertaking is not expected to reassess every non-consolidated subsidiary for sustainability purposes but should consider only those cases where there are indications that the group may be exposed to material impacts, risks, or opportunities arising from such subsidiaries.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	This paragraph has been amended but do still not clarify the appropriate treatment of leased assets. We recommend amending it accordingly by referring to paragraph 70 of ESRS 1, to ensure consistency and avoid over-interpretation in reporting practices. Clarifications also need to be aligned with the E1-8 requirements.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	60.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Paragraph 79 permits alternative definitions for medium- and long-term horizons in certain cases. These cases are equally relevant to short-term horizons. We therefore propose extending paragraph 79 to allow different definitions for the short term as well.	ESRS1	ESRS 1 - 6.2 Time horizon: definition of short-, medium- and long-term for reporting purposes	79.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In para 89 it must be acknowledged that there will be cases where data will not be available.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Section 7.4 should be moved to 3.7 and clearly set out aggregation and disaggregation criteria for PATs, including metric reliefs, clarifying that a policy covering only the affected subsidiary is sufficient	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	1.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In order to align the wording with the CSRD requirement, we strongly recommend replacing "sustainability statement" with "sustainability report".	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	103.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Table of Content: Appendix C should be before Appendix B since "assessing impacts" are part of DMA and thus more related to App. A.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	7.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Why linkage to ESRS 1.21 instead of including the definition of materiality of information as core element of a faithful presentation under ESRS 1.19?	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	19.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Option for reporting on IRO level or topical level. However, ESRS 1.AR17 states out that the reporting should be done on a topic level while ESRS 1.AR21 permits to report a material IRO on a sub-topic level. Given the general permission and flexibility of a bottom-up approach on IRO Level, the mapping between IROs, topics and disclosure requirements should be flexible in the same way. So far no further guidance is integrated for mapping IROs/sub-topics to DRs (only in the NON-MANDATORY implementation guidance). Thus, complexity for implementation is not decreasing and dependent on companies' auditor alignment the results of DMA will probably be not comparable between companies.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	22.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Engagement process with affected stakeholders are essential. However, users of sustainability information are missing. This group represents the same relevance for a company than affected stakeholders.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	33.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Why should mitigation measures not be accounted for in the assessment of actual negative impacts that have been occured in previous periods? Some companies have might set up lots of efforts and mitigation measure to reduce impacts in the past resulting in no material impacts for the company in the current period. Why should a company report on an impact that it manages well on a company level, maybe since several years? This would not represent a material information anymore for their stakeholders. Example: water pollution on the own activity level. A company have faced water pollution some decades ago, however due to successful mitigation measures in the past, this impact does not exist anymore in its own operations level since decades.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	A common framework/benchmark for "significant" actions is missing and very specific for each company and sector. We do not want EFRAG or other reporting bodies to define "significant". This should remain as a term that the company can identify based on their experience and business. The way of operationalization is unclear. e.g. a mitigation measure that equals to current legal requirements would lead to an on-going reporting about this specific impact while a company fufills all legal requirements that are stipulated to avoid this negative impact.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The way of operationalization is totally unclear. The risk for incomparable results of DMAs related to different companies still remain. Furthermore, all measures that are decided and implemented in a company during the reporting period should be included in the assessment of an impact. Similiar to financial reporting, a provision has also to be evaluated including counter measures that influence the provision at the end of a reporting period.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 9

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ESRS 1.45-47 could be more linked to ESRS 1.87-89. Firstly, the requirements are a bit doubled regarding undue cost and efforts principle. Secondly, examples are given under ESRS 1.47 but under ESRS 1.89 there is only a general explanation without reference to ESRS 1.47. These sections could be more coherent.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	See remarks related to ESRS 1.22	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 21
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	ESRS 1.AR 26 in reference to ESRS 1 3.7 may result in a high number of new datapoints depending on its interpretation by auditors. EFRAG should clearly state that the disaggregation of data is voluntary ("may…") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload and unjustified burdens for the disclosing company (information may not be available or only with high effort).	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ESRS 1.51 stipulated different level for aggregation and "other appropriate level". The segment approach (which is based on a management approach under IFRS) could be highly relevant category for aggregation and should be added as an explicit category.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	This amended requirement will help for faithful presentation and comparable information to stakeholders generated by the reporting of different reporting undertakings.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	This new requirements will increase the faithful presentation and comparable information in particular for the automotive industry. However, the NMIG 7 is not referenced under ESRS 5.3 and no further specification is given as AR.xx. It could worthwhile to have more practical hints for implementation.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The general goal of this new requirements will increase the faithful presentation and comparable information reported by different companies. However, it is not clear why to report on "significant events" in relation to the "Subsidiary's or business's exposure to material IROs". In our opinion, significant events should only be considered in case that they might the overall evaluation of material IROs on group level. We would recommend to further review this requirement.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	73.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In this context, a reference to ESRS 1.87 could be integrated to avoid discussions about the term "impracticable".	ESRS1	ESRS 1 - 7.1 Presenting comparative information	82.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While we support the general relief for metrics related to ESRS E2 to E5 in case of a joint operation, it remain unclear in which case a parent company may not have (partially) operational control over a joint arrangement although it should have financial control (otherwise this would not represent a joint operation). In addtion, the relief could be also extended to ESRS Sx and G1 since the data gathering for metrics related to these standards may also be burdensome and complicated within a joint operation. We would recommend further specification.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We can follow the approach under ESRS 1.94. Nevertheless we would recommend to integrate ESRS 1.94 with ESRS 1.81-84, e.g. as "changes related to sustainability information and presenting comparative information". Both requirements describes the process for comparative figures and other sustainability information.	ESRS1	ESRS 1 - 7.6 Changes in the preparation or presentation of sustainability information	94.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We support the explanation about the reporting on material opportunities. We would highly recommend to precise that this requirement only affects "material" opportunities. So far this term is missing in ESRS 1.102 and in the sub-headline "Reporting on opportunities".	ESRS1	ESRS 1 - 7.9 Reporting on opportunities	102.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We highly support this increasing flexibility for additional disclosures that are not related to material IROs but relevant information items for specific stakeholder needs. However it could be worthwhile to align the requirements with ESRS 1.107 (b). Otherwise we would expect different levels of qualitative characteristics of information within the sustainability statement.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Defining the long-term horizon as >5years, without limiting it to a certain number of years (e.g. >5-10 years) makes it very challenging to evaluate and estimate the severity and likelihood of Impacts, Risks and Opportunites. Due to the volatile nature of different factors that influence these IROs it is often very challenging to estimate the severity & likelihood of an impact, if the time period has an open end. We therfore recommend to limit the long-term horizon, e.g. to >5-10 years in order to generate meaningful outcomes.	ESRS1	ESRS 1 - 6.2 Time horizon: definition of short-, medium- and long-term for reporting purposes	78.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please change the phrase "[…]over the short, medium or long term" to "[…] over the short, medium and/or long term" in order to make more clear, that impacts cannot only occurr, e.g. EITHER in the short OR in the medium/long term, but that impacts can occurr over several time horizons, e.g. over the short, medium, AND long-term.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	30.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please amend and specifiy as follows: "The time horizon is intended to classify both when a material impact/effect occurs (or is expected to occur) and how long the effect is expected to last. If it can be assumed that the impact will decrease or disappear completely in a future time horizon (e.g. due to the implementation of certain actions/policies) and this impact therefore falls below the materiality threshold in the assessment, then the respective time horizon does not apply. Only the period in which the impact is assessed as material must be declared externally."	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	30.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In order to avoid misinterpretations of what is to be understood by "anticipated financial effects", please add a reference to ESRS 2 Disclosure requirement SBM-3 (paragraph 23.) for the definition of the term.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	AR 15

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Please add "opportunities" after "[...] of risks [...]" -> "[...] materiality assessment of risks and opportunities."	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	AR 16
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	"124. Paragraphs 123 and 124 apply irrespective of whether the relevant actor in the upstream and/or downstream value chain is an SME." Text should be "124. Paragraphs 122 and 123 apply irrespective..."	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	124.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The DR refers to "primary users of general purpose financial reports...., incl financial statements and the sustainability statement". This wording seems to imply as if the sustainability statement is a general purpose financial report. This contradicts with that the sustainability statement is part of the management report. The purpose of the DR is agreed.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	It states that the "practical considerations" of scale, scope and irremediable character needs to be "taken into account". It is not clear how these three relate to each other to determine severity. Should they be aggregated or multiplied? Also as it states in AR 8 that any of these three characteristics can make a negative impact severe. Is this then professional judgement how to assess and "weigh" them? I believe concrete guidance on how to determine severity would be helpful towards a more streamlined DMA process.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 7
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Would a policy be considered to be a continuous action (hence impact needs to be reported in year after, if all other things are ceteris paribus), or could an effective policy leads to a reduction in a risk and therefore becoming non-material in the year after (e.g. effective health & safety policies)?	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 12
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The DR refers to "shall not exceed the limit set by the relevant EU laws and regulations". Is this referring to the value chain cap that is proposed as part of Omnibus? The description is currently rather vague and could refer to all kinds of EU laws and regulations. Revised (and more concrete) wording could help the interpretation & understanding of this DR.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The FR refers to "...and to determine the scope of its value chain..."? Is this not a duplication with ESRS 1- 87(b), which also refers to that?	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	So effectively Wave 2 reporters have much more time to prepare value chain disclosures than Wave 1 reporters. Wave 1 reporters would be obliged to start reporting on the value chain as of FY27 (3 years after CSRD reporting started), and immediately once the revised ESRSs become available. Wave 2 reporters first get a 2 year extended relief on CSRD reporting + 3 year transitional provision and therefore only need to start reporting by FY30. Originally Wave 2 also would have needed to report on the value chain by FY28.	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	122.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	We support the clarification on leased assets, and that the lessee should include the impacts of leased assets in its reporting. This aligns with the financial consolidation scope. To further strengthen the consistency with financial reporting, we suggest aligning the definition of leases with IFRS 16 definitions (e.g., this only applies to 'on balance' leases). Especially in outsourcing or co-manufacturing agreements, assets can be used by third parties that classify as a lease in financial reporting. With the current definitions, there is room for interpretation how to deal with these kind of 'embedded' lease contracts.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	70.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Current wording leaves room for interpretation. Stating that 'any of the three characteristics can make an impact severe', can be explained twofold; first, based on the average of the three characteristics, one characteristic may raise the average in such a way it becomes severe. Or, secondly, regardless of the average, when either scale, scope or irremediability is high, the impact automatically is severe, regardless of the assessment of the other characteristics. We noticed different approaches in practices, and also noted that the second approach could result in undesired outcomes. E.g. when all sites globally do have minor impact on a certain topic, the scope is high (= severe in the second interpretation), but scale and irremediability would make the topic immaterial /not severe in the first interpretation.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 11
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	We support this relief to exclude business activities with insignificant impact on metrics. This will help focussing on those business activities with the most impact. The term significant however leaves room for interpretation. We propose to incude some guidance how to interpret this, e.g. a threshold of roughly 10% in line with financial reporting	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	This comment refers to Appendix A. While I support removing sub- and sub-subtopics, the current grouping is overly broad. For example, under S1, the subtopic "working conditions" now includes adequate wages, work-life balance, working time, secure employment, and social protection. It is unclear how this affects metric application: if only work-life balance is material, must all metrics under "working conditions" be disclosed, including those unrelated such as adequate wages? See also comment in S1 with respect to this item.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	9.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Issues with level of aggregation/disaggregation required not being principles-based, potentially leading to obscured information - Undertakings should present aggregated information in the first instance and disaggregate by exception when needed; Remove “such as” examples (e.g., water basins) from para 51; Remove AR22. Make AR23 (NEW requirement) a “may consider” (voluntary) rather than a “shall consider” (mandatory) requirement; Revise AR25 to include “an inappropriate level of aggregated or disaggregated information” and “to understand the undertaking’s material impacts”.	ESRS1	3.7 Level of aggregation, disaggregation and group reporting	51-52, AR22-23
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Definition has changed from the process by which undertakings.... “account for how they address” to “remediates and brings an end to...” negative impacts, introducing unrealistic standards of performance - Revert to the previous text.	ESRS1	4. Due diligence	54
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Issues with presentation of PATs alongside IROs will result in complex and unnecessary mapping which detracts from the conciseness and understandability of the disclosure – Remove 113.	ESRS1	9. Connected information and linkages with other parts of corporate reporting	113

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Issues with identifying information incorporated by reference as addressing the relevant DR or datapoint, which increases reporting burden and renders this information less accessible for users – Remove "clearly identified in the source document" from this paragraph.	ESRS1	9. Connected information and linkages with other parts of corporate reporting	118(a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	(a). Issue with value chain information on PATs and need to clarify/specify this requirement further – add "may limit… value chain information to reasonably supportable and available information…"; (b). Issue with value chain information on metrics and the requirement to disclose datapoints derived from EU Regulation – Remove or revise to specify as "derived from and required to be collected and reported as part of another EU Regulation"	ESRS1	10. Transitional provisions	123(a)-(b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	"124. Paragraphs 123 and 124 apply irrespective of whether the relevant actor in the upstream and/or downstream value chain is an SME." Text should be "124. Paragraphs 122 and 123 apply irrespective…"	ESRS1	ESRS 1 - 10.1 Transitional provision related to Chapter 5 Value chain	124.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Unclear what is meant by 'does not mandate behaviour' and why this is needed when the CSRD already sets out how the ESRS should be adopted	ESRS1	ESRS 1 - Objective	5.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Although we are aligned it make sense to consider comparability with other undertakings within the same sector, it is unclear from the standard how to do this in practice. Our view is it would make sense to add this as part of ESRS1. 27. as a data source consideredwhen conducting the materiality assessment	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Although we are aligned that the ESRS have retained the concept of double materiality, we are concerned the wording of this paragraph creates even wider divergence with IFRS S1 and S2 as it places unnecessary prominence on impacts	ESRS1	ESRS 1 - 3.3 Double materiality assessment	26.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Unclear what this data point adds. More beneficial to provide clearer guidance as to how the materiality principle should be included and make explicit if data points cannot be excluded basis this filter	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 20
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	From the wording of the requirement it is unclear how the value chain cap should be applied and what thresholds / timelines if any should be applied	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Although we agree this is a useful clarification, in practice this data may still not be available in the next reporting period therefore requirement should be amended to allow for organisations to provide explanation if they are still not able to report on the acquisition in the following period	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Time intervals should be fully aligned with the IFRS S1 and S2 as this will enable greater comparability longer term	ESRS1	ESRS 1 - 6.2 Time horizon: definition of short-, medium- and long-term for reporting purposes	77.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The revised ESRS clarify that the standards are intended to support a fair presentation framework, rather than serving merely as a compliance checklist as sometimes interpreted in practice. This shift encourages companies to focus on materiality and relevance in their disclosures, potentially reducing the reporting burden by allowing more judgment and flexibility. However, it may also slightly increase the burden due to the need for other assessments and justifications. A related potential risk is that voluntary or previously mandatory datapoints now moved to the NMIG (non mandatory implementatin guidance) and the extent they would need to be considered and justified under a fair presentation framework, including evidencing towards (external) assurance providers. Despite this, we agree with the explicit amendment toward a fair presentation framework, as it better aligns with the principles of materiality and relevance in sustainability reporting. This approach supports more meaningful disclosures and allows companies to tailor reporting to their specific context, rather than following a rigid checklist.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This revised ESRS (AR 11) requires management to inform and consult workers' representatives on sustainability information, including how it is obtained and verified. Their opinion should be communicated to relevant governance bodies where applicable. Although we believe that most of the companies that are in scope do this, we do not agree with this addition. It imposes procedural obligations that go beyond the scope of reporting and leans toward enforcing internal behaviors. This should remain at the discretion of the company and does not belong in the ESRS framework, which is intended for disclosure.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The ESRS now requires undertakings to consider disaggregating reported information by location (e.g., site, water basin, local ecosystem) when material impacts, risks, or opportunities are highly dependent on local context. We recommend moving this requirement to non-mandatory implementation guidance. In our view, paragraph 52 of ESRS 1 already sufficiently covers the need for location-specific disclosures when material. Making this a mandatory consideration adds complexity and increase the documentation burden without clear value add.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 23
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Paragraphs 87–88 and AR 29 introduce new requirements for disclosing key judgments, including related significant uncertainties, significant assumptions, and significant limitations that affect reported sustainability information. Examples of these include judgments made during materiality assessments and topic selection. We support this addition, as it ensures interoperability with IFRS S1 par. 74 and IFRS standards for financial reporting and enhances transparency for users .	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	85.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The revised ESRS requires companies to disclose metrics that can only be partially estimated due to limited data availability, along with actions taken to improve coverage and quality, and progress over time (interepreted from the final sentence in the new paragraph 'the undertaking shall assess at the subsequent reporting dates whether reliable data has become available and if so adjust the estimates accordingly'). We do not support this requirement. Partially estimated metrics risk misrepresenting actual performance and reduce comparability and understandability across companies. A clear explanation of efforts to obtain reliable data should suffice, without requiring incomplete disclosure of metrics.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Expanded paragraph - The ESRS require data and assumptions used in sustainability statements to be consistent, where possible, with those used in financial statements. A new addition now also requires companies to explain the level of consistency to support user understanding. We do not support the new requirement to always explain the level of consistency. We prefer the previous approach (former paragraph 127), where explanatory disclosures are only required if inconsistencies exist as well as the original requirement (from paragraph 90) to ensure consistency should be retained without mandating disclosure of how consistent the data is. This adds unnecessary reporting burden.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	116.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This comment regards former paragraph 131a that has been deleted (and can therefore not be selected in column B). This paragraph previously provided flexibility in providing entity specific disclosures that were reported in prior periods. The explanation given for the deletion seems misplaced as it centers on sector standards. The previous paragraph should be retained to ensure consistency between previous (voluntary) reporting and CSRD reporting. In addition, we do not agree with new paragraph 121: The transitional provisions should apply as from the first year that the revised ESRS have come into effect, instead of the first year the sustainability statement as required by EU Directive 2013/34/EU, to allow use of transitional relief described in the revised ESRS.	ESRS1	ESRS 1 - 10. Transitional provisions	121.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The statement in paragraph 125 'Starting from the fourth year of its reporting under the ESRS, the undertaking shall include upstream and/or downstream value chain information' seems inconsistent with AR 28 'Metrics in topical ESRS do not require inclusion of upstream and downstream value chain data, with the exception of GHG emissions Scope 3.' Clarification is needed.	ESRS1	ESRS 1 - 10.2 Transitional provision related to Section 7.1 Presenting comparative information	125.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	There are a number of metrics that change due to revision of ESRS definition and calculation and will not be 100% comparable to prior period reporting. It is unclear how EFRAG suggest address these transitional changes with comparative information in prior periods based on the delegated ESRS. Guidance is needed for reporters under the existing ESRS when new or revised parameters are introduced through the revised ESRS. This guidance should clarify that any new or amended datapoints resulting from the revision may be omitted for comparative years.	ESRS1	ESRS 1 - 10. Transitional provisions	126.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Clarify the term "relevant information" by modifying the 2d sentence like this: "The information shall be presented either at topical level or at impacts, risks and opportunities level, depending on what best depicts their nature or the way they are managed (refer to the general requirement on level of disaggregation in Chapter 3.7)."	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	ANC supports the overall reduction of list of topics in appendix A (previous AR 16) but we do not agree with the idea of merging topics for S1 & S2 and regrouping animal welfare subtopics under G1 "corporate culture". Social topics for value chain workers should be grouped in one or two subtopics such as working conditions (incl. health & safety) and human rights to be aligned with the remediation actions that are often limited to responsible purchasing practices and due diligence activities. The footnote on water and sanitation should be deleted as this level of granularity is irrelevant compared to the ability of the undertaking to influence water & sanitation issues in its supply chain. As regards animal welfare that is listed in the CSRD, it should be mention as a simple footnote relating to Business Conduct (Add *Animal welfare may be one of the business conduct subtopics material for some specific sectors).	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	23.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Change drafting to avoid insinuating that DMA has to be performed each year: "The undertaking shall update the materiality assessment process and its conclusions where significant events or material changes in circumstances occur, such as changes in its activities or structure, in the activities or structure of its value chain(s), in calculation methodologies, or in the discovery of errors."	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	- Relocate methodological or illustrative elements specific to the bottom-up approach, which are secondary in nature, to the AR: factors related to severity – to avoid implying the need for separate scoring of each factor; precedence of severity over likelihood for potential human right impacts – limited to specific cases - Specify that the material assessment "shall be assessed based on [criteria]", rather than "shall be based on"	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	- Relocate methodological or illustrative elements specific to the bottom-up approach, which are secondary in nature, to the AR: criteria for assessing positive impacts – minor differences with negative impacts - Specify that the material assessment "shall be assessed based on [criteria]", rather than "shall be based on"	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	32.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Clarify that thresholds serve to determine and prioritise material topics, without implying the need for separate scoring of each criterion or severity characteristics	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 5
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Clarify that the assessment of severity should not necessarily lead to scoring each characteristic separately (scale, scope, irremediable character) but may be linked to threshold-based prioritisation	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 7
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Reflect that "workers' representatives have a right to be consulted for the purpose of performing the materiality assessment" in line with CSRD Art. 19a§5 instead of current wording in AR 11	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Relocate methodological or illustrative elements specific to the bottom-up approach, which are secondary in nature, to the AR: material risks and opportunities deriving from undertaking's a) material impacts, b) dependencies on resources, and c) other factors (e.g., exposure) – methodological details	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	40. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Relocate methodological or illustrative elements specific to the bottom-up approach, which are secondary in nature, to the AR: considerations regarding dependencies – methodological details	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	41.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	"In conducting its DMA, the undertaking is expected to (…) use reasonable and supportable evidence [deletion of "to estimate the levels of severity and likelihood of impacts and the likelihood and magnitude of financial effects of risks and opportunities"]"	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Clarify cases for consolidated sustainability reporting: Specify whether (i) an EU intermediate parent exempted from consolidated financial statements should still prepare consolidated sustainability reporting, and (ii) an IFRS 10 investment entity, which does not prepare consolidated financial statements, is also exempt	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	58.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	High Priority. Some drafting elements on data collection remain confusing: §62 states that direct information from value chain may be used by undertakings to conduct their DMA where §65 states that DMA may be conducted without direct information from value chain. §65 states that an undertaking may need to obtain additional information from VC actors when materiality is uncertain. This seems inconsistent with earlier provisions allowing undertakings to rely on estimates. Clarify the general principle in the main body (not only in the AR28): VC information is required only for identifying material IRO (DMA), not for reporting on metrics. This identification of impacts in the VC is important to support initiatives led by the undertaking (PAT) to reduce the impacts of the products and services along the lifecycle, not for reporting purposes. It should be made clear in the main body that VC data is not required for standardised metrics, except for Scope 3 GHGemissions. As currently drafted, §62 refers to undertakings reporting metrics that include value chain information, while AR28 specifies that standardised metrics do not cover the value chain – creating a potential inconsistency. However, it could be explained that entity-specific metrics (not standardised) may require value chain data.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	62.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Nuance the principle about direct data collection from value chain counterparts in light of the possibility of using estimates (e.g., §65 states that the undertaking may need to seek additional information from value chain actors when materiality is unclear, whereas earlier paragraphs allow the use of estimates based on practical considerations, this may appear inconsistent)	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	65.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	- Joint operations (JO) should be explicitly covered, as their treatment in E2-E5 metrics remains unclear when §92 is not applied. - It should be clarified that when associates, joint ventures, or joint operations are also part of the value chain, they must be "accounted for proportionally to contractual rights and obligations (arrangements), so as to reflect the impacts connected with the undertaking through supply relationships"	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	69.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Long-term employee benefit funds: add "subject to materiality filter" as these funds seem to be less material than leasing contracts.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete the specification of "including for the calculation of metrics" when requiring consistency between the reporting period of the sustainability statement and that of the financial statements. Certain information, which may be difficult to obtain within the publication deadlines, may be drawn from different or lagged periods if this does not impair comparability over time or with peers, provided no significant events or changes occurred in the interim up to the reporting date	ESRS1	ESRS 1 - 6.1 Reporting period and base year	74.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Retain the four required parts of the sustainability statement and provide flexibility in the format of presentation while requiring undertakings to directly reference the disclosure requirement (DR) numbers (e.g., in section headings or paragraph titles), without requiring a separate mapping table; this "visual tagging" approach is already used by many companies and facilitates comparability for users	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	105.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Clarify that non-material information, when disclosed in the sustainability statement under §108, falls under the overall verification of the sustainability statement and is subject to the same level of assurance, ensuring equivalent quality	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We would suggest replacing the last sentence of this paragraph with the following wording, aligned with ESRS 1.8.: "An ESRS sustainability statement covers (i) governance, strategy, impact, risk and opportunity management, as well as related (ii) policies, actions, targets and metrics related to material impacts, risks and opportunities."	ESRS1	ESRS 1 - Objective	3.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	We are concerned that inconsistencies in wording between §4, §21, AR 3 and the Glossary on the terms "users", "sustainability statement" or "general purpose sustainability statement" create confusion. We urge EFRAG to harmonise and clarify the use of these terms across the different paragraphs relating to materiality and fair presentation assessments (see related comment on §21-b). Currently, the proposed wording include the following inconsistencies: •§4 refers to "users of general purpose sustainability statements" which include "primary users of general purpose financial reporting" and "other users, such as the undertaking's business partners etc." •§21 refers to "sustainability statement", §21-a refers to "users (in bold) of general purpose financial reports" while §21-b refers to "users (not in bold) of general purpose sustainability statements". •Definition of "users" in the Glossary refers to "users of sustainability statements" (not "general") and include "primary users of general purpose financial reporting" and "other users, including the undertaking's business partners etc.". •AR 3 for paragraph 21 mentions that "general purpose" refers to interests and viewpoints assessed based on groups of users. Log of Amendments indicates that the term limits the scope of necessary information.	ESRS1	ESRS 1 - Objective	4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I agree	Regarding (b), we have the same suggestion as shared for ESRS 1 – 3 above, so as to replace it with the following wording: "include material information related to the reporting areas of (i) governance, strategy, impact, risk and opportunity management, as well as related (ii) policies, actions, targets and metrics related to material impacts, risks and opportunities (see [Draft] Amended ESRS 2)."	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	AR 1
Excels	Ernst & Young	Auditor	United Kingdom			I agree	The following is added in relation to fair presentation: "To achieve faithful presentation, the undertaking shall provide information (...) necessary for a complete, neutral and accurate depiction of its material impacts, risks and opportunities." We recommend to include in §19 a reference to Appendix B where the qualitative characteristic of Faithful representation is further developed. This would clarify that the fair presentation is based on the same general qualitative characteristics that applies to any individual disclosure and would strengthen the consistency and connectivity of the ESRS 1 principles.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We agree with the new materiality filter covering the whole of an undertaking's sustainability information, as we consider this provides welcome flexibilities to undertakings and upholds the quality of disclosed information.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	21.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	As mentioned in relation to §4, we are concerned that inconsistencies in wording between §4, §21, AR 3 and the Glossary on the terms "users", "sustainability statement" or "general purpose sustainability statement" create confusion. We urge EFRAG to align the wording of these paragraphs and clarify how different terms impact the materiality and fair presentation assessments. In particular, ESRS 1 should: •Either consistently use the term "sustainability statement" (and not "general purpose sustainability statement"), •Or clearly explain what the difference with "general purpose sustainability statement" is and how this impact the materiality and fair presentation assessments.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21. (b)
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	As commented for ESRS 1 par 21(b), the term "general purpose" remains unclear in this context. While AR 3 states it refers to "interests and viewpoints assessed based on groups of users", the term could be interpreted as linked to financial reporting concepts rather than sustainability reporting. To avoid confusion, we suggest either: •Replacing "general purpose" with "sustainability statement" for consistency, or •If the reference to "general purpose" is meant to limit the scope of users to be considered for the materiality and fair presentation assessments, add clarifications in AR, for example: "General purpose refers to sustainability information intended to meet the needs of identified groups of users, rather than tailored to specific or individual users."	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	AR 3
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We agree with the intent of §22 to link reporting explicitly to material IROs and to allow presentation either at topical level or at IRO level . However, further clarification is necessary regarding what is meant by reporting at the level where IROs are managed in the form of examples in AR to avoid reporting on a level that is insufficiently granular to understand the IROs and how they are managed. Our current understanding is that "the way they are managed" would most probably refer to the level where policies and actions are defined and implemented i.e the operational level at which IROs are actively managed. Please refer to our comments on ESRS 2 §28 and AR 23. In addition, it is critical to stress that the level of reporting (topic vs. IRO vs. grouped IROs) should meet the qualitative characteristic of comparability described in QC10 of Appendix B. This is critical to reduce the risk of a lack of comparability across periods and across entities associated with a more principle-based approach to the level of reporting.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	"Human rights" (ESRS 1, ESRS S1, ESRS S2, ESRS S3, ESRS S4) issues are not defined in the standards, even if reference is made to external texts such as UN Guiding Principles on Business and Human Rights, ILO Declaration on Fundamental Principles and Rights at Work and the OECD Guidelines for Multinational Enterprises. According to ESRS 1.31, the materiality assessment of potential negative human rights impact is conducted differently from other impacts as the severity of the impact takes precedence over likelihood. The boundaries of topics related to "human rights" should be clearly delineated /defined, as based on international texts, this concept has a very broad scope and can practically encompass any type of issue covered by S1 § 4 – beyond other labour-related human rights (child labour, forced labour, privacy and adequate housing). It would be useful to have a clarification of which sub-topic of Appendix A of ESRS 1 is deemed to be related to human rights.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	It is mentioned that severity takes precedence over likelihood for potential negative human rights impacts. However, it is not fully clear which rights require differentiated treatment as well as practical application of this. Although this is unchanged compared to Set 1, we suggest EFRAG to provide further clarification.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	31.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	ESRS 1 draft has introduced a new and restrictive definition of "positive impact" EFRAG explains that reference to "philanthropy" was considered but discarded. Only impacts that derive from business activities, products and services qualify as positive impacts to be reported. Many stakeholders view community investments (e.g., donations to schools, hospitals) as integral to community engagement. The NMIG 13 for § 13 of S3 refer to "positive impacts" illustrated by "social investment and development programme" – which seems contradictory with the new definition. We ask EFRAG to clarify the boundaries of the concept in ESRS 1 and its interaction with NMIG 13 for S3. Including guidance in the NMIG on reporting such activities, as entity-specific information, would help undertakings with significant community programs position these activities within the ESRS framework.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	36.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Regarding the expectation that the top-down approach is expected to lead to the same outcome of the materiality assessment as the bottom-up approach, we see the risk that a top-down approach (i.e. reasoning from the topic level) can result in the omission of material IROs that are not identifiable at the level of the overall business model or strategic and business priorities. We consider it is critical to mitigate this risk by including within the standard, a requirement to consider a bottom-up approach if the top-down approach could fail to reflect the undertaking's specific situation and characteristics, including, for example, aspects relating to the sector, value chain and geographies in which it operates.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 17
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We ask EFRAG to change the wording "general material information" into "material general disclosures" to align wording used with ESRS 2.	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	49.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	In our view, EFRAG should consider deleting AR 20 of Section 3.6. We consider that it may lead to confusion regarding the application of this principle (which applies to the whole of sustainability information) by introducing a presumption of materiality of some selected pieces of information (ESRS 2 GDRs).	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 20
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	This paragraph could be misinterpreted as suggesting that the limitation on requesting information from other companies, as defined by EU law and regulation, implies that the related value chain information does not need to be reported. It is important to clarify that, despite the limits on information requests, the obligation to report value chain information still exists. Companies should pursue alternative methods, such as estimation, to fulfil their reporting requirements. In addition, it is unclear to which specific laws and regulation is referred to with the text "the relevant EU law and regulation". We would propose to specify the EU law and regulation in the glossary.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	63.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	EFRAG should clarify whether associates or joint ventures that are NOT accounted for under the equity method (such as proportionate consolidation applicable under certain local GAAP) are part of the undertaking's own operations or rather part of upstream and downstream value chain similar to associates or joint ventures accounted for under the equity method.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	69.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We welcome EFRAG's clarification brought to the treatment of leased assets. However, it is unclear whether it is an exception limited to leased assets or rather an illustration of the general principle applicable to identify when an IROs relates to own operations or to value chain relationships. The rationale provided in ED ESRS 1 and the NMIG based on the connection between the lessee and its usage of the leased asset to conclude that the lessor reports corresponding IROs as part of its downstream value chain could be considered as equally applicable to similar contractual relationships. These may include, for example, operation and maintenance (O&M) contracts as well as management mandates, where the operator / proxy is also directly connected to the IROs related to the relevant facility / entity subject to this contract. It is therefore critical that EFRAG clarifies whether this guidance is only applicable to leased assets or extends to similar contractual relationships. Also, please refer to our comment on ESRS E1 AR 18. The approach in ESRS 1 paragraph 70 diverges from the GHG Protocol (hybrid approach of financial and operational control is proposed), leading to interoperability issues.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We ask EFRAG to clarify the fact pattern considered in this DP, namely that it is referring to the case where the employer contributes to an employee pension fund and represent the underlying assets on its balance sheet (possibly on a net basis with the related pension liability). It should be clarified if this guidance means that the underlying invested assets are not to be considered part of the undertaking's downstream value chain (in contrast to other loans and other investments). Also, similar to our comment on §70, it is critical that EFRAG clarifies if this is meant to be a limited exception or rather an illustration of the general principle applicable to identify when an IROs relates to own operations or to value chain relationships.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	71.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The relief for acquisitions and disposals is not based on the "undue cost or effort relief" (UCE). This might lead to information not being reported even when available and this will create a new difference with ISSB standards. We suggest making reporting on acquisitions conditional upon UCE. Similarly, IROs and data related to disposed activities during the reporting period shall not be excluded in that reporting year if available without UCE. We recommend separate presentation of material "disposed activities" from continuing operations, inspired by IFRS 5. We also suggest reminding some impacts/risks might remain relevant post disposal. We ask EFRAG to clarify what "major acquisitions" refers to (compared "significant" or material") Instead of disclosures on "significant events occurring between acquisition or disposal date and the end or beginning of the reporting period", we suggest requiring summarized information on the related business and its material ESG topics. Finally, we recommend that EFRAG clarifies how to define the reporting scope used for comparative information for the year after the acquisition/disposal.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	73.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We welcome the inclusion of "undue cost or effort" (UCE) but further clarification is essential to ensure consistent application and avoid loss of relevant information. UCE is a proportionality principle on the level of sophistication of data and models used to report the information – not a justification to omit information as clarified in the IASB educational material released in August 2025 ("The mechanism does not exempt a company from disclosing information."). Its broader use in sustainability reporting, a less mature field, requires guidance. EFRAG should clarify how UCE compares with the criteria on "reasonable efforts" for value chain data provided by the Commission's July 2024 FAQ. EFRAG should also strive to align with how the concept is clarfieid and used in ISSB standards. We recommend clarifying that use of UCE to "prepare information on metrics" (§87-d) affects "how the information is prepared" rather than "whether it is reported on". UCE relief may accommodate first years of application, with decreasing use over time as practices evolve. This dynamic assessment should be further clarified. We also have concerns regarding the interplay between §91 and §87 on "undue costs or efforts". See our comments on §91 in Part 2.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	It is unclear how "not impair the relevance or faithful representation of the reported information" compares with "non-material". Clarification should be added, possibly with an example.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	We recommend EFRAG to remove §92. The concept of joint operations is GAAP specific and this relief will introduce some differences in reporting boundaries which will be complex for users to apprehend and compare. Furthermore, this relief paragraph relies on the notion of operational control, which is not clearly defined in ESRS and would require further guidance.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	While we agree with the relief consisting in allowing undertakings to not restate comparative amounts if it is "impracticable" for them to do so, we consider that such a term requires clarification. We suggest to include a definition in the Glossary and align the term with IFRS S1 which relates impracticability to the situation where the undertaking cannot apply a requirement after having made every reasonable effort to do so. This comment is also relevant for Appendix D where the term is used in relation to anticipated financial effects.	ESRS1	ESRS 1 - 7.7 Reporting errors in prior periods	95.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We signal a typo to EFRAG. The current paragraph states: "The undertaking shall make every dt to ensure…". We believe "dt" should be replaced by "effort".	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	The statement currently included in ESRS Set 1 under ESRS 1.113 that the disclosures related to each of the environmental objectives defined in the Taxonomy Regulation are not subject to the provisions of ESRS is deleted. We suggest EFRAG to include it again.	ESRS1	ESRS 1 - 8.1 General presentation requirement, structure and content of the sustainability statement	106.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	Given the inconsistency between the possibility to add additional information not related to the materiality assessment with the requirement to include material information in the sustainability statement (§21) we suggest to include a requirement to ESRS 2 IRO-2 to require the inclusion of a list that specifies which additional information has been disclosed and its location within the sustainability statement in order to ensure that this is clearly identified and does not obscure material information.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	Please refer to our response to question 13 for our comments on the revisions to requirements pertaining to cross-references to financial statements when reporting on monetary amounts or other quantitative information presented in the financial statements, making such referencing voluntary (§114). We disagree with this change and consider that §114 should maintain a mandatory requirement to cross-refer to financial statements.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	114.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Table of Content: Appendix C should be before Appendix B since "assessing impacts" are part of DMA and thus more related to App. A.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	7.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Why linkage to ESRS 1.21 instead of including the definition of materiality of information as core element of a faithful presentation under ESRS 1.19?	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	19.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Option for reporting on IRO level or topical level. However, ESRS 1.AR17 states out that the reporting should be done on a topic level while ESRS 1.AR21 permits to report a material IRO on a sub-topic level. Given the general permission and flexibility of a bottom-up approach on IRO Level, the mapping between IROs, topics and disclosure requirements should be flexible in the same way. So far no further guidance is integrated for mapping IROs/sub-topics to DRs (only in the NON-MANDATORY implementation guidance). Thus, complexity for implementation is not decreasing and dependent on companies' auditor alignment the results of DMA will probably be not comparable between companies.	ESRS1	ESRS 1 - 3. Double materiality as the basis for sustainability reporting	22.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Engagement process with affected stakeholders are essential. However, users of sustainability information are missing. This group represents the same relevance for a company than affected stakeholders.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	33.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Why should mitigation measures not be accounted for in the assessment of actual negative impacts that have been occured in previous periods? Some companies have might set up lots of efforts and mitigation measure to reduce impacts in the past resulting in no material impacts for the company in the current period. Why should a company report on an impact that it manages well on a company level, maybe since several years? This would not represent a material information anymore for their stakeholders. Example: water pollution on the own activity level. A company have faced water pollution some decades ago, however due to successful mitigation measures in the past, this impact does not exist anymore in its own operations level since decades.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Who and how should define "significant ongoing mitigation and /or prevention actions"? This will lead to discretionary rules since a common framework/benchmark for "significant" actions is missing and very specific for each company and sector. The way of operationalization is unclear. e.g. a mitigation measure that equals to current legal requirements would lead to an on-going reporting about this specific impact while a company fufills all legal requirements that are stipulated to avoid this negative impact.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The way of operationalization is totally unclear. The risk for incomparable results of DMAs related to different companies still remain. Furthermore, all measures that are decided and implemented in a company during the reporting period should be included in the assessment of an impact. Similar to financial reporting, a provision has also to be evaluated including counter measures that influence the provision value at the end of a reporting period.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 9
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	ESRS 1.45-47 could be more linked to ESRS 1.87-89. Firstly, the requirements are a bit doubled regarding undue cost and efforts principle. Secondly, examples are given under ESRS 1.47 but under ESRS 1.89 there is only a general explanation without reference to ESRS 1.47. These sections could be more coherent.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	See remarks related to ESRS 1.22	ESRS1	ESRS 1 - 3.6. Determining the information to be reported in accordance with ESRS 2 and topical standards	AR 21
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	ESRS 1.AR 26 in reference to ESRS 1 3.7 may result in a high number of new datapoints depending on its interpretation by auditors. EFRAG should clearly state that the disaggregation of data is voluntary ("may...") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload and unjustified burdens for the disclosing company (information may not be available or only with high effort).	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	ESRS 1.51 stipulated different level for aggregation and "other appropriate level". The segment approach (which is based on a management approach under IFRS) could be highly relevant category for aggregation and should be added as an explicit category.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	This amended requirement will help for faithful presentation and comparable information to stakeholders generated by the reporting of different reporting undertakings.	ESRS1	ESRS 1 - 5.1 Reporting undertaking and own operations	59.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	This new requirements will increase the faithful presentation and comparable information in particular for the automotive industry. However, the NMIG 7 is not referenced under ESRS 5.3 and no further specification is given as AR.xx. It could worthwhile to have more practical hints for implementation.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	70.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The general goal of this new requirements will increase the faithful presentation and comparable information reported by different companies. However, it is not clear why to report on "significant events" in relation to the "Subsidiary's or business's exposure to material IROs". In our opinion, significant events should only be considered in case that they might the overall evaluation of material IROs on group level. We would recommend to further review this requirement.	ESRS1	ESRS 1 - 5.3 Provisions and exceptions for determining the respective reporting boundaries of own operations and value chain	73.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	In this context, a reference to ESRS 1.87 could be integrated to avoid discussions about the term "impracticable".	ESRS1	ESRS 1 - 7.1 Presenting comparative information	82.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	While we support the general relief for metrics related to ESRS E2 to E5 in case of a joint operation, it remain unclear in which case a parent company may not have (partially) operational control over a joint arrangement although it should have financial control (otherwise this would not represent a joint operation). In addtion, the relief could be also extended to ESRS Sx and G1 since the data gathering for metrics related to these standards may also be burdensome and complicated within a joint operation. We would recommend further specification.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We can follow the approach under ESRS 1.94. Nevertheless we would recommend to integrate ESRS 1.94 with ESRS 1.81-84, e.g. as "changes related to sustainability information and presenting comparative information". Both requirements describes the process for comparative figures and other sustainability information.	ESRS1	ESRS 1 - 7.6 Changes in the preparation or presentation of sustainability information	94.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We support the explanation about the reporting on material opportunities. We would highly recommend to precise that this requirement only affects "material" opportunities. So far this term is missing in ESRS 1.102 and in the sub-headline "Reporting on opportunities".	ESRS1	ESRS 1 - 7.9 Reporting on opportunities	102.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We highly support this increasing flexibility for additional disclosures that are not related to material IROs but relevant information items for specific stakeholder needs. However it could be worthwhile to align the requirements with ESRS 1.107 (b). Otherwise we would expect different levels of qualitative characteristics of information within the sustainability statement.	ESRS1	ESRS 1 - 8.2 Presentation of additional information included in the sustainability statement	108.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Throughout Chapter 1, ARs and Glossary. Increases clarity and consistency in terminology and structure, but does not reduce the number or complexity of disclosures. The structural changes improve readability but do not materially reduce the reporting burden. The elimination of "may" disclosures clarifies what is mandatory, but the volume and granularity of required disclosures remain high.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	7.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Change "it shall provide additional entity-specific disclosures" to "it may provide additional entity-specific disclosures"	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	10.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Change "When developing its entity-specific disclosures, the undertaking shall consider" to "When developing its entity-specific disclosures, the undertaking may consider" - Moving the last sentence of the DR into NMIG. The blending of "may" and "shall" in this DR is slightly awkward	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Appreciate the clarity on needing to also review and reference the Application Requirements when determining disclosure requirements and format.	ESRS1	ESRS 1 - 1.2 Drafting conventions	15.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Chapter 2, paragraphs 16-19. Clarifies expectations for fair presentation but does not but does not reduce the scope or depth of required disclosures. The clarification is helpful for preparers but does not simplify the underlying reporting requirements or reduce the need for extensive materiality assessments.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	16.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Like the ability to report at an aggregated topic level as compared to individual IROs.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	22.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Clarify that the list of referenced types of information is non-exhaustive	ESRS1	ESRS 1 - 3.3 Double materiality assessment	27.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Change "The undertaking shall update the conclusions of the materiality assessments conducted in the previous reporting periods to take into account changed circumstances and/or assumptions" to "The undertaking may update the conclusions of the materiality assessments conducted in the previous reporting periods to take into account changed circumstances and/or assumptions, as needed..." Chapter 3.3, AR 5, AR 17 - Offers flexibility in approach, but still requires comprehensive assessment and documentation; annual update adds to ongoing workload. The option for a top-down approach could reduce complexity for some undertakings, but the requirement to justify thresholds and update assessments annually maintains a high compliance burden. The change does not go far enough to reduce the effort required for materiality analysis.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Chapter 3.3.1, paragraphs 34-36 & Appendix C. Increases specificity and may require more granular disclosures, especially regarding timing and effectiveness of remediation. The additional detail may improve comparability but increases the complexity of reporting, especially for ongoing or remediated impacts. Annual reporting should only focus on that reporting yer without additional look back. Remove explicit requirement to reports on impacts before remediation. This does not simplify obligations and increases the reporting burden.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Unless "supportable evidence" is intended to mean something different, should conform to "reasonable and supportable information." The first sentence also should clarify that the relevant "reasonable and supportable" evidence or information is such that is "available to the undertaking at the reporting date without undue cost or effort." Given that the first sentence relates to potential negative impacts and the existing mitigation or prevention actions may not yet have been tested if the underlying event potentially giving rise to the negative impact has not occurred, "are reasonably expected to" should be inserted between "taken" and "reduce." In the second sentence it is not clear what is meant by "significant." Consequently, the sentence should be revised to provide that the impact shall be assessed without considering the mitigation and/or prevention actions only if such actions themselves are material.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Given that it is not clear what "significant" means in relation to remediation actions, this AR should be revised to provide that remediation actions only need to be disclosed if they are material.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 13
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Appreciate the attempt at interoperability and connection with IFRS and financial materiality definitions.	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	37.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Appreciate the tops down approach	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Unless "reasonable and supportable evidence" is intended to mean something different, should conform to "reasonable and supportable information." The paragraph should also clarify that the relevant "reasonable and supportable" evidence or information is such that is "available to the undertaking at the reporting date without undue cost or effort."	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	45. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Chapter 3.5, paragraphs 45-48. The language on "undue cost or effort" is welcome, but the lack of clear thresholds or safe harbors means preparers must still document and defend scoping decisions, limiting the practical simplification.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	46.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The first sentence should clarify that the relevant "reasonable and supportable information" is such that is "available to the undertaking at the reporting date without undue cost or effort."	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	- Tying the level of aggregration/disaggregation to level at which "significant" variation arises is problematic given that "significant" is undefined. Consequently, it would be better to require aggregation or disaggregation to the extent necessary ensure the fair presentation of the reported information consistent with the requirements of paragraph 19 of ESRS 1. This change would simplify the process given that "fair presentation" is the over-arching requirement in any event.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	- Tying the ability to aggregate information related to specific locations to the requirement that the underlying activities must affect the same ecologicial area is problematic given that the requirement presupposes that the related IRO must relate to an environmental matter. As material IROs can also relate to social or governance matters, but still have a specific geographic nexus, we would suggest deleting "and the activities to which they are associated with affect the same ecological area - such as water basin, region, ecosystem, or landscape" from the first sentence. Retaining this language would also multiply undertakings' disclosure burdens with respect to IROs with vast actual or potential geographic reach across a multitude of "specific" locations, notwithstanding the fact that such IROs may be subsantially similar in nature. AR 23 already provides sufficient guidance on when dissaggregation should occur on the basis of differences in local conditions.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Revise the second sentence to clarify that the relevant "reasonable and supportable" information is such that is "available to the undertaking at the reporting date without undue cost or effort." The guidance seems to contradict itself throughout ESRS 1 if we should be including value chain information even if it is burdensome to collect. We would like to see more specific and direct guidance here.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	60.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	To maintain consistency with the information requirements used elsewhere in this ESRS, the first sentence should be revised to read "The materiality assessment regarding upstream and downstream value chain may be conducted without direct information from counterparts, using average regional or sector data, or other information available to the undertaking at the reporting date without undue cost or effort." Given the Omnibus' potential restrictions on the ability of undertakings to obtain information from value chain entities, the second sentence should clarify that the obligation to seek additional information from such entities does not apply to the extent that it is prohibited by law or would require undue cost or effort on the part of the undertaking.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	65.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ESRS 1 Chapter 5.4 identifies that acquisitions or disposals occurring within the year may be deferred to the following year. This would give a range of relief between 24 months and 12 months. An adjustment to the ESRS language should be made indicating the number of months for acquisition adjustment in line with international financial accounting standards.rior period error was identified.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	72.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	appreciate the ability to use the company time horizons.	ESRS1	ESRS 1 - 6.2 Time horizon: definition of short-, medium- and long-term for reporting purposes	77.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The term "reasonable and supportable," particularly "supportable," needs to be clarified as it could be interpreted as requiring a level of validation or the implementation of governance and control processes (see, e.g., https://kpmg.com/xx/en/our-insights/ifrg/2024/issb-reasonable-supportable-information.html) that would defeat the term's intended purpose of providing relief to undertakings in situations where the available data is imperfect (see IFRS's Sustainability Reporting Standards FAQs). This is important because the use of assumptions and estimates is integral to an undertaking's underlying processes used to identify material IROs, scope its value chain, and otherwise conduct its materiality assessment. As these processes, unlike the quantitative disclosures for which the term was originally employed (i.e., IFRS 9 and 17), rely heavily on qualitative information, which may be anecdotal or come from third parties or be limited in nature, due to restrictions on obtaining value chain information or the fact that obtaining additional information would entail undue cost or effort, using the term here requires clarification of its meaning. Consequently, assumptions and estimates should be deemed supportable to the extent that they represent the undertaking's reasonable, good faith analysis of the information available to it as of the reporting date without undue cost or effort.	ESRS1	ESRS 1 - 7.2 Judgement, measurement uncertainty and outcome uncertainty	AR 30
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Requiring the use of "reasonable and supportable information" in relation to the activities specified in clauses (a) and (b) is problematic given that "supportable" can be interpreted as requiring a level of validation or the implementation of control processes that are unlikely to be possible in practice given the nature of the information that is often available to an undertaking in connection with such activities that underlie the materiality assessment process. For example, when an undertaking seeks to identify its material IROs or scope its value chain it will need to consider information that often is imperfect (e.g., anecdotal, contains assumptions or estimates, is difficult to validate since it comes from third-parties, or limited given that complete information would require undue cost or effort). In such cases, an undertaking should instead be required to perform the specified activities by considering the relevant information available to it as of the reporting date without undue cost or effort and applying its reasonable good faith judgement, which is how undertakings typically make determinations in other business contexts with imperfect or limited information.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In this clause, delete "and to determine the scope of its value chain, including its breadth and composition, in relation to material impacts, risks and opportunities" as such activity is already covered in the preceding clause (b). In relation to the activity covered by this clause (c), the term "reasonable and supportable," particularly "supportable," needs to be clarified as it could be interpreted as requiring a level of validation or the implementation of governance and control processes (see, e.g., https://kpmg.com/xx/en/our-insights/ifrg/2024/issb-reasonable-supportable-information.html) that would defeat the term's intended purpose of providing relief to undertakings in situations where the available data is imperfect (see IFRS's Sustainability Reporting Standards FAQs). Since this clause relates to the inclusion of information in the sustainability statement, "reasonable and supportable information" in this context should mean that the information is relevant and satisfies the fair presentation and qualitative characteristics of information requirements specified elsewhere in this ESRS. Such an approach is consistent with the acknowledgement in Section 7.2 of ESRS 1 that disclosed information is subject to the application of judgement, as well as measurement and outcome uncertainty.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (c)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In relation to the activity covered by this clause (d), the term "reasonable and supportable," particularly "supportable," needs to be clarified as it could be interpreted as requiring a level of validation or the implementation of governance and control processes (see, e.g., https://kpmg.com/xx/en/our-insights/ifrg/2024/issb-reasonable-supportable-information.html) that would defeat the term's intended purpose of providing relief to undertakings in situations where the available data is imperfect (see IFRS's Sustainability Reporting Standards FAQs). Since this clause relates to the inclusion of information in the sustainability statement, "reasonable and supportable information" in this context should mean that the information is relevant and satisfies the fair presentation and qualitative characteristics of information requirements specified elsewhere in this ESRS. Such an approach is consistent with the acknowledgement in Section 7.2 of ESRS 1 that disclosed information is subject to the application of judgement, as well as measurement and outcome uncertainty.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	87. (d)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Relief further acknowledge the burden of reporting companies and provide company with broader control in determining the appropriate level of materiality, detail, transparency, completeness, and accuracy, granted the transparency and disclosure must continue to be useful to the user of the report as noted in Chapter 3.1 Paragraph 21	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	90.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Practicable" is not solidly defined and is not clearly understood. "Practicable" should be better identified, potentially with examples, to allow for reporting entities to understand the extent of effort required in these restatements. This may include noting that restatement only applies for material errors and values included in comparative tables for the year being reported when the prior period error was identified.	ESRS1	ESRS 1 - 7.7 Reporting errors in prior periods	95.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	There is more leniency on evidencing connectivity with changes of requirements from "Shall" to "May" which allows business to determine the appropriate level of disclosure for connected info and linkages.	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	114.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree.	Firms, which are parents that have subsidiary undertakings in scope of CSRD and which are unable to rely on an exemption from CSRD reporting, are restricted from incorporating data by reference (from the subsidiary's CSRD report) into the parent consolidated CSRD report due to the restrictive nature of the ESRS 'incorporation by reference' provisions which envisage only being able to incorporate from a specific selection of the parent undertaking's own documents. This creates frictions where differences in reporting approach on particular DRs (between the parent and a subsidiary) arise and the simplest method is to incorporate by reference CSRD-reported data of the subsidiary into the parent CSRD report to outline delineations (which is not presently permitted, and therefore leads to duplicative reporting of data in the parent CSRD report).	ESRS1	ESRS 1 - 9.3 Incorporation by reference	9.3 Incorporation by reference
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	This will lead to more complexity and a big reporting burden. The benefit is questionable in face of already transparent reporting	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	10.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	a mandatory reference to best practice or other reporting frameworks is not practicable to all industries and needs to be assessed on an individual basis.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	11.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Define faithful representation otherwise it is too vague. Leads to too much interprestation and is not auditable.	ESRS1	ESRS 1 - 2. Fair presentation and qualitative characteristics of information	19.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	Not mentioning any time limit for the update of the conclusions of the materiality assessment gives companies more flexibility	ESRS1	ESRS 1 - 3.3 Double materiality assessment	29.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In addiiton, requiring the inclusion of mtitigation and prevention actions in the materiality assessment, the process can become more rigid and complex.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	The definition of stakeholders looks clearer	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 10
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	The process to engage with stakeholders in the materiality assessment is more streamlined	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	AR 11
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Including information on material risks and opportunities from business relationships beyond the scope of consolidated financial statements is an additional burden	ESRS1	ESRS 1 - 3.3.2 Financial materiality assessment	38.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Contradictive messages in Pt 34 and 35. This will lead to multiple interpretations and will not be practicable.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The possibility of using reasonable and supportable information is a positive amendment, but more clarity is needed for "undue cost or effort".	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	47.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Streamlined to avoid unnecessary complexity	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	Streamlined to avoid unnecessary complexity	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 18
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The proposed disaggregation will lead to too much detail level and will increase reporting workload	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	AR 22
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is positive that the assessment of undue cost or effort depends on the company's circumstances. However, a definition of "undue cost or effort" is needed	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	Excluding joint operations helps streamline the calculation scope of environmental metrics	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	92.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	Flexibility in where to include information in the sustainability statement reduces burden	ESRS1	ESRS 1 - 9.1 Connected information	112.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	The option for companies to cross-reference the financial statements when reporting on monetary amounts is positive	ESRS1	ESRS 1 - 9.2 Direct/indirect connectivity with financial statements and consistency of assumptions	114.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The definitions of classified and sensitive information are very narrow and cover only a limited subset of information. They fail to account for the fact that companies also possess other types of information, namely trade secrets, which cannot be disclosed freely. Therefore, in paragraph 98, we recommend including an explicit reference to trade secrets as defined in Article 2, point (1), of Directive (EU) 2016/943. This supports the proposal made by the European Parliament's Special Rapporteur, who has also called for such an addition in the context of the CSRD. While we acknowledge that "secret information" is addressed in para 99 ESRS 1, we do not consider this to be sufficient as para 99 only applies to information on strategy and action plans. However, companies should not be obliged to disclose any "secret information" / trade secrets. The amendment to para 98 should read as follows: "The undertaking is not required to disclose classified information, sensitive information information on intellectual capital, intellectual property or know how, business information or technological information which constitutes trade secrets as defined in Article 2, point (1), of Directive (EU) 2016/943, even if such information is considered material."	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	98.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Please refer to comment above - para 99 ESRS 1 to be deleted if trade secrets are included in para 98 ESRS 1.	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	99.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please refer to comment above - to be aligned with proposed changes to para 98 ESRS 1, i.e. to include trade secrets. "If the undertaking omits classified information, sensitive information or a specific piece of information corresponding to intellectual property, know-how or the results of innovation which constitutes trade secrets as defined in Article 2, point (1), of Directive (EU) 2016/943, it shall comply with the DR in question by disclosing all other required information."	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	100.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Please refer to comment above - to be aligned with proposed changes to para 98 ESRS 1, i.e. to include trade secrets. "The undertaking shall make every reasonable effort to ensure that beyond the omission of the classified information, sensitive information, or of the specific piece of information corresponding to intellectual property, know-how or the results of innovation which constitutes trade secrets as defined in Article 2, point (1), of Directive (EU) 2016/943, the overall relevance of the disclosure in question is not impaired."	ESRS1	ESRS 1 - 7.8 Classified and sensitive information, and information on intellectual property, know-how or results of innovation	101.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Para 10 ESRS 1 determines that where a topic is not covered or not covered with sufficient granularity by an ESRS, the company shall provide additional entity-specific disclosures on that topic.Further, this disclosure requirement states that these may be topics not covered by the ESRS. However, this imposes high legal undertainty for companies as (i) it is not clear for companies which further topics qualify as "suatainability topics" as the definition provided for in the CSRD is very vague and (ii) it is also not clear which information shall be disclosed for such additional sustainability topics.Thus, we urge EFRAG to limit the disclosures under the ESRS to the topics defined in the ESRS. Consequently, para 10 ESRS 1 shall be deleted.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	10.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	See comment above re entity-specific disclosures. Thus, para 11 ESRS 1 shall be deleted.	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	11.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	See comment above re entity-specific disclosures. AR 1 ESRS 1 to be deleted.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	AR 1
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	See comment above re entity-specific disclosures. AR 2 ESRS 1 to be deleted.	ESRS1	ESRS 1 - 1.1 ESRS standards, reporting areas and entity-specific disclosures	AR 2
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I agree	We welcome the clarification that companies are not required to assess every possible IRO across all areas of its operations and upstream and downstream value chains to identify the topic to be reported on. This gives companies more leeway when conducting the DMA and saves valueable resources.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	46.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I agree	We welcome the clarification that qualitative information may be sufficient to conclude that an IRO is material or not as the collection of quantitative information in certain cases constitutes an undue burden for companies.	ESRS1	ESRS 1 - 3.5 Practical considerations in determining the material impacts, risks and opportunities and their associated topics to be reported	AR 19
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	While we welcome EFRAG's clarification that it is up to the companies to decide on the appropriate level of (dis-) aggregation, we sugegst removing the examples for potential (dis-) aggregation as this still gives the impression that disaggregation at certain level is required. This holds in particular true for the disaggregation by location, water basin, site, asset etc. The CSRD report is intended to give the users of the CSRD report an understanding on the company's material IROs - We do not see the necessity to provide information diaggregated to a location or water basin level. We disagree with EFRAG's conclusion that this does not add any further buden on companies and therefore suggest keeping the current language. The same applies to the corresponding AR which recite this language.	ESRS1	ESRS 1 - 3.7 Level of aggregation, disaggregation and group reporting	51.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While the sentence "ARs also include text where the term 'shall consider' is used to indicate issues, resources or methodologies that the undertaking is expected to take into account or to use in the preparation of a given disclosure. " tries to specify the use of "shall consider", it is a contradiction ot para. 5 where it states that "The ESRS do not mandate behaviour [...]". A "if applicable" should therfore be added. Additionally, "shall consider" is not consistently applied as sometimes only "shall" is used (eg. ESRS E1 Ar 4 and 5).	ESRS1	ESRS 1 - 1. ESRS Standards, reporting areas and drafting conventions	15.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	It remains unclear who "primary users", "users of general purpose sustainability statements" refer to and at what point an information is considered "necessary". The proposed wordings risks an expansion of the information provided by companies as sustainability information might be interesting for a very broad group of users. "Decision-usefulness" should be key for sustainability information as well.	ESRS1	ESRS 1 - 3.1 Materiality of information as a general filter for reported information	21.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	"Where the impact is deemed material based on this assessment, the undertaking shall disclose the remediation actions undertaken and their expected or actual outcomes. " The wording indicates a disclosure requirement of remediation actions on level of each material impact. Deletion or rephrasing should be considered.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	34.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	"[...] if the undertaking needs to maintain significant ongoing mitigation and/or prevention actions". It is unclear how "significant ongoing mitigation actions" should be interpreted. Further clarification is needed.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The examples are not very helpful as these are rather obvious connections. However, the supply chains of mulitnational companies are much more complex. Including examples should not be part of the disclosure requirements but could be part of the NMIG and should be deleted here.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 6
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The Appendix C should be deleted as it rather adds complexity to the topic and might require additional documentation effort as part of the audit procedures.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 9
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The part"Under the CSRD, the management of the undertaking shall inform the workers' representatives at the appropriate level and discuss with them the relevant information and the means of obtaining and verifying sustainability information. The workers' representatives' opinion shall be communicated, where applicable, to the relevant administrative, management or supervisory bodies." should be deleted. This is part of level 1 legislation. Additionally, it seems to indicate behavioural obligations going against para. 5.	ESRS1	ESRS 1 - 3.3 Double materiality assessment	AR 11
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Suggestion to delete Application Requirement as it does not add any additional value / insights to the reporting requirements.	ESRS1	ESRS 1 - 5.2 Inclusion of value chain information	AR 28
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	It is unclear what is meant with "signficant events" and what exactly needs to be disclosed. Suggestion to either delete or further clarify paragraph.	ESRS1	ESRS 1 - 5.4 Relief for acquisitions and disposals	73.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	This requirement is not a relief but constitues a behavioural obligation. it should therefore be deleted and the initial paragraph 85 should be reintegrated: "Sometimes, it is impracticable to adjust comparative information for one or more prior periods to achieve comparability with the current period. For example, data might not have been collected in the prior period(s) in a way that allows either retrospective application of a new definition of a metric or target, or retrospective restatement to correct a prior period error, and it may be impracticable to recreate the information (see ESRS 2 BP-2). When it is impracticable to adjust comparative information for one or more prior periods, the undertaking shall disclose this fact."	ESRS1	ESRS 1 - 7.1 Presenting comparative information	84. (c)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Reasonable and supportable information is subject to the interpretation of auditors. A clear definition is missing otherwise it undermines the level playing field and will be applied unevenly.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	88.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	A "balanced consideration of the costs and efforts" is subject to companies and auditors interpretation. If at all, the relief might be helpful for wave 2 companies but at what point is a multinational company able to use this argumentation? Introducing this concept on a broad scale might also reduce the comparability and availability of sustainabiltiy data.	ESRS1	ESRS 1 - 7.3 Use of reasonable and supportable information that is available without undue cost or effort 18	89.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Reporting only partial scopes without clear guidance risks to reduce the comparabiltiy and availability of sustainability of data.	ESRS1	ESRS 1 - 7.4 Reliefs for metrics	91.
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I disagree	From the proposed wording we see a risk that companies would not be required to disclose the baseline and base year for their ghg targets, which we consider essential information for stakeholders. We recognise that a target to reach a particular level (eg 100% renewable energy) does not need a baseline or base year, but we think "where applicable" needs some clarification to ensure it's not mis-interpreted or mis-used. We see two options to remedy this: 1. use a general clarification in ESRS-2, that would be suitable for targets in all sustainability topic areas by clarifying in ESRS-2 para 43(d) what is meant by where applicable eg "disclosure of baseline value and base year is applicable where a target is a % change, but may not be applicable where a target is to reach a defined level of threshold." 2. clarify this point specifically for ghg targets in ESRS E1 by reinstatging part of para 34 (c) in the current version. Specifically reinstate the following text (c) the undertaking shall disclose its current base year and baseline value.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (d)
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	There is no mention in the exposure draft of targets with different time horizons. Climate targets, and most other types of sustainability targets, can be set for short-, medium- or long-term, with each time horizon serving a useful but different purpose. We note that short/medium/long-term are mentioned in AR16 regarding financial performance and cashflows, and that target period dates are required in para 43 (e). However we think the expectation to set and disclose targets with all time horizons should be noted in the chapeau text in para 43, to signal that targets over all time periods are important. We propose adding "for the short-, medium- and long-term" at the end of the first sentence. Alternatively, this point could be addressed by adding "short-, medium- and long-term" with reference specifically to climate/ghg targets into ESRS E1. For reference: see mapping of transition plan guidance and frameworks by Exponential Roadmap Initiative (https://exponentialroadmap.org/wp-content/uploads/2024/02/Transition-plan-elements-mapping-ERI.pdf) which shows that all the frameworks analysed required short-, medium-, and long-term absolute CO2 emissions reduction targets.	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	ASD					I disagree	Board's gender diversity ratio should be calculated as percentage of female members over total board members, instead of average ratio of female to male board members.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	AR 2.
Excels	ASD					I agree	We called to align reporting of strategy and IRO's to be treated in the same way for all topics, clarify/simplify structure, harmonize requirements, avoid double requests (in ESRS 2 and topical standard). Structure has been simplified, with IROs (policies and actions) left for topical standards. In addition, E1 requires to report on climate strategy. IROs (description of impacts, risks and opportunities) can be disclosed in the same location as related policies, actions, targets and metrics. This alignment avoids duplications and improves readability. We welcome EFRAG proposed change.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	8.
Excels	ASD					I partially agree and partially disagree	Datapoint 37.b (on the time horizons under which the undertaking intends to complete each key action) was amended, but it only specifies that the timeframe is the reporting year. We suggest to make it voluntary	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	37.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	This rationale seems to be included to manage (IG3) perception. It does not have a real implication, except in the case of none of the provisions applying. To be meaningful the list under (ii) will need to be tagged individually in any case. Just providing a "list" does not allow for explanations (for example, current para. 9) "Please note that each of the elements in this list is not considered as a separate datapoint. Each of them is conditional to the undertaking being in the relevant fact pattern. At aggregated level they constitute one piece of information, i.e. the basis for preparation."	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	This part of the phrase seems to be repeating the same thing: "including the reasonably expected time horizons for those effects, including the time horizons (short, medium or long term) for which those effects could reasonably be expected to occur". To be consistent, this explanation should also apply to datapoint 23b: ESRS E1 paragraphs 66 and 67 do not require a breakdown of monetary amount figures by the three time horizons. It rather requires the disclosure of a monetary amount that is the result of cumulative financial effects assessed for each of the time horizons (short-, medium- and long-term). EFRAG Q&A ID 422 Suggested wording: the cumulative anticipated effects of the undertaking's material risks and opportunities on its financial position, financial performance and cash flows over the short-, medium and long-term, including the reasonably expected time horizons for those effects (short, medium or long term),	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	The obvious choice is Option 1 since this is a key information for investors, a key component of the Green Deal (to redirect capital) and a key prerequisite to help companies to increase awareness and resilience. Given the phase-in provisions, the option to report either single amounts or ranges (AR 18 for para. 23), and the possibility to explain why the information has not been provided, the burden is proportionate. In addition, there is now AR 15 for para. 23. In preparing disclosures about its anticipated financial effects, an undertaking shall use reasonable and supportable information available to it at the reporting date without undue cost or effort (see paragraphs 88, 89 and 90 of ESRS 1).	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	CLEERIT	Consultant (including software vendor)	France			I disagree	I disagree not to provide the option to state the "lack of skills" as a reason to omit quantitative information. It would be better to let the preparer be transparent and provide the real reason. The explanation "when there is no reasonable and supportable information derived from its business plans to be used as input in the calculation of anticipated long-term financial effects" could potentially be used too broadly and also disguise a lack of skills as a reason to omit quantitative information. Tranparency would be enhanced if the two choices were provided and accounted for.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Does the addition of "which interact" mean that material IROs can sometimes not interact with business model or strategy, and therefore not require addressing? The same question goes for the rationale for the new DP 24 - "Better specified that the related information should be disclosed only in relation to material risks with implications with strategy and business model (not in relation to all risks), in line with the provision of CSRD art. 19 (a). This is to support more focused reporting and avoid unnecessary details." In which circumstances would a material risk not have implications for business model?	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 14
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	There is a need to clarify the object of decision-making procedures - it's currently to vague and could potentially imply any decision-making in the company. Suggested wording: "a description of the decision-making procedures related to the process through which the undertaking identifies impacts, risks, opportunities, and the related topic and assesses their materiality, as the basis for determining the disclosures to be made in its sustainability statement; and"	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	26. (g)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	So, what exactly is different when disclosing para 26 (d), compared to IRO-1 and SBM-2 and ESRS S1-S4?	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	By including a description, not only of WHERE but also HOW IROs are connected to its business model, its own operations and its upstream and downstream value chain, the information overlaps the information asked for in SBM-3 (new DP 22) "high-level description of the interaction of the material impacts, risks and opportunities with its business model, value chain". Suggestion: take out "and how" from this paragraph.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Suggested wording: "if the undertaking is connected through its own operations or upstream and downstream value chains to material impacts, risks and opportunities related to forced or compulsory labour or child labour, serious security violations related to workers, use of undeclared labour, serious violations related to environmental laws and regulations as well as serious violations related to corruption and bribery, it shall disclose this exposure to the heightened risk of incidents by type of operations (such as manufacturing plant), or by countries or geographies with operations, with a clear reference to the corresponding actual or potential negative material impacts, risks and opportunities reported under 28a." This is a very useful addition as it prevents greenwashing by shedding light on the most important IRO related facts, without having to go through the entire report. In my opinion it should extend a bit further than child and forced labour, to reflect serious viotations accross S, but also E and G, to avoid seriously misleading sustainability statements such as that of the group LVMH in Italy for FY 2024. It's not compatible with the underlying values of the Green Deal to leave it up to law enforcement in MS only to deal with this.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (e)
Excels	CLEERIT	Consultant (including software vendor)	France			I disagree	The rationale to merged all provisions if the undertaking has not adopted PAT, will complicate reporting for companies managing on IRO or groups of IROs level. Very often there are actions but not articulated policies and targets for example. So the option to separate policies, actions and targets is needed.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	30.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	This should be an AR ("the way disclosures are structured and presented may reflect this approach"), the preparer likely would not know what specific information to put here if it is a separate datapoint.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	31.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	The current wording implies that PATs would only address impacts to address risks (not to address stand-alone impacts, should they exist). Suggested wording: "its policies, actions and targets which address the prevention, mitigation and remediation of actual and potential material impacts, and/or to address material risks and/or to pursue material opportunities; or"	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	32. (a)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	IROs as such cannot progress. Outcome in relation to targets set in relation to IROs can progress. Suggested wording: "the metrics to assess progress over time in relation to prevention, mitigation and remediation of its material impacts, and/or management of risks and/or pursuit of opportunities."	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	32. (b)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	34f, "if relevant, whether and how the undertaking makes the policy available to potenpally affected stakeholders, and stakeholders who need to help implement it" should not be deleted. If an affected stakeholder is not able to understand if the policy is effectively communication, how can it consider that the policy can be respected? CSRD explicitly spells out that an accountability deficit could lead to lower levels of citizen trust in businesses, which in turn could have negative impacts on the efficient functioning of the social market economy (14), and that (18) disclosing on sustainability matters is justified by concerns about the impacts and accountability of the undertaking (18).	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	34.
Excels	CLEERIT	Consultant (including software vendor)	France			I disagree	A boolean DP (whether) will complicate the structure of a generic GDR-P. Suggestion: transform the instruction on how to disclose into an AR for paragraph 34, and create a separate datapoint 9 in G1-1 to disclose whether such an overarching human rights policy exists or not. Suggested wording: AR for paragraph 34: If the undertaking has an overarching human rights policy committing to implement the UN Guiding Principles on Business and Human Rights, ILO Declaration on Fundamental Principles and Rights at Work and the OECD Guidelines for Multinational Enterprises, it shall disclose the information according to the provision defined in paragraph 34. The human rights policy shall specify which groups of affected stakeholders are covered (for example, own workforce and workers in the value chain being distinct from consumers and endusers). And change AR 30. for para. 35 to AR 30. for para. 34	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	CLEERIT	Consultant (including software vendor)	France			I disagree	Create a separate datapoint 9 in G1-1: "In addition to the information required by [Draft] Amended ESRS 2 GDR-P, the undertaking shall disclose whether it has an overarching human rights policy committing to implement the UN Guiding Principles on Business and Human Rights, ILO Declaration on Fundamental Principles and Rights at Work and the OECD Guidelines for Multinational Enterprises."	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	This information should not be deleted: "(e) information regarding the progress of key actions underway and disclosed in prior periods and, if relevant, key actions taken in the reporting year ". Not disclosing on progress, especially for policy goals and key actions without metrics (which is a very common scenario), would result in descreased accountability and increased risk of greenwashing. Just reporting action information, without referens to qualitative progress and/or success, does not give enough information. You can take action, but if the intended outcome is not there, information on the action is much less meaningful. The rationale to reduce granularity is not a priority for this information. CSRD explicitly spells out that an accountability deficit could lead to lower levels of citizen trust in businesses, which in turn could have negative impacts on the efficient functioning of the social market economy (14), and that (18) disclosing on sustainability matters is justified by concerns about the impacts and accountability of the undertaking (18).	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Does this apply separately for each scope 3 category and pollutant, for example?	ESRS2	ESRS 2 - General for metrics - GDR-M	AR 37.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Suggestion: add "or desired outcome" for qualitative targets, as a target can be to conduct an audit within a certain time frame, or similar (that will be tracked with action status progress). Suggested wording: "the defined target value (or level or desired outcome when qualitative) to be achieved, including, where applicable, whether the target is absolute or relative and in which unit it is measured;"	ESRS2	ESRS 2 - General for targets - GDR-T	43. (b)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Suggestion: add "where applicable," to potentially exclude qualitative targets that will be fullfilled by carrying out actions (see comment above on 43b). Suggested wording: "where applicable, the methodologies, significant assumptions used to define targets, whether the target is required by law, the selected scenarios on which it is based, the key data sources and the level compatibility with national, EU or international policy goals"	ESRS2	ESRS 2 - General for targets - GDR-T	43. (f)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	See ESRS 1-22 Suggested wording: "The description of the interaction of impacts, risks and opportunities with the undertaking's business model, value chain, strategy and decision-making shall be provided at the appropriate level of aggregation, either for groups of negative impacts, positive impacts, risks or opportunities levels, or at individual negative impact, positive impact, risk or opportunity level, depending on the nature of the impacts, risks and opportunities to reflect the level at which the undertaking manages them."	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 12.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	See ESRS 1-22 Suggested wording: "The description of its material impacts, risks and opportunities shall be provided at the appropriate level of aggregation, either for groups of negative impacts, positive impacts, risks or opportunities levels, or at individual negative impact, positive impact, risk or opportunity level, depending on the nature of the impacts, risks and opportunities and reflecting the level at which the undertaking manages them."	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 23.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	There is no choice for para. 2, so I chose the closest to suggest this wording: 2. This standard refers to disclosing on material impacts, risks and opportunities and disclosing on the topics related to them. In accordance with ESRS 1, the undertaking is expected to focus on the disaggregation that provides the most relevant information, i.e. at individual impact, risk and opportunitie level, or at groups of negative impacts, positive impacts, risks or opportunities level, reflecting their nature and how the undertaking manages them." See comment for ESRS 1-22 for rationale.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	3.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Suggested wording: "The objective of this DR is to provide an understanding of the interactions between the undertaking's material impacts, risks and opportunities, and its strategy and business model, at the appropriate level of aggregation, i.e. individually or aggregated at groups of negative impacts, positive impacts, risks or opportunities level, including financial effects." See comment for ESRS 1-22 for rationale.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	Suggested wording: "The undertaking shall apply the requirements provided in this section, when it discloses either in accordance with a topical standard or on an entity-specific basis, on policies, actions, targets and metrics related to material impacts, risks and opportunities, either individually or at a higher level (i.e. aggregated at groups of negative impacts, positive impacts, risks or opportunities),". See comment for ESRS 1-22 for rationale.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	32.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	DP 34 specifies that "information about policies adopted to manage material impacts, risks and opportunities" (not topics), which is correct. The aggregation level should reflect this. See comment for ESRS 1-22 for further rationale. Suggested wording: "(i.e. aggregated at groups of negative impacts, positive impacts, risks or opportunities)"	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	33.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	DP 37 specifies that "then the undertaking implements key actions to manage material impacts, risks and opportunities". The aggregation level should reflect this. See comment for ESRS 1-22 for further rationale. Suggested wording: "(i.e. aggregated at groups of negative impacts, positive impacts, risks or opportunities)"	ESRS2	ESRS 2 - General for actions and resources - GDR-A	36.
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	DP 40 specifies that "the undertaking shall disclose the metrics … in relation to material impacts, risks and opportunities". The aggregation level should reflect this. See comment for ESRS 1-22 for further rationale. Suggested wording: "(i.e. aggregated at groups of negative impacts, positive impacts, risks or opportunities)"	ESRS2	ESRS 2 - General for targets - GDR-T	38.
Excels	Chamber of Labour, Austria	Trade union	Austria			I partially agree and partially disagree	The ESRS 2 GOV1 provides: "(…) composition of its administrative, management and supervisory bodies, (…) where it exists, the representation of employees and other workers, and the percentage by gender and by other aspects of diversity that the undertaking takes into account". With regard to the last half-sentence ("percentage by gender"), it should be noted that legally binding quotas for women have been set in several EU MS, and if such a quota exists in concrete terms, this fact should also be mentioned in the report.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (a)
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	Information on "(…)whether and how stakeholders have been involved in target setting for each material sustainability matter; (…)" have been moved from ESRS 2 to social issues. The BAK cannot understand this consideration, as the goal-setting process includes not only purely social issues, but also environmental and sustainability issues. Therefore, this regulation must be revised.	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	The data point on "stakeholder engagement", especially for employee representatives, must remain at all costs, especially since it is also provided for in the CSRD.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	Chamber of Labour, Austria	Trade union	Austria			I agree	From the BAK's point of view, it is essential to report on how the positions of the employee representatives have been taken into account by the decision-making bodies of the companies.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Redundant regarding SBM and PAT (it is expressed in the topical standards) => to be simplified.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Redundant regarding SBM and PAT (it is expressed in the topical standards) => to be simplified.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (d)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Lack of a common methodology: It is proposed to eliminate the disclosure of information about representation of employees and other workers, as this figure does not exist or is not legally recorded in several European Union countries, meaning that it is meaningless in comparative terms and does not provide any useful information to the user. The disclosure of the percentage of independent board members is not feasible. Given that this is not a generalised obligation for all companies subject to the CSRD, and taking into account that the comparability of the indicator is limited, maintaining this datapoint would not provide homogeneous value to the analysis. For this reason, it is proposed that it be eliminated. Also redundany with possible remuneration and corporate governance reports should be taken into account. The disclosure of Board's gender diversity ratio ist redundant with Directive 2022/2381 (article 7). More flexibility should be granted depending on the legal form and the associated company structure	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Redundant: Usually the annual corporate governance (management) report has this information. More flexibility should be granted depending on the legal form and the associated company structure	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Too granular information partially covered by other DPs; There is also an element of redundancy (management report); Concerns on added value of the disclosure (suggestion of taking a broader view and merging different indicators). More flexibility should be granted depending on the legal form and the associated company structure	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (d)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Redundant with the remuneration report requirements in listed companies under the Shareholders Rights Directive (articles 9a and 9b).	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Redundant with the remuneration report requirements in listed companies under the Shareholders Rights Directive (articles 9a and 9b).	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Business sensitive information; Redundancy with Supervisory Board Report (part of Management Report).	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Check redundancy with remuneration report obligations under the Shareholders Right Directive.	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Still redundancy or contradictions with other DRs/DPs, disproportionate costs and lack of a common methodology. Instead of an overarching disclosure obligation, topic-related due diligence disclosures should be anchored.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Important improvements. Information on the value chain of companies is currently very limited and there is a lack of a clear methodological basis for doing and publishing this exercise. The requested breakdown is not a problem, the problem is the different workload required depending on the extent of the value chain covered.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	18.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Data points for which phase-ins are planned should be omitted entirely or become voluntary.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	6.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The reporting requirement makes the stakeholder engagement indirectly binding. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no dtructured engagement takes place should be introduced.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The information should be summarized with ESRS 2 -SBM-1 to avoid duplication.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	The reporting requirement makes the implementation of a resilience analysis indirectly binding. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no resilience analysis has been carried out should be introduced - A reference to ESRS E1-3should be introduced.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	Telefónica, S.A.	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Against simplification. This new requirement would impose a disproportionate burden on companies, particularly when impacts extend across multiple geographic areas. Climate change-related impacts, for example, can span thousands of locations. Gathering this information would represent an excessive workload, and we do not believe the value it might provide to report users justifies the effort involved.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E2.IRO-1 §11(a), AR 1-8 – Methods & tools to identify pollution impacts/risks/opportunities Allow incorporation by reference to existing site selection/screening methodologies and risk tools documented for regulatory permits (IED) or Taxonomy DNSH. It cuts duplication; leverages audited/regulated files; keeps ESRS narrative focused.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	11. (a)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E2.IRO-1 §11(b) – Stakeholder consultation (pollution) Accept a short process statement with a pointer to formal permitting consultations or public inquiries where applicable; no need to repeat minutes/verbatim. Reduces redundancy; relies on formal processes already conducted for permits.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	11. (b)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Add an AR under IRO-2 (or in "General PAT" section) expressly allowing incorporation by reference to: (a) EU Taxonomy evidence (TSC/DNSH/MS), (b) IED/E-PRTR registers, (c) other competent-authority portals—provided the report includes a content index. (ESRS 2 already allows a content index and co-location; this simply makes the regulatory link explicit.)	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	26. (e)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Add an AR under IRO-2 (or in "General PAT" section) expressly allowing incorporation by reference to: (a) EU Taxonomy evidence (TSC/DNSH/MS), (b) IED/E-PRTR registers, (c) other competent-authority portals—provided the report includes a content index (page/paragraph/URL) and a note on any perimeter differences. (ESRS 2 already allows a content index and co-location; this simply makes the regulatory link explicit.)	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	27.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Insert a short, standardised "PAT→KPI (Article 8 Taxonomy)" bridge requirement in GDR-A/GDR-T (or by reference from topical standards), with permission to reuse the Article 8 KPI tables and CapEx Plan schedules, and to note the OpEx non-material situation (numerator = 0 + explanation) exactly as in Article 8.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	29.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Disclose once; cross-reference thereafter: if a topic (e.g., Pollution E2) is developed in its topical section (policies, actions, targets, metrics), ESRS 2 should not require re-stating the same policy narrative. Proposal : add new AR under GDR-P and a sentence in IRO-2 / PAT section) "Where a policy applies to multiple topics (e.g., pollution and water), the undertaking shall disclose it only once in the sustainability statement, at the place where it is most decision-useful (typically the topical section), and shall cross-reference it from ESRS 2 and any other relevant locations via the content index. ESR 2 should not require policy repetition if a full disclosure is provided later in the report." Aligns with the NMIG (policies can cover several topics and be disclosed once). Uses ESRS 2 AR 24/26 (aggregation/co-location) and AR 22 (content index) that already enable cross-reference.	ESRS2	ESRS 2 - General for policies - GDR-P	33.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	To enhance assurance and decision-usefulness, we propose a short PAT→KPI (Article 8) bridge in ESRS 2 GDR-A/GDR-T. Undertakings would map key actions/resources/targets to Taxonomy KPIs (turnover/CapEx/OpEx) and, where applicable, the CapEx Plan; they would also be allowed to indicate the OpEx non-material situation with the explanation required by Article 8 Creates a single line-of-sight from actions/targets to regulated KPIs.	ESRS2	ESRS 2 - General for targets - GDR-T	42.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Issue : scope should follow financial statements; going beyond is hard to operationalise. Proposal : Keep financial-control perimeter as default; where a different perimeter is used, require a short reconciliation note (why, direction, magnitude) and explicit cross-reference to the affected topical disclosures. Allow a one-row "options used" table (phasing, omissions, confidentiality, events after reporting date) rather than narrative. Draft wording: "Where the sustainability statement reporting boundary differs from the consolidated financial statements, provide a concise explanation and reconciliation; present ESRS 1/2 in a tabular index rather than narrative."	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (i)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Where climate-related information is already evidenced through files prepared to demonstrate conformance with the Climate/ENvironmental Delegated Act's technical screening criteria (for example, for real-estate and construction activities in the climate mitigation annex), explicitly allow incorporating those by reference, instead of reproducing the same calculations in ESRS 2. When sustainability information is derived directly from EU Taxonomy Delegated Act evidence, explicitly allow referencing rather than recreating parallel computations in ESRS 2. This is consistent with the C/EDA's role and with the Official Journal amendment to 2021/2178 on specific public disclosures. Why: Avoids double work between ESRS and E/C DA files; keeps the sustainability statement anchored to official EU thresholds/criteria.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Where Board oversight and incentive linkages include Climate / Environmental Delegated Act-relevant topics (energy, water, circularity, pollution, biodiversity), allow a crisp cross-reference to the C/EDA evidence pack (e.g., a biodiversity no-go site checklist or a pollution-prevention DNSH protocol) rather than re-describing controls twice.	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	29.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	In the phased value-chain approach, allow the Phase-1 qualitative mapping to name which value-chain stages are already covered by Climate and Environmental Delegated Act TSC/DNSH procedures (e.g., hazardous-substance restrictions, end-of-life preparation for reuse/recycling, biodiversity-site exclusions) and point to the EDA files in the content index.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	18.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Where regulatory consultations or public participation processes linked to permitting (e.g. under IED, biodiversity or land-use regulations) have already gathered stakeholder input on topics relevant to the undertaking's material impacts, risks or opportunities, the undertaking should explicitly be allowed to refer to those processes and the corresponding public register or docket. In such cases, there is no need to duplicate the consultation outcomes or minutes under this Disclosure Requirement, provided that the process and relevance to the business model are clearly explained.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	21.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	SBM-3 — Interaction with strategy and financial effects (§21–24; AR 12–18) Refine: When explaining anticipated financial effects of climate-related impacts, risks and opportunities, connect them through a single bridge table to: - Article 8 key performance indicators (turnover, capital expenditure, operating expenditure), and, where applicable, the "CapEx Plan"; - Climate/ENvironemental Delegated Acts activity as evidence that underpins the strategy or target (for example, capital programmes to meet technical screening criteria at handover).	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I agree	If quantification is not decision-useful due to high measurement uncertainty, ESRS 2 already allows a qualitative path (Option 2), which we recommend keeping.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	4. (b)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	IRO-1 — Process to identify and assess material impacts, risks and opportunities (§25–26; AR 19) Proposal : Name explicitly the Climate Delegated Act's adaptation workflow (the risk and vulnerability assessment steps for physical climate risk) as an accepted methodology for the identification and assessment of climate-related physical risks in the undertaking's own operations and value chain. Incorporate by reference to the underlying assessment document and any resulting adaptation measures.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	RO-2 — Material IRO & Disclosure Requirement index (content index) (§27–28; AR 20–23; NMIG 11–13) Proposal : Add a dedicated "Taxonomy evidence" subsection that lists, side by side, Climate Delegated Act items (mitigation/adaptation) and Environmental Delegated Act items (water, circular economy, pollution, biodiversity): objective → activity → evidence location; and show which topical ESRS disclosures are satisfied via cross-reference to those files.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	28. (a)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	GDR-P — Policies (§33–35; AR 28; NMIG 14–16) Proposal : Where a single policy covers multiple environmental topics that are also framed by the Climate Delegated Act (mitigation and adaptation) and/or the Environmental Delegated Act (water, circular economy, pollution prevention and control, biodiversity), disclose it once in the most relevant topical section and do not repeat it in ESRS 2. Include a cross-reference and list it in the content index. Where the policy's operative thresholds or tests are those of the EU Taxonomy delegated acts, refer to the official evidence file rather than copying thresholds.	ESRS2	ESRS 2 - General for policies - GDR-P	34.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	GDR-A — Actions and resources (§36–38; AR 29–31) Proposal : Add the explicit reference bridge that maps: - action or resource to the relevant Article 8 indicator (turnover, capital expenditure, operating expenditure) ; and - the Taxonomy delegated act objective and activity, including a reference to the evidence type (for example, "energy performance test file for new building activity; adaptation risk and vulnerability assessment output").	ESRS2	ESRS 2 - General for actions and resources - GDR-A	36.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	GDR-M — Metrics (§39–41; AR 32–33) For climate performance thresholds that are defined by the Climate Delegated Act (for example, energy performance thresholds for new buildings and related commissioning or testing steps), allow the sustainability statement to reference the evidence package and provide only the short method note that ESRS 2 requires (unit, method version, assumptions), rather than duplicating calculations	ESRS2	ESRS 2 - General for metrics - GDR-M	AR 34.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	GDR-T — Targets (§42–44; AR 34; NMIG 18–19) When a target is intentionally calibrated to pass a Climate Delegated Act criterion (for example, achieving a specific primary energy demand level at handover, or implementing a set of adaptation measures identified by the risk and vulnerability assessment), permit a direct cross-reference to that file and a short note covering baseline, scope and timing. Where data are still maturing, keep the phased target option (method and baseline first, quantified target next), while ensuring the Article 8 linkage remains visible in the bridge.	ESRS2	ESRS 2 - General for targets - GDR-T	42.
Excels	BDEW	Other - please specify (required)	Germany			I disagree	It is unclear whether the requirement to carry out a LEAP assessment or a similar assessment of one's own locations remains for the DMA of topics E2-E4. The wording of AR 22, "when" and "useful reference," is not commonly used in ESRS 2.0 and is therefore open to interpretation. If a site-level analysis is not mandatory, AR 22 should be moved to the NMIG for consistency reasons	ESRS2	ESRS 2 - Objective	AR 22.
Excels	BDEW	Other - please specify (required)	Germany			I partially agree and partially disagree	BDEW supports flexibilty (may) amendment to disclosure DR in form of a table.	ESRS2	GOV-3 - Statement on due diligence	AR5 for para 13
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Risk management should not be part of GOV-4, as it is already adequately covered and disclosed via financial reporting if environmental risk assessment is integrated in company wide risk assessment. GOV-4 should NOT refer to IRO management (as IRO-1 already requires comprehesive disclosure on IRO management). BDEW supports reduction of scope of GOV-4 to ICS processes for quantitative disclosures for sustainability reporting.	ESRS2	GOV-4 - Risk management and internal controls over sustainability reporting	para 14 / 15
Excels	BDEW	Other - please specify (required)	Germany			I disagree	"undue cost or effort" exemption is not helpful and is unlikely for undertakings in the ESRS regime to be able to refer to this relief.	ESRS2		AR 15 for para 23
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Future concept with a lot of unsecurity. ISSB did not consider critical feedback and recent training paper uses over-simplified examples. Feasibility for more complex companies is not given. In this aspect, the development should be rather focused on CSRD and not on ISSB.	ESRS2	SBM-3 - Interaction of material impacts risks and opportunities with strategy and business model, and financial effects	23
Excels	BDEW	Other - please specify (required)	Germany			I disagree	Clarification that no reporting obligations or more extensive evidence requirements at site/location level (e.g., specific listing/specification of analysis factors or variables per site/location) result for IRO-1.	ESRS2	IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22 for para 26(a)-(g)
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I disagree	Eliminate the requirement that companies that determine climate change is immaterial provide "the basis for" such conclusion. As further detailed in our concurrently submitted comment letter, this requirement is inappropriate as it seeks disclosure regarding and justification of a lack of materiality and runs contrary to European (including the ESRS generally), US, and international regulatory reporting requirements and voluntary reporting standards that seek disclosure of company-specific material information. Climate change should be treated in the same manner as other sustainability topics – disclosure should not be necessary if the topic is not material to the company. This special treatment for climate change implies a presumption that climate change is a material topic for all entities reporting under the CSRD, effectively pressuring entities to conclude that climate change is material without regard to the reporting entity's specific facts and circumstances. In practice, the existing presumption under CSRD has resulted in companies defaulting to reporting, or planning to report, on climate change regardless of the outcomes of their internal materiality analysis. Assurance providers advising companies on their expected assurance approach have generally indicated an unwillingness to have climate change excluded from companies due to this default presumption of materiality.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I disagree	Eliminate the requirements to disclose CapEx and OpEx on actions taken by the reporting entity to manage material sustainability matters. The revised requirements continue to present the challenges for companies previously flagged by the Society. This information may be commercially sensitive and, if disclosed, could compromise a company's competitive position by providing insights into its cost structures and operational priorities – information that competitors could use unfairly to their advantage. Companies may also face significant challenges when seeking to quantify, produce, and maintain the requested level of financial disclosures, increasing their administrative burden. This detail is also unnecessary for stakeholders to understand a company's sustainability-related IROs, where the action is already described and the expenditures are not material, and would not provide meaningful insight into the effectiveness of actions taken. These challenges persist even when companies are able to disclose a range, as such detail can still share competitive information and may ultimately be unhelpful to stakeholders (e.g., where the disclosed range is so expansive it provides limited or no sense of scale). In the event EFRAG determines not to eliminate these disclosure requirements, we recommend alternatives in our concurrently submitted comment letter.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	The term "reasonable and supportable," particularly "supportable," needs to be clarified as it could be interpreted as requiring a level of validation or the implementation of governance and control processes that would defeat the term's intended purpose of providing relief to undertakings in situations where the available data is imperfect (see IFRS's Sustainability Reporting Standards FAQs). Since these clauses relate to the inclusion of information in the sustainability statement, "reasonable and supportable information" in this context should mean that the information is relevant and satisfies the fair presentation and qualitative characteristics of information requirements specified in ESRS 1. Such an approach is consistent with the acknowledgement in Section 7.2 of ESRS 1 that disclosed information is subject to the application of judgment, as well as measurement and outcome uncertainty.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	The current structure of the disclosure is overly complicated, with unclear sentence constructions that make it difficult to understand. It should be discarded or simplified.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	9.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	This section, transferred from GOV-4, is simplified but fails to explain what due diligence entails. It also lacks a reference to ESRS 1 and presents unclear expectations compared to the current ESRS standards. Paragraph 13 should include a cross-reference to ESRS 1 for clarity and alignment	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	It would be preferable to remove the phrase '…if the undertaking refers to this hierarchy in defining its actions' and instead require mandatory reporting according to the mitigation hierarchy for all actions related to the natural environment.	ESRS2	ESRS 2 - General for policies - GDR-P	37. (b)
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Suggest this is not may but shall for ease of comparability of the information	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	AR 5.
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Agree in substance but use of 'stakeholders', 'key stakeholders', 'affected stakeholders' and 'key affected stakeholders' is not consistent and needs an editorial check.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (a)
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	informed by due diligence process should be 'whether and how' not just whether	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (c)
Excels	Danish Institute for Human Rights	NGO	Denmark			I partially agree and partially disagree	Suggest turning into datapoint and amend text to highlight that social impacts eg on communities (s3) are also context / location specific	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I agree	Very important to keep reporting of workers' representatives, as in many Member States this is not a requirement to report in corporate governance statements	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I agree	It is crucial to keep this datapoint in on reporting on stakeholder engagement, particularly for workers' representatives, as this is a requirement in CSRD	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	European Transport Workers' Federation (ETF)	Trade union	Belgium			I agree	It is crucial to report how workers' representatives views have been taken into account by the undertakings' decision making bodies	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	Punto 3 S.r.l. S.B.	Consultant (including software vendor)	Italy			I agree	The amount of information requested and the level of detail on stakeholder involvement in the formulation of policies, actions, and objectives was a very complex issue in the data collection and reporting processes. The elimination of several requests on this subject was a welcome change that simplifies the reporting process, eliminating a disproportionate workload.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	20.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I disagree	We acknowledge that the financial effects disclosure requirement has been removed and consolidated under ESRS 2 SBM-3, which addresses financial impacts across all material topics in a cross-cutting manner. This consolidation allows for a more integrated and structured approach to financial risk management. However, it may reduce the visibility of pollution; water; biodiversity, Use of resources and waste specific financial effects, particularly in sectors with high environmental impacts and risk, and in the same way that have exposure to environmental regulations. While this change may simplify reporting, it limits users' ability to understand the potential financial risks associated with this environmental topics, such as regulatory liabilities, contamination-related costs, or opportunities linked to sustainable innovation. The absence of this requirement could weaken the connection between sustainability and financial performance, which was one of the core objectives of the ESRS. To preserve relevance and decision-usefulness, it may be helpful to recommend optional environmental specific financial disclosures, especially for high-impact sectors. This would ensure that critical risks and opportunities remain visible within the broader financial reporting framework.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	GKK Partners	Consultant (including software vendor)	Germany			I partially agree and partially disagree	Suggestion: 1) Presentation in a central tabular format - also for comparability. 2) If ESRS 1 "dilution" of "partial" metric disclosure is used by undertaking, an additional column in the 1) propsed table should be added. With this the user can see if a undertaking makes use of this "relief" and the danger to compare metrics of different sustainability statements (which have not the same basis: estimates/primary, full data) migh be lowered.	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- In paragraph 9 (b) it is unclear to us, whether we have to disclose a process, the outcome of the process or both. Clarification would be needed.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (b)
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- Paragraph 14 and 15 refer to the risk management for sustainability reporting (as in the original ESRS). However, as the risk management system and internal controls are usually two separate systems, a change in wording would be appreciated, to clearly state which system needs to be described.	ESRS2	ESRS 2 - GOV-4 - Risk management and internal controls over sustainability reporting	14.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- Paragraph 20: it is unclear to us, why workers' representatives are explicitly mentioned as stakeholder group.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	- Paragraph 24: Disclosure requirements about the resilience analysis are mentioned here AND in ESRS E1. It should be located in one standard only.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	- AR 22 gives the impression that companies have to conduct the DMA on site level, please re-word to avoid misconceptions.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I agree	The revised PAT show, that EFRAG understood reporting reality (e.g., the now explicitly mentioned possibility to use qualitative targets, to disclose headcount as resource). Also the amount of negative statements (we do not have, etc.) was significantly reduced	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	29.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	With regards to the composition of the administrative, management and supervisory bodies, we deem it important to retain prior mandatory data points on executive vs non-executive members (former paragraph 21 a). This is important information for understanding the governance of impacts and is consistent with GRI 2-9-c-i. As pointed out in the Basis for Conclusions, ESRS 2 GOV DRs are not fully covered by other legal requirements and not all undertakings under the scope of the CSRD are legally required to publish corporate governance statements and remuneration reports.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	With regards to the composition of the administrative, management and supervisory bodies, we deem it important to retain prior mandatory data points on member's experience relevant to sectors, products and geographic locations of undertaking (former paragraph 21 (c)) and how sustainability-related skills and expertise relate to material impacts, risks and opportunities (former paragraph 23 (b)). This is important information for understanding the governance of impacts. Proposed paragraph 9 b does not give information on the current competencies of members but only asks for information about the determination process. These two former data points could be merged and simplified in line with GRI 2-9-c-viii (member's competencies that are relevant to the impacts of the organization). A new AR could clarify that competencies relevant to the impacts of the undertaking include competencies relevant to impacts commonly associated with the undertaking's sectors, products, and geographic locations.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Paragraph 9 c asks for responsibilities in cases where responsibility for key decisions has not been delegated to another body. We deem it important to understand the process in cases where such responsibility has been delegated, in line with former paragraphs 22 (c), (c)i, and (c)ii and 26 (a). This is also in line with GRI 2-13. At a minimum, we suggest that this be retained in the NMIG.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (c)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We deem it important to retain prior mandatory data point on the purpose of stakeholder engagement (former paragraph 45 (a)iv). This is important information for understanding an organization's approach to meaningful stakeholder engagement and is consistent with GRI 2-29-a-ii.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	AR 11 for para. 20(a) explains that key stakeholders refer to key categories of 'affected stakeholders' (as defined in ESRS 1 AR 10). This can be confusing as stakeholders are defined in the glossary as 'those who can affect or be affected by the undertaking'. If paragraph 20 (a) focuses only on affected stakeholders (and not other stakeholders that can affect the undertaking), this should be clarified within paragraph 20 (a) itself. In addition, the qualifier 'key' stakeholders is not clear and it is not explained in the ARs. We suggest paragraph 20 (a) be reworded to ask for the 'categories of stakeholders' the undertaking engages with, which is in line with the wording of ESRS 1 AR 10 and GRI 2-29-a-i.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We deem it important to retain prior standalone mandatory data point on the process to identify, assess, prioritise and monitor potential and actual impacts on people and environment, informed by due diligence process (former paragraph 53 (b)). The proposed simplification and aggregation has lost crucial specificity, and the description of the process to identify impacts risks getting lost within a general description of the double materiality process. Retaining former paragraph 53 b is also consistent with GRI 3-1-a-i.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We deem it important to retain prior standalone mandatory data point on whether the undertaking is involved with the material impacts through its activities or because of its business relationships, describing the nature of the activities or business relationships concerned (former paragraph 48 (c) iv). The proposed wording in paragraph 28 (a) 'how and where impacts, risks and opportunities are connected to its business model, its own operations and its upstream and downstream value chain' is more general and may lead to less specific information. Retaining former paragraph 48 (c)iv is also consistent with GRI 3-3-b.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Punctuation is missing after 'material impacts', to clarify the distinction between policies, actions and targets for material impacts on one hand, and risks and opportunities on the other hand.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	32. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	It may be useful to clarify that the human rights policy commitment does not need to be reported for each material impact; rather a consolidated description of the human rights policy commitment and the affected stakeholders covered should be provided.	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We deem it important to retain prior standalone mandatory data point on key actions taken (along with results) to provide for and cooperate in or support the provision of remedy for those harmed by actual material impacts (former paragraph 68 (d)) within this DR. The inclusion of prevention, mitigation and remediation in paragraph 32(a) is not fully clear with regards to the status of these contents as data points in their own right. We suggest that actions to prevent and mitigate potential negative impacts on one hand, and to remediate actual negative impacts on the other, become standalone mandatory data points within paragraph 37, to ensure this information is not overlooked and can be easily identifiable by users and stakeholders. This would also support alignment with GRI 3-3-d.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We deem it important to retain prior mandatory data point on reporting progress/performance against targets (former paragraph 80 (j)). The rationale for its removals is that this is covered in the objective of the DR. However, it is important that this is stated as an explicit data point requirement so that it is not overlooked. This is also consistent with GRI 3-3-e-iii.	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	It should not be mandatory to report on current financial effects under CSRD, this will already be reported under financial reporting. Please avoid duplication of reporting efforts. Additionally, in the current Delegated Act, in the Exposure Drafts or NMIG- no guidance is given on how to calcute the financial effects. The DR in its current form should be clarified.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We welcome the removal of the requirement referring to the next annual reporting period with respect to current financial effects, as this requirement was previously methodologically unclear and difficult to distinguish from anticipated financial effects. However, we continue to see conceptual challenges in the definition of "current financial effects" of material risks by combining financial effects and risks within a single disclosure requirement. By year-end, risks have either materialized and led to financial effects or have not. If they have materialized we are of the opinion that disclosures of material financial effects are covered by respective IFRS standards. Given the lack of guidance on this topic, it should be clarified that qualitative information should be accepted. Also, we recommend aligning the sustainability reporting requirements with existing risk reporting standards, which should serve as the basis for such disclosures for all risks and not only ESG-risks. In our opinion, sustainability reporting should not override or extend these principles through financial disclosure requirements in the sustainability statement. We recommend that this disclosure requirement should be removed entirely or made explicitly optional.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The reporting instructions for policies on impacts only cover efforts regarding negative impacts ("prevention, mitigation or remediation"), please also give possibility to report on positive impacts (for example, "management")	ESRS2	ESRS 2 - General for policies - GDR-P	33.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We urge the removal of the implied mandatory disclosure requirement of all internal performance indicators (KPI) because the datapoint requests "shall disclose the metrics that it uses to evaluate its performance". This datapoint should only focus on the mandatory datapoints of the ESRS. The company has more KPI internally that are used for monitoring but these cannot all be made public.	ESRS2	ESRS 2 - General for metrics - GDR-M	40.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This datapoint actually holds 6 mandatory datapoints inside (1 methodology, 2 assumptions, 3 requirement by law, 4 scenarios, 5 data sources, 6 compatibility with national or international policy goals). Please simplify this datapoint to request only 'methodology' and make the additional 5 elements illustrations of what the undertaking may include.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (f)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The term "reporting boundary" seems to address under Par. 4 only the scope of consolidation but not the value chain. A definition of "reporting boundary" is both missing in ESRS 1 and the glossary. It would be helpful if a definition is provided to clarify what is meant by "reporting boundary".	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We would propose to list the different deviations (ESRS 2 - 5.(a)-(k)) in the order of appearance in the ESRS 1. This would further align the strcuture of ESRS 1 and the disclosures under ESRS 2. It would increase readability for the preparer as the exemption could be easier traced.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	The AR should be moved to BP-1 to follow the structure that each AR sits next to the respective DR is covers.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Unclear what is meant with "how the administrative, management and supervisory bodies determine whether appropriate skills and expertise are available". Is it sufficient to have a "competency profile" for the respective body/committee or is a descrpition of all sources for skills/expertise necessary (how can bodies leverage on existing expertise in- and outside of the company)? DR seems vague and not decision-relevant for users. Either delete the DR or replace it by a summary of the necessary skills and expertise necessary for the oversight of the strategies and other measures to respond to material IROs for each body.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	What is meant with "impacts' performance"? In the current Delegated Act, the DR focuses solely on "impact". Suggestion to delete "performance" to make the DR clearer.	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Datapoint should be deleted as a list of sectors does not provide any added value for external users (no decision-useful information). As there will be no sector-specific ESRS, details on significant sectors will not be provided by preparers (or only based on other frameworks such as SASB). If no clear provision on the use of a specific sector classification is given, the disclosures will be incomparable even within one industry (no added value for users). If NACE code as classification is used (as suggested by NMIG 5 for SBM-1) a reference to the financial reporting makes no sense as financial reporting is not based on NACE codes.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Datapoint should be deleted as a list of sectors does not provide any added value for external users (no decision-useful information). As there will be no sector-specific ESRS, details on significant sectors will not be provided by preparers (or only based on other frameworks such as SASB). If no clear provision on the use of a specific sector classification is given, the disclosures will be incomparable even within one industry (no added value for users). If NACE code as classification is used (as suggested by NMIG 5 for SBM-1) a reference to the financial reporting makes no sense as financial reporting is not based on NACE codes. Also EU Taxonomy might not fit properly in that classification.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 7.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	1. Deletion of the reference to sectors ("and on a sector") as there will be no sector-specific ESRS and the disclosure of a list of significant provides no added value for users (see comments on ESRS 2 Par. 17b and AR 7). 2. The order of the AR should follow the order of the DR. That means the AR 10 should be the first in the list. 3. In this paragraph is not clear if preparers need to report information also for group of products and services with less thank 10% revenues which could lead to overeporting; It would be better to restore the previous wording with an emphasis on "more than 10%".	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Not necessary to highlight "workers' representatives" as key stakeholders, as combination of datapoint and AR 11 clarifies the reporting on key affected stakeholders. "workers' representatives" should be deleted. Alternative: mention all categories of affected stakeholders as outlined in ESRS 1 AR 10.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We support the deletion of the mandatory disclosure requirements on antifipated financial effects.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 17.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	Very useful to allow the reporting on quantitative information- to be either in single amounts or ranges. For reporting on planning figures ranges are preferred as single amounts do not reflect the uncertainty attached to planning figures.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 18.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The term "negative impacts" should be used instead of "adverse impacts".	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The application requirement should be deleted as this could lead to unnecessary discussions with auditors on the level of detail to be included. If the ESRS requirements are clearly described, this AR should be redundant. It seems as if EFRAG is aware of the fact that the reporting on Par. 26a-e will most likely lead in many cases to boilerplate reporting of mostly useless information for users of sustainability statements. A technical description of the DMA process seems not to be really relevant for users.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The DMA process does not require the inclusion of site-level / location-based analysis according to ESRS 1. Why is this AR required? Should it clarify that this is additional information on the DMA in case site-level / location has been considered? We suggest to clarify the role of this AR and the link to the disclosures on the DMA and the DMA prcess requirements themselves.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Useful option to limit the reporting volume and to clarify PAT disclosures. Editorial remark: This AR should be put last as it refers to Par. 30 whereas all other ARs refer to Par. 29.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 27.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Deletion of paragraph "When reporting on policies, actions and targets, the undertaking shall report relevant information, avoiding information that is boilerplate, and therefore not relevant for users for example when policies and actions have been implemented to comply with law and regulation, or when the necessary information is already provided in accordance with [Draft] Amended ESRS 2 SBM-1. " as this might lead to unnecessary discussions with auditors on what constitutes "boilerplate information" and whether a policy should be reported or not. Certain policies and actions relate to compliance risks (e.g. related to anti-corruption) which makes it difficult to distinguish at the end whether the policy is in scope of this limitation or not. Moreover, should wish to avoid disclosures that are boilerplate, Disclosure Requirement that lead to irrelevant reporting should be either deleted completely (as they provide no value for the user) or re-drafted to make them useful for users	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Unclear if action undertaken in previous years that still have an effect on material IROs in the reporting period can be reported. It should be made clear that action from previous years can be reported as well if still relevant.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	"significant resources" should be changed into "significant financial resources" as the reminder of the whole par. 38 is about financial resources. EFRAG should think about giving an indication what is meant by "significant". The term "significant resources" is not defined.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The wording should be aligned throughout the whole par. 38 including the connected AR. The wording "significant financial resources" should be used to align the wording within par. 38. "Resource allocation" and "resources" should be replaced accordingly. It should also be clarified that a disclosing a monetary range for the planned allocation of significant financial resources over the whole time period is sufficient.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 35.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Deletion. This AR is not fully related to Par. 38. Par. 38 only refers to disclosures regarding current or future monetary resources. "Non-monetary resources" are not part of the disclosure requirements - there is only a mention of "other resources" under Par. 38a but not Par. 38c. It is therefore not understandable why "examples of other non-monetary resources" may be included if the requirement (Par. 38 in general) does not ask for it. The AR should be deleted. Moreover, this is a a "may" datapoint and might broaden the scope of resources to be disclosed and might lead to discussions with auditors	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 36.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This disclosure requirement doesn't add a lot of value for the user of the CSRD Report and can lead to boilerplate disclosures.	ESRS2	ESRS 2 - General for policies - GDR-P	34. (d)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We think that in general that this DR will still provide a significant reporting burden as opposed to the value that's provided to the users of the sustainability statement.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The information required under this new Application Requirement is already covered in BP-2, making it redundant. We therefore request its removal. Repeating the same content adds unnecessary complexity to the report and may compromise its clarity and conciseness, without contributing additional value to the disclosure.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 14
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The information requested in this paragraph is already addressed in paragraph 22. Therefore, we request the removal of the repeated linkages, as they are redundant and do not contribute additional value to the disclosure.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The information requested in this paragraph is already addressed in AR 13. Therefore, we request the removal of the Application Requirement to avoid repetition.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 24.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We consider that, instead of requiring references to specific pages or paragraphs, the linkage should be made at the section level of the report. This approach would significantly ease the process for preparers when compiling the content table, as referencing individual pages or paragraphs is highly resource-intensive and time-consuming. Linking at section level would maintain traceability while improving efficiency and usability.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 25.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The requirement to report environmental conditions and specific characteristics of the area where environmental impacts occur should be removed. This level of detail is excessive and results in boilerplate disclosures, as it is not specific of the undertaking and it would be based on external information. In general, the location-based approach to environmental impacts proposed in the standards is disproportionate and should be entirely eliminated. It introduces unnecessary complexity, increases the reporting burden, and does not align with the principles of relevance and proportionality.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	41. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please see comment for ESRS 2 para. 30	ESRS2	ESRS 2 - General for targets - GDR-T	44.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	This comment applies to the whole DR GOV-1. It would be recommended to clearly state that the whole information required under this DR is limited only to sustainiability related matters. This is specially relevant in the case of para 20.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	8.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	In line with what is established by Directive UE 2022/2381 of the European Parliament and of the Council on improving the gender balance among directors of listed companies, gender diversity should be reported as a percentage, and not as a ratio.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	AR 2.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Language should be reviewed in order to be clear about that the expertise refers to the whole body has, not the different individuals that compose it.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	AR 3.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	It has been added "for each metric the undertaking shall disclose, for environmental metrics, the specific environmental conditions and characteristics of the area where the impact is occurring" but it is not clead and could lead to very granular reporting. Furthermore, this provision cannot be applicable for Climate Change E1, since emissions are a transboundary phenomenon and their impact is not location-based, unlike biodiversity E4. Overall, the expressions "environmental conditions" and "characteristics of the area" lack clarity and should be reconsidered. It may be worth deleting as it does not provide any added value for external users (no decision-useful information).	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	In this paragraph is not clear if preparers need to report information also for group of products and services with less thank 10% revenues which could lead to overeporting; It would be better to restore the previous wording with an emphasis on "more than 10%"	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Deletion of mandatory requirement to disclose anticipated financial effects. While also a requirement of the IFRS Sustainability Disclosure Standards, (potential future) financial effects from risks and opportunities are already indirectly taken into account when preparing financial statements or are covered as part of the risk and opportunity report in the management report. Calculating sustainability-related anticipated financial effects related to individual sustainability-related risks and opportunities lack reliable and harmonized guidance and therefore provide little information value. Additionally, reporting on financial opportunities is not a requirement in preparing finanical reports and can reveal sensitive strategic information, leading to competitive disadvantages for European companies. It is recommended this is addressed in both ESRS and to collaborate further with the ISSB with the same objective. Voluntary reporting of qualitative information on anticipated financial effects for companies willing to disclose information could be contemplated.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	It is unclear what needs to be reported related to "disclose its exposure to the heightened risk of incidents related to child labour and forced or compulsory labour by type of operations (such as manufacturing plant), or by countries or geographies with operations. [...]". Further clarification on "exposure" needed by referring to existing frameworks such aus UN Guiding Principles or rephrasing	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (e)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We support option 2 of disclosing anticipated financial effects (qual. Information only). There is no valid and auditable quantitative information available. There is no guidance or assurance on the process of data collection for this disclosure.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Cutting resilience disclosures form the topical standards (e.g. E4) but remaining the overall disclosure requirement in ESRS 2 makes it seem like there is no actual burden reduction but mere cutting of data points that still lead to the same result/required effort to fulfill the disclosure. Undertaking still has to analyse the risks arising from the topical standards, from our understanding. There is no guidance on how to conduct the process, no definition for the term of "resilience". It is very unlikely disclosures will result in comparable results. Add further guidance and simplifications or cut datapoint.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	GDR-T 43. and and E1-1 - 13. cover the same topic and could be simplified in the same question. Moreover, more guidance is needed on the definition of ecological thresholds.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (g)
Excels	UNICEF	NGO	United States			I partially agree and partially disagree	UNICEF welcomes the references to the UNGPs, ILO Declaration on Fundamental Principles and Rights at Work, and OECD Guidelines. However, Recital 49 of the CSRD (copied below) included a reference to the UN Convention on the Rights of the Child, as well as other international human rights instruments. Given that children (all persons below the age of 18) account for almost one third of the world's population, we believe it is important for their rights to be highlighted when referencing international human rights instruments. Recital 49 of the CSRD: "The sustainability reporting standards should also specify the information that undertakings should disclose with regard to the human rights, fundamental freedoms, democratic principles and standards established in the International Bill of Human Rights and other core UN human rights conventions, including the UN Convention on the Rights of Persons with Disabilities, the UN Declaration on the Rights of Indigenous Peoples, the UN Convention on the Rights of the Child, the ILO Declaration on Fundamental Principles and Rights at Work, the fundamental conventions of the ILO, the European Convention for the Protection of Human Rights and Fundamental Freedoms, the European Social Charter, and the Charter of Fundamental Rights of the European Union. "	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend making it clear that the disclosure of the phase-in options applied by the undertaking is required through a distinct DP, beyond the reference in the objective of DR BP-1. In this context, EFRAG could consider adding an option to present such information along with the list of the DRs required under DR IRO-2, § 28 (d).	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	3.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We invite EFRAG to clarify what kind of "differences" in reporting boundary from the consolidated financial statements could occur in order to restrict the "deviations" that would be acceptable from an ESRS perspective.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	The references to ESRS 1 are inexact and should be corrected (i.e. refer to § 82, 83 and 84 instead of § 83, 84 and 85). Besides, we understand that EFRAG's proposal no longer requires to provide the reason for the restatement of comparative figures. We believe this is information that is instrumental to the good understanding of the adjusted comparative figures. We would therefore recommend reintroducing this requirement.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We note that this list is not consistent with the numbering of paragraphs in ESRS 1 (ED) and the presentation of the reliefs (some changes have indeed occured compared to the so-called v1.6). EFRAG should therefore modify the references to ESRS 1 to cover all applicable reliefs to metrics including the relief under § 90. Besides, it should be taken into account that § 91 considers a partial scope for metrics also in the value chain. Therefore this DP should be merged with § 5 (j).	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (d)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	Starting from this datapoint and for the rest of § 5, the references to ESRS 1 are inaccurate and should be corrected (§95 - and not §94 - for the update of disclosures for events after the end of the reporting period , etc.)	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (e)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend limiting the ability to present information outside the General information section to the disclosures covered by § 5 and maintaining the information to be provided under § 4 on the reporting boundary and the value chain consideration within this section in order to preserve the integrity of DR BP-1.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We believe the methodological specification provided by former para 21 (e) on the calculation of the percentage of independent Board members was useful and should be reintegrated in an AR related to para 9 (a) (similarly to what has been done for the board's gender diversity with AR 2).	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	The inclusion of the following clarifications brought by EFRAG in ID 1013 could be considered by adding a paragraph to ESRS 2 ARs: "This metric shall be calculated as (a) a percentage of variable remuneration with the the proportion of the variable remuneration dependent on sustainability-related targets and/or impacts in the numerator and the variable remuneration in the denominator. Remuneration is the amount recognised in the current period, i.e. the amount recognised as an expense (i.e. regardless of whether or not it is paid out) under the applicable accounting GAAP in the financial statements."	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (c)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	As the ESRS do not mandate any behaviour, we invite EFRAG to specify that this DP only applies when a due diligence process is in place.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	The inclusion of the following clarifications brought by EFRAG in ID 395 could be considered: "The term 'revenue' is to be understood as the amounts presented in the income statement of the undertaking's financial statements in accordance with the applicable legislation and/or accounting standards, i.e. IAS 1 paragraph 82 (a) (or any future standard superseding IAS 1) – if IFRS Standards are applied – or generally accepted national accounting principles (national GAAP)." This being said, an update will be necessary considering the new IFRS Accounting Standard for the presentation of financial statements (IFRS 18).	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (c)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We invite EFRAG to leverage on ID 644 to clarify what "active in" refers to. According to this ID, the undertaking should indeed be considered active in the concerned sectors provided that it derives any revenues from the activities described in the definitions of the applicable EU regulations. This means also that a financial institution will not be considered "active in" the sectors it finances or allocates funding. This important clarification should be in our view included in the main body of the standard (in AR).	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (c)
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend clarifying what EFRAG means by disclosing a "concise description" of the material IROs. 2025 reportings under the Set 1 have shown very different approaches in the granularity of the information that has been presented to meet former § 48(a). We therefore recommend EFRAG to provide illustrations in the NMIG to promote comparability.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	As mentionned in Part 2 of the survey, we encourage EFRAG to further clarify that regardless of the approach adopted to perform the materiality assessment (i.e., top-down or bottom-up), the objective of the DMA is still to identify material IROs which is not clear under AR 23 in ESRS 2. Though aggregation was already possible under former AR 18 in SBM-3, we encourage EFRAG to reiterate that material information should not be obscured if the disclosure is not expressed in terms of a single IRO.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend clarifying what level of information is expected in the justification that the undertaking shall provide when it did not deem climate change as material as it could otherwise lead to diverging interpretations. Illustrative wording in the NMIG would be useful.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	Though we agree in principle with the possibility given to report information on PATs at a higher aggregation level than the material IROs, we recommend EFRAG clarifying the circumstances under which such aggregation would be relevant.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	29.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We recommend clarifying whether the information can be presented in a centralized way instead of being duplicated in each topical section in relation to the material IROs, in view of what EFRAG states in question 10 of the FAQ accompanying the ED ("…indicate with a single datapoint for the list of material topics for which there are no PATs").	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	30.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	EFRAG has introduced in ESRS 2 para 31 a possibility to structure and present the information depending on how management priorities have been set regarding material IROs. ESRS 2 log of amendments indicate that this new paragraph "allows to have different level of details for different issues when they have different priorities in the way sustainability topics/IROs are managed." We believe para 31 should be clarified to avoid a "two-tier reporting system" depending on whether a material IRO is prioritized by management or not. Reporting information on material IROs that are not addressed or fully addressed through PATs is useful information (even though there will of course be less to say than for an IRO managed as a priority by management). The principle of information materiality equally applies to all pieces of information to determine what is the right level of details to be presented to cover a material IRO.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	31.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	The second paragraph of this AR implies that policies that have been put in place to comply with law and regulations are not relevant for the purpose of PAT reporting. We believe the description of such policies remains important when enabling a full understanding of how the undertakings manages the related material impacts, risks and opportunities. We therefore invite EFRAG to refine the wording of this AR to highlight such distinction.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	Forvis Mazars Group	Auditor	Belgium			I agree	We note that this paragraph requires that a company that discloses amounts of financial resources allocated to the key actions in the reporting period indicate the corresponding line items and/or notes where they are included in the financial statements. We agree with this requirement but note that it is in contradiction with the revised principles on connected information in ESRS 1 under § 114 and 115. As indicated in Part 2 of this survey, we encourage EFRAG to maintain current requirements in the Set 1 regarding providing sufficient information to understand the direct or indirect connectivity with the financial statements.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (b)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend clarifying whether indicating if an action is part of a collaborative action is mandatory or voluntary (i.e. example of contextual information), as the "useful" qualification could be interpreted in both ways.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 32.
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	Instead of "a concise description of its actual and potential, positive and negative material impacts" say "a concise description of its actual and potential, positive and negative material impacts including in each case the following details (a) the social/environmental issue identified (b) stakeholders affected (c) the location and (d) the extent and intensity of the impact." Reporting precisely on impacts is by far the most important part of the reporting process. We have recently written a 2 page policy brief which makes the case for the importance of this issue in more detail. See https://warwick.ac.uk/fac/soc/law/research/centres/chrp/publications/due_diligence_and_european_sustainability_reporting_standards_10.09.25.pdf	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	University of Warwick, Coventry, United Kingdom	Academia	United Kingdom			I partially agree and partially disagree	It is vitally important that companies report individually on material impacts. Our research has identifed that this is absolutely vital to the credibility of corporate disclosure in due diligence processes. So please delete references to allowing companies to report "at the appropriate level of aggregation". We have recently written a 2 page policy brief which makes the case for the importance of this issue in more detail. See https://warwick.ac.uk/fac/soc/law/research/centres/chrp/publications/due_diligence_and_european_sustainability_reporting_standards_10.09.25.pdf	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	IRO-1 looks good and it makes sense to simplify like this, rather than repeat the assessment approach for every topic standard.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	UNEP-WCMC	NGO	United Kingdom			I agree	It is good that the AR emphasizes location-specific considerations and value chains. The reference to the LEAP approach developed by TNFD is useful.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	UNEP-WCMC	NGO	United Kingdom			I disagree	UNEP-WCMC recommends making categorization of actions according to the mitigation hierarchy mandatory for all environmental actions – it is not too difficult and significantly improves the ability of report users to understand the companies' current or planned actions.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 33.
Excels	UNEP-WCMC	NGO	United Kingdom			I partially agree and partially disagree	For report users to be able to correctly interpret the metrics reported, it would be useful if report preparers were asked to indicate where they are using estimates or proxies, rather than measurements (e.g. using site-level or remote sensing data). This will also help with assurance.	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We find that information on the significant risks and corresponding measures is lacking. This is particularly noteworthy because AR 6 also refers to individual risk factors.	ESRS2	ESRS 2 - GOV-4 - Risk management and internal controls over sustainability reporting	15.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We can imagine that the currently missing information (as examples) on what is to be described/reported will lead to very different results and thus poorer comparability.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	18.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	In the interest of transparency, the use of this option should be accompanied by a mandatory disclosure. Under the current framework, the requirement for a description of the scope of the policy, or of its exclusions, in terms of the undertaking's own operations, upstream and/or downstream value chain is set out in ESRS 2.34b. ESRS 2.30, however, stipulates that in cases where no policies, actions or targets exist, the undertaking is only required to state their absence, without any further explanation. As a result, the disclosure obligation under ESRS 2.34b effectively ceases to apply. This creates a transparency gap, which should be addressed by introducing a clear requirement to disclose the use of the simplification provided under ESRS 1.91.	ESRS2	ESRS 2 - General for policies - GDR-P	34. (b)
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We recommend to streamline 2.37a and c as both of them refer to the time horizon. This could be moved to 2.37 (before 2.37a starts).	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	In ESRS 2.43, we recommend a rewording from IROs to topics: The undertaking shall disclose the measurable, time-bound, outcome-oriented and qualitative or quantitative targets it has set related to its material impacts, risks and opportunities (change to topics) either individually or at a higher level (i.e. groups of impacts, risks and opportunities or related topics).	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete; the information is not decision making useful for external stakeholders	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	AR 4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Adapt. This should be sufficiently covered in annual report; a high-level summary of sustainability-related governance could be included here and the rest in the annual report	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete as this refers to the "how"; the outcome of managing sustainability topics is relevant for stakeholders, not the "how"	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (b)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete as this refers to the "how"; the outcome of managing sustainability topics is relevant for stakeholders, not the "how"	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (c)
Excels	Henkel AG & Co. (e)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. This is covered in the compensation report, and only relevant to stock listed companies.	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The information about significant group of products and markets are typically part of other parts of the management report and hence, should not be repeated in the Sustainability Statement.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	17. (a)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The information about "how" stakeholders interest are brought to the attention of AMSB should be deleted. This information is related to internal reporting processes and does not provide any decision usefulness. The outcome of managing sustainability topics is relevant to stakeholders, not the "how".	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	19.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete; it refers to a description of the internal information procedures about material IROs which is not an information considered to be decision making useful for any stakeholder.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Disclosing a qualitative analysis of its resilience to the material risks should be part of the materiality analysis and should not be disclosed in ESRS 2 as a duplicate.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. Recommendation to report the outcome and not the process; it would be an option to disclose the process in a separate publication (voluntarily)	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	25.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. Recommendation to report the outcome and not the process; it would be an option to disclose the process in a separate publication (voluntarily)	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Clarify whether LEAP approach is mandatory or voluntary	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	It should be clarified that the disclosure of significant financial resources (CAPEX/OPEX) allocated to the implementation of key actions should not be reported on an individual action level. Instead, the reporting of significant financial resources should be based on an aggregation of significant CAPEX/OPEX assigned to all key actions, if those key actions are considered part of an implementation plan which has been taken into consideration for internal planning purposes. Rationale: Reporting of OPEX is not done in financial systems based on actions. Hence, any assignment of OPEX to single actions is rather an exception, but typically not possible to do. CAPEX usually also serves more than just one purpose and hence, it is typically not possible to assign CAPEX to single actions related to an implementation plan.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 35.
Excels	Kirchhoff Consult	Consultant (including software vendor)	Germany			I disagree	The addition of 'if applicable' has been removed in the revision. As the data point is now formulated, it would be necessary to specify for each target whether it is required by law, on which scenarios it is based, etc. This is completely impractical and only leads to significantly more, but not material, text. In addition, it is illogical to specify a selected scenario for some targets, e.g. in the social sector. We therefore propose reinstating the addition 'if applicable'. Otherwise reporting on targets under the amended ESRS will be much more complicated than under the original ESRS.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (f)

Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	A reference to materiality should be added.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	A reference to materiality should be added.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Current financial effects are not necessarily presented "individually" in the financial statements. Direct reference is therefore not feasible.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We support Option 2 but regarding Option 1 - if it is adopted -, the drafting of point c) should be clarified as regards the "combined financial effects" : are undertakings required to publish aggregated information on anticipated financial effects unless not useful ?	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Para 41 introduces new requirements. Current drafting of para 77 should be maintained.	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	ETUC	Trade union	Belgium			I agree	Very important to keep reporting of workers' representatives, as in many Member States this is not a requirement to report in corporate governance statements	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	ETUC	Trade union	Belgium			I agree	It is crucial to keep this datapoint in on reporting on stakeholder engagement, particularly for workers' representatives, as this is a requirement in CSRD	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	ETUC	Trade union	Belgium			I agree	It is crucial to report how workers' representatives views have been taken into account by the undertakings' decision making bodies	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	ESRS2	ESRS 2 - Objective	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	From our reading of the standard, there are overalps between SBM-1, SBM-3 and IRO-2. All three disclosure requirements include a description of the business model, strategy and decision-making with regards to material sustainability impacts, risks and opportunities: SBM-1: "The undertaking shall disclose the following information about the key elements of its general strategy that relate to or affect material impacts, risks and opportunities" SBM-3: "The undertaking shall provide a high-level description of the interaction of the material impacts, risks and opportunities, with its business model, value chain, strategy and decision-making" IRO-2: "concise description of ... imaterial impacts...as well as its material risks and opportunities...and how and where impacts, risks and opportunities are connected to its business model, its own operations and its upstream and downstream value chain." We recommend to integrate these provisions in SBM-1 and remove the duplications from SBM-3 and IRO-2. SBM-3 should be focused on current and anticipated financial effects.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Provisions on how to conduct the double materiality assessment (DMA) for environmental topics (especially E2, E3, E4 and E5) are proposed to be deleted completely from the standards. Also the NMIG does not contain related guidance. Generic requirements in ESRS 1, chapter 3 and ESRS 2 IRO-1 do not include topical specifications. Topical instructions for the DMA are of high importance to ensure that undertakings conduct the process in a comparable manner to consistently apply the ESRS. For users it is imporant to gain a get a good understanding of the undertaking's process and how it was applied to specific sustainability topics in order to assess reported information meaningfully.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	(continued): We recommend for the finalization of ESRS 1 (chapter 3) and ESRS 2 IRO-1 to clarify for environmental topics: 1.that screening of sites is an expected step in identifying impacts and assessing their materiality, 2.that local quality of air and soil, water risk factors, incl. water quality, water availability in highly or moderately water-stressed areas, threatened species and ecosystems in biodiversity-sensitive areas need to be part of the screening process, and 3.that material impacts at a specific site or location can trigger the need for providing disaggregated information when reporting policies, actions, targets and metrics The LEAP approach should also be mentioned in ESRS 1 as a possible approach to conduct the impact materiality assessment for environmental topics. Lastly, NMIG on ESRS 1 and 2 regarding the double materiality assessment process should include the essence of the former application requirements from the topical environmental standards.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	As regards the disclosure requirements about anticipated financial effects from sustainability-related risks and opportunities (ESRS 2 SBM-3), we recommend that EFRAG chooses Option 1 (para. 23 (b) and (c)), which would require reporting of quantitative information and, if not possible, qualitative information. Only this option is in line with EFRAG's mandate to improve interoperability with the IFRS standards. In addition, we recommend to clarify that quantitative information on anticipated financial may not need be overly complex and that future financial values are not necessarily expected. Rather, information on the anticipated financial effects of risks should be presented in terms of the value of today's assets and business activities that may be impaired if a material sustainability risk materializes. This approach is used in amended ESRS E1-11 and can provide valuable insights based on information that is generally available.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	AR 33 explains that actions to address environmental impacts can be classified by lever of the mitigation hierarchy (avoidance, minimization, restoration, compensation). We recommend to establish a link to the mitigation hierarchy also in GDR-P on policies.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 33.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Add an application requirement to link CapEx for key actions to the CapEx plans under the EU Taxonomy (Art. 8, DA) which increases interoperability between ESRS and the Taxonomy: "If applicable, the undertaking shall relate its CapEx amounts to the , the CapEx plan required by Commission Delegated Regulation (EU) 2021/2178."	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 35.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The requirement to report all data types and sources used to calculate the metric could be reduced to key data sources. Otherwise, this requirement would require very detailed information which is likely not provide decision-useful.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (a)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	We appreciate the intention of ESRS 2 para. 41 (b) to provide contextual information for environmental metrics, but find that the requirement to report "specific environmental conditions and characteristics of the area where the impact is occurring" for each metric is practically not feasible. This is because many ESRS environmental metrics, for example GHG emissions, pollutant emissions or resource use, do not measure impacts on the environment but pressures. The impacts resulting from these pressures are often not known or complex to determine for an undertaking. For biodiversity metrics (ESRS E4-5), however, such requirement is better suited. Considering, that ESRS 2 para. 41 (d) does already require to report relevant contextual information for all types of metrics, we recommend to remove para. 41 (b) and include the requirement in ESRS E4-5.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We recommend to include topic-specific application requirements to SBM-3 para. 23 (anticipated financial effects) related for pollution and biodiversity. For pollution, the AR should refer to revenues from products that contain substances of very high concern, OpEx and CapEx related to major incidents and costs from environmental protection and remediation of pollution as aspects that can be reported as actual or anticipated financial effects. There should also be a link to biodiversity and ecosystem-("nature-)related financial effects that the undertaking can report here, if material. If it proofs difficult to reinstate these requirements in the AR for ESRS 2, they should at least be included in the non-mandatory guidance.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Add an application requirement to link CapEx for key actions to the CapEx plans under the EU Taxonomy (Art. 8, DA) which increases interoperability between ESRS and the Taxonomy: "If applicable, the undertaking shall relate its CapEx amounts to the , the CapEx plan required by Commission Delegated Regulation (EU) 2021/2178."	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 35.
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	BP1. New 4 c): Proposal: "the extent to which the preparation of the sustainability statement has taken into account existing ISO management system(s) already certified, EMAS and/or sustainability information and data or sustainability topics already verified under a national accreditation (regulation (EC) No. 765/2008)"	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4.
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	Relevant management system(s) to apply are high level structure ISO management systems, especially ISO 14001, ISO 50001, ISO 45001 and EMAS, (please note the ISO coming standard 53001 on the SDGs). Various types of verified sustainability information, based on internationally recognized schemes, covering relevant topics within the ESRSs, are for instance ISO 14064-1 (climate change), ISO 14064-3 (Verification and validation of GHG emissions), ISO 14040 and 14044 (lifecycle assessments).	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	New 9f): "the extent to which the administrative, management and supervisory bodies have dealt with the issues under points d and e under an accredited, certified ISO management system"	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9.
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	New AR 4 for para. 9f) If the enterprise runs a certified ISO management system or is registered under EMAS the top level management is engaged and responsible for PAT's as well as performing supervision of the effectiveness of the system and efforts, including improvements.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	AR 4.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	Include text in sentence "… due diligence process, and is based on criteria laid down and evaluated on a regular basis in a ISO MS run by the enterprise	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (c)
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	Include for context in sentence "….specific to its process, (new text:) including processes defined within a ISO MS with a scope for the material sustainability topics. ….	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	Include text in sentence "….corresponding material impacts, risks and opportunities. It shall be disclosed whether the undertaking's policies, actions, metrics, and targets are operated under an accredited and certified ISO Management System, with specific reference to the scope and certification of such management system."	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	29.
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	Include text: Where policies, actions, metrics, and targets are implemented through an accredited ISO Management System, the undertaking should include this in the disclosures to consolidate the basis of information given. Information shall be given relating which material sustainability topics are certified.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 26.
Excels	TIC Council	Auditor	Belgium			I partially agree and partially disagree	New 36 c: (c) information about whether these key actions has been certified under a ISO Management System, specifying the scope and standard of certification"	ESRS2	ESRS 2 - General for actions and resources - GDR-A	36.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	Beyond the reference in the objective of DR BP-1, we recommend including a specific DP on the disclosure of the phase-in options applied by the undertaking. In relation to this DP, we suggest also to add an option to present such information at DR level within the list required by DR IRO-2, § 28 (d).	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	3.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We recommend clarifying the "differences" in the reporting boundary from the consolidated financial statements to which the undertaking is required to report upon, that would then correspond to the only acceptable "deviations" from an auditor's perspective.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We recommend maintaining the information required by § 4 on the reporting boundary and the value chain consideration within the General information section in order to preserve the integrity of DR BP-1.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We suggest extending this DP to risks (and not only to adverse impacts) as this is consistent with business practices and relevant information for users.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (d)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We invite EFRAG to review this "shall disclose" DP in order to ensure consistency with the non-binding illustrative nature of Appendix A of ESRS 1.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (a)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	As the ESRS do not mandate any specific behavioural requirement with regard to due diligence actions, we invite EFRAG to rephrase this DP as it is to be reported only if the undertaking has put in place a due diligence process.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We invite EFRAG to clarify in the ARs what "active in" refers to by leveraging on ID 644. According to this ID, the undertaking should indeed be considered "active in" the sectors covered by this DP provided that it derives any revenues from the activities described in the definitions of the applicable EU regulations. This means also that a financial institution will not be considered "active in" the sectors it finances or allocates funding.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (c)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I disagree	We consider the requirement under AR 23 contradicts the data point under § 28(a) of ESRS 2 as this AR seems to indicate that an undertaking is not required to disclose the list of the identified material IROs and can aggregate such IROs (at the level of a group of IROs or related topics) without giving the detail of the outcome of the DMA. If EFRAG's intent is to require that each material IRO be related to a material topic in the DR IRO-2, this should be redrafted to avoid wrong interpretations of which information is to be presented. We believe it is of the utmost importance that undertakings be required to give the list of their material IROs, even if such IROs can then be aggregated for reporting purposes when providing information on policies, actions and targets put in place to manage them.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I agree	We invite EFRAG to clarify that the information can be presented in a centralized way, in consistency with the indication made in question 10 of the FAQ accompanying the ED ("…indicate with a single datapoint for the list of material topics for which there are no PATs").	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	30.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We suggest rephrasing the last part of this AR as follows, as the description of the PATs implemented to comply with certain EU laws or regulations that are specifically covered by the ESRS (e.g. REACH) could provide relevant information for users and contribute to comply with the related DPs: "When reporting on policies, actions and targets, the undertaking shall report relevant information, avoiding information that is boilerplate, for example when describing policies, actions and targets that have been implemented to comply with law and regulation, and avoiding redundancies when the necessary information is already provided in accordance with [Draft] Amended ESRS 2 SBM-1."	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The term "environmental conditions and characteristics of the area where the impact is occurring" is undefined. As drafted, it could range from very high-level geography (e.g., "Mediterranean region") to overly granular scientific descriptors, leading to inconsistent reporting. Without a clear definition and minimum data fields, disclosures will vary widely in scope and precision, undermining comparability across undertakings and topics (E2–E5). This also weakens the linkage to risk/resilience analyses that depend on location-specific context (e.g., water scarcity, protected status, ecological sensitivity). We recommend providing a definition and examples that could include spatial scale/ecological unit to be used, status and sensitivity (e.g., legal protection status), relevant pressure indices (e.g., water stress index for water topics), socio-environmental dependencies (e.g., reliance on local ecosystem services, community sensitivity if relevant) and make clear that the spatial scale selected must match the impact pathway (e.g., catchment for water, critical habitat for biodiversity).	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	Targets "based on conclusive scientific evidence" require clarity on which thresholds, at what spatial scale, and what evidence hierarchy applies. Otherwise, targets may look "science-based" but be non-comparable, non-auditable, or ecologically irrelevant for the impact area. We recommend further describing "conclusive scientific evidence" in the Application Requirements, drawing from established hierarchies (e.g., peer-reviewed literature, recognised scientific bodies such as IPCC, authoritative datasets, legal designations with a science basis, and recognised methodologies such as SBTN) thus requiring undertakings to disclose: • the type of evidence used (peer-reviewed, governmental, industry framework, etc.); • the source and publication date; • any material uncertainties or known scientific debates; • how the evidence has been downscaled or adapted to the specific location/context; • whether the evidence is externally validated or aligned with recognised scientific frameworks. In addition, we recommend clarifying in NMIG that where multiple thresholds or evidence sources exist, undertakings should prioritise most local, legally binding, and science-backed thresholds, while reconciling with global frameworks when relevant.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (g)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	It has been added "for each metric the undertaking shall disclose, for environmental metrics, the specific environmental conditions and characteristics of the area where the impact is occurring" but it is not clead and could lead to very granular reporting. Furthermore, this provision cannot be applicable for Climate Change E1, since emissions are a transboundary phenomenon and their impact is not location-based, unlike biodiversity E4. Overall, the expressions "environmental conditions" and "characteristics of the area" lack clarity and should be reconsidered.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	We recommend making disclosures on anticipated financial effects voluntary. Forward-looking financial estimates lack established methodologies, risk misleading users, and conflict with the financial statements' recognition and measurement bases. The commercial, strategic, and operational challenges of incorporating such data into statutory reports argue strongly against maintaining it as a compulsory requirement. Financial reporting of this nature should remain within the scope of the financial statements.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Para. 25 Equinor welcomes the simplifications in expected DMA process description.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	25.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Equinor supports simplification in removing IRO-1 sections from the topical standards.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	25.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Equinor does not consider this a very value adding requirement. If important for some stakeholders this information need should be possible to solve through other means, for example future electronic tagging.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (f)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Requesting financial and other resources allocated to the key actions, including amount of financial resources is not very value adding since it does not say anything about the potential outcome or effectiveness. Stakeholders likely care more about the results (e.g., emissions reduced, potential positive effacts for biodiversity, livelihoods supported) than about how much was spent. It also does not offer much value in terms of comparison between compnaies. The term "significant" is not clearly defined. Different companies operate in different contexts (size, industry, geography), so X million in one sector may be negligible but in another sector transformative. There may also be challenges related to scoping of what to include (and not) in a financial figure given complex organizational contexts, indirect contributions, etc. Suggest focusing sustainability reporting on material impacts and descriptions of main actions. Detailed allocation of financial resources should be more an internal management detail rather than an external indicator of sustainability performance.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Suggest deleting paragraph 41 b. Requiring the specific environmental conditions and characteristics of the area where the impact is occurring for environmental metrics may be labour-intensive, challenging and provides little additional insight. It imposes a disproportional burden on companies without significantly improving the value of the reporting and should therefore be removed.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	We support increased flexibility in the materiality assessment of the broader value chain. To further enhance legal clarity and operational feasibility, we recommend that the standard explicitly state that the materiality assessment of value chain impacts should be risk-based. This would ensure a proportionate approach, focusing efforts on areas where impacts, risks, and opportunities are most likely to arise, and is consistent with international due diligence frameworks.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (b)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Ref. to para.27-28 We are concerned that IRO-2 combines multiple, distinct elements—materiality -outcomes, human-rights exposures, DR compliance, and EU legislative datapoints—into a single disclosure. This reduces readability, disrupts the narrative flow, and may create unnecessary duplication. We recommend separating narrative on material impacts and risks, dedicated human-rights disclosures, and administrative or tabular content into clearly signposted sections or appendices to improve coherence and usability.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	27.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Equinor supports Disclosure 34(d) as it appropriately limits the requirement to describe consideration of stakeholder interests in policy-setting, where applicable, solely to social topics, ensuring clarity and practical relevance	ESRS2	ESRS 2 - General for policies - GDR-P	34. (d)
Excels	UGT-ESPAÑA	Trade union	Spain			I agree	Very important to keep reporting of workers' representatives, as in many Member States this is not a requirement to report in corporate governance statements	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	UGT-ESPAÑA	Trade union	Spain			I agree	It is crucial to keep this datapoint in on reporting on stakeholder engagement, particularly for workers' representatives, as this is a requirement in CSRD	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	UGT-ESPAÑA	Trade union	Spain			I agree	It is crucial to report how workers' representatives views have been taken into account by the undertakings' decision making bodies	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree The relief in ESRS 1, paragraph 45(b) is for some reason not listed in ESRS2-5. Users should be informed about any topics that offhand could be assumed (by the user) to be significant to the business model, but due to reasonable and supportable EVIDENCE not being available to assess the materiality level (i.e. data are not reliable to assess materiality), the impact or risk is not reported (if this is the case). Furthermore, and while we support the reasoning behind the reporting requirements, we have noted that wording indicate a checklist format as well as it imposes significant burdens, e.g. in relation to updated estimates and information gathered af the end of the reporting period as this might be part of the normal operating procedures with sustainability and therefore not separable. Likewise, adding additional information or applying general relief form metrics might require details vs. materiality of information that would expand the reporting beyond what is useful. We suggest reconsidering the wording.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree The reporting requirement assumes a "full process", while it does not cater for the "update" envisaged in ESRS 1, paragraph 29. We are missing a reflection of the disclosure in its second year and onwards. We recommend it is added that an entity which already have reported on it's DMA process is only required to update on the process conducted in the FY covered by the annual report. (Similar to how you would normally provide strategy updates in the midst of a strategy cycle). This is to ensure that the entity is not repeating information already disclosure in the previous year and which might not have been repeated in the current year, if the underlying assumptions for the DMA have not changed and therefore an updated DMA and associated processes have not been conducted. In these circumstances there should be text which specifies, what the current FY processes have been.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (a)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree We believe there are some overlaps between GDR-T and the requirements related to GDR-M and BP / description of accounting principles.	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	This disclosure requirement is changed from "may" to "shall" and therefore adds to the reporting obligations. We do not find an appropriate reasoning for this and believe this adds unnecessary complexity and diverts from the overall purpose of the amendments. We believe that the original "May" MUST either be kept as a "May" or substituted with a "Can", but definitely not changed to a "Shall" (as this also adds documentation and disclosure requirements). Proposed change (marked with capital letters): 44. "If the undertaking has not set any measurable outcome-oriented targets, it CAN/MAY disclose whether and, if so, how it nevertheless tracks the effectiveness of its policies and actions in relation to its material related impacts, risks and opportunities either individually or at a higher level..."	ESRS2	ESRS 2 - General for targets - GDR-T	44.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	We don't agree with moving relevant "may" disclousures entirely to NMIG without specyfying their role in assurace. Our suggestion: 1) keep a list of key "may" discousures in the main text, mandatory when material or; 2) add guidance for assurers on when to require additional information.	ESRS2	ESRS 2 - Objective	1.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	BP-1 (par.5) should be strengthened: each comply/ explain declaration must be supported with a short description of the decision (e.g., why different time horizons were adopted) or a reference to documentation (e.g. materiality assessment).	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	We request reintroducing a mandatory disclouse of key elements of the ESG reporting control and risk managment system (roles, verification procedures, data owners). Refer to GOV-1 par. 8 and provide a minimum disclousure template.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	8.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Information on board/comittee ESG competence and oversight mechanism should remain mandatory (not just NMIG). Suggest a minimum disclousure of roles, meeting frequency and material issue escalation process.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	While we support the simplification and the option to disclouse PATs once if they relate to multiple IROs (par.29), we strongly recommend reintroducing the obligation to explain the absence of PATs (par. 30). Simply stating that no policy/action/target exists does not allow users to understand whether this is due to immaturity of management systems, strategic choice, or lack of materiality.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	29.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	While we support the simplification and the option to disclouse PATs once if they relate to multiple IROs (p.29), we strongly recommend reintroducing the obligation to explain the absence of PATs (p.30). Simply stating that no policy/action/target exists does not allow users to understand whether this is due to immaturity of management systems, strategic choice, or lack of materiality.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	30.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	In accordance with the previous point 65c, which has been deleted. If we don't designate a person responsible for implementing the policy, no one feels responsible for its fulfillment. Furthermore, the deletion of this point is contrary to OECD guidelines.	ESRS2	ESRS 2 - General for policies - GDR-P	34.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	In accordance with the previous point 65f, which has been deleted. We believe that this point should be reinstated, as reports are a source of knowledge and interested parties can find out where these documents are available on the basis of the report. This is the only source of information about where the company informs them about this.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	34.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	Please note that the stress test analysis is still located in two places: ESRS 2 point 24 and ESRS E1 (DR E1-3). Many entities find it extremely difficult to separate these two resilience analyses. We recommend combining the resilience analyses into a single disclosure point, taking into account the different specifics of climate change resilience. We recommend preparing ARs to support entities in reporting their resilience analysis.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	In connection with the removal of Appendix C to ESRS 2 and the removal of point 2 to ESRS 2, it is necessary to clarify and specify whether the description of IRO-1 should apply to all subject areas (even those that emerged as non-material in the DMA process) or only those that emerged as material in the DMA process. We recommend supplementing this, for example, by adding AR information for clarification.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	25.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	(ii) which of the provisions listed... shall the undertaking only specify which provisions have been used or, in case they have been used, a brief description should be provided as well? Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	All paragraphs in this section need to be reworked to be consistent within ESRS 2 and with any other ESRS. Similar to GRD-A the focus should be on key policies.	ESRS2	ESRS 2 - General for policies - GDR-P	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: If GDR-P is changed to focus on key policies, GDR-A would have to follow suit The use of the term resources is inconsistent within this section. On the one hand there is mentioning of CapEx and OpEx, on the other hand there is mentioning of financial and other resources. Suggestion: Wording should be made consistent. Consider using the term resources in this section and add the definition of resources to the Appendix with acronyms and defined terms.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Paragraphs 41 (b) and (c) are dispensable because (b) is already implicitly covered in ESRS 2 Paragraph 41 (a) and (c) is already covered in ESRS 1. Suggestion: Delete Paragraphs 41 (b) and (c)	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: There seems to be a typo. Suggestion: Change wording: when performance is assessed against specific sustainability-related targets and/or impacts metrics, the targets or metrics used; and	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	The possibility of disclosing information at group level for IROs or at topic level is supported.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Not all income positions of credit institutions can be included in the sector-based assessment. The data point should therefore not, or at most only qualitatively, be reported by credit institutions. Quantification is only relevant in the context of the manufacturing sector.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (c)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Why is it necessary to call out workers' representatives; would suggest deleting; this would then also align with AR 11 for para. 20 (a). Suggestion: Change wording: whether and how the administrative, management and supervisory bodies are informed about the views and interests of key affected stakeholders (including workers' representatives) with regard to its material impacts, risks and opportunities, either individually or at a higher level (i.e. groups of impacts, risks and opportunities or related topics)	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I agree	We welcome that the qualitative analysis of resilience appears to be sufficient as a mandatory disclosure.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	We consider a mandatory requirement to describe the DMA process to be unnecessary. As these are audited processes, an appropriate DMA is assumed. Experience with the 2024 reports shows that process descriptions are largely uniform, provide little meaningful information, and are of limited decision-usefulness. The focus should instead be placed on metrics.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Inconsistent wording: use the term negative impacts instead of adverse impacts; in addition, be careful with the use of the term "risk" which has a very specific meaning in ESRS; it is also questionable why in this context the adverse/negative impacts are emphasized. Suggestion: Change wording: the scope of operations and value chain covered, with an indication of whether it focuses on specific activities, business relationships, geographies or other factors that give rise to heightened risk of adverse impacts;	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Is it necessary to specify all of these? If yes, are they not all aspects of (a), i.e., should they be sub-components to (a)? Suggestion: Consider streamlining	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (b) to (h)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Why is this separately called out? If this is a result of Draft Amended ESRS S1 and ESRS S2 should it not be exclusively addressed in these topic-specific standards?	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (e)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The table of all the datapoints that derive from other EU legislation should be restricted to those that the undertaking has assessed as material. From a user perspective it is well understood that things not being disclosed are not material. Suggestion: Change wording: a table of all the datapoints that derive from other EU legislation as listed in Appendix A of this Standard, if material and indicating where they can be found in the sustainability statement or, for those that the undertaking has assessed as not material, that they are 'Not material'.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (f)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The term metrics is missing Suggestion: Change wording: Information about policies, actions, metrics and targets shall enable an understanding of the level at which the undertaking is addressing its material impacts, risks and opportunities, i.e. at topic or sub-topic level. In instances where the undertaking has adopted policies or put in place actions or set metrics or targets for certain aspects only, this shall be reflected in the way the disclosure is prepared and presented, enabling an understanding of how the covered aspects relate to the corresponding material impacts, risks and opportunities	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	29.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	It continues to be expected under the GDRs that a "nil statement" be explicitly included in the text: "If the undertaking has not adopted policies, actions and targets with reference to a topic related to material IRO, it shall disclose this fact." In the Basis for Conclusions, however, No. 65(c) states: "Clarifying that PATs are only to be reported 'if you have' them (i.e., no behaviour mandated)." This principle of avoiding unnecessary nil statements is therefore not applied consistently. We consider nil statements to be redundant, as they unnecessarily extend the report without contributing to clarity or relevance. Proposal: All requirements mandating disclosure of the absence of elements should be removed. A general clarification could be introduced instead: what is not reported is to be understood as not existing or not material.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	30.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The order of metrics and targets does not follow the way how it is described later in ESRS 2. Suggestion: Change wording: The undertaking shall apply the requirements provided in this section, when it discloses either in accordance with a topical standard or on an entity-specific basis, on policies, actions, targets and metrics and targets related to material impacts, risks and opportunities, either individually or at a higher level (i.e. groups of impacts, risks and opportunities or related topics), covering:	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	32.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Inconsistency within ESRS, Bolding of words should be re-assessed, does not seem useful to bold remediation and potential Furthermore, the terms prevention, mitigation and remediation are related to negative impacts, i.e., a word corresponding to positive impacts is missing. Suggestion: Change wording: (a)its policies, and actions and targets which address the prevention, mitigation and remediation of actual and potential material negative impacts to address and material risks and/or to pursue actual and potential material positive impacts and material opportunities; or (b)the targets and metrics to assess progress over time in relation to its material impacts, risks and opportunities	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	32. (a) and (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Resources allocated to actions are often competitive information that cannot be disclosed, even if they do not fully meet the criteria of a business secret. For example, an IT project that is inexpensive due to the chosen solution may: a) falsely give the impression of fewer resources allocated, b) reveal information to competitors, or c) overlap with taxonomy requirements for E standards to some extent. In general, the topic of resources is not indicative of commitment or results. Therefore, this disclosure is confusing and unhelpful both for target users and for the company providing it. This entire requirement remains a wrong "shall".	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.

Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: This should not be covered in a separate bullet. It is already sufficiently covered in bullet (f) and does not warrant a separate paragraph. Suggestion: Delete bullet (g). If considered necessary, embed in an appropriate manner in bullet (f).	ESRS2	ESRS 2 - General for targets - GDR-T	43. (g)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The start with "In addition" is confusing. Since this paragraph is related to paragraph 6 it would make sense to make this more transparent. Suggestion: Change wording: In addition the instances mentioned in paragraph 6, for each topic …	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: The wording suggests that time-bound targets must be set. Suggestion: Change wording: briefly describe, if applicable, any time-bound targets it has set related to the topics in question, the progress it has made towards achieving those targets, and whether its targets related to biodiversity and ecosystems are based on conclusive scientific evidence;	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Why is the disclosure restricted to adverse impacts, should this not read actual or potential positive or negative impacts related to the topic in question?	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (d)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: This sentence reads a bit strange in the context of providing information about sustainability governance. The other challenge is that the paragraph refers to several governance bodies and then uses the word “oversee”. While “oversee” would be appropriate in relation to supervisory bodies, it would not be appropriate in relation to management bodies because they determine strategies and other measures. Suggestion: Change wording: how the administrative, management and supervisory bodies determine whether ensure that appropriate skills and expertise are available or will be developed to determine respectively oversee strategies and other measures designed to respond to material sustainability-related impacts, risks and opportunities (or groups of them / related topics)	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: As indicated for paragraph 9 (b) the term oversight only seems appropriate in conjunction with supervisory bodies, not management bodies. Suggestion: Change wording: the identity and responsibilities of the individuals, board committee or similar body within the administrative, management and supervisory bodies which are responsible for the management respectively oversight of material impacts, risks and opportunities (or groups of them / related topics), with an indication, if relevant, of those for which the administrative, management and supervisory bodies have not delegated the key decisions to another body	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (c)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: As indicated for paragraph 9 (b) the term oversight only seems appropriate in conjunction with supervisory bodies, not management bodies. Suggestion: Change wording: how the administrative, management and supervisory bodies determine respectively oversee the setting of targets related to material impacts, risks and opportunities (or groups of them / related topics), and how they monitor progress towards them; and	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (d)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Insertion after Paragraph 7, i.e., within the section for Disclosure Requirement BP-2. Suggestion: Move after Paragraph5, i.e., to the section for Disclosure Requirement BP-1.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	AR 1
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Die relevanten Stakeholder sollen im Einklang mit dem ESRS 1 AR 10 angegeben werden. Hiernach werden folgende Kategorien vorgegeben: “Common categories of affected stakeholders are: employees and/or workers' representatives, suppliers, consumers or end-users, affected communities and persons in vulnerable situations. Nature may be considered a silent affected stakeholder.”. Hieraus ergeben sich zwei Herausforderungen: 1. Die bisher als relevant ermittelten Stakeholder passen nicht zwingend in die vorgebenden Kategorien. Dadurch wird Flexibilität genommen. 2. Der Begriff von „persons in vulnerable situations“ wird nicht näher definiert, ist jedoch erklärungsbedürftig. Die genannten Kategorien sollten lediglich als Beispiele verwendet werden.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	AR 11.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Why is the term “other measures” used instead of the term “metrics”. Wording should be consistent with other paragraphs. Suggestion: Change wording: Information on how the undertaking addresses or plans to address its material impacts, risks and opportunities, which interact with its business model or strategy, includes a clear reference to the specific policies, actions, targets and other measures metrics it implemented during the reporting period to manage them, as disclosed in line with the GDRs and the relevant topical standards.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 14
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Problem: Since this is an overarching principle in ESRS 1 that applies to all disclosures, why is it repeated here? Suggestion: Delete AR 15 for para. 23 Relief of undue cost and effort is welcome. However, the definition of undue cost or effort will likely lead to discussions during the audit phase without resolving discrepancies between published disclosures. A better solution would have been to allow disclosure on a “may” basis, without adding the layer of undue effort. This approach would be more consistent with option 2.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	If Option 1 is to be adopted, it shall be included in the main body rather than in an Application Requirement. In substance, Option 1 effectively evolves into a more complex version of Option 2, without providing any additional value when combined with the proposed reliefs.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 17.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Even if the presence of "diverse" in the administrative bodies is likely very small, removing the line from a table legally defined does not signal inclusion.We strongly advise to re-include the original table and leave these kind of simplifications to the single companies impacted by the ESRS	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	AR 2.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Unclear and imprecise in terminology (boilerplate).	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Reference to workers´representive is not of value, no point is singling out the representative of a stakeholder. Additionally the workers´representative are not a stakeholder but a proxies of it, only workers are a stakeholder, consulting representative can be a process decision but will not change that DMA shall collect the workers´view, not that of their representative.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Why are sentences 2 and 3 necessary? Seems to be very detailed and only focused on certain aspects and therefore not reflective of the general nature of ESRS 2 related disclosures. Suggestion: Delete sentences 2 and 3	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Example provides is dispensable Suggestion: Change wording: The metrics include those defined in the ESRS, as well as metrics identified on an entity-specific basis, whether taken from other sources or developed by the undertaking itself, such as for [Draft] Amended ESRS S2-S4 topical standards that do not contain metrics at sector agnostic level.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 38
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree with option 2	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I disagree	Qualitative disclosures or ranges/estimates should be allowed for this as well, especially in the case of a private company that does not publish financial figures. We would be against publishing these figures.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	IMA-Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It's unclear to me whether SBM-3 is a cross cutting disclosure, because it has been removed from the topical standards (because of lack of mature methodology to prepare and report on such granular information) or if it's a general disclosure requirement that could be for all material topics. It's a little confusing the way it is currently written in ESRS 2 since it talks about aggregating or disaggregating the financial effect for risks and opportunities. (only to be reported for financially material topics). But removed from the topical standards.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	We do not agree with the new provisions introduced by paragraph 5, as it creates duplicated information throughout the Sustainability Statement. For example, if the reporting undertaking makes use of the relief for metrics with a partial scope (ESRS 1 paragraph 91),or changes sustainability information due to a restatement need or error correction (ESRS 1 paragraph 95-97), sufficient transparency will provided for the metrics concerned, i.e. by providing contextual information, disclosing the partial scope, and correcting/restating the previous reporting period figures. Following the new paragraph 5 and stating that the reporting undertaking has applied these "provisions" just creates duplicates and redundant information not helpful for readers and users. We therefore suggest limiting the disclosures required by paragraph 5 to those that do not create duplicated/redundant information.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	Allianz SE	Insurance	Germany			I disagree	The disclosure of "significant sectors" is a new disclosure requirement that goes beyond the requirements of set 1 ESRS. Reporting undertakings anyway disclose information regarding relevant business segments in financial reporting - the sustainability statement should not prescribe additional sector information that goes beyond requirements in financial reporting. As such, this new disclosure requirement adds a new requirement which is not in line with the simplification mandate given by the European Commission and should therefore be deledet.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	Allianz SE	Insurance	Germany			I disagree	The objective of "understanding of significant changes to the policies adopted during the reporting period" is not reflected in the DR as currently worded. Note: In other standards, the objectives as well are sometimes worded in a way that is not aligned or cannot be sufficiently covered by the DRs. When objective and disclosure requirements are not aligned it opens room for discussion on whether the companies are expected to provide additional information in order to meet the objective of the requirement or if compliance with the ESRS is as well given if the company just sticks to the datapoints in the disclosure requirements. As a general rule, the objectives of the requirements have to be revised and aligned with the datapoints contained in the ESRS or deleted completely.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	33.
Excels	Allianz SE	Insurance	Germany			I disagree	Paragraph 41 (a) now requires, for each metric, information on data types and sources used as input to the calculation. While these disclosures are still subject to the concept of information materiality, providing information on data types and sources is not relevant for most metrics and certainly does not add additional value to users of sustainability statements. We therefore suggest deleting 'data types and sources used as input to the calculation' from the prescriptive requirements of the provision or specify 'where relevant'.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	41. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Allianz SE	Insurance	Germany			I disagree	Paragraph 41 (b) introduces new requirements for all environmental metrics regarding information on the specific environmental conditions and characteristics of the area where the impact is occurring. Such information is often not available, also is it near impossible to determine the area where the impact is occurring with precision – as such the required information would by highly judgmental, subject to significant uncertainties and therefore likely to not meet the criterion of faithful presentation. 41 (b) also creates additional requirements that were not present in set 1 by advocating such information for all environmental metrics, which also includes value chain metrics. We therefore suggest deleting subparagraph 41 (b) entirely.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	41. (b)
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	"reportable sector" ⍰ same wording as in IFRS 8 "segments" would be helpful to avoid misinterpretation	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We do not think this kind of granularity is useful, we recommend an overall description	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Anticipated financial effects remain a non-meaningful data point as they will lack comparability and should be deleted, if it can't be deleted option 2 with only mandatory qualitative information should be chosen	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	this datapoint should be deleted, it is questionable why such risks should be higher prioritized than others	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (f)
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Such a list is not necessary from our point of view as it is more or less a table of contents of the sustainability statement	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (d)
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	this datapoint should be deleted as it leads to excessive listing of areas or conditions, additional value or necessity not clear	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	Its not clear from the revision that it is only those risks that may have implications for strategy and business model that should be disclosed. As it stands now, it looks like it is all risks identified through the DMA; but from the 'basis of conclusions' document, it sounds like it should only be those risks with implications.	ESRS2	ESRS 2 - General for policies - GDR-P	34.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	It says that we should avoid boilerplate descriptions, for example when policies and actions have been implemented to comply with law and regulation. But compliance with regulation may also contribute to the ongoing management of a potential impact. For example, in the pharmaceutical industry, strict rules apply for management and monitoring of side effects and adverse events of the use of medical products already on the market. This is an ongoing risk that we have in the pharmaceutical industry and therefore an ongoing potential negative impact. We manage it - also because there is regulation. But the safety programs that we have should also be mentioned to show users of sustainability statements that we have the house in order.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	ESRS 2 para 26. a and AR 19 mention input parameters. Para 26a distinguishes between input parameters and data sources, but in the AR19, it is mentioned that input parameters may include specific data sources. So there is a bit of overlap between the term input parameter (which includes data sources) and key data sources.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (a)
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	RELATED TO APPENDIX - COULD NOT CHOOSE APPENDIX IN EXCEL TEMPLATE: ESRS 2, appendix A refers to the statement on due diligence as GOV-4, but it is GOV-3 in the revised ESRS.	ESRS2	ESRS 2 - Objective	1.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	NOT RELATED TO OBJECTIVE OR PARAGRAPH 1 - JUST HAD TO PUT SOMETHING TO BE ABLE TO PROVIDE THIS FEEDBACK: SBM-2 and topical s-standards have disclosure requirements around stakeholder engagement. It feels a bit overlapping when trying to respond to both.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	1.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	Unclear what is required here. An application requirement could be useful.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (e)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	In our opinion, the new formula of the disclosure creates an unnecessary summary of the report, which, in accordance with the intention of simplification, will already be substantially shorter.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	The current structure of the disclosure is overly complicated, with unclear sentence constructions that make it difficult to understand. It should be discarded or simplified.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	9.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	This section, transferred from GOV-4, is simplified but fails to explain what due diligence entails. It also lacks a reference to ESRS 1 and presents unclear expectations compared to the current ESRS standards. Paragraph 13 should include a cross-reference to ESRS 1 for clarity and alignment	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It would be preferable to remove the phrase '...if the undertaking refers to this hierarchy in defining its actions' and instead require mandatory reporting according to the mitigation hierarchy for all actions related to the natural environment.	ESRS2	ESRS 2 - General for policies - GDR-P	37. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Reference should be to ESRS 1 93	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (e)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Reference should be to ESRS 1 94	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (f)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Reference should be to ESRS 1 95 and 96	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (g)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Reference should be to ESRS 1 100	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (h)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Reference should be to ESRS 1 107 and 108	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (i)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	Reference should be to ESRS 1 73	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (k)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	The AR should be moved under BP-1	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	This should be rephrased not to refer to strategies (in plural) which are not defined. Instead the sentence should refer to policies and actions: "how the administrative, management and supervisory bodies determine whether appropriate skills and expertise are available or will be developed to oversee policies and actions to respond to material impacts, risks and opportunities (or groups of them / related topics)"	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	This disclosure will result in lack of information who key stakeholders are. It should be rephrased as follows: "a summarised description of its stakeholder engagement, including information about the key stakeholders and with which key stakeholders it engaged"	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (a)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Deleted datapoint 53 (e) was the only place where the undertaking could explain whether ESG risks are included in its risk management system. This is crucial information for users to understand the level of professionalization of risks management at the undertaking. It should be reinstated.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It is difficult to understand what expectations regarding disclosures stem from this AR. Should it result in detailed disclosure on location of IRO?	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The following sentence should be added: "The undertakings shall consider ESRS 1 point 81 second sentence.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	36.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It should be rephrased as follows to prvde better underdstanding on resources needed: "provide an indicative range of future financial resources the undertaking expects that need to be allocated for the implementation of the key actions"	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (c)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The wording should be clarified, ex. "The undertaking shall disclose a description of the main features of its business model and value chain, as well as its position in the value chain."	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	18.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	"counterparts" should be replaced with "business partners"	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	the TNFD notes the following aspects in the new text of AR 22 for para. 26: -The reference to LEAP is placed after the screening of site locations, while LEAP is about the whole materiality assessment -There is no reference anymore to the fact that the first three phases of the LEAP approach correspond to the actual materiality assessment process for the topical standards -This new AR also removes any guidance on what each of the phases of LEAP entails. The AR should begin with an explicit reference to the LEAP approach, framing it as corresponding to the materiality assessment for the nature-related topical standards. This introductory paragraph on LEAP can then be followed by the current text on the screening of site locations, which can serve as an example of additional guidance linked to the first phase of LEAP.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	Taskforce on Nature-related Financial Disclosures	Standard setting initiative	United Kingdom			I partially agree and partially disagree	on para 26(e) on whether and how the process includes consultations with affected stakeholders, key information may be lost with the deletion of the provision to 'understand how they may be impacted' (Set 1 para. 53, ESRS 2), and keeping a sole focus instead on whether stakeholders have been consulted.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (e)
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	87.SBM-1 par. 17 a ii) : Considering that all datapoints of ESRS 2 have been made subject to materiality, the mention of "where applicable and material" does not seem necessary.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	88.SBM-3 par. 23 a) : Regarding current financial effects, it is unclear in the amended draft whether disclosure of aggregated financial effects (potentially for all material IROs) is allowed. This should be clarified, also in relation to AR 17 a) which mentions overlapping situations. In addition, ESMA recommends including guidance on how to calculate current financial effects in the standard. It should be clarified in the Application Requirements that the current financial effects are to be determined with consideration of the mitigation measures implemented ("net" basis).	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	89.IRO-1 par. 26 and AR 20: ESMA agrees that the IRO-1 topical disclosures in ESRS Set 1 were overly detailed and caused implementation challenges. Further simplification could be achieved by turning some datapoints into Application Requirements for par. 26 a). This approach could be relevant for par. 26 c) and par. 26 e). In addition, while AR 20 establishes that the disclosures under par. 26 b) to g) specify rather than expand the disclosures outlined in par. 26 a), it does not describe the links between the different datapoints, which would be helpful for undertakings to better understand the disclosure requirements. ESMA welcomes the focus on information that reflects the specificities of the individual undertakings for reporting on the materiality assessment process as included in AR 20.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	90.IRO-1 AR 19: Reference to "key inputs" at the end of the paragraph does not provide meaningful guidance and should be supplemented with more concrete examples of what these inputs may consist of, which differ from the categories already mentioned in the paragraph. The term "parameter" also lacks clarity in this context. In addition, as the amended ESRS 1 par. 27 refers to scientific data, scientific information should be explicitly mentioned in AR 19 of ESRS 2 as well.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 19.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	91.IRO-1 AR 21: AR 21 merely describes the disclosure requirements on stakeholders' consultation in the different standards. For simplification and increased readability of the sustainability statement, ESMA's view is that AR 21 could further explain how the disclosures under IRO-1 can complement the ones under SBM-2 to avoid duplication or lack of specificity.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	92.IRO-1 AR 22: ESMA thinks that the drafting of AR 22 "the approach to such screening is a relevant aspect of disclosures addressed in (a) to (e)" is unclear about whether this information is required to be included in the referenced datapoints (where applicable), and on the type of information that is expected. ESMA considers this information important, and that, while simplification should be achieved through covering it in one datapoint only, the current approach creates too much ambiguity.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	93.IRO-2 par. 28 and AR 23: ESMA concurs with moving the description of the IROs to IRO-2 (par. 28), so that this Disclosure Requirement now includes all resulting elements from the materiality assessment process. ESMA however cautions against the flexibility in the proposed AR 23 to describe the IROs at the appropriate level of aggregation. While the intention is to avoid the disclosure of long lists of very granular IROs as has been the case for some wave 1 undertakings, it may create situations where both the IROs, their interaction with the business model and strategy (SBM-3 AR 12) and the related disclosures regarding policies, actions, targets and metrics (for which similar flexibilities have been introduced in ESRS 2 par 29.) are disclosed at an aggregated level, making it impossible for the user to have access to the actual IROs and how they are specifically managed.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	94.There is inherent flexibility in the materiality assessment process on the granularity and the setting of thresholds and ESMA sees the resulting granularity of IROs as a matter of practice which will most likely converge in the medium term. Having an additional flexibility on the description of the IROs risks undermining the transparency of the materiality assessment process and could lead to inconsistencies with the objective of sustainability reporting as expressed in ESRS 1 par. 6 "to present fairly the undertaking's material impacts on people and environment, as well as the material sustainability risks and opportunities". As a consequence, ESMA recommends having clear limitations to the level of aggregation allowed in par. 28 related disclosures.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	95.In addition, considering the increased flexibilities in grouping of IROs and presentation, ESMA thinks that the IROs should be clearly disclosed as related to one or several ESRS sub-topics, where relevant, or topics or signposted as related to entity-specific disclosures as part of their description. This could be part of the table proposed in AR 25. ESMA would be in favour of this table being a mandatory requirement rather than a voluntary one. See also the responses to questions 13 and 15 on this issue.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	96.IRO-2 par. 28 e: Regarding the table of EU datapoints, an option to refer to the datapoint as "non applicable" in addition to "non material" could be introduced, as it would fit better with some of the disclosures (e.g., SBM-1 par 17 c) and was used by some Wave 1 undertakings in their 2025 disclosures. The circumstances in which these different notions should be used could be clarified in an Application Requirement.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (e)
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	97.GDR par. 29: The formerly called "Minimum Disclosure Requirements - MDR" in ESRS 2 have been streamlined and renamed as "General Disclosure Requirements – GDR". The change in name seems to reflect the fact that the filter of information materiality also applies to information required by these provisions, however EFRAG rightly proposes to stress in the new par. AR 20 of ESRS 1 that GDR provisions "are fundamental in nature and therefore likely to result in material information for all undertakings". 98.ESMA however notes that the text proposed in par. 29 of ESRS 2 is unclear where it states: "In instances where the undertaking has adopted policies or put in place actions or set targets for certain aspects only, this shall be reflected in the way the disclosure is prepared and presented, enabling an understanding of how the covered aspects relate to the corresponding material impacts, risks and opportunities". ESMA supports a requirement to explain how a given policy, action or target (or combination thereof) address one or more IROs. However, the proposed wording is not explicit in this regard and may be open to interpretation.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	29.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	99.GDR par. 31: Similarly, the objective of the proposed requirements set out in the proposed par. 31 of ESRS 2 is unclear, which foresees that: "If the undertaking categorises its material impacts, risks and opportunities in accordance with a set of management priorities, reflecting their relevance to the undertaking's strategy and business model, the way disclosures are structured and presented may reflect this approach". This proposed requirement seems to address the presentation of policies actions and targets in a way that provides more prominence to certain disclosures of material IROs than to others. ESMA notes that the driving principle to prepare and present information in the sustainability statement is the double materiality approach. The general clause preventing the fact that material information shall not be obscured would, in fact, also apply if more prominence is arbitrarily given to some material IROs than others.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	31.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	100.GDR par. 32: Furthermore, the proposed par. 32 of ESRS 2 is also rather cryptic when it specifies that the policies, actions, targets and metrics are related to IROs "either individually or at a higher level (i.e. groups of impacts, risks, opportunities or related topics)". This specification, which appears multiple times across ESRS 2, seems to justify an approach whereby, for example, a policy would broadly address a topic without necessarily specifying how it addresses material IROs identified in a given topical area. The proposed wording risks leading to more boilerplate disclosures thus requiring a reporting effort from undertakings, for limited or no benefit to users of the information.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	32.
Excels	ESMA	European supervisory authority	France			I partially agree and partially disagree	101.Finally, ESMA stresses the fact that the disclosures on policies, actions, targets and metrics should enable users of the sustainability statements to understand whether and, if so, how IROs were managed and any associated targets/metrics and which actions have been taken, planned (or not taken) and their effectiveness to address the pre-defined policy objectives. Whenever an undertaking has only partially addressed one or more of these information elements, the user of the sustainability statement should be able to understand this fact and be able to determine how well the material IROs are being managed by the undertaking. ESMA therefore recommends that the general requirements proposed in paragraphs 29-32 are clarified in this spirit to specify that the objective of policies, actions, targets and metrics remains to shed light on the material IROs and their management and that this objective can be fulfilled based on the aggregation and disaggregation requirements in ESRS 1.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	32.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	There is no clear methodology to calculate anticipated financial effects, which makes the shared information being not aligned with the Qualitative characteristics of information in ESRS 1 - Appendix B) and it won't be comparable to other companies. Thus discolosing anticipated financial effects should be deleted.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	23. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Disclosing a qualitative analysis of its resilience to the material risks should be part of the materiality analysis and should not be disclosed in ESRS 2 as a duplicate. Recommendation to delete this DR in ESRS 2 SBM 1.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	24.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	This DR might imply a lot of text without any valuable information by just disclosing that there aren't adopted policies, actions or targets to a certain material topic.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	30.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Some countries have comprehensive laws and regulations, especiallly for social topics such as workers' council which force the implementation of actions and measures, which significantly reduce a gross risks by explaining and implementing these measures.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	This needs to be clarified further.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	This needs to be specified that the reporting level is on topic level.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Sectorspecific information needs to be handled individually.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 7.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Sectorspecific information needs to be handled individually.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Clarfy weater LEAP Approach is mandatory or voluntary	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Clarify definition of undue cost or effort.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Inconcise. Needs to be includes in the topic-specific Standards and not in ESRS 2 in order to align to the new ambition to reduce the complexion of the ESRS.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It is stated that also group internal activities should be listed under significant sectors. But definition of "significant" based on revenue in AR10 is not feasible for internal activities. Internal activities should be deleted 17.(b).	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	- DELETE. Anticipated financial effect are - due to the lack of acknolewdged methodologies - not a meaningful metric. The external assurance of highly uncertain and fully assumption-based metrics is most likely not feasible. The main users of reports expect robust and comparable data. - Qualitative information should be mandatory instead of quantitative information as collection of quantitative information is subject to a high degree of uncertainty. Data for a precise calculation is not available.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	DELETE. The required apporach to disaggregate targets along "markets and/or customer groups, products and/or services" would trigger nonsense disclosures! This is not an appropriate level of target setting, does noch reflect the level of corporate steering. This adjustment in the revised ESRS drafts reflects, that the practitioner and user perspective is no longer considered at all. - There is no definition of "banned product". This does not lead to a comparable reporting.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	DELETE. There is currently no definition of "significant sectors". If companies would be required to develop an own/individual sector classification, this would contradict the overall target of comparability. Since a sector-classification is already provided in the financial reporting, there is no need to duplicate information.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	CHANGE. The current concept of reporting relief based on undue costs and efforts does not lead to any reduction of reporting burden for larger companies. Instead, it should be referred to the financial reporting where significant financial effects are displayed.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	CLARIFY. Step in the right direction but the disclore requirements are still mostly applicable to quantitative/semi-quantitative targets. Qualitative targets could be discriminated by this definition of "SMART".	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	SZEF	Trade union	Hungary			I agree	Very important to keep reporting of workers' representatives, as in many Member States this is not a requirement to report in corporate governance statements	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	SZEF	Trade union	Hungary			I agree	It is crucial to keep this datapoint in on reporting on stakeholder engagement, particularly for workers' representatives, as this is a requirement in CSRD	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	SZEF	Trade union	Hungary			I agree	It is crucial to report how workers' representatives views have been taken into account by the undertakings' decision making bodies	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming). Should be "in terms of material impacts,dependencies, risks and opportunities"	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	27.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming). Should be "a concise description of its actual and potential, positive and negative material impacts and dependencies"	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming). Should be "(48(g) amended) changes related to its material impacts, dependencies, risks and opportunities compared to the previous reporting period;"	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (c)
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming). Should be "The description of its material impacts, dependencies, risks and opportunities shall be provided at the appropriate level of aggregation, either individually or for group(s) of impacts, dependencies, risks and opportunities, or for the related topic(s),"	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming).Should be "The undertaking may present the description of its material impact, dependencies, risk or opportunity in the same location as its disclosures on the related policies, actions, targets and metrics through which it addresses them, in order to avoid duplication and support a coherent narrative."	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 24.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming).Should be "(new) Information about policies, actions and targets shall enable an understanding of the level at which the undertaking is addressing its material impacts, dependencies, risks and opportunities, i.e. at topic or sub-topic level."	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	29.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming).Should be "(62 amended) If the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, dependencies, risks and opportunities, it shall disclose this fact."	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	30.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming).Should be "If the undertaking categorises its material impacts, dependencies, risks and opportunities in accordance with a set of management priorities, reflecting their relevance to the undertaking's strategy and business model, the way disclosures are structured and presented may reflect this approach ."	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	31.
Excels	Little Blue Research	Consultant (including software vendor)	United Kingdom			I partially agree and partially disagree	Missing dependencies - this is out of alignment with the TNFD and ISO 14054 Natural Capital Accounting for Organizations (forthcoming).Should be "(56) The undertaking shall apply the requirements provided in this section, when it discloses either in accordance with a topical standard or on an entity-specific basis, on policies, actions, targets and metrics related to material impacts, dependencies, risks and opportunities,"	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	32.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Companies should be required to provide geographic information about where their value chains are located. Currently, descriptions of value chains are often vague and general, with companies stating the obvious i.e. that in the upstream there are subcontractors and then in the downstream there are customers. This does not provide any relevant information to users of the sustainability statements nor does it increase transparency. It also fails to communicate whether companies have actually mapped their supply chains.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 7.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Strongly agree with guidance to "focus on information that is specific to its own process". Experience shows that boilerplate reporting here is commonplace which is why guidance specifically addressing that is welcome. Companies should however, also be instructed to avoid excessive and detailed descriptions of their internal processes and to prioritize disclosing what external information has been taken into account in the process, and explaining its outcomes.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	In 20 (a) and (b) "key stakeholders" is used and it is defined as "key categories of affected stakeholders" in AR 11. Therefore it is confusing to use "key affected stakeholders" in 20 (c).	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Note that ESRS 1 AR 10 does not define "key categories of affected stakeholders" as suggested here but rather provides a questionable (see comments to ESRS 1) list of "common categories of affected stakeholders". As such, the AR 11 is confusing and does not add value.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	AR 11.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	A key to appropriate impact materiality assessment is adequate identification of impacts as a first step. Companies should be required to disclose more comprehensive information about this stage than merely an overview.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (a)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Experience shows that information many companies disclose about their materiality thresholds is largely meaningless for an external reader. As such, suggest adding the word "explain" → "and explain qualitative and quantitative thresholds used and how it determines them".	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (a)
Excels	Finnwatch ry	NGO	Finland			I agree	Agree with emphasis on disclosures needing to go beyond generic information. Experience shows boilerplate reporting and merely name-checking due diligence here is common but of no value to users.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 19.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	In addition to points a & b already included here, companies should also be required to disclose the basis for the materiality conclusion of each material topic/impact. Experience shows that despite how central the double materiality assessment is for reporting, companies' disclosures on their assessment process tend to be overly descriptive of the process itself which is of little value for users. As such, companies should be required to clearly explain why certain topics/impacts are material to them and why other topics are not.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Companies should also be required to disclose whether they have assessed their own involvement (i.e. whether they cause, contribute, or are linked to) to their material impacts and if so, what the conclusion of that assessment has been.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Companies should be required to disclose the basis for the "non material" conclusions for each and every topic that they consider not material for themselves, not only E1.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (b)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The DR could be further clarified by requiring companies to disclose the key contents of their policies only as far as they relate to their identified material impacts.	ESRS2	ESRS 2 - General for policies - GDR-P	34. (a)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	"When applicable" should be removed as it creates confusion over whether to include the information or not. If the company has not given consideration to interests of "affected stakeholders" when setting the policy, it should be required to state so clearly.	ESRS2	ESRS 2 - General for policies - GDR-P	34. (d)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The disclosure should include information also about actions' contribution towards targets: ...how they contribute to the achievement of a policy objective or a target (i.e. add 'target').	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37. (b)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Generally a positive clarification but when reporting on collaborative efforts, companies should be required to specifically indicate their role in and/or contribution to those efforts.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	32.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Add 'metrics' –> a description of the relationship of the target to its policy objectives, action and metrics. Currently, the relationship between metrics and targets is sometimes very unclear in companies' reporting.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (a)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	ESRS2	ESRS 2 - Objective	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	From our reading of the standard, there are overalps between SBM-1, SBM-3 and IRO-2. All three disclosure requirements include a description of the business model, strategy and decision-making with regards to material sustainability impacts, risks and opportunities: SBM-1: "The undertaking shall disclose the following information about the key elements of its general strategy that relate to or affect material impacts, risks and opportunities" SBM-3: "The undertaking shall provide a high-level description of the interaction of the material impacts, risks and opportunities, with its business model, value chain, strategy and decision-making" IRO-2: "concise description of … imaterial impacts…as well as its material risks and opportunities…and how and where impacts, risks and opportunities are connected to its business model, its own operations and its upstream and downstream value chain." We recommend to integrate these provisions in SBM-1 and remove the duplications from SBM-3 and IRO-2. SBM-3 should be focused on current and anticipated financial effects.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Provisions on how to conduct the double materiality assessment (DMA) for environmental topics (especially E2, E3, E4 and E5) are proposed to be deleted completely from the standards. Also the NMIG does not contain related guidance. Generic requirements in ESRS 1, chapter 3 and ESRS 2 IRO-1 do not include topical specifications. Topical instructions for the DMA are of high importance to ensure that undertakings conduct the process in a comparable manner to consistently apply the ESRS. For users it is imporant to gain a get a good understanding of the undertaking's process and how it was applied to specific sustainability topics in order to assess reported information meaningfully.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	(continued): We recommend for the finalization of ESRS 1 (chapter 3) and ESRS 2 IRO-1 to clarify for environmental topics: 1.that screening of sites is an expected step in identifying impacts and assessing their materiality, 2.that local quality of air and soil, water risk factors, incl. water quality, water availability in highly or moderately water-stressed areas, threatened species and ecosystems in biodiversity-sensitive areas need to be part of the screening process, and 3.that material impacts at a specific site or location can trigger the need for providing disaggregated information when reporting policies, actions, targets and metrics The LEAP approach should also be mentioned in ESRS 1 as a possible approach to conduct the impact materiality assessment for environmental topics. Lastly, NMIG on ESRS 1 and 2 regarding the double materiality assessment process should include the essence of the former application requirements from the topical environmental standards.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	As regards the disclosure requirements about anticipated financial effects from sustainability-related risks and opportunities (ESRS 2 SBM-3), we recommend that EFRAG chooses Option 1 (para. 23 (b) and (c)), which would require reporting of quantitative information and, if not possible, qualitative information. Only this option is in line with EFRAG's mandate to improve interoperability with the IFRS standards. In addition, we recommend to clarify that quantitative information on anticipated financial may not need be overly complex and that future financial values are not necessarily expected. Rather, information on the anticipated financial effects of risks should be presented in terms of the value of today's assets and business activities that may be impaired if a material sustainability risk materializes. This approach is used in amended ESRS E1-11 and can provide valuable insights based on information that is generally available.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	AR 33 explains that actions to address environmental impacts can be classified by lever of the mitigation hierarchy (avoidance, minimization, restoration, compensation). We recommend to establish a link to the mitigation hierarchy also in GDR-P on policies.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 33.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Add an application requirement to link CapEx for key actions to the CapEx plans under the EU Taxonomy (Art. 8, DA) which increases interoperability between ESRS and the Taxonomy: "If applicable, the undertaking shall relate its CapEx amounts to the , the CapEx plan required by Commission Delegated Regulation (EU) 2021/2178."	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 35.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The requirement to report all data types and sources used to calculate the metric could be reduced to key data sources. Otherwise, this requirement would require very detailed information which is likely not provide decision-useful.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (a)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	We appreciate the intention of ESRS 2 para. 41 (b) to provide contextual information for environmental metrics, but find that the requirement to report "specific environmental conditions and characteristics of the area where the impact is occurring" for each metric is practically not feasible. This is because many ESRS environmental metrics, for example GHG emissions, pollutant emissions or resource use, do not measure impacts on the environment but pressures. The impacts resulting from these pressures are often not known or complex to determine for an undertaking. For biodiversity metrics (ESRS E4-5), however, such requirement is better suited. Considering, that ESRS 2 para. 41 (d) does already require to report relevant contextual information for all types of metrics, we recommend to remove para. 41 (b) and include the requirement in ESRS E4-5.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We recommend to include topic-specific application requirements to SBM-3 para. 23 (anticipated financial effects) related for pollution and biodiversity. For pollution, the AR should refer to revenues from products that contain substances of very high concern, OpEx and CapEx related to major incidents and costs from environmental protection and remediation of pollution as aspects that can be reported as actual or anticipated financial effects. There should also be a link to biodiversity and ecosystem-("nature-)related financial effects that the undertaking can report here, if material. If it proofs difficult to reinstate these requirements in the AR for ESRS 2, they should at least be included in the non-mandatory guidance.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Add an application requirement to link CapEx for key actions to the CapEx plans under the EU Taxonomy (Art. 8, DA) which increases interoperability between ESRS and the Taxonomy: "If applicable, the undertaking shall relate its CapEx amounts to the , the CapEx plan required by Commission Delegated Regulation (EU) 2021/2178."	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 35.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Disclosures on anticipated financial effects should be voluntary, at least for the first 5 years after the adoption of amended ESRS. This conviction is supported by evidence provided in the first round of ESRS simplification consultation. Firstly, lack of common methodologies by design hinders comparability and makes this disclosure mundane for the end user, while imposing significant burden on issuers, who have to produce such methodologies, validate them etc. – which is especially valid for wave 1 issuers and groups that need to consolidate data from various markets. There are no sectoral pathways at the EU level that issuers could refer to, and available toolkits relate almost exclusively to the operational aspect of transition planning and climate-related transformation, and not financial valuations. Not all industries are equally exposed to and equally dependent on this transformation. Furthermore, significant anticipated financial events are already included in financial statements.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	The obligation to list information disclosed by reference should be limited to voluntary disclosure. Listing referenced disclosures already included in the statement in one place is not needed by the user, since, as we understand it, the purpose of references is to avoid duplications and support smoother navigation through the statement.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (d)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	List of disclosures that derive from other than ESRS legislation should not be required to be disclosed: this disclosure does not bring any value to the key stakeholders of reporting company and, quite opposite, adds complexity to the sustainability statement ("statement"). We believe it would be beneficial that this disclosure is voluntary, allowing issuers that see the value in such information to include it, but not inflate statements that do not require such disclosure.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (f)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Similarly to the option to present IROs together with policies, information on how actions contribute to meeting the goals set out by policies should be allowed to be presented jointly.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	37. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Similarly to the option to present IROs together with policies, information on the relation between targetsm actions and policies should be allowed to be presented jointly, as most often targets are set by the policies and pursued through actions.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (a)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	What is the value added of disclosing a list of the significant sectors that are related to a material IRO? It is difficult to imagine that a material IRO would not be connected to a material sector.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I agree	Wording is unclear	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	18.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Please define "counterparts in the value chain"	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	How do we have to interpret "an undertaking shall use reasonable and supportable information available to it at the reporting date without undue cost or effort"?	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Please clarify what is specifically expected for this data point: "for environmental metrics; [the undertaking shall disclose] the specific environmental conditions and characteristics of the area where the impact is occurring"	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is still not very clear if you can use the wording "Transition plan" while not having all the elements as described in the standards (specifically targets that respond to all the ESRS requirements)	E1	E1-1 - Transition plan for climate change mitigation	11.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	We do not agree to add 1.5°C reference in the requirement (better approach can be keeping a reference to the 2050 objective), as it relies on large-scale deployment of negative emissions technologies (NETs) like carbon capture and storage (CCS) or availability of the biofuels, which are not yet proven/commercially viable at scale.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	We do not agree to add 1.5°C reference in the requirement (better approach can be keeping a reference to the 2050 objective), as it relies on large-scale deployment of negative emissions technologies (NETs) like carbon capture and storage (CCS) or availability of the biofuels, which are not yet proven/commercially viable at scale.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The definition of "dependencies" in Annex II refers to the situation of an undertaking relies on natural, human and/or social resources for its business processes. However, the connection between this concept and "locked-in emissions" does not make sense. Is the term "dependencies" intended as "assumptions"?	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	(a) We do not agree to add 1.5°C reference in the requirement, also not all industries have sectorial pathways developed therefore requirement for the 3rd party to independently validate is not achievable for those (see §AR2a last sentence) (c) the information requested is sensiitive for an organization as it clearly shows the potential vulnerabilities/possible competitve angles on the market.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This is a new requirement which is not seen in the previous Directive requirement §16 and attributed to it ARs.	E1	E1-1 - Transition plan for climate change mitigation	AR 4

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This requirement further complicates the IRO and adds an additional layer to it, making the overall understanding of the IRO very complex.	E1	E1-2 - Climate-related risks and scenario analysis	17.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The information requested is sensitive for an organization as it clearly shows the potential vulnerabilities/possible competitive angles on the market.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This is a new requirement which is not seen in the previous Directive requirements.	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This is a new requirement which is not seen in the previous Directive requirements.	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This is a new requirement which is not seen in the previous Directive requirements.	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The information requested is sensitive for an organization as it clearly shows the potential vulnerabilities/possible competitive angles on the market.	E1	E1-2 - Climate-related risks and scenario analysis	AR 7
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Not clear what "reporting date" at the end of AR means.	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The information requested is sensiitive for an organization as it clearly shows the potential vulnerabilities / possible competitve angle on the market.	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	We believe the requirement to include achieved/expected GHG reduction is bringing a confusion with the reporting on Metrics/Targets. The user might not be clear on the numbers that shall be taken into consideration.	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	(a) Information on "anticipated long-term CapEx and/or OpEx ranges" are very difficult to gather and not always relevant for all the topic. As such, this information should be voluntary. (b) The information requested is sensitive for an organization as it clearly shows the potential vulnerabilities/possible competitive angles on the market.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The information requested is sensitive for an organization as it clearly shows the potential vulnerabilities/possible competitive angles on the market.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This contradicts to GHG protocol where the re-baselining is not time-based. In a sense, it contradicts point (a) of the same AR which only talks about target/reporting boundary (consistent to GHG protocol). It is also not clear how the main target set against an initial base-line will be changed when the base-line is to move every 3 years.	E1	E1-6 - Targets related to climate change	AR 13
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	In case we will be comparing to a different industry (or blended industry) reduction targets, it contradicts the point of explaining the levers, scenarios and taregts for our own business model. Different industries and companies have different business model and as such comparison to their reduction targets is not accurate.	E1	E1-6 - Targets related to climate change	AR 16
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Remove/reduce mix disaggregation and keep total energy consumption as key metric. The required level of energy mix disaggregation adds little or no value in consolidated reporting for groups that report on EU and non-EU assets. Data collection is challenging and reporting has little/no value for the report user.	E1	E1-7 - Energy consumption and mix	29.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Not clear how the following can be evaluated "fails to convery a fair presentation of the emissions...". This is very subjective and open for wide interpretation therefore not aiding in clarity of application.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	19.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The application of this requirement is not clear.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 22
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	(a) Letter (c) is incoherent regarding the boundary of the numerator and denominator: the numerator as per (a) refers to "operational sites" while the denominator seems to be required on the financial boundary. This data is irrelevant. (b) This is a new requirement which is not seen in the previous Directive requirements. The application of this requirement is not clear.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 23
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The application of the term "significant" is not clear (1st line)	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The new wording seems to mandate a disaggregation of GHG emission while the previous requirement was "as appropriate", leaving more flexibility to the reporting company. We recommend to reintroduce the previous wording.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The drafting should be expanded to include avoided emissions in addition to GHG removals and storage. We recommend amending the text to read: "If it has implemented avoided GHG emissions, GHG removal or storage projects, the undertaking shall disclose information about avoided GHG emissions or GHG removal projects it has developed in its own operations or contributed to in its upstream and downstream value chain..."	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	"any other factors necessary to understand credibility..." is not very clear and open for interpretation.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	The information requested is sensitive for an organization as it clearly shows the potential vulnerabilities/possible competitive angles on the market.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	(a) The information requested is sensitive for an organization as it clearly shows the potential vulnerabilities/possible competitive angles on the market. (b) Please refer to question 19 of the General Section	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This is the same information that is disclosed under EU Taxonomy, not clear why it is duplicated.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We support the simplification proposals for DR IRO-1 in ESRS 2 However, as regards audit, several companies point out that the higher level of granularity of the disclosure requirement, the more information auditors will request, which hampers the audit process and risks leading to excessive audit-related costs. An example can be found in DR IRO-1 and the need to disclose the consideration of stakeholder views in the process to identify and assess material impacts, risks, and opportunities. Auditors have requested evidence on each stakeholder engagement (i.e. "who said what and when"), while companies usually do not keep such specific information since stakeholder engagement should be assessed qualitatively (i.e. meaningful stakeholder engagement) and not quantitatively (i.e. specific information about each stakeholder interaction). Therefore, [DRAFT] DR IRO-1 paragraph 25 point (iii) could instead refer to meaningful or relevant stakholder engagement.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	25.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing financial and other resources allocated to action plans for managing IROs as required under [DRAFT] ESRS 2 GDR-A paragraph 38 is extremely difficult for large multinational companies. Many of the actions taken to manage IROs, engage stakeholders, or improve workforce outcomes, are embedded in the core of day-to-day operations rather than being isolated initiatives with dedicated budgets, and driven by cross-functional teams and local management systems. Disaggregating and quantifying these efforts into current and future financial figures, as required in sections (a), (b), and (c), is operationally unfeasible. We recommend simplifying this requirement, perhaps by allowing narrative explanations or high-level estimates that do not require direct reconciliation with financial statements, particularly when such actions are not linked to standalone project financing. Additionally, several members have pointed out challenges with the vagueness of datapoints relating to CapEx and OpEx (i.e. difficulty to report on "future financial resources" and unclear meaning of "significant").	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	The notions of "environmental conditions" and "characteristics of the area" lack clarity and risk leading to excessively granular reporting. Also, this is not possible for all impacts (e.g. GHG emissions are transboundary and not location-based).	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Data points for which phase-ins are planned should be omitted entirely or become voluntary.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	6.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	More flexibility should be granted depending on the legal form and the associated company structure	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Instead of an overarching disclosure obligation, topic-related due diligence disclosures should be anchored	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The reporting requirement makes the stakeholder engagement indirectly binding. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no dtructured engagement takes place should be introduced.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The information should be summarized with ESRS 2 -SBM-1 to avoid duplication. Deleting the second part of the requirement "and the material risks and opportunities for which there is a significant risk of a material adjustment within the next annual reporting period to the carrying amounts of assets and liabilities reported in the related financial statements" is a step into the right direction. However, reporting on current and anticipated financial effects related to risks and opportunities should be overall removed as this goes also beyond requirements in the financial reporting.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The reporting requirement makes the implementation of a resilience analysis indirectly binding. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no resilience analysis has been carried out should be introduced - A reference to ESRS E1-3should be introduced	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The application requirement should be deleted as this could lead to unnecessary discussions with auditors on the level of detail to be included. If the ESRS requirements are clearly described, this AR should be redundant.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 20.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Deletion of "concise" as this is subject to interpretation.	ESRS2		28. (a)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	It is unclear what needs to be reported related to "disclose its exposure to the heightened risk of incidents related to child labour and forced or compulsory labour by type of operations (such as manufacturing plant), or by countries or geographies with operations. [...]". Further clarification on "exposure" needed by referring to existing frameworks such aus UN Guiding Principles or rephrasing	ESRS2		28. (e)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Deletion of paragraph "When reporting on policies, actions and targets, the undertaking shall report relevant information, avoiding information that is boilerplate, and therefore not relevant for users for example when policies and actions have been implemented to comply with law and regulation, or when the necessary information is already provided in accordance with [Draft] Amended ESRS 2 SBM-1. " as this might lead to unnecessary discussions with auditors on what constitutes "boilerplate information" and whether a policy should be reported or not. Certain policies and actions relate to compliance risks (e.g. related to anti-corruption) which makes it difficult to distinguish at the end whether the policy is in scope of this limitation or not.	ESRS2		AR 28.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Changing the significant financial resources allocated for implementing action plans to "key actions" broadens the scope of the requirements and therefore goes against the simplification and reduction aim of EFRAG. It should be changes back to the original wording or completely taken out.	ESRS2		38.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	To be deleted as this is a "may" datapoint and might broaden the scope of resources to be disclosed and might lead to discussions with auditors.	ESRS2		AR 36.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	The requirement is unclear, should be clarified. Assuming paragraph 7 always applies, even when a company adopts phasing-in options.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	SBM-3 is still difficult to understand, and getting the information is so complex. Therefore, consider removing the full SBM-3.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	21.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	SBM-3 is still difficult to understand, and getting the information is so complex. Therefore, consider removing the full SBM-3.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	SBM-3 is still difficult to understand, and getting the information is so complex. Therefore, consider removing the full SBM-3.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	SBM-3 is still difficult to understand, and getting the information is so complex. Therefore, consider removing the full SBM-3.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	It is a complex process to calculate current and future resources, so consider removing this requirement. Getting this information does not provide too much value to stakeholders.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	It is a complex process to calculate current and future resources, so consider removing this requirement. Getting this information does not provide too much value to stakeholders.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (a)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	It is a complex process to calculate current and future resources, so consider removing this requirement. Getting this information does not provide too much value to stakeholders.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (b)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	It is a complex process to calculate current and future resources, so consider removing this requirement. Getting this information does not provide too much value to stakeholders.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (c)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	The word 'prioritises' can be misread to be about the actual prioritising of actions.Or if it rather refers to disclosing how the undertaking 'assess' negative impacts when conducting the DMA process	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (c)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	The word 'prioritises' can be misread to be about the actual prioritising of actions.Or if it rather refers to disclosing how the undertaking 'assess' negative impacts when conducting the DMA process	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (f)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Is it needed to add the term 'boilerplate'? It is not helping with a good clarification to the AR or DR	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	The AR seem to add more strong/binding need to use TNFD / LEAP approach	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	agree to leave out topics omitted	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	27.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	A positive addition, as it might be easier to simplify and merge text and avoid duplications, etc	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Assumed to lead to some changes in the reporting, assumed it can help clean up the structure of the text.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 24.
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I agree	Very important to keep reporting of workers' representatives, as in many Member States this is not a requirement to report in corporate governance statements	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I agree	It is crucial to keep this datapoint in on reporting on stakeholder engagement, particularly for workers' representatives, as this is a requirement in CSRD	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	Central Organisation of Finnish Trade Unions SAK	Trade union	Finland			I agree	It is crucial to report how workers' representatives views have been taken into account by the undertakings' decision making bodies	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	A reference to materiality should be added.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	A reference to materiality should be added.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Current financial effects are not necessarily presented "individually" in the financial statements. Direct reference is therefore not feasible.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We support Option 2 but regarding Option 1 - if it is adopted -, the drafting of point c) should be clarified as regards the "combined financial effects" : are undertakings required to publish aggregated information on anticipated financial effects unless not useful ?	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Para 41 introduces new requirements. Current drafting of para 77 should be maintained.	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	BDO Poland	Auditor	Poland			I disagree	The introduction of the materiality approach to ESRS 2 will disrupt our reporting process. ESRS 2 was intended to be a minimum requirement for all companies to report the information. Currently, if a company doesn't have something, it simply indicates that it doesn't have it/is not relevant to them. I don't know how a company can assess materiality in ESRS 2.	ESRS1	ESRS 1 - 3.2 Interaction between topics to be reported and material impacts, risks and opportunities	29.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	Although this is a new and necessary point, it is still vague enough that it may lead to subjective interpretation.	ESRS1	ESRS 1 - 3.3.1 Impact materiality assessment	35.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	It was already unclear and it remains like this. When asking for the % by gender and other aspects of diversity that we take into accout : what is requested exactly the % by gender on the board only ?	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We need to have more guidances to understand what is needed exactly.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	AR 5.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I disagree	We don't understand this AR and its objective	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Same as AR24. Is it necessary to repeat ?	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 29.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We don't understand why the old 80j was deleted considering this was requested in the objective. If something requested, it is better to have a clear DP to ask for it. Moreover, not consistent with the adding of the 41d in the GDR-M so as to provide explanations comparing to the previous year.	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I agree	We welcome the clarification that sustainability reporting is based on the consolidated financial statements (financial control approach). Consequently, in ESRS 2 para. 4(a), only the first part of the sentence should be retained.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4. (a)
Excels	European Association of Co-operative Banks (EACB)	Association of financial institutions	Belgium			I partially agree and partially disagree	For some metrics the information required by topical ESRS is not specifically defined or relevant for financial institutions (e.g., banks). In those situations, we already considered those metrics that are used to evaluate our performance. Please clarify how the disclosure of these metrics on an entity-specific basis should be dealt with in combination with those metrics on a topical ESRS basis, in the situation that you cannot disclose upon the topical ESRS metrics. In other words, shouldn't you also assess (via your information materiality) if the topical ESRS metrics are relevant considering the evaluation of its performance. If not relevant, you should disclose those entity-specific metrics that are used to evaluate your performance but you shouldn't or cannot disclose the topical ESRS metrics. Based on the amended paragraph it is not clear if solely disclosing entity-specific metrics, in case the topical ESRS metrics are not relevant, is possible. ESRS 1 Chapter 7.4 Relief of metrics, more specifically Paragraph 90, and ESRS 1 Appendix B: Qualitative characteristics of information, more specifically the Section on relevance, does provide some guidance. Please clarify.	ESRS2	ESRS 2 - General for metrics - GDR-M	40.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I disagree	Interest and handling of affected stakeholders are important for governance and environmental aspects as well, not just social. We would urge that it remain for E, S and G topics, since it is an essential part of risk management. Pollution, ecosystem and resource usage are as important for a local community and other stakeholders - as well as corruption, bribery and whistleblowers - in a global production chain and economy.	ESRS2	ESRS 2 - General for policies - GDR-P	34. (d)
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I agree	Great clarifications.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose the following rewording: " This standard refers to disclosing on impacts, risks and opportunities and disclosing on the topics related to them. […]". The application of DMA to all datapoints of ESRS 2 would be hard to apply considering ESRS 2 sets out general disclosure requirements that apply across sustainability topics and defines the undertakings' reporting process for the ultimate identification of material information to be disclosed.	ESRS2	ESRS 2 - Objective	2.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS 2 the "NMIG 5 for para. 17(b)" in the main standard as a new Application Requirement to ESRS 2 para 17.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating from NMIG for ESRS 2 the "NMIG 6 for para. 18" in the main standard as a new Application Requirement to ESRS 2 para 18.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	18.
Excels	ASSIREVI	Auditor	Italy			I disagree	We suggest reconsidering the removal of the ESRS 2 SBM-3 within the social topical (S1: existing para. 14; S2: existing para. 11; S3: existing para. 9; S4: existing para. 10) and including them within ESRS 2 SBM-3. Some provisions helps clarifying the scope of topical standards and IROs, in particular the letter a of each paragraph, that we propose to re-integrate in order to provide a more comprehensive description of the affected stakeholders covered by the requirements of the social standards.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose re-integrating the requirement to disclose information about how senior executive management oversee the setting of target related to material IROs. We believe such information is useful for the users of the sustainability reporting.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (d)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We suggest deleting "where applicable" as as we believe it is essential to disclose such information if exists. We therefore suggest to restore previous paragraph as currently exists in ESRS Set 1 as per Delegated Act 2023	ESRS2	ESRS 2 - General for targets - GDR-T	43. (d)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose adding some of the information contained in the existing para. 13 of ESRS E1 (in old Chapter GOV-3 "Integration of sustainability-related performance in incentive schemes") in the current para. 10 ESRS 2.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	10.
Excels	ASSIREVI	Auditor	Italy			I disagree	We believe that the incremental guidance on aggregation requirements in ESRS 2 AR 23 may create confusion about the level of disclosure required. We recommend deletion of ESRS 2 AR 23 because guidance on aggregation and disaggregation is already addressed in ESRS 1 chapter 3.7	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We welcome the removal of the requirement referring to the next annual reporting period with respect to current financial effects, as this requirement was previously methodologically unclear and difficult to distinguish from anticipated financial effects. However, we continue to see conceptual challenges in the definition of "current financial effects" of material risks by combining financial effects and risks within a single disclosure requirement. By year-end, risks have either materialized and led to financial effects or have not. If they have materialized we are of the opinion that disclosures of material financial effects are covered by respective IFRS standards. Also, we recommend aligning the sustainability reporting requirements with existing risk reporting standards, which should serve as the basis for such disclosures for all risks and not only ESG-risks. In our opinion, sustainability reporting should not override or extend these principles through financial disclosure requirements in the sustainability statement. We therefore recommend that this disclosure requirement should be removed entirely or made explicitly optional.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The change in wording from “action plan” to “key action” creates additional effort for companies, as they must interpret this terminology and align it with their auditors. Furthermore, in our view, this change implies an expansion of the disclosure requirements regarding the associated financial impacts. We reject such an expansion, as it is not aligned with the objective of reducing administrative burden.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	PwC International Limited	Auditor	United Kingdom			I agree	We believe that the requirement to disclose performance against targets (included in ESRS 2 v1 paragraph 80(j)) should be reinstated as part of the general disclosure requirements related to targets. Because this is a key datapoint, we believe inclusion of a general requirement related to performance against targets in the objective is insufficient. We note that there are similar requirements in IFRS S1 paragraph 51(a) and 51(f); reinstating this disclosure requirement would also support interoperability.	ESRS2	General disclosures	43.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	This notion about disaggregation gives the impression that meaningful aggregations of IROs do not apply. Looking at 2024 Sustainability Statements the important thing is that IROs should be meaningfully aggregated so that the reader is not lost in translation. Delete the second sentence.	ESRS2	ESRS 2 - Objective	2.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes have merged, clarified, and simplified. The editorial changes are not substantive.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	3.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The term reporting boundary is associated with the value chain, not with the consolidation scope. Change the wording to: "... and in case the consolidated scope is different from the one adopted in the consolidated financial statements, a description of and the reasons for these circumstances"	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The relief for acquisitions in ESRS 2, paragraph 5(k) should be extended to a period of 2 years with an explanation to describe the reasons for the delay. Acquisitions are inherently complex and require significant time for systems integration. A one-year delay is not sufficient for sustainability reporting due to data limitations. For example, in a typical business combination, there is a one-year period to adjust the balances allocated to the assets and liabilities of the acquired company. If there is an IRO related to an asset (or a portfolio) due to financial materiality, when recalculating the value of the asset at the end of the one-year period, such IRO may change in terms of materiality for sustainability reporting purposes.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	5. (k)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The changes have clarified.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	6.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The start with “In addition” is confusing. Since this paragraph is related to paragraph 6 it would make sense to make this more transparent. Change the wording to: "In the instances mentioned in paragraph 6, for each topic..."	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The wording suggests that time-bound targets must be set. Change wording: "...briefly describe, if applicable, any time-bound targets it has set related to the topics in question, the progress it has made towards achieving those targets, and whether its targets related to biodiversity and ecosystems are based on conclusive scientific evidence;"	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Why is the disclosure restricted to adverse impacts, should this not read as actual or potential positive or negative impacts related to the topic in question?	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (d)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	This has been inserted after pargraph 7 within the section for Disclosure Requirement BP-2. It is an AR for BP-1. So, move this to the section for BP-1, i.e., after paragraph 5.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	AR 1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	This still assumes firms are managed by reference to IROs. The language should be changed so that it does not assume this. We also suggest to emphasise the concept of overseeing sustainability strategy rather than material IROs.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Former paragraph 21(e) should be kept as an AR to provide guidance in the disclosure of the percentage of independent board members.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	9. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	Only material datapoints are retained.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	10.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	There seems to be a typo. Change the wording to "when performance is assessed against specific sustainability-related targets and/or metrics, the targets or metrics used; and"	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The statement on due diligence requirements appears still to be very generic and does not allow for a clear understanding of the required information. We consider the current ESRS version to be clearer in light of the table presented in the Application Requirement 10.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	In our view this paragraph should be moved ahead of other paragraphs in ESRS SBM-1 to streamline the logic flow of the DR.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We propose the deletion of this AR because it does not serve the simplification purposes of the ESRS revision; undertakings can describe groups of products and/or services offered, significant markets and/or customer groups served, and the sustainability-related goals related to them with a more strategic perspective, complying with qualitative characteristics of information.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Why is it necessary to call out workers' representatives. We would suggest deleting this. This would then also align with AR 11 for para. 20 (a). Change the wording to: "whether and how the administrative, management and supervisory bodies are informed about the views and interests of key affected stakeholders with regard to its material impacts, risks and opportunities, either individually or at a higher level (i.e. groups of impacts, risks and opportunities or related topics)"	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Clarify that credit institutions may refer to existing methodologies in describing its DMA process. Please also see our response to Part 2 Q13.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The use of the term negative impacts instead of adverse impacts is inconsistent with the rest of the ESRS.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Be careful with the use of the term risk, which has a very specific meaning in ESRS. It is also questionable why in this context the adverse/negative impacts are emphasised. Change wording to: "the scope of operations and value chain covered, with an indication of whether it focuses on specific activities, business relationships, geographies or other factors ;"	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Is it necessary to specify all of these (26 c to h)? If yes, are they not all aspects of (a), i.e., should they be sub-components to (a)?	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Why are sentences 2 and 3 necessary? It seems to be very detailed and only focused on certain aspects and therefore not reflective of the general nature of ESRS 2 related disclosures. Delete sentences 2 and 3.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	IRO-2 should be split into two. The header does not correspond to what is described in the objective statement in paragraph 27, which refers only to the outcome of the materiality assessment as opposed to that and the disclosure requirements included in the sustainability statement. IRO-2 should therefore only include DPs related to the outcome of the materiality assessment, i.e., Paragraphs 28 (a), (b), (c), and (e). A new IRO-3 should be created to cover the disclosure requirements included in the sustainability statement. This section should include Paragraphs 28 (d) and (f). Paragraphs should then be renumbered accordingly.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	27.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Why is this separately called out? If this is a result of Draft Amended ESRS S1 and ESRS S2 should it not be exclusively addressed in these topic-specific standards?	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (e)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The table of all the datapoints that derive from other EU legislation should be restricted to those that the undertaking assesses as material. From a user perspective it is well understood that things not being disclosed are not material. Change the wording to: "a table of all the datapoints that derive from other EU legislation as listed in Appendix A of this Standard, if material and indicating where they can be found in the sustainability statement"	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (f)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The term metrics is missing. Change the wording to: "Information about policies, actions, metrics and targets shall enable an understanding of the level at which the undertaking is addressing its material impacts, risks and opportunities, i.e. at topic or sub-topic level. In instances where the undertaking has adopted policies or put in place actions or set metrics or targets for certain aspects only, this shall be reflected in the way the disclosure is prepared and presented, enabling an understanding of how the covered aspects relate to the corresponding material impacts, risks and opportunities."	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	29.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The term metrics is missing. Change the wording to: "If the undertaking has not adopted policies, actions, metrics and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact. "	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	30.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Paragraph 31 should be changed from a Disclosure Requirement to an Application Requirement.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	31.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The order of metrics and targets does not follow the way it is described later in ESRS 2. Change the wording the: "The undertaking shall apply the requirements provided in this section, when it discloses either in accordance with a topical standard or on an entity-specific basis, on policies, actions, targets and metrics and targets related to material impacts, risks and opportunities, either individually or at a higher level (i.e. groups of impacts, risks and opportunities or related topics), covering:"	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	32.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The boldening of words within the ESRS is inconsistent. It does not seem useful to bold remediation and potential. Furthermore, the terms prevention, mitigation and remediation are related to negative impacts, i.e., a word corresponding to positive impacts is missing. Change the wording to: "its policies, and actions which address the prevention, mitigation and remediation of actual and potential material negative impacts and material risks and/or to pursue actual and potential material positive impacts and material opportunities; or"	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	32. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The boldening of words within the ESRS is inconsistent. It does not seem useful to bold remediation and potential. Furthermore, the terms prevention, mitigation and remediation are related to negative impacts, i.e., a word corresponding to positive impacts is missing. Change the wording to: "the targets and metrics to assess progress over time in relation to its material impacts, risks and opportunities"	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	32. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	All paragraphs in the GDR-P section need to be reworked to be consistent with other parts of ESRS 2 and any other ESRS. If GDR-P is changed to focus on key policies, GDR-A would have to follow suit.	ESRS2	ESRS 2 - General for policies - GDR-P	33.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	The boldening of words within the ESRS is inconsistent. It does not seem useful to bold remediation and potential. Furthermore, the terms prevention, mitigation and remediation are related to negative impacts, i.e., a word corresponding to positive impacts is missing. Change the wording to: "the targets and metrics to assess progress over time in relation to its material impacts, risks and opportunities"	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Principles-based guidance with respect to "significant" based on familiar concepts of materiality from financial reporting should be provided. Additionally, the use of the term "resources" is inconsistent. On the one hand there is mentioning of CapEx and OpEx, on the other hand there is mentioning of financial and other resources. The wording should be made consistent. Consider using the term resources in this section and add the definition of resources to the Appendix with acronyms and defined terms.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The disclosure requirements concerning the quantification, even as an indicative range, of the financial resources supporting action plans defined by the undertaking are difficult to apply to financial institutions, and potentially complex to interpret for users of the Sustainability Statement, especially in the context of environmental standards where actions do not consist of significant investments but are connected to relationships with clients in the undertakings' portfolio. We therefore disagree with the mandatory nature of these requirements and suggest to maintain only a qualitative description of the resources allocated for implementation of action plans or other key actions	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Paragraphs 41 (b) and (c) are not necessary because (b) is already implicitly covered in ESRS 2. Paragraph 41 (a) and (c) is already covered in ESRS 1.	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The examples are not necessary. Change the wording to: "The metrics include those defined in the ESRS, as well as metrics identified on an entity-specific basis, whether taken from other sources or developed by the undertaking itself"	ESRS2	ESRS 2 - General for metrics - GDR-M	AR 37.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We believe these disclosures are burdensome and it is not practicable to meet all GDR-T and E1-6 disclosures for long-term (usually 2050) Net Zero Commitments or Targets. These are typically managed through a focus on the relevant interim targets along the pathway to Net Zero. Items expected by GDR-T and E1-6 will not be available for target setting 25 years out, resulting in non-decision useful information that is unlikely to meet the Quality of information requirements of ESRS 1. Undertakings that have made long-term Net Zero commitments should be able to limit disclosure to their interim targets which corresponds to how this is managed. Can EFRAG clarify this either in the standards or the NMIG since the Glossary definition of "target" will still pick up firms' 2050 net zero commitments.	ESRS2	ESRS 2 - General for targets - GDR-T	42.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The term "material" is missing. Change the wording to: "The undertaking shall disclose the measurable, time-bound, outcome-oriented qualitative or quantitative targets it has set related to its material impacts, risks and opportunities, either individually or at a higher level (i.e. groups of impacts, risks and opportunities or related topics). For each target, the undertaking shall disclose:"	ESRS2	ESRS 2 - General for targets - GDR-T	43.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	This should not be covered in a separate bullet. It is already sufficiently covered in bullet (f) and does not warrant a separate paragraph. Delete bullet (g). If it is considered necessary, embed it in an appropriate manner in bullet (f). In addition, guidance should be provided as to what constitutes "conclusive scientific evidence" for the basis of targets.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (g)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Deleting the second part of the requirement "and the material risks and opportunities for which there is a significant risk of a material adjustment within the next annual reporting period to the carrying amounts of assets and liabilities reported in the related financial statements" is a step into the right direction. However, reporting on current and anticipated financial effects related to risks and opportunities should be overall removed as this goes also beyond requirements in the financial reporting.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Deletion of requirement to disclose anticipated financial effects. While also a requirement of the IFRS Sustainability Disclosure Standards, (potential future) financial effects from risks and opportunities are already indirectly taken into account when preparing financial statements or are covered as part of the risk and opportunity report in the management report. Calculating sustainability-related anticipated financial effects related to individual sustainability-related risks and opportunities lack reliable and harmonized guidance and therefore provide little information value. Additionally, reporting on financial opportunities is not a requirement in preparing finanical reports and can reveal sensitive strategic information, leading to competitive disadvantages for European companies. It is recommended this is addressed in both ESRS and to collaborate further with the ISSB with the same objective.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The application requirement should be deleted as this could lead to unnecessary discussions with auditors on the level of detail to be included. If the ESRS requirements are clearly described, this AR should be redundant.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	It is unclear how the AR is supposed to be considered when preparing the information for IRO-1, based on the current formulation, and thus leaving room for interpretation (i.e. is it mandatory to screen every individual site for the DMA?). A reformulation is needed or deletion of AR.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	It remains unclear what a company is supposed to disclose in relation to this datapoint. What is meant by "relative to other types of business risks"? Most sustainability risks are highly interconnected to "other business risks" making a differentiation difficult. The integration of risks in the company should be covered as part of GOV-4 (former GOV-5).	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (f)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Deletion of "concise" as this is subject to interpretation.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	It is unclear what needs to be reported related to "disclose its exposure to the heightened risk of incidents related to child labour and forced or compulsory labour by type of operations (such as manufacturing plant), or by countries or geographies with operations. [...]". Further clarification on "exposure" needed by referring to existing frameworks such aus UN Guiding Principles or rephrasing	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (e)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	AR24 allows the IRO description to be presented with policies, actions, and targets in topic-specific chapters, but still mandates an IRO description in ESRS 2 leading to duplications in reporting. It should be sufficient to report the material sustainability topcics in ESRS 2 and disclose IRO-specific information in the respective topical standards.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 24.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Deletion of paragraph "When reporting on policies, actions and targets, the undertaking shall report relevant information, avoiding information that is boilerplate, and therefore not relevant for users for example when policies and actions have been implemented to comply with law and regulation, or when the necessary information is already provided in accordance with [Draft] Amended ESRS 2 SBM-1. " as this might lead to unnecessary discussions with auditors on what constitutes "boilerplate information" and whether a policy should be reported or not. Certain policies and actions relate to compliance risks (e.g. related to anti-corruption) which makes it difficult to distinguish at the end whether the policy is in scope of this limitation or not.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Changing the significant financial resources allocated for implementing action plans to "key actions" broadens the scope of the requirements and therefore goes against the simplification and reduction aim of EFRAG. It should be changes back to the original wording or completely taken out.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	To be deleted as this is a "may" datapoint and might broaden the scope of resources to be disclosed and might lead to discussions with auditors.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 36.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	More clarity is needed on the reporting level, which should be on the topic level	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Information that is sector-specific should be managed on an individual basis	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 7.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Same as above	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	This has been streamlined	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	More structured	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	21.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The wording "Undue cost effort" needs more clarification	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Explaining how a company prioritises risks can be burdensome since prioritisation is a case-by-case process	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While this is important to understand if something is material or not, it should be clear whether the LEAP approach is mandatory or voluntary	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The possibility of disclosing information in aggregate and the cross-reference reduces the burden	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	26.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing environmental conditions, reliance on data from indirect sources, and contextual information about metrics can be burdensome	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Qualitative targets may not be the best option here. They can be used on some exceptions, such as for biodiversity	ESRS2	ESRS 2 - General for targets - GDR-T	43. (b)
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	A reference to materiality should be added.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	A reference to materiality should be added.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Current financial effects are not necessarily presented "individually" in the financial statements. Direct reference is therefore not feasible.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	We support Option 2 but regarding Option 1 - if it is adopted -, the drafting of point c) should be clarified as regards the "combined financial effects" : are undertakings required to publish aggregated information on anticipated financial effects unless not useful ?	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Para 41 introduces new requirements. Current drafting of para 77 should be maintained.	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	With sector-specific ESRS being abandoned, requiring sector-specific information would not provide any additional value for users. This requirement should be deleted.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	Nokia welcomes the introduction of the relief “undue cost or effort” and focus on IFRS interoperability (ESRS 1, paragraph 60). However, it is not really clear what “undue cost or effort” means, how it should be computed and how deep in the supply chain the assessment should run. We call for the introduction of practical boundaries for this concept and how to calculate and demonstrate that required efforts and costs have been met to exercise this relief. See also Nokia’s comments regarding “reasonable and supportable” information / evidence in ESRS 1 - 81.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	The meaning of the concept of "key affected stakeholders" should be included in the glossary, instead of in ESRS 1 AR 10 and ESRS 2 AR11.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	When quantitative information is required or voluntary disclosed, ESRS 2 AR 17 should be maintained and referred to whenever referring to anticipated financial effects, notably on climate matters.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	Nokia welcomes these very important reliefs and restrictions and calls for their applicability throughout the ESRS whenever discussing current or anticipated financial effects or metrics. However, additional reliefs should be introduced to reflect that public companies have restrictions on what kind of forward-looking information they are allowed to disclose and how such information should be published (e.g., in case future investment and plans that have not been announced yet in line with applicable financial regulations).	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 17.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	It is not clear what this disclosure requirement means in practice and why it should be included. Nokia suggests deleting it.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	26. (f)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	This disclosure required is very detailed and specific to S1 and S2. It should be moved back to ESRS S1 and S2, and removed from ESRS 2.	ESRS2	ESRS 2 - General for targets - GDR-T	28. (e)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	Public companies have restrictions on what kind of forward-looking information they are allowed to disclose and how such information should be published (e.g., in case future investment and plans that have not been announced yet in line with applicable financial regulations). Nokia suggests to limit the mandatory requirement to publicly announced plans.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (c)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	This requirement should be disclosed only where applicable, i.e., when a target is required by a law, and not be required otherwise, i.e., not required by law. This would greatly simplify the report and disclosures.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (f)
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I partially agree and partially disagree	the initial datapoints requiring the perimeter and scope of consolidation, the subsidiairies, and the use of the option to omit specific information, have been replaced by a general compliance statement with ESRS 1, which is less useful to an external reader	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4. (a)
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	The requirement to disclose breakdown of revenues has been deleted, and the he ESRS sector classification system. This reduces comparability, and this sectoral iformation is crucial for stakeholders to undestrande business model, and IROs	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree While we support the reasoning behind the reporting requirements, we have noted that wording indicate a checklist format as well as it imposes significant burdens. We suggest nuancing the requirements, focusing on material information rahter than a broad set of requirements. This would e.g. be relevant in relation to updated estimates and information gathered af the end of the reporting period as this might be part of the normal operating procedures with sustainability and therefore not separable. Likewise, adding additional information or applying general relief form metrics might require details vs. materiality of information that would expand the reporting beyond what is useful. We suggest reconsidering the wording. The relief in ESRS 1, paragraph 45(b) is for some reason not listed in ESRS2-5. Users should be informed about any topics that offhand could be assumed (by the user) to be significant to the business model, but due to reasonable and supportable EVIDENCE not being available to assess the materiality level (i.e. data are not reliable to assess materiality), the impact or risk is not reported (if this is the case).	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree The reporting requirement assumes a "full process", while it does not cater for the "update" envisaged in ESRS 1, paragraph 29. We are missing a reflection of the disclosure in its second year and onwards. We recommend it is added that an entity which already have reported on it's DMA process is only required to update on the process conducted in the FY covered by the annual report. (Similar to how you would normally provide strategy updates in the midst of a strategy cycle). This is to ensure that the entity is not repeating information already disclosure in the previous year and which might not have been repeated in the current year, if the underlying assumptions for the DMA have not changed and therefore an updated DMA and associated processes have not been conducted. In these circumstances there should be text which specifies, what the current FY processes have been.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (a)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	We partially disagree We suggest amending ESRS 2, paragraph 28 (d) to exclude requirements on identification of information "incorporated by reference" (ESRS1-9.3) or amend it to be less, allowing for DR-references to the relevant (sub)section in the management review, e.g., "ESRS2-GOV1 is incorporated in section xxx of the management report". The practical solution on identifying sections with different levels of assurance should be left to the preparers and auditors. This would support better integration of, e.g. strategy, business model and the governance-information with the counterparts in the management report.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	We partially disagree, The standards still require somewhat "generic"/boilerplate information regarding policies. In our opinion, the extensive descriptions of policies are not generally considered to support the need for relevant and comparable information. To facilitate better and more focused reporting, we suggest separating reporting on Policies from the more specific actions, metrics and targets, thereby providing a more overarching approach to policies and focusing on the changes to policies adopted in the year rather than extensive repetition of information year-on-year. In addition, we suggest that it's clearly stated that materiality on information apply to all DR, including the description of policies.	ESRS2	ESRS 2 - General for policies - GDR-P	33.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree We believe there are some overlaps between GDR-T and the requirements related to GDR-M and BP / description of accounting principles.	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	This disclosure requirement is changed from "may" to "shall" and therefore adds to the reporting obligations. We do not find an appropriate reasoning for this and believe this adds unnecessary complexity and diverts from the overall purpose of the amendments. We believe that the original "May" MUST either be kept as a "May" or substituted with a "Can", but definitely not changed to a "Shall" (as this also adds documentation and disclosure requirements). Proposed change (marked with capital letters): 44. "If the undertaking has not set any measurable outcome-oriented targets, it CAN/MAY disclose whether and, if so, how it nevertheless tracks the effectiveness of its policies and actions in relation to its material related impacts, risks and opportunities either individually or at a higher level..."	ESRS2	ESRS 2 - General for targets - GDR-T	44.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Generally the Objective section fails to describe the actual general objective of ESRS 2, but rather address specific concepts. It is important for first time readers of the standards to understand the relationship between ESRS 1 and ESRS 2, which should be captured in the Objective sections. For example, this paragraph makes it sound as if the only purpose of ESRS 2 is to describe the GDRs, which is not the case. Instead it should be made clearer how there is a link between the principles set out in ESRS 1 and the disclosures in ESRS 2, making it clear ESRS 2 sets out the actual disclosure requirements following from the general principles and requirements.	ESRS2	ESRS 2 - Objective	1.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Text has been deleted relating to 'scope of consolidation, upstream and downstream value chain', which makes it less clear what should be included in disclosures about basis of preparation. Disclosure about 'specific circumstances' is not clear unless it means the DRs at ESRS 2:5 - if so, para 3 should clearly explain that it is referencing disclosures arising from ESRS1 on specified reliefs and other matters of application.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	3.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	It is confusing to have a paragraph refer to itself, instead amend the text to read: "...either (i) that none of the provisions listed in ESRS 2, paragraph 5 (a)-(k) apply, or (ii) which of the provisions listed in ESRS 2, paragraph 5 (a)-(k) have been applied,..."	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to Appendix C should be Appendix D	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	6.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	This paragraph is an example of complications for distinguishing datapoints by combining several actual points of data into one explicit DP (a-level) (as indicated by paragraphs 9's 'shall disclose'. Based on the drafting convention, this is one DP, but it is asking for both the % of independent board members, employee representatives, gender percentage, and other aspects of diversity. Separating the requirements out clearly in 9(a)-9(d) will help undertakings undertand the requirements more readily.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (a)
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	To enhance alignment with ISSB we recommend explicitly to include IFRS S1: 27(a)(v): how the body(s) or individual(s) oversees the setting of targets related to sustainability-related risks and opportunities, and monitors progress towards those targets (see paragraph 51), including whether and how related performance metrics are included in remuneration policies).	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	See also ESRS 2:15. Simplification is leading to misalignment with IFRS S1, which requires much more disclosure (refer below). IFRS S1: 43-44 Risk management The objective of sustainability-related financial disclosures on risk management is to enable users of general purpose financial reports: (a) to understand an entity's processes to identify, assess, prioritise and monitor sustainability-related risks and opportunities, (...); and (b) to assess the entity's overall risk profile and its overall risk management process. To achieve this objective, an entity shall disclose information about: (a) the processes and related policies the entity uses to identify, assess, (...): (i) the inputs and parameters the entity uses (...); (ii) whether and how the entity uses scenario analysis(...) (iii) how the entity assesses the nature, likelihood and magnitude of the effects of those risks (...); (iv) whether and how the entity prioritises sustainability-related risks relative to other types of risk; v) how the entity monitors sustainability-related risks; and (vi) whether and how the entity has changed the processes it uses (...); (b) the processes the entity uses to (...); and (c) the extent to which, and how, the processes for identifying, (...).	ESRS2	ESRS 2 - GOV-4 - Risk management and internal controls over sustainability reporting	14.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Removal of ESRS 2: 53 par (e) and (f) removes the clear linkages with ERM, reducing alignment with ISSB and an important link to understand the business. (e) the extent to which and how the process to identify, assess and manage impacts and risks is integrated into the undertaking's overall risk management process and used to evaluate the undertaking's overall risk profile and risk management processes; (f) the extent to which and how the process to identify, assess and manage opportunities is integrated into the undertaking's overall management process where applicable;	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We suggest to bring clarity about how to consider the term 'active' and its application to the financial sector. For example is 'active' defined by treference to significantly financing or allocating funding to that sector ? If yes, how to consider 'significantly finance'?	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We suggest to clarify AR 23 as it would seem to allow an undertaking to report only at the topic (or sub-topic) level without actually describing its IROs? The architecture of the standards should be clear in requiring disclosure of material IROs rather than topics	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	While agreeing with the spirit of this, if it needs spelling out then the concept of 'material information' is not sufficiently embedded in ESRS 2 as the intent would be that the undertaking would only include material information as defined in ESRS1 - which should screen out information that is not relevant to the users's decisions/understanding. If retaining this AR, it should be clearly referenced back to the principle of material information	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	We suggest to clarify and/or give additional guidance on how PATs related to laws and regulations should be disclosed as it could be read that material information about application of those laws and regulations is not required. For example : if an undertaking is compliant with the REACH regulation, doest it mean it can only indicate it and does not have to make disclosures related to identification, tracking and management of substances of concern and does it meansit would be exempted from disclosing the quantitative information regarding SOVHC (DR 2-5)? Also, especially in the financial sector, several IROs are linked with regulations and IROs follow from those regulations (example, financial crime, prudential ESG risk management, or also employment policies). In these cases, whatdisclosures are expected from undertakings in the sustainability statement?	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	NMIG 12 is an important clarification of the DR and could be moved as an AR In ESRS 2 alongside AR 23.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL The principles are laid out in ESRS 1, including the principle of disaggregation. It does not seem necessary to pick up this particular principle in the objective of ESRS 2 (what would be the reason to emphasize "disaggregation" but not any other principles, incl. "aggregation" etc.?). In addition: the wording seems a bit off, e.g. this standard refers to disclosing IRO… ?	ESRS2	ESRS 2 - Objective	2.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Necessary to align "objective of this DR" with content of DR: par 3 states that the objective of BP-1 is to provide information about the use of phasing-in options. However, phasing-in disclosure do not seem to require disclosure on phase-in. Instead, this is the subject of BP-2 (which, however, does not have an "objective of this DR").	ESRS2	ESRS 2 - Objective	3.
Excels	DRSC	(National) standard setter	Germany			I disagree	"reporting boundary" seems to address only scope of consolidation (but not VC) - this should be in line with ESRS 1 / clarification needed that "reporting boundary" includes own operations and VC (as understood in ESRS 1)	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Agree with new data point to disclose statement on the application of ESRS 1 requirements incl. an indication of the use of reliefs provided in ESRS 1; However, while we appreciate the streamlined 'comply or explain' approach to only state deviations from the ESRS 1 General requirements provisions, we would find it useful to provide that information in the relevant context and to not list all the details in the first section. We recommend reconsidering the detailed requirements, e.g. requirement in par 5(d), as partial scoping (e.g. extrapolation for own operations or selective inclusion of entities for upstream KPIs) has already been common practice and did not require explicit disclosure. Mandating such disclosure may introduce unnecessary complexity and reporting burden without significantly improving transparency. We suggest clarifying whether these detailed requirement are intended to change current practice or simply formalise existing flexibility.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	DRSC	(National) standard setter	Germany			I agree	new relief for acquisitions and disposals (as laid out in ESRS 1.72-73, see also ESRS 1)	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (k)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL "additional non-material information" (include reference to non-material for clarification)	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (i)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL reference check is needed in par 5; some of the references to the paragraphs in ESRS 1 are not correct (e.g., (a) should refer to par 79, (d) should refert to par 90, (k) should refer to par 72) Suggest to list the excemptions / reliefs in the order of appearance in ESRS 1	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL It needs to be clarified in this disclosure requirment that these disclosures are to be provided for those topics for which the undertaking chose to use the phase-in option (this is apparent from the heading of BP-2, but not from the the disclosure requirement itself).	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Align wording. "Adverse impacts" results from SFDR, however is not defined in ESRS (i.e. not in the glossary). In order to align the wording, "adverse" should be replaced with "negative" impacts.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (d)
Excels	DRSC	(National) standard setter	Germany			I disagree	"how the administrative, management and supervisory bodies determine whether appropriate skills and expertise are available or will be developed to oversee strategies and other measures… " DRSC considers the requirement to disclose "how" an undertaking determines… too vage and of questionable information value. The disclosure requirement should instead include a wording that asks the undertaking to "provide information on skills and expertise". In addition, the new wording ("determine") is likely to be understood differently than "ensure" (current wording) with the earlier asking for information on the process and not only on the knowledge being available; this could be misunderstood as an extension of this disclosure requirement.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	This requirement now ask to disclose those IROs (groups of IROs / topics) for which "key decisions have not been delegated to another body". While this is not marked as a "new" requirement the current ESRS do not seem to contain this information. For every topic there are typically other bodies in the undertaking (besides the administrative, management and supervisory bodies) that takes "key decisions" (while the final decision arguably always resided with the management / supervisory board). It should be clarified what is expected from this disclosure requirement.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (c)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	[relates to the heading] heading, par 10 and 11(a) refer to "incentive schemes" only. The objective, according to par. 10, is to inforam about incentive schemes. However, par 11 refers to incentive schemes "and remuneration policies" without explaining the difference or which specific disclosures are expected for remuneration policies (a, b, and c seem to relate to "incentive schemes"). Generally, it is necessary to align the objective of a DR (here: understanding incentive schemes) with the specifics in the DR (here: incentive schemes and remuneration policies).	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	10.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	Changes in the wording to "impacts' performance" (instead of current "impact") does not seem necessary and raises the question if "impact performance" is not part of the sustainability-related targets. There is no need to refer separately (in addition to sus. targets) to "impact performance". Delete reference to "impact performance".	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (c)
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG "The undertaking may present the description required by paragraph 13 in the form of a table, cross-referencing the core elements of due diligence for impacts on people and the environment- to the relevant disclosures in its sustainability statement." General question about the Due Diligence mapping (now "due diligence description in form of a table"): DRSC supports the approach to ask for a "description" rather than a "mapping". However, if AR 5 suggests a description that is in the form of a table with references etc. that basically is the same format requirement as the mapping. It is necessary to allow for more flexibility for how the undertakings describes the role / integration of due diligence. Therefore, include "description required by par 13 - for example - in the form of a table.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	AR 5.
Excels	DRSC	(National) standard setter	Germany			I disagree	wording of this DR is still questionable as it refers to "risk managment for sustainability REPORTING"; when in fact "risk management" does not usually include the reporting process. While the main features and components of the risk management etc. are expected to provide valuable insights, it is questionable, whether there is a need for disclosures on the risk management regarding the reporting process itself. Therefore, a different wording should be considered.	ESRS2	ESRS 2 - GOV-4 - Risk management and internal controls over sustainability reporting	14.
Excels	DRSC	(National) standard setter	Germany			I agree	agree to the possiblity to group the disclosures for "groups of IRO" or at topic level	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.
Excels	DRSC	(National) standard setter	Germany			I disagree	par 17 seems to require "sustainability-related goals" associated with significant groups of products and/or services, significant markets and / or customer groups. Sustainability related goals are typically not defined on the level of products and/ or services. In addition, this is a new level of disaggregation compared to ESRS DA.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	[relates to 17(a)(ii)] There is currently no definition of "banned products" (i.e. products and services banned in certain markets). There is a need for clarification on which products are to be considered "banned". Are banned products and services those that were introduced into a certain market and afterwards banned? Does this require a specific decision by e.g. a national legislator or regulator? What is to be reported if the undertaking has withdrawn the products / services before a decision was made? Also, some products / services of undertakings are not intended to be sold in a certain market, e.g. b/c there is not demand for them in those markets. [continues in box below]	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	[continued from box above] If these products at a later point in time become prohibited in that market would that be considered a case for a "banned product or service"? Which disclosure is required if product has always been prohibited in a certain market? The disclosure would need a definition / explanation regarding its intention; e.g. seems more sensible to define "banned" for those products that have been on a certain market before and are not allowed on the market anymore. The question that needs to be answered is: what is the intention of this requirement? What do we want to know about these products?	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	Untertakings in the scope of the CSRD typically present some a segment report in its financial statements (according to IFRS 8 or local GAAP). There is not need for an additional disclosure in the sutstainability report to present "a list of significant sectors". An additional list could even lead to less connectivity if an undertaking chose to apply a different "sector classification system" compared to the financial statements. In addition: there is a need to explain the meaning of activities being significant "and/or are connected or may be connected" with material IRO. What is to be understood by "being connected" to or (even less clear) "may being connected" to IROs?	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL list AR on 17(a) first (instead of last in the AR)	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	"the views and interests of key affected stakeholders (including workers' representatives)..." The additional terms in the brackets put an emphasis on "workers' representatives" which is not called for. It is not sufficiently clear or justified why there is the need for an emphasis on workers' representatives over other affected stakeholders. There should not be an unnecessary emphasis on one group of stakeholders. As every wording has an impact on how the standards are read, here: how "affected stakeholders" are understood. It could be read as affected stakeholders being mainly "workers' representatives". Even though the CSRD addresses (e.g. in recital (52)) workers' representatives explicitly this is not an emphasis for the understanding of affected stakeholders or related disclosure requirements. In addition: agree with clarification to "Key stakeholders" and level of granularity (topic instead of IRO)	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (c)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL This is merely a reference to the glossary - this AR can be deleted.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	AR 11.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG The DRSC disagrees with Option 1 but supports Option 2. Furthermore, the DRSC observes the need to refine the concept, including the question what the term "anticipated financial effects" is meant to capture. Additional note: to be consistent, extention of Option 2 to ESRS E1 needed as well. General Note: Clarification for "anticipated financial effects" (in ESRS 2) and "financial effects" (addressed in topical standards) needed. Please refer to our cover letter on this consultation.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23.
Excels	DRSC	(National) standard setter	Germany			I agree	reference to at which level IROs are managed	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 12.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL is this reference to the general principles in ESRS 1 a valuable AR? ("shall use reasonable and supportable information available to it at the reporting date without undue cost or effort") - these principles are relevant for all disclosures and do not seem to add information for the preparer (undue cost or effort relief is explained in ESRS 1)	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL If option 1 is decided on in the end, this relief should be placed in the main body, not in the ARs.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 17.
Excels	DRSC	(National) standard setter	Germany			I agree	"When providing quantitative information, the undertaking may present single amounts or ranges."	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 18.
Excels	DRSC	(National) standard setter	Germany			I disagree	Consider this comment in connection to ESRS E1 (the only other remaining reference to "resilience analysis". The requirements regarding the "resilience analysis" should be contained only in one standard and in one place as the results of the resilience analysis in topical standards directly inform the results of the overall resilience in ESRS 2. No need for separate requirements on resilience in ESRS E1.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL use "negative impacts" consistently (see above; there is currently no definition for "adverse" impacts)	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL Questionable whether this requirement can useful be addressed in a disclosure. It seems to rather result in boilerplate language only. "the approach used to consider impacts and dependencies in identifying and assessing its risks and opportunities" (but this is not a new requirement) Generally, the separate aspects of the list of par 26 seem to relate to each other; difficult to separatly identify each item? It could therefore be helpful to introduce these aspects by: "this disclosure shall include..." (rather than list as if separate disclosures on each are needed); this impression is also supported by the need to further explain any differences in AR 20).	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (e)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL The text of AR 20 indicates that the author of para 26 is aware of the ambiguity para 26 creates. Para 26 should be worded in a way that makes this clarification (AR 20) redundant.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.
Excels	DRSC	(National) standard setter	Germany			I disagree	It is currently not sufficiently clear that the site-level / location-level considerations are not required for the DMA process (which would be a stricter requirement than in the Delegated Act). While AR 22 does not explicitly address the DMA process (which is explained in ESRS 1 instead and therefore ESRS 2 would generally not include requirements regarding the DMA process) there can be a possible misunderstanding which should be avoided. Therefore, it should be clarified in the wording of AR 22 that site-level / location-level are to be considered if there is a need to disaggregate information on the DMA process, but not needed to be considered for the DMA process itself. See also related comment in ESRS 1 on the need to avoid a more granular approach than ESRS DA.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL AR 21 seems to intent to clarify the differences between the various disclosure requirements re/ stakeholder engagement. So far, AR 21 mostly repeats the requirements in IRO-1, SBM-2 etc. The differences could be explained more carefully.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	DRSC	(National) standard setter	Germany			I disagree	The DRSC does not support the requirement to include a list of non-material items.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL aggregation (in ESRS 1 now complemented by "disaggregation") - suggestion to align.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	DRSC	(National) standard setter	Germany			I agree	Generally, the DRSC agrees to the restructured architecture of ESRS regarding the interaction of ESRS 2 and the topical standards. This has significantly improved the readability of the standards and contributed to the streamlining of the disclosure requirements in order to avoid duplication in the sustainability report.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	29.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL par 29 is currently missing the reference to "metrics" (the heading, AR 26 for para 29 and other par in that section correctly include reference to PAT and metrics).	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	29.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL It seems questionable whether this AR is needed. AR 28 merely repeats general underlying principles from ESRS 1, e.g. reporting for the reporting period / no boilerplate. It does not seem necessary to repeat these requirements that are generally applicable to all disclosures. It will raise the question how these requirements are different for General PATM compared to other disclosures. Suggestion to delete.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	DRSC	(National) standard setter	Germany			I disagree	The objective of "understanding of significant changes to the policies adopted during the reporting period" is not reflected in the DR as currently worded. The objective and the content of the DR need to be aligned. General Note for all cases in which objective and content of DR are not aligned: When objective and disclosure requirements are not aligned it opens room for discussion on whether the companies are expected to provide additional information in order to meet the objective of the requirement or if compliance with the ESRS is as well given if the company just sticks to the datapoints in the disclosure requirements. [continues in box below]	ESRS2	ESRS 2 - General for policies - GDR-P	33.
Excels	DRSC	(National) standard setter	Germany			I disagree	[continued from box above] As a general rule, the objectives of the requirements have to be revised and aligned with the datapoints contained in the ESRS or deleted completely. Furthermore, par. 33 reads: "The objective of this GDR is to provide an understanding of the policies that the undertaking has in place to address the prevention, mitigation and remediation of material actual and potential material impacts, manage material risks and pursue material opportunities ...". Material actual and potential impacts can be negative or positive. However, it should be noted that the terms "prevention, mitigation, and remediation" refer exclusively to the mitigation of negative impacts. This should be clarified in this paragraph. If the intention is to include positive impacts, the paragraph will need to be amended accordingly.	ESRS2	ESRS 2 - General for policies - GDR-P	33.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG Policy is defined in the glossary as: A set or framework of general objectives and management principles that the undertaking uses for decision-making. A policy implements the undertaking's strategy or management decisions related to a material sustainability topic. Each policy is under the responsibility of defined person(s), specifies its perimeter of application, and includes one or more objectives (linked when applicable to measurable targets). A policy is validated and reviewed following the undertakings' applicable governance rules. A policy is implemented through actions or action plans. [continues in box below]	ESRS2	ESRS 2 - General for policies - GDR-P	34.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG [continued from box above] This definition seems to include in the understanding the related "processes" (management principles) that the undertakings uses for decision-making and implementing the strategy re/ material sustainability topics. However, in the specific DR it remains unclear where to report on processes related to the policies (previously, processes for managing and monitoring), especially if these processes cannot be seen as "key actions". The former MDR-P explicitly referred to "processes for monitoring" and was explicit. Now, there could be the understanding that processes are not part of policies, but since they are part of implementing policies are now part of "actions". It is necessary for EFRAG to clarify how to understand reporting about policies and actions in regard to general managment processes.	ESRS2	ESRS 2 - General for policies - GDR-P	34.
Excels	DRSC	(National) standard setter	Germany			I agree	agree with integration of information on S-Policy; however, it would be helpful to clarify the precondition of materiality in the context of this requirement	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL The wording does not currently sufficiently clarify that this can contain actions that were initiated in earlier periods.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37.
Excels	DRSC	(National) standard setter	Germany			I disagree	The level of reference for information on current and future financial resources allocated or expected has changed from "action plans" (in the DA) to "key actions" in the ESRSamend. The log of amendment states that par 38 has been "adjusted to link financial resources to key actions". This seems to entail a different, likely more detailed link between financial resources and key actions than before (key actions likely being part of "actions plans"). It should be clarified that there is no change intended with this amendment to the disclosure requirement.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	DRSC	(National) standard setter	Germany			I disagree	The AR contains "Examples of other non-monetary resources". However, this is not mentioned in the para 38 (a) and (c) to which the AR refers to. Therefore: suggestion to delete.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 36.
Excels	DRSC	(National) standard setter	Germany			I disagree	In the view of the DRSC the current wording is prone to misunderstanding. Par 41 states that it is necessary to include this information for "each metric". It is necessary to clarify that the materiality of information concept also underlies this DR, i.e. disclosure on "each" metric not necessarily useful. E.g. while it is very useful for entity-specific metrics which are not explained in the ESRS it would, however, not provide particularly useful/informative for metrics that are determined following the descriptions in the ESRS. Therefore, the DRSC suggests to include "where relevant" (or something similar) as the general criteria for this DR.	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL "undertaking shall use the presentation currency of the financial statements" - should this not be a general requirement (to use the presentation currency)?	ESRS2	ESRS 2 - General for metrics - GDR-M	AR 38.
Excels	DRSC	(National) standard setter	Germany			I disagree	new requirement included for explanations regarding the metrics: "(b) for environmental metrics, the specific environmental conditions and characteristics of the area where the impact is occurring" ; generally agree with the intention (see log of amendments: to provide context for environmental metrics); However, DRSC questions this requirement due to: (a) unclear what exactly undertakings have to disclose here, (b) it would be overly burdensome if the impact cannot be located for one site but appears across operations; and (c) not each metric is directly connected to an impact.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	DRSC	(National) standard setter	Germany			I disagree	"whether the undertaking's targets related to environmental topics are based on conclusive scientific evidence and, if this is the case, how the target considers ecological thresholds." Requirement on disclosing how the target considers ecological threshold is (according to log amendments) taken from E-standards; however appears as a new requirement. To avoid misunderstanding DRSC suggests a clarification that this is not an additional requirement compared to current ESRS.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (g)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL It is important to clarify that targets can comprise "to maintain the currently high standard". The current wording could be (mis-)understood to always refer to improvements (e.g. "progress", par. 43(d)) when in fact there might be topics for which the target is to maintain the results achieved in the past. It could be clarified that a target can also refer to maintaining a result, keep a stable performance.	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	We do not agree with the requirement to combine a mandatory statement that the general requirements of ESRS 1 have been applied with an indication of whether and which of the provisions listed in ESRS 2, paragraph 5 have been applied. This results in meaningless boilerplate text and redundant disclosures. Compliance with ESRS 1 is self-evident, and any use of its provisions is already accompanied by mandatory disclosures under ESRS 1 itself. For example, where an undertaking applies the relief for metrics with a partial scope (ESRS 1, paragraph 91) or restates information due to error correction (ESRS 1, paragraphs 95-97), sufficient transparency is ensured by contextual explanation, disclosure of the limited scope, and correction of prior figures. Requiring additional statements under ESRS 2, paragraph 5 only duplicates this information without providing added value for readers. We therefore recommend deleting the requirement or at least limiting it to cases where paragraph 5 could genuinely add clarity and avoid duplication.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	Paragraph 9 on the representation of employees and other workers in the composition of the administrative, management and supervisory bodies does not specify what is to be considered as representation of employees. We suggest that it clarifies if it means that the board member is being employed by the reporting undertaking or if the board member is a union board member.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	It has been amended but not deleted. We suggest deleting this datapoint to reduce complexity and unnecessary reporting burden.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	It has been amended but not deleted. We suggest deleting this datapoint to reduce complexity and unnecessary reporting burden.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	AR16 should explicitly apply only to material risks and opportunities	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 16.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	Since IROs are already disclosed in IRO-2 §28 (a), it is redundant to also disclose them in GDR-P.	ESRS2	ESRS 2 - General for policies - GDR-P	34.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	A new mandatory disclosure is introduced: whether it has an overarching human rights policy committing to implement the UN Guiding Principles on Business and Human Rights, ILO Declaration on Fundamental Principles and Rights at Work and the OECD Guidelines for Multinational Enterprises. If this is the case, additional disclosures are required. This is a welcomed addition in line with SFDR.	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	A new mandatory disclosure is introduced: whether it has an overarching human rights policy committing to implement the UN Guiding Principles on Business and Human Rights, ILO Declaration on Fundamental Principles and Rights at Work and the OECD Guidelines for Multinational Enterprises. If this is the case, additional disclosures are required. Hence, we suggest to delete this datapoint	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	ESRS S2, S3 and S4 are not classified as metric-containing standards (ESRS 2 AR 37). However, the phrase "disclose these" implies quantitative disclosure, creating confusion about whether these should be treated as metrics and how they fit into the overall metrics and targets framework.	ESRS2	ESRS 2 - General for metrics - GDR-M	AR 37.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We recommend a rewording from IROs to topics: The undertaking shall disclose the measurable, time-bound, outcome-oriented and qualitative or quantitative targets it has set related to its material impacts, risks and opportunities (change to topics).	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	We suggest deleting this datapoint to reduce complexity and unnecessary reporting burden.	ESRS2	ESRS 2 - General for targets - GDR-T	44.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The term "reporting boundary" seems to address under Par. 4 only the scope of consolidation but not the value chain. A definition of "reporting boundary" is both missing in ESRS 1 and the glossary. It would be helpful if a definition is provided to clarify what is meant by "reporting boundary".	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We would propose to list the different deviations (ESRS 2 - 5.(a)-(k)) in the order of appearance in the ESRS 1. This would further align the strcuture of ESRS 1 and the disclosures under ESRS 2. It would increase readability for the preparer as the exemption could be easier traced.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	5.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	The AR should be moved to BP-1 to follow the structure that each AR sits next to the respective DR is covers.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Unclear what is meant with "how the administrative, management and supervisory bodies determine whether appropriate skills and expertise are available". Is it sufficient to have a "competency profile" for the respective body/committee or is a descrpition of all sources for skills/expertise necessary (how can bodies leverage on existing expertise in- and outside of the company)? DR seems vague and not decision-relevant for users. Therefore, delete the DR.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	What is meant with "impacts' performance"? In the current Delegated Act, the DR focuses solely on "impact". Suggestion to delete "performance" to make the DR clearer.	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Datapoint should be deleted as a list of sectors does not provide any added value for external users (no decision-useful information). As there will be no sector-specific ESRS, details on significant sectors will not be provided by preparers (or only based on other frameworks such as SASB). If no clear provision on the use of a specific sector classification is given, the disclosures will be incomparable even within one industry (no added value for users). If NACE code as classification is used (as suggested by NMIG 5 for SBM-1) a reference to the financial reporting makes no sense as financial reporting is not based on NACE codes.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Datapoint should be deleted as a list of sectors does not provide any added value for external users (no decision-useful information). As there will be no sector-specific ESRS, details on significant sectors will not be provided by preparers (or only based on other frameworks such as SASB). If no clear provision on the use of a specific sector classification is given, the disclosures will be incomparable even within one industry (no added value for users). If NACE code as classification is used (as suggested by NMIG 5 for SBM-1) a reference to the financial reporting makes no sense as financial reporting is not based on NACE codes. Also EU Taxonomy might not fit properly in that classification.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 7.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	1. Deletion of the reference to sectors ("and on a sector") as there will be no sector-specific ESRS and the disclosure of a list of significant provides no added value for users (see comments on ESRS 2 Par. 17b and AR 7). 2. The order of the AR should follow the order of the DR. That means the AR 10 should be the first in the list.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Not necessary to highlight "workers' representatives" as key stakeholders, as combination of datapoint and AR 11 clarifies the reporting on key affected stakeholders. "workers' representatives" should be deleted. Alternative: mention all categories of affected stakeholders as outlined in ESRS 1 AR 10.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Deletion. It is completely unclear how the reporting on current financial effects of risks and opportunities should be done. As in the current Delegated Act no guidance is given in the Exposure Drafts or NMIG on how to calcute the financial effects. The effect of risks and opportunities could best be shown as comparison to plan data (for the reporting period: PLAN vs ACTUAL). However, the planning for the respective FY is not published as it is business sensitive information (and there should never be an obligation to publish it). The DR in its current form should be deleted.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We are strongly against the inlcusion of any disclosure on anticipated financial affects. By year-end, risks have either materialized and led to financial effects or have not. If they have materialized we are of the opinion that disclosures of material financial effects are covered by respective IFRS standards. Therefore, both options should be deleted. we recommend aligning the sustainability reporting requirements with existing risk reporting standards, which should serve as the basis for such disclosures for all risks and not only ESG-risks. In our opinion, sustainability reporting should not override or extend these principles through financial disclosure requirements in the sustainability statement. We therefore recommend that this disclosure requirement should be removed entirely or made explicitly optional.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We are strongly against the inlcudion of any disclosure on anticipated financial affects. Both options should be deleted.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 17.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	Very useful to allow the reporting on quantitative information- to be either in single amounts or ranges. For reporting on planning figures ranges are preferred as single amounts do not reflect the uncertainty attached to planning figures.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 18.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The term "negative impacts" should be used instead of "adverse impacts".	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	It seems as if EFRAG is aware of the fact that the reporting on Par. 26a-e will most likely lead in many cases to boilerplate reporting of mostly useless information for users of sustainability statements. A technical description of the DMA process seems not to really relevant for users. Par. 26a-e should be reduced to a short description of the DMA only focussing only key aspects. If boilerplate information is likely, the respective datapoints should be deleted.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The DMA process does not require the inclusion of site-level / location-based analysis according to ESRS 1. Why is this AR required? Should it clarify that this is additional information on the DMA in case site-level / location has been considered? We suggest to clarify the role of this AR and the link to the disclosures on the DMA and the DMA prcess requirements themselves.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Useful option to limit the reporting volume and to clarify PAT disclosures. Editorial remark: This AR should be put last as it refers to Par. 30 whereas all other ARs refer to Par. 29.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 27.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	It seems as if EFRAG is aware of the fact that the reporting on the General Disclosure Requirements might lead to the disclosure of boilerplate and not relevant information for users. This indicates that the General Disclosure Requirements are too broad, inconsise and not decision-useful. Information provided to users should always be decision-useful and relevent. Disclosure Requirement that lead to irrelevant reporting should be either deleted completely (as they provide no value for the user) or re-drafted to make them useful for users. We suggest to indicate clearer which information should be provided or to reduce the scope of the Par. 29.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Unclear if action undertaken in previous years that still have an effect on material IROs in the reporting period can be reported. It should be made clear that action from previous years can be reported as well if still relevant.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	"significant resources" should be changed into "significant financial resources" as the reminder of the whole par. 38 is about financial resources. However, we do not want EFRAG or reporting bodies to define what "significant" is. This should remain a company competence.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The wording should be aligned throughout the whole par. 38 including the connected AR. The wording "significant financial resources" should be used to align the wording within par. 38. "Resource allocation" and "resources" should be replaced accordingly. It should also be clarified that a disclosing a monetary range for the planned allocation of significant financial resources over the whole time period is sufficient.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 35.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Deletion. This AR is not fully related to Par. 38. Par. 38 only refers to disclosures regarding current or future monetary resources. "Non-monetary resources" are not part of the disclosure requirements - there is only a mention of "other resources" under Par. 38a but not Par. 38c. It is therefore not understandable why "examples of other non-monetary resources" may be included if the requirement (Par. 38 in general) does not ask for it. The AR should be deleted.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 36.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Deletion as it does not provide any added value for external users (no decision-useful information).	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Moving the disclosure to ESRS 2 is ok. However, the wording in brackets ("for example, own workforce and workers in the value chain being distinct from consumers and endusers") is unclear. Is it meant as a clarification to indicate the coverage of the human rights policy (which stakeholder groups are covered by the policy taking into account that the human rights policy usually only covers the own workforce and workers in the value chain and not consumers)? The disclosure is closely related to Par. 28e which is only focussing on ESRS S1 and S2.	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Overall, we welcome the flexibility introduced by paragraph 2 allowing datapoints to be presented at level of disaggregation that provides the most relevant information.	ESRS2		
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The centralisation of the basis for preparation related provisions in one paragraph is more comprehensive.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	AR 1 for BP-1 is included in section BP-2 instead	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	AR 1.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The section BP-2 now only contains provisions (par 6 and 7) specific to entities <750 employees, as the other paragraphs moved or were deleted. The full section BP-2 is therefore not applicable to all other entities while it reads 'Specific information if the undertaking uses phasing-in options'. Suggest to merge BP-2 elsewhere or change the title.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	6.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	It should be made clear that paragraph 7 is not a standalone datapoint but relates to, and follows from, paragraph 6.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Should this read 'not delegated' (and not: 'delegated')?	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Unclear and long requirement, consider rewording. For example, what does 'of those' exactly refer to?	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Moving former datapoint 21(d) to AR reflects the nature of this paragraph.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	AR 2.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Not clear why Biodiversity and ecosystems is specifically called out here.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	This paragraph could benefit from a rephrase to make more clear what is required. The 2nd part of the DR seems to say that it should be disclosed which IROs are managed by the administrative, management and supervisory bodies themselves and not by a committee/Sr management level. However, if interpreted correctly, this is not clearly phrased.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	For the reader, it might be helpful if a specific sector classification system should be used by all preparers. That drives uniform reporting and less research for readers when they need to look up a sector classification system to understand the DR.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Should it state "or", or should it state "and" at the end of the sentence? Similar to other metrics, we'd assume that for entity-specific metrics the policies, actions and targets, as well as metrics should be disclosed.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	32. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The reference to segment reporting under IFRS 8 Operating segments was removed from paragraph 17(b), while the AR applicable to this paragraph does refer to it to assess materiality. This does not seem consistent.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	ESRS 2 requires companies to disclose current and future financial resources related to key actions. ESRS 2 should provide clear and detailed guidance on the following: •What classifies as sustainability-related CapEx and OpEx? •What are the criteria for an investment to be considered significant? •What is the time horizon to be applied when calculating & disclosing these effects	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	38.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This AR seems to be a duplicate of ESRS 2 - AR 25	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 29.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Without clear definitions, methodologies, presentation format these disclosures can not be reliably made. It's then also not possible to meet the qualitative characteristic of comparability.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Paragraph uses the term 'its counterparts' - which doesn't seem a defined term in ESRS 2 or Annex II	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This disclosure requirement is not clear. The standard should provide additional detail on what is meant by environmental conditons, environmental characteristics, and area.	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	The AR is supposed to clarify the concept 'key stakeholders' however does not really address what is considered key ('Key stakeholders refer to key categories of affected stakeholders'). If the deliberate intention is to keep this generic, then agreed.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	AR 11.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Overall, we welcome the flexibility introduced allowing datapoints to be presented at level of disaggregation that provides the most relevant information (ESRS 2 - par 2). Of which this AR is an example.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 12.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	Examples of input parameters are helpful.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 19.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Guidance to explain how to navigate between different DRs that touch on stakeholder engagement is generally helpful. The fact that this is needed however, may indicate that for the reader of the sustainability statements (not having such guidance at hand) the structure is complex.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 21.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	AR mentions that information on Policies, Actions and Targets needs to be 'specific to the reporting period'. Especially for Policies, the information will not likely be specific for the reporting period (Policies apply period-overarching). What is meant here in this context?	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	AR mentions that information on Policies and Actions, when they are implemented to comply with law and regulations, would not be relevant for users (and regarded boilerplate). Can it be illustrated with examples what type of Policies and Actions are meant here? As for example some Policies may (partially) be compliance driven - while still relevant in the context of the IROs they relate to. Splitting this information accordingly will also be practically challenging.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This disclosure should be changed as follows: the methodologies, significant assumptions used to define targets, whether the target is required by law (only if applicable), the selected scenarios on which it is based, level of compatability with national, EU, or international policy goals (only if applicable).	ESRS2	ESRS 2 - General for targets - GDR-T	43. (f)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	More clarity is needed on selected scenarios. This may not be applicable to all targets and should only be required if applicable.	ESRS2	ESRS 2 - General for targets - GDR-T	43. (f)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	More appropriate to keep as it was: "a description of a decision-making process and the related internal control procedures", the entire document is mentioning high level processes and does not make sense to change the wording here.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (g)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	AR7. Issue with NEW requirement to disclose list of significant sectors as undertakings already disclose sector(s) leading to duplication and potential for conflicting information – Remove AR7. AR10. Issue with NEW requirement to assess significance of products/services, markets/customers and/or sectors based on % revenue, IFRS or local GAAP, or connection to material impacts, potentially conflicting with existing financial reporting standards – Remove AR10.	ESRS2	SBM-1 - Strategy, business model and value chain	AR7, AR10
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Duplication with existing requirements in ESRS 1 – Remove AR14.	ESRS2	SBM-3 - Interaction of material impacts risks and opportunities with strategy and business model, and financial effects	23(b), AR14
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Issue with labeling impacts as negative or positive when this distinction may not be clear and/or an accurate representation of complex topics for all impacts. In addition, the NEW requirement to specify how these impacts affect or are likely to affect people or the environment may lead to inaccurate, incomplete or misleading information about potential impacts – Revise the requirement to specify that undertakings are not required to label impacts as positive or negative and remove the phrase "including how they affect or are likely to affect people or the environment" from the requirement.	ESRS2	IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28(a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Issue with instructions to "avoid information that is boilerplate… when policies and actions have been implemented to comply with law and regulation", which is not clear or defined (i.e., "boilerplate), may restrict preparers from proving decision useful context to their policies and actions, and may deprive users of this information – Remove the sentence starting with "When reporting on…" from AR28.	ESRS2	General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR28
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Issue with new and potentially substantive requirements that a company's human rights policies "shall specify which groups of affected stakeholders are covered", which follows a new and potentially (implied) substantive requirement that the policy commits to implementing certain external voluntary frameworks. These requirements appear directed at behaviour rather than disclosure, are overly prescriptive, and disregard that undertakings may have due diligence processes where respect for human rights is embedded in multiple policies rather than a single, overarching policy. We recommend to remove these requirements as principles-based requirements are already covered under paragraph 34. To further simplify these disclosures, the GDRs on policies should be aligned with IFRS S1 paragraph 44(a).	ESRS2	General Disclosure Requirement for policies - GDR-P	35, AR30
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Action-related financial information DRs under ESRS 2 GDR-A paragraph 38 should be removed, per our recommendation to remove all financial reporting requirements already subject to IFRS.To further simplify these disclosures, the GDR-A should be aligned with IFRS S1 paragraph 33(a)-(b).	ESRS2	General Disclosure Requirement for actions and resources - GDR-A	38

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	42-43. Challenges with the removal of "whether and" before "how…" (2x, from para 42), and the removal of "material" before "impacts…" (from para 43), as these terms were useful to provide sufficient context where they have not established a target. We recommend reinstating this language in the standard. In addition, the new requirement under 43(g) to disclose how environmental targets which are based on conclusive scientific evidence consider ecological thresholds is not sufficiently precise. We recommend to remove the new requirement to disclose how environmental targets consider ecological thresholds. To further simplify these disclosures, the GDR-Ts should be fully aligned with IFRS S1 para. 51(a)-(g) and IFRS S2 paras. 33-37.	ESRS2	General Disclosure Requirement for targets - GDR-T	42-43
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Agree with disaggregation concept application but definitions of disaggregation seem to differ across ESRS1 and this para therefore alignment needed	ESRS2	ESRS 2 - Objective	2.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Propose to remove datapoint (ii) as not relevant to users of the Sustainability Statement	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Propose to remove data point as the whole purpose of the DMA is to identify material impacts and overview of the process is already covered by part (a)	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Propose to remove data point as the whole purpose of the DMA is to identify material risks and ESRS1 already clarifies sources to be used including enterprise risk management processes so this data point does not add value to the reader	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (f)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Move references to LEAP to NMIG as these models are not mature yet	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Reference to systemic or widespread impacts / risks have been removed from topical disclosures but are not covered in ESRS2 (only reference is too systemic or widespread actions but should apply to the DMA itself)	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We do not support the revised requirement to disclose a breakdown of activities per sector and their connection to IROs. This level of detail is already sufficiently covered through disclosures on the business model and strategy, where material impacts, risks, and opportunities (IROs) are explained in context. Additionally, ESRS 2 already requires companies to indicate where in the value chain IROs occur. Further granularity is also available through EU Taxonomy disclosures, financial statement segment reporting, and the broader annual report, which together provide a comprehensive view of the undertaking's activities. Including this breakdown in the ESRS adds reporting burden without clear added value and risks duplicating existing disclosures.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note that the disclosure requirement has been extended to include reportable segments under IFRS 8, in addition to product/service groups accounting for more than 10% of revenue. This change increases the reporting burden, as IFRS 8 segments may include activities below the 10% threshold. It may also inadvertently discourage voluntary transparency under IFRS 8. We propose giving companies the option to disclose either product/service groups exceeding 10% of revenue or reportable segments under IFRS 8, depending on which provides the most relevant and meaningful insight into their sustainability performance.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The new requirement mandating undertakings to disclose a list of significant sectors they operate in raises concerns about consistency and comparability. If this becomes mandatory, companies must be able to select from a clearly defined, publicly accessible, and officially approved list of sectors to ensure uniform application. Currently, the non-mandatory implementation guidance leaves several options open, which risks inconsistent interpretations and reduces comparability across undertakings.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 7.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The revision of ESRS 2 - 38 increases the level of granularity of resource disclosures. Companies are now required to " indicate the corresponding line items and/or notes where they are included in the financial statements" previously more flexible requirement " explain how they relate to the most relevant amounts presented in the financial statements". We do not believe this is of additional value to users, whereas it adds narrative disclosures, making the report harder to read.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Adapt ESRS 2 wording to reflect a top-down approach by referring to "sustainability topics and their material IROs (or groups of them)," rather than framing it primarily through the lens of "material IROs (or groups of them / related topics)"	ESRS2	ESRS 2 - Objective	1.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Clarify that ESRS 2 starts from the topic level (strategic entry point), with disclosures on associated material IROs where relevant – not the other way around "this standard refers to disclosing on both the topics to be reported and the material impacts, risks and opportunities"	ESRS2	ESRS 2 - Objective	2.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	- Delete the data point on value chain coverage, as Section 5.2 of ESRS 1 already clarifies its treatment in sustainability reporting (addressed in the DMA, limited to the undertaking's scope of responsibility for PAT, and in principle excluded for metrics), and it is redundant with other ESRS provisions (e.g., SBM-3, IRO-1, PAT GDR) - Alternatively, require companies to disclose the "reporting coverage in the sustainability statement, including any limitations"	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	ANC partially supports the new BP-1 datapoint. In principle, any sustainability statement prepared under the ESRS should already comply with ESRS 1, making a blanket affirmation of full application of limited value and potentially boilerplate. The real usefulness lies in requiring undertakings to disclose any deviations from ESRS 1 principles. If retained, all ESRS 1 requirements should be grouped under a single datapoint (basis for preparation), to facilitate tagging and avoid fragmented disclosures. The Excel count file shows that "Basis for Preparation-1 §5" is currently split into six datapoints (a–e, with two for §5b), whereas ANC proposes one datapoint with a single tag (see response to Q22). - Group all deviations from ESRS 1 principles under a single datapoint (basis for preparation), to facilitate tagging and avoid fragmented disclosures - Avoid listing the provisions using letters (a,b,c,d,etc.), to prevent them from being misinterpreted as separate datapoints or tagged disclosures - Replace the reference to §86 with §85 in §5c	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Move phasing-in on related material topics from Basis for Preparation to IRO-2 by adding in §28a: "if applicable, specification of the use of the phase-in provisions in Appendix F of ESRS 1 allowing to omit information on certain material impacts, risks and opportunities" to centralise information on IROs at the same place	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	6.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Remove PAT minimum disclosure content on phased in material topics from Basis for Preparation to GDR by adding a summarised paragraphe such as: "for each topic that relates to material impacts, risks and opportunities, when phasing in have been applied, the undertaking shall however briefly describe its policies, actions, targets and metrics"; this location would be more logical and will allow for a shorter requirement than current §7.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Align GOV-1 with GOV-2 by reflecting the strategic role of governance bodies in managing "sustainability topics and their material IROs (or groups of them)," rather than framing it through the lens of IROs ("material impacts, risks and opportunities (or groups of them / related topics)"	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Reintroduce the datapoint on the number of executive and non-executive members in governance bodies	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Extend the disclosure of the overseeing/approval by governance bodies to DMA results and transition plan on top of target setting (information expected by investors)	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (d)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete the disclosure requirement GOV-3 "Statement on due diligence"; instead include a placeholder in ESRS 1 addressing the articulation between the ESRS and due diligence	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Soften sector significance criteria (10% turnover or connected with material impacts) to become indicative as the objective is only to understand the business	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Require disclosure of employee headcount by geographical area in ESRS 2 as part of the overall company presentation, in addition to the country-level headcount required under ESRS S1	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Remove reference to internal activities in the list of significant sectors (limited to specific cases) and relocate it to the AR	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	- Delete the information on "how the undertaking has addressed or plans to address them (IROs)" when requiring a "high-level description of the interaction of material impacts, risks, and opportunities with the business model, value chain, strategy, and decision-making," as it is redundant with PAT disclosures. Such information should be addressed through concrete sustainability actions rather than at a high-level strategic description; the high-level description should focus solely on their interaction with the business model, value chain, strategy, and decision-making - Reintroduce a reference to positive impacts: "This includes how material negative and positive impacts originate from the strategy and business model." - Align SBM-3 with top-down approach by highlighting that business model, strategy and decision making interact with "sustainability topics and their material IROs (or groups of them)," rather than focusing on granular IROs	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Explicitly state that current effects should be reported "after past prevention and/or mitigation measures" to avoid creating ambiguity	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Mention climate and biodiversity risks in the AR to support their consideration in the biodiversity assessment, especially following the deletion of the related topical requirement in E4: "The undertaking shall disclose a qualitative analysis of its resilience to the material risks disclosed in accordance with paragraph 22, including how the analysis was conducted and the time horizons considered, which may be particularly relevant for climate and biodiversity topics in high impact sectors."	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	24.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Move data points on impact prioritisation, consultation findings, and consideration of impacts/dependencies in the risk/opportunity assessment to AR, as they conflict with the DMA approach in ESRS 1 (which allows for a top-down methodology) Proposed wording: "The undertaking shall disclose the following: a) an overview of the methods, assumptions, inputs (including whether and how views of affected stakeholders are factored) and judgements used during the assessment, in particular regarding materiality (qualitative and/or quantitative) thresholds; b) whether and how the undertaking prioritises sustainability risks relative to other types of business risks, including its use of risk assessment tools; and c) a description of the decision-making procedures, including significant changes compared to prior reporting period."	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Delete the data point on changes related to its material IROs compared to the previous reporting period, and merge it with the existing data point (§26g) on "description of the decision-making procedures, including significant changes compared to prior reporting period"	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (c)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Clarify the term "appropriate level of aggregation" particularly between group and subsidiary levels	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Move categorisation of material IROs based on management priorities to AR	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	31.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	- Delete the reference to "avoid generic descriptions except where necessary to enable an understanding of the undertaking's current approach to manage its material IROs," as such descriptions contradict the qualitative characteristics, and may raise audit, supervision, and enforcement issues - Instead, specify in this AR: "Information on inputs for the materiality assessment, especially data and tools used, is often more relevant when provided at the level of topics"	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Delete the information on "how and where impacts, risks, and opportunities are connected to the business model, own operations, and upstream and downstream value chain" when requiring "a concise description of actual and potential, positive and negative material impacts, as well as material risks and opportunities," as this is redundant with SBM-3, which already asks for an explanation of their interaction with the business model	ESRS2	ESRS 2 - General for policies - GDR-P	28. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Introduce a reference to positive impacts in the policies, allowing undertakings to disclose policies addressing positive impacts, notably on social matters: "The objective of this GDR is to provide an understanding of the policies the undertaking has in place to prevent, mitigate and remediate material negative impacts, advance material positive impacts, and manage material risks and pursue material opportunities"	ESRS2	ESRS 2 - General for policies - GDR-P	33.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Gap with ANC proposal : deletion of when the policy refers to third party-standards or initiatives the undertaking commits to respect through the implementation of the policy, a reference to such third-party standard or initiative should remain voluntary;	ESRS2	ESRS 2 - General for policies - GDR-P	34. (c)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Gap with ANC proposal : deletion of "for social topics, a description of the consideration given to the interest of affected stakeholders in setting this policy, when applicable" as it is already required in S standards	ESRS2	ESRS 2 - General for policies - GDR-P	34. (d)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Gap with ANC proposal : deletion of whether it has an overarching human rights policy committing to implement the UN Guiding Principles on Business and Human Rights, ILO Declaration on Fundamental Principles and Rights at Work and the OECD Guidelines for Multinational Enterprises	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	We urge the removal of the implied mandatory disclosure requirement of all internal performance indicators (KPI) because the datapoint requests "shall disclose the metrics that it uses to evaluate its performance". This datapoint should only focus on the mandatory datapoints of the ESRS. The company has more KPI internally that are used for monitoring but these cannot all be made public.	ESRS2	ESRS 2 - General for metrics - GDR-M	40.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Gap with ANC proposal : deletion of "for environmental metrics, the specific environmental conditions and characteristics of the area where the impact is occurring" or replacement with "any relevant contextual information"	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Gap with ANC proposal : deletion of "for value chain metrics, the reliance on data from indirect sources or proxies, and where applicable, the planned actions to improve the data quality in the future" as this is already mentioned in ESRS 1 and as the standardised metrics are not covering the value chain (except scope 3)	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (c)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	- Add the requirement of the performance achieved against the disclosed targets, as well as the related metric	ESRS2	ESRS 2 - General for targets - GDR-T	44.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Similar to IFRS standards, the introduction of the Fair Presentation principle in ESRS 1 needs to be supplemented by a requirement of an "explicit and unreserved statement of compliance with ESRS" by the undertaking. It may be implicit in the reference to "the general requirements of ESRS 1 have been applied", but the explicit and unreserved statement of compliance with ESRS should be a distinct and explicit requirement in BP-1. This is also aligned with IFRS S1 and IAS 1.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We consider that ESRS 2 BP-1 §5(h) should be modified, as the exact scope of omission covered by this requirement is unclear. It could be understood as relating to: -(a)"classified and sensitive information" covered by ESRS 1.98 and -(b) information about impending developments or matters in the course of negotiation covered by ESRS 1.AR 35 –as indicated literally by the drafting of the datapoint; or relating also to -(c) information pertaining to intellectual property, know-how or the results of innovation covered by ESRS 1 §99 – as indicated by the reference into brackets in this datapoint, mentioning ESRS 1.99 and 101. We would expect a requirement to disclose whether information was omitted relating to situations (b) and (c) in line with the current requirements under ESRS Set 1. The requirement to disclose the omission of "classified and sensitive information" (situation (a)) as suggested by the ED goes beyond ESRS Set 1 which does not require companies to explicitly confirm omission of "classified and sensitive information". This is to avoid disclosing the existence of such information defined by EU laws, and inadvertently compromising confidentiality or security.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	5. (h)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We believe there is a typo and consider that Appendix C should be replaced with "Appendix D".	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	6.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We suggest to extend this datapoint to also consider risks in addition to adverse impacts.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	7. (d)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We would rather support an approach where information required by ESRS 2 § 4 on the extent of the value chain (ESRS 2 §4(b)) and reporting boundaries (ESRS 2 §4(a)) be still provided within the General information section, in the interest of transparency and readability of the sustainability statement. We therefore suggest EFRAG to specify that information pertaining to ESRS 2 § 4 still needs to be provided within the General information section of the sustainability statement.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We suggest to include a reference under ESRS 2 GOV-4 to CSDDD requirements to ensure alignment between CSRD and other EU legislation.	ESRS2	ESRS 2 - GOV-3 - Statement on due diligence	13.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	In accordance with our comment below, we agree with this clarification.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We agree with this clarification and alignment with the definition currently provided in the SFDR Regulation, which would exclude financial institutions from being active in fossil fuel sectors. We recommend adding an explicit reference to the SFDR Regulation (2019/2088) within AR 9. Companies active in the fossil fuel sector would be those "that derive any revenues from exploration, mining, extraction, production, processing, storage, refining or distribution (…) of fossil fuels". This is also in line with AR 8 for §17(b), which clarifies that the "undertaking is not considered to be active in the sectors of operations of its counterparts in the upstream and downstream value chain".	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 9.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	See comment for ESRS 2 – 20.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	AR 11.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Para 20 and AR11 for Para 20 only refer to engagement with 'affected stakeholders'. Previously, in Set 1, this requirement referred to the general definition of stakeholders (including 'primary users of information'). We ask EFRAG to clarify if this reduction in scope was intended. It may be relevant in some sectors (in particular banking, fintech etc.) to engage / disclose information on views and interests of users such as investors.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The proposed simplification to resilience-related disclosure requires only qualitative information, which is inconsistent with IFRS requirements ('quantitative information to be disclosed if applicable'). We ask EFRAG, in line with our response to Part 2 Question 21, to maintain a requirement to disclose quantitative information related to resilience.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	24.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We recommend clarifying that the description of material IROs (§28) should reflect their underlying characteristics and the undertaking's specific facts and circumstances (as implied by the requirement for a "concise description of IRO"). Considerations relating to the management of IROs are more relevant when disclosing on the related PATs which can be aggregated accordingly. A clear mapping between individual IROs from DMA and aggregated disclosures would enhance transparency. We also ask EFRAG to insert a datapoint within ESRS 2 IRO-2 to require undertakings to provide a table indicating what additional information was included within the sustainability statement along with the location of such information in the sustainability statement.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We are concerned that the meaning of reporting "at the appropriate level of aggregation (…) depending on the nature of the IROs and reflecting the level at which the undertaking manages them" could be interpreted in different ways: -one interpretation is that disclosures should reflect the level where policies and actions are defined and implemented i.e., the operational level at which IROs are actively managed. We would support this approach for the PATs disclosures related to material IROs. However, it should be clarified how to report on IROs not (yet) managed -another broader interpretation could allow reporting at a high aggregation level (e.g. environmental or social level), even if IROs differ significantly in nature, location, or business/management context. EFRAG should clarify these concepts to avoid reporting on a level that is insufficiently granular to understand the IROs and how they are managed.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We are concerned that the meaning of reporting "depending (…) on differences in the undertaking's current approach to their management" could be interpreted in different ways. Please refer to our comment on AR23 which describes the different interpretations. EFRAG should clarify to avoid reporting on a level that is insufficiently granular to understand the policies, actions, metrics and targets and how they are managed.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We welcome this additional flexibility provided by EFRAG with regards to the presentation of the description of material IROs.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 29.
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	We disagree with this datapoint within GDR-M as we consider this a substantial addition compared to the previous MDR-M disclosure requirement in ESRS Set 1. Although the log of amendments mentions that this was added from environment ESRS to centralise the provision on contextual information we do not recognize this as being required for all environmental metrics in ESRS Set 1. Furthermore, providing this type of information for each metric would be a highly complex exercise for undertakings. We consider that the burden associated with this datapoint outweighs its potential benefits. As such we ask EFRAG to remove ESRS 2 §41(b). If considered necessary this disclosure could be added for certain specific metrics where this information would be considered relevant	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The term "reporting boundary" seems to address under Par. 4 only the scope of consolidation but not the value chain. A definition of "reporting boundary" is both missing in ESRS 1 and the glossary. It would be helpful if a definition is provided to clarify what is meant by "reporting boundary".	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We would propose to list the different deviations (ESRS 2 - 5.(a)-(k)) in the order of appearance in the ESRS 1. This would further align the strcuture of ESRS 1 and the disclosures under ESRS 2. It would increase readability for the preparer as the exemption could be easier traced.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	5.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	The AR should be moved to BP-1 to follow the structure that each AR sits next to the respective DR is covers.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	AR 1.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Unclear what is meant with "how the administrative, management and supervisory bodies determine whether appropriate skills and expertise are available". Is it sufficient to have a "competency profile" for the respective body/committee or is a descrpition of all sources for skills/expertise necessary (how can bodies leverage on existing expertise in- and outside of the company)? DR seems vague and not decision-relevant for users. Either delete the DR or replace it by a summary of the necessary skills and expertise necessary for the oversight of the strategies and other measures to respond to material IROs for each body.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	What is meant with "impacts' performance"? In the current Delegated Act, the DR focuses solely on "impact". Suggestion to delete "performance" to make the DR clearer.	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Datapoint should be deleted as a list of sectors does not provide any added value for external users (no decision-useful information). As there will be no sector-specific ESRS, details on significant sectors will not be provided by preparers (or only based on other frameworks such as SASB). If no clear provision on the use of a specific sector classification is given, the disclosures will be incomparable even within one industry (no added value for users). If NACE code as classification is used (as suggested by NMIG 5 for SBM-1) a reference to the financial reporting makes no sense as financial reporting is not based on NACE codes.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Datapoint should be deleted as a list of sectors does not provide any added value for external users (no decision-useful information). As there will be no sector-specific ESRS, details on significant sectors will not be provided by preparers (or only based on other frameworks such as SASB). If no clear provision on the use of a specific sector classification is given, the disclosures will be incomparable even within one industry (no added value for users). If NACE code as classification is used (as suggested by NMIG 5 for SBM-1) a reference to the financial reporting makes no sense as financial reporting is not based on NACE codes. Also EU Taxonomy might not fit properly in that classification.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 7.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	1. Deletion of the reference to sectors ("and on a sector") as there will be no sector-specific ESRS and the disclosure of a list of significant provides no added value for users (see comments on ESRS 2 Par. 17b and AR 7). 2. The order of the AR should follow the order of the DR. That means the AR 10 should be the first in the list.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 10.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Not necessary to highlight "workers' representatives" as key stakeholders, as combination of datapoint and AR 11 clarifies the reporting on key affected stakeholders. "workers' representatives" should be deleted. Alternative: mention all categories of affected stakeholders as outlined in ESRS 1 AR 10.	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Deletion. It is completely unclear how the reporting on current financial effects of risks and opportunities should be done. As in the current Delegated Act no guidance is given in the Exposure Drafts or NMIG on how to calcute the financial effects. The effect of risks and opportunities could best be shown as comparison to plan data (for the reporting period: PLAN vs ACTUAL). However, the planning for the respective FY is not published as it is business sensitive information (and there should never be an obligation to publish it). The DR in its current form should be deleted.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We are strongly against the inlcudion of any disclosure on anticipated financial affects. Both options should be deleted.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We are strongly against the inlcudion of any disclosure on anticipated financial affects. Both options should be deleted.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 17.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	Very useful to allow the reporting on quantitative information- to be either in single amounts or ranges. For reporting on planning figures ranges are preferred as single amounts do not reflect the uncertainty attached to planning figures.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 18.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The term "negative impacts" should be used instead of "adverse impacts".	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	It seems as if EFRAG is aware of the fact that the reporting on Par. 26a-e will most likely lead in many cases to boilerplate reporting of mostly useless information for users of sustainability statements. A technical description of the DMA process seems not to really relevant for users. Par. 26a-e should be reduced to a short description of the DMA only focussing only key aspects. If boilerplate information is likely, the respective datapoints should be deleted.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The DMA process does not require the inclusion of site-level / location-based analysis according to ESRS 1. Why is this AR required? Should it clarify that this is additional information on the DMA in case site-level / location has been considered? We suggest to clarify the role of this AR and the link to the disclosures on the DMA and the DMA prcess requirements themselves.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Useful option to limit the reporting volume and to clarify PAT disclosures. Editorial remark: This AR should be put last as it refers to Par. 30 whereas all other ARs refer to Par. 29.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 27.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	It seems as if EFRAG is aware of the fact that the reporting on the General Disclosure Requirements might lead to the disclosure of boilerplate and not relevant information for users. This indicates that the General Disclosure Requirements are too broad, inconsise and not decision-useful. Information provided to users should always be decision-useful and relevent. Disclosure Requirement that lead to irrelevant reporting should be either deleted completely (as they provide no value for the user) or re-drafted to make them useful for users. We suggest to indicate clearer which information should be provided or to reduce the scope of the Par. 29.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Unclear if action undertaken in previous years that still have an effect on material IROs in the reporting period can be reported. It should be made clear that action from previous years can be reported as well if still relevant.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	"significant resources" should be changed into "significant financial resources" as the reminder of the whole par. 38 is about financial resources. EFRAG should think about giving an indication what is meant by "significant". The term "significant resources" is not defined.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	"financial resources" should be changed into "significant financial resources" to align the wording within par. 38.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The wording should be aligned throughout the whole par. 38 including the connected AR. The wording "significant financial resources" should be used to align the wording within par. 38. "Resource allocation" and "resources" should be replaced accordingly. It should also be clarified that a disclosing a monetary range for the planned allocation of significant financial resources over the whole time period is sufficient.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 35.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Deletion. This AR is not fully related to Par. 38. Par. 38 only refers to disclosures regarding current or future monetary resources. "Non-monetary resources" are not part of the disclosure requirements - there is only a mention of "other resources" under Par. 38a but not Par. 38c. It is therefore not understandable why "examples of other non-monetary resources" may be included if the requirement (Par. 38 in general) does not ask for it. The AR should be deleted.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 36.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Deletion as it does not provide any added value for external users (no decision-useful information).	ESRS2	ESRS 2 - General for metrics - GDR-M	41. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Moving the disclosure to ESRS 2 is ok. However, the wording in brackets ("for example, own workforce and workers in the value chain being distinct from consumers and endusers") is unclear. Is it meant as a clarification to indicate the coverage of the human rights policy (which stakeholder groups are covered by the policy taking into account that the human rights policy usually only covers the own workforce and workers in the value chain and not consumers)? The disclosure is closely related to Par. 28e which is only focussing on ESRS S1 and S2.	ESRS2	ESRS 2 - General for policies - GDR-P	35.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ED 2025 §3-5 vs 2023 BP-1 §4-17 & BP-2 §6-17. Narrative optionality removed and increased mandatory cross-referencing to every ESRS 1 provision and conformation of equivalence increased technical work as this is an added compliance step (undertakings must map a mandatory list of 10 specific ESRS 1 reliefs/options where companies must check a box).	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	3.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ED 2025 §6-7 replacing 2023 BP-2 §6-17. Overall compliance effort does not materially change through the proposal to migrate obligations to BP-1 and retain multiple bullet point confirmations. Only removes optionality for narrative and limit scope exclusively for undertakings with > 750 employees.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	6.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Still assumes firms are managed by reference to IROs; DR should be changed "whether and if so" questions - Applicable to GOV-1, GOV-2, GOV-3, GOV-4: These disclosure requirements are very perspective, they don't take account of materiality and they ultimately do not yield useful comparison data. We should advocate for a framework that grants companies the discretion, based on their size, industry and specific needs, to determine the most effective and appropriate methods for establishing, overseeing and managing their respective sustainability programs. We should also remind EFRAG that the overarching intention here is to simplify process and reduce burden and cost for business - these detailed disclosure requirements undermine that goal by adding to expenses and operational complexities. It's worth noting to EFRAG too that overly prescriptive requirements may inadvertently lead to companies issuing standardised compliance (tick the box) disclosures, which, while fulfilling the letter of the law, might not necessarily translate into meaningful improvements in transparency or the advancement of sustainability programs.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	9.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Would like to see optionality for private company boards. ED §9(a) vs 2023 §21(a),(c). Cuts two quantitative datapoints (number of executive vs non-executive members and sector/geography). Retains disaggregations (gender, independency, employee representation) which is still onerous for large groups. Deletion not substantial enough to ease collection & assurance burden.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ED §9(b) vs 2023 §23. New explicit requirement to explain how skills & expertise are determined. Shifts from data listing to narrative but still requires qualitative evidence that does not reduce burden and creates potential audit challenges.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	9. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Would like more clarity on if incentive schemes need to align with material topics or can be more general for sustainability topics overall.	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	10.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ED §11 vs 2023 §29. Improved to only if applicable and limits data points. Data points reduced from five to three: removes (i) identification of specific benchmarks in remuneration policy and (ii) level at which schemes are approved. Still requires monetised % of variable pay, which is commercially sensitive information.	ESRS2	ESRS 2 - GOV-2 - Integration of sustainability-related performance in incentive schemes	11.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ED §14-15 vs 2023 §34-36. Removes five narrative datapoints; reduction in internal-audit mapping. Retains only description of "scope, main features and components". Deletes mandatory disclosure of risk-assessment approach, main risks identified, mitigation controls, integration, and periodic reporting. Materially lighter; however high-risk sectors may still be required to report similar/duplicative information under topical ESRS, limiting net relief.	ESRS2	ESRS 2 - GOV-4 - Risk management and internal controls over sustainability reporting	15.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ED §17(b)-18 vs 2023 §40(a)(iii)-(g), §40(b)-(d). Partial simplification. Retains fossil fuel/chemicals/controversial weapons/tobacco statement. Eliminated revenue table, headcount and reconciliation. Revenue breakdown by ESRS sector deleted; only "list of significant sectors" now required. Headcount by geography, banned products, explicit sustainability goals, and IFRS 8 reconciliation deleted.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	ED §20 vs 2023 §45. Shortens narrative; fewer speculative forward-looking claims to substantiate. Collapses five sub-requirements into three: engagement overview, stakeholder views, board information. Deletes mandatory disclosure of engagement organisation/purpose and future amendments to strategy	ESRS2	ESRS 2 - SBM-2 - Interests and views of stakeholders	20.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	- In relation to the activity covered by this clause (d), the term "reasonable and supportable," particularly "supportable," needs to be clarified as it could be interpreted as requiring a level of validation or the implementation of governance and control processes that would defeat the term's intended purpose, in this context should mean that the information is relevant and satisfies the fair presentation and qualitative characteristics of information requirements specified in ESRS 1. Such an approach is consistent with the acknowledgement in Section 7.2 of ESRS 1 that disclosed information is subject to the application of judgement, as well as measurement and outcome uncertainty.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We continue to believe that disclosure on anticipated financial effects is inappropriate given that such effects are extremely difficult for companies to predict with any degree of certainty. Moreover, such disclosure would in many cases include commercially sensitive information, necessarily include financial information not already included in the undertaking's financial statements, and is unnecessary for an understanding of an undertaking's material sustainability-related risks and opportunities.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				At first introduct, consider that we mean "material risks," "material impacts," and "material opportunities", i.e that material modifies all 3 terms and that there is no expect to report all imapcts, only material ones	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	25.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ED §26 vs 2023 §53. Inmaterial simplification. Slight narrative condensation; no change to underlying analytical workload. Substantive scoping, stakeholder consulation amd LEAP-style (locate, evaluate, assess, prepare)screening retained.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ED §28(d)-(f) vs 2023 §56-57. Change does not simplify; the new labour-risk disclosure introduces additional supply-chain mapping. While the proposal removes granular cross-referencing, it adds a mandaotry labour-risk table resulting in an overall net effect of neutral to heavier for global supply-chains.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Multiple ED §33-44 vs 2023 §63-81. Re-labels MDR-P/A/M/T as "General Disclosure Requirements"; allowing aggregation when same policy/action covers multiple topics (positive). Benefit offset by introduction of overarching Human Rights policy datapoint (previously spread across S-standards)	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 26.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Administrative optionality is welcome but the changes does not materially simplify compliance obligations and burden	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	31.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Introduces new overarching Human Rights policy datapoint (previously spread across S-standards). Disclosure misaligned with simplification objective.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	35.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				We recognize that GDR-T allows flexibility on targets and recommend adding further acknowledgement of the challenges of setting measurable targets in connection to people	ESRS2	ESRS 2 - General for targets - GDR-T	44.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Guidance should be provided as to what constitutes "conclusive scientific evidence" for the basis of targets. Add "if any" after "targets"	ESRS2	ESRS 2 - General for targets - GDR-T	43.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Like the specific clarity on format of report.	ESRS2	ESRS 2 - BP-2 - Specific information if the undertaking uses phasing-in options	AR 1.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Like the ability to report at an aggregated topic level as compared to individual IROs.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	By attempting to streamline this overarching social metric from the Topical Standards to the General Standard, it has created increased confusion with the context of human rights policies and how these policies relate to a reporting entities policies and procedures. This disclosure requirement should be broken back out into the various Topical Standards to enhance clarity and context.	ESRS2	ESRS 2 - General for policies - GDR-P	35.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Remove "and planned for the future" from "When the undertaking implements key actions to manage material impacts, risks and opportunities, it shall disclose: (a) the description of the key actions taken in the reporting year and planned for the future..."	ESRS2	ESRS 2 - General for actions and resources - GDR-A	37.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Add clarification for how to approach for entities using Artificial Consolidated reporting	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 38.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	More clarity is needed on the reporting level, which should be on the topic level	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Information that is sector-specific should be managed on an individual basis	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 7.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Same as above	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	AR 8.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	This needs to be clarified, it is confusing what actually is requested.	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	More structured	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	21.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The wording "Undue cost effort" needs more clarification	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	AR 15.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Explaining how a company prioritises risks can be burdensome since prioritisation is a case-by-case process	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	26.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While this is important to understand if something is material or not, it should be clear whether the LEAP approach is mandatory or voluntary	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	The possibility of disclosing information in aggregate and the cross-reference reduces the burden	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	26.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing environmental conditions, reliance on data from indirect sources, and contextual information about metrics can be burdensome	ESRS2	ESRS 2 - General for metrics - GDR-M	41.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Qualitative targets may not be the best option here. They can be used on some exceptions, such as for biodiversity	ESRS2	ESRS 2 - General for targets - GDR-T	43. (b)
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Qualitative information should be mandatory instead of quantitative information as collection of quantitative information is subject to a high degree of uncertainty. Data for a precise calculation is not available.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The language requires further clarification.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4. (a)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	If a company makes use of the phase-in requirements, it shall not be required to disclose any information relating to the provisions (or ESRS) subject to the phase-in provision.Companies should be allowed to focus on the DR and information that will indeed be included in their sustainability statement.	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	6.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The basis for the disclosures shall be the outcome of the DMA. Hence, if a company concludes a certain topic is not material, no further dislcosures apart from ESRS 2 should be required. This principle should also apply to the topic "climate change".	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (b)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	If a company has not adopted any policies, actions and targets with reference to a specific topic related to material IROs, it shall not be obliged to disclose this fact. Not making any disclosures in this regard is sufficient for the users of the sustainability report to understand that no such policies, actions or targets exist. Otherwise, companies that do not have such policies, actions or targets would be "put on the spot" which would result in a de facto comply-or-explain-mechanism.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	30.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				38. Recommend making current/future opex and Capex disclosures optional. Focus should be on outcomes of activities rather than inputs	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				Applicable to GOV-1, GOV-2, GOV-3, GOV-4: These disclosure requirements are very perspective, they don't take account of materiality and they ultimately do not yield useful comparison data. We support a framework that grants companies the discretion, based on their size, industry and specific needs, to determine the most effective and appropriate methods for establishing, overseeing and managing their respective sustainability programs. These detailed disclosure requirements undermine the simplification goal by adding to expenses and operational complexities.	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in relation to sustainability	
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				Sub-entities metrics should be optional as sub-enitities might set their own metrics without coordinating with parent org.	ESRS2	ESRS 2 - General for metrics - GDR-M	40.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				We recognize that GDR-T allows flexibility on targets and recommend adding further acknowledgement of the challenges of setting measurable targets in connection to people	ESRS2	ESRS 2 - General for targets - GDR-T	44.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium				At first introduct, consider that we mean "material risks," "material impacts," and "material opportunities", i.e that material modifies all 3 terms and that there is no expect to report all imapcts, only material ones	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	25.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Deleting the second part of the requirement "and the material risks and opportunities for which there is a significant risk of a material adjustment within the next annual reporting period to the carrying amounts of assets and liabilities reported in the related financial statements" is a step into the right direction. However, reporting on current and anticipated financial effects related to risks and opportunities should be overall removed as this goes also beyond requirements in the financial reporting.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	22.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Deletion of requirement to disclose anticipated financial effects. While also a requirement of the IFRS Sustainability Disclosure Standards, (potential future) financial effects from risks and opportunities are already indirectly taken into account when preparing financial statements or are covered as part of the risk and opportunity report in the management report. Calculating sustainability-related anticipated financial effects related to individual sustainability-related risks and opportunities lack reliable and harmonized guidance and therefore provide little information value. Additionally, reporting on financial opportunities is not a requirement in preparing finanical reports and can reveal sensitive strategic information, leading to competitive disadvantages for European companies. It is recommended this is addressed in both ESRS and to collaborate further with the ISSB with the same objective.	ESRS2	ESRS 2 - SBM -3 - Interaction of material impacts and opportunities with strategy and business model, and financial effects	23. (b)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	The application requirement should be deleted as this could lead to unnecessary discussions with auditors on the level of detail to be included. If the ESRS requirements are clearly described, this AR should be redundant.	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 20.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Deletion of "concise" as this is subject to interpretation.	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (a)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	It is unclear what needs to be reported related to "disclose its exposure to the heightened risk of incidents related to child labour and forced or compulsory labour by type of operations (such as manufacturing plant), or by countries or geographies with operations. [...]". Further clarification on "exposure" needed by referring to existing frameworks such aus UN Guiding Principles or rephrasing	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	28. (e)
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Deletion of paragraph "When reporting on policies, actions and targets, the undertaking shall report relevant information, avoiding information that is boilerplate, and therefore not relevant for users for example when policies and actions have been implemented to comply with law and regulation, or when the necessary information is already provided in accordance with [Draft] Amended ESRS 2 SBM-1. " as this might lead to unnecessary discussions with auditors on what constitutes "boilerplate information" and whether a policy should be reported or not. Certain policies and actions relate to compliance risks (e.g. related to anti-corruption) which makes it difficult to distinguish at the end whether the policy is in scope of this limitation or not.	ESRS2	ESRS 2 - General Disclosure Requirements for Policies, Actions, Metrics and Targets	AR 28.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	Changing the significant financial resources allocated for implementing action plans to "key actions" broadens the scope of the requirements and therefore goes against the simplification and reduction aim of EFRAG. It should be changes back to the original wording or completely taken out.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	38.
Excels	DIGITALEUROPE	Business association (other than association of financial institution)	Belgium			I disagree	To be deleted as this is a "may" datapoint and might broaden the scope of resources to be disclosed and might lead to discussions with auditors.	ESRS2	ESRS 2 - General for actions and resources - GDR-A	AR 36.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	§ 26. The AR and in particular the screening approach needs to mention the materiality principle	ESRS2	ESRS 2 - IRO-1 - Description of the process to identify and assess material impacts, risks and opportunities and material information to be reported	AR 22.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	§ 28 a. The materiality should be mentionned	ESRS2	ESRS 2 - IRO-2 - Material impacts, risks and opportunities and Disclosure Requirements included in the sustainability statement	AR 23.
Excels	EDF	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The mention "related topics" is unclear and may lead to difficulties with auditors	ESRS2	ESRS 2 - GOV-1 - The role of the administrative, management and supervisory bodies in	AR 4.
Excels	UNESPA (Spanish Association of Insurers and Reinsurers)	Association of financial institutions	Spain			I disagree	GDR-P §34 (previously MDR-P §65) requires disclosing the material impacts, risks or opportunities to which the policy relates. Since IROs are already disclosed in IRO-2 §28 (a), it is redundant to also disclose them in GDR-P.	ESRS2	ESRS 2 - General for policies - GDR-P	34.
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	It is proposed to delete para 34 c) from the current version of ESRS E1. if this is done we see a risk that companies would not be required to disclose the baseline and base year for their ghg targets, which we consider essential information for stakeholders,since the relevant point in ESRS 2 (para 43 d) begins "Where applicable". See comment on this para in Excel sheet on ESRS 2. We see two options to remedy this: 1. use a general clarification in ESRS-2, that would be suitable for targets in all sustainability topic areas by clarifying in ESRS-2 para 43(d) what is meant by where applicable eg ""disclosure of baseline value and base year is applicable where a target is a % change, but may not be applicable where a target is to reach a defined level of threshold."" 2. clarify this point specifically for ghg targets in ESRS E1 by reinstatging part of para 34 (c) in the current version. Specifically reinstate the following text (c) the undertaking shall disclose its current base year and baseline value."	E1	E1-6 - Targets related to climate change	26.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	We note the proposal to delete para 34 (d) in the current ESRS E1, on the basis of allowing more flexibility on base year. Para 34 (d) reads " GHG emission reduction targets shall at least include target values for the year 2030 and, if available, for the year 2050. From 2030, target values shall be set after every 5-year period thereafter", which is about target years rather than base years. We recognise that requiring target values for a specific year is somewhat restrictive. However, given that global and national target setting is often done to 2030, company targets to the same date would assist in the assessment of their alignment with global and national pathways. Also signfiicant reductions are urgent, so we think all companies should have target values to 2030. This requirement could be limited to scope 1 and 2 emissions, rather than scope 3.	E1	E1-6 - Targets related to climate change	26.
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	We also recommend retaining the second part of the current para 34 (d) ie" From 2030, target values shall be set after every 5-year period thereafter", either in its current form, or slightly amended to allow for any 5-year periods to be used for interim targets. It can be seen from an analysis by Oxford Net Zero (https://netzeroclimate.org/oxford-net-zero-report-assesses-the-voluntary-standards-landscape/) that there is strong convergence among voluntary standards that 5 years is an appropriate interval for interim targets. An amended text, which allows a little more flexibility by not requiring target years as 2030/35/40 etc could be Target values beyond 2030 shall be set for 5-year periods." While the Oxford Net Zero report found convergence on requiring inclusion of scope 3 emissions, the requirement in ESRS E1-26 could be set for scope 1 and 2 emissions for now.	E1	E1-6 - Targets related to climate change	26.
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	This comment and the next one (on AR21) address a similar point, first in relation to targets and then in relation to ghg reporting. We propose addition of "non-electricity EACs" to the list in AR 11of items to be exluded from ghg targets.. The proper use in target-setting of non-electricity EACs (eg for steel, biomethane, SAF, cement) is under discussion internationally so we consider this is an important clarification to add. We consider that "gross" targets should not, at least until theire is more consensus including on guardrails, the use of these types of market instruments to achieve targets should be explicitly ruled out. Companies can set separate targets for the scaling of the use of non-electricity EACs.	E1		AR 11
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	We propose addition of "non-electricity EACs" to the list in AR 21 (d). The proper use in ghg accounting of non-electricity EACs (eg for steel, biomethane, SAF, cement) is under discussion internationally so we consider this is an important clarification to add. If "gross" emissions is to mean "gross" emissions then use of these types of market instruments to reduce reported ghg emissions when fulfilling the CSRD should be explicitly ruled out. Space can be found elsewhere in company disclosures to report use of non-electricity EACs.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	In AR 24 (d) we find use of the word "reflect" to be unclear, and we propose it's changed to "disclose". The shortened version of this requirement looks fine but it's not clear to us what it would mean for a company to "reflect" shares and types of contractual instruments. "Disclose" seems much clearer, and would deliver information helpful to stakeholders.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	We do not support the deletion of the requirement to list scope 3 ghg categories excluded from the inventory. We spend a lot of time reviewing company ghg reports and it's often unclear which categories are included/excluded and why. We recognise that the requirement in the existing version (AR 46 (i)) may be deemed unecessary but complying this this requirement would not require any extra data collection and we consider it reasonable to retain it. The reasons for doing this are: a) gives clarity and reduces uncertainty for those analysing ghg reports, both from individual companies over time (in the case that they broaden their scope 3 reporting over time) and comparing companies in a sector. b) it's implied by the principle of "completeness" in the GHGP Corporate Standard, and it's a requirement in the GHGP Scope 3 standard c) it's easy to do, following the determinatin of significance for scope 3 categories. And, since there are presumably only two possibe reasons for excluding a scope 3 emissions category - not relevant and not significant - which makes reporting very simple. [NB this assumes that "data not available" is no longer an accepted justification for an exclusion, since estimates are preferable].	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	We propose retention of notes (e) and (f) from AR 63 in the current version. We recognise that AR 11 and AR 21 in the exposure draft for ESRS E1 state that carbon credits shall not be included in ghg targets or reports of gross emissions, but we think that notes (e) and (f) from AR 63 in the current version serve to emphasise this point, without adding any burden on companies reporting and they are also slightly different points. AR 11 and AR 21 set requirements on the targets and emissions inventory, whereas the current text AR 63 (e) and (f) set requirements on the disclosure of those targets and ghg emissions. The distinction is perhaps small, but the former use relates to methodology to reach a data point, whereas the latter use relates to making claims.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 29
Excels	Exponential Roadmap Initiative	Other - please specify (required)	Sweden			I partially agree and partially disagree	We note that AR 62 (d) and (e) in the current version of ESRS E1 have been deleted in the exposure draft and we propose that both are retained, because: 1.even if not critical today, we expect both these data points to become important in the coming years, as ghg reporting matures and more links are made between national inventories and organisations' inventories. 2. reporting on both these points would signal to companies that the relationship between reductions/removals reported nationally and reductions/removals reported at company level matters. 3. we assume reporting on removals within the EU specifically will be critical as the EU roles out mechanisms to promote and trade removals. 4. this information would not be difficult for companies to obtain because the significance of the data is well-recognised in the voluntary carbon market.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	ASD					I disagree	Allow exemption of the obligation to report Scope 3.11 emissions - use of end product for military products, based on principles applied in ESRS 1 - 7.8 Classified and sensitive information. It could be disclosed on a voluntary basis	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (c)
Excels	ASD					I agree	We welcome EFRAG proposed change for Disclosure Requirement E1-8 – Gross Scopes 1, 2, 3 and Total GHG emissions	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	8.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ASD					I agree	The current ESRS E1 requires to report Scope 1, 2, 3 GHG emissions from associates, joint ventures, unconsolidated subsidiaries (investment entities) and joint arrangements for which the undertaking does not have operational control, and when these entities are part of the undertaking's upstream and dopwnstream value chain. This request seems inconsistent with the GHG Protocol, which for Scope 3 emissions - Category 15 Investments states that a reporting undertaking's Scope 3 emissions from investments are the Scope 1 and Scope 2 emissions of investees. The misalignment/inconsistency is relevant for Scope 3 emissions of "investment entities", which are included in the ESRS but excluded from the GHG Protocol (Scope 3 emissions - Category 15 Investments). The revised ESRS E1 introduces the reference to the GHG Protocol, eliminating potential misalignment/inconsistency. Therefore, we welcome EFRAG proposed change.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	ASD					I agree	We called to simplify reporting tables, specifically in current E1-6 AR 48 to make voluntary the section "milestones and targets years". Current E1-6 AR 48 has been deleted. Therefore, we welcome EFRAG proposed change.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 20
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	A specific narrative content will complicate the structure of a generic GDR-A. Suggestion: Create an AR to specify content (without a specific DP): "In addition to [Draft] Amended ESRS 2 GDR-A, when disclosing current and planned actions, the undertaking shall: present its key climate change mitigation actions by decarbonisation lever;"	E1	E1-5 - Actions and resources in relation to climate change	24. (a)
Excels	CLEERIT	Consultant (including software vendor)	France			I partially agree and partially disagree	A specific narrative content will complicate the structure of a generic GDR-A. Suggestion: Create an AR to specify content (without a specific DP): "In addition to [Draft] Amended ESRS 2 GDR-A, when disclosing current and planned actions, the undertaking shall: in relation to the outcome of the key climate change mitigation actions, include the achieved and expected GHG emission reduction; and"	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	In para 14 (16 amended), subpara (a), after the sentence ending with "[...] and how the plan is embedded in and aligned with the undertaking's overall business strategy.": The following sentence should be added: "This further includes a description of how the workforce of the undertaking and its representatives have been involved in developing the plan." Democracy at work, a key priority for the European trade union movement, has become more and more relevant in the light of the multiple crises facing EU economies. A strong involvement of the workforce in developing the transition plan ensures that firsthand knowledge from the shop floor is reflected in the plan, that there is increased commitment for the strategies developed jointly and that implementation faces fewer hurdles. It will also lead to a more focused consideration of the needs of the workforce, including the need for qualification and training. For users, this information is important to gain a more complete picture of how the transition plan relates to the undertaking's overall development strategy.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Chamber of Labour, Austria	Trade union	Austria			I disagree	The BAK rejects the deletion of the obligation to state (previously 16i) whether the transition plan has been approved by the administrative, management and supervisory bodies. The transition plan has strategic implications for the business model and the company. From the BAK's point of view, this information is therefore necessary and relevant for stakeholders (e.g. investors, employees) in order to gain a better overview and understanding of the strategic development of the company.	E1	E1-2 - Climate-related risks and scenario analysis	16.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Lack of a common methodology; highly business sensitive information; Data not currently available.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Highly business-sensitive information. DR seems to be an extension of the Delegated Act (DA). The description of "financial and investment planning" (Exposure Draft, ED) goes beyond "investments and funding" (DA) as the latter is a subset/part of the former (also confirmed by the wording "investment and financial planning" in AR 2(c).	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Data not currently available (Very difficult for companies at the time of elaboration of the ESRS report, to have sufficient information to commit to a concrete date for the adoption of a climate transition plan).	E1	E1-1 - Transition plan for climate change mitigation	15.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Lack of a common methodology; Disproportionate costs. The reporting requirement makes the implementation of a resilience analysis indirectly binding. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no resilience analysis has been carried out should be introduced (analogous to ESRS E1-1 DR 15).	E1	E1-3 - Resilience in relation to climate change	21.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs.	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Highly business sensitive information; Disproportionate costs. Related to AR 5 (c), AR 6 (c): The requirement "base ist analysis on at least one high-emission climate scenario" is not appropriate. E1 should refer to "a scenario based on scientific evidence which reflects the climate risk properly".	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Business-sensitive information/Redundant with Taxonomy. This requirements seems an extension of the existing requirements of the Delegated Act: The DR suggests a breakdown of "quantitative short- and medium-term CapEx and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges." This should be deleted. See also our comments on AR 2 (c).	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Disproportionate costs. Lack of common methodology. The reporting requirement makes the implementation of GHG emission reduction targets indirectly binding. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no GHG emission reduction targets has been set should be introduced (analogous to ESRS E1-1 DR 15). Information on targets under E1-6 should be more closely linked to the transition plan in E1-1. The breakdown of GHG targets in Scope 1, 2, 3 should not be required as targets are typically not set in this way. E1 should require presentation of targets as the undertaking's management has set these (management approach).	E1	E1-6 - Targets related to climate change	26. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs; Concerns about usefulness (While providing information on what type of energy is purchased is important, the level of granularity and the effort to collect the information related to each type of contractual instruments (e.g. RECs) does not seem to be proportionate considering the usefulness for external stakeholders).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	24. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Lack of a common methodology; Absence of science-based metrics (Information on GHG removal and storage activities should not be a separate disclosure requirement but should be part of reporting on actions if GHG removals and storage is a relevant lever in the overall climate strategy of the company.)	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Highly business sensitive information; Redundancy or contradictions with other DRs/DPs (With GHG removal and storage happening in own operations or value chain the associated GHG emissions with removing and storing the GHGs are covered in E1-6).	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 28
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Disproportionate costs; Concerns about data reliability; Lack of common methodology; Highly business sensitive information. This disclosure requires a level of data granularity that most companies simply do not have. There is no standard methodology to assess or report these figures reliably, and collecting this information would involve complex climate modeling that is often inaccessible—especially for SMEs. From a strategic and financial standpoint, disclosing such data could expose sensitive business vulnerabilities and affect investor or insurer perceptions, potentially increasing the cost of capital. These disclosures may also overlap with other ESRS requirements on climate risks and adaptation, leading to duplication. Industries with large physical asset bases—like manufacturing or logistics—would face a disproportionate burden in complying with these requirements, without clear added value for users of the information. While some financial stakeholders may seek greater transparency, this can often be achieved through qualitative or high-level disclosures. A more balanced solution would be to drop mandatory reporting and allow for materiality-based reporting, possibly introduced at a later stage when methodologies are more mature.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Disproportionate costs; Concerns about data reliability; Lack of common methodology; Highly business sensitive information. This disclosure requires a level of data granularity that most companies simply do not have. There is no standard methodology. Requirement on "location of key assets at material physical risks" results in unnecessarily detailed reporting, as depending on the sector, this could involve a large number of locations in all regions of the world; e.g., logistic companies have much more sites than industrial companies.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Lack of common methodlogy; Concerns about data reliability; Business sensitive information	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Disproprotionate costs; Lack of common methodlogy; Concerns on data reliability.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs; Concerns on data reliability; Data not currently available; Business sensitive information.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs; Lack of a common methodology; Concerns on data reliability.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs; Concerns on data reliability; Data not currently available.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	Disproportionate costs; Concerns on data reliability; Data not currently available.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (e)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The reporting requirement makes the implementation of a climate risk analysis indirectly binding, additionally to the DMA. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no climate risk analysis has been carried out should be introduced (analogous to ESRS E1-1 DR 15). In the document "Basis for Conclusion" there is the following note: "it should be clear under E1-2, Climate related risks and scenario analysis that there is an expectation that undertakings report on key elements of the methodology to assess climate risks, but that scenario analysis is not required for all undertakings."It is not clear from the text of ESRS 1-2 which companies do not have to perform a scenario analysis.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	This information is supplementary to the climate risk analysis and should therefore be combined with ESRS E1-2 where possible. The climate risk analysis including the quantifications in this section represent a new obligation for companies. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. It should also be made possible to only report qualitatively on the climate risk analysis.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	AR 18/19 should be merged, allowing for both financial control (consolidation) and/or operational control (consolidation) boundary, as defined in the GHG Protocol	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	shall' to be changed to 'may' as a disaggregation of GHG emissions (by country, operating segments, economic activity, subsidiary, GHG or source type) might not be available	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	related to AR 2 (c): DR seems an extension of the DA. Disclosure of "quantitative short- and medium-terms CapEx, and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges". The DP should be deleted.	E1	E1-1 - Transition plan for climate change mitigation	AR 2

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	related to AR 2 (c): EFRAG should consider the Transition Plan Taskforce (TPT) Disclosure Framework which 1) contains the elements "investment and disposal plan" and "planned sources to fund the plan" and 2) sets conditions on the disclosures: a) to the extent the financial effects of its transition plan are separately identifiable, b) information available to the entity at the reporting date without undue cost and effort, c) approach that is commensurate with the skills, capabilities, and resources that are available to the entity for preparing those disclosures; NMIG might contain as a "may" guidance in line with the TPT Disclosure framework	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	We doubt that this AR is needed; Probably a clarification in the main body might be sufficient that only a qualitative assessment of the exposure is required. Additionally the wording regarding the anticipated financial effects has to be aligned; If Option 2 in ESRS 2 is adopted, a quantification will not be required.	E1	E1-2 - Climate-related risks and scenario analysis	AR 7
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	The wording "shall provide its climate resilience at the reporting date" creates confusion: 1) it is not clear as to what it refers to, "process" or "outcome"; 2) if "process" is meant: we don't see the relevance of this information; 3) if "outcome" is meant: it seems conceptually understandable, but such purely reporting date-specific statement only makes sense for individual locations or individual products/services/markets. When considering location, product and service portfolios a date-specific assessment is not feasible. Furthermore, a historical analysis (which is what a reporting date analysis is) is questionable in the context of a strategically oriented disclosure such as E1-3. This will result in extensive discussions between preparers and auditors.	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	related to AR 10 (c): Regarding the wording "the effects of current and planned investments in climate mitigation, adaptation and transition opportunities on climate resilience enhancement": 1) the requirement is not clear; 2) it seems as it is an extension of the requirements in the Delegated Act and should therefore be deleted	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	The standard should make clear that 1) Breakdown of CapEx/OpEx per time buckets/horizons is NOT required, and 2) Breakdown of CapEx/OpEx per decarbonisation lever is NOT required.	E1	E1-5 - Actions and resources in relation to climate change	24.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	related to AR 13 (a): The term "key change" is not defined; The standard should make clear 1) that "key change" means "significant" and 2) that this assessment of significance is up to the undertaking. E.g., "the undertaking may decide on changes in the reporting boundary, e.g., becaus of M&A, or changes in the target. If the undertaking concludes that these changes are significant they should be reflected in the basline value or base year."	E1	E1-6 - Targets related to climate change	AR 13
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	1) The DR should make clear that the undertaking is NOT required to choose one of both alternatives mentiond in this paragraph to present its GHG reduction targets. In practice further ways and less granular presentation were applied for the 2024 reporting, 2) Examples should rather be addressed as "may" guidance in the NMIG.	E1	E1-6 - Targets related to climate change	AR 14
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	This DR seems to include and extension of the DA where the scope of this DR is limited to high climate impact sectors. This DP should either be deleted or limited in scope as in the DA.	E1	E1-7 - Energy consumption and mix	29.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	In practice there are extensive discussions with auditors about whether a disclosure in millions is possible here. Therefore it should be clarified (perhaps at a central location in ESRS 1) that "millions" is allowed too. Ideally the untertaking should be free to choose for each metric the units that are most meaningful.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	The exclusion of biogenic emissions should - if ever - refer to Scope 1 only (like in the DA), but not to "all scopes". Moreover, the relevance of this requirement is questionable.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	related to AR 21 (a): The undertaking shall consider the GHG Protocol (GHGP) when preparing the information on GHG emissions. However, it remains unclear how to consider optional Scope 3 sub-categories or exemptions provided in the GHGP. As an example, GHGP allows not to report scope 3.10 emissions if the company is unable to estimate the emissions as the processing of the products is unknown. The ESRS should allow such exemptions too - in accordance with the GHGP.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	"The assumptions regarding permance" seems an extension of the DA. As there is no evidence on the relevance of this information it should be deleted.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (c)
Excels	Federation of German Industries (BDI)	Business association (other than association of financial institution)	Germany			I disagree	It is recommended to change this to voluntary disclosure. A new requirement introduces potential complexity by mandating that companies "shall" also report emissions using the "operational control" method if the financial control approach fails to provide a fair presentation. This adds ambiguity and should be an optional ("may") disclosure rather than a mandatory one.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E1-1 – Transition plan for climate change mitigation §13 Issue: E1 recognizes related EU legislation but does not explicitly permit using Taxonomy references to satisfy parts of E1 through cross-reference. Proposed amendment (add AR under E1-1/E1-5/E1-6): "Where evidence prepared for EU Taxonomy alignment (e.g., TSC/DNSH/Minimum Safeguards files, EPC certificates) covers elements required by this Standard (policies, actions, targets, metrics and related evidence), the undertaking may incorporate such evidence by reference, provided it clearly identifies: (i) the Taxonomy activity(ies) concerned; (ii) the criteria applied; (iii) the location of the evidence; and (iv) any differences between Taxonomy criteria and ESRS E1 metrics or scopes." Why it helps: Enables reuse of existing verified documentation, improving efficiency and consistency.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	ESRS E1 §14 Issue: No explicit permission to cross-reference Taxonomy evidence. Proposed simplification: Add permission to cross-reference. Proposed text: See clause 16(c) below. Why it helps: Aligns ESRS with existing Taxonomy documentation practices.	E1	E1-1 - Transition plan for climate change mitigation	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	ESRS E1 §11 Issue: EU Taxonomy not explicitly mentioned in the opening section. Proposed simplification: Add explicit mention of EU Taxonomy Proposed text: "Where evidence assembled for the EU Taxonomy delegated acts (technical screening criteria and DNSH) already demonstrates elements required by this Standard, the undertaking may incorporate such evidence by reference in line with ESRS 2 content-index mechanics, clearly identifying the activity, criterion, file location, and any differences with ESRS metrics." Why it helps: Clarifies linkage and removes redundency	E1	E1-1 - Transition plan for climate change mitigation	11.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	ESRS E1 §14(d) Issues observed: No direct linkage to Article 8 KPIs(Taxonomy Regulation), which investors and assurance providers expect. Many preparers already organise plans by Taxonomy activity, but E1 does not require this mapping. Proposition: Allow a short "Plan → Article 8 KPI and CapEx Plan" bridge table in E1-1. Each major action or lever should show: - The Articl 8 KPI line impacted (turnover, capital expenditure, operating expenditure). - Whether the CapEx Plan is used. - The EU Taxonomy activity and criterion that action supports (for example, "new buildings—primary energy demand threshold and commissioning tests"). Proposed wording (add after §14(d)) "Provide a one-page bridge mapping transition actions and related resources to (a) the Article 8 KPIs and, where applicable, the CapEx Plan, and (b) the EU Taxonomy delegated act objectives and activities for which evidence is provided by reference." Why it helps: Improves traceability and investor confidence.	E1	E1-1 - Transition plan for climate change mitigation	14. (d)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Issue : E1 describes method elements but does not explicitly acknowledge the risk and vulnerability assessment workflow that the Climate Delegated Act requires for physical risk. Recommendation: Recognise Taxonomy-aligned risk methods explicitly and allow cross referencing - For physical risk, allow the risk and vulnerability assessment workflow required under the Climate Delegated Act (screening, assessment, measures) as an accepted method, with an explicit reference to the underlying file. Proposed wording (add to AR 6) "The undertaking may apply the risk and vulnerability assessment steps required under the EU Taxonomy Climate Delegated Act to identify and evaluate physical risks." Why it helps: Aligns ESRS with regulator-anchored methods.	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Reference: E1-1 §14(a)–(d) & AR 2–5; NMIG E1-5 (NMIG 5–6 on CapEx/OpEx & CapEx Plan). Issue: The Taxonomy bridge sits in NMIG (non-mandatory). Proposed amendment (modify §14(a) + AR 2; new AR under E1-5 §24(c)): add explicit permission to cross-reference to Taxonomy evidence. "Disclose a reconciliation table linking transition actions/levers and resource allocation to Article 8 KPIs (turnover/CapEx/OpEx) and, where applicable, to a Taxonomy CapEx Plan. Where OpEx is non-material under Article 8, indicate numerator 0 with the required explanation and disclose the denominator, consistent with Article 8." Why it helps: Improves consistency and assurance.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E1-5 Actions and resources in relation to climate change (§23–24) Issue : The non-mandatory guidance already shows how to connect actions and resources to Article 8 and EU Taxonomy activities, but because it is guidance, reporting is uneven, and assurance is harder. Proposal : allow direct linkage to structure actions and resources by EU Taxonomy activity; Cross-reference Article 8 KPIs (and any CapEx Plan); Suggested wording (add to §24(c)): "Where relevant, structure actions and resources by EU Taxonomy activity and cross-reference to Article 8 KPIs." Why it helps: Improves consistency and assurance.	E1	E1-5 - Actions and resources in relation to climate change	23.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E1-6 Targets related to climate change (§25–26; AR 12–17) Issue : Targets can be blurred by the use of carbon credits and may duplicate performance thresholds already defined in the Climate Delegated Act. Proposal : Where a target is calibrated to a Climate Delegated Act criterion (for example, primary energy demand at handover), permit a direct reference. Why it helps: Enhances clarity and comparability.	E1	E1-6 - Targets related to climate change	26.
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Reference: E1-5, E1-6 (AR 13); NMIG sections for actions/targets; TSC for 7.1/7.2 (real estate) Issue: E1 is method-heavy, while Taxonomy provides hard criteria and documentable evidence (e.g., Energy Performance Certificate of NZEB –10% PED, airtightness/thermal integrity tests, Appendix A risk assessment…). Proposed amendment (add cross-cutting AR under E1-5/E1-6): "For activities also covered by EU Taxonomy, the undertaking shall compile a baseline evidence set comprising: (i) SC proof , (ii) DNSH checks for the other environmental objectives (incl. Appendix A for physical risk), and (iii) Minimum Safeguards governance proof; such items may be incorporated by reference per ESRS 2." Why it helps: Enhances verifiability and comparability; leverages existing files.	E1	E1-6 - Targets related to climate change	AR 13
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	Reference: E1-2 §18–19; taxonomy AR 6–8 (scenario analysis). Issue: Appendix A's screening→assessment→measures chain is widely used but not referenced. Proposed amendment (add AR under E1-2): "The undertaking may apply the EU Taxonomy Appendix A process to screen and assess physical climate risks and to define adaptation measures." Why it helps: Normalises a robust, regulator-anchored workflow many issuers already use.	E1	E1-6 - Targets related to climate change	AR 8
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I partially agree and partially disagree	E1-8 Scope 3: allow staged disclosure with strict update rules Reference: AR 26 (Scope 3 methodology, significance, annual updates on significant categories and full inventory at least every 3 years). Issue: Complex categories (e.g., embodied carbon in real estate) may need a phased path while keeping integrity. Proposed amendment (clarify AR 26(e)): "A staged approach is acceptable: Year 1 methods & ranges; Year 2 refined quantification; Year 3 full consolidated update—provided annual updates are applied to significant categories and the 3-year full inventory rule is met." Why it helps: Avoids spurious precision; maintains discipline.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	Atenor	Preparer (non-financial preparing a sustainability report)	Belgium			I disagree	E1-11 Anticipated financial effects (§39–42; AR 31) Issue : Current drafting assumes a level of quantification maturity that does not exist across sectors. There is no coherent sector guidance, and methodologies for monetising emissions, estimating stranded assets, or revenue-at-risk are inconsistent. For many preparers, forcing early quantification risks producing unreliable or incomparable numbers. Proposal : - Prioritise sector-specific guidance first: EFRAG should publish robust, sector-tailored methodologies before making detailed quantification mandatory. Until such methodologies exist, allow qualitative disclosures as sufficient to meet the requirement, provided they explain: - the nature of the risk or opportunity, - the expected direction and drivers of financial effects, and - the time horizons considered. Encourage preparers to describe linkages between strategic actions (E1-1 and E1-5) and anticipated financial effects qualitatively, without requiring numeric estimates until sector guidance is in place. Why it helps: Avoids unreliable quantification and supports meaningful disclosure.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	BDEW	Other - please specify (required)	Germany			I agree	Seems in general consistent with proposed amendments of SBTi Corporate Net-zero Standard 2.0 and with Transition Plan Taskforce Disclosure Framework (which is aligned with ISSB positions) Deletion of reference to the EU Tax Reg is supported Red flags re some details as below	E1	E1-1 - Transition plan for climate change mitigation	in general
Excels	BDEW	Other - please specify (required)	Germany			I agree	disclosure of "quantitative short- and medium-term CapEx, and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges" --> additional DR/stricter requirement as in delegated act, risk of requiring sensitive information (The relief on sensitive information will not help as even the fact that the undertaking reports that it has omitted sensitive information might be a problem.)	E1	E1-1 - Transition plan for climate change mitigation	AR 2 (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BDEW	Other - please specify (required)	Germany			I agree	"shall provide its climate resilience at the reporting date" (1) is not clear as to what it refers to, "process" or "outcome" (2) if "process" is meant, we fail to see the relevance of this information, (3) if outcome: It seems conceptually understandable, but such a purely reporting date-specific statement only makes sense for individual locations or individual products/services/markets. When considering location, product, and service portfolios, however, a date-specific assessment is not feasible. Furthermore, a historical analysis (which is what a reporting date analysis is) is questionable in the context of a strategically oriented disclosure such as E1-3. Practitioners in particular fear potential conflicts with auditors in this regard.	E1	E1-3 Resilience in relation to climate change	AR 9
Excels	BDEW	Other - please specify (required)	Germany			I agree	("the effects of current and planned investments in climate mitigation, adaptation and transition opportunities on climate resilience enhancement"), (1) requirement is not clear, (2) it seems as it is an addtl requirement that does not exist in the DA	E1	E1-3 - Resilience in relation to climate change	AR 10 (c)
Excels	BDEW	Other - please specify (required)	Germany			I agree	DR should make crystal clear that (1) Breakdown of CapEx/OpEx per time buckets (time horizons) is not required, and (2) Breakdown of CapEx/OpEx per decarbonisation lever is not required, either.	E1	E1-5 - Actions and resources in relation to climate change	24
Excels	BDEW	Other - please specify (required)	Germany			I agree	DR suggests a breakdown of "quantitative short- and medium-term CapEx and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges." --> This tightens the requirements compared to the DA.	E1	E1-5 - Actions and resources in relation to climate change	24 (c)
Excels	BDEW	Other - please specify (required)	Germany			I agree	The linking of changes to the baseline value and/or base year to "key changes" relating to the target or reporting boundary is too narrow. A change in calculation methods (even for actual emissions in the base year) may also require changes to targets, according the SBTi Corporate Net-zero Standard V1.2 (pg. 14) The term "key change" is not defined. --> Key change should be meant as a "key" or "significant" change from the undertaking's perspective AND/OR refer to SBTi as a source of inspiration for when a change could be considered "key".	E1	E1-6 - Targets related to climate change	AR 13(a)
Excels	BDEW	Other - please specify (required)	Germany			I agree	DR should make crystal clear that the undertaking is not required to choose one of both alternatives mentioned in this paragraph to present its GHG reduction targets. In practice further ways and less granular presentation were applied for the 2024 reporting.	E1	E1-6 - Targets related to climate change	AR 14
Excels	BDEW	Other - please specify (required)	Germany			I agree	Provision may become obsolete in the near future. Although the combination of Scope 1 and Scope 2 targets is still reflected in the current SBTi Net-Zero Standard (V1.2), the consultation draft of March 2025 now proposes a (possible) separation of the targets (for Scope 1 and Scope 2). This should be reflected accordingly in E1.	E1	E1-6 - Targets related to climate change	AR 16, 2nd sentence
Excels	BDEW	Other - please specify (required)	Germany			I agree	Extended requirement than in Delegated act where the scope of this DR is limited to high climate impact sectors. BfC (257) "the reference to climate impact sectors was also deleted, in line with feedback received." BfC (128): The notion of "high climate impact sector" is not properly defined and created practical issues. Disaggregation of fossil sources was considered essential for undertakings, but these apply the disaggregation requirements of ESRS 1 under a system of fair presentation. This should be sufficient if properly applied, to trigger disaggregation only in the circumstance where this is material. ---> Problem: Easier if the information is excluded per se due to the lack of allocation to climate impact sectors?	E1	Disclosure Requirement E1-7 - Energy consumption and mix	29
Excels	BDEW	Other - please specify (required)	Germany			I agree	Practitioners report pointless discussions with auditors about whether a disclosure in millions is possible here.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32
Excels	BDEW	Other - please specify (required)	Germany			I agree	Exclusion of biogenic emissions should - if ever - refer to Scope 1 (delegated act) but not to "all scopes". In addition, the relevance of this requirement is questionable.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33
Excels	BDEW	Other - please specify (required)	Germany			I agree	(Operational control is proposed to apply for the GHG-Emissions in case that financial control does not convey fair presentation.) (1) The concept of operational control should not play any role at all. (2) Is considered an additional requirement since some undertakings will have to report under the OpCon boundary in addition to the FinCon boundary. (3) It should be added that the undertaking is the party that assesses whether or not the financial control perimeter fails to convey fair presentation of the GHG emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	BDEW	Other - please specify (required)	Germany			I agree	E1-11 does not constitute a simplification for anticipated financial effects as, for example, it still refers to "monetary amount and percentage of assets", "monetary amount and percentage of revenue".	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40
Excels	BDEW	Other - please specify (required)	Germany			I agree	Requirement on "location of key assets at material physical risks" results in unnecessarily detailed reporting, as depending on the sector, this could involve a large number of locations in all regions of the world. As an example, logistic sector undertakings have much more sites than heavy industry.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40 (b)
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	In the context of AR 19, the wording is not comprehensible. If, under paragraph (DR) 32 (on E1-8), I apply operational control IN ADDITION to the financial control approach, as AR 19 applies, it is possible to implement Scope 1 and 2 targets related to climate change ONLY according to the operational control approach. From our point of view, this argues in favor of continuing to allow both approaches, financial and operational control, to be equivalent with regard to Paragraph 32, and not have financial control as the default option.	E1	E1-6 - Targets related to climate change	AR 15
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The Basis for Conclusion 128 refers to the "fair presentation" principle, which in turn limits the granularity at which fossil source consumption should be reported here. This limitation is not reflected in paragraph (DR) 28 a) or paragraph (DR) 29. The DR therefore seems to include an extension of the Delegated Act where the scope of this DR is limited to high climate impact sectors. The reasons mentioned in the BfC (paras 257 and 128) for changing this are noted. The suggestion is that this data point should either be deleted or limited in scope as in the Delegated Act. should refer to the "fair presentation" principle.	E1	E1-7 - Energy consumption and mix	28. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The Basis for Conclusion 128 refers to the "fair presentation" principle, which in turn limits the granularity at which fossil source consumption should be reported here. This limitation is not reflected in paragraph (DR) 28 a) or paragraph (DR) 29. The DR therefore seems to include an extension of the Delegated Act where the scope of this DR is limited to high climate impact sectors. E1	E1-7 - Energy consumption and mix	29.
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The wording presupposes that GHG emissions must first be presented according to financial control (even if this does not represent a fair presentation) and only then may they be presented ADDITIONALLY according to operational control. The wording and the default to financial control has a significant impact on our previous reporting scope for data collection on our greenhouse gas emissions and changes our "consolidation boundary" as a company. In our opinion, the default to financial control does not result in a meaningful application and explicitly contradicts the GHG Protocol. The GHG Protocol allows both the operational control and financial control approaches to be used to limit the reporting scope of the organization. In our opinion, the argument presented (see Basis for Conclusion, e.g., 143 a) and 145) that this is in line with the GHG Protocol is therefore not valid. We therefore request the option to use the operational control approach as the default option for reporting GHG emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	Otto Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The wording presupposes that GHG emissions must first be presented according to financial control (even if this does not represent a fair presentation) and only then may they be presented ADDITIONALLY according to operational control. The wording and the default to financial control has a significant impact on our previous reporting scope for data collection on our greenhouse gas emissions and changes our "consolidation boundary" as a company. The GHG Protocol allows both the operational control and financial control approaches to be used to limit the reporting scope of the organization. In our opinion, the argument presented (see Basis for Conclusion, e.g., 143 a) and 145) that this is in line with the GHG Protocol is therefore not valid. We therefore request the option to use the operational control approach as the default option for reporting GHG emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	•Welcome AR2 compatibility with validation through independent 3rd parties, i.e. SBT •Welcome alignment and interoperability with IFRS S2 on CTP •Welcome clarity that a company shall only disclose relevant information about a CTP instead of the whole plan under ESRS E1-1 and that this aligns with IFRS guidance on disclosing information about an entity's climate-related transition, including information about transition plans in accordance with IFRS S2 •BSR would welcome an acknowledgment of climate adaptation, nature and human rights interlinkages in climate transition planning given the current trends/calls of integration elsewhere. See NGFS Input Paper on Integrating Adaptation and Resilience into Transition plans and IFRS guidance on disclosing information about an entity's climate-related transition, including information about transition plans in accordance with IFRS S2 on integration of adaptation, GFANZ on nature in net-zero transition plans and GRI 102 Climate Change 2025 on link to just transition. •Welcome very much AR3 specifications on dependencies disclosure	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	•BSR suggests add/including a definition of resilience analysis •Welcome change in structure that disclosure on process to identify impacts, risks and opportunities come before disclosure on resilience analysis and hence, is now part of the strategy section •Welcome clarity of objective (why disclosure is important) and the improved structure •Welcome 21a as clearer and stronger than previous 2 SBM 3, which focused on disclosure of scope of resilience analysis, how and when it was conducted including scenario analysis. Now 21a focused on explaining implications of resilience analysis on strategy and business model, explaining needed responses to effects under scenario analysis and how current and planned mitigation and adaptation actions and transition plans support, strengthen or impact climate-related business model and strategy resilience •Welcome AR10's clarity and detail as compared to previous AR8.	E1	E1-3 - Resilience in relation to climate change	21. (a)
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	•We see a risk that adaptation planning falls behind given that headline disclosures do not specify btw mitigation and adaptation anymore for policies and actions and that AR's do not define the difference between mitigation and adaptation policies anymore	E1	E1-4 - Policies related to climate change	22.
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	•We see a risk that adaptation planning falls behind given that headline disclosures do not specify btw mitigation and adaptation anymore for policies and actions and that AR's do not define the difference between mitigation and adaptation policies anymore	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	BSR	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	•Welcome 37 (a) very good and important for robust approach and to avoid mitigation deterrence •Consider keeping a version of old net-zero paragraph (60) that is feasible for companies to disclose at this point in time (e.g. qualitative disclosure of approach) or consider inclusion for future iterations	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37. (a)
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	Noting SBTs for oil and gas remain paused, it is not reasonable to expect the oil and gas sector to be able to disclose SBTs validated through an independent third party (i.e.SBTi). Either SBTi releases the oil and gas standard or this requirement is amended to explicitly state "where recognised Science Based Target standards exist", and allow reporters to state SBTs for their sector are not in place	E1	E1-6 - Targets related to climate change	AR 2
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I disagree	Disaggregation of purchased electricity from fossil sources is already accounted for in either market or location based electricity emission factors – this requires back calculating from emission factors or research into grid composition, which adds an onerous burden on reportees given the lack of data in a number of countries, and the currency of datasets such as IEA, UK DESNZ – this disaggregation should be removed	E1	E1-7 - Energy consumption and mix	38.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	International Association of Drilling Contractors	Business association (other than association of financial institution)	United States			I disagree	Whilst this is possible for organisations with a clear PPA or supplier providing renewables certification, for market based scope 2 emissions calculations, this is already incorporated into grid factors. This disaggregation is unnecessary, and onerous to complete if location based emissions are the only practicable report (which is common for international companies with operations outside of the EU)	E1	E1 - Interaction with other ESRS	AR 17
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	E1-2, when read in combination with ARs 5 and 6, can be read as requiring scenario analysis for the purposes of evaluating physical and transition climate-related risks. We recommend the following changes to better reflect EFRAG's intent and avoid any uncertainty: ●In paragraph 19 (changes in CAPS): "The key elements of the methodology include: the scope of the analysis, the methodologies and/or tools used for the analysis, the ranges of scenarios used, if any, the time period when it was carried out and WHETHER AND how the undertaking has used climate-related scenario analysis. In addition, for paragraph 18 (a) the undertaking shall include the spatial resolution of the analysis and for paragraph 18(b) it shall include the type of transition events analysed." ●E1-2 should incorporate the following statement, which was reflected in Exhibit E to the existing version of ESRS 1 but removed from the proposed amended version of that standard: "Disclosure requirements in relation to scenario analysis are proportionate because they are contingent on the undertaking conducting such analysis, which is not required for all undertakings and may depend on an undertaking's size, capacity, resources and skills."	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	Society for Corporate Governance	Business association (other than association of financial institution)	United States			I partially agree and partially disagree	E1-2, when read in combination with ARs 5 and 6, can be read as requiring scenario analysis for the purposes of evaluating physical and transition climate-related risks. We recommend the following changes to better reflect EFRAG's intent and avoid any uncertainty: ●In paragraph 19 (changes in CAPS): "The key elements of the methodology include: the scope of the analysis, the methodologies and/or tools used for the analysis, the ranges of scenarios used, if any, the time period when it was carried out and WHETHER AND how the undertaking has used climate-related scenario analysis. In addition, for paragraph 18 (a) the undertaking shall include the spatial resolution of the analysis and for paragraph 18(b) it shall include the type of transition events analysed." ●E1-2 should incorporate the following statement, which was reflected in Exhibit E to the existing version of ESRS 1 but removed from the proposed amended version of that standard: "Disclosure requirements in relation to scenario analysis are proportionate because they are contingent on the undertaking conducting such analysis, which is not required for all undertakings and may depend on an undertaking's size, capacity, resources and skills."	E1	E1-2 - Climate-related risks and scenario analysis	6.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	To make reports comparable, biogenic emissions should be defined, either with a reference to an external source or in the glossary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	Materiality	Consultant (including software vendor)	Poland			I disagree	In the last version of ESRS E1, AR 37 and AR 38 required the presentation of energy intensity per revenue, while in ESRS E3 in E3-4 there was a disclosure related to water intensity (total water consumption in own operations in m^3 per million EUR net revenue). These requirements provided the possibility to compare data regardless of company growth, and reports significantly benefited in terms of comparability thanks to these indicators.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	13.
Excels	TomTom NV	Preparer (non-financial preparing a sustainability report)	Netherlands			I disagree	The amendment to the DR, which now requires reporting by all sectors rather than just High Climate Impact Sectors related to energy consumption from fossil fuels, undermines the goal of simplifying the ESRS. For non-HCIS, this change imposes a significant reporting burden and demands considerable effort to collect relevant data, ultimately providing little value in return.	E1	E1-7 - Energy consumption and mix	29.
Excels	Vereniging Milieudefensie	NGO	Netherlands			I disagree	We disagree with the deletion of the requirement to disclose the actual TP (i.e., deletion of the old paragraph 14) as it goes against the level 1 requirements, which clearly requires disclosure of the actual transition plan and exceeds the Commmision's and EFRAG's mandate. Art. 19(a) of the Accounting Directive requires disclosure of "a brief description of the undertaking's business model and strategy including: [...] the plans of the undertaking [...] to ensure that its business model and strategy are compatible with the transition to a sustainable economy and with limiting of global warming to 1,5°C in line with the Paris Agreement under the United Nations Framework Convention on Climate Change." Consideration (30) of the CSRD confirms ihat the intention of the legislator was to require disclosure of the actual TP: "They should also be required to disclose any plans they may have to ensure that their business model and strategy are compatible with the transition to a sustainable economy and with the objectives of limiting global warming to 1,5 °C in line with the Paris Agreement and achieving climate neutrality by 2050, as established in Regulation (EU) 2021/1119, with no or limited overshoot."	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	Vereniging Milieudefensie	NGO	Netherlands			I disagree	The addition that the undertaking "shall also include information on how the undertaking's strategy and business model are compatible with the limiting global warming to 1.5°C in line with the Paris Agreement and wiht the EU's objective of achieving climate neutrality by 2050" goes against the purpose of streamlining and simplifying the ESRS. The CSRD requires undertaking to disclose their TP, defined as the plans of the undertaking [...] to ensure that its business model and strategy are compatible with the transition to a sustainable economy and with the limiting of global warming to 1,5°C [...]. The ESRS must clarify the conditions for meeting this disclosure requirement. The new addition merely repeats the definition of the TP (already covered in the CSRD and in AR 1). Moreover, the conten of the additiont is already covered in paragraph 13 on the aim of the DR E1-1. If stakeholders found it challenging to demonstrate target compatibility with 1.5°C citing lack of guidance and methodology, they will find it all the more challenging to demonstrate "more wholistically" strategy and business model compatibility with 1.5°C. The proposed solution to the problem exacertbates the problem.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Vereniging Milieudefensie	NGO	Netherlands			I disagree	We disagree with the removal of the requirrement to demonstrate emission reduction target compatibility with 1.5°C from the DR. Demonstrating emission reduction target compatibility with 1.5°C is a key feature of the TP as target compatibility with 1.5°C is a primary yardstick to assess compatibility of business model and strategy with 1.5°C (which is what the TP is all about). Therefore, we believe its place is in the DR. While it is logical that the explanation on how to demonstrate target compatibility is found in the AR, it is unclear why the complete requirement is now moved to the AR and replaced in the DR by a requirement to provide information "more wholistically" (see also previous comment). This obfuscates rather than simplifies or clarifies what is required.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Vereniging Milieudefensie	NGO	Netherlands			I partially agree and partially disagree	Requirement to disclose qualitative assessment of how potential locked-in GHG emissions from key assets and products may jeopardise the achievement of the GHG emission reduction targets and drive transition risk is crucial and must be maintained as a mandatory requirement. "Achievement of the plan" must be replaced by "achievement of the GHG emission reduction targets", because that's what it is about here: locked-in GHG emissions must be concretely related to the GHG emission reduction targets.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Vereniging Milieudefensie	NGO	Netherlands			I partially agree and partially disagree	Disclosure of significant CapEx amounts related to coal, oil and gas-related economic activities must be maintained. An adapted version of this requirement must be added for financial institutions, requiring that they: - disclose financial services to coal, oil and gas-related activities, disaggregated by type of fossil fuel and by type of service - disclose financial services to companies involved in new coal, oil and gas-related activities specifically, disaggregated by type of fossil fuel and by type of service - disclose financial services to renewable versus non-renewable energy, disdaggregated by energy source - disclose their energy supply ratio	E1	E1-1 - Transition plan for climate change mitigation	14. (b)
Excels	Vereniging Milieudefensie	NGO	Netherlands			I disagree	The reference to ESRS 2 GDR-P removes the specification of areas for which the undertaking is required to indicate how its policies addresses them (i.e., climate change mitigation, climate change adaptation, energy efficiency, renewable energy deployment and other). The list of areas required to be covered must be added, either here, or under ESRS 2 GDR-P, providing the necessary clarify to undertakings what is expected from them. Deforestation and forest degradation must be added to the list, given their significant role in climate change and climate change mitigation.	E1	E1-4 - Policies related to climate change	22.
Excels	Vereniging Milieudefensie	NGO	Netherlands			I disagree	Description of TP lacks essential component: "A transition plan for climate change mitigation sets out how the undertaking intends to transform its strategy and business model to ensure compatibility with the transition to a sustainable economy." This must be changed to (cfr. Art. 19(a) Accounting Directive): "A transition plan for climate change mitigation sets out how the undertaking intends to transform its strategy and business model to ensure compatibility with the transition to a sustainable economy and with the limiting of global warming to 1,5 °C in line with the Paris Agreement under the United Nations Framework Convention on Climate Change."	E1	E1-1 - Transition plan for climate change mitigation	AR 1
Excels	Vereniging Milieudefensie	NGO	Netherlands			I disagree	We understand that the issue of the meaning of "compatibility with 1.5°C" is not addressed by EFRAG in the current EDs, as recommended by the EC representatives. Nonetheless, it must be clear that comparing GHG emission reduction target values with reference values derived from a 1.5°C pathway and scenario does not imply "compatibility" and that further guidance is required on the minimum amount of reductions required.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Vereniging Milieudefensie	NGO	Netherlands			I disagree	It is positive that reference to PCAF A was maintained. However the decision not to include reference to PCAF B and C lacks solid justification. Despite their nascency, various financial institutions have started or announced their intention to start using these standards. Moreover, it is unreasonable to require endorsement by the GHG Protocol, since the GHG Protocol has officially closed, on August 13, 2024, its Built on GHG Protocol review service.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	Vereniging Milieudefensie	NGO	Netherlands			I disagree	We disagree with an exception for banks on the requirement to disclose associated absolute values corresponding to intensity reduction targets in target year and interim year(s). As users ans shareholders, we consider absolute targets highly relevant for banks and other financial insitutions. Absolute emissions provide insight in banks' contribution to climate change, including through their financial activities. Absoltue targets (or absolute values if only intensity targets are used) represent material information with regard to the climate mitigation ambitions and the management of climate-related transition risk by financial institutions.e	E1	E1-6 - Targets related to climate change	12.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new version of DR E1-1 brings greater clarity, improved alignment with European regulation, and a reduction in reporting redundancies, particularly regarding Taxonomy-related CapEx. This update contributes to more efficient reporting and strengthens regulatory coherence without compromising the quality of the required information.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new version of DR E1-2 presents a more robust integration of climate risk perception, directly connecting with ESRS 2 and the disclosure requirements related to risk management. This approach helps demonstrate whether climate-related impacts, risks, and opportunities (IROs) are effectively embedded in the company's risk management processes. It also enhances methodological transparency by requiring more detail on how climate-related IROs are identified and assessed.	E1	E1-2 - Climate-related risks and scenario analysis	16.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The thematic reorganisation of DR E1-3, focusing exclusively on climate resilience analysis and transferring risk-related elements to DR E1-2 is a welcome change. It allows for a clearer focus on resilience disclosures and aligns the requirement with IFRS S2, promoting interoperability between the two reporting standards. Additionally, it reinforces the strategic importance of resilience, especially for sectors highly exposed to climate risks. DR E1-3 thus takes on a central role as a tool to assess the robustness of the business model against adverse climate scenarios.	E1	E1-3 - Resilience in relation to climate change	20.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of DR E1-4, which refers to DR GDR-P, adopts a more standardised and cross-cutting approach to climate policy reporting. This change improves consistency and comparability across companies and topics. However, it may lead to a loss of focus on specific areas such as mitigation, adaptation, or energy efficiency. While standardisation facilitates reporting, it requires careful attention to ensure that critical themes are not underrepresented, especially in sectors with high climate exposure. It could be useful to include guidance that help companies maintain visibility on key climate topics within the standardised framework. This would support both completeness and relevance of disclosures.	E1	E1-4 - Policies related to climate change	22.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I agree	The new version of DR E1-5 retains most of the previous requirements related to climate mitigation actions, while introducing a significant shift in the approach to investments. Whereas the previous version focused on current CapEx and OpEx in line with financial reporting and the Taxonomy, the new version shifts the focus to medium- and long-term planned values. Although this change may be more challenging, it enables a more strategic and forward-looking view of the company's climate actions and avoids duplication with requirements already covered under ESRS 1.	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of DR E1-6 adopts a simpler and more concise approach, which may facilitate reporting for many companies. However, some important elements have been removed, such as: • The requirement for specific targets for 2030 and 2050, which weakens the connection to long-term global and national climate goals. • External verification of targets, which may compromise transparency. While simplification brings flexibility, it may result in a loss of depth, particularly for sectors with high carbon intensity, where the clarity and ambition of targets are critical. To balance simplicity with robustness, it could be helpful to include the years 2030 and 2050 in the requirement of information, not just in the AR as example, and encourage voluntary disclosure of long-term targets and verification practices, especially for companies in high-impact sectors. This would preserve transparency and ambition without imposing excessive burden.	E1	E1-6 - Targets related to climate change	25.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version of DR E1-7 maintains its core focus while simplifying the general requirements to improve clarity. However, some relevant elements have been removed, such as: • The breakdown of renewable energy sources, which previously helped clarify the actual share of clean energy used. • The specific reference to companies with high climate impact, which excluded crucial information on emissions intensity relative to net revenue, reducing comparability across carbon-intensive sectors. While this simplification may ease reporting, it reduces data granularity and comparability, especially in contexts where energy consumption is a critical driver of climate impact. To preserve the usefulness of the disclosure, it could be helpful to recommend optional breakdowns or sector-specific indicators for companies with high climate exposure. This would support both transparency and comparability without compromising simplicity.	E1	E1-7 - Energy consumption and mix	28.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	DR E1-8 continues to focus on the quantification and characterisation of GHG emissions, while introducing important clarifications: • The inclusion of biogenic emissions represents progress in line with international standards. • The harmonisation of the operational threshold with ESRS 1 improves consistency and interoperability, especially with IFRS S2. However, the removal of the requirement to report emissions intensity (relative to net revenue) may reduce comparability between companies, particularly across sectors with different operational scales. To maintain comparability, it could be useful to recommend voluntary disclosure of emissions intensity, especially for high-impact sectors. This would support more meaningful benchmarking and sectoral analysis.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The DR E1-9 retains most of the previous disclosure requirements, while introducing a clearer structure and more objective language, which facilitates understanding and reporting. The main change is the removal of references to "net zero" targets, reflecting the current uncertainty and lack of standardisation around this concept. However, removing transparency requirements regarding carbon neutrality positions is a step backwards. The "net zero" concept is extremely difficult to substantiate, which makes it all the more important to maintain this requirement, so that entities adopting such positions can present their rationale. To preserve transparency and accountability, it could be useful to encourage voluntary disclosure of "net zero" commitments, along with supporting methodologies and assumptions. This would allow stakeholders to better assess the credibility and ambition of such claims.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	34.
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	This Disclosure Requirement (DR) has undergone significant changes, notably by introducing the requirement to report the internal carbon price per metric tonne. However, several important elements have been removed, such as: • The explicit link to climate policies and targets. • The description of methodologies, assumptions, and scientific guidance. • The coverage in terms of carbon footprint scopes. Despite these removals, the DR maintains the core intent of reporting on internal carbon pricing schemes, now with a more streamlined structure and better alignment with IFRS S2, reinforcing interoperability between standards.	E1	E1-10 - Internal carbon pricing	38.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GRACE empresas responsaveis	Business association (other than association of financial institution)	Portugal			I partially agree and partially disagree	The new version improves transparency and understanding of the financial impacts associated with climate-related risks and opportunities, by requiring: • More precise quantification of assets and revenues at risk. • Geographic location of vulnerable operations. • Detailed methodologies for financial estimates. Although the content has been reorganised, the DR strengthens the link between IROs and financial performance, promoting a more integrated and strategic approach to climate reporting. However, the application of Options 1 and 2, as referenced in the ESRS requirement, remains problematic. To ensure the DR remains relevant and decision-useful, it may be helpful to reconsider the inclusion of Options 1 and 2, or at least provide clearer guidance on their application. Prioritising disclosures that support financial sector needs, such as risk exposure and asset vulnerability, should remain the central objective.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	There is a new datapoint included, we object the inclusion of new datapoints as it is against the explicit target of the ESRS revision	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	There is a new datapoint included, we object the inclusion of new datapoints as it is against the explicit target of the ESRS revision	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- As climate scenario analysis is not mandatory under ESRS, it is not explicitly mentioned, we would suggest to clearly state that fact	E1	E1-2 - Climate-related risks and scenario analysis	16.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- AR 9 states companies "shall provide its climate resilience at the reporting date". This might imply a yearly update of the resilience analysis, please clarify that this is not the case in the next ESRS version.	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	- Paragraph 26 and AR 16 require a breakdown of targets for Scope 1, 2 and 3. We, as well as many other companies, do not set targets on scope level. We suggest to delete this requirement.	E1	E1-6 - Targets related to climate change	26.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	- We do not see the relevance of a distinct disclosure of biogenic emissions as required by paragraph 33	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	- In AR 21 (a) it remains unclear how to consider optional Scope 3 sub-categories or exemptions provided in GHGP. We would appreciate a clarification.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	SAP SE	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	- Paragraph 35 (c) about permanence of GHG storage seems not relevant in our opinion. Therefore, we propose to delete it.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (c)
Excels	European Biogas Association	Other - please specify (required)	Belgium			I partially agree and partially disagree	Based on our answer to the survey, AR 21, paragraph a) should be amended as follows: "consider the GHG Protocol Corporate Standard or the Commission Recommendation (EU) 2021/22795 or EN ISO 14064-1:2018. (...)"	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	European Biogas Association	Other - please specify (required)	Belgium			I partially agree and partially disagree	Based on our answer to the survey, AR 21, paragraph e) should be amended as follows: "report biogenic emissions from the combustion or biodegradation of biomass outside the scopes."	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	European Biogas Association	Other - please specify (required)	Belgium			I partially agree and partially disagree	The alternative choice between the GHG Protocol, the Commission Recommendation and the ISO standard should be phrased in clearer way. Suggested amendment: "(a) take into account the GHG Protocol Scope 2 Guidance (Version 2015, particularly the Scope 2 quality criteria in Chapter 7.1 relating to contractual instruments), or Commission Recommendation (EU) 2021/2279, or the relevant requirements for the quantification of indirect GHG emissions from imported energy in EN ISO 14064-1:2018;"	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24
Excels	European Biogas Association	Other - please specify (required)	Belgium			I partially agree and partially disagree	The alternative choice between the GHG Protocol, the Commission Recommendation and the ISO standard should be phrased in clearer way. Suggested amendment: (a) consider the principles and provisions of the GHG Protocol Corporate Value Chain (Scope 3) Accounting and Reporting Standard (Version 2011), or Commission Recommendation (EU) 2021/2279 or the relevant requirements for the quantification of indirect GHG emissions from EN ISO 14064-1:2018"	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	European Biogas Association	Other - please specify (required)	Belgium			I disagree	Suggested amendment: (d) (AR 46(g) amended) prioritise direct measurement of Scope 3 GHG emissions and, where this is not possible, further prioritise their inputs and assumptions based on the characteristics of the data (e.g. data from specific activities within the entity's upstream and downstream value chain, timely data that faithfully represents the jurisdiction of, and the technology used for, the upstream and downstream value chain activity and its GHG emissions, and data that has been verified); to this end, regulated market instruments based on certification and third-party auditing may be used. Comment: "In the EU, Proofs of Sustainability are a market instrument legally rooted in the RED and issued within regulated mass-balance systems. The certification framework is supported by national or voluntary schemes recognised by the European Commission, requiring third-party audits, standardised GHG emission accounting, and traceability from feedstock to end-use. Production plants are certified. On this basis, producers can issue PoS that accompany biomethane consignments through the gas infrastructure, where the EU gas grid is legally treated as a single logistical facility. This robust architecture enables companies purchasing certified biomethane (with PoS) to demonstrate measurable and verifiable emissions reductions—even if the physical gas is delivered via shared infrastructure."	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	European Biogas Association	Other - please specify (required)	Belgium			I partially agree and partially disagree	While this AR fully allows the use of the EU ETS Methodology for sectors under or not under the EU ETS, a clearer recognition of regulated market-based instruments such as RED-compliant Proofs of Sustainability, should be worded, to ensure clarity for reporters whatever the way that the EU ETS MRR is implemented in Member States. Suggested amendment: "For activities reporting under the EU Emissions Trading Scheme (ETS), the undertaking shall report on Scope 1 emissions following the EU ETS methodology. The EU ETS methodology may also be applied to activities in geographies and sectors that are not covered by the EU ETS, where regulated market instruments based on certification and third-party auditing may be used."	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 22

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	We welcome the improvements to the requirement to report the role of the administrative, management and supervisory bodies in the transition plan, which is more closely aligned with GRI 102: Climate Change (it used to be 'whether the transition plan is approved by...', leading to a yes/no answer).	E1	E1 - Objective	14. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We recommend referring to the just transition-related metrics in GRI 102: Climate Change, to further support undertakings in reporting the impacts on their own workforce resulting from the transition plan.	E1	E1 - Interaction with other ESRS	12. (c)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	Target validation information has been introduced, which is in line with GRI 102.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	AR 6 is marked in the exposure draft as 'for para 19', but based on the content it seems it should be 'for para 18 (b)' instead.	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	AR 16 establishes the need for separate targets for Scope 1+2 and Scope 3, consistent with the requirements of GRI 102. We therefore suggest revising paragraph 26 to ensure that this distinction is made explicit.	E1	E1-6 - Targets related to climate change	26.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Compared to the previous version, the specification 'in absolute value (either in tonnes of CO2eq or as a percentage of the emissions of a base year)' (former E1-4 34 (a)) has been removed. We deem it important to retain this specification, to provide clarity to the data point and for alignment with GRI 102.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The following requirement has been removed: 'The undertaking shall state the method used to calculate Scope 2 GHG emissions included in the target (i.e., either the location-based or market-based method)' (former E1-4 AR 24). We deem it important to retain this requirement, for alignment with GRI 102 and improved clarity and transparency.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	1. The difference between 'decarbonization levers' and 'actions' is not clear. We suggest this be made clear. 2. The tables' graphic resolution is not optimal. We suggest EFRAG considers moving the tables/graphics to an appendix, if this improves readability.	E1	E1-6 - Targets related to climate change	AR 14
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I disagree	GRI 102 does not require the quantitative contribution of each decarbonization lever to achieve the targets, but includes a requirement to explain the progress achieved (see GRI 102-4-j). The quantitative information by decarbonization lever may be too granular.	E1	E1-6 - Targets related to climate change	AR 14
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We suggest changing the following provision of AR 16: 'the undertaking shall calculate a 1.5°C-aligned reference target value for Scope 1 and 2 (and a separate one for Scope 3, if it has Scope 3 GHG emissions reduction targets)' to 'the undertaking shall calculate a 1.5°C-aligned reference target value for Scope 1 and 2 (and a separate one for Scope 3)' to clarify that Scope 3 targets are required, in line with E1 26.	E1	E1-6 - Targets related to climate change	AR 16
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	GRI 103 does not require reporting the total energy consumption related to own operations. Instead, reporting the total energy consumption within the organization is an optional disclosure. This is because the total amount can be misleading and for reporting to be meaningful it needs to focus on the specific types of energy consumption. We recommend that the ESRS adopt the same approach and move the total energy consumption to the NMIG.	E1	E1-7 - Energy consumption and mix	28.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Compared to the previous version, the breakdown of energy consumption from renewable sources (fuel/purchased/self-generated) has been removed. The previous version (former E1-5 37 (c)) was better aligned with GRI 103 and provided more information on the organization's renewable energy strategy.	E1	E1-7 - Energy consumption and mix	28. (c)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	The disaggregation of energy consumption by fossil sources was previously only required for organizations in high climate impact sectors. The current requirement is more aligned with GRI 103 and provides more transparency on energy consumption from fossil fuels.	E1	E1-7 - Energy consumption and mix	29.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	GRI 103 does not cover non-renewable energy production, as it is deemed sector specific. We suggest EFRAG considers removing the data point for simplification purposes and in alignment with GRI.	E1	E1-7 - Energy consumption and mix	30.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	ESRS requires reporting 'renewable energy production'. GRI 103 on the other hand requires reporting self-generated renewable energy consumption and sale. GRI does not cover all energy production, for example, self-generated renewable energy that is stored (and not consumed or sold), as it is deemed sector specific. We suggest EFRAG to consider whether further alignment with GRI 103 is possible.	E1	E1-7 - Energy consumption and mix	30.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	AR 17(j) appears to suggest that only the market-based approach is permitted for calculating purchased renewable and non-renewable energy consumption. However, as Scope 2 emissions must be reported using both the market-based and location-based methods (see E1-8 32(b)), we recommend aligning with GRI 102 and allowing the use of both methods for calculating purchased renewable and non-renewable energy consumption.	E1	E1-7 - Energy consumption and mix	AR 17
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	The removal of the mandatory data point on total GHG emissions increases the alignment with GRI 102.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Note that GRI covers all Scope 3 emissions and all 15 categories, while ESRS focuses the reporting on significant Scope 3 categories only.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (c)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The new language on boundaries of GHG emissions is more aligned with the GHG Protocol, IFRS S2 and GRI. EFRAG now requires using the financial control (consolidation) boundary. GRI recommends the same in GRI 1. However, both GRI and IFRS S2 allow the use of equity share as consolidation approach for GHG emissions. We suggest EFRAG considers further aligning allowing this third consolidation approach for GHG emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	With regards to AR 21 (e), it should be specified that the biogenic emissions exclude biogenic CO2 emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	We suggest including in the table separate reporting of biogenic CO2 emissions, in line with E1-8 33.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Former E1-7 58 (a) required to disaggregate and separately disclose the total GHG removals that occur in the undertaking's own operations from those that occur in its upstream and downstream value chain. This was more in line with GRI 102, which requires reporting the total Scope 1 removals and recommends reporting total Scope 3 removals. We suggest reinstating the disaggregation of total Scope 1 removals and total Scope 3 removals. Furthermore, GRI recommends but does not require reporting Scope 3 removals, based on experts' feedback that this information is difficult to compile. For the purpose of simplification, we suggest that EFRAG aligns with GRI 102 and moves reporting of Scope 3 removals to the NMIG.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	GRI recommends that any reversals be reported separately from GHG removals, in line with the GHG removals quality criteria. GRI 102's guidance states the following: "The CO2 and other GHG losses should be reported as GHG emissions (if storage pools are part of the GHG inventory boundary) or as reversals (if storage pools are no longer part of the GHG inventory boundary) in the reporting period". We suggest EFRAG considers aligning with GRI for greater transparency.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (d)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	The formulation financing through the purchase of carbon credits is not clear. GRI 102 requires reporting only carbon credits canceled, and recommends (but does not require) reporting the amount of carbon credits purchased and not canceled. We suggest EFRAG considers aligning with GRI, to enhance clarity and to support further simplification.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	GRI 102 recommends but does not require an explanation of whether the removal projects are from nature-based or technological sinks. We suggest moving this to the NMIG for simplification purposes and for alignment with GRI.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36. (c)
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I partially agree and partially disagree	Former E1-7 60 on the approach to reporting net-zero targets has been removed. We suggest reinstating part of this content as an Application Requirement for paragraph 37, to clarify expectations regarding the use of carbon credits (but also removals within the value chain) when making public GHG neutrality claims. Please see the following wording suggestion, based on GRI 102: 'In the context of GHG neutrality claims, organizations are expected to prioritize implementing all feasible technical and scientific actions to avoid and reduce GHG emissions across their value chains in alignment with the global effort needed to limit global warming to 1.5°C. According to the latest scientific evidence, GHG removals within and beyond the value chain can only be used to counterbalance residual GHG emissions as the last step of the mitigation hierarchy. Residual GHG emissions refer to the unabated GHG emissions after the organization has reduced at least 90% of its GHG emissions, and further reduction is not possible'.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37.
Excels	Global Reporting Initiative	Standard setting initiative	Netherlands			I agree	We agree with the inclusion of impacts in the objective of Disclosure requirement E1-11 "Anticipated financial effects from material physical and transition risks and potential climate-related opportunities".	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The alignment regarding the 1.5°C target has shifted from specific taregts to a broader focus on strategy and business models. This change introduces additional effort and complexity, as the terms "strategy" and "business model" are inherently flexible and open to interpretation. This flexibility allows for extensive discussions with auditors, but it does not provide any added value compared to the previous target-oriented approach. The targets were integral to the strategy and were already aligned with the business model. Therefore, maintaining a clear focus on the alignment of targets is essential for effective alignment and implementation.	E1	E1-1 - Transition plan for climate change mitigation	AR 1
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The timelines mentioned are "short, medium and long term", the word "and" here can increase the reporting burden. It is the same for DR 18 a and 18 b. Could you please add an overarching AR that covers all DR to state that undertakings are only requested to report on the most relevant timeline and not all 3?	E1	E1-3 - Resilience in relation to climate change	21. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Regarding AR 13 b, it will not be possible to select a base year of no longer than 3 years for companies that are aligned with the SBTi Net Zero standard, as they have set their decarbonisation targets for 2050 often as early as in 2019. Please do not increase the reporting burden by requesting a re-submission of targets for validation by changing the baseline year. Companies should be able to keep their current targets if they are indeed already proven to be in line with the Paris Agreement.	E1	E1-6 - Targets related to climate change	AR 13
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	There seems to be a contradiction with AR 21 e, do biogenic CO2 emissions need to be included or separated from the emissions scopes? The required information provides limited material insights with data difficult to obtain. Suggestion to delete requirements.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Regarding AR 24 b, the use of "shall reflect" here is confusing and implies a mandatory datapoint. The datapoint on the share and types of contractual instruments should be a voluntary datapoint. Please modify to "may". Futhermore, the idea and purpose of the information regarding "share and types of contractual instruments used to purchase energy" is unclear to us and should therefore be deleted or further specified.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is still not very clear if you can use the wording "Transition plan" while not having all the elements as described in the standards (specifically targets that respond to all the ESRS requirements)	E1	E1-1 - Transition plan for climate change mitigation	11.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Some of the disclosures expected by the ESRS cover sensitive information from a strategic perspective, disclosure of which could be used to their disadvantage by non-EU competitors of EU issuers that are under no such transparency obligations. The current wording of the exemption for disclosure of sensitive information should be revisited as it is currently too stringent to be used to safeguard business secrecy, especially in an international business environment that risks becoming even tenser. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer. All data points regarding significant CapEx and OpEx amounts should be deleted or made voluntary. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer. Moreover, the granularity required for GDR-A quantitative disclosures is disproportionately high. Although it would be much better to exclude resource-related quantitative metrics, if their reporting is deemed necessary, it should be required at consolidated level to ensure both relevance and practicality. Additionally, the level of detail required under the climate standard is significantly higher than in other standards.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Letter (c) it is incoherent the boundary of the numerator and the denominator: the numerator as per letter a is referred to "operational sites" while the denominator seems to be required on financial boundary. This data is irrelevant.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 23

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	AR 26 in reference to ESRS 1 3.7 may result in a high number of new datapoints depending on its interpretation by auditors. EFRAG should clearly state that the disaggregation of data is voluntary ("may…") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload and unjustified burdens for the disclosing company (information may not be available or only with high effort). The new wording seems to mandate a disaggregation of GHG emission while the previous requirement was "as appropriate", leaving more flexibility to the reporting company. We recommend to reintroduce the previous wording.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please refer to question 20 of the General Section	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Unclear whether included provision on EU Climate Law entails new requirements. Clarification also for audit process needed to avoid discussions.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Reduction targets, decarbonisation levers, key actions and the role of administrative, management and supervisory bodies are duplicated to paragraphs in E1-5, E1-6 and ESRS 2. This leads to additional work and complication even with clarification in new AR 2. Suggestion: Deletion of the requirements in the Transition Plan and additions in the named paragraphs.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The requirement on the qualitative assessment on locked-in GHG emissions from key assets and products is unclear and not comparable. The recording of locked-in GHG emissions is time-consuming and generates little added value. A qualitative assessment is not comparable between companies. It is unclear what counts as key assets and products. Proposal: Deletion of the paragraph, as it offers no added value and generates a lot of effort.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The granularity required for quantitative disclosures is disproportionately high. If considered necessary, it should be required at the consolidated level to ensure relevance and practicality. AR 2.b: It is not clear why the requirement was moved to ARs. Complicates the reading of the standard, as it is a mandatory specification. AR 2.c: Some of the disclosures under the ESRS cover sensitive information from a strategic perspective. The current wording of the exemption should be revisited as it is currently too stringent to be used to safeguard business secrecy. All data points regarding significant CapEx and OpEx amounts should be deleted. New Wording " there is no expectation that the undertaking discloses all internal information used to manage the plan." does not solving this issue. The disclosure of "financial resources supporting the implementation and strategic ambition of its transition plan for climate change mitigation, including quantitative short- and medium-term CapEx, and/or OpEx figures, and anticipated long-term CapEx and/or OpEx ranges" go beyond the initial requirements. It is unclear how the short-/medium-term and long-term time horizons are defined, considering the respective GHG targets defined by the companies. Requirements related to Transition Plans should be aligned with existing international frameworks.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The requirment "explanation of the plans to manage – e.g. by transforming, decommissioning or phasing out – its GHG-intensive and energy-intensive assets and products." went from voluntary to mandatory. Additionally mandatory reporting requirements were added regarding "dependencies of future financial resources and other resources and how these may constrain the ability to implement the transition plan actions." This results in additional work to fulfill the reporting requirements. Proposal: Change to voluntary disclosures.	E1	E1-1 - Transition plan for climate change mitigation	AR 3
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Additional shall requirement to resources and actions taken imprecise. Generates high coordination efforts. Achieved and expected GHG emissions are metrics. These should not be in ARs. The inclusion of a shall statement on sector-specific standards also generates additional work in the survey. In addition, high coordination effort with the auditor due to lack of precision	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The disclosure requirement should be able to be fulfilled in the ESRS 2 section when describing material IROs. Otherwise it would be duplicated.	E1	E1-2 - Climate-related risks and scenario analysis	17.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The short-term period is limited to 1 year with reference to ESRS 1. It does not make sense to carry out a climate scenario analysis for the reporting year (physical and transitory risks), as various climate scenarios are unrealistic in one year. The short-term period should be removed from the disclosure requirement.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The short-term period is limited to 1 year with reference to ESRS 1. It does not make sense to carry out a climate scenario analysis for the reporting year (physical and transitory risks), as various climate scenarios are unrealistic in one year. The short-term period should be removed from the disclosure requirement. Moreover, the current formulation of the AR indicate behavior obligations in how to conduct the scenario analysis going against ESRS 2 (ED) para. 5. Particularly the mandatory use of geospatial data and detailed methodological requirements related to supply chain lead to unnecessary complexity in the overall requirements. Reformulation needed (previously "This description shall include its process in relation to […]").	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The disclosure of the entire evaluation of the resilience analysis is unrealistic, as it involves far-reaching confidential documents. Companies may experience competitive disadvantages as a result of disclosure	E1	E1-3 - Resilience in relation to climate change	AR 9

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Additional requirements that mean increased effort in carrying out the resilience analysis and providing evidence. Consideration of the points listed offers no added value for external stakeholders like investors.	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The approach to reporting quantitative emission reductions should be based on aggregated data. Providing detailed information for each individual action/lever is particularly challenging, as the boundaries between actions can often be unclear. Additionally, individual disclosure implies revealing projected growth figures, which are both commercially sensitive and subject to a high degree of uncertainty. Therefore allowing companies the possibility to consolidate the information and report the total reductions considering all actions would be a more appropriate approach. Moreover, The information on achieved and expected GHG emissions should already be provided as part of the Transition Plan, AR 4. Duplication should be omitted.	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Absolute targets can mislead as they limit economic growth or reward market failure even for less CO2 intensive businesses. They do therefore consitute a behavioural requirements which contradicts that the general guidance that the ESRS do not make behavioural requirements. The disclosure of intensity/relative targets and the additional disclosure of the associated absolute values for the target year and the interim target year(s) means that companies must disclose the planned volume growth. This represents highly sensitive information and results in a competitive disadvantage and cannot be published. The current flexibilization of the requirement therefore does not represent the desired simplification. It should be possible to report intensity/relative targets without absolute values and also to prioritize intensity/relative targets over absolute targets.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	"In cases where the undertaking has only set a GHG intensity reduction target, it shall nevertheless disclose the associated absolute values for the target year and interim target year(s)." This requirement forces companies to disclose the planned volume growth. This puts them at a massive competitive disadvantage and cannot be published in this way.	E1	E1-6 - Targets related to climate change	AR 12
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Share of energy from nuclear sources in electricity mix should be deleted to avoid „duplication" with primary energy; little usefulness as metric is derived from statistical data only; share of nuclear energy in the electricity mix should not be part of reporting.	E1	E1-7 - Energy consumption and mix	28. (b)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	E1 - 36 (d) should be kept as no additional burden for disclosing companies; Removal of disclosure on total emissions appears illogical, as both users and disclosers are likely to want to see this information published. Even though it can be calculated independently, the lack of a requirement may lead to unnecessary discussions about whether it can be provided as a voluntary additional disclosure.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The introduced separate disclosure following the operational control approach allows for significant interpretation and is hence burdensome when aligning with auditors. EFRAG should make it clearer, that this is a "may"-disclosure.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We welcome the revisions especially in AR 25 (d); but the disclosure required in AR 25 (g) should be deleted as Cloud computing is only rented through the user company (Scope 3) but already disclosed by the provider (Scope 1) which leads to double counting and high efforts for verification	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We welcome the revisions regarding the table to report on emissions and the flexibilities it allows in presenting the information.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Failure to achieve the general objective of reducing disclosure requirements. This information has not only been moved, but has been changed from may to shall. We see no added value for external readers in this information.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (d)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We believe that disclosing the monetary and percentage exposure to physical risks without considering adaptation measures is problematic. It involves high uncertainty, may overestimate risks, and could discourage proactive resilience efforts. Disclosures should account for adaptation actions to reflect a more accurate risk picture and encourage companies to invest in climate resilience.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	In many cases, adaptation measures cannot reliably be directly linked to specific assets. Doing so would require enormous effort or result in imprecise data that offers little value. Therefore, a one-to-one attribution is neither practical nor feasible. There is also no clear use case for this metric. Also, please note, that while within Europe there are standardized energy efficiency categories for real estate, outside Europe this is not the case. Also, within Europe while the categories are standardized, the thresholds are different depending on the country.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We believe it is nearly impossible to reliably calculate the monetary amount and percentage of net revenue at risk from physical climate impacts before considering adaptation measures. The complexity arises from the high uncertainty of climate projections, the difficulty in quantifying future physical damages, and the challenge in accurately modeling how risks will evolve over time. Additionally, the lack of standardized methodologies and reliable data further complicates such estimations.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We believe that estimating the monetary and percentage impact on net revenue from transitional risks before considering mitigation and adaptation measures is highly challenging. Given the high uncertainty surrounding future policy changes, technological developments, and market shifts, it is more meaningful to incorporate measures into the assessment. Disclosing risks without accounting for planned actions may be misleading and fail to provide an accurate picture of the true risk exposure.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	In many cases, adaptation measures cannot reliably be directly linked to specific assets. Doing so would require enormous effort or result in imprecise data that offers little value. Therefore, a one-to-one attribution is neither practical nor feasible.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We believe that providing a detailed breakdown of the carrying amount of real estate assets used as loan collateral by energy-efficiency classes is challenging and may not be practical. Such detailed classification requires extensive data collection and consistent assessment methods, which can be resource-intensive and may result in inconsistent or unreliable information. Also, please note, that while within Europe there are standardized energy efficiency categories for real estate, outside Europe this is not the case. Also, within Europe while the categories are standardized, the thresholds are different depending on the country.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (c)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We believe that identifying potential liabilities from climate transition risks that do not meet current recognition criteria is challenging due to inherent uncertainties. Such liabilities depend on future developments and may not be reliably quantifiable or recognizeable in the financial statements at this stage. This point would also create a lot of confusion to readers to disclose potential liabilities, not already recognised in the financial statements.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The lack of precise data, the variability of future scenarios, and the difficulty in accurately predicting asset devaluation make such disclosures unreliable and potentially misleading. Therefore, BMW opts not to implement or publish such estimates.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Such estimates are highly challenging because opportunities related to the transition are difficult to quantify accurately. Additionally, due to competitive reasons, we would prefer not to disclose such figures, as they could reveal strategic information and be misinterpreted.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We consider the prescribed calculation approaches under AR 30—such as disclosing effects over different time horizons, including all asset types, and presenting energy efficiency classes—challenging to implement and potentially risky from a competitive perspective. Disclosing detailed, asset-specific data and estimates could reveal strategic information to competitors. High reporting burden on companies, high implementation costs.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Remove the reference to 'spatial resolution', as it is a new reporting requirement and its inclusion demands an excessive level of detail that may obstruct companies' ability to provide a meaningful and proportionate response.	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	While also a requirement of the IFRS Sustainability Disclosure Standards, the lack of clear and harmonized guidance on calculating anticiapted financial effects linked to individual climate-related risks and opportunities leads to inconsistent and unreliable information. The complexity and lack of integration between sustainability and financial systems make such quantification impractical. Additionally, by going beyond the requirements of the ISSB, the disclosure requirement can also reveal sensitive strategic information, that may affect the valuation of the company, leading to competitive disadvantages for European companies. We therefore advocate for removing all requirements related to anticipated financial effects while allowing voluntary provision of anticipated financial effects should a company wish to do so.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please refer to question 20 of the General Section.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E1	E1-7 - Energy consumption and mix	27.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	It's a positive development that the application of the financial control approach has been clarified.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We view the removal of the addition concerning high climate impact sectors as a positive step.	E1	E1-7 - Energy consumption and mix	29.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	We do not understand why the metric "Percentage of Scope 1 GHG emissions from regulated emission trading schemes" is being retained. We recommend removing the addendum to simplify reporting.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	The idea and purpose of the information regarding "share and types of contractual instruments used to purchase energy" is unclear to us and should therefore be deleted or further specified.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirements regarding carbon credits. This leads to a simplification of reporting, while the most important information has still been retained.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirements regarding Internal Carbon Pricing. This leads to a simplification of reporting, while the most important information has still been retained.	E1	E1-10 - Internal carbon pricing	38.
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This requires extensive quantification, is highly subjective and may not always result in useful information	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (e)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	This requires extensive quantification, is highly subjective and may not always result in useful information.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	Please refer also to question 20 of the General Section.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (a)
Excels	European Round Table for Industry	Business association (other than association of financial institution)	Belgium			I disagree	See comment above for more remarks: Firstly, revenue generation is highly interconnected and rarely attributable solely to individual assets or specific physical risks. Companies operate with complex supply chains, diverse customer bases, and integrated operations. Disaggregating total revenue to quantify the portion "at material physical risk" before adaptation is extremely challenging, if not practically impossible, given current data and attribution capabilities. Existing financial systems are not designed to track revenue at such granular, risk-specific levels. Secondly, estimating revenue "before considering climate adaptation actions" requires a hypothetical calculation, introducing significant subjectivity and uncertainty. This figure cannot be readily extracted from current financial reporting or modelled accurately, making it inherently unreliable. Finally, the complexity and speculative nature of this calculation create major auditability challenges. Producing figures that are both robust and verifiable would be extremely difficult, likely resulting in inconsistent reporting and reduced credibility of disclosures	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Challenges with understanding and calculation methodology of potential locked-in GHG emissions. This is not applicable to all companies, only for those that have emissions-intensive assets with a long lifetime. Make this DP voluntary and/or conditional, as it only applies to certain sectors, and specific assets.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Annual progress reporting (para. 16j) is impractical where projects run on 3- to 5-year cycles, allowing rolling three-year reporting for example with interim qualitative status for multi-year projects would be easier for companies to implement in practice. It should be allowed to disclose that the progress in implementing the transition plan from last year still applies (especially regarding individual measures) to reduce effort	E1	E1-1 - Transition plan for climate change mitigation	16.
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Insufficiently defined coverage of actions with regard to targets that go beyond the ESRS requirements (e.g. FLAG, no deforestation). Guidance needed, simplify DR	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Difficulty in quantifying the contribution of specific "decarbonisation levers" to overall scope 3 targets due to data gaps and influence limitations upstream	E1	E1-5 - Actions and resources in relation to climate change	24. (a)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Clarification and relevance: The calculation and reporting of biogenic emissions that occur in the company's upstream and downstream value chain cannot be meaningfully implemented in practice due to a lack of guidance, guidelines and standards. Remove datapoint or make voluntary	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Amendment for d) "prioritise direct measurement of Scope 3 GHG emissions" is not clear enough currently, unclear if this is guidance for data collection or disclosure requirement - if disclosure - what is to be disclosed exactly? To prioritise "primary data" is common best-practice for undertakings to achieve reductions - disclosing this has no added value Note: there is an error in the nummeration of AR 25 (a, f, b, c, e, d)	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Clarification needed for the definition of a "key asset". Note: there's an error in nummeration (a, c, b)	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Information should be allowed to be omitted if anticipated financial effects are not related. Financial risks and assets at risk are not always necessarily related, but can also be related to other factors (make DR conditional). The focus on assets reflects certain business models but this approach is irrelevant for the rest of the economy. This entails an enormous effort for information that is very important for a certain part of the economy, but for the rest the effort is not in proportion to the added value of the information to be reported. It should be made clear that financial terms (e.g. revenue) are consistent with definitions of financial accounting of the reporting companies and there should be no separate ESRS-specific definitions. Changes made are not helpful.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	REWE Group	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Further guidance required, as it remains unclear whether mitigation matters are to be included or not - the question is, if measures at current state should be taken into account or not. This is still unclear	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We welcome the focus made in reporting on "key features" of a transition plan for climate change mitigation which correspond to the essential components on which the undertaking shall disclose information. However, we invite EFRAG to clarify whether a plan could be qualified as a "transition plan" under ESRS E1 if any of the key features is missing, and therefore not disclosed. Besides, we invite EFRAG to clarify the reporting requirement on the 1.5°C compatibility of the undertaking's strategy and business model (third sentence of § 14(a)) as it is unclear to assess what is expected beyond the description of the "key features" that already include information on such compatibility for the GHG emission reduction targets.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We recommend including a definition and/or examples of potential locked-in emissions from «key assets». EFRAG could leverage on the definition already provided in AR 3 of the current ESRS E1.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	With reference to point (c) on financial resources, we encourage EFRAG to further rely on ESRS 2 GDR-A (cf. § 38) to which AR 2(c) refers. ESRS 2 indeed makes a clear distinction between financial resources allocated to the key actions in the reporting period (with the disclosure of the related amounts and the corresponding line items and/or notes where these amounts are included in the financial statements) and future financial resources expected to be allocated for the implementation of the key actions (with the disclosure of an indicative range). Besides, we recommend that EFRAG insist on the need for consistency between internal available information and reported information. Further guidance on how to build estimates of future financial resources could also be provided in view of the challenges for preparers to provide reliable and comparable information. Besides, we invite EFRAG to indicate that CapEx and/or OpEx may be presented on an aggregate basis, as implicitly authorized by NMIG 4 (a).	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We understand that the references to specific climate scenarios which may, for example, be based on IPCC SSP5-8.5, relevant regional climate projections based on these emission scenarios, or NGFS (Network for Greening the Financial System) climate scenarios with high physical risk such as "Hot house world" or "Too ligle, too late" were removed because they were not applicable to certain companies, but we believe this references remain useful as guidance. We recommend keeping these references while making it clearer that they are in NMIG for guidance purposes only.	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	In this comment we are referring to former AR 28 on emission reduction factors, which is deleted in the current proposal. We believe the precisions brought by former AR 28 are useful to support the calculation of a 1.5°C-aligned reference target value.	E1	E1-6 - Targets related to climate change	26.
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We invite EFRAG to specify that the 1.5°C compatibility of the GHG emission reduction targets can be demonstrated by providing the validation of an independent third party, in consistency with what is stated in DR E1-1 (cf. AR 2 (a)).	E1	E1-6 - Targets related to climate change	AR 16
Excels	Forvis Mazars Group	Auditor	Belgium			I disagree	Requiring to also report according to the operational control approach would increase both the burden and the complexity in the reporting. Besides, this approach leaves significant room for judgement regarding the circumstances that could lead to impose a reporting in accordance with such approach. We therefore recommend removing such requirement. As indicated in Part 2 of the survey, we encourage EFRAG to align with IFRS S2 even though it means allowing a company to choose between different approaches under the GHG Protocol. Should this paragraph be maintained, EFRAG should not limit the requirement to Scope 1 and 2, excluding Scope 3 emissions, since operational control boundaries can significantly impact Scope 3 emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	As indicated in Part 2 of the survey, we encourage EFRAG to clarify the "shall consider" requirement with respect to the GHG Protocol Corporate Standard. We encourage EFRAG to clarify that the GHG Protocol shall be applied, while precisely listing the elements for which ESRS take precedence over the GHG Protocol (in particular with respect to the emissions reporting boundary). Besides, EFRAG should also clarify what is allowed/required in practice if a company considers Commission Recommendation (EU) 2021/2279 or EN ISO 14064-1:2018 as permitted by § AR 21. For instance, does a company using the ISO guidance still has to report under the GHG Protocol if the calculation and reporting of GHG emissions under EN ISO 14064-1:2018 differ at some point from the GHG Protocol Corporate Standard? Same comment applies to § AR 24 and AR 25.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We suggest imposing the use of a table template to present the GHG emissions disaggregated by Scopes 1, 2 and significant Scope 3 categories, to ensure comparability in reporting, while allowing the undertaking to present additional lines and/or columns to this table to provide further granularity, if relevant.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	Forvis Mazars Group	Auditor	Belgium			I partially agree and partially disagree	We welcome the streamlining of former DR E1-9 since the granularity and complexity of this DR raise many questions in practice. Very few companies have chosen to provide information in the 2024 reports and it is expected that the phase-in measures will still be widely used based on the "quick fix" amendments. Nonetheless, we note that the proposed new DR is still very granular. In view of the significant difficulties in preparing this information, we encourage EFRAG to ensure that only information that is essential to users is required.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	Bundesverband Deutscher Leasing-Unternehmen e. V..	Association of financial institutions	Germany			I partially agree and partially disagree	We do not understand the need to refer to 'finance-lease / right-of-use-assets'. It seems simpler to refer just to 'leases' (with the term being defined as we suggested for ESRS 1 - 70). Right-of-use assets includes both (former) finance lease and (former) operating leases, so it seems redundant to now refer separately to finance leases.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	Bundesverband Deutscher Leasing-Unternehmen e. V..	Association of financial institutions	Germany			I partially agree and partially disagree	Clause (a) refers to the GHG Protocol Corporat Value Chain (Scope 3) Accounting and Reporting Standard (Version 2011). Appendix A of this Standard, Accounting for Emissions from Leased Assets, was obviously developed prior to IFRS 16 being in place, and it therefore tends to contradict the approach of ESRS 1-70. We suggest it is clarified that for leases, the approach set out in ESRS 1-70 overrides the GHG Standard.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	Bundesverband Deutscher Leasing-Unternehmen e. V..	Association of financial institutions	Germany			I partially agree and partially disagree	The reporting boundary cross refers to ESRS 1 59, that deals specifically with group reporting. Taken in isolation (i.e. without reading ESRS 1 70, this might be seen as including assets leased nby a lessor to its customers. We suggest a cross-reference to ESRS 1 70	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We suggest to keep the requirement that targets should be updated every 5 years after 2030 in.	E1	E1-6 - Targets related to climate change	6.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	GHG intensity is deleted. We share the concern that this will affect user' ability to understand an undertaking's carbon risk exposure over time. We propose to maintain this indicator.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	30.
Excels	Triodos Bank N.V.	Bank	Netherlands			I agree	We agree with the financial control approach.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	8.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	We propose to keep the requirement, to publish a date of adoption of transition plan for undertakings not having adopted transition plan yet, in place.	E1	E1-1 - Transition plan for climate change mitigation	16.
Excels	Triodos Bank N.V.	Bank	Netherlands			I disagree	Considering the relevance of GHG Scope 3 GHG emissions in the total emissions of many companies, we propose to keep the disclosure requirement about why scope 3 GHG emissions has been excluded in.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	26.
Excels	BDO	Auditor	Belgium			I partially agree and partially disagree	Please be aware that practices may differ across EU member states. Therefore, it is advisable to consider these variations when finalising the revised ESRS requirements and to consider whether flexibility is needed as to the approach to be followed.	E1	E1-7 - Energy consumption and mix	AR 17

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	The Exposure Draft allows GHG emission reduction targets to be presented in a combined manner. However, in cases where combined targets are disclosed, it requires undertakings to indicate the share related to each respective GHG emission Scope. In practice, we think that this requirement is problematic for several reasons: 1) Decarbonization levers impact multiple Scopes simultaneously, making a reliable split by Scope unrealistic. 2) Holistic impact of reduction measures: Large multinational groups with decentralized structures implement decarbonization programs across various business units and geographies. These programs are designed to achieve overall reductions in GHG emissions, not to optimize reductions in a specific Scope. Requiring a Scope-by-Scope allocation risks introducing artificial splits that do not reflect the actual management approach. 3) Complexity and inconsistency risk: Estimating Scope-specific shares would require assumptions, undermining comparability and reliability. 4) Existing disclosures already ensure clarity, as companies must specify which Scopes are covered by the target. We therefore propose deleting the wording "and the share related to each respective GHG emission scope" in E1.26a, to keep the requirement both meaningful and feasible.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	Presentation of targets and actions: We would suggest including this Application Requirement in the NMIG, as it is only a "may" requirement and therefore not mandatory. To avoid confusion regarding the mandatory Disclosure Requirements, we believe it is misplaced in its current location.	E1	E1-6 - Targets related to climate change	AR 14
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We would like to raise concerns regarding the interpretation of AR 15 for E1.26 (GHG emissions reduction targets compatible with 1.5°C). AR 15 refers to companies applying the operational control boundary under E1-8. Yet the revised E1-8 requires the financial control boundary as the default, with operational control disclosure only where needed to avoid unfair presentation of Scope 1 and Scope 2 emissions. Generally, target setting only makes sense on an operational control basis. Setting a target for a leased asset (for Scopes 1 and 2) does not make sense if it is not possible to influence emissions in this area. We therefore recommend that the operational control approach also be permitted for E1-8.	E1	E1-6 - Targets related to climate change	AR 15
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	ESRS 1.70 clearly states that "impacts, risks and opportunities arising from the use of a leased asset do not depend on whether the asset is legally owned or leased. The lessee is causing and contributing to the impacts of the leased asset, therefore reports the impacts and related risks and opportunities in its own operations, during the lease period. The lessor is directly connected with the impacts of the leased asset; therefore, it reports the impacts and related risks and opportunities as part of its downstream value chain." This corresponds to the operational control approach. However, this important and sensible clarification is undermined in E1-8. This means that the operational approach is permitted for all impacts expect for GHG emissions. This is inconsistent and leads to completely unnecessary confusion among stakeholders. We therefore propose allowing the operational approach to be permitted also for GHG emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	For the sake of clarity, we would recommend explicitly stating that the level of aggregation may, in accordance with [Draft] Amended ESRS 1, Chapter 3.7, be determined by the undertaking itself. Otherwise, we see a risk that this Application Requirement could be interpreted as imposing a requirement to disclose GHG emissions disaggregated by country, operating segment, economic activity, subsidiary, GHG, or source type in all cases.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	Austrian Financial Reporting Advisory Committee (AFRAC)	(National) standard setter	Austria			I partially agree and partially disagree	We suggest including this Application Requirement in the NMIG, as it is only a "may" requirement and therefore not mandatory. To avoid confusion regarding the mandatory Disclosure Requirements, we believe it is misplaced in its current location.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Proposition to delete. For companies where this is relevant this is probaly communicated to investors anyway (oil & gas, utilities, etc.)	E1	E1-1 - Transition plan for climate change mitigation	14. (b)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The value of this information depends on the sector	E1	E1-1 - Transition plan for climate change mitigation	14. (d)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	For OPEX, it is typically not possible to retrieve the information reliably from financial reporting; for CAPEX it can be typically done based on assumptions	E1	E1-1 - Transition plan for climate change mitigation	AR 2 (c)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. Recommendation to report the outcome and not the process; it would be an option to disclose the process in a separate publication (voluntarily)	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. Recommendation to report the outcome and not the process; it would be an option to disclose the process in a separate publication (voluntarily)	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. Recommendation to report the outcome and not the process; it would be an option to disclose the process in a separate publication (voluntarily)	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Delete. Actions are already described, what is an action and what is the lever? The distinction is unclear	E1	E1-5 - Actions and resources in relation to climate change	24. (a)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Keep but merge with the transition plan, "expected emission reductions" are forward looking statements, potentially sensitive information and difficult to audit. Delete "achieved reduction" by lever. Achieved reductions can be reported for key actions, however it is impossible for preparers to meaningfully calculate the achieved reduction by levers as a combination of all single actions (bottom-up) or top-down where the allocation would be based on expert judgement/assumption and have a high degree of measurement uncertainty	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Generally valuable information, however this will already be covered with the target and can be deleted here	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Biogenic emissions should not count from our perspective, current reporting can lead to double counting and misinterpretations, also not aligned with reporting under EU ETS	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21 (e)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Henkel AG & Co. KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We propose to delete the entire E1-11. We do not support disclosing anticipated finanial effects due to the high uncertainty. The main concern is that such disclosures would in any case not be comparable, as methodologies for determining the anticipated financial effects would need to be based on a number of (interdependent) assumptions about the future which by definition lead to a broad range of outputs (scenarios). We do not believe that speculative information about potential future developments and broad ranges of outcomes can be considered decision-making useful information for any stakeholder.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	European Renewable Gas Registry	Other - please specify (required)	Belgium			I partially agree and partially disagree	Biomethane plays a crucial role in this direction and there is uncertainty in the ESRS on how biomethane can be treated to assist companies in their sustainable reporting. Simply referring to the GHG Protocol Corporate Standard for reporting GHG emissions does not solve the issue particularly when the GHG Protocol itself does not provide clear guidance on the accounting of biomethane certificates for Scope 1 emissions and its revision is scheduled for 2028. As a consequence, we see delays in investments in biomethane production, as companies hesitate to make investments without certainty that biomethane use will be recognised in ESG reporting and decarbonisation targets. ERGaR calls on EFRAG to clarify how biomethane can be treated for Scope 1 & 3 emissions by explicitly referencing the ETS methodology (please see paragraph below). If such clarification cannot be included directly in the final standard, we recommend providing a footnote or supplementary guidance on the EFRAG website. This would be particularly valuable during the transition period, until the GHG Protocol offers more comprehensive guidance.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	European Renewable Gas Registry	Other - please specify (required)	Belgium			I partially agree and partially disagree	In the same spirit as the AR 21, we also believe that the AM does not help provide clarity for companies. AR 22 refers to the ETS methodology, under which sustainable biomethane can be zero-rated (i.e. its emissions are considered zero). While this approach should encourage the use of biomethane, current practice shows that many companies and auditors perceive the rules as unclear, which in turn hinders crucial investment decisions. As ERGaR, we call on EFRAG to explicitly refer to the ETS methodology as a way to treat biomethane in reporting for Scope 1 & 3 emissions until the new guidance from the GHG Protocol becomes available.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 22
Excels	European Renewable Gas Registry	Other - please specify (required)	Belgium			I partially agree and partially disagree	Based on our answer to the survey, AR 21, paragraph e) should be amended as follows: "report biogenic emissions from the combustion or biodegradation of biomass outside the scopes."	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	European Renewable Gas Registry	Other - please specify (required)	Belgium			I disagree	Suggested amendment: (d) (AR 46(g) amended) prioritise direct measurement of Scope 3 GHG emissions and, where this is not possible, further prioritise their inputs and assumptions based on the characteristics of the data (e.g. data from specific activities within the entity's upstream and downstream value chain, timely data that faithfully represents the jurisdiction of, and the technology used for, the upstream and downstream value chain activity and its GHG emissions, and data that has been verified); to this end, regulated market instruments based on certification and third-party auditing may be used. Comment: "In the EU, Proofs of Sustainability are a market instrument legally rooted in the RED and issued within regulated mass-balance systems. The certification framework is supported by national or voluntary schemes recognised by the European Commission, requiring third-party audits, standardised GHG emission accounting, and traceability from feedstock to end-use. Production plants are certified. On this basis, producers can issue PoS that accompany biomethane consignments through the gas infrastructure, where the EU gas grid is legally treated as a single logistical facility. This robust architecture enables companies purchasing certified biomethane (with PoS) to demonstrate measurable and verifiable emissions reductions—even if the physical gas is delivered via shared infrastructure."	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Companies also remind that the European Commission committed to define by end of 2025 the meaning of "compatibility between companies'target and 1.5°C targets". Until such a definition is published, no obligations are legitimate on this issue. They stress that the Paris Agreement also refers to "well below 2°C objective" which should be reinserted in the amended CSRD.	E1	E1-1 - Transition plan for climate change mitigation	1.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	In §14c), a new requirement has been inserted : "dependencies on which the transition plan relies". This additional "shall" requirement goes too far; furthermore, it is inconsistent with AR21. This new reference needs to be suppressed.	E1	E1-1 - Transition plan for climate change mitigation	1.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	§19 includes a new "shall" requirement:" for paragraph 18(b) it shall include the type of transition event analysed. In conducting its climate -related physical risk analysis supported by scenario analysis, the undertaking shall". Tha table in AR12 of set was presented as an example, not as a requirement. Those new obligations should be suppressed.	E1	E1-2 - Climate-related risks and scenario analysis	2.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	AR5 for §18 includes new requirement on the way the climate-related physical risks should conducted. The same with AR6 on §19 for climate-related transition risks. This goes too far in details considering methodologies are not yet mature. Those requirements should be suppressed.	E1	E1-2 - Climate-related risks and scenario analysis	2.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	The notion of resilience used in this section is very much unclear (see glossary); if the concept refers to adaptation, then it should be replaced by climate adaptation (without any reference to transition). In addition, in §21, new requirements b) and dc) have been inserted which appear excessive. They should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	AR 8 to §20 added a requirement: "shall consider the implications of the combined assessments performed according to DRs E1-2". This new obligation is excessive and should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	AR10 to §21c) introduced a new c):" The effect of current and planned investments in climate mitigation, adaptation and transition opportunities on climate resilience enhancement". This requirement is excessive in regard to the uncertainties faced by undertakings. It should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	§24 a) adds a "shall" disclosure by requesting climate change mitigation actions by decarbonisation lever; this goes too far for operators. This decomposition should be suppressed.	E1	E1-5 - Actions and resources in relation to climate change	5.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	In regard to §26 c) companies remind that the European Commission committed to define by end of 2025 the meaning of "compatibility between companies'target and 1.5°C targets". Until such a definition is published, no obligations are legitimate on this issue.	E1	E1-6 - Targets related to climate change	6.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	Companies consider, in the case where disclosing an absolute emissions target would provide to competitors key sensitive information (i.e.: production forecasts) which are very sensitive, that they should be entitled to publish only a target expressed in intensity,. In this regard, a clarification that the "relief" mentioned in ESRS 1 §98 is effectively applicable for section E1-6 appears essential.	E1	E1-6 - Targets related to climate change	6.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	§24 c) adds a "shall" disclosure to indicate different CapEx and OpEx for 3 horizons: short term, medium term and long term; this is too prescriptive, gives rise to uncertainty and may be considered as misleading for the markets. Therefore, global information can be provided but only for significant amounts of CapEx/OpEx and without obligations of time horizon.	E1	E1-5 - Actions and resources in relation to climate change	5.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I partially agree and partially disagree	AR13 to §26 introduced a new obligation in b): " The undertaking is to select a recent base year that does not precede the first reporting year of the new target by longer than three years". Companies question the need for such a new requirement.	E1	E1-6 - Targets related to climate change	6.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	In §29, a new obligation was inserted compared to "set1" to require the undertaking "to further disaggregate its total energy consumption from fossil" by categories. This goes too far in details and is not compatible with the simplification objective of ESRSs. Therefore, this new requirement should be suppressed.	E1	E1-7 - Energy consumption and mix	7.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	4 data points have turned to "shall" in §34; this goes too far and subparagraphs a) to d) should be transferred to NMIG.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	9.
Excels	GIFAS (Groupement des Industries Françaises Aéronautiques et Spatiales)	Business association (other than association of financial institution)	France			I disagree	In §38, a new requirement has been inserted about: "the consistency of the prices used with the prices used in the financial statement for impairment tests". This goes too far in details and should be suppressed.	E1	E1-10 - Internal carbon pricing	10.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E1. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E1	E1 - Interaction with other ESRS	1.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Change title to "Policies related to climate change mitigation, adaptation and energy" to put more emphasis on the sub-topics of the standard. Change "climate policies" to "policies on climate change mitigation, adaptation and energy"	E1	E1-4 - Policies related to climate change	22.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Change title to "Actions and resources related to climate change mitigation, adaptation and energy" to put more emphasis on the sub-topics of the standard. Change "key climate change actions and resources" to "key actions and resources related to climate change mitigation, adaptation and energy"	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Change title to "Targets related to climate change mitigation, adaptation and energy" to put more emphasis on the sub-topics of the standard. Change "climate change targets" to "targets related to climate change mitigation, adaptation and energy"	E1	E1-6 - Targets related to climate change	25.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I agree	Transition plans are essential for report users in the financial sector, but also for public policy and civil society, to understand an undertaking's contribution to mitigate climate change. The requirement to report a transition plan, based on different essential and supporting elements (or "key features"), should consequently remain a central part of ESRS E1.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Given the political decision to discontinue EFRAG's work on ESRS sector standards, we recommend to include the possibility to disclose sector-specific transition metrics as part of the transition plan under para. 14.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The Commission should rapidly clarify what is expected from an undertaking, when reporting on the compatibility of its transition plan with the goal to limit global warming to 1.5°C.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Para. 18 only relates to exposure to hazards and transition events. Risk, however, is defined as the combination of exposure and sensitivity (see AR 5/AR 6 (a) and (b)). Hence, the introductory sentence of para. 18 needs to be amended to: "...how its assets and business activities in own operations and upstream and downstream value chain may be exposed and are sensitive:"	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Undertaking should not only "include the spatial resolution of the analysis" but use scenarios with the highest available resolution. Amend sentence to: "For paragraph 18 (a), the undertaking shall use scenarios with the highest available spatial resolution."	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	the key elements of methodology "how the undertaking has used scenario analyses" should include "which scenarios were used, their sources and alignment with state-of-the-art science" (reinstating former AR 13 (a))	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	AR 5 should be complemented by a note that "Using climate scenarios for the analysis is most useful for time horizons of more than 10 years. For shorter time horizons climate forecasts or trend analysis can be more proportionate."	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The requirement is lacking a clarification on the time horizons undertakings are expected to consider. We recommend to specify as follows: "The undertaking shall explain how it has defined short-, medium- and long-term time horizons for the identification of climate-related hazards and how these definitions are linked to the expected lifetime of its assets, strategic planning horizons and capital allocation plans"	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The requirement is lacking a clarification on the time horizons undertakings are expected to consider. We recommend to specify as follows: "The undertaking shall explain how it has defined short-, medium- and long-term time horizons for the identification of climate-related transition events and how these definitions are linked to the expected lifetime of its assets, strategic planning horizons and capital allocation plans"	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Confusing use of terminology. It should be clarified that here financial exposure is meant (not physical exposure to a hazard). Change to "The quantification of the financial exposure of assets and business activities..."	E1	E1-2 - Climate-related risks and scenario analysis	AR 7
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We note that this paragraph is not fully clear. 1) E1-2 does not specifiy of which types of scenario anaylsis are possible. E1-2 is the disclosure requirement covering provisions for scenario analysis. Therefore, the distinction between qualitative and quantitative analysis should be introduced already in E1-2. 2) independently from the scenario analysis being quantiative, semi-quantitative or qualitative, the underatking should consider the interplay between E1-2, E1-3 and E1-11. We suggest to EFRAG to revisit these provisions and better align the requirements.	E1	E1-3 - Resilience in relation to climate change	AR 8

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The link between the CapEx plans as part of the EU Taxonomy (former E1 para. 29 (c) and ESRS reporting on resources allocated to actions should be reinstated. Preferably, an AR to ESRS 2 GDR-A should specify: "If applicable, the undertaking shall relate its CapEx amounts to the , the CapEx plan required by Commission Delegated Regulation (EU) 2021/2178." Alternatively, that provision can be introduced only for E1 as AR for para. 24 (c).	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	We recommend to reinstate the requirement to update base year and target year in five year intervals starting from 2030 (former para. 34 (d)). This requirement is particularly useful from a user perspective because it will ease the comparison of GHG emission reduction targets.	E1	E1-6 - Targets related to climate change	AR 13
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	The reporting of GHG emissions under proposed amended ESRS E1-8 is based on the GHG Protocol Corporate Standard, Scope 2 Guidance and Scope 3 Standard. These standards do not explicitly define how to account for the non-CO2-climate effects of air traffic (especially NOx emissions and long-lived contrails), which are significant. However, it is common practice to account for these effects through the "radiative forcing index" (RFI). We recommend to EFRAG to include a provision in Application Requirement (AR) 21 that these effects shall be included in the GHG inventory and that RFI used is to be disclosed.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I agree	We welcome that proposed amended E1-8 retains the requirement for dual reporting of Scope 2 GHG emissions with the location-based and market-based approach, which is in line with the GHG Protocol, will assist comparability of GHG inventory data and avoid greenwashing.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (a)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	The concept of "net-zero targets" is deleted from [Draft] amended ESRS E1. Targets labelled as "net-zero" should, however, follow basic rules to ensure their credibility and avoid greenwashing. These targets must be separated and not confused from more common but less ambitious claims to achieve GHG neutrality based on carbon credits. Hence, we recommend to EFRAG to reinstate the possibility to report net-zero targets from current ESRS E1-7 (para. 60) along with the definition of the term.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	34.
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	[Draft] amended E1-9 para. 35 conflates removals from projects in own operations with those in the value chain and is not clear whether the amount is to be reported by project or as a sum of all projects. We recommend reporting the sum of removed GHG from projects in own operations and the value chain separately, leaving the option to provide project specific information, if deemed material.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (b)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	Practical implementation of E1-9 would be significantly eased with a publicly available list of standards and carbon crediting programs that can be considered as "recognized quality standards". Based on such a list, undertakings would have certainty which carbon credits are of high quality and can be reported according to ESRS E1. They would also not have to assess for themselves if the programs / standards, based on which their purchased carbon credits are generated and cancelled, fulfil the ESRS quality criteria. Therefore, we recommend that the European Commission issues a list of recognized quality standards for carbon credits and acts as a neutral instance to assess whether a carbon crediting program applying to be listed can be recognised based on defined quality criteria (additionality, permanence, avoidance of double counting, ..., see ESRS definition of "recognised quality standards for carbon credits"). For the purpose of ensuring credibility and environmental integrity, the quality criteria in the ESRS definition would need to be further specified by the Commission (e.g. what does permanence mean for certain reduction and removal projects?). For that, the Commission can rely on existing work, e.g. on ICAOs CORSIA.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37. (b)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I disagree	The proposed amendment of ESRS E1-10 on internal carbon pricing schemes suggests that an undertaking shall report "the price per metric tonne of GHG emissions" (para. 38 (b)). Often companies apply different internal carbon prices for different purposes. Hence, it is unclear which price is to be reported. EFRAG should specify that transparency is expected for the average carbon price in each pricing scheme the undertaking applies.	E1	E1-10 - Internal carbon pricing	38. (b)
Excels	German Environment Agency	National supervisory authority & regulator	Germany			I partially agree and partially disagree	WE note that the text of NMIG 12 for para. 41(d) need to be amended in accordance with E1-8 (delete total GHG emissions)	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We acknowledge and support the extension of the compatibility assessment beyond GHG targets to cover the overall strategy and business model, including explicit reference to the EU's 2050 climate neutrality goal. This is consistent with EFRAG's stated objective of enhancing the credibility of transition plans. However, performing, substantiating and evaluating such compatibility without a recognised framework or criteria will be challenging. We recommend that EFRAG provides at least high-level guidance on the principles or parameters that undertakings should consider when assessing compatibility of their strategy and business model with 1.5°C, until such time as Level 1 regulation provides a more detailed definition.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The revised DR on climate transition plans introduces a list of key features but does not clarify what is expected at a minimum for an undertaking to legitimately claim it has a transition plan. It remains ambiguous whether all of the key features must be covered, or if a partial disclosure would still qualify as a transition plan under ESRS. We recommend that EFRAG clarifies in the DR or AR what constitutes the minimum requirements for a transition plan, i.e. whether all the identified key features must be addressed, or whether a transition plan can be considered valid with only some of them, provided material gaps are explained.	E1	E1-1 - Transition plan for climate change mitigation	AR 1

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The revised text (E1-2) clarifies that scenario analysis is not mandatory for all undertakings, but if performed, it must conform with AR 5 and AR 6 methodological requirements. However, several helpful references and examples from Set 1 have been removed, including: • Reference to the SSP5-8.5 high-emission pathway for physical risk analysis. • Reference to established scenario analysis frameworks (e.g., TCFD, ISO 14091). • Examples of reference low-carbon scenarios (e.g., IEA, NGFS) for transition risk assessment. • Spatial resolution of physical risk analysis is not mentioned explicitly. While these were deleted to streamline the text, we recommend that EFRAG retains these references in non-mandatory implementation guidance (NMIG) to guide preparers, especially smaller entities, on which scenarios to select.	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The revised E1-3 improves alignment with IFRS S2 but removes explicit mention of certain aspects that helped delimit scope and increase clarity in Set 1. We recommend that EFRAG reintroduces description of boundaries or exclusions in resilience analysis from ex-AR6.	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The revised DR requires undertakings to disclose CapEx and OpEx related to climate change, but it does not define any significance threshold. As a result, companies are left without clear criteria to determine which expenditures to include, especially for forward-looking (prospective) investments. In addition, the attribution of CapEx/OpEx to climate or environmental objectives remains difficult in practice, since many investments serve multiple purposes and the boundary between climate-related and other expenditures is hard to delineate. • We recommend that EFRAG provide guidance on how to determine when CapEx/OpEx should be considered for reporting including how prospective amounts should be included. • And clarify attribution principles for CapEx/OpEx related to climate/environmental objectives, for example by allowing allocation on a proportionate or estimated basis where investments serve multiple purposes. In addition, direct and indirect reconciliations with the financial statements are necessary to ensure overall coherence and connectivity of CapEx/OpEx disclosures.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	While E1-1 now includes a datapoint for third-party validation of 1.5°C-aligned targets, there is no equivalent requirement for targets disclosed under E1-6. Ensure consistency by introducing a similar datapoint in E1-6 for external validation of climate targets.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I disagree	The revised ESRS E1 now specifies that the organisational boundary for GHG emissions reporting shall follow the reporting undertaking definition in amended ESRS 1 §59, which is "equivalent to the financial control (consolidation) boundary under the GHG Protocol". However: • The ESRS definition of "own operations" for joint operations departs from the GHG Protocol's approach, creating potential interoperability issues. • The accounting of GHG emissions from joint ventures according to the GHG Protocol is based on equity share. This may differ from the way they are treated under ESRS which can be as investments depending on accounting principles applied. • ESRS 1 §70 introduces a distinct treatment for leased assets, whereas under the GHG Protocol, such assets may be reported differently (we recognise that the GHG Protocol is not up-to-date). We recommend EFRAG to allow undertakings to choose between the financial control, operational control, and equity share approaches provided by the GHG Protocol, to clarify how ESRS 1 §70's treatment of leased assets interacts with the GHG Protocol definitions for Scope 1, 2, and 3 to avoid double counting or omission, and to provide illustrative boundary application examples for joint ventures, joint operations, and leased assets under ESRS, with explicit reconciliation to GHG Protocol options.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I disagree	The amended AR 19 mandates additional disclosure of Scope 1 and 2 emissions under the operational control boundary "when, due to specific facts and circumstances, the financial control boundary fails to provide a fair presentation". As a result, the proposed approach may create complexity through double reporting and is not fully aligned or interoperable with IFRS S2 and the GHG Protocol. The notion of "fair presentation" is not well defined, creating ambiguity regarding when this supplementary reporting will be required. Besides, the requirement is restricted to Scope 1 and 2, excluding Scope 3 emissions, although operational control boundaries can significantly impact Scope 3 reporting. In addition, while the revised ESRS provisions maintain the possibility to use the operational control boundary "in line with the GHG Protocol", there is still no clear guidance on how this control criterion should be applied in practice. We recommend allowing a company to decide which approach under the GHG Protocol it wants to apply, avoiding duplicative "fair presentation" reporting, and that EFRAG provide explicit technical guidance on the application of the operational control concept, including borderline cases (e.g., operated joint ventures, leased assets, outsourced operations).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	AR 21 states that undertakings "shall consider" the GHG Protocol Corporate Standard (2004) and "can also consider" ISO 14064-1:2018 or Commission Recommendation (EU) 2021/2279. If ISO 14064-1 is applied, undertakings must still comply with ESRS requirements. The wording "shall consider" and "can also consider" is ambiguous and causes uncertainty on whether alternative methodologies can be applied in full. We recommend that EFRAG clarify whether undertakings can fully apply other recognised methodologies (e.g., ISO 14064-1) where equivalent to the GHG Protocol and ensure the language differentiates between mandatory application and optional reference to prevent ambiguity, while considering differences with ESRS that could create reporting conflicts.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	21.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	The revised ESRS E1 retains the requirement to explain carbon removals and the use of carbon credits. However, we note with concern the deletion of datapoints related to net-zero targets and the associated guidance. This removal creates uncertainty over the meaning and use of the "net-zero" terminology in corporate disclosures, despite its wide adoption as a structuring element in climate strategies. Net-zero commitments are a cornerstone of many corporate climate strategies and a key reference point for stakeholders assessing transition plans. Without clear guidance, companies may adopt divergent interpretations, impairing comparability and transparency. We recommend that EFRAG reconsider the treatment of net-zero targets and related guidance on residual emissions, removals, and carbon credits to provide clarity and ensure consistency in corporate disclosures.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37.
Excels	Compagnie Nationale des Commissaires aux Comptes	Auditor	France			I partially agree and partially disagree	We acknowledge the streamlining of E1-11 and its improved interoperability with IFRS S2. However, despite the reduction in datapoints, the current disclosure remains too granular and insufficiently prioritised compared to ISSB; we recommend allowing aggregation with clear guidance, while retaining quantitative reporting only for key metrics to ensure decision-usefulness and comparability.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	It is still not very clear if you can use the wording "Transition plan" while not having all the elements as described in the standards (specifically targets that respond to all the ESRS requirements).	E1	E1-1 - Transition plan for climate change mitigation	11.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The definition of "dependencies" in Annex II refers to the situation of an undertaking relies on natural, human and/or social resources for its business processes. However, the connection between this concept and "locked-in emissions" does not make sense. Is the term "dependencies" intended as "assumptions"?.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I partially agree and partially disagree	Information on "anticipated long-term CapEx and/or OpEx ranges" are very difficult to gather and not always relevant for all the topic. As such, this information should be voluntary.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Letter (c) - the boundary of the numerator is incoherent with the denominator: the numerator as per letter a is referred to "operational sites" while the denominator seems to be required on financial boundary. This data is irrelevant.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 23
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	The new wording seems to mandate a disaggregation of GHG emission while the previous requirement was "as appropriate", leaving more flexibility to the reporting company. We recommend to reintroduce the previous wording.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Please refer to question 20 of the General Section	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Please refer to question 20 of the General Section	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	Confindustria	Business association (other than association of financial institution)	Italy			I disagree	Please refer to question 20 of the General Section	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I agree	Generally welcome the simplified structure and clearer language. Appreciate that references to other ESRS sections have been reduced to enable the standard to be read and understood on its own.	E1	E1 - Objective	1.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	This AR includes a requirement to "With reference to targets, incude a statement on wheter the GHG emission reduction targets are science-based and compatible with limiting global warming to 1,5deg C". The exact same requirement is included in DR E1-6 26 (c), see line below. Consider wheter it would be sufficient to include this requirement only in one place in the document.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	This DR includes a requirement to incude "a statement on wheter the GHG emission reduction targets are science-based and compatible with limiting global warming to 1,5 deg C". This is a duplication of the requirement in E1-1 (AR 2 for para 14 (a). Same comment as line above regarding considering not to dublicate requirements in the document.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Consider whether it would be useful to include the term "gross targets" in Annex II "Aggregated acronyms and glossary of terms", thereby including "gross targets" in bold&italic font in the text of this DR.	E1	E1-6 - Targets related to climate change	AR 11
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Point (b) in the list covers the same as point (a) ie. reference to Figure 2 is done twice. Propose to remove the (a) and (b), and continue the main section with the text included in (b), ie: .....showing the decarbonisation levers and their quantitative contributions to achieve the GHG emission reduction targets (e.g. energy or material efficiency and consumption reduction, fuel switching, use of renewable energy, phase-out or substitution of product and process) as a table (see, e.g. Figure 2) or graphic over time (see, e.g. Figure 1) (underlined text is the text from (b).	E1	E1-6 - Targets related to climate change	AR 14
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Par. 28 and AR 17 c). This DR/AR specify that energy consumption shall be disclosed in MWh. Propose to make it clearer that if more appropriate, energy consumption can also be reported in kWh, GWh, TWh, etc.	E1	E1-7 - Energy consumption and mix	28.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Para 29 includes a requirement to disaggreget its total energy consumption from fossil sources, including (e) consumption of purchased or acquired electricity, heat, steam, or cooling from fossil sources. Propose that a requirement to disclose the "consumption of purchasaed or acquired electricity.... from renewable sources" and also "consumption of purchased or acquired electricity.... from nuclear sources" are also included in E1-7, either direcly in para 28 or specified / made clearer in AR 17.	E1	E1-7 - Energy consumption and mix	29.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	This DR/AR specify that GHG emissions shall be disclosed in tonnes of CO_2eq. Propose to make it clearer that if more appropriate, GHG emissions can also be reported in million tonnes, etc.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	This AR presents different alternatives for disaggregating information on its GHG emissions. Whereas several alternatives are available, the list is exhaustive and can be read to mean that other disaggregations than those presented may not be done. There may be better ways of disaggregating GHG emissions in various industrial sectors than the ones described, eg. for the O&G sector, disaggregation of GHG emissions on eg power&heat, flaring and venting to illustrate how much of the GHG emissions stem from eg flaring (with much focus) could be relevant. Therefore, the alternatives should not be presented as exhaustive, but open up for other ways of disaggregating emissions than those included in the text.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Consider to include DR E1-5 "Actions and resources in relation to climate change" after DR E1-6 - Targets related to climate change", as this is the logical order; setting targets and then defining actions and resources to achieve the targets. In DR E1-1 "Transition plan.." this order is now used in the text, ie in para 14: "...This includes GHG emission reduction targets, the decarbonisation levers, key actions, " and in AR 2 "The key features referred to in paragraph 14(a) shall refer to disclosures on policies, actions, resources and targets made elsewhere..". This should also be considered for the other standards.	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	#13 The disclosure draft adds a requirement that transition plans to show compatibility with the objectives of European Climate law 2021/1119 (not in the original E-1 standard). This law has quite clear objectives for e.g. 2030 interim ambitions (55% reduction). #14 also references the need ("shall") to have transition plans that are compatible with the EU's climate neutrality objective. This would seem to add quite significantly to the requirments and the evidentiary standard for transition plans.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	#21c The requirement for a company to explain "how it would need to respond to the effects identified in the climate-related scenario analysis" is cumbersome and could add significant amount of unncessary work and as well as raise liability issues. It is not desirable/impossible for a preparer go into great detail about how we would have to change our strategy/behaviour according to a range of scenarios. This text can be removed without affecting intent and value to investors of the information requested requirement.	E1	E1-3 - Resilience in relation to climate change	21. (c)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	#26c and AR16: suggest that the AR includes an additional provision to say: "If the undertaking has stated that its targets are science based and compatible with limiting global warming to 1.5-degrees C.... the undertaking shall compare its target value(s) with a sector-specific (if available) or a cross-sector emission pathway etc"	E1	E1-6 - Targets related to climate change	26. (c)
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	ANSWER PROVIDED IN PART 2	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	Equinor ASA	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Equinor strongly supports opening for the use of current industry reporting boundaries like the GHG protocol when reporting our emissions. However, clarification of the concept of"fair presentation"is needed. What constitutes a "fair" view from the perspective of the users of the sustainability statement and ensure interoperability with IFRS Sustainability Disclosure Standards. See also our comments to ESRS 1 and Q25 in part 2.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree Firstly, there is an inconsistency in language compared to ESRS E1, paragraph 17, using "climate-related physical risk" (17) and here "climate-related hazards" (18). Secondly, we find the disclosure requirements in ESRS-E1-18 and supplemented by the additional requirements in ESRS E1, paragraph 19, to go beyond what should be disclosed in an annual report (general purpose sustainability report). We believe the details illustrate the steps needed internally (and hence part of the internal documentation) but should not be a direct disclosure requirement. It is particularly the list in ESRS E1, paragraph 19, that triggers the unnecessary level of detail.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree As stated above, this should be removed as a disclosure requirement or at the very least refocussed together with (18) to provide a condensed and focussed reporting relevant for a general-purpose sustainability reporting	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree We would like to note that the requirement in ESRS E1, paragraph 24c, may be difficult to report on in practice. If a company is renovating a factory – and as part of this ensures that it can handle future climate risks, pollution requirements and reduce the water consumption – then it is very difficult to identify the specific elements of CAPEX/OPEX relating to climate change compared to the overall CAPEX/OPEX, as the climate change elements may just be a specification in the overall design. We suggest allowing for a qualitative description of the CapEX for the user to understand the current investments etc. rather than providing an arbitrary split. It should be noted that this is an additional requirement to the information required by EU Taxonomy and based on different allocation.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially disagree ESRS E1, paragraph 26a, requires "absolute" reduction targets. Many entities have SBTi approved "relative" reduction targets, and which is still in accordance with the SBTi standard. Therefore, entities should also be allowed to report their relative reduction targets. We suggest amending the paragraph to include both options as possible disclosure, i.e. requiring entities to choose one of them.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree ESRS E1, AR26, state the entities "shall" compare information required in DR26(c) to sector-specific or cross-sector emission pathway. ARs should not include disclosure requirements. We suggest the AR is changed from "shall" to a possible comparison without requiring such comparable. It should furthermore be considered moved to NMIG.	E1	E1-6 - Targets related to climate change	AR 16

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I partially agree and partially disagree	Partially agree We believe it is important that this amendment is further amended with a materiality threshold, as the biogenic emissions should only be required to be reported, if they are material. Not securing this will put an unnecessary reporting burden on the entities and will not provide decision useful information. We propose to amend to ESRS E1, paragraph 33, as a minimum with the inclusion of a 10% threshold inspired by the taxonomy reporting or at least with the inclusion of "material" (changes marked with capital letters: "33... The undertaking shall disclose its MATERIAL biogenic CO2 emissions from the compulsion or biodegrading of biomass separately from the emission scopes, IF THIS CONSTITUTES MORE THAN 10 % OF THE EMISSIONS." We also note that the reporting of biogenic emissions are currently not included in the proposed table in AR27.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We find only the exposure to physical risks at the reporting date has relevance to users. For this reason, we recommend that undertakings shall consider physical risks net of climate change adaptation actions concluded at the reporting date, i.e. only before planned and unfinished actions. This can be emphasized by adding the following text to the datapoint: '... before considering planned and unfinished climate adaptation actions at the reporting date.'	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We do not see the relevance of this datapoint. Assets addressed by mitigating actions are not exposed to material physical risks at the reporting date. If not removed, the datapoint should be limited to assets addressed by mitigating actions completed in the reporting period, i.e. excluding historical mitigation actions.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (c)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We do not see the relevance of disclosing revenue associated with assets for which the physical risks have been mitigated. Only net risk exposures are relevant to users. Hence, it should be limited to assets at material physical risks before planned and unfinished climate adaptation actions at the reporting date.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We support option 2 also for climate-related anticipated financial risks. Only transition risks net of climate change mitigation actions completed at the reporting date is relevant to users.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (a)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We do not see the relevance of this datapoint. If not removed, the datapoint should be limited to assets addressed by mitigation actions completed in the reporting period, i.e. excluding historical mitigation actions.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (b)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We find this datapoint onerous and resulting in overly granular disclosure of little relevance. If not removed, it should be limited to real estate assets exposed to material transitional risks, net of mitigation actions at the reporting date.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (c)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We find that 'potential liabilities' does not sufficiently delimit scenarios for what can be considered relevant to users. The datapoint should be limited to 'liabilities from anticipated financial effects'.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We find that 'potential stranded assets' does not sufficiently delimit the scenarios for what can be considered relevant to users. The datapoint should be limited to 'anticipated stranded assets'.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	Danish National Funding Mechanism	(National) standard setter	Denmark			I disagree	We support option 2 also for climate-related opportunities.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	The requirement states that the description of the transformation plan "shall also include information on how the undertaking's strategy and business model are compatible with the Paris Agreement limiting global warming to 1.5°C and with the EU's objective of achieving climate neutrality by 2050." However, it lacks clarification on how to recognize this compliance (which will be difficult for an auditor to verify later).	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	Failure to define what "significant CapEx amounts" means will result in different approaches to disclosing this information by entities and a lack of basis for verification of these statements by the auditor.	E1	E1-1 - Transition plan for climate change mitigation	14. (b)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	There is no explanation of the time period covered by the description of progress in implementing the transformation plan.	E1	E1-1 - Transition plan for climate change mitigation	14. (d)
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	There is no definition of "climate-related transition events and trends".	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	There is no definition of "high-emission climate scenario" and no examples of scenarios.	E1	E1-2 - Climate-related risks and scenario analysis	AR 5

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	There is no definition of "climate scenario in line with limiting global warming to 1.5°C with no, or limited, overshooting" and no examples of scenarios are provided.	E1	E1-4 - Policies related to climate change	AR 6
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I partially agree and partially disagree	There is a lack of information on how to understand "non-renewable energy production" (e.g. is owning a gas furnace considered such production?).	E1	E1-7 - Energy consumption and mix	30.
Excels	UHY ECA Audyt Sp. z o.o.	Auditor	Poland			I disagree	The issue of biogenic emissions is complex and poorly understood, even among carbon footprint experts. We propose clarifying how "biogenic CO2 emissions from the combustion or biodegradation of biomass" should be defined. Does this refer only to direct biomass combustion or, for example, the use of biocomponents in fuels (in practice, this would apply to most companies). There is also a lack of guidance on how to approach the identification of biogenic emissions in Scope 3.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	as these characteristic should guide the production of the whole report, should it be particularly noted here? which end?	E1	E1 - Interaction with other ESRS	AR 1
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	As the AR introduce reporting requirement, we would suggest to include it as part of par 14	E1	E1 - Interaction with other ESRS	AR 2
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We suggest to include something like "the undertaking may include this information (progress in implementing the transition plan) while describing the transition plan"	E1	E1 - Interaction with other ESRS	4.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	I recommend incorporating the time horizons in this para and removing them from paragraphs a) and b) below to maintain coherence.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	please clarify the meaning of spacial resolution of the analysis	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	as this requirement ((a) identify climate-related hazards over the short, medium and long term and screen whether its assets and business activities are exposed to these hazards;) is already included in par 18, we would suggest to remove it	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	as this requirement ((a) identify transition events over the short, medium and long term and screen whether its assets and business activities are exposed to these events;) is already included in par 18, we would suggest to remove it	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	As the scenario analysis requirement is specifically associated with E1-2, we recommend relocating this AR to that section.	E1	E1-3 - Resilience in relation to climate change	8.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	To avoid duplication with the information already included in section E1-1, We suggest to include the following clarification: In addition to the P, A, and T elements already disclosed in DR E1-1 regarding the climate transition plan, the following information should be reported for other climate change-related IROs—including those related to climate change mitigation, adaptation, and energy.	E1	E1-4 - Policies related to climate change	22.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	This paragraph addresses climate change mitigation as outlined in page 24.a. If actions related to energy and climate change adaptation are also to be reported, this should be clearly stated. Furthermore, any duplication with information already provided in E1-1 should be avoided.	E1	E1-4 - Policies related to climate change	24.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Please be aware that applying decarbonization levers may not always be suitable in this context. For instance, when the positive impact relates to supporting climate change mitigation through solutions that enable third parties to lower their greenhouse gas emissions, these levers might not be applicable. As such, we recommend either removing this reference or offering additional clarification.	E1	E1-4 - Policies related to climate change	24. (a)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Please see comments above.	E1	E1-4 - Policies related to climate change	24. (b)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Could you clarify the key differences between this paragraph and the information requirements already addressed/requested in ESRS 2 - GDR-A? Is this redundant?	E1	E1-4 - Policies related to climate change	24. (c)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Could you please clarify how the information requested in E1-6 differs from that in E1-1 regarding targets? Understanding this distinction would help prevent any duplication.	E1	E1-6 - Targets related to climate change	26.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Total flexibility on the base year should be provided	E1	E1-6 - Targets related to climate change	AR 13
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	We would suggest to include at least the base year, the Current year -1 , and the current year	E1	E1-6 - Targets related to climate change	AR 27
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	Given that the disclosure requirements primarily emphasize risks and opportunities, what is the rationale for also including impacts?	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	This creates requirements that differ from those outlined in ESRS 1, which states that "Internal risk management processes are a critical source of input for the materiality assessment of risks." If these internal risk management processes employ a net approach, it would introduce a distinct requirement.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I disagree	This creates requirements that differ from those outlined in ESRS 1, which states that "Internal risk management processes are a critical source of input for the materiality assessment of risks." If these internal risk management processes employ a net approach, it would introduce a distinct requirement.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (a)
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	Please specify if this is referred to material opportunities	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Amadeus IT Group, S.A	Preparer (non-financial preparing a sustainability report)	Spain			I partially agree and partially disagree	In section b), please specify which asset value should be taken into account? Since this is a finance lease, it may not be feasible to obtain this information.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E1 Climate change, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, and targets (if in place), dependencies when relevant, metrics and financial effects. Suggestion: When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E1 Climate change, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place), dependencies when relevant, metrics and financial effects.	E1	ESRS E1 - Objective	1.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The addition of the EU's target year of achieving climate neutrality within the ESRS does not seem useful, as the year might change in the future and will be specified within other regulation. In addition, it is hard for internationally operating undertakings (especially financial institutions) to adhere to such a year, when international ambitions outside the EU might differ. Therefore, we would welcome the option to set different target years for transition plans (within reason).	E1	E1-1 - Transition plan for climate change mitigation	13 -14
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Point b was deleted because it was too broad in scope, but its purpose was correct. Removing it enables "scenario picking," which limits comparability and the assessment of the information provided. Considering the phase-in period for valuing anticipated financial effects, it would have been better to keep the requirement to explain "why it believes the range of scenarios used covers its plausible risks and uncertainties," linked to the disclosure of anticipated financial effects.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The mandatory disclosure is difficult for financial institutions, as CapEx ist not a widely used KPI (if at all). We would welcome a clarification/alternative disclosure or option to leave out the data point for the financial services sector.	E1	E1-1 - Transition plan for climate change mitigation	14 (b)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The new wording includes items previously listed in subparagraphs that are now deleted. This compact form does not add clarity but instead creates additional uncertainty when interpreting a more broadly defined disclosure. A clear list of items to be disclosed was far more effective, and saving pages in the ESRS was never an objective of the simplification exercise. §14.e – deleting subparagraph e) is wrong. While the Taxonomy Regulation was indeed excessive, as long as it remains valid, the coordination between Capex Art. 8 activities and a transition plan is essential information for assessing the transition plan itself. Similarly, the new §14.b makes little sense without referencing the Taxonomy Regulation. Shouldn't this, in fact, be required under the SFDR regulation?	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The clarifications, the stronger prioritization of requirements, and the reduction of data points are welcomed. However, certain disclosure elements extend beyond planned investments and their financing, as they would require disclosure of the entire corporate planning in connection with transition plans, including financial and investment planning. While the matter is still under discussion in the Omnibus process, it should be made explicit that deviations from the 1.5°C pathway are permissible. The Paris Agreement refers to a target of "significantly below 2 degrees," and much of the scientific community no longer considers the 1.5°C target realistically achievable. In the real estate sector, other targets are commonly applied. For example, the CRREM pathway provides scientifically based decarbonization trajectories, defining specific CO_2e emission thresholds depending on the type and location of properties. These pathways are regularly updated, most recently in 2023, to reflect new developments and improved data, particularly the reduced remaining CO_2e budgets. The 2.0°C pathway is regarded as a practicable benchmark, aligned with the specific requirements and possibilities of the real estate industry.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	This requirement overlaps with the DMA and risks resulting in duplicative reporting without ensuring the intended focus of E1-2 on climate risks and scenarios. The deletion of sub-paragraphs does not contribute to clarity in implementation. More generally, this issue applies to all comparable DRs: the cross-references to SBM3 and IRO-1 do not add value. Such overlaps should therefore be removed, and it should be made clear—through explicit and, where necessary, detailed references within the connected DRs—that double reporting is not required.	E1	E1-2 - Climate-related risks and scenario analysis	16.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The value added of indicating the "tools" used for analysis is unclear. What matters is the methodology, not the technical tool. In addition, the use of "and/or" leaves open the possibility of naming a tool without providing any information on the methodology.	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Die Veröffentlichung der Emissionsreduktion für Kreditinstitute in Form von THG-Intensitäten ist zu begrüßen. Allerdings wird im ESRS E1-26a weiterhin gefordert, zusätzlich zu den Intensitäten absolute Reduktionswerte offenzulegen […] "in relation to the outcome of the key climate change mitigation actions, include the achieved and expected GHG emission reduction". Wenn Finanzinsitute ihre Reduktion in THG-Intensitäten berichten gilt es diesen Paragraphen zu spezifizieren. Für Own Operations Emissionen ist die Offenlegung von absoluten Werten weiterhin sinnvoll.	E1	E1-5 - Actions and resources in relation to climate change	24. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The deletion of the Taxonomy reference due to reconciliation challenges renders the figures largely arbitrary and, in practice, of little use if not misleading. In such case, it would have been preferable to remove the CapEx/OpEx requirement entirely and instead rely, where applicable, on disclosures already required under the Taxonomy Regulation. A comparison of ESRS V1.0 and the Exposure Drafts highlights inconsistencies. ESRS E1-29c requires disclosure of only significant CapEx and OpEx amounts. By contrast, ESRS E1-24c of the Exposure Drafts demands disclosure of short-, medium-, and long-term CapEx and OpEx, including ranges, in relation to financial and other resources allocated to key actions. Such a breakdown is neither required nor evident in the current ESRS and does not ease the broader discussion on quantifying anticipated financial effects. If this data point is retained within the ESRS, further clarification is required, particularly for the financial services sector, regarding the scope and manner of CapEx and OpEx reporting.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Reporting GHG reductions by financial institutions in terms of intensities is welcomed. However, ESRS E1-26(a) still requires disclosure of absolute reduction targets for Scopes 1, 2, and 3, either separately or combined, and, where relevant, also in intensity terms. In cases of combined targets, undertakings must specify which Scopes are covered and the share attributable to each Scope. For financial institutions that report reductions in GHG intensities, this provision requires clarification, as absolute targets are not meaningful at portfolio level. For own operations, disclosure in absolute terms remains appropriate. Problem: The current text of ESRS E1-26(a) requires disclosure of absolute GHG emission reduction targets for Scopes 1–3, either separately or combined, and, where relevant, in intensity terms, with a breakdown of coverage and share per Scope. Suggestion: The requirement should be revised to permit disclosure either in absolute or in intensity terms, depending on the undertaking's activities, with clarification that intensity-based reporting is sufficient for financial institutions, while absolute targets remain relevant for own operations.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The simplification in energy consumption reporting is welcomed. However, the requirements set out in paragraph ESRS E1-29 remain overly granular. The relevance of this information for credit institutions is still not evident. A further simplification for credit institutions is therefore recommended.	E1	E1-7 - Energy consumption and mix	29.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The deletion of intensity metrics removes one of the few KPIs that enable proper benchmarking of companies within industries. Moreover, these metrics can always be calculated by users with the available information, meaning they required zero additional effort from CSRD report preparers and offered no real simplification. Given that CSRD sector standards are not planned for the coming years, removing the KPI instead of integrating it and providing more flexibility in disclosure is not the correct solution.	E1	E1-7 - Energy consumption and mix	30.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	No additional value is created, and the proposed simplification does not address the potential ambiguities and complexity arising from the value chain.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	It is questionable whether the data point "biogenic CO_2 emissions from the combustion or biodegradation of biomass, reported separately from the emission scopes," is sufficiently common to justify its inclusion in a generally applicable standard. For financial institutions in particular, this data point provides no added value, as such emissions are negligible compared to financed emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	The requirement, as currently drafted, is of limited relevance. Projects outside an undertaking's own operations and value chain are essentially comparable to donations, and the reference to both "financed" and "intends to finance" further reduces clarity. The additional phrase "if it has financed" is inconsistent with the earlier wording "intends to finance" and should be aligned. Financial institutions should be permitted to report on certificates deriving from projects they have financed, provided such certificates are used within their decarbonization strategy and the associated emission reductions are not double counted in other calculations. In this context, the requirement referring to projects "outside the upstream and downstream value chain" should either be removed or explicitly clarified for financial institutions.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Limited to cases where undertaking made public claims...The required disclosures regarding carbon credits are important even in the cases the usage of carbon credits is not part of claims of GHG neutrality. Especially considering the widespread need to use carbon credits for the hard-to-abate GHG by 2050.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	It is welcomed that ESRS E1-11 permits qualitative reporting. However, the requirements do not specify how such disclosure should be structured. Clarification is needed that reporting may rely on existing methodologies already in use and that the ESRS do not mandate the development or application of any new methodology for assessing financial effects.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Problem: Unnecessary duplication: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a) if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b) the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative Suggestion: The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M. In particular: (a)if the undertaking has not adopted policies, actions and targets with reference to a topic related to material impacts, risks and opportunities, it shall disclose this fact; (b)the undertaking may present the description of its material impacts, risks and opportunities, in accordance with [Draft] Amended ESRS 2 IRO-2, alongside information about its policies, actions, targets and metrics through which it addresses them, to avoid duplication and support a coherent narrative .	E1	ESRS E1 - Objective	9.
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	Wir begrüßen grundsätzlich den Fokus auf dem Konzept der finanziellen Kontrolle. Jedoch kann nicht ausgeschlossen werden, dass die Berichtsgrenzen im Sinne der finanziellen Kontrolle nach dem GHG-Protokoll von dem Konsolidierungskreis gemäß dem Finanzbericht abweichen. Wir plädieren für den Gleichlauf bei konsolidierten Unternehmen in der Finanz- und Nachhaltigkeitsberichterstattung, auch für ESRS E1 / GHG.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I disagree	Im Sinne der Vergleichbarkeit würden wir einen Gleichlauf bei konsolidierten Unternehmen in der Finanz- und Nachhaltigkeitsberichterstattung bevorzugen, auch für ESRS E1 / GHG. Sollte eine weitere Kennzahl sinnvoll sein, die auf einen abweichenden Kreis der Unternehmen bezieht, könnte diese freiwillig ergänzend als "entity specific" berichtet werden.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The final sentence is unclear: "While this information helps demonstrate the coherence and credibility of the transition plan, there is no expectation that the undertaking disclose all internal information used to manage the plan." It is uncertain whether this means disclosure requirements are not binding, or whether reporting may remain at a very high-level and generic. A clearer approach would be to permit non-disclosure, provided that a limited set of clearly defined information is made available. As noted in other comments, such vague simplifications add uncertainty, reduce comparability, and create unnecessary discussions with auditors. ESRS E1-AR2 introduces a cross-reference mechanism within the transition plan, requiring that key features under paragraph 14(a) refer to disclosures on policies, actions, resources and targets made elsewhere (e.g., ESRS E1-5, E1-6, and ESRS 2). This is intended to eliminate duplication and consolidate information into a coherent narrative demonstrating strategic alignment. However, separate disclosure requirements for policies, actions, and targets remain in place, leaving unclear how consolidation is to be achieved in practice without duplication or inconsistency. Further clarification is therefore required.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	German Banking Industry Committee (GBIC)	Association of financial institutions	Germany			I partially agree and partially disagree	The wording "shall adopt" is considerably stricter than the "shall consider" used in AR21 with respect to the GHG Protocol. For consistency, AR25 and AR21 should be aligned. If the GHG Protocol is intended to be mandatory, this should be clearly stated with "shall adopt"; if not, it should be clarified as a recommendation only. In AR25(f), the requirement appears overstretched. ESRS 1 allows undertakings to define their own methodologies and explain their quality, yet the implicit "shall adopt" in AR25 goes beyond this and creates undue rigidity by referencing only Part A of December 2022, despite the fact that the ESRS will have legal force and future developments should be anticipated. In AR25(d), it remains unclear whether the reference is intended as an alternative to the GHG Protocol and the two other options, or as a complementary requirement. This ambiguity requires clarification.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	Allianz SE	Insurance	Germany			I disagree	This DR introduces a new concept of "related financial and investment plans" – This goes beyond the initial ESRS and thus, the reference to financial plans/resources and locked-in emissions should be removed. Even though the new disclsoure might make sense, it would increae burden tremendously. Including this new concept should be evaluated in a future ESRS revision, not in a simplification exercise.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Allianz SE	Insurance	Germany			I disagree	The DR of "quantitative short- and medium-term CapEx, and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges" goes beyond the old ESRS. It brings stricter requirments and the risk of requiring sensitive information. We therefore suggest to remove the new requirement as it contradicts the intended simplification. It should be reassessed in a future ESRS revision. (The relief on sensitive information will not help as even the fact that the undertaking reports that it has omitted sensitive information might be a problem.)	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Allianz SE	Insurance	Germany			I disagree	NEW AR: the wording of this AR indicates a net-perspective of reporting for scenario analysis and resilience analysis, as well as for anticipated financial effects.	E1	E1-2 - Climate-related risks and scenario analysis	AR 8
Excels	Allianz SE	Insurance	Germany			I disagree	"shall provide its climate resilience at the reporting date" (1) is not clear as to what it refers to, "process" or "outcome" (2) if "process" is meant, we fail to see the relevance of this information, (3) if outcome: It seems conceptually understandable, but such a purely reporting date-specific statement only makes sense for individual locations or individual products/services/markets. When considering location, product, and service portfolios, however, a date-specific assessment is not feasible. Furthermore, a historical analysis (which is what a reporting date analysis is) is questionable in the context of a strategically oriented disclosure such as E1-3. Practitioners in particular fear potential conflicts with auditors in this regard.	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	The requirement "the effects of current and planned investments in climate mitigation, adaptation and transition opportunities on climate resilience enhancement"), (1) requirement is not clear, (2) it seems as it is an addtl requirement that does not exist in the current DA	E1	E1-3 - Resilience in relation to climate change	AR 10

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Allianz SE	Insurance	Germany			I disagree	NEW DR: DR suggests a breakdown of "quantitative short- and medium-term CapEx and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges." --> This tightens the requirements compared to the DA.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	Allianz SE	Insurance	Germany			I disagree	Extended requirement compared to the old ESRS where the scope of this DR is limited to high climate impact sectors.	E1	E1-7 - Energy consumption and mix	29.
Excels	Allianz SE	Insurance	Germany			I disagree	To our understanding, the changes aim to align GHG emission accounting with the GHG protocol but still incorporate the layered approach from Set 1, i.e., financial and operational control, in a more complicated manner. This increases assessment complexity due to new standard interpretations, potential updates to current approaches aligned with auditors, and the requirement for more granular evidence. We rather suggest to a) Reverting to the initial disclosure requirements if EFRAG wishes to retain the layered approach or b) Adopting full optionality as proposed by many users, aligning wording closely with GHG protocol.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	Joint operations: Delete the reference to financial risk and rewards as this concept (1) has become obesolete in IFRS Accounting Standards, and (2) is not the basis for consolidation in every national GAAP. "on the basis of the share the undertaking has in these assets and liabilities in its financial statements"	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 20
Excels	Allianz SE	Insurance	Germany			I partially agree and partially disagree	Requirement on "location of key assets at material physical risks" results in unnecessarily detailed reporting, as depending on the sector, this could involve a large number of locations in all regions of the world. As an example, logistic sector undertakings have much more sites than heavy industry.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	detailed information regarding physical (no location analysis) and transitional risks (explanation of transition event) should be simplified and focus should be on overall information	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	EnBW Energie Baden-Württemberg AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	anticipated financial effects should be deleted	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	It still stands in the ESRS as if scenario analysis is required, even though the basis for conclusions says something else. Should be clarified.	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	E1 para 18-19 and basis for conclusions point 247: In the basis for conclusions, it is stated that the revised E1 paragraph should make it clear that scenario analysis is not mandatory. But as it reads in paragraph 19 "the key elements of the analysis include (...) the ranges of scenarios used (...) and how the undertaking has used climate-related scenario analysis." It reads as if it is mandatory. Please clarify.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	Ferring Pharmaceuticals	Preparer (non-financial preparing a sustainability report)	Switzerland			I partially agree and partially disagree	Paragraph 22 only mentions that anticipated financial effects must be addressed for risks and opportunitites. But the AR also refers to impacts. It is not clear whether the financial effects of impacts must also be addressed, since its part of the AR but not the datapoint 22.	E1	E1-4 - Policies related to climate change	AR 14
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "and indicate all identified material negative impacts and risks that remained unaddressed by actions during the reporting year"	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	At the end of the sentence the following should be added "against each action disclosed under DR G1-2".	E1	E1-6 - Targets related to climate change	25.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	To make reports comparable, biogenic emissions should be defined, either with a reference to an external source or in the glossary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	In the last version of ESRS E1, AR 37 and AR 38 required the presentation of energy intensity per revenue, while in ESRS E3 in E3-4 there was a disclosure related to water intensity (total water consumption in own operations in m^3 per million EUR net revenue). These requirements provided the possibility to compare data regardless of company growth, and reports significantly benefited in terms of comparability thanks to these indicators.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	13.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The simplifications are organizational in nature and still require a range of information that may be difficult for companies to understand and interpret (point 14a concerning compliance with global warming limits and reference target issues). These issues were clarified earlier in the draft IG4, but in the draft simplifications, the provisions remain vague. There is still no reference to transformation plans resulting, for example, from IED 2.0 or EU ETS.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Indicates the possibility of using sectoral indicators – without specifying what these indicators are or where they should be obtained from – leaves a lot of space for interpretation, and is not very precise.	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	It is not entirely clear whether a company must disclose its greenhouse gas emission reduction targets. In the current version of the ESRS, a company did not have to disclose them if it had not set any, but this is not so clearly stated in the draft simplifications.	E1	E1-6 - Targets related to climate change	26.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	When aggregating total energy consumption from fossil and atomic sources, does the company need to know its supplier's energy mix? This issue was already problematic in the current wording of the ESRS, and has not been clarified in the simplifications.	E1	E1-7 - Energy consumption and mix	28. (b)
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I agree	The transition from operational to financial boundaries is a reasonable simplification—until now, companies have had difficulty properly understanding operational boundaries. Will this change require companies to “recalculate” previously reported emissions that were calculated using operational boundaries?	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	The simplification regarding the exclusion of climate risks from separate disclosure is entirely appropriate, but the transfer of information on how risks are identified to the NMIG is inappropriate. The analysis should continue to include, among other things: identification of risks over different time horizons, assessment of the sensitivity and exposure of assets to risks, determination of the probability, scale, and duration of these risks, development of an analysis based on at least one high-emission climate scenario. It is necessary to have a list of risks, which is the starting point for further analysis. Consequence: • the lack of risk list will make it difficult to compare data between entities, • an entity may not have knowledge or awareness of the scale of these risks and thus omit significant risks in its analysis – incorrect risk assessment • lack of consistency with the taxonomy	E1	E1-2 - Climate-related risks and scenario analysis	16.
Excels	Polish Association of Listed Companies	Business association (other than association of financial institution)	Poland			I disagree	Point (e) on including biogenic emissions is contradictory to Paragraph 33, which clearly states that biogenic emissions should be disclosed separately. Clarification needed.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The DASB ask for clarification of the term "spatial resolution"	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	The DASB feels the wording could be clarer and suggest to refer to "in future periods" in the last part of the sentence	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	Dutch Accounting Standards Board	(National) standard setter	Netherlands			I partially agree and partially disagree	Reference is made to leases but to the DASB it is unclear how this requirement should be applied for lessees versus lessors.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- Objective 11 with 5 references to other EU Regulations increase complexity and uncertaintiy for preparer of sustainability statement. Please delete these references. - former 8. (a) - 12? Pg. 5. It needs to be clarified that undertakings may report in CO2e - former 10. (b) it needs to be clarified that undertakings may cross reference to other topicl standards, if neccessary . Combining all topics will highly increase workload and diverge from the material topics - ESRS E1-9: needs to be specified that reporting level needs to be on topic level	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	It needs to be clarified that this cannot be laid out in detail as technological development is highly dynamic and only projects that have been board approved, can be reported	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	E1-1- 14 and E1-5-24 should be combined in one DR instead of two DRs asking for the same actions.	E1	E1-5 - Actions and resources in relation to climate change	24.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	E1-1- 14 and E1-6-25 should be combined in one DR instead of two DRs asking for the same targets	E1	E1-6 - Targets related to climate change	26.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	For companies with huge assets such as power plants or combustion plants the baseyear for targets should not be changed and adapted in such short terms like 3 years, because changes for assets can take up to 10 years from planning, permit, construction to operations. It should be allowed to take a individual appropriate base year for the undertaking.	E1	E1-6 - Targets related to climate change	AR 13
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	AR 15 clarify if this means targets boundaries need to be set in line with the reporting boundary, which is more than impossible to achieve	E1	E1-6 - Targets related to climate change	AR 15
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	undertakings need to have the option to adjust their base value in order to keep the target ambition level but not compromise on growth	E1	E1-6 - Targets related to climate change	AR 25
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	undertakings need to be able to communicate past achievements	E1	E1-6 - Targets related to climate change	AR 25
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- Scope 3 emissions: Due to the complexity of the information required, to the investments needed in terms of human resources, information systems, third party databases and to the considerable amount of information required to be retrieved from business partners in the value chain (upstream and downstream as well), we suggest to adopt a phase-in approach for the disclosure of Scope 3 emissions. - Furthermore, it is highly recommended to allow the computation of Scope 3 emissions using emission factors that include/account for both biogenic emissions as well as biogenic uptake. Renowed third party, independent databases like ecoinvent can provide these emission factors for a timeframe of 100 years (GWP100), which are also aligned with the ISO 14067 and EN 15804 standards.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- For reference, SBTi's Chemical Sector Guidance Consultation Draft (https://files.sciencebasedtargets.org/production/files/SBTi-Chemicals-Sector-Guidance-Consultation-Draft.pdf) has included requirements for chemical companies to set an alternative feedstock target on shares of feedstocks from Carbon Capture and Utilization (CCU) including DAC, Bio-Based Feedstocks and Chemical Recycling. In the chemical industry, the Bio-Based Feedstock pathway makes sense only if CO2eq. biogenic emissions and uptakes are both considered and explicitly accepted/allowed for the computation of Scope 3 GHG emissions. The same reasoning applies for CO2eq. uptakes when using CCU-based feedstock.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Please see comment to ESRS E1 - 26. (c).	E1	E1-6 - Targets related to climate change	AR 16

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- While we understand the utility and meaningfulness of this requirement, operators within the European Union and outside the European Union are not able to provide the necessary breakdown of information yet and/or not able to provide the information in a timely manner (sometimes energy providers communicate the breakdown/disaggregation of energy sources with 9-12 months delay). '- We suggest to adopt a phase-in approach to allow energy providers to organize themselves accordingly.	E1	E1-7 - Energy consumption and mix	29.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Please see comment to ESRS E1 - 29.	E1	E1-7 - Energy consumption and mix	29. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Please see comment to ESRS E1 - 29.	E1	E1-7 - Energy consumption and mix	29. (b)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Please see comment to ESRS E1 - 29.	E1	E1-7 - Energy consumption and mix	29. (c)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Please see comment to ESRS E1 - 29.	E1	E1-7 - Energy consumption and mix	29. (d)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Please see comment to ESRS E1 - 29.	E1	E1-7 - Energy consumption and mix	29. (e)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I agree	Good clarification for energy mix: The undertaking shall only consider these energy consumptions as deriving from renewable sources if the origin of the purchased energy is clearly defined in the contractual arrangements with its suppliers (renewable power purchasing agreement, standardised green electricity tariff, market instruments like Guarantee of Origin from renewable sources in Europe	E1	E1-7 - Energy consumption and mix	AR 17
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- What is exactly meant by this? Is it related to the so called out-of-scope-emissions? - For clarity, it is suggested to reformulate this paragraph by adding "direct" before "biogenic CO2 emissions". Please see "A Corporate Accounting and Reporting Standard", Revides Edition, page 25 published by GHG Protocol initiive Team (https://ghgprotocol.org/sites/default/files/standards/ghg-protocol-revised.pdf).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- It is suggested to limit the the percentage of Scope 1 GHG emissions from regulated emission trading schemes only to EU regulated schemes.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (a)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- AR 21 (d): "any removals," should be deleted, please see comments to ESRS E1 26. (a) and ESRS E1 26. (c).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- AR 21 (e): please see comment to ESRS E1 - 33. For clarity, it is suggested to reformulate this paragraph by adding "direct" before "biogenic CO2 emissions". Please see "A Corporate Accounting and Reporting Standard", Revides Edition, page 25 published by GHG Protocol initiive Team (https://ghgprotocol.org/sites/default/files/standards/ghg-protocol-revised.pdf).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	- It is suggested to limit the calculation to installations subject to the EU-ETS for simplicity and comparability.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 23
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Remove the whole DR E1-11 Anticipated financial effects due to lack of methods and comparability between companies. There is no clear methodology to calculate anticipated financial effects, which makes the shared information being not aligned with the Qualitative characteristics of information in ESRS 1 - Appendix B) and it won't be comparable to other companies. Thus discolosing anticipated financial effects should be deleted.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	This requirement is not feasible at all (lack of methods and comparability). Either delete it or keep former E1 -70.: A quantification of the financial effects that arise from opportunities is not required if such a disclosure does not meet the qualitative characteristics of useful information included under ESRS 1 Appendix B Qualitaive characteristics of information.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	This requirement is not feasible at all (lack of methods and comparability). It also offers extensive room for discussions with auditors related to scope and basis for this information.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	German Chemical Industry Association	Business association (other than association of financial institution)	Germany			I disagree	Pt. 67 - anticipated financial effects are hypothetical to anticpate before measures have been taken and do not contain any valuable information	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	13.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The objective of the DR in paragraph 13 refers to "mitigation efforts", but following requirements in paragraph 14 refers only to "GHG emission reduction targets". While emission reduction targets are crucial for the stated objective, undertakings in some sectors (e.g. forestry) may have material climate impacts that should be addressed on other targets (e.g. on biogenic carbon sinks). Another example of a climate impact that is missed by focusing solely on GHG emission targets is the case of non-CO2 effects of aviation that are not typically included in straightforward emission reduction targets. Instead of "GHG emission reduction targets" it should say "targets to reduce climate impact".	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The compatibility of the undertaking's business model and climate measures and goals should also be examined in relation to the goals of the national climate policy objectives and not only in relation to the EU goals. In this way, transition plans should also take national special circumstances into account, such as the issue of forest carbon sinks in Finland. With such a requirement, the climate transition plan could also be better aligned with the biodiversity transition plan (where an assessment towards national policy is required).	E1	E1-1 - Transition plan for climate change mitigation	13.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The transition plan's requirement for assessing locked-in emissions should be clarified. When assessing the CSRD reporting of biggest Finnish companies we can see that companies also report (or in some cases only report) locked-in emissions outside the definition of the standard. For the sake of clarity, the transition plans should require the assessment of all locked-in emissions that have a material climate effect on the undertaking's overall emissions, e.g. the indirect emissions from sold products or emissions related to financed activities should be included as well where they are material.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The amended ESRS should retain the requirement of original ESRS E1 to set the emission reduction targets for certain predefined years, i.e. 2030 and every five years after that (as exemplified in the Figure 2 of the AR14). This is crucial to ensure that the climate targets and wider transition plans of the companies are comparable.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	In addition to GHG emissions, the standard and its DRs should include other factors that contribute to overall climate impacts such as impact on natural carbon sinks or other removals and on impacts that have a climate impact beyond reported emissions (e.g. non-CO2 effect from aviation). Also, this paragraph should explicitly state that both fossil and biogenic emissions must be taken into account.	E1	E1 - Objective	5.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	For clarity this paragraph should refer to the objective of the DR (paragraph 13) and the requirements (paragraph 14). This is needed in order to avoid a situation where undertaking reports an inadequate transition plan without transparent disclosure on its shortcomings. Reporting inadequate transition plans has been a common practice in Finland. Our preferred wording for paragraph 15 would be: "If the undertaking does not have a transition plan for climate change mitigation [ADD: that meets the requirements set in paragraphs 13 and 14] in place, it must state this explicitly and indicate whether it will adopt one and if so, when."	E1	E1-1 - Transition plan for climate change mitigation	15.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	In this paragraph companies should be required to disclose whether they regard their transition plan complete or inadequate regarding the objective (paragraph 13) and the requirements (paragraph 14) of the DR. In our study on Finnish companies we observed common practice of reporting inadequate transition plans without addressing their limitations: https://finnwatch.org/images/pdf/Climate-reporting-in-the-first-CSRD-reports-by-the-largest-Finnish-companies.pdf	E1	E1-1 - Transition plan for climate change mitigation	AR 1
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	Companies should be instructed to disclose both the past and future progress. We recommend changing "or" to "and" in this: "When explaining its progress in implementing the transition plan, the undertaking shall describe the deployment of resources, the actions taken and the GHG emission reductions achieved or expected to be achieved."	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The objective of this DR should be more clearly explained. Both the original E1-1 and the amended version are unclear on whether undertaking should report on any climate related transition plan it has, or only when it fulfills the objective (in paragraph 13) and the requirements (in paragraph 14). This could be further clarified with an additional AR stating that: "Undertakings should report only a transition plan that they consider to be in line with the objective and the requirements in paragraphs 13 and 14."	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The wording should be clarified: "...include the [ADD: absolute] achieved and expected GHG emission reduction [ADD: by the target year set in E1-6]"	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	If an undertaking has used reference target value or values, it should be instructed to disclose these values and their justification.	E1	E1-6 - Targets related to climate change	AR 16
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	For clarity, the requirement to report the total emissions should be kept in, when the undertaking has reported its material scope 1, 2 and 3 emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The phrasing on the objective of the DR is misleading as the requirements relate only to emissions. Many companies have material climate impacts beyond their direct and indirect emissions. For example, a company in the forestry sector has an impact on natural forest carbon sinks and an aviation company can have a significant non-CO2 impact on the atmosphere beyond its GHG emissions. Recommended wording for the objective: "to provide an understanding of the undertaking's direct and indirect [REMOVE: impacts on climate change, ADD: GHG emissions]". The climate impact related to non-emissions mechanisms should be required to be discussed as part of the transition plan in E1-1.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	We do not support the proposal to remove the obligation to disclose and explain excluded scope 3 categories as such disclosure provides transparency on how comprehensive the emissions reporting is (by describing what is ignored and why). Original wording that should be kept in the standard is: "...disclose a list of Scope 3 GHG emissions categories included in and excluded from the inventory with a justification for excluded Scope 3 categories;"	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	This requirement should include more specific information about the carbon credits. At minimum the requirement to disclose "share (percentage of volume) for each recognised quality standard" should be retained. However, to ensure the credible and transparent use of credits the requirement should go further and instruct to report separately the absolute tonnes from each project from which carbon credits have been purchased.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36. (a)
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The requirement should include explicit wordings of the claims that have been used and clear information on what emissions (and how many tonnes) have been offsetted for each claim.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	It is unclear what is required when undertakings are asked to "consider recognised quality standards". The requirement should be more clear and straigthforward, for example to "disclose all quality standards for purchased credits and number of credits from each".	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 29
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The requirement should include the share of emissions for which the internal pricing mechanism (or mechanisms) are being applied.	E1	E1-10 - Internal carbon pricing	38.
Excels	Finnwatch ry	NGO	Finland			I partially agree and partially disagree	The requirement should acknowledge that there may be multiple prices for different purposes. This should be taken into account in the wording as all prices should be disclosed.	E1	E1-10 - Internal carbon pricing	38. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	General comment: EFRAG should develop comprehensive non-mandatory implementation guidance for each topical standard, including ESRS E1. The guidance should comprise instructions and examples how to conduct the materiality assessment for the topic, how to apply the disclosure requirements, and to calculate the metrics. Sectoral examples could be added, where appropriate.	E1	E1 - Interaction with other ESRS	1.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Change title to "Policies related to climate change mitigation, adaptation and energy" to put more emphasis on the sub-topics of the standard. Change "climate policies" to "policies on climate change mitigation, adaptation and energy"	E1	E1-4 - Policies related to climate change	22.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Change title to "Actions and resources related to climate change mitigation, adaptation and energy" to put more emphasis on the sub-topics of the standard. Change "key climate change actions and resources" to "key actions and resources related to climate change mitigation, adaptation and energy"	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Change title to "Targets related to climate change mitigation, adaptation and energy" to put more emphasis on the sub-topics of the standard. Change "climate change targets" to "targets related to climate change mitigation, adaptation and energy"	E1	E1-6 - Targets related to climate change	25.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I agree	Transition plans are essential for report users in the financial sector, but also for public policy and civil society, to understand an undertaking's contribution to mitigate climate change. The requirement to report a transition plan, based on different essential and supporting elements (or "key features"), should consequently remain a central part of ESRS E1.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Given the political decision to discontinue EFRAG's work on ESRS sector standards, we recommend to include the possibility to disclose sector-specific transition metrics as part of the transition plan under para. 14.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The Commission should rapidly clarify what is expected from an undertaking, when reporting on the compatibility of its transition plan with the goal to limit global warming to 1.5°C.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Para. 18 only relates to exposure to hazards and transition events. Risk, however, is defined as the combination of exposure and sensitivity (see AR 5/AR 6 (a) and (b)). Hence, the introductory sentence of para. 18 needs to be amended to: "...how its assets and business activities in own operations and upstream and downstream value chain may be exposed and are sensitive:"	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Undertaking should not only "include the spatial resolution of the analysis" but use scenarios with the highest available resolution. Amend sentence to: "For paragraph 18 (a), the undertaking shall use scenarios with the highest available spatial resolution."	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	the key elements of methodology "how the undertaking has used scenario analyses" should include "which scenarios were used, their sources and alignment with state-of-the-art science" (reinstating former AR 13 (a))	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	AR 5 should be complemented by a note that "Using climate scenarios for the analysis is most useful for time horizons of more than 10 years. For shorter time horizons climate forecasts or trend analysis can be more proportionate."	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The requirement is lacking a clarification on the time horizons undertakings are expected to consider. We recommend to specify as follows: "The undertaking shall explain how it has defined short-, medium- and long-term time horizons for the identification of climate-related hazards and how these definitions are linked to the expected lifetime of its assets, strategic planning horizons and capital allocation plans"	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The requirement is lacking a clarification on the time horizons undertakings are expected to consider. We recommend to specify as follows: "The undertaking shall explain how it has defined short-, medium- and long-term time horizons for the identification of climate-related transition events and how these definitions are linked to the expected lifetime of its assets, strategic planning horizons and capital allocation plans"	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Confusing use of terminology. It should be clarified that here financial exposure is meant (not physical exposure to a hazard). Change to "The quantification of the financial exposure of assets and business activities..."	E1	E1-2 - Climate-related risks and scenario analysis	AR 7
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We note that this paragraph is not fully clear. 1) E1-2 does not specifiy of which types of scenario anaylsis are possible. E1-2 is the disclosure requirement covering provisions for scenario analysis. Therefore, the distinction between qualitative and quantitative analysis should be introduced already in E1-2. 2) independently from the scenario analysis being quantiative, semi-quantitative or qualitative, the underatking should consider the interplay between E1-2, E1-3 and E1-11. We suggest to EFRAG to revisit these provisions and better align the requirements.	E1	E1-3 - Resilience in relation to climate change	AR 8
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The link between the CapEx plans as part of the EU Taxonomy (former E1 para. 29 (c) and ESRS reporting on resources allocated to actions should be reinstated. Preferably, an AR to ESRS 2 GDR-A should specify: "If applicable, the undertaking shall relate its CapEx amounts to the , the CapEx plan required by Commission Delegated Regulation (EU) 2021/2178." Alternatively, that provision can be introduced only for E1 as AR for para. 24 (c).	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	We recommend to reinstate the requirement to update base year and target year in five year intervals starting from 2030 (former para. 34 (d)). This requirement is particularly useful from a user perspective because it will ease the comparison of GHG emission reduction targets.	E1	E1-6 - Targets related to climate change	AR 13
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	The reporting of GHG emissions under proposed amended ESRS E1-8 is based on the GHG Protocol Corporate Standard, Scope 2 Guidance and Scope 3 Standard. These standards do not explicitly define how to account for the non-CO2-climate effects of air traffic (especially NOx emissions and long-lived contrails), which are significant. However, it is common practice to account for these effects through the "radiative forcing index" (RFI). We recommend to EFRAG to include a provision in Application Requirement (AR) 21 that these effects shall be included in the GHG inventory and that RFI used is to be disclosed.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I agree	We welcome that proposed amended E1-8 retains the requirement for dual reporting of Scope 2 GHG emissions with the location-based and market-based approach, which is in line with the GHG Protocol, will assist comparability of GHG inventory data and avoid greenwashing.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	The concept of "net-zero targets" is deleted from [Draft] amended ESRS E1. Targets labelled as "net-zero" should, however, follow basic rules to ensure their credibility and avoid greenwashing. These targets must be separated and not confused from more common but less ambitious claims to achieve GHG neutrality based on carbon credits. Hence, we recommend to EFRAG to reinstate the possibility to report net-zero targets from current ESRS E1-7 (para. 60) along with the definition of the term.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	34.
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	[Draft] amended E1-9 para. 35 conflates removals from projects in own operations with those in the value chain and is not clear whether the amount is to be reported by project or as a sum of all projects. We recommend reporting the sum of removed GHG from projects in own operations and the value chain separately, leaving the option to provide project specific information, if deemed material.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (b)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	Practical implementation of E1-9 would be significantly eased with a publicly available list of standards and carbon crediting programs that can be considered as "recognized quality standards". Based on such a list, undertakings would have certainty which carbon credits are of high quality and can be reported according to ESRS E1. They would also not have to assess for themselves if the programs / standards, based on which their purchased carbon credits are generated and cancelled, fulfil the ESRS quality criteria. Therefore, we recommend that the European Commission issues a list of recognized quality standards for carbon credits and acts as a neutral instance to assess whether a carbon crediting program applying to be listed can be recognised based on defined quality criteria (additionality, permanence, avoidance of double counting, ..., see ESRS definition of "recognised quality standards for carbon credits"). For the purpose of ensuring credibility and environmental integrity, the quality criteria in the ESRS definition would need to be further specified by the Commission (e.g. what does permanence mean for certain reduction and removal projects?). For that, the Commission can rely on existing work, e.g. on ICAOs CORSIA.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37. (b)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I disagree	The proposed amendment of ESRS E1-10 on internal carbon pricing schemes suggests that an undertaking shall report "the price per metric tonne of GHG emissions" (para. 38 (b)). Often companies apply different internal carbon prices for different purposes. Hence, it is unclear which price is to be reported. EFRAG should specify that transparency is expected for the average carbon price in each pricing scheme the undertaking applies.	E1	E1-10 - Internal carbon pricing	38. (b)
Excels	German Federal Agency for Nature Conservation (BfN)	Public authority	Germany			I partially agree and partially disagree	WE note that the text of NMIG 12 for para. 41(d) need to be amended in accordance with E1-8 (delete total GHG emissions)	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Disclosures on anticipated financial effects should be voluntary, at least for the first 5 years after the adoption of amended ESRS. This conviction is supported by evidence provided in the first round of ESRS simplification consultation. Firstly, lack of common methodologies by design hinders comparability and makes this disclosure mundane for the end user, while imposing significant burden on issuers, who have to produce such methodologies, validate them etc. – which is especially valid for wave 1 issuers and groups that need to consolidate data from various markets. There are no sectoral pathways at the EU level that issuers could refer to, and available toolkits relate almost exclusively to the operational aspect of transition planning and climate-related transformation, and not financial valuations. Not all industries are equally exposed to and equally dependent on this transformation. Anticipated financial data eg. on energy sourcing transformation and energy costs are considered sensitive information in many cases. Furthermore, significant anticipated financial events are already included in financial statements.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Due to complexity of supply chains and immaturity of value chain climate change related risk assesment there should be a transition period provided for AR5(b).	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	As explained above, due to the complexity and lack of established methodology, we believe that disclosures on anticipated financial effects should be voluntary.	E1	E1-2 - Climate-related risks and scenario analysis	AR 7
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	For clarity and readability, it should be possible to include this section in ESRS 2 SBM 1.	E1	E1-3 - Resilience in relation to climate change	20.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	As explained above, due to the complexity and lack of established methodology, we believe that disclosures on anticipated financial effects should be voluntary.	E1	E1-3 - Resilience in relation to climate change	AR 8
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	For clarity and readability, it should be possible to include this section in ESRS E1 - 1.	E1	E1-5 - Actions and resources in relation to climate change	24.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	Reporting companies should not be limited in selecting their base year. The n-3 rule for base year is not compliant with well established GHG reduction target methodologies, incl. SBTi.	E1	E1-6 - Targets related to climate change	AR 13
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I partially agree and partially disagree	For clarity and readability, it should be possible to include this section in ESRS E1 - 1.	E1	E1-6 - Targets related to climate change	AR 14
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Financial consolidation in the context of statements is not equal to financial control in the context of emissions accounting. Operational control approach is a key concept of the GHG Protocol, and used by many companies. The Protocol clearly states that operational control is the desired criterium, as it allows for most accurate emissions accounting. The shift to financial control is a major change in the approach towards GHG accounting, and as such will require significant additional effort, while not brining any added value to the user. Hence, to ensure interoperability with the dominant GHG accounting standard - GHG Protocol - operational control should remain as the required method, with possible relief including financial control as an option for companies that are not able to use operational control criterium.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Financial consolidation in the context of statements is not equal to financial control in the context of emissions accounting. Not all industries are equally exposed to and equally dependent on this transformation. Anticipated financial data eg. on energy sourcing transformation and energy costs are considered sensitive information in many cases. Furthermore, significant anticipated financial events are already included in financial statements.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Location of key assets (40b) in many cases is an extremely sensitive information, often times additionally regulated by national laws. Disclosing such information, combined with shares of revenue dependent on those assets, does not bring any added value to the end user of the statement, while putting at risk the commercial position and continuity of operations of issuers.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Paragraphs 40 and 41 maintain very granular DRs related i.a. to building energy efficiency, not taking into account that in some industries this information may be not material due to their business model.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Paragraphs 40 and 41 maintain very granular DRs related i.a. to building energy efficiency, not taking into account that in some industries this information may be not material due to their business model.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Requiring de facto information on financial valuation of climate-related opportunities, does not bring added value due to lack of common methodology and as a result, lack of comparability.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	The Polish Chamber of Information Technology and Telecommunications	Business association (other than association of financial institution)	Poland			I disagree	Our understanding is that this data point is mandatory for all undertakings and not only for those belonging to high-climate impact sectors. If our understanding is correct, we disagree on that point (this data point should be limited to high-climate impact sectors). We are publshing scope 2 emissions in market based and location based mode and shouldn't have to identify the part of fossil originated emissions in the national grid.	E1	E1-7 - Energy consumption and mix	29.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	New paragraph 16(a) requires disclosure of material pollutants to air, water and soil. As drafted, AR2 could be interpreted during assurance as obliging companies to collect and report data for every pollutant in Annex II of Regulation (EU) 2024/1244 as well as all pollutants monitored under permits, simply to demonstrate materiality. This would represent a disproportionate new requirement and create a significant additional burden. We recommend clarifying in AR3 that Annex II and permit pollutants are reference points for consideration in a company's materiality assessment, but that a comprehensive materiality assessment, based on the specificity of business processes and operations, is sufficient to identify relevant pollutants without collecting data for all listed items.	E2	E2-4 - Pollution of air, water and soil	AR 2
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	AR3 allows for the use of thresholds that apply exclusively to the E-PRTR pollutant list. However, there is a potential risk that auditors may request reporting of pollutants from permitting without applying any thresholds as it is not mentioned. It should be clarified that thresholds may also be applicable to pollutants from permitting. Our suggestion is to clarify in AR3 that a comprehensive materiality assessment—based on the specificity of business processes and operations—can determine which pollutants are relevant for disclosure.	E2	E2-4 - Pollution of air, water and soil	AR 3
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Manufacturing and use of microplastics should not be included in this DR in their current form, as this disclosure duplicates obligations already established in Set 1 of ESRS and under Regulation (EU) 2023/2055 (REACH), as well as industry frameworks such as Operation Clean Sweep (OCS). Production is not a pollutant per se and should instead be addressed, if relevant, as a key product in E5-5 Resource outflows. Primary microplastic production and use may also be sensitive and confidential. For example, in the proposal for the Regulation on preventing plastic pellet losses it was explicitly noted that "confidential business information is safeguarded." Regulation (EU) 2023/2055 already requires mandatory reporting on the quantity of synthetic polymer microparticles released into the environment and introduces a ban on intentionally added microplastics in final products, recognising that manufacturing data is not the relevant focus.	E2	E2-4 - Pollution of air, water and soil	15.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Manufacturing and use of microplastic should not be included in this DR as the production of microplastics is not a pollutant per se and, as such, it should be treated (in case) as a key product in E5-5 Resource outflows. Primary microplastic production and use could be sensitive and confidential. "release" Should be added also in the text of AR 1 Para. 16	E2	E2-4 - Pollution of air, water and soil	16. (b)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	This comment refers to ESRS E2-16 (c). Disclosure of quantities of manufactured or used microplastics could be considered sensitive for some companies (e.g. those operating in the chemical sector), as such data may represent core production activities. Furthermore, it is unclear whether this refers to an intentional release or an accidental one. Additionally, it should be specified whether, in the case of an accidental release, the actual quantity released or only the quantity remaining after remediation activities should be considered. These concerns mirror those already raised in ESRS E2-15, and are compounded by the overlap with existing legislation (Regulation 2023/2055 under REACH and OCS), which risks duplication and inconsistent reporting obligations.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Removed.	E2	E2-4 - Pollution of air, water and soil	16.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I agree	Support the revision of pollutant emissions reporting to focus on material pollutants, and amend the reference to Annex II of Regulation (EU) 2024/1244 (Industrial Emissions Portal Regulation) from a mandatory list to a reference for consideration in determining material pollutants (AR 2 and 3). This adjustment simplifies the reporting process, enhances flexibility, and improves applicability for entities operating outside the EU.	E2	E2-4 - Pollution of air, water and soil	16. (a)
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure Requirement E2-4 on primary microplastic can include the quantity of plastic pellet and/or additional microplastic released that it considers material. The calculation methodology on plastic pellet release should be consistent with the one used for regulation 2023/2055. Data on primary microplastic release could be provided as percentage respect produced or used microplastics	E2	E2-4 - Pollution of air, water and soil	AR 1
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	Support the removal of point (iii) from the definition of "Substances of Concern" in Annex II. However, it introduces a new definition of Substances of Concern that is not aligned with existing frameworks, creates confusion and contradicts the ESRS review's objective of simplification. EFRAG's proposal does not consider sustainability-related aspects and focuses on hazard properties only, an area where REACH should remain the primary legislative framework The broad scope of point (ii) would make information gathering highly challenging, creating additional administrative burden – especially for non-European operated sites SVHCs ((i)) are well-defined hazard categories, with existing processes for substances that pose significant, scientifically recognized risks to human health or the environment. Referencing SVHCs ensures clarity, consistency, regulatory alignment, and practical usability for businesses operating within or exporting to the EU. This approach promotes risk awareness, encourages substitution, maintains regulatory control, and protects environmental health. The SVHC Candidate List is regularly updated by ECHA, ensuring the definition remains relevant and reflects the latest scientific and regulatory developments. It is therefore recommended to remove the definition of SoC from the list of definitions and to limit the disclosure obligations under E2-5 (items 17, 18, 19, and 20) to SVHCs as defined under REACH.	E2	E2-5 - Substances of concern and substances of very high concern	17.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended that the disclosure requirement E2-5 (18, 19) is streamlined to focus on SVHCs only. The list of SoC is too fluid for reporting purposes. Next to that the concept of SoC is EU focused and complex to apply outside EU. The broad scope of SoC would make information gathering highly challenging, creating additional administrative burden – especially for non-European operated sites SVHCs are already well-defined hazard categories, with existing processes for substances that pose significant, scientifically recognized risks to human health or the environment. Referencing SVHCs ensures clarity, consistency, regulatory alignment, and practical usability for businesses operating within or exporting to the EU. This approach promotes risk awareness, encourages substitution, maintains regulatory control, and protects environmental health. The SVHC Candidate List is regularly updated by ECHA, ensuring the definition remains relevant and reflects the latest scientific and regulatory developments	E2	E2-5 - Substances of concern and substances of very high concern	18.
Excels	IOGP Europe	Business association (other than association of financial institution)	Belgium			I disagree	We still believe that SOC (in particular) and SVHC are very difficult to disclose and, as such, to verify the request. The DR should focus on which SOC/SVHC is manufactured rather than the quantity. The widespread inability of Wave 1 companies to report on Substances of Concern provides clear evidence that this disclosure requirement is practically unworkable in its current form. This challenge stems directly from the lack of a harmonised definition and the immense scope, which requires companies to assess thousands of substances whose "concern" status is highly dependent on specific product use and context. Without clear and consistent criteria, any reported data would be based on individual company interpretations, making it inherently non-comparable across the market. Mandating this disclosure would therefore force the generation of low-quality, potentially misleading information, which undermines the CSRD's core objective of providing reliable data. Furthermore, these data would be collected only for the European market, as outside Europe there are different definitions of SOC/SVHC. A full consolidation of these data worldwide would not be possible. To reduce administrative burden and ensure comparability, the disclosure requirement should be streamlined to focus on SVHCs only, where established processes already exist.	E2	E2-5 - Substances of concern and substances of very high concern	20.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	E1	E1-5 - Actions and resources in relation to climate change	5.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We flagged this DR as excessively burdensome. In line with our input, we would recommend OPTION 2, since it better addresses our concerns on the sensitivity of the information disclosed and on the excessive burden in calculating quantitative disclosures.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	11.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We support the changes proposed.	E1	E1-10 - Internal carbon pricing	10.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	This paragraph excludes the possibility to use carbon credits as possible offsets during the trajectory of a company, even if a net-zero target has been adopted. This risks limiting EU companies' investments in projects generating carbon credits at lower costs before 2050, while putting them at competitive disadvantage compared to companies from competing regions of the world. The restriction to use credits only for residual emissions in the case of companies having adopted a net zero target should be reassessed.	E1	E1-6 - Targets related to climate change	AR 11
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I agree	We agree with the changes proposed.	E1	E1-7 - Energy consumption and mix	7.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The Commission has not yet clarified the meaning of "compatibility of the strategy and business model with the goal of limiting global warming to 1.5°C in line with the Paris Agreement", therefore reporting on this can be challenging.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I disagree	Companies consider, in the case where disclosing an absolute emissions target would provide to competitors key sensitive information (i.e.: production forecasts) which are very sensitive, that they should be entitled to publish only a target expressed in intensity. In this regard, a clarification that the "relief" mentioned in ESRS 1 §98 is effectively applicable for section E1-6 appears essential.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Need clarification on some points: If a company has no transition plan (paragraph 15) is the "shall" removed from the DRs stated in 14a, b, c (i.e. does a company not have to disclose paragraph 14a, b, c)?	E1	E1-1 - Transition plan for climate change mitigation	15.
Excels	Cefic	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The text under AR 2 in ESRS E1 is not clear on what still should be disclosed: While this information helps demonstrate the coherence and credibility of the transition plan, there is no expectation that the undertaking disclose all internal information used to manage the plan.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The reporting requirement makes the implementation of a climate risk analysis indirectly binding, additionally to the DMA. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no climate risk analysis has been carried out should be introduced (analogous to ESRS E1-1 DR 15). In the document "Basis for Conclusion" there is the following note: "it should be clear under E1-2, Climate related risks and scenario analysis that there is an expectation that undertakings report on key elements of the methodology to assess climate risks, but that scenario analysis is not required for all undertakings."It is not clear from the text of ESRS 1-2 which companies do not have to perform a scenario analysis.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The reporting requirement makes the implementation of a resilience analysis indirectly binding. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no resilience analysis has been carried out should be introduced (analogous to ESRS E1-1 DR 15)	E1	E1-3 - Resilience in relation to climate change	21.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	The reporting requirement makes the implementation of GHG emission reduction targets indirectly binding. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. The option of reporting that no GHG emission reduction targets has been set should be introduced (analogous to ESRS E1-1 DR 15). Information on targets under E1-6 should be more closely linked to the transition plan in E1-1	E1	E1-6 - Targets related to climate change	26.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	This information is supplementary to the climate risk analysis and should therefore be combined with ESRS E1-2 where possible. The climate risk analysis including the quantifications in this section represent a new obligation for companies. This should be avoided, as the CSRD does not usually define implementation obligations but reporting obligations. It should also be made possible to only report qualitatively on the climate risk analysis. While also a requirement of the IFRS Sustainability Disclosure Standards, the lack of clear and harmonized guidance on calculating anticiapted financial effects linked to individual climate-related risks and opportunities leads to inconsistent and unreliable information. The complexity and lack of integration between sustainability and financial systems make such quantification impractical. Additionally, by going beyond the requirements of the ISSB, the disclosure requirement can also reveal sensitive strategic information, leading to competitive disadvantages for European companies. We therefore advocate for removing all requirements related to anticipated financial effects.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	AR 18/19 should be merged, allowing for both financial control (consolidation) and/or operational control (consolidation) boundary, as defined in the GHG Protocol	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	'shall' to be changed to 'may' as a disaggregation of GHG emissions (by country, operating segments, economic activity, subsidiary, GHG or source type) might not be available	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	DR seems to be an extension of the Delegated Act (DA). The description of "financial and investment planning" (Exposure Draft, ED) goes beyond "Investments and funding" (DA) as the latter is a subset/part of the former (also confirmed by the wording "investment and financial planning" in AR 2(c).	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	related to AR 2 (c): DR seems an extension of the DA. Disclosure of "quantitative short- and medium-terms CapEx, and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges". The DP should be deleted. The disclosure of "financial and investment planing (including the short- and medium- term financial and investment plan)" and "financial resources supporting the implementation and strategic ambition of its transition plan for climate change mitigation, including quantitative short- and medium-term CapEx, and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges" go beyond the initial requirements and the changes therefore go against the aim of simplifying the ESRS. Additionally, it is unclear how the short-/medium-term and long-term time horizons are defined considering also the respective GHG targets defined by the companies. Does long-term refer to 2050? Disclosing any investment figures until 2050 is not feasible and the information would not be reliable. Requirements related to Transition Plans should be closely aligned with existing international frameworks.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	related to AR 2 (c): EFRAG should consider the Transition Plan Taskforce (TPT) Disclosure Framework which 1) contains the elements "investment and disposal plan" and "planned sources to fund the plan" and 2) sets conditions on the disclosures: a) to the extent the financial effects of its transition plan are separately identifiable, b) information available to the entity at the reporting date without undue cost and effort, c) approach that is commensurate with the skills, capabilities, and resources that are available to the entity for preparing those disclosures; NMIG might contain as a "may" guidance in line with the TPT Disclosure framework	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	related to AR 5 (c), AR 6 (c): The requirement "base ist analysis on at least one high-emission climate scenario" is not appropriate. E1 should refer to "a scenario based on scientific evidence which reflects the climate risk properly". The current formulation of the AR indicate behavior obligations in how to conduct the scenario analysis going against ESRS 2 (ED) para. 5. Particularly the mandatory use of geospatial data and detailed methodological requirements related to supply chain lead to unnecessary complexity in the overall requirements. Reformulation needed (previously "This description shall include its process in relation to [...]").	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	We doubt that this AR is needed; Probably a clarification in the main body might be sufficient that only a qualitative assessment of the exposure is required. Additionally the wording regarding the anticipated financial effects has to be aligned; If Option 2 in ESRS 2 is adopted, a quantification will not be required.	E1	E1-2 - Climate-related risks and scenario analysis	AR 7
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The wording "shall provide its climate resilience at the reporting date" creates confusion: 1) it is not clear as to what it refers to, "process" or "outcome"; 2) if "process" is meant: we don't see the relevance of this information; 3) if "outcome" is meant: it seems conceptually understandable, but such purely reporting date-specific statement only makes sense for individual locations or individual products/services/markets. When considering location, product and service portfolios a date-specific assessment is not feasible. Furthermore, a historical analysis (which is what a reporting date analysis is) is questionable in the context of a strategically oriented disclosure such as E1-3. This will result in extensive discussions between preparers and auditors.	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	related to AR 10 (c): Regarding the wording "the effects of current and planned investments in climate mitigation, adaptation and transition opportunities on climate resilience enhancement": 1) the requirement is not clear; 2) it seems as it is an extension of the requirements in the Delegated Act and should therefore be deleted	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The standard should make clear that 1) Breakdown of CapEx/OpEx per time buckets/horizons is NOT required, and 2) Breakdown of CapEx/OpEx per decarbonisation lever is NOT required.	E1	E1-5 - Actions and resources in relation to climate change	24.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	This requirements seems an extension of the existing requirements of the Delegated Act: The DR suggests a breakdown of "quantitative short- and medium-term CapEx and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges." This should be deleted. See also our comments on AR 2 (c).	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	related to AR 13 (a): The term "key change" is not defined; The standard should make clear 1) that "key change" means "significant" and 2) that this assessment of significance is up to the undertaking. E.g., "the undertaking may decide on changes in the reporting boundary, e.g., becaus of M&A, or changes in the target. If the undertaking concludes that these changes are significant they should be reflected in the basline value or base year."	E1	E1-6 - Targets related to climate change	AR 13

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	1) The DR should make clear that the undertaking is NOT required to choose one of both alternatives mentiond in this paragraph to present its GHG reduction targets. In practice further ways and less granular presentation were applied for the 2024 reporting, 2) Examples should rather be addressed as "may" guidance in the NMIG.	E1	E1-6 - Targets related to climate change	AR 14
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The breakdown of GHG targets in Scope 1, 2, 3 should not be required as targets are typically not set in this way. E1 should require presentation of targets as the undertaking's management has set these (management approach).	E1	E1-6 - Targets related to climate change	26.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	This DR seems to include and extension of the DA where the scope of this DR is limited to high climate impact sectors. This DP should either be deleted or limited in scope as in the DA.	E1	E1-7 - Energy consumption and mix	29.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	In practice there are extensive discussions with auditors about whether a disclosure in millions is possible here. Therefore it should be clarified (perhaps at a central location in ESRS 1) that "millions" is allowed too. Ideally the untertaking should be free to choose for each metric the units that are most meaningful.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The exclusion of biogenic emissions should - if ever - refer to Scope 1 only (like in the DA), but not to "all scopes". Moreover, the relevance of this requirement is questionable.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	related to AR 21 (a): The undertaking shall consider the GHG Protocol (GHGP) when preparing the information on GHG emissions. However, it remains unclear how to consider optional Scope 3 sub-categories or exemptions provided in the GHGP. As an example, GHGP allows not to report scope 3.10 emissions if the company is unable to estimate the emissions as the processing of the products is unknown. The ESRS should allow such exemptions too - in accordance with the GHGP.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	"The assumptions regarding permance" seems an extension of the DA. As there is no evidence on the relevance of this information it should be deleted.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I partially agree and partially disagree	Requirement on "location of key assets at material physical risks" results in unnecessarily detailed reporting, as depending on the sector, this could involve a large number of locations in all regions of the world; e.g., logistic companies have much more sites than industrial companies.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Is unclear, if you need scope 1, 2 and 3 ghg reduction targets that are aligned with Paris 2015 Agreement (science based CO2 reduction path). Please provide clarification!	E1	E1-4 - Policies related to climate change	34.
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	Information on the potential locked-in emsission provides limited material insights on a company's decarbonization pathway with information difficult to obtain. We suggest to remove this requirement.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	ZVEI e.V.	Business association (other than association of financial institution)	Germany			I disagree	The current formulation of the AR indicate behavior obligations in how to conduct the scenario analysis going against ESRS 2 (ED) para. 5. Reformulation needed (previously "This description shall include its process in relation to [...]").	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	We believe that companies that can demonstrate net positive impacts for the society (e.g., contribute to the green transition), should be allowed to set short- and medium-term intensity targets. Another solution would be to allow for Scope 4 reporting, which will be deducted from the total GHG emissions inventory.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	There is no definition of "science-based target" in E1, nor in the glossary. If undertakings are not using the SBTi framework, it would be useful to know what constitutes a science-based target.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	Consider allowing undertakings to report transition risk on an aggregated level (e.g., group level).	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	Consider deleting this disclosure requirement.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	c) It would be useful with a clarification that undertakings can present the financial information on an aggregated level.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	It is unclear whether an undertaking can set an intensity target only, or if it must set an absolute target and may, in addition, set an intensity target. Undertakings should be allowed to only set intensity targets.	E1	E1-6 - Targets related to climate change	AR 12
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I disagree	j) Delete or amend. The conservative market-based approach does not provide a realistic picture of renewable vs. fossil sources.	E1	E1-7 - Energy consumption and mix	AR 17
Excels	Statkraft AS	Preparer (non-financial preparing a sustainability report)	Norway			I partially agree and partially disagree	It is unclear whether the EU ETS methodology requires companies to report CO2 or CO2 equivalents. Companies are required to report CO2 equivalents under the CSRD, thus it is important that the methodology of the EU ETS is consitent with this.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 22
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I disagree	The removal of the definition for net zero seriously reduces transparency and comparability among these targets and negatively affects the financial players using these reports, since their targets to reduce portfolio emissions intensity is skewed by unclear target reduction paths (some net zero targets rely heavily on neutralisation or even compensation)	E1	E1-6 - Targets related to climate change	26. (c)
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	It should be assessed, whether an alignment with 1.5°C is the only way of benchmarking/reporting a climate target or if e.g. Well-below 2°C can also be a viable option, given that 1.5°C increasingly gets out of reach, and WB2° is the minimum target of the Paris agreement.	E1	E1-6 - Targets related to climate change	4.
Excels	SAIM GmbH	Consultant (including software vendor)	Germany			I partially agree and partially disagree	Generally, leaving less room for uncertainty by defining the control appraoch is sensible. However, obliging companies to use financial control over operational control can lead to a change in boundary as well as questions particularly around leased assets. Moreover, this could mean that companies have to adjust their baselines to guarantee comparabaility in the future. Reporting numbers under both financial and operational control at the same time, might lead to confusion among external stakeholders and increases the need fo explanation, in case of significant deviations.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	40.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	SBTi	Standard setting initiative	United Kingdom			I disagree	The revised provision appears to allow combined Scope 1, 2, and 3 targets without specifying minimum Scope 3 coverage. SBTi recommends requiring separate Scope 1, 2, and 3 targets, with Scope 3 targets mandatory for Category A companies as defined in CNZS V2. In its 2025 Financial Institutions Net Zero Standard, SBTi introduced portfolio alignment as an alternative leading metric for target-setting. Emissions inventories are required on an ex post basis. It may be useful for ESRS to introduce a 3rd category to accommodate alignment and other non-emissions target setting metrics.	E1	E1-6 - Targets related to climate change	26.
Excels	SBTi	Standard setting initiative	United Kingdom			I partially agree and partially disagree	The revised provision allows intensity-only targets, provided absolute values for target years are disclosed (even if absolute emissions grow). SBTi, as part of its ongoing development of the corporate net-zero standard v2, requires companies to establish S1+2 emissions emissions targets in absolute or physical emissions intensity terms. Economic emissions intensity are not permitted due to the volatility of the underlying economic denominator. For scope 3 value chain targets, SBTi proposes to establish non-emissions based "alignment" targets which are used to demonstrate an increasing share of procurement spend and revenue generation from net-zero aligned value chain activities. Companies may additionally set absolute emissions targets on upstream and downstream scope 3 emissions. Setting physical or economic intensity targets for scope 3 is not favoured due to lack of a common physical metric to represent all scope 3 activities, and due to the volatility of economic metrics.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	SBTi	Standard setting initiative	United Kingdom			I partially agree and partially disagree	We suggest that the disclosure of a statement on whether the GHG emission reduction targets are science-based and compatible with limiting global warming to 1.5°C.should also include validation date, status (near-term, net-zero) and when requesting for the specific methodology (e.g., SDA, absolute contraction) the provision should reference to the SBTi sectoral decarbonisation approaches in the following way: "The undertaking shall state which framework and methodology underpin the targets, including whether they are based on a sectoral decarbonisation pathway such as those developed by the Science based targets Initiative and regularly updated on the SBTi website, and the underlying climate and policy scenarios." We encourage to include SBTI reference because without reference to a recognised framework, companies may report targets that are framed differently and not comparable. Referencing SBTi approaches ensures users (investors, policymakers, regulators) can benchmark across companies.	E1	E1-6 - Targets related to climate change	26. (b)
Excels	SBTi	Standard setting initiative	United Kingdom			I partially agree and partially disagree	The following requirement has been removed: 'The undertaking shall state the method used to calculate Scope 2 GHG emissions included in the target (i.e., either the location-based or market-based method)' (former E1-4 AR 24).The revised provision should require companies to state the method used to calculate Scope 2 GHG emissions included in the target (i.e., either the location-based or market-based method) for improved clarity and transparency and interoperability with SBTi	E1	E1-6 - Targets related to climate change	24. (a)
Excels	SBTi	Standard setting initiative	United Kingdom			I disagree	This revised provision doesn't provide any detail on sequencing of removals and doesn't address residual emissions. The AR should reinforce that removals should only be used only after achieving reductions in line with 1.5°C pathway.	E1	E1-6 - Targets related to climate change	AR 11
Excels	SBTi	Standard setting initiative	United Kingdom			I disagree	The revised provision seems to indicate that Scope 3 targets are optional. Under CNZS V2, however, this depends on whether a company is categorized as Category A or Category B. We suggest requiring that, if an undertaking has Scope 3 GHG emission reduction targets, it shall calculate a 1.5°C-aligned reference target value for Scope 3.	E1	E1-6 - Targets related to climate change	AR 16
Excels	SBTi	Standard setting initiative	United Kingdom			I disagree	On amendment of paragraph 61 (GHG neutrality claims using carbon credits): SBTi supports the clarification and streamlining of the text.However, we recommend including clear definitions of "GHG neutrality claims" and "carbon credits," aligned with recognised frameworks (e.g., ISO, ICVCM, SBTi). This helps avoid greenwashing and misinterpretation.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	34.
Excels	SBTi	Standard setting initiative	United Kingdom			I disagree	On deletion of sub-point (a) (linking neutrality claims to reduction targets):we acknowledge the intention to reduce redundancy with E1-4 but we are concerned that removal risks allowing neutrality claims must be additional to, not a substitute for real reductions.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	34.
Excels	SBTi	Standard setting initiative	United Kingdom			I disagree	SBTi suggests to clarify that this requirement applies only to direct or indirect removals, i.e. those generated from sinks owned or controlled by the undertaking or occurring within its value chain. For avoidance of doubt, SBTi further suggests to specify that removals reported through recognised carbon removal registries already represent net removals (life-cycle emissions accounted for) and therefore this requirement should not apply to removals represented by carbon removal credits purchased from such registries.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 28
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Companies also remind that the European Commission committed to define by end of 2025 the meaning of "compatibility between companies'target and 1.5°C targets". Until such a definition is published, no obligations are legitimate on this issue. They stress that the Paris Agreement also refers to "well below 2°C objective" which should be reinserted in the amended CSRD.	E1	E1-1 - Transition plan for climate change mitigation	1.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	In §14c), a new requirement has been inserted : "dependencies on which the transition plan relies". This additional "shall" requirement goes too far; furthermore, it is inconsistent with AR21. This new reference needs to be suppressed.	E1	E1-1 - Transition plan for climate change mitigation	1.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	§19 includes a new "shall" requirement:" for paragraph 18(b) it shall include the type of transition event analysed. In conducting its climate -related physical risk analysis supported by scenario analysis, the undertaking shall". Tha table in AR12 of set was presented as an example, not as a requirement. Those new obligations should be suppressed.	E1	E1-2 - Climate-related risks and scenario analysis	2.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	AR5 for §18 includes new requirement on the way the climate-related physical risks should conducted. The same with AR6 on §19 for climate-related transition risks. This goes too far in details considering methodologies are not yet mature. Those requirements should be suppressed.	E1	E1-2 - Climate-related risks and scenario analysis	2.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	The notion of resilience used in this section is very much unclear (see glossary); if the concept refers to adaptation, then it should be replaced by climate adaptation (without any reference to transition). In addition, in §21, new requirements b) and dc) have been inserted which appear excessive. They should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	AR 8 to §20 added a requirement: "shall consider the implications of the combined assessments performed according to DRs E1-2". This new obligation is excessive and should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	AR10 to §21c) introduced a new c):" The effect of current and planned investments in climate mitigation, adaptation and transition opportunities on climate resilience enhancement". This requirement is excessive in regard to the uncertainties faced by undertakings. It should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	§24 a) adds a "shall" disclosure by requesting climate change mitigation actions by decarbonisation lever; this goes too far for operators. This decomposition should be suppressed.	E1	E1-5 - Actions and resources in relation to climate change	5.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	In regard to §26 c) companies remind that the European Commission committed to define by end of 2025 the meaning of "compatibility between companies'target and 1.5°C targets". Until such a definition is published, no obligations are legitimate on this issue.	E1	E1-6 - Targets related to climate change	6.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	Companies consider, in the case where disclosing an absolute emissions target would provide to competitors key sensitive information (i.e.: production forecasts) which are very sensitive, that they should be entitled to publish only a target expressed in intensity,. In this regard, a clarification that the "relief" mentioned in ESRS 1 §98 is effectively applicable for section E1-6 appears essential.	E1	E1-6 - Targets related to climate change	6.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	§24 c) adds a "shall" disclosure to indicate different CapEx and OpEx for 3 horizons: short term, medium term and long term; this is too prescriptive, gives rise to uncertainty and may be considered as misleading for the markets. Therefore, global information can be provided but only for significant amounts of CapEx/OpEx and without obligations of time horizon.	E1	E1-5 - Actions and resources in relation to climate change	5.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	AR13 to §26 introduced a new obligation in b): " The undertaking is to select a recent base year that does not precede the first reporting year of the new target by longer than three years". Companies question the need for such a new requirement.	E1	E1-6 - Targets related to climate change	6.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	In §29, a new obligation was inserted compared to "set1" to require the undertaking "to further disaggregate its total energy consumption from fossil" by categories. This goes too far in details and is not compatible with the simplification objective of ESRSs. Therefore, this new requirement should be suppressed.	E1	E1-7 - Energy consumption and mix	7.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	4 data points have turned to "shall" in §34; this goes too far and subparagraphs a) to d) should be transferred to NMIG.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	9.
Excels	MEDEF	Business association (other than association of financial institution)	France			I disagree	In §38, a new requirement has been inserted about: "the consistency of the prices used with the prices used in the financial statement for impairment tests". This goes too far in details and should be suppressed.	E1	E1-10 - Internal carbon pricing	10.
Excels	MEDEF	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Option 2 must apply to §40, §41 and §42.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	BDO Poland	Auditor	Poland			I disagree	The Exposure Draft requires companies to explain how their transition plan is "compatible with limiting global warming to 1.5°C." However, the absence of a clear methodology for assessing compatibility may result in inconsistent interpretation across companies. While a qualitative assessment of locked-in emissions is valuable, it will be challenging for many companies to conduct without sector-specific guidance. To enhance comparability and auditability, the Standard should require reference to a recognised set of pathways (e.g., sectoral 1.5°C pathways or a defined methodology) or, at a minimum, mandate disclosure of the exact pathway(s), model(s), and key parameter choices used to support the compatibility claim.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	BDO Poland	Auditor	Poland			I partially agree and partially disagree	The revised drafting convention counts "shall disclose" datapoints in main body and places methodology in ARs (which are still mandatory methodological guidance but not counted as datapoints). This distinction is subtle and could cause inconsistent recording of required datapoints and confusion for assurance scope (what counts as a disclosure datapoint vs methodology).	E1	E1-1 - Transition plan for climate change mitigation	AR 1
Excels	BDO Poland	Auditor	Poland			I disagree	AR2 asks for consolidated narrative linking targets, actions, CapEx/OpEx and governance, but allows that internal management information need not all be disclosed. The threshold of what constitutes "key features" vs. confidential internal modelling is ambiguous. Companies will struggle to balance transparency with commercially sensitive detail; auditors will struggle to know whether withheld details are material.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	BDO Poland	Auditor	Poland			I disagree	The requirement to disclose geospatial coordinates for company assets and, where relevant, supply-chain nodes (AR5(b), presents a significant implementation challenge. Many suppliers are unlikely to have such data readily available, which may necessitate extensive procurement and IT projects to collect, validate, and maintain geospatial information. Without phased guidance or minimum data standards, this requirement risks imposing disproportionate costs and may limit comparability across undertakings.	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	BDO Poland	Auditor	Poland			I disagree	The primary boundary is the financial consolidation (reporting undertaking) but AR19 requires operational-control reporting if the financial boundary fails to fairly present operated assets. No clear tests or quantitative thresholds for when the "fails to convey a fair presentation" trigger applies. That creates inconsistent choices and reconciliation issues (Scope 1/2 reported on two boundaries) that auditors will need to assess.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	BDO Poland	Auditor	Poland			I disagree	AR25(e) requires updating Scope 3 categories every year for significant categories and full inventory at least every three years, but the screening rules for "significant" categories are wide (magnitude + other criteria). The lack of clearer thresholds (e.g., % of total emissions, spend thresholds) will create year-to-year comparability problems and put heavy supplier data collection burdens on companies. Auditors will have to rely heavily on estimates and sampling with limited guidance on acceptable estimation techniques.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Share of each GHG Emission by scope if combined. Why is it necessary to separate Scope 1 & 2? (it is not requiered in GHG protocal)	E1	E1-6 - Targets related to climate change	26. (a)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Intensity in value "where relevant". What does mean "where relevant" ? Why is it asked in the target part and not anymore in the 1.8 emission real ? We recommend to put the intensity value both for target and real data in NMIG	E1	E1-6 - Targets related to climate change	26. (a)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We recommend to specify if Scope 2 can be calculed on market or location basis. There is no information about it.	E1	E1-6 - Targets related to climate change	26. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The mention of the objectif of limiting warming to 1.5° is only for scope 1 and 2 according to SBTI. Not clear in this paragraph even if AR 16 clarify a little bit.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Why is the KPI target only in absolute value ? Indeed, the objective is set up in % and this % doesn't change. Whereas the absolute value might change depending on different cases partly described in AR13a.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The situations with a change in base year value should also include changes in methodologies and updates in the referentials (As example : ADEME)	E1	E1-6 - Targets related to climate change	AR 13
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	The total is not requested anymore . It is not consistent between the target (combined target possible) and the real data (split only). Moreover, the total is still requested in E1-5 par 24b.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	AR25e says that significant categories are to update every year and the full scope every three years. But in AR25c it is said that we have to identify and disclose the significant categories. So it is unclear. Do we have to disclose not significant categories ?	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I agree	Do you confirm we do not have to disclose the information of the share of bundled and unbundled instrument. The total share only ?	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Percentage of GHG Scope 3 calculated using primary data is not requested anymore ? Do you think narrative date is enough to compare compagnies ?	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	It would be useful to add a definition of storage and removal projects	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35.
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	What is the time horizon for the amounts of GHG ? We think it is unclear and need to be specify. End of the project ?	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (b)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Examples to clarify reversals would help in an AR to clarify if we are on exceptional events.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (d)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	Is it possible to clarify the GHG emissions are only for technological removals and storage activities (nature based solutions not concerned)	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	28. (c)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We would like to have the formula of this calculation . We think it is unclear. Are we talking about the % of removal GHG on the total GHG corresponding to the 35b ? What is the denominator ?	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36. (c)
Excels	LABORATOIRES PIERRE FABRE	Preparer (non-financial preparing a sustainability report)	France			I partially agree and partially disagree	We think we should add a brief description of the project as in the part 35 in order to present the project in a narrative way (same presentation as for the paragraph 35).	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I agree	From a strategic perspective, I did not understand the need of (the former) disaggregation of renewable sources, so great clarifications.	E1	E1-7 - Energy consumption and mix	28.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I disagree	I strongly disagree. It is necessary to use intensity-figures to enable sectoral comparability and benchmarking, both financial and physical denominators (Former para 40). I believe that it is necessary that all companies operating in high climate impact sectors have to disclose energy intensity and climate intensity. I also think that the addition of physical intensity based figures (production volumes or sold products) should be disclosed. Even though it may not enable comparability between sectors, it can enable comparability within sectors and most importantly, be really useful for internal analysis and business strategy as well as meet the objective of ESRS of fair presentation.	E1	E1-7 - Energy consumption and mix	30.
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I disagree	I strongly disagree. It is necessary to use intensity-figures to enable sectoral comparability and benchmarking, both financial and physical denominators (Former para E1-6 para 53, not really new AR 19). I believe that it is necessary that all companies operating in high climate impact sectors have to disclose energy intensity and climate intensity. I also think that the addition of physical intensity based figures (production volumes or sold products) should be disclosed. Even though it may not enable comparability between sectors, it can enable comparability within sectors and most importantly, be really useful for internal analysis and business strategy,as well as meet the objective of ESRS of fair presentation.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	Kjell & Company	Preparer (non-financial preparing a sustainability report)	Sweden			I partially agree and partially disagree	I would appreciate AR regarding carbon credits and which quality standards that are recognised? Both for new para 36.a and 37 b.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36. (a)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose re-integrating disaggregation into (c)(i)(ii)(iii). These information are useful for the users of the sustainability reporting to better understand the disaggregation of renewable energy consumption. The requested data are not complex to collect and they are in line with GRI-based KPI on energy consumption.	E1	E1-7 - Energy consumption and mix	28. (c)
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose re-integrating the existing AR 34 containing the table on energy consumptions and mix as a new Application Requirement to ESRS E1-7 para 28. The standardized table can ensure greater comparability in the presentation of such information.	E1	E1-7 - Energy consumption and mix	AR 17
Excels	ASSIREVI	Auditor	Italy			I disagree	We propose to re-integrate the "NMIG 9 for para. 32 (GHG Intensity) " in the main standard as new AR to para. 32.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose re-integrating the existing para. 44(d), representing the total of GHG emissions .	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We suggest to clarify the meaning of "reflect" (AR 24(b)), in order to understand whether it is necessary to provide separate quantitative disclosure of the share of contractual instruments used to purchase energy or not.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose re-integrating the requirement to justify scope 3 emission category exclusions (part of existing para. 46(i)). We suggest to maintain the requirement in order to distinguish between categories not applicable to the organisation and categories that the organisation does not disclose or does not fully report due to lack of information or because the analysis is still immature/incomplete.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	ASSIREVI	Auditor	Italy			I disagree	We recommend re-integrating the existing para. 60 of ESRS Set 1 about in the case of Net Zero targets in addition to the gross GHG emission reduction targets. We believe that if an organisation has a Net Zero target, it has this type of information available.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	ASSIREVI	Auditor	Italy			I partially agree and partially disagree	We propose re-integrating the existing para. 63(d) regarding the current year approximate gross GHG emission volumes by Scopes 1, 2 and, where applicable, Scope 3 covered by internal carbon pricing schemes. We believe that if an organisation uses these schemes, it has this type of information available.	E1	E1-10 - Internal carbon pricing	38.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E1	E1-7 - Energy consumption and mix	27.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	It's a positive development that the application of the financial control approach has been clarified.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We view the removal of the addition concerning high climate impact sectors as a positive step.	E1	E1-7 - Energy consumption and mix	29.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We do not understand why the metric "Percentage of Scope 1 GHG emissions from regulated emission trading schemes" is being retained. We recommend removing the addendum to simplify reporting.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (a)
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The idea and purpose of the information regarding "share and types of contractual instruments used to purchase energy" is unclear to us and should therefore be deleted or further specified.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We support the simplification of the requirements regarding carbon credits. This leads to a simplification of reporting, while the most important information has still been retained.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We support the simplification of the requirements regarding Internal Carbon Pricing. This leads to a simplification of reporting, while the most important information has still been retained.	E1	E1-10 - Internal carbon pricing	38.
Excels	Mercedes-Benz Group AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome the fact that the table is now optional, as the strict specification of the table columns was associated with various uncertainties. This change simplifies the reporting process.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The framework references 'transition events.' There needs to be some further guidance on this, particularly if this means transition risk events, or whether this also encapsulates transition opportunities. There are statements made which could be open to interpretation. Clear definitions are required to ensure we report the desired information.	E1	E1 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The objective described in para. 1 of each draft topical ESRS is inconsistent to Draft ESRS 1. The statement about "dependencies when relevant" and "financial effects" should be deleted to make it consistent with ESRS 1. Change the wording to: "When reporting in accordance with the ESRS, the sustainability statement shall cover information in relation to [Draft] Amended ESRS E1 Climate change, when this topic relates to material impacts, risks and opportunities. The disclosure on the material impacts, risks and opportunities is expected to cover policies, actions, metrics and targets (if in place)."	E1	E1 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Remove parts (a) and (b) and keep the introductory paragraph to avoid unnecessary duplication. Paragraph 9 should read as follows: "The undertaking shall apply the provisions of [Draft] Amended ESRS 2 paragraphs 29 to 32 and GDR-P, GDR-A, GDR-T and GDR-M."	E1	E1 - Objective	9.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	ESRS E1's ARs expect undertakings to break down GHG disclosures by country, segment, activity, subsidiary, GHG type or source type. For credit institutions, a more meaningful lens is by exposure (e.g., asset class, sector, counterparty type), which is how banks manage and monitor climate-related risks. The ARs should explicitly permit disaggregation by asset class, sector and client type for financial institutions.	E1	E1 - Objective	1.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	AFME supports the clarification and simplification of the DR outlining transition planning requirements, including the clarification that a transition plan shoud provide information about about how the strategy and business model are compatible with the limiting of global warming rather than targets only. The requirement for an explanation of the "decarbonization levers identified and key actions planned" (by reference to E1-3) is not feasible for financial institutions for whom Scope 3 Category 15 is most relevant, given the lack of direct control and inability to quantify the amount of client decarbonization directly resulting from bank decarbonization "actions". The ARs should recognize the inability of financial institutions to quantify expected GHG reductions as part of transition plans and permit disclosure of transition plans without this detail.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	AFME supports the removal of references to taxonomy-aligned KPIs. From the preparer perspective, AFME has raised comprehensive concerns with the usefulness and relevance of Taxonomy KPIs for credit institutions. The actions defined within the transition plans pertain to the bank's portfolio, and in this context, the financial resources allocated cannot be interpreted in conjunction with the disclosure published under the Taxonomy Regulation.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	AFME supports the clarification that undertakings should only disclose significant CapEx amounts related to coal, oil and gas economic activities if the undertaking has them.	E1	E1-1 - Transition plan for climate change mitigation	14. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We welcome the clarification that information on the transition plan is required and not the disclosure of the TP itself. However, it is still quite unclear how this disclosure in E1-1 should interact with the more granular disclosures in subsequent sections (e.g. on targets, actions, etc.). Additional guidance is welcomed with respect to how this overlapping disclosure should be managed.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We would appreciate clarity with respect to how we can demonstrate that strategy and business model are compatible with 1.5C, if retained. For targets (as previously required), it is clear how temperature alignment can be provided . This is less clear for strategy and business model. We propose to change back to target alignment.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Companies face uncertainty regarding the requirements for transition plans to explain how an entity's strategy and business model are compatible with the transition to a sustainable economy, and with the limiting of global warming to 1.5 °C in line with the Paris Agreement and with the objective of achieving climate neutrality by 2050" (E1-1 15) and to explain how GHG emissions targets are "compatible with 1.5C" (E1-1 16). Rather than prescribing that the plan must be compatible with a particular temperature increase, transition plans should explain how the entity will contribute to decarbonisation objectives. Given the dependencies for companies' transition including actions outside their control, and uncertainties as to what "compatible with 1.5C" entails, we recommend instead allowing reporters to disclose a climate mitigation plan which responds and contributes to the transition towards a low-greenhouse gas emissions, climate-resilient economy (the latter being aligned with ISSB S2). This should also be addressed in the review of the level 1 Directive.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The requirements in ESRS E1-1, para. 14, ESRS 1-5, para. 24c, and GDR-A, para. 38, all include different but similar requirements. This is confusing. We would appreciate closer alignment. Further, the disclosure of financial and investment planning/capex and opex information is often commercially sensitive for companies. We would welcome additional flexibility with regards to disclosure of such information (also in subsequent sections where additional requirements on this topic are provided). We propose to change the wording to make clear that only the most significant financial and investment/capex and opex plans need to be disclosed in in relation to transition plans. The breakdown of short-/medium-term and longer-term provides and additional requirment vs. the original ESRS requirements. This is difficult information to provide and often commercially sensitive.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Guidance on how financial institutions should measure "locked-in" emissions and show how they impact a transition plan should be provided.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Undertakings which do not have a transition plan need to indicate whether, and, if so, when, it will adopt a transition plan. Transition plans meeting ESRS requirements may be a new concept and also something guided by applicable law; therefore it is hard for firms to give a precise date for when an ESRS-compliant transition plan will be adopted. So as to not lead to imprecise answers given the shifting nature of mandatory transition plans, it would be more appropriate for this DR to not ask when firms will adopt transition plans, particularly when legislative regimes requiring transition plans, such as the CSDDD, have had their application dates delayed.	E1	E1-1 - Transition plan for climate change mitigation	15.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Companies face uncertainty regarding the requirements for transition plans to explain how an entity's strategy and business model are compatible with the transition to a sustainable economy, and with the limiting of global warming to 1.5 °C in line with the Paris Agreement and with the objective of achieving climate neutrality by 2050" (E1-1 15) and to explain how GHG emissions targets are "compatible with 1.5C" (E1-1 16). Rather than prescribing that the plan must be compatible with a particular temperature increase, transition plans should explain how the entity will contribute to decarbonisation objectives. Given the dependencies for companies' transition including actions outside their control, and uncertainties as to what "compatible with 1.5C" entails, we recommend instead allowing reporters to disclose a climate mitigation plan which responds and contributes to the transition towards a low-greenhouse gas emissions, climate-resilient economy (the latter being aligned with ISSB S2). This should also be addressed in the review of the level 1 Directive.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The disclosure requirements concerning the quantification, even as an indicative range, of the financial resources supporting transition plans defined by the undertaking are difficult to apply to financial institutions, and potentially complex to interpret for users of the Sustainability Statement, because actions typically do not consist in significant investments but are connected to relationships with clients in the undertakings' portfolio. We therefore disagree with the mandatory nature of these requirements and suggest to maintain only a qualitative description of the resources allocated for implementation of action plans or other key actions	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We welcome the introduction of 'dependencies' around transition plans aligned to IFRS S2.	E1	E1-1 - Transition plan for climate change mitigation	AR 3
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We welcome the simplified disclosure requirements and the clear focus on exposure to climate-related hazards and transition events and trends. We recommend to use more general language in 18b) since transition risk scenarios may not be event based (e.g. NGFS scenarios) Change this to "(b) to transition risk factors (over the short,- medium- and long-term)". It must allow flexiblity for different types of transition risk scenarios used by banks. We would also ask to reconsider financial institution specific definitions for upstream and downstream value chains.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We recommend to use more general language in 19 since transition risk scenarios may not be event based (e.g. NGFS scenarios). Change the language to "transition factors".	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	For additional simplification, we suggest the combination of paragraphs 18 and 19 under E1-2; they both inquire about methodology and the latter refers to 18(a) and 18(b). In addition, we believe there should be better guidance on what constitutes the "upstream and downstream value chain" in paragraph 18 as this is a very broad statement and, for a global bank, can include an enormous number of components in our value chain.	E1	E1-2 - Climate-related risks and scenario analysis	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The amended text expects undertakings to "assess the extent" of exposure and sensitivity to climate-related hazards, "taking into consideration the likelihood, magnitude and duration of the hazards as well as the geospatial coordinates … specific to its locations and supply chains." For a global bank with highly diversified geographies, industries and products, a comprehensive, granular geospatial assessment at the level suggested is aspirational; it is especially challenging for our own supply chains. This creates unrealistic and overly burdensome requirements. Clarify that use of location-specific (including geospatial) information is on a best-efforts basis, subject to data availability and proportionality. We suggest adding at the end of AR5(c): "on a best-efforts basis, where reasonably obtainable, and using appropriate proxies where necessary."	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The amended wording requires undertakings to "assess the extent" of exposure and sensitivity to identified transition events, "taking into account the likelihood, magnitude and duration of the transition events." For policy, market and behavioural shifts, forward-looking likelihood/duration judgements are highly uncertain. There is a meaningful risk of misleading precision or comparability issues across reporters. Subject to our comments on paragraph 19, delete the clause "taking into account the likelihood, magnitude and duration of the transition events," or qualify it as "high-level, qualitative judgements on a best-efforts basis." This keeps the focus on identifying relevant transition events and describing potential exposure pathways without requiring point estimates that would not be decision-useful.	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	It should also be clarified, in line with EFRAG's intentions (as set out in question 17 of part 2 of this consultation), that these resilience disclosures are only meant to be qualitative. It is still possible to interpret these provisions as requiring quantitative disclosures.	E1	E1-3 - Resilience in relation to climate change	21.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The proposed text asks undertakings to explain how "current and planned mitigation and adaptation actions (as per DR E1-5) and transition plans (as per DR E1-1) support, strengthen or impact resilience," which reads as if a transition plan is mandatory. Elsewhere, ESRS E1 acknowledges that transition plans are not mandatory (if none exists, the undertaking indicates whether and when it will adopt one). The drafting should not imply a de facto requirement. Clarify that this disclosure is conditional on the undertaking having adopted a transition plan. Suggested wording: "and, where a transition plan has been adopted in accordance with DR E1-1, how that plan supports…" This would also align with the non-mandatory guidance that frames transition-plan disclosures as "if and when adopted." It should also be clarified, in line with EFRAG's intentions (as set out in question 17 of part 2 of this consultation), that these resilience disclosures are only meant to be qualitative. It is still possible to interpret these provisions as requiring quantitative disclosures.	E1	E1-3 - Resilience in relation to climate change	21. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We suggest modifying AR 10 for 21(c), which requires the disclosure of the availbility and flexibility of existing resources to manage the financial impact of climate-related risk, to a more qualitiative approach by not specifying financial resources and financial impacts. These are very difficult to ascertain at this juncture. Similarly, AR 10(b) as it relates to the redeployment, repurpose, upgrade or decommissioning of assets is very difficult to calculate with precision at this time and should be modified to reduce burden. We also believe the disclosure of financial resources to manage financial impacts, risks and opportunities - similarly to disclosures on investments, opex, capex - is often commercially sensitive information. We would propose this as an optional disclosure requirement.	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We agree with amendments to policy disclosures including with respect to GDR-P.	E1	E1-4 - Policies related to climate change	22.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We see many duplications of information with transition plan's requirements, as well as with GDR-A para 38. It should be clarified that undertakings have to report on this information only if not already done so in the context of E1-1.	E1	E1-5 - Actions and resources in relation to climate change	24.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	It is unclear how the logic of actions structured by decarbonisation levers should be applied for financial institutions, especially downstream activities. Financial institutions disclosures show challenges around this as the logic simply does not apply the same way as to e.g. an operations company.	E1	E1-5 - Actions and resources in relation to climate change	24. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The original ESRS, E1 §29(b) required disclosure of "achieved and expected GHG reductions" resulting from actions for climate change mitigation. AR 19(c) required the disclosure of key mitigation actions alongside GHG targets, disaggregated by decarbonization lever. These disclosures are not possible and not useful in the context of Scope 3 Category 15 Financed Emissions for banks. Bank actions for CCM will not result in direct and calculable GHG reductions. While it is possible to show achieved reductions, it is not possible to attribute those to specific bank actions since reductions stem from client activity. §29(b) should recognize this and the disclosure of achieved/expected GHG reductions should be required only "where reasonably calculable". The revised drafts retain largely the same language as before, without any qualification language. As an alternative, banks could disclose a decarbonisation target (as an expected emissions reduction) including annual progress reporting (as achieved emissions reductions), with each target having multiple associated actions. It is not always possible to accurately quantify, for each individual action, the level of decarbonization. We recommend allowing qualitative descriptions where quantitative attribution is not feasible.	E1	E1-5 - Actions and resources in relation to climate change	24. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The disclosure requirements concerning the quantification, even as an indicative range, of the financial resources supporting climate change mitigation actions defined by the undertaking are difficult to apply to financial institutions, and potentially complex to interpret for users of the Sustainability Statement, because actions typically do not consist in significant investments but are connected to relationships with clients in the undertakings' portfolio. The disclosure of financial and investment planning/capex and opex information is often commercially sensitive for companies. We would welcome additional flexbility with regards to disclosure of such information (also in subsequent sections where additional requirements on this topic are provided). Alternatively, we would propose to change the wording to make clear only the most significant financial and investment/capex and opex plans need to be disclosed related to TPs. The breakdown of short-/medium-term and longer-term provides an additional requirment vs. the original ESRS requirements .This is difficult information to provide and often commercially sensitive. We therefore disagree with the mandatory nature of these requirements and suggest to maintain only a qualitative or simplified description of the resources allocated for implementation of action plans or other key actions	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We believe these disclosures are burdensome and it is not practicable to meet all GDR-T and E1-6 disclosures for long-term (usually 2050) Net Zero Commitments or Targets. These are typically managed through a focus on the relevant interim targets along the pathway to Net Zero. Items expected by GDR-T and E1-6 will not be available for target setting 25 years out resulting in non-decision useful information that is unlikely to meet the quality of information requirements of ESRS 1. Undertakings that have made long-term Net Zero commitments should be able to limit disclosures to their interim targets which corresponds to how this is managed. Can EFRAG clarify this either in the standards or the NMIG since the Glossary definition of "target" will still pick up firms' 2050 net zero commitments.	E1	E1-6 - Targets related to climate change	25.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	Duplications of information with transition plan's requirements (e.g. targets compatible with 1,5° scenario) are still present. It should be clarified that undertakings have to report on this information only if not already done in the context of E1-1.	E1	E1-6 - Targets related to climate change	26.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	For the previous ESRS 1 §34(e), we sought guidance on what's needed to show targets are "science-based and compatible with limiting global warming to 1.5C."; guidance on this does not seem to have been provided in the exposure drafts.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We believe a net-zero target, as implied by the 'net' wording, should also be possible to be 'net' instead of 'gross', aligned to the definition of 'net zero target' by ESRS. The maximum amount of offsets used should be transparently stated though. The previous ESRS E1 §34(b) required that disclosed GHG reduction targets be gross targets not including removal, credits or avoided emissions. But Net Zero targets assume a certain amount of residual emissions will be neutralized by these means, as was recognized in E1-7 §60. It should be clarified that Net Zero targets are NOT subject to E1-4 and only MDR-Ts.	E1	E1-6 - Targets related to climate change	AR 11
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We welcome the the requirement to quantifiy decarbonization levers has been made voluntary.	E1	E1-6 - Targets related to climate change	AR 14
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We welcome the removal of requirement to disaggregate total energy consumption from renewable sources.	E1	E1-7 - Energy consumption and mix	28.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	AFME does not agree with this new breakdown, i.e. the removal of reference to HCIS for the disaggregation of energy consumption from fossil sources. This information is not relevant for all sectors. The revised draft extends this reporting requirement to all companies, regardless of sector. For entities outside those sectors, this clearly constitutes a new requirement rather than a simplification. We support the deletion of this metric in line with EFRAG benchmarking analysis. We do agree with the deletion of the disclosure requirements of energy intensity for activities in HCIS (as per para. 40 in original ESRS).	E1	E1-7 - Energy consumption and mix	29.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The application requirements do not provide additional guidance to undertakings on how to report energy production metrics; practical examples would be useful, in particular with regard to the inclusion of thermal energy produced by cogeneration. Please provide supplementary guidance through the inclusion of specific application requirements.	E1	E1-7 - Energy consumption and mix	30.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	AFME urges stronger alignment between the scope and methodology for the calculation of financed emissions between the SFDR, Pillar 3 and ESRS. Banks disclose financed GHG emissions (Scope 1, 2, and 3 emissions of the counterpart) for positions that most significantly contribute to climate change within Pillar 3 disclosure. The scope of this disclosure differs from the provisions of the ESRS. Financial market participants subject to SFDR (e.g. asset managers, insurance companies) disclose financed GHG emissions (Scope 1, 2, and 3 emissions of the counterpart) for the exposures in their portfolios. The scope and methodology of this disclosure differ from the requirements of the ESRS. We do however welcome the deletion of the requirement to disclose total emissions as well as GHG Intensity based on net revenue (as per previous para. 53. of the original ESRS). We also suggest reformulating the wording of G1-8 32(a) to clarify that the disclosure of Scope 1 GHG emissions from regulated emission trading schemes is intended to be mandatory only for undertakings having such emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Biogenic emissions are generally of limited relevance for the financial sector and their calculation methodologies may still not be robust enough for a solid disclosure. We suggest to limit the disclosure requirement to undertakings with a significant exposure to biogenic emissions or to make it voluntary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Concerning new application requirements 18-19 on the reporting boundary for GHG emissions, we propose the insertion of a specific guidance to explain the approach to be used and to outline the most critical cases through concrete examples, in line with the purpose of Appendix C in ESRS 1. In particular, given ESRS requirements on GHG emissions reporting according to the financial control approach and the added provisions on leased assets, we would expect ESRS to clarify how to consider the following real estate categories: - own assets used by the undertaking for its business activities (i.e. Scope 1 and 2 in our view) - own assets leased to third parties (i.e. Scope 3 cat. 13 in our view) - leased assets used by the undertaking for its business activities (i.e. Scope 1 and 2 in our view) - leased assets used by the undertaking for reasons different than typical business activities (i.e. Scope 3 cat. 8 in our view)	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	We suggest rewording the application requirement 21(b) to clarify that the mentioned gases should be included in the calculation of GHG "where relevant".	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	In relation to the new AR 24(b) on share and types of contractual instruments, we see inconsistency with EFRAG's stated approach that application requirements should serve as guidance rather than as content requirements. If EFRAG expects companies to disclose information on contractual instruments, it should move such a paragraph to disclosure requirements. Also on this AR, the wording remains unclear with a reference to "share" that is not accompanied by any indications on calculation formula.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We welcome that the disclosure of the GHG emissions reporting table has become voluntary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We welcome the deletion of the previous disclosure requirement para. 60 around net-zero target and residual emissions due to the significant uncertainties that were involved. We reiterate that the definition of a net-zero target should not include a defined temperature alignment (it currently references 1.5C). It just means emissions in the atmosphere are in a state of 'net zero'. We propose to change this definition and exclude any temperature alignment.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	The additional requirement regarding the consistency of the carbon prices used with the prices used in the financial statement for impairment tests is not aligned with the simplification purposes. We propose the deletion of this part.	E1	E1-10 - Internal carbon pricing	38. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Paragraphs 40-41: Subject to our response to question 20 in part 2 of this consultation, which states that disclosures related to paragraphs 41-42 should be optional, assets at material physical and transition risk should exclude a bank's own assets. This would result in greater alignment with Pillar 3 reporting templates 4 and 5, which exclude a bank's own assets.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We recommend adding "where applicable" and allowing qualitative disclosure to meet this requirement. Disagree with disclosing potential liabilities that are material, given that they are already disclosed in the financial statements and do not need to be duplicated in sustainability reporting;	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We support the deletion of the split between chronic and acute physical and support the removal to report over the "short, medium and long term" as these time horizons do not align with the time horizons required in Pillar 3 reporting.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I partially agree and partially disagree	The amendment requires the disclosure of "the location of key assets at material physical risk." For banks, if "assets" is read to include client exposures (e.g., loans), pinpointing locations could reveal client-confidential information or be impracticable at granular levels. If EFRAG intends banks to report on financial exposures, specify that disclosures should be provided on an appropriately aggregated basis (e.g., by geography/region) that avoids revealing client-confidential information.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Climate change mitigation actions are not primarily aimed at transition risk mitigation. Therefore, it is difficult/not always possible to link climate change mitigation actions to limiting the degree of assets at transition risk. Climate change mitigation actions are strongly aimed at limiting negative impacts related to climate change, not necessarily risk mitigation. Subject to our response to question 20 in part 2 of this consultation, which states that disclosures related to paragraphs 41-42 should be optional, we recommend adding "where applicable" and explicitly allowing qualitative disclosure.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I agree	We welcome the deletion of mandatory requirements around the reconciliation of line items to financial statements as per previous DR 68.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We disagree with the retention of this paragraph – any "potential liabilities" which are material will be disclosed within companies' financial statements and don't need to be disclosed here.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	Disagree with the revised formula, considering that scenario selection (" a scenario aligned with limiting climate change to 1.5°C") should not be imposed on banks.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Association for Financial Markets in Europe	Association of financial institutions	United Kingdom			I disagree	We disagree with the formulation of revised paragraph 42 - percentage of assets or revenue derived from business activities aligned with climate-related opportunities and time horizons. If an opportunity is only material in the long-term, this will be impossible to quantify as the revenue may not have actually been earned yet and this may lead to the wrong outcome. Preparers would arbitrarily make up numbers that are not decision-useful information for the end-users of the sustainability statement. We support EFRAG's effort to align the language in this paragraph with IFRS S2, but this will be challenging to implement in practice given there is no definition of "climate-related opportunities" within the ESRS. The quantitative specificity provided in this paragraph goes beyond the requirements of ISSB. Disclsoure against this paragraph should be made voluntary.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Quantitative disclosure of CapEx/OpEx for the short and medium term, as well as disclosure of investment plans, is being required; however, investment plans pertain to information related to corporate/undertaking strategies and provide advantageous insights to competitors, so whether to disclose this information should be left to the company's discretion.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Emissions related to liabilities are classified as part of the company's own operation. Since the GHG Protocol does not cover emissions related to liabilities, we request to delete this requirement.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 20
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is required that the data has been verified should be given priority.We request to clarify that the definition of "the data has been verified" will be determined at the discretion of the company.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I disagree	Since the company cannot verify the amount of energy supplied from nuclear power, we request to delete this requirement.	E1	E1-7 - Energy consumption and mix	28. (b)
Excels	Japan Business Council in Europe	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It is required to conduct calculation for all type of assets including right-of-use assets. Some right-of-use assets such as intellectual property rights and copyrights do not involve GHG emissions. We request to exclude right-of-use assets that do not emit any GHG from AR30(b).	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Information on the potential locked-in emsission provides limited material insights on a company's decarbonization pathway with information difficult to obtain. We suggest to remove this requirement.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The disclosure of "financial and investment planing (including the short- and medium-term financial and investment plan)" and "financial resources supporting the implementation and strategic ambition of its transition plan for climate change mitigation, including quantitative short- and medium-term CapEx, and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges" go beyond the initial requirements and the changes therefore go against the aim of simplifying the ESRS. Additionally, it is unclear how the short-/medium-term and long-term time horizons are defined considering also the respective GHG targets defined by the companies. Does long-term refer to 2050? Disclosing any investment figures until 2050 is not feasible and the information would not be reliable. Requirements related to Transition Plans should be closely aligned with existing international frameworks.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The current formulation of the AR indicate behavior obligations in how to conduct the scenario analysis going against ESRS 2 (ED) para. 5. Particularly the mandatory use of geospatial data and detailed methodological requirements related to supply chain lead to unnecessary complexity in the overall requirements. Reformulation needed (previously "This description shall include its process in relation to [...]").	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The current formulation of the AR indicate behavior obligations in how to conduct the scenario analysis going against ESRS 2 (ED) para. 5. Reformulation needed (previously "This description shall include its process in relation to [...]").	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The required information provides limited material insights with data difficult to obtain. Suggestion to delete requiremetns	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	Siemens AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	While also a requirement of the IFRS Sustainability Disclosure Standards, the lack of clear and harmonized guidance on calculating anticiapted financial effects linked to individual climate-related risks and opportunities leads to inconsistent and unreliable information. The complexity and lack of integration between sustainability and financial systems make such quantification impractical. Additionally, by going beyond the requirements of the ISSB, the disclosure requirement can also reveal sensitive strategic information, leading to competitive disadvantages for European companies. We therefore advocate for removing all requirements related to anticipated financial effects.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We do not understand the need to refer to 'finance-lease / right-of-use-assets'. It seems simpler to refer just to 'leases' (with the term being defined as we suggested for ESRS 1 -70). Right-of-use assets includes both (former) finance lease and (former) operating leases, so it seems redundant to now refer separately to finance leases.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Clause (a) refers to the GHG Protocol Corporat Value Chain (Scope 3) Accounting and Reporting Standard (Version 2011). Appendix A of this Standard, Accounting for Emissions from Leased Assets, was obviously developed prior to IFRS 16 being in place, and it therefore tends to contradict the approach of ESRS 1-70. We suggest it is clarified that for leases, the approach set out in ESRS 1-70 overrides the GHG Standard.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The reporting boundary cross refers to ESRS 1 59, that deals specifically with group reporting. Taken in isolation (i.e. without reading ESRS 1 70, this might be seen as including assets leased nby a lessor to its customers. We suggest a cross-reference to ESRS 1 70	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Transition plans will need preparers to find a difficult balance between the costs of preparation and providing reliable and meaingful data. Within the mobility field, we cannot achieve net-zero by 2050 unless (1) the grid in all the countries where we operate is 100% fossil fuel free, and (2) all vehicles are powered by carbon free fuel (or electricity). Any assumptions we make in a transition plan will be based on predicting the global grid in 2050 and the adoption of EVs and other technologies by the public. This is out of the control of fiannce companies and and would be highly speculative. Moreover, imposing an obligation on companies to align their business model with the 1.5C aspirational goal is highly problematic, given that the Nationally Determined Contributions (NDCs) of states under the Paris Agreement do not to respect the 2C target (the UN Environment Programme estimates the current trajectory to be at 2.6-3.1C). Strengthened collective efforts are needed, but the proposed transition plans expect companies to fulfil an obligation they do not have full control over.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Disclosure of resources associated with any transition plan necessarily requires a clear picture of the underlying plan itself. As noted in response to E1-1, multiple external variables make it challenging for mobility companies to publish transition plans that meet a strict rubric for included disclosures. Given the flexibility required to be associated with any transition plan, it is difficult to implement a transition plan with clear financial resources attached to any specific category. Accordingly, it would be beneficial for these data points to be streamlined with a set of financial reporting requirements that is tied only to the information (if any) disclosed as part of any company's designed transition plan.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Leaseurope	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The multiple dimensions of information required in order to meet Scope 3 targets makes it difficult for private companies to disclose without showing business growth projections/ information on how the business may evolve, which can be highly sensitive for private businesses. Given this additional effort should be taken to limit Scope 3 reporting obligations to only require total amounts not to require breakdowns from each separate Scope 3 category.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I agree	ETSA members appreciate the closer link between the double materiality analysis and the resilience analysis related to climate change, as they can now be reported as closely connected exercises – rather than individual analyses. •ETSA members believe EFRAG should align its application requirements and NMIG on climate resilience analysis to what is possible with open source climate risk tools, to avoid unnecessary costs for (smaller) preparers. •EFRAG holds on to the requirement to provide current financial effects related to material risks and opportunities. ETSA members ask EFRAG to provide (or co-develop) supportive (preferably open-source, sector-specific) analytical tools that can help preparers quantify climate and other environmental risks. This can be part of the NMIG, as EFRAG does with proposing tools like Natura2000 or the WWF Risk filter	E1	E1-3 - Resilience in relation to climate change	AR 8
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I disagree	•ETSA members do underwrite the fact that preparers should disclose whether their transition plan is aligned with a 1.5°C pathway or not – without imposing a certain performance level that would be out of the scope of a reporting/transparency directive. •In this context, ETSA suggests considering a reference to the Paris Agreement in both the sections E1-1 Transition plan (already included) as the E1-6 Targets related to climate change. The Paris Agreement offers a stable legal anchor also referring to well-below 2°C, while the interpretation of the 1.5°C goal may evolve over time through scientific updates (e.g., IPCC reports). Referencing the Agreement ensures alignment with the latest policy and scientific benchmarks without requiring frequent amendments to the standards. •ETSA members understand and welcome the fact that EFRAG provides the possibility for companies to prove compatibility of the target with the 1.5°C pathway by benchmarking against a reference target – without having to provide assurance or target validation by a third party. ETSA does raise the question on how detailed a preparer should disclose its benchmarking methodology and (if applicable) gap with a 1.5°C aligned target.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	ETSA	Business association (other than association of financial institution)	Belgium			I disagree	•ETSA members do underwrite the fact that preparers should disclose whether their transition plan is aligned with a 1.5°C pathway or not – without imposing a certain performance level that would be out of the scope of a reporting/transparency directive. •In this context, ETSA suggests considering a reference to the Paris Agreement in both the sections E1-1 Transition plan (already included) as the E1-6 Targets related to climate change. ETSA does raise the question on how detailed a preparer should disclose its benchmarking methodology and (if applicable) gap with a 1.5°C aligned target.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	The consideration of energy as a disclosure requirement increases complexity	E1	E1 - Objective	4.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	More clarification is needed on the reporting of CO2	E1	E1 - Interaction with other ESRS	12.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	This requirement looks streamlined	E1	E1-1 - Transition plan for climate change mitigation	AR 1
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The focus should rather be on medium term (2030). Longer term (2050) can increase complexity, given the level of uncertainty	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The disclosure information on the transition plan seems streamlined and reference to EU taxonomy moved to NMIG	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing further information on resilience of strategy and business model increases burden	E1	E1-3 - Resilience in relation to climate change	21.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I agree	The disclosure requirement on climate change actions seems streamlined	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Providing absolute value related to intensity targets can imply disclosing confidential information	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Alignment between operational control boundaries and organisational boundaries might be difficult to achieve	E1	E1-6 - Targets related to climate change	AR 15
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing separately Scope 1,2 and 3 increases granularity	E1	E1-6 - Targets related to climate change	32.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	While it is important to describe a material risk in financial terms, companies should be able to use their enterprise risk management approaches for the reporting	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Same as above	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	Eurometaux (European Metals Association)	Business association (other than association of financial institution)	Belgium			I disagree	An estimation of monetary amount and percentage of assets can make the process more complex	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	EFPIA	Business association (other than association of financial institution)	Belgium			I disagree	The requirement to present GHG emission reduction targets as gross targets is not aligned with existing GHG emissions target and accounting standards like SBTi and GHG Protocol and renders them not science-based. Existing standards allow targets to include validated bundled and unbundled energy attribute credits (EACs) like those obtained through voluntary power purchase agreements or through the use of renewable fuels. Gross targets that do not include EACs are not science-based. Requiring reporting entities to maintain two sets of climate action targets, one of which cannot be validated, creates unnecessary risk for the reporting entity.	E1	E1-6 - Targets related to climate change	AR 11
Excels	EFPIA	Business association (other than association of financial institution)	Belgium			I disagree	Disaggregation of Scope 2 energy consumption would be inconsistent with the GHG Protocol and the information is not currently available from all energy providers. We recommend aligning with GHG Protocol and disaggregating only for Scope 1.	E1	E1-7 - Energy consumption and mix	28.
Excels	EFPIA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We appreciate the elimination of the references to "high climate impact sectors," but disaggregation of Scope 2 energy consumption would be inconsistent with the GHG Protocol and the information is not currently available from all energy providers. We recommend aligning with GHG Protocol and disaggregating only for Scope 1.	E1	E1-7 - Energy consumption and mix	29.
Excels	EFPIA	Business association (other than association of financial institution)	Belgium			I disagree	It is not feasible to report constituent gases for Scopes 2 & 3 because emission factors are not readily available and the amended guidance in ESRS E1-8 AR 26 and ESRS 1 §3.7 no longer provides enough flexibility to allow for reasonable judgment. AR 21(b) and AR 26 should clarify that disaggregation by constituent is only necessary for Scope 1.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	EFPIA	Business association (other than association of financial institution)	Belgium			I disagree	It is not feasible to report constituent gases for Scopes 2 & 3 because emission factors are not readily available and the amended guidance in ESRS E1-8 AR 26 and ESRS 1 §3.7 no longer provides enough flexibility to allow for reasonable judgment. AR 21(b) and AR 26 should clarify that disaggregation by constituent is only necessary for Scope 1.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	EFPIA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	As revised, this requirement now applies to Scope 1, 2, and 3 emissions. It is inconsistent with the GHG Protocol and is not feasible for Scope 2 and Scope 3. This requirement should align with the GHG Protocol and clarify that it only applies to Scope 1. The three-year grace period provided in Amended ESRS E1 122-125 for value chain data is unlikely to provide enough time for this type of data and/or valid emission factors to become available.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	EFPIA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	As revised, this requirement now applies to Scope 1, 2, and 3 emissions. It is inconsistent with the GHG Protocol and is not feasible for Scope 2 and Scope 3. This requirement should align with the GHG Protocol and clarify that it only applies to Scope 1. The three-year grace period provided in Amended ESRS E1 122-125 for value chain data is unlikely to provide enough time for this type of data and/or valid emission factors to become available.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I disagree	While intensity targets are useful for tracking efficiency improvements, they can obscure the absolute environmental impact of financial institutions, particularly in growing portfolios. The proposed exemption risks undermining transparency and comparability across sectors. Absolute emissions are critical for understanding real-world climate impact, especially for stakeholders assessing alignment with the EU Green Deal and Paris Agreement goals. Intensity-only disclosures may mask rising emissions in expanding lending or investment portfolios, and sector-specific exemptions could create an unlevel playing field while reducing pressure on high-emitting sectors to transition.	E1	E1 - Objective	AR 12
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree with the simplification of introduction.	E1	E1-7 - Energy consumption and mix	27.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree with the deletion of breakdown of renewable sources.	E1	E1-7 - Energy consumption and mix	28.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree with deletion of specification for "high climate impact sectors (HCIS)" - and all further requirements related to HCIS.	E1	E1-7 - Energy consumption and mix	29.
Excels	MedTech Europe	Business association (other than association of financial institution)	Belgium			I agree	Agree with the simplification for clarity.	E1	E1-7 - Energy consumption and mix	30.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Companies also remind that the European Commission committed to define by end of 2025 the meaning of "compatibility between companies'target and 1.5°C targets". Until such a definition is published, no obligations are legitimate on this issue. They stress that the Paris Agreement also refers to "well below 2°C objective" which should be reinserted in the amended CSRD.	E1	E1-1 - Transition plan for climate change mitigation	1.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	In §14c), a new requirement has been inserted : "dependencies on which the transition plan relies". This additional "shall" requirement goes too far; furthermore, it is inconsistent with AR21. This new reference needs to be suppressed.	E1	E1-1 - Transition plan for climate change mitigation	1.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	§19 includes a new "shall" requirement:" for paragraph 18(b) it shall include the type of transition event analysed. In conducting its climate -related physical risk analysis supported by scenario analysis, the undertaking shall". Tha table in AR12 of set was presented as an example, not as a requirement. Those new obligations should be suppressed.	E1	E1-2 - Climate-related risks and scenario analysis	2.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	AR5 for §18 includes new requirement on the way the climate-related physical risks should conducted. The same with AR6 on §19 for climate-related transition risks. This goes too far in details considering methodologies are not yet mature. Those requirements should be suppressed.	E1	E1-2 - Climate-related risks and scenario analysis	2.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	The notion of resilience used in this section is very much unclear (see glossary); if the concept refers to adaptation, then it should be replaced by climate adaptation (without any reference to transition). In addition, in §21, new requirements b) and dc) have been inserted which appear excessive. They should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	AR 8 to §20 added a requirement: "shall consider the implications of the combined assessments performed according to DRs E1-2". This new obligation is excessive and should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	AR10 to §21c) introduced a new c):" The effect of current and planned investments in climate mitigation, adaptation and transition opportunities on climate resilience enhancement". This requirement is excessive in regard to the uncertainties faced by undertakings. It should be suppressed.	E1	E1-3 - Resilience in relation to climate change	3.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	§24 a) adds a "shall" disclosure by requesting climate change mitigation actions by decarbonisation lever; this goes too far for operators. This decomposition should be suppressed.	E1	E1-5 - Actions and resources in relation to climate change	5.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	In regard to §26 c) companies remind that the European Commission committed to define by end of 2025 the meaning of "compatibility between companies'target and 1.5°C targets". Until such a definition is published, no obligations are legitimate on this issue.	E1	E1-6 - Targets related to climate change	6.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	Companies consider, in the case where disclosing an absolute emissions target would provide to competitors key sensitive information (i.e.: production forecasts) which are very sensitive, that they should be entitled to publish only a target expressed in intensity,. In this regard, a clarification that the "relief" mentioned in ESRS 1 §98 is effectively applicable for section E1-6 appears essential.	E1	E1-6 - Targets related to climate change	6.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	§24 c) adds a "shall" disclosure to indicate different CapEx and OpEx for 3 horizons: short term, medium term and long term; this is too prescriptive, gives rise to uncertainty and may be considered as misleading for the markets. Therefore, global information can be provided but only for significant amounts of CapEx/OpEx and without obligations of time horizon.	E1	E1-5 - Actions and resources in relation to climate change	5.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	AR13 to §26 introduced a new obligation in b): " The undertaking is to select a recent base year that does not precede the first reporting year of the new target by longer than three years". Companies question the need for such a new requirement.	E1	E1-6 - Targets related to climate change	6.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	In §29, a new obligation was inserted compared to "set1" to require the undertaking "to further disaggregate its total energy consumption from fossil" by categories. This goes too far in details and is not compatible with the simplification objective of ESRSs. Therefore, this new requirement should be suppressed.	E1	E1-7 - Energy consumption and mix	7.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	4 data points have turned to "shall" in §34; this goes too far and subparagraphs a) to d) should be transferred to NMIG.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	9.
Excels	Afep	Business association (other than association of financial institution)	France			I disagree	In §38, a new requirement has been inserted about: "the consistency of the prices used with the prices used in the financial statement for impairment tests". This goes too far in details and should be suppressed.	E1	E1-10 - Internal carbon pricing	10.
Excels	Afep	Business association (other than association of financial institution)	France			I partially agree and partially disagree	Option 2 must apply to §40, §41 and §42.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes the simplification and clarity provided on locked-in GHG emissions is explained, as well as the specification that only qualitative assessment is needed.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes summarizing and streamlining the former (a)-(j) under new DR 14(a).	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes the simplification and move from former AR to DR.	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes the simplification, notably renaming the chapter from IRO-1 to E1-2 as it caused confusion on where the information should be disclosed in the report, especially if it should go under General Information or ESRS E1 section. The new wording also clarifies the purpose of the required information.	E1	E1-2 - Climate-related risks and scenario analysis	16.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes the simplification, notably renaming the chapter from SBM-3 to E1-3 as it caused confusion on where the information should be disclosed in the report. The new wording also clarifies the purpose of the required information.	E1	E1-3 - Resilience in relation to climate change	20.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes the simplification and better distinction with previous chapter.	E1	E1-3 - Resilience in relation to climate change	21.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes the simplification that GDRs applicable to all material topics are in ESRS 2 and that GDRs are not repeated under the topical standard. GDR-P requirements are also simpler and more straightforward.	E1	E1-4 - Policies related to climate change	22.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes the simplification for the target chapter overall and GDR-T, having applicability included and 5-year steps deleted.	E1	E1-6 - Targets related to climate change	26.
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	Nokia welcomes the clarity on expectations, namely a summary with details in respective other chapters. However, duplicative information is now required and should be removed, e.g. (a) statement of GHG emission reduction targets being science-based which is also expected to be disclosed under E1-6 26(c). Additionally, the reliefs introduced in ESRS 2 - AR 17 should apply throughout the ESRS whenever discussing current or anticipated financial effects or metrics, notably on ESRS E1 - AR 2. A relief should also be introduced to reflect that public companies have restrictions on what kind of forward-looking information they are allowed to disclose and how such information should be published (e.g., in case future investment and plans that have not been announced yet in line with applicable financial regulations).	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	The term "resources" should be explained in the glossary and clarify what type of resources it relates to (e.g., people, financial, everything, etc.). With sector-specific ESRS being abandoned, sector-specific information should not be required. This requirement should be deleted. Overall, no additional disclosure requirements should be derived from the ARs.	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	This disclosure requirement should be further clarified, notably what "as of the reporting date" means in practice (e.g., is it expected that the company does the resilience analysis every year or considers major triggering events to update).	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I disagree	A new disclosure requirement on GHG emission specifications has been introduced in AR 26. This would require significant effort and resources to assess and evidence variations or lack of variations for all these categories. This disclosure requirement should be removed or made voluntary. Nokia calls for no additional disclosure requirements to be derived from the ARs.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I agree	Nokia welcomes the simplification.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (c)
Excels	Nokia	Preparer (non-financial preparing a sustainability report)	Finland			I partially agree and partially disagree	The proposed text is easier to read but additional clarity is needed: are the companies required to disclose if internal carbon pricing schemes are not in place? Disclosure requirements should be formulated such that companies can focus on relevant and material information, and only in very specific cases required to disclose if certain requirement is not applicable.	E1	E1-10 - Internal carbon pricing	38. (a)
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I partially agree and partially disagree	the initial datapoints requiring the perimeter and scope of consolidation, the subsidiairies, and the use of the option to omit specific information, have been replaced by a general compliance statement with ESRS 1, which is less useful to an external reader	ESRS2	ESRS 2 - BP-1 - Basis for the preparation of the sustainability statement	4. (a)
Excels	Group Caisse des Dépôts	Asset manager/Investor	France			I disagree	The requirement to disclose breakdown of revenues has been deleted, and the he ESRS sector classification system. This reduces comparability, and this sectoral iformation is crucial for stakedholders to undestrande business model, and IROs	ESRS2	ESRS 2 - SBM-1 - Strategy, business model and value chain	17. (b)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree Firstly, there is an inconsistency in language compared to ESRS E1, paragraph 17, using "climate-related physical risk" (17) and here "climate-related hazards" (18). Secondly, we find the disclosure requirements in ESRS-E1-18 and supplemented by the additional requirements in ESRS E1, paragraph 19, to go beyond what should be disclosed in an annual report (general purpose sustainability report). We believe the details illustrate the steps needed internally (and hence part of the internal documentation) but should not be a direct disclosure requirement. It is particularly the list in ESRS E1, paragraph 19, that triggers the unnecessary level of detail.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree As stated above, this should be removed as a disclosure requirement or at the very least refocussed together with (18) to provide a condensed and focussed reporting relevant for a general-purpose sustainability reporting	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree We would like to note that the requirement in ESRS E1, paragraph 24c, may be difficult to report on in practice. If a company is renovating a factory – and as part of this ensures that it can handle future climate risks, pollution requirements and reduce the water consumption – then it is very difficult to identify the specific elements of CAPEX/OPEX relating to climate change compared to the overall CAPEX/OPEX, as the climate change elements may just be a specification in the overall design. We suggest allowing for a qualitative description of the CapEX for the user to understand the current investments etc. rather than providing an arbitrary split. It should be noted that this is an additional requirement to the information required by EU Taxonomy and based on different allocation.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially disagree ESRS E1, paragraph 26a, requires “absolute” reduction targets. Many entities have SBTi approved “relative” reduction targets, and which is still in accordance with the SBTi standard. Therefore, entities should also be allowed to report their relative reduction targets. We suggest amending the paragraph to include both options as possible disclosure, i.e. requiring entities to choose one of them.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree ESRS E1, AR26, state the entities “shall” compare information required in DR26(c) to sector-specific or cross-sector emission pathway. ARs should not include disclosure requirements. We suggest the AR is changed from “shall” to a possible comparison without requiring such comparable. It should furthermore be considered moved to NMIG.	E1	E1-6 - Targets related to climate change	AR 16

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I partially agree and partially disagree	Partially agree We believe it is important that this amendment is further amended with a materiality threshold, as the biogenic emissions should only be required to be reported, if they are material. Not securing this will put an unnecessary reporting burden on the entities and will not provide decision useful information. We propose to amend to ESRS E1, paragraph 33, as a minimum with the inclusion of a 10% threshold inspired by the taxonomy reporting or at least with the inclusion of "material" (changes marked with capital letters: "33... The undertaking shall disclose its MATERIAL biogenic CO2 emissions from the compulsion or biodegrading of biomass separately from the emission scopes, IF THIS CONSTITUTES MORE THAN 10 % OF THE EMISSIONS." We also note that the reporting of biogenic emissions are currently not included in the proposed table in AR27.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We find only the exposure to physical risks at the reporting date has relevance to users. For this reason, we recommend that undertakings shall consider physical risks net of climate change adaptation actions concluded at the reporting date, i.e. only before planned and unfinished actions. This can be emphasized by adding the following text to the datapoint: '... before considering planned and unfinished climate adaptation actions at the reporting date.'	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We do not see the relevance of this datapoint. Assets addressed by mitigating actions are not exposed to material physical risks at the reporting date. If not removed, the datapoint should be limited to assets addressed by mitigating actions completed in the reporting period, i.e. excluding historical mitigation actions.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (c)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We do not see the relevance of disclosing revenue associated with assets for which the physical risks have been mitigated. Only net risk exposures are relevant to users. Hence, it should be limited to assets at material physical risks before planned and unfinished climate adaptation actions at the reporting date.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We support option 2 also for climate-related anticipated financial risks. Only transition risks net of climate change mitigation actions completed at the reporting date is relevant to users.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (a)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We do not see the relevance of this datapoint. If not removed, the datapoint should be limited to assets addressed by mitigation actions completed in the reporting period, i.e. excluding historical mitigation actions.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (b)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We find this datapoint onerous and resulting in overly granular disclosure of little relevance. If not removed, it should be limited to real estate assets exposed to material transitional risks, net of mitigation actions at the reporting date.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (c)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We find that 'potential liabilities' does not sufficiently delimit scenarios for what can be considered relevant to users. The datapoint should be limited to 'liabilities from anticipated financial effects'.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We find that 'potential stranded assets' does not sufficiently delimit the scenarios for what can be considered relevant to users. The datapoint should be limited to 'anticipated stranded assets'.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	Danish Industri	Business association (other than association of financial institution)	Denmark			I disagree	We support option 2 also for climate-related opportunities.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Proposed ESRS E1 refers toEU Climate Law specifically in relation to the undertaking's endeavours but only referenced it in the context of the standard as a whole in existing E1:2. If a non-EU undertaking was applying the standard on a voluntary basis how would it meet this requirement? Further consideration is needed (this would also apply to supplier payment, Gender pay gap as well).	E1	E1 - Objective	5.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to Glossary: 'Transition plan' and 'Transition plan for climate change' are included with different wording and there is no cross-reference or relationship between the two (one is described as a specific type of action plan and the other an aspect of an undertaking's overall strategy), Recommend that there is one term aligned to ISSB definition.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Transition plan publication - the drafting in paragraph 14 doesn't seem that clear that disclosure is only required when a plan has been put in place (we think it is clearer existing ESRS E1:14).	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The wording is inconsistent with the annex definition of transition plan for climate change. An aspect of an undertaking's overall strategy that lays out the undertaking's targets, actions and resources for its transition towards a lower--carbon economy, including actions such as reducing its GHG emissions with regard to the objective of limiting global warming to 1.5°C and climate neutrality.	E1	E1-1 - Transition plan for climate change mitigation	AR 1

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Transition plan sector specific metrics to track progress - it is unclear which sector specific metrics are referenced and how an undertaking would determine the appropriate metrics. For example, IFRS S1:48 uses principles-based language and provides guidance to determine industry-specific information. If reference to 'sector-specific' requirements is retained, the standards should explain what sector-specific means in this context and how it would determine what sources of guidance to apply.	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	The new paragraph is very unclear what the actual disclosure of the methodology should be (it includes a list of 'key elements' but does not specify what should be disclosed. It is also not clear what is expected by way of use of scenario analysis - in this para it states 'how the undertaking has used scenario analysis' but AR5 appears to require physical risk assessment to be supported by scenario analysis and transition risk requires use of at least one scenario in line with 1.5 degrees. Paragraph 21a appears to presume that scenario analysis has been performed as it refers to (21a) the effects identified in the climate-related scenario analysis).	E1	E1-1 - Transition plan for climate change mitigation	19.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	See entry for paragraph 19 above.	E1	E1-1 - Transition plan for climate change mitigation	21. (a)
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Clarify what 'significant categories' (Scope 3) means ensuring aligment with ISSB. Still remains unclear in the original ESRS and revised ESRS.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (c)
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	"When, due to specific facts and circumstances, the information reported in paragraph 32(a)(b) for the reporting undertaking (equivalent to the financial control organisational boundary) fails to convey a fair presentation of the emissions" This is not specific enough and may lead to judgemental debates with "operational control" which is not clearly defined. See our response in the survey to Q33 where we recommend alignment with GHGP and IFRS S2 as far as possible	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	This seems to be introducing a new option for companies not to have to use the most recent GWP values, which could create issues for alignment with ISSB and comparability between companies.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to NMIG 7: Incorporates 'shall' requirements that should be either removed or moved to the main body of E1.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to NMIG 9: It is not clear why guidance is included on GHG emissions intensity as this is not required in E1. It is an example where NMIG includes references to additional disclosures that 'may be' provided but which are not in fact required in the standard itself - in other words, this is not illustration to support required disclosures but additional information that is not asked for.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Existing ESRS - 34c It is unclear that there is a requirement to disclose a base year for targets - it is a didden requirement in AR13a: 'baseline value and base year are not to be changed unless changes in either the target or reporting boundary occur'. This arises from the deletion of text in ESRS E1: 26c, c. The requirement needs to be reinstated.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	34.
Excels	Deloitte	Auditor	Spain			I partially agree and partially disagree	Reference to Glossary: The definition provided seems to only be defining what an 'asset' is, but does not define when it shall be considered as 'stranded'.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL The section "objective" contains not only the objective but also clarification of the scope of the standard and the factors to be considered incl. drafting conventions (the latter does not fit to the headline "objective").	E1	E1 - Objective	1.
Excels	DRSC	(National) standard setter	Germany			I disagree	The "objectives" contents for both standards and disclosure requirements create problems on preparer's end: (1) References to many EU requirements increase complexity and uncertainty for preparers. Many require deletion of these references. (2) The objectives create a significant general uncertainty: Do preparers have to justify towards the auditors and, probably, the public audience in addition) that the disclosures made based on the single DRs and DPs result in the report to satisfy the objectives? Do preparers have to ensure this is the case? Or may a preparer assume that compliance with the DRs always result in the objective being satisified? (3) Each ESRSs objective contains the requirement "When only one of the sub-topics covered by this Standard is material ...". Since the subtopics in AR 16 (Delegated act) will not be mandatory anymore according to the ED ESRS, the references in para 3 are not consistent.	E1	E1 - Objective	1.
Excels	DRSC	(National) standard setter	Germany			I agree	The DR seems in general consistent with proposed amendments of SBTi Corporate Net-zero Standard 2.0 and with Transition Plan Taskforce Disclosure Framework (which is aligned with ISSB positions) The deletion of reference to the EU Taxonomy Regulation is supported. However, there are red flags and reservations regarding the details as set out below.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: The requirement seems an extension of Delegated Act: The description of “financial and investment planning” (ED) goes beyond “investments and funding” (DA) as the latter is a subset or part of the former. This is further confirmed by the wording “investment and financial planning (including the short- and medium-term financial and investment plan)” in AR 2(c).	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: The requirement seems an extension of Delegated Act: Disclosure of "quantitative short- and medium-term CapEx, and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges" The DP should be deleted. Furthermore, it is unclear why "long-term CapEx..." comes with the attribute "anticipated" because short- and mid-term CapEx" are "anticipated" as well as these are not reflected in current financial statements. This is true for most OpEx as well.	E1	E1-1 - Transition plan for climate change mitigation	AR 2

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	We believe, EFRAG should consider the Transition Plan Taskforce Disclosure Framework which (1) contains the following elements: "investment and disposal plan" and "planned sources to fund the plan" and (2) sets conditions on the disclosures: (a) to the extent the financial effects of its transition plan are separately identifiable, (b) information available to the entity at the reporting date without undue cost and effort, (c) approach that is commensurate with the skills, capabilities, and resources that are available to the entity for preparing those disclosures We further believe, that the NMIG might contain as a "may" guidance in line with the TPT Disclosure Framework.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	DRSC	(National) standard setter	Germany			I disagree	Even if scenario analyses are an important instrument for the effective assessment of opportunities and risks, the standard should make crystal clear that their use is not mandated, because it is still a highly complex exercise. To clarify this, it should first be stated whether scenario analyses were used.	E1	E1-2 - Climate-related risks and scenario analysis	
Excels	DRSC	(National) standard setter	Germany			I disagree	The requirement "base its analysis on at least one high-emission climate scenario" is not appropriate. E1 should refer to "a scenario based on scientific evidence which reflects the climate risk properly" (in this sense)	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: It is observed that the wording of this para indicates a net-perspective of reporting.	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	DRSC	(National) standard setter	Germany			I disagree	We have some doubts that this AR is needed. Perhaps a clarification in the main body might be sufficient that only a qualitative assessment of the exposure is required. Moreover, the wording regarding the anticipated financial effects has to be aligned. If Option 2 in ESRS 2 is adopted, a quantification will not be required.	E1	E1-2 - Climate-related risks and scenario analysis	AR 7
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: As this information is already required by IRO-1 and IRO-2, the wording of this para should be further streamlined. (The undertaking shall disaggregate the disclosures provided in accordance with ESRS 2 IRO-1 and IRO-2 into (a) climate-related hazards [...])	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	DRSC	(National) standard setter	Germany			I disagree	(1) We believe that disclosures on resilience should be adressed centrally in ESRS 2. (2) The issue is not mature enough to require these detailed specifications. There is no comparability of information on business resilience. E.g., the term "Resilience analysis" is not clear. Further, we see the risk of boilderplate disclosures. (3) The DR gives rise to diverse understanding of the content which will create high efforts for both preparers and auditors. We do not see simplification and streamlining here.	E1	E1-3 - Resilience in relation to climate change	
Excels	DRSC	(National) standard setter	Germany			I disagree	The wording "shall provide its climate resilience at the reporting date" creates confusion: (1) is not clear as to what it refers to, "process" or "outcome" (2) if "process" is meant: We fail to see the relevance of this information, (3) if "outcome" is meant: It seems conceptually understandable, but such a purely reporting date-specific statement only makes sense for individual locations or individual products/services/markets. When considering location, product, and service portfolios, however, a date-specific assessment is not feasible. Furthermore, a historical analysis (which is what a reporting date analysis is) is questionable in the context of a strategically oriented disclosure such as E1-3. This will result in extensive discussions between undertakings and with auditors in this regard.	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: Re the wording "the effects of current and planned investments in climate mitigation, adaptation and transition opportunities on climate resilience enhancement": (1) requirement is not clear, (2) it seems as it is an extension of the requirements in the Delegated Act. It should deleted, already for this reason.	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	DRSC	(National) standard setter	Germany			I disagree	The standard should make crystal clear that (1) Breakdown of CapEx/OpEx per time buckets (time horizons) is not required, and (2) Breakdown of CapEx/OpEx per decarbonisation lever is not required, either.	E1	E1-5 - Actions and resources in relation to climate change	24.
Excels	DRSC	(National) standard setter	Germany			I disagree	This requirements seems an extension of the existing requirements of the Delegated Act: The DR suggests a breakdown of "quantitative short- and medium-term CapEx and/or OpEx figures, as well as anticipated long-term CapEx and/or OpEx ranges." This should be deleted. See also our comments on AR 2(c)	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	DRSC	(National) standard setter	Germany			I agree	In general, the Disclosure requirement E1-6 aligns with SBTi to a great extent; however, some we see some issues as noted below.	E1	E1-6 - Targets related to climate change	25.
Excels	DRSC	(National) standard setter	Germany			I disagree	This requirement is too granular. Undertakings should be granted flexibility how to set the basis for their targets. In addition, the requirement as proposed does not fit to many business activities, such as activities that involve huge assets such as power plants or combustion plants, because changes for assets can take up to 10 years from planning, permit, construction to operations. It should be allowed to take a individual appropriate base year for the undertaking. Recommendation: Delete 13b. Any guidance should be located in the NMIG if ever. Such guidance should not include precise time periods (such as "three years") but should recommend using scientific knowledge on how to set targets and to select base years. SBTi might be named as source of such scientific literature.	E1	E1-6 - Targets related to climate change	AR 13
Excels	DRSC	(National) standard setter	Germany			I disagree	The term "key change" is not defined. The standard should make clear (1) that "key change" means "significant", and (2) that this assessment of significance is up to the undertaking. E.g. (around these lines), "The undertaking may decide on changes in the reporting boundary, e.g., because of mergers and acquisitions, or changes in the target. If the undertaking concludes that these changes are significant they should be reflected in the baseline value or base year."	E1	E1-6 - Targets related to climate change	AR 13
Excels	DRSC	(National) standard setter	Germany			I disagree	(1) The DR should make crystal clear that the undertaking is not required to choose one of both alternatives mentioned in this paragraph to present its GHG reduction targets. In practice further ways and less granular presentation were applied for the 2024 reporting. (2) Examples should rather be adressed as "may" guidance in the NMIG.	E1	E1-6 - Targets related to climate change	14.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	DRSC	(National) standard setter	Germany			I disagree	The breakdown of GHG-Targets in Scope 1, 2, 3 should not be required as many undertakings are not setting targets in this way. E1 should require presentation of targets as the undertaking's management has set these (management approach). --> See also AR 16	E1	E1-6 - Targets related to climate change	26.
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: This DR seems to include an extension of the Delegated Act where the scope of this DR is limited to high climate impact sectors. We note the reasons mentioned in the BfC (paras 257 and 128) for changing this. However, this datapoint should either be deleted or limited in scope as in the Delegated Act.	E1	E1-7 - Energy consumption and mix	29.
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: As practitioners report extensive discussions with auditors about whether a disclosure in millions is possible here, it should be clarified (probably at a central location in ESRS 1) that "millions" is allowed, too. (see also the DRSC suggestion to include a paragraph in ESRS 1 preparation... that allows undertakings to choose for each metric the units that are most meaningful)	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	DRSC	(National) standard setter	Germany			I disagree	seperate presentation of GHG Scope 1 emissions from regulated ETS should be limited to EU-ETS. Without this limitation, the exercise is far to complex to comply with.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	The requirement to present biogenic emissions seperately should - if ever - refer to Scope 1 (delegated act), only, but not to "all scopes". In addition, the requirement should apply to "material" biogenic emissions which is not the case in the ED	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	DRSC	(National) standard setter	Germany			I disagree	ESRS should consistently address the financial control approach. However, we concede that the operational control approach might be relevant for a few undertakings, ESRS should refer to the GHGP (as in AR 18, Ar 19, AR 21). AR 19 should only refer to the GHGP, the other text should be deleted.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	DRSC	(National) standard setter	Germany			I disagree	Joint operations: The reference to financial risk and rewards should be deleted as this concept (1) has become obsolete in IFRS Accounting Standards, and (2) is not the basis for consolidation in every national GAAP. An alternative wording could be: "on the basis of the share the undertaking has in these assets and liabilities in its financial statements" If this wording stems from the GHGP, ESRS E1 should contain a list of aspects where the standard deviates from the GHGP.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 20
Excels	DRSC	(National) standard setter	Germany			I disagree	The undertaking shall consider the GHGP when preparing the information on GHG-Emissions. However, it remains unclear how to consider optional Scope 3 sub-categories or exemptions provided in GHGP. As an example, GHGP allows to not report scope 3.10 emissions if the company is unable to estimate the emissions as the processing of the products is unknown. It is unclear whether these exemptions can also be applied under ESRS or not (given ESRS E1.78). ESRS E1 should contain a list of aspects where the standard deviates from the GHGP.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	21. (a)
Excels	DRSC	(National) standard setter	Germany			I disagree	The leasing exemption of ESRS 1 might result in contradictions to the requirement to "consider the GHGP Corp Standard... when preparing the information for reporting GHG emissions". This is the case for operate lease arrangements. If this is intended, it should be crystal clear that this is the case. According to Table [A.1] of the GHGP the lessee does not have ownership or financial control. According to certain local GAAPs the lessee does not recognise an asset on balance (other than in IFRS financial statements). Therefore, the GHGP requires emissions associated with the use of the leased assets to classify as scope 3 emissions of the lessee. The ERSR 1 leasing exemption will result in the lessee to report scope 1 emissions. The same problem arises on the end of the lessor in case of an operate lease. ESRS E1 should contain a list of aspects where the standard deviates from the GHGP.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	8.
Excels	DRSC	(National) standard setter	Germany			I disagree	The requirement contradicts AR21(e) as biogenic emissions should be seperately presented (33) but AR21(e) requires to include them.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	DRSC	(National) standard setter	Germany			I disagree	Seperate presentation of GHG Scope 1 emissions from regulated ETS should be limited to EU-ETS. Without this limitation, the exercise is far too complex to comply with.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 23
Excels	DRSC	(National) standard setter	Germany			I disagree	The requirement is too granular and should be deleted. In addition, Scope 3 emissions are not directly measured. Even many scope 1 emissions are calculated, e.g. by using emission factors for fuels.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: The wording "activity data" is misleading in this context. It shoud read "on the basis of current data", instead. In addition, as the term "GHG inventory" might be misunderstood, it should be explained in the glossary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: This seems an extension of the Delegated Act: "the assumptions regarding permanence".	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (c)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: Many undertakings have carbon pricing schemes in place for decision-making, applying either several prices per tonne or variable prices per tonne. Thus, there might be more than just "one carbon price", the wording should be adjusted to read "how the entity is applying carbon pricing in decision-making".	E1	E1-10 - Internal carbon pricing	38. (a)
Excels	DRSC	(National) standard setter	Germany			I partially agree and partially disagree	EDITORIAL: For the reasons mentioned in our remark on 38(a), the requirement should be reworded to say "the pricing per metric tonne..."	E1	E1-10 - Internal carbon pricing	38. (b)
Excels	DRSC	(National) standard setter	Germany			I disagree	RED FLAG: E1-11 does not constitute a simplification for anticipated financial effects as, for example, it still refers to “monetary amount and percentage of assets”, “monetary amount and percentage of revenue”. As we strongly support Option 2 as mentioned in draft ESRS 2, we propose to design this DR as a "may" disclosure. An example for the wording could be: "If the undertaking discloses quantified anticipated financial effects it may include (a) the monetary amount and percentage of assets at material physical risk ..."	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	39.
Excels	DRSC	(National) standard setter	Germany			I disagree	Requirement on "location of key assets at material physical risks" results in unnecessarily detailed reporting, as depending on the sector, this could involve a large number of locations in all regions of the world. As an example, logistic sector undertakings have much more sites than heavy industry.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In our view, it does not appear fully effective to request the same information regarding the reporting of the transition plan in both E1-1 and E1-5. E1-1 §14 (a) refers to the key features to be disclosed in relation to the transition plan, such as decarbonisation levers, key actions and financial and investment planning. The same topics, however, are also requested in E1-5 §24 (a) and (c). In addition, E1-1 §14 (d) requires disclosure of progress in relation to the transition plan, while E1-5 §24 (b) requests disclosure of expected and achieved GHG emission reductions, which in our view appears to be overlapping as well. While AR 2 for para. 14 (a) notes that a coherent narrative should be provided "without necessarily duplicating content", it remains unclear under which Disclosure Requirement the respective information is ultimately expected. A clearer delineation between the disclosure under E1-1 and E1-5 would help avoid potential redundancies and enhance consistency. We would therefore recommend clarifying in E1-1 that the disclosure is intended to provide a high-level description, without going into detail on key actions and financial planning, as these elements are intended to be addressed in more depth in E1-5.	E1	E1-1 - Transition plan for climate change mitigation	14 (a) and (d)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We would like to highlight potential challenges regarding the proposed requirement in ESRS E1 (as well as E1-5 (c)) to disclose detailed financial planning over the short- and medium-term, as well as investment plans and related CapEx and/or OpEx figures. Such disclosure would risk revealing sensitive strategic information and thus undermine companies' competitive position. Moreover, the draft standard does not clearly define which CapEx and OpEx figures should be included, making comparability across companies unrealistic. For large multinational groups it would be extremely difficult to aggregate consistent data across diverse business lines and geographies, while anticipated long-term planning is connected to a high level of uncertainty and would result in speculative and potentially misleading information. Finally, the requirement would impose a disproportionate administrative burden without providing a clear benefit to stakeholders. We therefore recommend limiting this disclosure to qualitative descriptions and high-level indications of financial implications, while avoiding prescriptive requirements for detailed financial forecasts.	E1	E1-1 - Transition plan for climate change mitigation	AR 2 for para. 14(a)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	In our view, it does not appear fully effective to request the same information regarding the reporting of the transition plan in both E1-1 and E1-5. E1-1 §14 (a) refers to the key features to be disclosed in relation to the transition plan, such as decarbonisation levers, key actions and financial and investment planning. The same topics, however, are also requested in E1-5 §24 (a) and (c). In addition, E1-1 §14 (d) requires disclosure of progress in relation to the transition plan, while E1-5 §24 (b) requests disclosure of expected and achieved GHG emission reductions, which in our view appears to be overlapping as well. While AR 2 for para. 14 (a) notes that a coherent narrative should be provided "without necessarily duplicating content", it remains unclear under which Disclosure Requirement the respective information is ultimately expected. A clearer delineation between the disclosure under E1-1 and E1-5 would help avoid potential redundancies and enhance consistency. We would therefore recommend clarifying in E1-1 that the disclosure is intended to provide a high-level description, without going into detail on key actions and financial planning, as these elements are intended to be addressed in more depth in E1-5.	E1	E1-5 - Actions and resources in relation to climate change	24(c)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	We would suggest including this Application Requirement in the NMIG, as it is only a "may" requirement and therefore not mandatory. To avoid confusion regarding the mandatory Disclosure Requirements, we believe it is misplaced in its current location.	E1	E1-6 - Targets related to climate change	AR 14 for para. 25
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	The Exposure Draft allows GHG emission reduction targets to be presented in a combined manner. However, in cases where combined targets are disclosed, it requires undertakings to indicate the share related to each respective GHG emission Scope. In practice, we think that this requirement is problematic for several reasons: -Decarbonization levers impact multiple scopes simultaneously, making a reliable split by scope unrealistic. -Holistic impact of reduction measures: Large multinational groups with decentralized structures implement decarbonization programs across various business units and geographies. These programs are designed to achieve overall reductions in GHG emissions, not to optimize reductions in a specific scope. Requiring a scope-by-scope allocation risks introducing artificial splits that do not reflect the actual management approach -Complexity and inconsistency risk: Estimating scope-specific shares would require assumptions, undermining comparability and reliability. -Existing disclosures already ensure clarity, as companies must specify which Scopes are covered by the target. We therefore propose deleting the wording "and the share related to each respective GHG emission scope" in §26(a), to keep the requirement both meaningful and feasible	E1	E1-6 - Targets related to climate change	26(a)
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	We would like to raise concerns regarding the interpretation of AR 15 for para. 26 (GHG emissions reduction targets compatible with 1.5°C). AR 15 refers to companies applying the operational control boundary under E1-8. Yet the revised E1-8 requires the financial control boundary as the default, with operational control disclosure only where needed to avoid unfair presentation of Scope 1 and Scope 2 emissions. In general, target setting is only meaningful when based on operational control. Setting targets for leased assets (for Scopes 1 and 2) is not practical if there is no ability to influence emissions in these areas. We therefore request that the option to apply the operational control approach also be made available for E1-8, as is the case for all other Disclosure Requirements (see also comments below).	E1	E1-6 - Targets related to climate change	AR 15 for para. 26

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	ESRS 1, paragraph 70, clarifies that impacts, risks, and opportunities from a leased asset do not depend on legal ownership: the lessee reports impacts and related risks during the lease period, while the lessor reports them as part of its downstream value chain. This aligns with the operational control approach. However, E1-8 undermines this clarification by permitting operational control for all impacts except GHG emissions, where financial control is mandatory. This distinction is inconsistent with ESRS 1, creating avoidable ambiguity as reporting boundaries differ without justification. We therefore request that the operational control approach be permitted for GHG emissions, contrary to the current provision in AR 19, to ensure coherence and consistency with ESRS 1 and the GHG Protocol. Auditors currently interpret ESRS 1, paragraph 70, as not applying to GHG emissions, yet EFRAG has clarified at outreach events that paragraph 70 should take precedence over AR 19. We kindly request this clarification be explicitly reflected in the standard to remove ambiguity and align reporting approaches across all impact categories.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR18 for para 32
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I partially agree and partially disagree	For the sake of clarity, we would recommend explicitly stating that the level of aggregation may, in accordance with [Draft] Amended ESRS 1, Chapter 3.7, be determined by the undertaking itself. Otherwise, we see a risk that this Application Requirement could be interpreted as imposing a requirement to disclose GHG emissions disaggregated by country, operating segment, economic activity, subsidiary, GHG, or source type in all cases.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26 for paras. 31 & 32
Excels	Insurance Europe and Insurance CFO Forum	Association of financial institutions	Belgium			I disagree	We would suggest including this Application Requirement in the NMIG, as it is only a "may" requirement and therefore not mandatory. To avoid confusion regarding the mandatory Disclosure Requirements, we believe it is misplaced in its current location	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27 for paras. 31 & 32
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Unclear whether included provision on EU Climate Law entails new requirements. Clarification also for audit process needed to avoid discussions.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Reduction targets, decarbonisation levers, key actions and the role of administrative, management and supervisory bodies are duplicated to paragraphs in E1-5, E1-6 and ESRS 2. This leads to additional work and complication even with clarification in new AR 2. Suggestion: Deletion of the requirements in the Transition Plan and additions in the named paragraphs.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The requirement on the qualitative assessment on locked-in GHG emissions from key assets and poducts is unclear and not comparable. The recording of locked-in GHG emissions is time-consuming and generates little added value. A qualitative assessment is not comparable between companies. It is unclear what counts as key assets and products. Proposal: Deletion of the paragraph, as it offers no added value and generates a lot of effort.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The alignment regarding the 1.5°C target has shifted from specific taregts to a broader focus on strategy and business models. This change introduces additional effort and complexity, as the terms "strategy" and "business model" are inherently flexible and open to interpretation. This flexibility allows for extensive discussions with auditors, but it does not provide any added value compared to the previous target-oriented approach. The taregts were integral to the strategy and were already aligned with the business model. Therefore, maintaining a clear focus on the alignment of targets is essential for effective alignment and implementation.	E1	E1-1 - Transition plan for climate change mitigation	AR 1
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	AR 2: See consultation E1-14.a. AR 2(a): AR 2.b: It is not clear why the requirement was moved to ARs. Complicates the reading of the standard, as it is a mandatory specification. AR 2.c: Some of the disclosures expected by the ESRS cover sensitive information from a strategic perspective, disclosure of which could be used to their disadvantage by non-EU competitors of EU issuers that are under no such transparency obligations. The current wording of the exemption for disclosure of sensitive information should be revisited as it is currently too stringent to be used to safeguard business secrecy, especially in an international business environment that risks becoming even tenser. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer. All data points regarding significant CapEx and OpEx amounts should be deleted. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer. New Wording "While this information helps demonstrate the coherence and credibility of the transition plan, there is no expectation that the undertaking disclose all internal information used to manage the plan." is not solving that above named issue.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The requirment "explanation of the plans to manage – e.g. by transforming, decommissioning or phasing out – its GHG-intensive and energy-intensive assets and products." went from voluntary to mandatory. Additionally mandatory reporting requirements were added regarding "dependencies of future financial resources and other resources and how these may constrain the ability to implement the transition plan actions." This results in additional work to fulfill the reporting requirements. Proposal: Change to voluntary disclosures.	E1	E1-1 - Transition plan for climate change mitigation	AR 3
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Additional shall requirement to resources and actions taken imprecise. Generates high coordination efforts. Achieved and expected GHG emissions are metrics. These should not be in ARs. The inclusion of a shall statement on sector-specific standards also generates additional work in the survey. In addition, high coordination effort with the auditor due to lack of precision	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The disclosure requirement should be able to be fulfilled in the ESRS 2 section when describing material IROs. Otherwise it would be duplicated.	E1	E1-2 - Climate-related risks and scenario analysis	17.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The short-term period is limited to 1 year with reference to ESRS 1. It does not make sense to carry out a climate scenario analysis for the reporting year (physical and transitory risks), as various climate scenarios are unrealistic in one year. The short-term period should be removed from the disclosure requirement.	E1	E1-2 - Climate-related risks and scenario analysis	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The short-term period is limited to 1 year with reference to ESRS 1. It does not make sense to carry out a climate scenario analysis for the reporting year (physical and transitory risks), as various climate scenarios are unrealistic in one year. The short-term period should be removed from the disclosure requirement	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The disclosure of the entire evaluation of the resilience analysis is unrealistic, as it involves far-reaching confidential documents. Companies may experience competitive disadvantages as a result of disclosure	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Additional requirements that mean increased effort in carrying out the resilience analysis and providing evidence.	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The information on achieved and expected GHG emissions should already be provided as part of the Transition Plan, AR 4. Duplication should be omitted. Reporting on actions and resources should be raised to the levers level for achieved and expected GHG emission reductions and quantative short and medium-term CapEx and/or OpEx figures at the level level should be made coluntary as this gets into competitive information like product plans.	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Some of the disclosures expected by the ESRS cover sensitive information from a strategic perspective, disclosure of which could be used to their disadvantage by non-EU competitors of EU issuers that are under no such transparency obligations. The current wording of the exemption for disclosure of sensitive information should be revisited as it is currently too stringent to be used to safeguard business secrecy, especially in an international business environment that risks becoming even tenser. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer. All data points regarding significant CapEx and OpEx amounts should be deleted. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Absolute targets can mislead as they limit economic growth or reward market failure even for less CO2 intensive businesses. The disclosure of intensity/relative targets and the additional disclosure of the associated absolute values for the target year and the interim target year(s) means that companies must disclose the planned volume growth. This represents highly sensitive information and results in a competitive disadvantage and cannot be published. The current flexibilization of the requirement therefore does not represent the desired simplification. It should be possible to report intensity/relative targets without absolute values and also to prioritize intensity/relative targets over absolute targets.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	"In cases where the undertaking has only set a GHG intensity reduction target, it shall nevertheless disclose the associated absolute values for the target year and interim target year(s)." This requirement forces companies to disclose the planned volume growth. This puts them at a massive competitive disadvantage and cannot be published in this way.	E1	E1-6 - Targets related to climate change	AR 12
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Share of energy from nuclear sources in electricity mix should be deleted to avoid „duplication" with primary energy; little usefulness as metric is derived from statistical data only; share of nuclear energy in the electricity mix should not be part of reporting.	E1	E1-7 - Energy consumption and mix	28. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It should be kept as no additional burden for disclosing companies; Removal of disclosure on total emissions appears illogical, as both users and disclosers are likely to want to see this information published. Even though it can be calculated independently, the lack of a requirement may lead to unnecessary discussions about whether it can be provided as a voluntary additional disclosure.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	36.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The introduced separate disclosure following the operational control approach allows for significant interpretation and is hence burdensome when aligning with auditors. EFRAG should make it clearer, that this is a "may"-disclosure.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	AR 26 in reference to ESRS 1 3.7 may result in a high number of new datapoints depending on its interpretation by auditors. EFRAG should clearly state that the disaggregation of data is voluntary ("may…") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload and unjustified burdens for the disclosing company (information may not be available or only with high effort).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	We welcome the revisions especially in AR 25 (d); but the disclosure required in AR 25 (g) should be deleted as Cloud computing is only rented through the user company (Scope 3) but already disclosed by the provider (Scope 1) which leads to double counting and high efforts for verification	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We welcome the revisions regarding the table to report on emissions and the flexibilities it allows in presenting the information.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Failure to achieve the general objective of reducing disclosure requirements. This information has not only been moved, but has been changed from may to shall. We see no added value for external readers in this information.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (d)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We believe that disclosing the monetary and percentage exposure to physical risks without considering adaptation measures is problematic. It involves high uncertainty, may overestimate risks, and could discourage proactive resilience efforts. Disclosures should account for adaptation actions to reflect a more accurate risk picture and encourage companies to invest in climate resilience.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	In many cases, adaptation measures cannot reliably be directly linked to specific assets. Doing so would require enormous effort or result in imprecise data that offers little value. Therefore, a one-to-one attribution is neither practical nor feasible.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We believe it is nearly impossible to reliably calculate the monetary amount and percentage of net revenue at risk from physical climate impacts before considering adaptation measures. The complexity arises from the high uncertainty of climate projections, the difficulty in quantifying future physical damages, and the challenge in accurately modeling how risks will evolve over time. Additionally, the lack of standardized methodologies and reliable data further complicates such estimations.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	It is recommended to change this to voluntary disclosure. A new requirement introduces potential complexity by mandating that companies "shall" also report emissions using the "operational control" method if the financial control approach fails to provide a fair presentation. This adds ambiguity and should be an optional ("may") disclosure rather than a mandatory one.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We believe that estimating the monetary and percentage impact on net revenue from transitional risks before considering mitigation and adaptation measures is highly challenging. Given the high uncertainty surrounding future policy changes, technological developments, and market shifts, it is more meaningful to incorporate measures into the assessment. Disclosing risks without accounting for planned actions may be misleading and fail to provide an accurate picture of the true risk exposure.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	In many cases, adaptation measures cannot reliably be directly linked to specific assets. Doing so would require enormous effort or result in imprecise data that offers little value. Therefore, a one-to-one attribution is neither practical nor feasible.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (b)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We believe that providing a detailed breakdown of the carrying amount of real estate assets used as loan collateral by energy-efficiency classes is challenging and may not be practical. Such detailed classification requires extensive data collection and consistent assessment methods, which can be resource-intensive and may result in inconsistent or unreliable information.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (c)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We believe that identifying potential liabilities from climate transition risks that do not meet current recognition criteria is challenging due to inherent uncertainties. Such liabilities depend on future developments and may not be reliably quantifiable or recognizeable in the financial statements at this stage.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The lack of precise data, the variability of future scenarios, and the difficulty in accurately predicting asset devaluation make such disclosures unreliable and potentially misleading. Therefore, BMW opts not to implement or publish such estimates.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	From our perspective, removing the intensity metric makes sense because the metric involved additional effort, and the comparability of the metric with other companies was not guaranteed.	E1	E1-7 - Energy consumption and mix	27.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	Such estimates are highly challenging because opportunities related to the transition are difficult to quantify accurately. Additionally, due to competitive reasons, we would prefer not to disclose such figures, as they could reveal strategic information and be misinterpreted.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We consider the prescribed calculation approaches under AR 30—such as disclosing effects over different time horizons, including all asset types, and presenting energy efficiency classes—challenging to implement and potentially risky from a competitive perspective. Disclosing detailed, asset-specific data and estimates could reveal strategic information to competitors. High reporting burden on companies, high implementation costs.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We view the removal of the addition concerning high climate impact sectors as a positive step.	E1	E1-7 - Energy consumption and mix	29.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	We do not understand why the metric "Percentage of Scope 1 GHG emissions from regulated emission trading schemes" is being retained. We recommend removing the addendum to simplify reporting.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (a)
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	The idea and purpose of the information regarding "share and types of contractual instruments used to purchase energy" is unclear to us and should therefore be deleted or further specified.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	24.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirements regarding carbon credits. This leads to a simplification of reporting, while the most important information has still been retained.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I agree	We support the simplification of the requirements regarding Internal Carbon Pricing. This leads to a simplification of reporting, while the most important information has still been retained.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	38.
Excels	ACEA	Business association (other than association of financial institution)	Belgium			I disagree	It is recommend to change to voluntary disclosure to avoid subjective judgments, inconsistent reporting, and audit risks. The primary concern with financial disclosures is their relation to sensitive competitive information like future product plans. Regarding the new GHG boundary rule, the mandatory "shall" requirement introduces major complexity and confusion.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	For anticipated financial effects disclosures, it is critical that EFRAG releases guidance and methodology which clearly outlines how companies can quantitatively and qualitatively disclose these requirements.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	It is not clear whether biogenic emissions need to be separated between scope 1, 2 and 3 or combined. This should be clarified in the application requirement.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	There is no guidance readily available for biogenic emissions disclosed separately from scope 3. EFRAG should include this guidance in the non-mandatory implementation guidance.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	This disclosure has been amended to specify that it only applies to real estate assets used for loan collateral. The purpose of the disclosure is still unclear. We understand that the disclosure is requested by banks to comply with Regulation EU 2022/2453; however, the disclosure will not specify the exact bank that the asset relates to or the split between EU and Non-EU which is required for Regulation EU 2022/2453. It would make more sense for banks to request this information from companies when they enter into a loan collateral agreement rather than including this as a general disclosure. It shouldn't be included within the anticipated financial effects disclosure.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	It is positive that the disclosure requirement E1-1 16g was removed to state whether the undertaking is excluded from EU Paris aligned Benchmarks. In our report, we already state that our target's are aligned with the Paris Agreement, so this statement was redundant.	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The amendments increase interoperability with the ISSB which is positive.	E1	E1-3 - Resilience in relation to climate change	21.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	It makes sense the the proposal removes the requirement to update the base year after every 5 years as this did not align with SBTi and should be up to the discretion of the company.	E1	E1-6 - Targets related to climate change	25.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The amendment to include a definition for recognised quality standards is a positive amendment	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37. (b)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Reporting on carbon credits and removals is still relatively new for companies. EFRAG should include more guidance on how to disclose these reporting requirements including which format it should be in (e.g., a table).	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The amended disclosures for reporting on internal carbon pricing are more clear and concise than the current version.	E1	E1-10 - Internal carbon pricing	38.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	It is a positive amendment that the GHG intensity ratio was removed because net revenue is not necessarily a driver of GHG emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	It is a positive amendment that the Energy consummption intensity ratio was removed because net revenue is not necessarily a driver of fuel consumption.	E1	E1-7 - Energy consumption and mix	27.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	It is positive that the disclosure requirement to address whether specific policy matters have been addressed was removed. This allows companies to tailor their policies to their specific IROs.	E1	E1-4 - Policies related to climate change	22.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Scope should be much clearer. "This Standard covers DRs related but not limited to the seven Greenhouse Gases (GHG): carbon dioxide (CO2), methane (CH4), nitrous oxide (N2O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulphur hexafluoride (SF6) and nitrogen trifluoride (NF3). It also covers DRs on how the undertaking addresses its GHG emissions as well as the associated transition risks." should be a separate paragraph and no need to be duplicated in para 12a.	E1	E1 - Objective	5.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Reduction in unnecessary duplicate wording is welcomed but impact on reporting effort is not reduced as required disclosures are largely the same.	E1	E1 - Objective	9.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Continued lack of clarity on what "compatibility with 1.5 deg scenario" means.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Continued lack of sector specific guidance: Climate risks and impacts vary significantly across sectors. Spending the time on sector specific scenario requirements e.g. studies into which risks are generally material by sector or industry would be far better use of time than current attempts to "simplify".	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Objective is said to be simplified in the BfC but required disclosures are the same. This is misleading as to what is meant by simplification. If "simplification" in this disclosure requirement merely refers to consolidation of data points into one paragraph, this should be made clear so that there is no expectation that there is a reduction in disclosures and reporting effort.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Previous requirements re elements of transition plan to be disclosed, have been consolidated into one DR paragraph 14. However, out of 16 data points in existing standard, 14 still need to be disclosed i.e. minimal reduction in disclosures. BC states that there is a 53% reduction in datapoints – it is not clear how this has been calculated. Looks to be a reduction in words but not disclosure requirement. BfC states that this has resulted in a "principle-based approach" and "avoids unnecessary reporting burden" - not clear how this is the case when the same elements of the plan need to be disclosed.	E1	E1-1 - Transition plan for climate change mitigation	16.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Despite removing some detail required for scenario analysis disclosure, and reordering the sections to a better flow, scenario analysis requirement still not clear, and relevant disclosures across the different sections in E1 hard to follow.	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Reference to qualitative scenario analysis. Should it be qualitative or quantitative or doesn't matter?	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Requirements for scenario analysis in IFRS deleted from EFRAG e.g. time horizons. Should instead be aligned. Will need to disclose IFRS anyway.	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Removed disclosure of only significant capex and opex required for actions – refers to all capex and opex but not clear as ESRS 2 refers to significant financial resources.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	Not correct to say they're aligning with IFRS by mandating financial control. IFRS says to use GHG Protocol which allows operational control and equity share method, plus an assessment of economic substance over form. Have removed the operational control requirement i.e. reporting on JV emissions to the extent of operational control. This is necessary where it has been used before. Else the assessment of substance over form needs to be used. Proposed AR states that JV's are part of an entity's "own operations". "Own operations" is not defined (check?) so not clear what the implications are, without further context – suggest to either define own operations or don't refer to it, and instead refer to control only.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 20
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Removed requirement to report total GHG emissions: This implies that the key metrics are individual metrics of gross scope 1, 2 and 3. Not showing total emissions doesn't promote comparability with other organisations so not clear what EU is doing to advance reporting.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands				Still unclear as to how these are "metrics".	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands				Still unclear as to how these are "metrics".	E1	E1-10 - Internal carbon pricing	
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Requirement to disclose base year and base value indicated as being deleted to allow flexibility. However, this still seems to be an ESRS 2 requirement under MDR-T? Hence is not a deletion. Needs to be clarified. If not a deletion, should not be counted as a deleted disclosure requirement.	E1	E1-6 - Targets related to climate change	26.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I partially agree and partially disagree	Could you please provide more explaination on biogenic CO2 emissions?	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note a significant shift in the revised disclosure requirements—from previously focusing on the description of resilience analysis and its features (such as scope, methodology, and results) to now requiring granular disclosures on the strategy and business model, including how these need to adjust or adapt in response to climate-related risks and opportunities. While we support the intent to strengthen the link between climate resilience and strategic decision-making, this shift represents a material change in scope. It will require companies to develop more detailed internal processes to assess and articulate the implications of climate scenarios on their core business model and strategic direction.	E1	E1-3 - Resilience in relation to climate change	21.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We acknowledge that the amendment to paragraph 24(c) is intended to provide relief. However, we note that the revised wording now requires disclosure of all current and future financial resources allocated, whereas the previous version focused on significant monetary amounts. We are concerned that this change may unintentionally increase the reporting burden by requiring disclosure of non-material amounts, which may not meaningfully contribute to stakeholder understanding. To maintain proportionality and focus, we recommend reintroducing the term "significant" to ensure that disclosures remain material, decision-useful, and aligned with the principle of relevance.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note that the revised requirements now mandate all undertakings, regardless of sector, to disaggregate energy consumption from fossil sources by fuel category. Previously, this level of detail was only required for undertakings in high climate impact sectors. This change represents a significant increase in reporting burden for companies outside those sectors. For many, the granular breakdown by fuel type is not readily available and may require substantial effort to obtain or estimate, potentially compromising data reliability, while not providing material new information to users.	E1	E1-7 - Energy consumption and mix	38.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	The amendment introduces a mandatory requirement to disclose any reversals (in tCO_2eq) that may have occurred during the reporting period, decreasing the amount of CO_2 removed and stored accordingly. This was previously embedded in a voluntary application requirement and is now proposed as a mandatory datapoint. We do not agree with the shift to a mandatory requirement, as it increases the reporting burden without sufficient justification. The log of amendments only acknowledges the datapoint moved, without explaining the change from a voluntary to a mandatory requirement.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	In ESRS E1 - paragraph 36 we have found contradictory wording. It states "that it has financed or INTENDS to finance"..."if it has financed such projects". Suggest to streamline.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	The amendment introduces a requirement to disclose the monetary amount and percentage of revenue at material physical risk, now explicitly before considering climate change adaptation actions. This change aligns with IFRS S2 and may result in more extensive disclosures. While we acknowledge that this increases the reporting burden, we support the amendment as it improves interoperability with IFRS S2. In practice, undertakings likely already describe adaptation actions and their rationale, which inherently conveys the underlying risks.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note that AR30 has shifted from requiring an explanation of the calculation methodology used to mandating the adoption of specified calculation approaches. This change introduces stringent, prescriptive requirements that reduce flexibility and leave little room for materiality-based judgment. While standardization can enhance comparability, the new approach may not be proportionate for all undertakings, especially where certain inputs are immaterial or where alternative, well-established internal methods already provide reliable results.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note that the previous guidance under AR73 allowed for voluntary disclosure of stranded assets, with flexibility to express values as a range including a 1.5°C-aligned scenario. The revised requirement under DR41(f) now makes this disclosure mandatory, significantly increasing the reporting burden. While we support transparency on climate related financial risks, the shift from a voluntary to a prescriptive requirement—particularly with scenario-specific expectations—may be challenging to implement, especially where data availability and internal scenario capabilities are still developing.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note that the revised paragraph 42 now mandates disclosure of the amount and percentage of assets and revenue aligned with climate-related opportunities. This is a significant shift from the previous requirement, which focused on undertakings considering financial effects of opportunities—such as expected cost savings or market potential, without mandated disclosures on quantification. While we support increased transparency on climate-related opportunities, the new requirement introduces a substantial increase in reporting burden, particularly for companies in the early stages of opportunity identification or where financial quantification is not yet feasible. Determining precise financial alignment with opportunities often requires complex assumptions, forward-looking data, and cross-functional input, which may not be readily available or reliable. We recommend allowing for materiality-based application or phased implementation, and retaining the option for qualitative disclosures where quantitative data is not yet mature.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We note that AR2(c) has been significantly expanded. The previous requirement focused on an explanation and quantification of investments and funding, with reference to KPIs for taxonomy-aligned CapEx and, where relevant, CapEx plans. The revised version now mandates disclosure of quantitative short- and medium-term CapEx and OpEx figures, as well as anticipated long-term ranges. This shift introduces a more detailed and forward-looking reporting obligation, which may be difficult to substantiate with precision, especially for long-term projections. In addition, we face practical implementation challenges as investments planned for the purpose of climate change mitigation are hard to differentiate from investments made in overall product quality and efficiency, as in a truly integrated sustainability strategy, commercial and sustainable investments go hand in hand. It also increases the risk of legal exposure, as disclosing financial estimates over extended time horizons may be interpreted as commitments or forecasts, rather than indicative planning. Providing users with insight into how the transition plan links to EU Taxonomy reporting is sufficient in our view, complemented with the existing requirement irt the narrative on investment planning and financial resource allocation.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We disagree with the newly added disclosure requirements in AR4, which, when disclosing on progress in implementing the transition plan, now mandate detailed reporting on the deployment of resources, actions taken, GHG emission reductions achieved or expected, and the use of sector-specific metrics aligned with recognised decarbonisation standards. We believe the previous approach—allowing entities to explain progress in a flexible manner—better enabled companies to tailor disclosures to their specific context without imposing unnecessary burden. The new requirements risk becoming overly prescriptive, especially for entities not operating in sectors with well-established decarbonisation pathways or metrics.	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I agree	We support the ongoing efforts to better align the ESRS with the IFRS Sustainability Disclosure Standards, even where this leads to an increase in reporting burden. Such alignment enhances global consistency, improves comparability, and strengthens the overall credibility of sustainability disclosures. As an example [for internal review purposes]: we support the revised disclosure requirement in AR8, which asks undertakings performing a qualitative scenario analysis to consider the implications of assessments under DRs E1-2 and E1-11 for their strategy and business model, including required actions. While this may increase the effort required, we support the alignment with IFRS S2.22(a) and the interlinking of risk assessments across different sections of the standard. This integrated approach improves coherence and supports a more strategic understanding of climate resilience.	E1	E1-3 - Resilience in relation to climate change	AR 8
Excels	The Financial Executives Association (FEA)	Other - please specify (required)	Netherlands			I disagree	We do not support the requirement in AR25(g) to separately report GHG emissions from purchased cloud computing and data centre services as a subset of upstream purchased goods and services, if significant (previously: if material). We believe the disaggregation principles in ESRS 1 already provide sufficient guidance for identifying and reporting material disaggregated categories. This new requirement is overly prescriptive, and even for companies where these services are significant, they may still not represent the most material emission sources. We recommend maintaining flexibility and allowing undertakings to apply materiality and disaggregation principles as appropriate.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	25.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	General comments on the Chapter: Overall, there are numerous § with limited added value, such as §5 to §11	E1	E1 - Objective	1.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Dependencies are already included under risks. The mention of dependencies should be deleted.	E1	E1 - Objective	1.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	This DP is redundant with ESRS 2 §30	E1	E1 - Objective	9. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Part of this DP: "This Standard covers, but is not limited to, the seven GHGs: carbon dioxide (CO_2), methane (CH_4), nitrous oxide (N_2O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulphur hexafluoride (SF_6) and nitrogen trifluoride (NF_3)" is redundant with §5	E1	E1 - Interaction with other ESRS	12. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	The following item should be added after "the role of the administrative, management and supervisory bodies", add " and whether they approved the transition plan"	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	"and/or by providing validation through an independent third party, including information on the third party, the methodology/standard applied and the trajectory used". We do not agree with this aspect as we should not delegate the validation of the compatibility to an external body, raising significant issues on liabilities on the assessment of the compatibility, robustness of methodologies developped by unregulated actors (difference with auditors, or, in another field ESG scoring). Such a disclosure would remain possible as an entity specific disclosure.	E1	E1-1 - Transition plan for climate change mitigation	AR 2

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	ANC would favour a deletion of this datapoint as dependencies and locked-in emissions should be part of the explantion of the progress made in the following DP (§14d)	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	The classification between physical and transition risk is obvious and does not bring any added value, except interoperability with IFRS S2. It should be deleted.	E1	E1-2 - Climate-related risks and scenario analysis	17.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	The resilience analysis mixes elements related to both mitigation and adaptation. As a result, it significantly overlaps with information already provided on mitigation while offering limited additional insight compared to ESRS 2 SBM-3. EFRAG should avoid mixing adaptation and transition risks under resilience, as combining all climate risks will lead to overly generic information, whereas the focus should be on adaptation plans. Therefore, E1-3 should be refocused solely on adaptation. Proposed wording: "Disclosure Requirement E1-3 – Resilience in relation to climate change adaptation", "climate related risks" => "physical risks", deletion of mentions of transition plan, transition events (AR8), add in AR9 "The undertaking shall update the conclusions of its resilience analysis at least every three years or on the occurrence of significant changes since the last assessment in the external environment, individual circumstances or assessment process."	E1	E1-3 - Resilience in relation to climate change	21. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Add an AR to specify that financial institutions are not required to set target in absolute terms, but are allowed to set targets in physical intensity instead, with specific provisions for sectors subject to a phase-out target: "Financial institutions may instead disclose targets in terms of physical intensity value for each invested or financed sector for which it has set a target, and, for sectors subject to a phase-out target, the related financial exposure (portfolio gross carrying amount, underwriting or asset under management)."	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Delete "as well as which GHGs are covered": this brings no added value, except for the interoperability with IFRS S2	E1	E1-6 - Targets related to climate change	26. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Reference made to past reductions should be added and companies should be able to keep their current base year (delete reference to before 2030 as the 5 years period has been removed) => add a new AR, derived from former AR29 with simplified and clearer wording. "The reference target value is dependent on the base year and baseline emissions of the undertaking's GHG emission reduction target. As a result, the reference target value for undertakings with a recent base year or from higher baseline emissions may be less challenging to achieve than it will be for undertakings that have already taken ambitious past actions and achieved GHG emissions reductions. Therefore, undertakings that have in the past achieved GHG emissions reductions, may account for their past achieved GHG emissions reduction when determining the reference target value, provided that these past reductions meet the quality requirements of this standard"	E1	E1-6 - Targets related to climate change	AR 13
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Set 1 required disaggregation of energy consumption from fossil sources by type of fossil fuel only for companies operating in high-impact climate sectors. This datapoint has been expanded to all companies (now ESRS E1 §29), regardless of their activity or the relevance of such information to their sector. This requirement is probably not meaningful for all companies and could remain as in Set 1	E1	E1-7 - Energy consumption and mix	29. (a)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Idem, this DP should be applicable only to undertakings active in high impact climate sectors	E1	E1-7 - Energy consumption and mix	29. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Idem, this DP should be applicable only to undertakings active in high impact climate sectors	E1	E1-7 - Energy consumption and mix	29. (c)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Idem, this DP should be applicable only to undertakings active in high impact climate sectors	E1	E1-7 - Energy consumption and mix	29. (d)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	Idem, this DP should be applicable only to undertakings active in high impact climate sectors	E1	E1-7 - Energy consumption and mix	29. (e)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	The mention "if applicable" should be added as production of renewables and non renewables as a non core activity is rather rare.	E1	E1-7 - Energy consumption and mix	30.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	Market-based disclosure could be voluntary as undertakings purchasing green electricity will disclose it in any case. ISSB departs from the GHG Protocol (which imposes a double reporting on scope 2), requiring only location based with possibility to provide contextual information on any contractual instruments.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	There seems to be a contradiction between AR 21e and §33; do biogenic CO2 emissions need to be included or separated from the emissions scopes?	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	We note that the reference to net zero has been completely removed from the standard. This is regrettable, as prior to ESRS, there was a significant proliferation of net zero communications, each with varying levels of ambition. Such claims were also identified by ESMA in its greenwashing report as a prevalent issue. The inclusion of net zero in Set 1 provided a clear, uniform definition for all actors and led to substantial improvements in disclosure quality and better differentiation from neutrality claims. This concept and its definition should be maintained in the standard. Proposed wording • Add in glossary previous entry "Net-zero target" • Retain current Set 1 E1-7 §60 with clarifications regarding removals vs offsets: "In the case where the undertaking discloses a net-zero target in addition to the gross GHG emission reduction targets in accordance with Disclosure Requirement E1-6, it shall explain the scope, methodologies and frameworks applied and how the residual GHG emissions (after approximately 90-95% of GHG emission reduction with the possibility for justified sectoral variations in line with a recognised sectoral decarbonisation pathway) are intended to be neutralised by GHG removals."	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I partially agree and partially disagree	The corresponding volume of CO2e should be added as it is useful to understand the extend of the scheme.	E1	E1-10 - Internal carbon pricing	38. (b)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	This DP should be deleted the location of key assets at material physical risks will result in long list of locations and explanations are already required in §40e.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	§41f is redundant with §41a or at least a subset of 41a. These datapoints should be merged.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	"Shall consider disclosing opportunities" in Set 1 has been translated into "shall disclose amount and percentage of assets or revenue derived from its business activities aligned with climate-related opportunities, including the associated time horizons". Opportunities should not be mandatory.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.
Excels	Autorité des normes comptables (ANC)	(National) standard setter	France			I disagree	The requirement to disaggregate CapEx and OpEx by time horizon appears overly burdensome and may fail to reflect the specificities of implementation for each undertaking. Accordingly, we recommend that disclosures be limited to an aggregated amount of CapEx and OpEx, with information provided on a global basis rather than mandating a breakdown by time horizon.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The simplification of the requirements on transition plans is positive. The key features also provide needed clarity. However, the sentence 'how the undertaking's strategy and business model are compatible with the limiting global warming to 1.5°C' raises understandability and auditability questions as it is unclear what additional information is needed beyond the key features of the transition plan. We request EFRAG to clarify this requirement and its relation to AR 2, where compatibility of targets with 1.5 (rather than the wider compatibility of strategy and business model) is required. If the intent is that undertakings should disclose more than the key features of their transition plans, it should be made explicit. While we acknowledge the Level 1 discussions on compatibility, we encourage EFRAG to provide at least high-level guidance on elements that undertakings should consider when assessing compatibility with 1.5°C, until Level 1 regulation provides a more detailed definition. Finally, we recommend to retain the requirement in §16-i (Set 1) to indicate whether the transition plan is approved by administrative bodies. Its replacement by a description of their role weakens the strategic importance and credibility of the company's commitment to the Transition plan.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We see the inclusion of requirements on dependencies to be positive. We would encourage EFRAG to provide further guidance on how to assess dependencies (e.g. clarification on whether qualitative disclosures are sufficient, whether only key dependencies are to be disclosed or if they are required for all applicable levers disclosed). Moreover, we recommend that locked-in emissions continue to be reported on separately from dependencies, as dependencies represent conditions relied upon to implement the transition plan. The requirement for undertakings to explain their plan to manage locked-in emissions should also be retained (AR3-c in Set 1). Finally, we encourage EFRAG to provide clarifications in AR on what are key assets and products to be considered in this reporting (building on the existing guidance in AR3(a) from Set 1).	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The clarification of the requirements on the features of the transition plan on targets, actions and resources is seen as a positive clarification. We consider positive the fact that a third-party validation is now introduced. We suggest to include the same possibility to refer to third-party validation with respect to the targets DR (E1-6) for consistency and readability purposes (see comment on §26-e). We request EFRAG to make explicit the requirement that -transition plans shall cover Scope 1, 2 and 3 emissions from the group. -the coverage of the targets, actions and financial resources need to be consistent, and the time horizons of these elements also need to be consistent (including how the time horizons in E1-1 should be consistent with the time horizons considered in E1-5).	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	We encourage EFRAG to provide a clearer definition / scope of locked-in emissions (e.g. such as what is currently indicated in AR3(a-b) in Set 1). Also, the information on locked-in emissions should be clearly articulated with the definition of stranded assets in the glossary and the related disclosure requirement in §41-f (as the reference is not made).	E1	E1-1 - Transition plan for climate change mitigation	AR 3
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We agree with the requirement and clarity provided on which elements to report on the methodology. However, while the disclosure of spatial resolution for physical risks could add valuable detail, this new requirement does not contribute to the simplification efforts and may complicate reporting requirements. This could be particularly complex given that each climate scenario might have different attributes and be evaluated by multiple climate indicators (e.g. duration of heatwave, meters of flooding, duration drought), which have different spatial resolutions, especially when multiple geographies are assessed. If this information is deemed relevant for the stakeholders, we would suggest only disclosing the range of spatial resolutions (e.g., the spatial resolutions from the underlying climate data used in the exposure assessment of Risk XYZ ranged from 2m to 10km) as an indicator of the spatial uncertainty underlying the assessment. This could be integrated in paragraph ESRS E1 - 21. (b). We recommend EFRAG to consider removing this datapoint or making it voluntary in the NMIG to describe the applied methodology. In addition to the requirement to specify the type of transition events analyzed, we suggest also reporting the type of climate hazards analyzed.	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We suggest that EFRAG requires companies to specify which scenarios have been used when conducting their climate risk analysis (both for physical and transition risks) to increase comparability between undertakings, understandability and transparency for users. We encourage EFRAG to provide guidance on the climate scenario that can be used when considering at least one high-emission climate scenario in order to increase comparability (e.g. IPCC's SSP5-8.5).	E1	E1-2 - Climate-related risks and scenario analysis	AR 5

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We suggest that EFRAG keeps requiring companies to specify which scenarios have been used when conducting their climate risk analysis (both for physical and transition risks) to increase comparability between undertakings, understandability and transparency for users (current E1.AR13a, aligned with IFRS S2.22(b)i)1). We encourage EFRAG to provide guidance on the climate scenario that can be used when considering the climate scenario in line with limiting global warming to 1.5°C in order to increase comparability (e.g. IPCC's SSP1-1.9)	E1	E1-2 - Climate-related risks and scenario analysis	AR 6
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	Depending on the outcome of the consultation regarding the option to present anticipated financial effects, this AR may cause issues. We are in favor of quantitative disclosures (see answer to question 19 in Part 2). However, we are uncertain how this AR should be applied if Option 2 is adopted. Indeed, the requirement speaks of quantification of material climate related risks which would be optional under Option 2, therefore making this requirement obsolete. The wording shall be adapted based on the outcome of the publication consultation. We suggest EFRAG to delete this AR as it is confusing. Instead we suggest that clarity is provided in E1-11 regarding the relation between estimation of anticipated financial effects and the disclosures made under E1-2 and E1-3	E1	E1-2 - Climate-related risks and scenario analysis	AR 7
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The revised disclosure requirements removed the requirement to describe the exclusions from boundaries in the resilience analysis (previously covered in AR 6 from Set 1). We encourage EFRAG to reintroduce this requirement to provide clarity on the boundaries considered for the analysis, and whether these align with the boundaries of the scenario analysis conducted in E1-2. It would also align to IFRS S2.22b(i)7.	E1	E1-3 - Resilience in relation to climate change	21.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	It is unclear what is meant by combined assessments. We encourage EFRAG to speak of "assessments" or make explicit in E1-11 the fact that the resilience analysis is based on E1-2 and does not merely leverage on it.	E1	E1-3 - Resilience in relation to climate change	AR 8
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	Due to the wording of "the undertaking shall provide its assessment of its climate resilience at the reporting date", it can be read as requiring an annual update of the analysis. We suggest specifying that the resilience analysis does not need to be conducted on a yearly basis but shall be revised at regular intervals or whenever necessary due to specific facts and circumstances, such as changes in boundaries. The relation between the timings for the scenario analysis carried out in E1-2 and the resilience analysis in E1-3 should also be clarified.	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We recommend to retain an explicit reference to adaptation and mitigation actions in §23 (similar to §28 in Set 1) as the next §24 refers only to climate change mitigation actions . This clarification is needed to stress the relevance of adaptation actions (as highlighted in E1-3, paragraph 21 a), and the fact that they are as relevant as mitigation actions (specifically referred in §24).	E1	E1-5 - Actions and resources in relation to climate change	23.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The reference to nature-based solutions was removed from the disclosure requirement and not included under the new definition of decarbonization levers. EFRAG should clarify whether these can still be considered as decarbonization levers as they are key both from a mitigation and adaptation perspective.	E1	E1-5 - Actions and resources in relation to climate change	24. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I agree	The requirement does not clarify whether GHG emission reductions shall be disaggregated per decarbonization lever or per type of actions. Considering the relevance of such information, we recommend that such requirement be clarified to request this disaggregation.	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We disagree with the removal of disclosure requirements on connectivity with the financial statements. We strongly recommend that EFRAG retain the reconciliations required by Set 1. Moreover, we encourage EFRAG to clarify whether the CAPEX and OPEX shall be disclosed aggregated by type of lever or by action. Adding examples in NMIG could be useful. The revised ESRS requires disclosure of CAPEX and OPEX on explicit time horizons. However, it is not specified whether they should be consistent with the targets set and transition plan disclosures (e.g. should levers be mapped and presented in the transition plan until the target year selected?). We suggest that guidance is included. The NMIG4 clarifies that CAPEX and OPEX only need to be disclosed for key actions and only for significant amounts. We recommend EFRAG to clarify how this should be understood in relation to ESRS 2 paragraph 38 b) where it is expected that (all) financial resources are disclosed for key actions. When it comes to time horizons, NMIG4c) seems to contradict paragraph c) as it indicates that any planned future resources can be reported as ranges while the DR indicates that only long-term can be reported as ranges. This aspect should be clarified or harmonized.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Undertakings are no longer required to state the scope 2 method applied to their targets covering Scope 2 (currently required in Set 1 AR24), creating a risk of lack of comparability and transparency across undertakings. We encourage EFRAG to retain this information. The requirement to disclose the share of each scope is maintained which creates challenges for undertakings with combined targets. Such disaggregation is not required in recognized target setting frameworks or IFRS. We encourage EFRAG to remove this requirement, as it is not always practical to disaggregate combined targets, due to mixed effects (reducing scope 1 by electrification increases scope 2 emissions). Editorial comment: we suggest EFRAG to clarify how 26(a) applies for companies that have only set intensity GHG emission reduction targets. Based on AR 12, it is unclear whether 26(a) fully applies when only intensity targets have been set , including the coverage of the targets.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Under E1-1 AR 2, undertakings can explain the compatibility of their transition plan's targets with limiting global warming to 1.5°C in line with the Paris Agreement by providing validation through an independent third party. We recommend EFRAG to consider adding a similar simplification with reference to an independent third-party validation in this paragraph in E1-6 or related AR16. Additionally we suggest adding the same details about the nature and qualification of the third party validation body covered in AR2-a, especially information on the independent nature of the validation.	E1	E1-6 - Targets related to climate change	26. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We agree that absolute values (associated with intensity targets) shall be disclosed for non-financial undertakings as it increases transparency and comparability amongst undertakings. For financial institutions (such as banks, insurers, asset managers and asset owners), comments are provided in Part 2 question 26).	E1	E1-6 - Targets related to climate change	AR 12
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	AR 13 b is confusing. Indeed, in the first sentence, it is written that the base year should be selected from the three most recent reporting years. In the second sentence, it also states that before 2030 companies should consider existing base years or the first year of application of sustainability reporting. The 2 sentences seem to contradict one other, and it is unclear if the first sentence only applies after 2030, or if anything changes after 2030. We recommend EFRAG to clarify this statement and to keep only 2 of the criteria: 1) use of the currently applied base year for existing targets (even if potentially older than the 3 most recent years) and 2) use of a base year from the 3 most recent years of the new targets.	E1	E1-6 - Targets related to climate change	AR 13
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	The previous requirement to disclose decarbonization levers and their quantitative contribution to achieve targets was removed (previous AR 30). Instead, only AR 14 addresses this topic where a graph and table are shown and "may" be considered by undertakings to disclose this information. The fact that undertakings are not required to demonstrate how targets will be achieved will deteriorate the relevance and robustness of the disclosures on targets and transition plans. This AR should be modified to retain the current requirement to explain how the targets will be achieved in §34(f) of Set 1 (" the undertaking shall describe the expected decarbonisation levers and their overall quantitative contributions to achieve the GHG emission reduction targets") and AR 30 ("The undertaking shall present its GHG emission reduction targets together with its climate change mitigation actions (...)"). This does not prevent the use of either presentation options and therefore the option of using one or the other should be kept.	E1	E1-6 - Targets related to climate change	AR 14
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	E1-8 requires undertakings to prioritize financial control reporting and conditionally, based on specific facts and circumstances, also report emissions based on operational control to achieve fair presentation. (Note that we disagree with the proposed approach - please refer to comments made on E1-8). However, AR 15 seems to allow a choice to report targets based on operational control only. Is it the intent? We recommend that EFRAG clarifies this AR and its articulation with E1-8, and to require undertakings to disclose the boundaries on which targets were set, including whether prior targets were set using other consolidation approaches (e.g. operational control or prior ESRS approach/consolidation perimeter). Should the proposed approach in E1-8 on operational control be retained, EFRAG should clarify if setting targets based on operational control boundaries is a circumstance that should always lead to the additional reporting of GHG emissions based on operational control under E1-8 - AR 19 (which refer to 'specific facts and circumstances'). We also suggest EFRAG to clarify that targets based on operational control may also concern Scope 3 (as per requirement in paragraph 24 a).	E1	E1-6 - Targets related to climate change	AR 15
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Editorial comment : we recommend EFRAG to remove the reference to "if it has Scope 3 GHG emissions reduction targets" as it is contradictory to E1-6 26 a) where it is required that undertakings that have set GHG targets cover Scope 1, 2 and 3. The AR should read as follows "For this purpose, the undertaking shall calculate a 1.5°C-aligned reference target value for Scope 1 and 2, and a separate one for Scope 3, against which its own GHG emission reduction targets or interim targets in the respective Scopes can be compared."	E1	E1-6 - Targets related to climate change	AR 16
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We ask EFRAG to include in the standard the guidance provided in EFRAG ID 36 on how to report nuclear emissions should this datapoint be kept.	E1	E1-7 - Energy consumption and mix	28. (b)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We ask EFRAG to clarify AR 17(a) in relation to the organizational boundaries considered in E1-8. It is unclear how the concept of 'same organizational boundary perimeter applied for reporting GHG Scopes 1 and 2 emissions' should be applied due to the mandatory reporting boundary based on financial control and the additional conditional boundary based on operational control. This could be interpreted as either referring to financial control only (the default approach), or, potentially, requiring a double reporting of energy consumption (if such double reporting is required for GHG reporting based on the fair presentation concept), which would go against the principle of simplification. We also ask EFRAG to revise AR 17(j) to allow undertakings to consider as "renewable" the renewable energy in a residual mix. The current wording creates difficulties for reporting and audit, and potential misalignment between E1-7 reporting and Scope 2 reporting.	E1	E1-7 - Energy consumption and mix	AR 17
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We suggest that NMIG 9 in relation to paragraph 32 is revised. It is mentioned "gross GHG emissions intensity (per unit of products and/or services)" and then "this can be expressed on the basis of production, net revenue or another relevant business metric". If net revenue can be used to express emissions intensity , we suggest to delete the "per unit of products and/or services" in the first bracket (that doesn't specify revenue, which is misleading).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We encourage EFRAG to retain the specification that disclosure of biogenic emissions should be made separately and for each scope (rather than as one line item for total biogenic emissions for all scopes) for increased understandability as currently required in AR 43-c, AR 45-e and AR 46-j from Set 1.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	We do not support the proposed approach. We recommend to leave the choice of approach in line with the GHG Protocol and IFRS S2. Forcing a different approach creates undue restrictions and interoperability challenges for companies, especially for those with longstanding commitments on targets set under operational control, which is most widely used. Changing the approach may lead to shift of emissions from Scope 1/2 to Scope 3, reducing incentive and ambition to manage these emissions. Also, the claim that financial consolidation is in line with the financial control approach of the GHGP is inaccurate. In the financial statements, joint ventures are accounted for at equity share. That is not equivalent to the financial control approach of the GHGP, where the relative share in the JV is accounted under Scope 1 and 2. The treatment of leased assets in ESRS 1 paragraph 70 also diverges from the GHG Protocol, leading to interoperability issues as this means that an hybrid approach of financial and operational control is proposed. Lastly, we recommend EFRAG to refer back to ESRS 1 Chapter 5 instead of paragraph 59 so that it is clear that the reporting in paragraph 32 includes the value chain.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	As mentioned, we do not support financial control as a default approach. Also requiring companies to conduct an additional separate reporting of GHG emissions under operational control increases the complexity of calculations and reporting to an unreasonable extent: company would need to report four separate values for scope 2 (market based and location based both on operational and financial control). This goes against the principle of simplifying the reporting. Moreover, the criteria for when a company must disclose under operational control are too vague and require clearer definition of what fair presentation in the context of GHG emissions entails. AR 15 seems to imply that having targets set under operational control leads to reporting under operational control and meets the criteria of 'specific facts and circumstances'. If so, this should be specified. If the requirement in AR19 is retained, it should also cover scope 3 for consistency purposes. Finally, we recommend to provide additional guidance on the assessment of operational control (e.g. criteria and factors to consider). NMIG 7 can be interpreted as too restrictive. Also, we note that it includes a requirement relating to part time control which should be in the AR.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	The reporting requirement may be misinterpreted as not being GAAP agnostic. We recommend to clarify that this paragraph addresses situations where, based on applicable GAAP, joint operations are on balance sheet. Otherwise, a definition of joint operations and how they differ from joint ventures should be included in the glossary. Also, this AR seems to indicate that accounting of emissions from joint operations differs from what is expected from the GHG protocol when applying financial control (where JV, joint operations, partnerships are accounted on the basis of equity share of emissions). If this is the case, and in addition to joint operations, other differences between the concept of financial control in the revised standard and the financial control approach of the GHG Protocol should be clarified and clearly identified. There seems to be a typo in NMIG 7 which refers to AR 20 (joint operations in financial control approach) whereas this NMIG relates to entities operationally controlled (covered in AR19). Or is this NMIG meant to introduce an alternative treatment for JOs by considering operational control (reintroducing additive approach ?). We recommend EFRAG to clarify.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 20
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We suggest simplifying AR 21c to "If emission factors based on older GWP values are the most suitable or available, the undertaking can use these and explain which GWPs the GHG inventory is based on". We encourage EFRAG to make AR 21 (e) a separate AR to address paragraph 33 reporting requirements on biogenic emissions, in order to make it clear that these shall be reported separately for all Scopes (1, 2 and 3) and not only for Scope 1 (no other AR provides instructions on how to account for biogenic emissions for Scope 2 and 3), as was the case in AR 43-c, AR 45-e and AR 46-j in Set 1.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 21
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	The phrase "The EU ETS methodology may also be applied to activities in geographies and sectors that are not covered by the EU ETS" may lead to operational questions. This is because on topics such as use of biofuel certificates for Scope 1, the EU ETS may have a different approach to that retained by the GHG Protocol or widely applied frameworks such as SBTi. This creates interoperability challenges. We encourage to clarify what can be expected from this reference and criteria to consider when applying EU ETS methodology outside of activities concerned by EU ETS. It is also unclear whether this sentence means that EU ETS methodology may be applied (in geographies and sectors not covered by EU ETS) for undertakings with at least one EU ETS installation or also to undertakings with no EU ETS installation at all.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 22
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We suggest adding in NMIG the precisions in the previous AR 43a in Set 1 on the identification of Scope 1 sources (stationary combustion, mobile combustion, process emissions and fugitive emissions) to guide first time reporting companies.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 23
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We encourage EFRAG to specify the requirement in AR 24 b) to "reflect the share and types of contractual instruments" or consider removing the requirement. The requirement should be made on the basis of energy consumption and not on the basis of emissions. Thus, we question its placement in E1-8 instead of E1-7. Having examples of ways to report this information would be useful to understand what share and types of instruments may be considered when disaggregating the energy consumption. We suggest to include those examples (including specific reference to PPA, GOO, etc) in NMIG 8 where contractual instruments are further explained.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 24

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We consider positive the modification from EFRAG to indicate that undertakings shall adopt the calculation approaches of the GHG Protocol. We encourage EFRAG to modify this AR on the following: - AR 25a EFRAG should clarify that companies should include optional reporting boundaries from the GHG Protocol based on materiality, - Clarify whether Scope 3 of investments ("scope 3 of scope 3") needs to be included in category 15, like in IFRS S2 requirements on financed emissions. This AR should retain the previous requirement to justify any exclusions from Scope 3 inventory (previous AR 46 i) as this is a key information in terms of transparency.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We encourage EFRAG to make the reporting table mandatory for comparability of reporting and ease of reading by users of the sustainability statements.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	Ernst & Young	Auditor	United Kingdom			I disagree	The removal of any mention of Net zero targets (previously included in E1-7, paragraph 60) and lack of definition is damaging for the transparency and comparability of related disclosures. EFRAG's definition of net zero target is a key tool against greenwashing, where net zero targets are the gold standard to be achieved by companies. Having specific disclosures on the matter levels the playing field for reporting, by ensuring comparability of reporting and not misleading users of sustainability statements. We recommend EFRAG to reintroduce the deleted provisions on net zero targets in E1 §60 (Set 1) and the glossary, by clarifying that the net zero target is composed of a reduction in scope 1, 2 and 3 emissions of 90-95% before neutralisation of residual emissions. This would be in line with the long-term targets Net zero Standard of SBTi and with ISO Net Zero Guidelines (IWA 42:2025). EFRAG should also specify that neutralisation can occur through carbon removals both inside and outside of the value chain. We also suggest EFRAG to request a clear articulation between this information and the net zero target they have set in ESRS E1-6 for improved connectivity.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	34.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	Even though not necessarily related to carbon credits, insets are also an emerging mechanism used by many companies to offset or reduce emissions in the upstream/downstream value chain. The standard should include clarifications on whether these should be seen as carbon credits (with no implications on gross emissions) or whether these could be considered decarbonization levers with effects on gross emissions.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	36.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	This paragraph mentions the possibility of using carbon credits for neutrality claims. Considering possible deviation and interpretations around what it means to have a carbon neutrality claim, we suggest that EFRAG includes the definition of carbon neutrality in an AR or in the glossary . See previous comment on reintroduction of net zero target disclosures.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37.
Excels	Ernst & Young	Auditor	United Kingdom			I agree	We suggest that EFRAG specifies in the NMIG examples of "other factors necessary to understand the credibility and integrity of the carbon credits".	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	37. (b)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We note greater convergence with other EU text, which gives credibility and coherence to EU Green Deal directives. However, we note that references to GHGP Land sector guidance have been removed, raising questions about whether this expected GHG Protocol guidance shall be considered (when approved). It also poses the question of whether the Carbon Removals and Carbon Farming Certification is the only accounting method accepted. AR 28 b) indicates that removals can be from operations that the undertaking "owns, controls or contributes". We request EFRAG to clarify what "contributes" mean by providing examples in the NMIG (as per previous AR 59). EFRAG removed the sentence of the previous AR 58(c) stating 'if applicable, explain the role of removals for its climate change mitigation policy'. We encourage EFRAG to reintroduce this statement in order for preparers to consider and explain how removals play a role in their climate change mitigation policies.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 28
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	EFRAG removed the sentence of the previous AR 63(b) stating 'if applicable, explain the role of carbon credits in its climate change mitigation policy'. We encourage EFRAG to reintroduce this statement in order for preparers to consider and explain how carbon credits play a role in their climate change mitigation policies.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 29
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	For all of paragraph 40, regarding time horizons, the new wording shifts from a mandatory disclosure of physical risks over the short, medium and long term to a more flexible approach that allows companies to "consider" these time horizons (AR 30a). We encourage EFRAG to modify this requirement, to require instead the disclosure of anticipated financial effects linked to physical risks on all three time horizons (similar to IFRS 2 requirements). The requirement would read as "consider and disclose the time horizons (short, medium and long term) over which the effects of each climate-related risk and opportunity could reasonably be expected to occur". See also comment on skill and capabilities in question 19 of PART 2.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	See our comment on time horizons. We encourage EFRAG to provide guidance on assessing key assets to foster comparability, including for the financial sector and how to consider when an asset is at risk. To avoid confusion for preparers and auditors, we suggest EFRAG to clarify that percentage of assets should be understood in terms of value and not number of assets.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We encourage EFRAG to provide guidance and examples on how to disclose the location of assets. We foresee this point to be difficult for preparers as the level of granularity isn't specified and the question is commercially sensitive. We however agree with the proposition. We suggest providing examples on how to disclose this to foster comparability. To avoid confusion for preparers and auditors, we suggest EFRAG to clarify that percentage of assets should be understood in terms of value and not number of assets.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (b)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	See comment on time horizons	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (c)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	See comment on time horizons We suggest that EFRAG specifies revenue as being the net revenue disclosed in the financial statements.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We encourage EFRAG to state that the analysis should be based on the scenario analysis conducted in E1-2 instead of the requirement to explain how the company leverages on the assessment.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (e)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	For all of paragraph 41, regarding time horizons, the new wording shifts from a mandatory disclosure of transition risks over the short, medium and long term to a more flexible approach that allows companies to "consider" these time horizons (AR 30a). We encourage EFRAG to modify this requirement, to require instead the disclosure of anticipated financial effects linked to transition risks on all three time horizons (similar to IFRS 2 requirements). The requirement would read as "consider and disclose the time horizons (short, medium and long term) over which the effects of each climate-related risk and opportunity could reasonably be expected to occur". Moreover, we recommend to make an explicit reference to ESRS 1 §79 on the possibility to adopt different definition for medium and long term time horizons. See also comment on skill and capabilities in question 19 of PART 2.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41.
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	See comment on time horizons We encourage EFRAG to provide guidance on assessing key assets to foster comparability, including for the financial sector.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (a)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	While we have noted the guidance included in the NMIG on the type of events that could lead to "potential liabilities" to be disclosed, we encourage EFRAG to provide guidance on what is a potential liability from a sustainability reporting perspective. ESRS should be GAAP agnostic, yet, we note that some standards for financial statements provide for some criteria for recognition of liabilities and, if applicable, disclosures of "contingent liabilities" (e.g. in IAS 37). The wording of 41(d) referring to "do not meet recognition criteria but may have to be recognized in financial statements" suggests an analysis of the possibility to meet accounting criteria and adds confusion. EFRAG should clarify for example whether potential liabilities are distinct from 'contingent liabilities' in some framework.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	See comment on time horizons We suggest that EFRAG specifies revenue as being the net revenue disclosed in the financial statements.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (e)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	See comment on time horizons	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	Ernst & Young	Auditor	United Kingdom			I partially agree and partially disagree	We encourage EFRAG to state that the analysis should be based on the scenario analysis conducted in E1-2 instead of the requirement to explain how the company leverages on the assessment.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (g)
Excels	Dragerwerk AG &Co.KGaA	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Market based emission factors are often not available. DR should be changed to either '(location-based or market-based)' or '(location-based and - if available -market-based)'.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	Unclear whether included provision on EU Climate Law entails new requirements. Clarification also for audit process needed to avoid discussions.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Reduction targets, decarbonisation levers, key actions and the role of administrative, management and supervisory bodies are duplicated to paragraphs in E1-5, E1-6 and ESRS 2. This leads to additional work and complication even with clarification in new AR 2. Suggestion: Deletion of the requirements in the Transition Plan and additions in the named paragraphs.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The requirement on the qualitative assessment on locked-in GHG emissions from key assets and poducts is unclear and not comparable. The recording of locked-in GHG emissions is time-consuming and generates little added value. A qualitative assessment is not comparable between companies. It is unclear what counts as key assets and products. Proposal: Deletion of the paragraph, as it offers no added value and generates a lot of effort.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The alignment regarding the 1.5°C target has shifted from specific taregts to a broader focus on strategy and business models. This change introduces additional effort and complexity, as the terms "strategy" and "business model" are inherently flexible and open to interpretation. This flexibility allows for extensive discussions with auditors, but it does not provide any added value compared to the previous target-oriented approach. The taregts were integral to the strategy and were already aligned with the business model. Therefore, maintaining a clear focus on the alignment of targets is essential for effective alignment and implementation.	E1	E1-1 - Transition plan for climate change mitigation	AR 1
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	AR 2: See consultation E1-14.a. AR 2(a): AR 2.b: It is not clear why the requirement was moved to ARs. Complicates the reading of the standard, as it is a mandatory specification. AR 2.c: Some of the disclosures expected by the ESRS cover sensitive information from a strategic perspective, disclosure of which could be used to their disadvantage by non-EU competitors of EU issuers that are under no such transparency obligations. The current wording of the exemption for disclosure of sensitive information should be revisited as it is currently too stringent to be used to safeguard business secrecy, especially in an international business environment that risks becoming even tenser. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer. All data points regarding significant CapEx and OpEx amounts should be deleted. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer. New Wording "While this information helps demonstrate the coherence and credibility of the transition plan, there is no expectation that the undertaking disclose all internal information used to manage the plan." is not solving that above named issue.	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The requirment "explanation of the plans to manage – e.g. by transforming, decommissioning or phasing out – its GHG-intensive and energy-intensive assets and products." went from voluntary to mandatory. Additionally mandatory reporting requirements were added regarding "dependencies of future financial resources and other resources and how these may constrain the ability to implement the transition plan actions." This results in additional work to fulfill the reporting requirements. Proposal: Change to voluntary disclosures.	E1	E1-1 - Transition plan for climate change mitigation	AR 3
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Additional shall requirement to resources and actions taken imprecise. Generates high coordination efforts. Achieved and expected GHG emissions are metrics. These should not be in ARs. The inclusion of a shall statement on sector-specific standards also generates additional work in the survey. In addition, high coordination effort with the auditor due to lack of precision	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The disclosure requirement should be able to be fulfilled in the ESRS 2 section when describing material IROs. Otherwise it would be duplicated.	E1	E1-2 - Climate-related risks and scenario analysis	17.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The short-term period is limited to 1 year with reference to ESRS 1. It does not make sense to carry out a climate scenario analysis for the reporting year (physical and transitory risks), as various climate scenarios are unrealistic in one year. The short-term period should be removed from the disclosure requirement.	E1	E1-2 - Climate-related risks and scenario analysis	18.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	The short-term period is limited to 1 year with reference to ESRS 1. It does not make sense to carry out a climate scenario analysis for the reporting year (physical and transitory risks), as various climate scenarios are unrealistic in one year. The short-term period should be removed from the disclosure requirement	E1	E1-2 - Climate-related risks and scenario analysis	AR 5
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The disclosure of the entire evaluation of the resilience analysis is unrealistic, as it involves far-reaching confidential documents. Companies may experience competitive disadvantages as a result of disclosure	E1	E1-3 - Resilience in relation to climate change	AR 9
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Additional requirements that mean increased effort in carrying out the resilience analysis and providing evidence. Consideration of the points listed offers no added value for external stakeholders like investors.	E1	E1-3 - Resilience in relation to climate change	AR 10
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The information on achieved and expected GHG emissions should already be provided as part of the Transition Plan, AR 4. Duplication should be omitted	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Some of the disclosures expected by the ESRS cover sensitive information from a strategic perspective, disclosure of which could be used to their disadvantage by non-EU competitors of EU issuers that are under no such transparency obligations. The current wording of the exemption for disclosure of sensitive information should be revisited as it is currently too stringent to be used to safeguard business secrecy, especially in an international business environment that risks becoming even tenser. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer. All data points regarding significant CapEx and OpEx amounts should be deleted. Information on future investment projects is sensitive, and its disclosure may have a severe impact on the competitiveness of the preparer.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Absolute targets can mislead as they limit economic growth or reward market failure even for less CO2 intensive businesses. The disclosure of intensity/relative targets and the additional disclosure of the associated absolute values for the target year and the interim target year(s) means that companies must disclose the planned volume growth. This represents highly sensitive information and results in a competitive disadvantage and cannot be published. The current flexibilization of the requirement therefore does not represent the desired simplification. It should be possible to report intensity/relative targets without absolute values and also to prioritize intensity/relative targets over absolute targets.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	"In cases where the undertaking has only set a GHG intensity reduction target, it shall nevertheless disclose the associated absolute values for the target year and interim target year(s)." This requirement forces companies to disclose the planned volume growth. This puts them at a massive competitive disadvantage and cannot be published in this way.	E1	E1-6 - Targets related to climate change	AR 12

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Share of energy from nuclear sources in electricity mix should be deleted to avoid „duplication" with primary energy; little usefulness as metric is derived from statistical data only; share of nuclear energy in the electricity mix should not be part of reporting.	E1	E1-7 - Energy consumption and mix	28. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	E1 - 36 (d) should be kept as no additional burden for disclosing companies; Removal of disclosure on total emissions appears illogical, as both users and disclosers are likely to want to see this information published. Even though it can be calculated independently, the lack of a requirement may lead to unnecessary discussions about whether it can be provided as a voluntary additional disclosure.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	32.
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The introduced separate disclosure following the operational control approach allows for significant interpretation and is hence burdensome when aligning with auditors. EFRAG should make it clearer, that this is a "may"-disclosure.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	E1 AR 26 in reference to ESRS 1 3.7 results in a high number of new datapoints (e.g. big corporations with operations in >50 countries times approx. 15 CO2e categories plus various segments etc.). EFRAG should clearly state that the disaggregation of data is voluntary ("may…") or delete the AR completely. Furthermore, this disaggregation does not provide any added value for the users of the information; instead, it leads to information overload (multiple pages of disaggregated emissions data) and unjustified burdens for the disclosing company (information may not be available or only with high effort).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 26
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I partially agree and partially disagree	We welcome the revisions especially in AR 25 (d); but the disclosure required in AR 25 (g) should be deleted as Cloud computing is only rented through the user company (Scope 3) but already disclosed by the provider (Scope 1) which leads to double counting and high efforts for verification	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 25
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I agree	We welcome the revisions regarding the table to report on emissions and the flexibilities it allows in presenting the information.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Failure to achieve the general objective of reducing disclosure requirements. This information has not only been moved, but has been changed from may to shall. We see no added value for external readers in this information.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35. (d)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We believe that disclosing the monetary and percentage exposure to physical risks without considering adaptation measures is problematic. It involves high uncertainty, may overestimate risks, and could discourage proactive resilience efforts. Disclosures should account for adaptation actions to reflect a more accurate risk picture and encourage companies to invest in climate resilience.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	In many cases, adaptation measures cannot reliably be directly linked to specific assets. Doing so would require enormous effort or result in imprecise data that offers little value. Therefore, a one-to-one attribution is neither practical nor feasible.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We believe it is nearly impossible to reliably calculate the monetary amount and percentage of net revenue at risk from physical climate impacts before considering adaptation measures. The complexity arises from the high uncertainty of climate projections, the difficulty in quantifying future physical damages, and the challenge in accurately modeling how risks will evolve over time. Additionally, the lack of standardized methodologies and reliable data further complicates such estimations.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40. (d)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We believe that estimating the monetary and percentage impact on net revenue from transitional risks before considering mitigation and adaptation measures is highly challenging. Given the high uncertainty surrounding future policy changes, technological developments, and market shifts, it is more meaningful to incorporate measures into the assessment. Disclosing risks without accounting for planned actions may be misleading and fail to provide an accurate picture of the true risk exposure.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (a)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	In many cases, adaptation measures cannot reliably be directly linked to specific assets. Doing so would require enormous effort or result in imprecise data that offers little value. Therefore, a one-to-one attribution is neither practical nor feasible.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (b)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We believe that providing a detailed breakdown of the carrying amount of real estate assets used as loan collateral by energy-efficiency classes is challenging and may not be practical. Such detailed classification requires extensive data collection and consistent assessment methods, which can be resource-intensive and may result in inconsistent or unreliable information.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (c)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	We believe that identifying potential liabilities from climate transition risks that do not meet current recognition criteria is challenging due to inherent uncertainties. Such liabilities depend on future developments and may not be reliably quantifiable or recognizeable in the financial statements at this stage.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	The lack of precise data, the variability of future scenarios, and the difficulty in accurately predicting asset devaluation make such disclosures unreliable and potentially misleading. Therefore, BMW opts not to implement or publish such estimates.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	Such estimates are highly challenging because opportunities related to the transition are difficult to quantify accurately. Additionally, due to competitive reasons, we would prefer not to disclose such figures, as they could reveal strategic information and be misinterpreted.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	42.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	BMW AG	Preparer (non-financial preparing a sustainability report)	Germany			I disagree	BMW considers the prescribed calculation approaches under AR 30—such as disclosing effects over different time horizons, including all asset types, and presenting energy efficiency classes—challenging to implement and potentially risky from a competitive perspective. Disclosing detailed, asset-specific data and estimates could reveal strategic information to competitors. High reporting burden on companies, high implementation costs.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 30
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ED ¶14(c) & AR 3 vs. 2023 ¶16(d) & AR 3. Re-brands former SBM-3 content as a climate-specific DR. Increase rather than reduce/simplify disclosure burden.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ED - text deleted (was 2023 ¶ 16(g) & (i). Partial simplification of removing two datapoints (Deletes former requirement to disclose (i) exclusion from Paris-aligned benchmarks and (ii) governance approval status of the transition plan)	E1	E1-1 - Transition plan for climate change mitigation	14.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Certain companies in business sectors that cannot develop a transition plan without relying on a high degree of assumptions that are out of their direct control. This opens the company up to greenwashing and economic hardship. To avoid greenwashing, companies must substantiate their environmental claims. Within the mobility field, we cannot achieve net-zero by 2050 unless (1) the grid in all the countries where we operate is 100% fossil fuel free, and (2) all vehicles are powered by carbon free fuel (or electricity). Any assumptions we make in a transition plan will be based on predicting the global grid in 2050 and the adoption of EVs and other technologies by the public. This is completely out of our control and would be purely speculative. Moreover, imposing an obligation on companies to align their business model with the 1.5C aspirational goal is highly problematic, given that the Nationally Determined Contributions (NDCs) of states under the Paris Agreement do not to respect the 2C target (the UN Environment Programme estimates the current trajectory to be at 2.6-3.1C). Strengthened collective efforts are needed, but the proposed transition plans expect companies to fulfil an obligation they do not have full control over.	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Requirement for explanation of TP "decarbonization levers identified and key actions planned" (by reference to E1-3) is not feasible for FIs for whom Scope 3 Cat 15 is most relevant, given lack of direct control and inability to quantify amount of client decarbonization directly resulting from bank decarbonization "actions". ARs should recognize inability of FIs to quantify expected GHG reductions as part of TP and permit disclosure of TPs without this detail. It is recommend to change to voluntary disclosure to avoid subjective judgments, inconsistent reporting, and audit risks. The primary concern with financial disclosures is their relation to sensitive competitive information like future product plans. Regarding the new GHG boundary rule, the mandatory "shall" requirement introduces major complexity and confusion.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Disclosure of resources associated with any transition plan necessarily requires a clear picture of the underlying plan itself. As noted in response to E1-1, multiple external variables make it challenging for mobility companies to publish transition plans that meet a strict rubric for included disclosures. Given the flexibility required to be associated with any transition plan, it is difficult to implement a transition plan with clear financial resources attached to any specific category. Accordingly, it would be beneficial for these data points to be streamlined with a set of financial reporting requirements that is tied only to the information (if any) disclosed as part of any company's designed transition plan.	E1	E1-1 - Transition plan for climate change mitigation	14. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Reporting on dependencies is logical but requiring firms to report on locked-in GHG emissions will lead to undue cost and burden, especially for those firms not in the energy sector. Recommend removing the locked-in emissions DR and maintaining the transition plan dependencies DR. This change provides the same level of information that stakeholders are interested in, yet avoids too granular of a disclosure which is not actionable or comparable. ED ¶14(c) & AR 3 vs. 2023 ¶16(d) & AR 3. Adds explicit requirement to disclose "dependencies" (e.g., technology deployment, market demand, policy assumptions) on which the transition plan relies. Increase rather than reduce/simplify disclosure burden; qualifying language ("shall include") remains prescriptive and does not create real flexibility.	E1	E1-1 - Transition plan for climate change mitigation	14. (c)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Undertakings which do not have a TP need to indicate whether and – if so – when it will adopt a TP. TPs meeting ESRS requirements may be a new concept and also something guided by applicable law; therefore it is hard for firms to give a precise date for when an ESRS-compliant TP will be adopted. So as to not lead to imprecise answers given the shifting nature of mandatory transition plans, it would be more appropriate for this DR to not ask when firms will adopt TPs (particularly when legislative regimes requiring TPs – such as CSDDD – have had their application dates delayed). Disclosure is redundant and should be removed. Agree with comments that if a transition plan is not disclosed then the undertaking does not have one. Requiring an undertaking to make an affirmative disclosure implies they are required to adopt a climate transition plan.	E1	E1-1 - Transition plan for climate change mitigation	15.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				CapEx and Opex should be optional AR 2 refers to ESRS E1-6 AR 17 which does not seem to exist. Does this Application Requirement imply that validation of climate targets through a third-party is required?	E1	E1-1 - Transition plan for climate change mitigation	AR 2
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	ED ¶14(c) & AR 3 vs. 2023 ¶16(d) & AR 3. Introduces explicit requirement to provide a "qualitative assessment of locked-in emissions" and an explanation of how these may jeopardise target achievement (previously this was guidance only). Narrative elements increase rather than reduce/simplify disclosure burden; qualifying language ("shall include") remains prescriptive and does not create real flexibility.	E1	E1-1 - Transition plan for climate change mitigation	AR 3
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The requirement to classify climate risk as phsyical or transition risk appears to require more granular detail than what has been stated in ESRS 1 and ESRS 2 regarding DMA granularity. ED ¶¶17-19 & AR 5-7 vs. 2023 ¶¶18-21 & AR 11-15 (distributed). Consolidates but also formalizes previously voluntary methodological detail into mandatory datapoints, expanding scope. Moving content that was previously dispersed across ESRS 2 IRO-1/IRO-2 and AR paragraphs into a distinct DR does not lessen work effort; formalising methodology elements increases compliance complexity	E1	E1-2 - Climate-related risks and scenario analysis	17.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	We would ask to reconsider FI specific definitions for upstream and downstream Requires disclosure of "key elements of the methodology" including spatial resolution for physical risks and scenario sets for transition risks. Moving content into a distinct DR does not lessen work effort; formalising methodology elements increases compliance complexity	E1	E1-2 - Climate-related risks and scenario analysis	18.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	In original ESRS E1 IRO-1, we suggested changing "When disclosing the information required under paragraphs 20 (b)and 20 (c) the undertaking shall explain how it has used climate-related scenario analysis…." to "… how or if…" as it should not be implied that the identification of E1 IROs be restricted to the use of scenario analysis. This has not been changed in the exposure draft	E1	E1-2 - Climate-related risks and scenario analysis	19.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Alignment with IFRS S2.22 in DR21 may be complicated to narrate as it askes for risks and opportunities that could reasonable affect the entity's cash flows, access to finance or cost of capital in S-M-L term horizons. This is similar to anticipated financial effects. So we don't think it should be aligned here. Moreover, we would request the consideration of FI specific clauses for references to upstream and downstream value chains.	E1	E1-2 - Climate-related risks and scenario analysis	21.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Doesn't appear to be any revision to account specifically for the FI sector, and the "areas of uncertainty" concept now has been included in the substantive requirement under §21 (when we think it should be excluded). KOCH - ED ¶21(a)-(c) & AR 8-10 vs. 2023 ¶19 & AR 6-8. Adds two new qualitative datapoints (requirement to disclose "significant areas of uncertainty" in resilience assessment and "capacity to adjust" business model). New uncertainty and capacity disclosures add subjective narrative burden without reciprocal relief elsewhere.	E1	E1-3 - Resilience in relation to climate change	21.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Clarification need on if all undertakings shall disclose the energy efficiency of their real estate, including udnertakings with only leased offices. If all undertakings are reqired to report, this may lead to the reporting of non material information (e.g. if undertakings only have leased offices which are small offices in a large building, therefore they will have little control of the overall efficiency of said building)	E1	E1-3 - Resilience in relation to climate change	AR 30
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	No substantative content change. Merely relabels former DR E1-2. Administrative change only.	E1	E1-4 - Policies related to climate change	22.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				24. Recommend making this optional in some manner - Removes obligation to reconcile CapEx/OpEx to Taxonomy KPIs (2023 ¶29(c) ii-iii). "shall include the achieved GHG emission reduction and should include the expected GHG emission reduction"	E1	E1-5 - Actions and resources in relation to climate change	24.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	From the original ESRS, E1 §29(b) required disclosure of "achieved and expected GHG reductions" resulting from actions for climate change mitigation. AR 19(c) required disclosure of key mitigation actions alongside GHG targets. Disaggregated by decarbonization lever. These disclosures not possible and not useful in the context of Scope 3 Category 15 Financed Emissions for banks. Bank actions for CCM will not result in direct and calculable GHG reductions. While can show achieved reductions, not possible to attribute those to specific bank actions/decarbonization levers since reductions stem from client activity. §29(b) should recognize the impracticability described above and disclosure of achieved/expected GHG reductions should be required only "where reasonably calculable". The revised drafts retain largely the same language as before, without any qualification language.	E1	E1-5 - Actions and resources in relation to climate change	24. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				24.c Make inclusion of CapEx and OpEx optional. Active CapEx/OpEx beyond what's already included in financial disclosures might be business sensitive and challenging. Anticipated CapEx/OpEx would be hard to quantify and sensitive to disclose, especially at certain levels of granularity. - Requiring future financial resources contradicts ESRS 2 that says only communicated amounts may be disclosed. Recommend aligning to that since oftentimes asking companies to report future spend can lead to undue cost and burden and legal concerns. Additionally breaking out CapEx and OpEx is not feasible for all companies, especially professional services based firms. Introduces mandatory disclosure of "quantitative short- and medium-term CapEx/OpEx figures and anticipated long-term ranges. Replacement of reconciliations with forward-looking CapEx/OpEx ranges still demands modelling effort; simplification limited. It is recommend to change to voluntary disclosure to avoid subjective judgments, inconsistent reporting, and audit risks. The primary concern with financial disclosures is their relation to sensitive competitive information like future product plans. Regarding the new GHG boundary rule, the mandatory "shall" requirement introduces major complexity and confusion.	E1	E1-5 - Actions and resources in relation to climate change	24. (c)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	We believe these disclosures are burdensome and it is not practicable to meet all GDR-T and E1-6 disclosures for long-term (usually 2050) Net Zero Commitments or Targets. These are typically managed through a focus on the relevant interim targets along the pathway to Net Zero. Items expected by GDR-T and E1-6 will not be available for target set 25 years out resulting in non-decision useful information that is unlikely to meet the Quality of information requirements of ESRS 1. Undertakings that have made long-term Net Zero commitments should be able to limit disclosure to their interim targets which corresponds to how this is managed. Can EFRAG clarify this either in the standards or the NMIG since the Glossary definition of "target" will still pick up firms' 2050 net zero commitments. KOCH - Deletes the fixed obligation to publish 2030 and 2050 target values (2023 ¶34(d)). Removes two prescriptive datapoints, allowing undertakings to define interim horizons but does not alleviate bulk of target-related calculations; other prescriptive elements retained.	E1	E1-6 - Targets related to climate change	25.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Net disclosure effort unchanged. Additional qualitative disclosures offset minor deletion. Retains science-based pathway benchmarking and makes narrative explanation more detailed, requiring disclosure of underlying policy scenarios and assumptions	E1	E1-6 - Targets related to climate change	26.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	AR 23 of the original ESRS required an entity that has set only an intensity GHG reduction target to also disclose associated absolute values for target and interim years. Estimating future absolute values for financed emissions targets at a portfolio level is subject to numerous assumptions that reduce the decision-usefulness and potential accuracy of the metric. None of ISSB, NZBA or SBTi require this for banks' finance emissions targets EFRAG should revise AR 23 to make "conversion" of intensity targets to absolute values a "may" rather than "shall" requirement or clarify that banks calculating portfolio level financed emissions targets may do so in either absolute or intensity terms. In the latest exposure drafts, there is still a requirement for the disclosure of absolute values for target and interim years. It is unclear if undertakings should also disclose intensity based targets in this section or if they are required to convert an intensity target to an absolute target. If conversion is required, that will lead to undue cost and burden since the conversion requires assumptions and the metric may not be decision useful due to the inherent data challenges.	E1	E1-6 - Targets related to climate change	26. (a)

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	The multiple dimensions of information required in order to meet Scope 3 targets makes it difficult for private companies to disclose without showing business growth projections/ information on how the business may evolve, which can be highly sensitive for private businesses. Given this, and the "double-" or "multiple-counting" of emissions that often occurs when seeking to comply with the Scope 3 Emissions requirements, additional effort should be taken to limit Scope 3 reporting obligations to only require total amounts not to require breakdowns from each separate Scope 3 category.	E1	E1-6 - Targets related to climate change	26. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Previous ESRS E1 §34(b) required that disclosed GHG reduction targets be gross targets not including removal, credits or avoided emissions. But Net Zero targets assume a certain amount of residual emissions will be neutralized by these means—as was recognized in E1-7 §60. It should be clarified if Net Zero targets are NOT subject E1-4 and only MDR-Ts. This should be clarified and previous §34(b) and §60 should reconcile better - we note however this has not been clarified in the exposure draft, moved the requirement to report gross into AR 11, and deleted the prior E1-7 §60.	E1	E1-6 - Targets related to climate change	26. (b)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	For the previous ESRS 1 §34(e), we sought guidance on what's needed to show targets are "science-based and compatible with limiting global warming to 1.5C."; guidance on this does not seem to have been provided in the exposure drafts.	E1	E1-6 - Targets related to climate change	26. (c)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Requiring translation of intensity targets to absolute targets may require competitive and confidential information and is not always useful to end users of the sustainability statement. For example, for high growth firms, the more important metric for most investors is that GHG emissions are being decoupled from growth, not that absolute emissions have gone down (which would imply the firm is experience low growth or contraction)	E1	E1-6 - Targets related to climate change	AR 12
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 16. Requiring separate 1.5C aligned reference target values for Scope 1&2 and Scope 3 would be inefficient. Allow for consolidated cross emission pathway compatible targets.	E1	E1-6 - Targets related to climate change	AR 16
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Exposure draft drops subsection on energy-intensity per revenue (2023 ¶¶40-43 & AR 36-38). Eliminates one quantitative KPI & reconciliation; tangible reduction in burden (especially for service entities). Simplification is isolated – comparable deletions for other intensity metrics (GHG intensity) needed to yield meaningful simplification.	E1	E1-6 - Targets related to climate change	27.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ED ¶28-30 vs. 2023 ¶37-39 & AR 33-35. Retains energy-mix breakdown but no longer mandates disaggregation by high-impact sectors. Proposal to remove sector-specific split can reduce complexity for diversified groups but the sector filter removal marginally eases data gathering requirements due to the retention of the extensive fuel-type granularity required.	E1	E1-7 - Energy consumption and mix	28.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				"origin" here may be misinterpreted as requiring physical delivery of the electricity, which is impossible to guarantee in a electrical grid. It also isn't correct to refer to "purchased energy" as the actual energy isn't the thing that conveys the right to claim the renewable nature - the environmental attribute certificate is the purchased item that achieves that. Recommend changing to: "…may only consider these energy consumptions as deriving from renewable sources if the nature of the purchased environmental attribute is clearly defined in the contractual arrangements with its suppliers…"	E1	E1-7 - Energy consumption and mix	AR 17
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				Point 14 a (16 amended) requires disclosure about 'financial and investment planning.' Recommend that this aligns and potentially helps comply with a similar requirement in Empowering Consumers Directive (ECD) on future claims	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	14. (a)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				E1-8 requires reporting of absolute GHG emissions, excluding any GHG removals from activities within the organizational boundary. E1-9 requires reporting of GHG removal and storage projects, which by definition are increases in removals compared to a baseline. This creates a gap, where removals that happen due to general activities within the organizational boundary (e.g. biogenic carbon in products) are not able to be reported anywhere. A building supply company making tables out of bamboo grown on-site would thus report their energy emissions of manufacturing as a positive emission, but cannot report the carbon removal of their bamboo harvest even though it is locked in product for 20-30 years. Recommend including in E1-8 either including an additional reporting column for GHG removals within the boundary of the organization or value chain (excluding projects or financed credits), or allowing such removals to be summed with GHG emissions.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				The organizational boundary to be used in disclosing paragraph 32 shall consider aligning with either ISO 14064-1 or GHGP Corporate Standard (2004), allowing companies the option to choose between a financial-control or operational-control boundary. AR 18 19 and 21 be aligned when it comes to reporting boundary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	20.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 25.g. Requiring separate disclosure of "purchased cloud computing and data center services" should be optional and not required. Table in AR27 suggests it would be optional, but language in AR25 suggests not. Recommend clarifying this should be optional and align requirements across ARs.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	25.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Removes mandatory disclosure of a single "Total GHG emissions" figure (2023 ¶44(d) & ¶52). Total-GHG removal simplifies reporting	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Deletes mandatory GHG-intensity per revenue KPI (2023 ¶¶53-55 & AR 53-55). Meaningful simplification to remove a commly crtiized intensity metric and related financial reconciliation however comparable datapoints persist elsewhere (e.g., energy).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The updates reduce the clarity on how to report Biogenic CO2 emissions. As written, the new DR could be read as requiring a single line item of total Biogenic CO2 emissions (direct, indirect, and value chain). However, this would deveate from common practice, as such, I believe the intention is to require disclosure of Biogenic CO2 emissions as a separate item for direct, indirect, and value chain as three separate line items. Additional updates can help clarify this.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	33.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 18 for para. 32 Corporates should be able to choose between financial control and operational control baesd on which is more appropriate for the organization, It is recommended to change this to voluntary disclosure. A new requirement introduces potential complexity by mandating that companies "shall" also report emissions using the "operational control" method if the financial control approach fails to provide a fair presentation. This adds ambiguity and should be an optional ("may") disclosure rather than a mandatory one.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				The organizational boundary to be used in disclosing paragraph 32 shall consider aligning with either ISO 14064-1 or GHGP Corporate Standard (2004), allowing companies the option to choose between a financial-control or operational-control boundary. AR 18 19 and 21 be aligned when it comes to reporting boundary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Requiring a financial control boundary will pose undue cost and burden on firms that currently use an operational control approach and whose GHG emissions targets are based on an operational control approach. Recommending providing flexibility here for undertakings to choose the approach that best aligns to their circumstances and providing rationale for that approach. For example, many professional services firms lease their offices and under a financial control approach all of the emissions associated with leased offices would be captured under Scope 3. Under an operational control approach these emissions would be categorized under Scope 1 and 2, which is also how undertakings have set their climate targets. Requiring a financial control approach will lead to confusion for the reader and does not add any decision useful information, in fact it may lead to information that is not decision useful (e.g. in the example of firms with leased offices they would report almost no Scope 1 and 2 emissions).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 18
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				The organizational boundary to be used in disclosing paragraph 32 shall consider aligning with either ISO 14064-1 or GHGP Corporate Standard (2004), allowing companies the option to choose between a financial-control or operational-control boundary. AR 18 19 and 21 be aligned when it comes to reporting boundary.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Requiring firms to disclose both financial control and operational control due to specific facts and circumstances will lead to undue cost and burden for undertakings that are in scope since calculating GHG emissions inventories is a time consuming and expensive exercise usually involving hiring consultants or purchasing expensive software. Additionally it will not lead to more decision useful data and instead lead to too many data points that are too granular for investors and other stakeholders to make a decision on.	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 19
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Deletes mandatory GHG-intensity per revenue KPI (2023 ¶¶53-55 & AR 53-55). Meaningful simplification to remove a commly crtiized intensity metric and related financial reconciliation however comparable datapoints persist elsewhere (e.g., energy).	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	31.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 28 for para 35 (a) The EU CRCF will not universally apply to all carbon credits, e.g. those that are in projects outside of the jurisdiction of the CRCF. This should be an example, not a requirement. (Also, the CRCF isn't a "consensus method"…) Change to "….are available and where appropriate, such as the EU Carbon Removals and Carbon Farming Certification (CRCF) Regulation6, ICVCM Core Carbon Principles, GHG Protocol Land Sector and Removals Guidance, and/or other internationally recognized guidances and methodologies."	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 28
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 29 for para 36 (b) This item excludes from consideration credits issued from projects within the undertaking's own operations, but this doesn't consider the possibility of the undertaking keeping ownership of those issued credits and retiring them. Just because a credit is issued doesn't mean the undertaking can't be the one to receive them - they might be registering their own project on a registry specifically to increase transparency and credibility of their removal initiative. AR 28 for para 35 (b) has language around removals from own-operations that makes it conditional on whether the credits have been sold to another party. That same language should be mirrored here. Change to: "not include … upstream and downstream value chain and have been sold to another party to avoid double counting…"	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 29
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium				AR 29 for para 36 (b) This item excludes from consideration credits issued from projects within the undertaking's own operations, but this doesn't consider the possibility of the undertaking keeping ownership of those issued credits and retiring them. Just because a credit is issued doesn't mean the undertaking can't be the one to receive them - they might be registering their own project on a registry specifically to increase transparency and credibility of their removal initiative. AR 28 for para 35 (b) has language around removals from own-operations that makes it conditional on whether the credits have been sold to another party. That same language should be mirrored here. Change to: "not include … upstream and downstream value chain and have been sold to another party to avoid double counting…"	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	AR 29
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I agree	Agree with providing flexibility to undertakings on how to report their GHG emissions and not mandating the use of the table, instead making the table optional	E1	E1-8 - Gross Scopes 1, 2, 3 emissions	AR 27
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ESRS E1 does not include sufficient clarity on what contractual instruments can be applied and what counts as regulated contractual instruments (recognizing that AR28(a) provides GHG removal guidance). Given the volume of third-party contractual instruments and the differences in markets and where government entities do or do not monitor contractual instruments, the clarity of what can and cannot be applied is critical.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	34.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Need clarification on what is considered "in" its operations, upstream or downstream value chain versus "out". Introduces new quantitative datapoint adding complexity. Makes disclosure of "reversals" of removals mandatory where previously it was optional guidance.	E1	E1-9 - GHG removals and GHG mitigation projects financed through carbon credits	35.
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	ED preamble note; deletion of acute/chronic split; ED ¶40-42. Persisting asset-location & energy-class breakdowns remain highly granular; relief only postpones, not removes, compliance effort.	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	40.

Source	Company	Type of responder	Country	Question No	Question Text	Selected answer	Comment/Suggestion	Standard	Related Chapter/DR	Paragraphs
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Clarification needed that this metric for net revenues from fossil fuel sector clients should only be disclosed if material	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (d)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Clarification need this metric is subject to materiality . Additionally do all revenues from fossil fuel sector companies need to be disclosed? What if a firm is providing HR training to such a firm? Should that be disclosed even if it has nothing to do with the extraction, production or use of fossil fuels?	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	41. (f)
Excels	American Chamber of Commerce to the EU	Business association (other than association of financial institution)	Belgium			I disagree	Clarification need that the quantification of financial effects is subject to a materiality threshold, otherwise information that is not useful will be provided (e.g. for low emitting sectors this number is likely not material)	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	AR 7
Excels	European Construction Industry Federation (FIEC)	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	The need for transparency on energy consumption by large undertakings subject to mandatory disclosure requirements is acknowledged. At the same time, it should be emphasised that in the construction sector the value chain is predominantly composed of SMEs operating on temporary and mobile construction sites, which, although not subject to the CSRD, will nevertheless be required to provide energy data to contractors, when they operate as subcontractors. In order to avoid disproportionate burdens, it is considered appropriate to limit the request for detailed information (i.e., distinguishing between specific fossil fuel sources) to undertakings directly subject to the obligation, while allowing non-listed SMEs to report aggregated data (not beyond the level of total renewable vs. non-renewable consumption), also by means of simplified templates that might be provided by parent companies or contracting authorities	E1	E1-7 - Energy consumption and mix	7.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	The consideration of energy as a disclosure requirement increases complexity	E1	E1 - Objective	4.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	More clarification is needed on the reporting of CO2	E1	E1 - Interaction with other ESRS	12.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	former 10. (b) it needs to be clarified that undertakings may cross reference to other topicl standards, if neccessary . Combining all topics will highly increase workload and diverge from the material topics	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	former 10. (b) it needs to be clarified that undertakings may cross reference to other topicl standards, if neccessary . Combining all topics will highly increase workload and diverge from the material topics	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	It needs to be clarified that this cannot be laid out in detail as technological development is highly dynamic and only projects that have been board approved, can be reported	E1	E1-1 - Transition plan for climate change mitigation	AR 4
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	needs to be specified that reporting level needs to be on topic level	E1	E1-1 - Transition plan for climate change mitigation	13.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I agree	The disclosure requirement on climate change actions seems streamlined	E1	E1-11 - Anticipated financial effects from material physical and transition risks and potential climate-related opportunities	23.
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Providing absolute value related to intensity targets can imply disclosing confidential information	E1	E1-6 - Targets related to climate change	26. (a)
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I partially agree and partially disagree	Alignment between operational control boundaries and organisational boundaries might be difficult to achieve	E1	E1-6 - Targets related to climate change	AR 15
Excels	Euromines	Business association (other than association of financial institution)	Belgium			I disagree	Disclosing separately Scope 1,2 and 3 increases granularity	E1	E1-6 - Targets related to climate change	32.
